"This station is now in hands of enemy. Your insolence will not be tolerated by German troops. This station now in control of German Signal Corps."
STATISTICAL YEARBOOK

Financial and operating data relating to common carriers and broadcast stations subject to the provisions of the Communications Act have been assembled in a single volume entitled “Statistics of the Communications Industry in the United States”, which has just been placed on sale by the Superintendent of Documents, Government Printing Office, Washington, D. C., at a price of 25 cents a copy.

These statistics, compiled by the Accounting, Statistical and Tariff Department of the Federal Communications Commission from reports filed with the Commission, are being presented in yearbook form for the first time. The initial volume covers the year ended December 31, 1939.

The publication includes summary data, individual company data and intercorporate relationships of telephone, telegraph, cable and radiotelegraph carriers, and financial and operating data relative to standard broadcast stations and networks.

The compilation replaces mimeographed material heretofore issued at intervals and is augmented by statistical tables formerly included in the Commission’s annual report to Congress.

PROCEDURE REVISED

The FCC announced that its procedure for examination of standard broadcast, high frequency broadcast, international, and television radio applications by the staff departments has been further revised with a view to more expeditious handling, extending the principle of simultaneous consideration of applications announced October 19, 1940 (mimeograph No. 44324).

Under the new procedure, applications falling within the above classes will be required to be filed in triplicate instead of in duplicate as formerly. However, in the case of such applications designated for hearing, applicants will no longer be required to accompany their appearances with an additional copy of the application.

In all other respects, the procedure announced in the Commission’s release of October 19, 1940, will be continued.

It is not the intention of this change in procedure (amending Items d and f contained in Section 1.351, and Section 1.352(b) of the Commission’s Rules of Practice and Procedure) to require filing of additional engineering data, since three copies of maps and other technical material are already furnished with broadcast applications.

STL BROADCAST RULES AMENDED

The Commission en banc on April 29 amended the rules, effective immediately, governing STL (Studio Transmitter Link) broadcast stations so as to provide for the utilization of stations in this service by licensees of international broadcast stations.

Conforming with the Commission’s action, the amended rules will permit the holding of not more than two STL broadcast station licenses in connection with each license for an international broadcast station.

RULE CHANGE

The Commission en banc today amended Section 1.351, items d and f, and Section 1.352(b) of the Commission’s Rules of Practice and Procedure, so as to require the furnishing by applicants of three copies of standard broadcast, high frequency broadcast, international, and television radio applications instead of duplicate copies as heretofore.

The effective date of these amendments will be May 1, 1941.

ASSIGNMENTS

The FCC announces that the work, business and functions of the Commission for the month of May have been assigned as follows:

Commissioner Wakefield: Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Craven: Designated to hear and determine, order, certify, report or otherwise act upon: (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearings, including all motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission’s Rules and Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission’s Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

FEDERAL COMMUNICATIONS
COMMISSION DOCKET

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, May 5. They are subject to change.

Monday, May 5

KFJ1—KFJ1 Broadcasters, Inc., Klamath Falls, Ore.—C. P., 600 ke., 500 watts night, 1 KW LS.
Tuesday, May 6

Wednesday, May 7
KFNF—KFNF, Incorporated, Shenandoah, Iowa.—Renewal of license, 890 kc., 500 watts night, 1 KW day, SH-KUSD.

FUTURE HEARINGS
During the past week the Commission has announced the following future hearings and oral arguments in broadcast cases. They are subject to change.

May 19
Hearing to be held in Pensacola, Florida, Beginning May 19 and Continued Thereafter in Panama City, Florida and Ocala, Florida, as follows:

Pensacola, Florida, in Court Room, County Court Building.
Panama City, Florida, in Court Room, County Court House.
Ocala, Florida, in U. S. Court Room, 2nd Floor, U. S. Post Office Bldg.

WTMC—Ocala Broadcasting Company, Inc., Ocala, Fla.—In the matter of revocation of license of station.
WDLP—Panama City Broadcasting Company, Panama City, Fla.—In the matter of revocation of license of station.

May 22
Oral Argument Before the Commission
NEW—Hobart Stephenson, Milton Edge, Edgar J. Korsmeyer, d/b as Stephenson, Edge & Korsmeyer, Jacksonville, Ill.—C. P., 1150 kc., 250 watts, daytime.
NEW—Helen L. Walton & Walter Bellatti, Jacksonville, Ill.—C. P., 1150 kc., 250 watts, daytime.

May 23
KMLB—Liner’s Broadcasting Station, Inc., Monroe, La.—C. P., 1140 kc., 1 KW, unlimited, DA-night.

May 28
KRBC—Reporter Broadcasting Company, Abilene, Tex.—C. P., 910 kc., 1 KW, unlimited, DA-night and day. Present assignment: 1120 kc., 250 watts, unlimited.
WRDO—WRDO, Incorporated, Augusta, Me.—Renewal of license, 1370 kc., 100 watts, unlimited time.

June 2
To be Held in Atlanta, Georgia
Court Room to be Assigned Later
WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license (main and auxiliary), 880 kc., 1 KW night, 5 KW LS, unlimited time.

June 24

June 26

July 7
KWTO—Ozarks Broadcasting Company, Springfield, Mo.—C. P., 560 kc., 1 KW, night, 5 KW, day, unlimited, DA-night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED
KSUN—Copper Electric Co., Inc., Lowell, Ariz.—Granted authority to transfer control of the Copper Electric Co., Inc., licensee of Station KSUN, from James S. Maile and Lawrence R. Jackson to Carlton W. Morris (463½ shares, or 58.7% of the issued and outstanding capital stock of the licensee corporation, for a total consideration of $6,001; station operates on 1200 kc., 250 watts, unlimited time (B5-TC-245).

WESX—North Shore Broadcasting Co., Salem, Mass.—Granted construction permit to make changes in equipment and increase power from 100 watts night and day to 250 watts night and day; 1230 kc. (B1-P-3052).

WHBL—Press Publishing Co., Sheboygan, Wis.—Granted construction permit to install directional antenna for nighttime use and increase power from 250 watts night, 1 KW day, to 1 KW night and day; 1330 kc. (B4-P-2972).

KRJF—Sarah M. Scanlan, Executrix of estate of Jos. D. Scanlan, Deceased (Transferor), Sarah M. Scanlan (Transferee), Star Printing Co. (Permittee), Miles City, Mont.—Granted authority to transfer control of corporation from Sarah M. Scanlan, executrix of the estate of Joseph D. Scanlan, deceased, to Sarah M. Scanlan. The purpose of the application is to assign and transfer 403 shares of common voting stock in Star Printing Co., permittee of station KRJF from Sarah M. Scanlan in her representative capacity as executrix to herself personally. Station operates on 1310 kc., 250 watts, unlimited time (B5-TC-262).

Alamance Broadcasting Co., Inc., Burlington, N. C.—Granted construction permit for new standard broadcast station to operate on 920 kc., 1 KW, daytime only; exact transmitter site and antenna system to be determined with Commission's approval (B3-P-3093).

K47SL—Radio Service Corp. of Utah, Salt Lake City, Utah.—Ordered issuance of construction permit for new FM station with condition that no construction facilities shall be undertaken or completed until Commission has acted on the general newspaper-ownership question under Order No. 79.

W55M—The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—Ordered issuance of construction permit for new FM station under last proviso of Order No. 79, upon finding that public interest, convenience and necessity will be served by construction at this time, and without prejudice to determination of newspaper issue.

DESIGNED FOR HEARING
West Allis Broadcasting Co., West Allis, Wis.—Application for construction permit for new standard broadcast station to operate on 1180 kc., 250 watts, daytime only; applicant requests local operation on regional channel (B4-P-3045).

KFJM—University of North Dakota, Grand Forks, N. D.; Dalton Le Masurier, Grand Forks, N. D.—Application for renewal of license of KFJM to change hours of operation from unlimited to specified hours (3 to 5 p.m., daily) and change studio site to University Campus, Grand Forks, N. D. (B4-ML-1045); to have consolidated hearing of above two applications and application of Dalton Le Masurier for new station to operate on 1110 kc., 500 watts night, 1 KW day, S. H., requests facilities of KFJM (B4-P-3034).

WTQ—WTVY, Inc., Green Bay, Wis.—Application for construction permit to make changes in directional antenna system to use same pattern day as now used at night; involves loss of service to over 100,000 listeners; 1360 kc., 500 watts night, 5 KW LS.

RENEWAL OF LICENSES
Granted renewal of the following developmental broadcast station licenses for the period May 1, 1941, to May 1, 1942:
W3XDD, Whippany, N. J.; W3XPY, Whippany, N. J.;
W3XO—Mason, Ohio; W10XF, National Broadcasting Co., Inc. (portable); W1EXB, National Broadcasting Co., Inc. (portable-mobile).
W9XC—Central Broadcasting Co., near Mitchellville, Iowa.—Granted license of development for television station expiring May 1, 1941, to June 1, 1941, pending receipt of applications for renewal of license (B1-SEP-1260).
WBOE—Cleveland City Board of Education, Cleveland, Ohio.—Granted renewal of non-commercial educational television station license for the period May 1, 1941, to May 1, 1942 (B2-RED-1).
Granted further extension upon a temporary basis only, pending determination upon applications for renewal of licenses, in no event longer than June 1, 1941, of following television stations:

- Granted further extension upon a temporary basis only, pending determination upon applications for renewal of licenses, in no event longer than June 1, 1941, of following high frequency broadcast stations:

W3XIV, New York City; W3XLA, Denver, Colo.; W3AXA, Nashville, Tenn.; W3XAU, Oklahoma City, Okla.

**MISCELLANEOUS**

KECA—Earle C. Anthony, Inc., Los Angeles, Cal.—Granted modification of construction permit (B5-P-2698, which authorized increase in power and installation of DA for night use) for change in directional antenna on 750 kc. under NARBA (B5-MP-1251).

WTNA—Atlantic Coast Broadcasting Co., Charleston, S. C.—Granted modification of construction permit (B3-P-2985, for new transmitter, installation of DA for night use, increase in power to 1 kw, change in frequency from 1210 kc. to 1220 kc., and move of transmitter), for installation of new transmitter, requesting 1250 kc. under NARBA, changes in DA system, and extension of commencement date 30 days after grant and completion date to 60 days thereafter (B3-MP-1262).

KOIL—Central States Broadcasting Co., Omaha, Neb.—Granted modification of construction permit (B4-P-2699, which authorized installation of DA and increase in power) for changes in DA and 1290 kc. under NARBA (B4-MP-1245).

WDBC—Delta Broadcasting Co., Escanaba, Mich.—Granted modification of construction permit (B2-P-2854, which authorized a new broadcast station) for approval of vertical antenna, approval of studio site, transmitter site and installation of new transmitter, 1490 kc., 250 watts, unlimited time (B2-MP-1143).

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Granted modification of policy of station WIXPW for a period beginning April 28, in re application for renewal of license.

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Pa.—Granted modification of construction permit (B2-P-2451, as modified, which authorized installation of new transmitter and directional antenna for day and night use, increase in power, change of frequency, and move of transmitter), for installations in directional antenna for day and night use, requesting 910 kc. under NARBA (B2-MP-1224).

KWRO—Oscar C. Hirsch, Cairo, Ill.—Granted modification of construction permit (B4-P-302, which authorized a new station) for approval of transmitter and studio sites, approval of antenna, and 1490 kc. under NARBA (B4-MP-1276).

KWSC—State College of Wash., Pullman, Wash.—Granted modification of construction permit (B5-P-2914, for change in equipment), authorizing installation of automatic frequency control equipment on 1250 kc. under NARBA, and extension of commencement date to 10 days after grant and construction date to 180 days thereafter (B5-MP-1240).

WPEN—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Granted modification of construction permit (B2-P-2658, as modified, which authorized installation of new transmitter, increase in power to 5 kw) for 950 kc. under NARBA, changes in directional antenna and extension of completion date to 180 days after grant.

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Granted modification of construction permit (B1-P-1704, which authorized installation of new transmitter and DA system, changes in frequency, and move of transmitter) for extension of completion date to May 24, 1941 (B1-MP-1275).

WHYN—The Hampden-Hampshire Corp., Holyoke, Mass.—Granted license to cover construction permit (B1-P-1701), which authorized a new station specifying 1100 kc. under NARBA, 250 watts, unlimited time (B1-L-1374). Also granted authority to determine operating power by direct measurement of antenna power (B1-Z-757).

WKEL—Radio Station WKEL, Griffin, Ga.—Granted additional time to operate April 21 through May 17, 1941, in order to broadcast a revival program only, subject to condition that each program is non-sponsored and further subject to the condition that station operate under this authority only during the time Rev. J. M. Hendley's actual participation in such program (B3-S-819).

WBB—Purdue University, West Lafayette, Ind.—Granted special temporary authority to operate from 5 to 6 p.m. on May 2, 9, 13, 23, from 5:45 to 8:30 p.m., May 3; from 4 to 5 p.m. on May 4, in order to sponsor Purdue baseball games and Gala Week activities only (B4-S-501).

W1NOJ—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to rebroadcast certain programs of station W1XPW for a period beginning May 1 to 30.

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Granted motion for continuance of permit to operate high frequency experimental broadcast station on 1310 kc. for unlimited time from May 1 to 30, 1941, in re construction permit.

WGST—Georgia School of Technology, Atlanta, Ga.—Granted license to cover construction permit (B2-P-1701), which authorized increase in power from 250 watts to 1 kw, changes in DA and 1200 kc. under NARBA and changes in directional antenna and extension of completion date to May 25, 1941, in re construction permit.

W1NOJ—The Yankee Network, Inc., Paxton, Mass.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 43700 kc., 1 kw, special emission for FM, with transmitter located at Avon, Conn., for period May 1 to July 1, 1941.

W1NOJ—The Yankee Network, Inc., Paxton, Mass.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 43790 kc., 50 kw, special emission for FM, with transmitter located at Paxton, Mass., for the period May 1 to July 1, 1941.

WWDO—Radio Station WWDO, Lordstown, Ohio.—Granted license to operate a high frequency experimental broadcast station on 43700 kc., 1 kw, special emission for FM, with transmitter located at Avon, Conn., for period May 1 to July 1, 1941.

WWDO—Radio Station WWDO, Lordstown, Ohio.—Granted license to operate a high frequency experimental broadcast station on 43790 kc., 50 kw, special emission for FM, with transmitter located at Paxton, Mass., for the period May 1 to July 1, 1941.

WWDO—Radio Station WWDO, Lordstown, Ohio.—Granted license to operate a high frequency experimental broadcast station on 43700 kc., 1 kw, special emission for FM, with transmitter located at Avon, Conn., for period May 1 to July 1, 1941.
High Point Broadcasting Co., High Point, N. C.—Granted petition for take-down of depots in re application for new station to operate at 1450 kc., power (B4-P-1450).

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Pa.—Petition for enlargement of issues in re application to change frequency, increase power and operating time, withdrawn.

KOMA—KOMA, Inc., Oklahoma City, Okla.—Granted request for extension of time to file application for construction permit to change frequency and increase power to 50 KW.

James F. Hopkins, Inc., Detroit, Mich.—Granted motion for leave to amend application for high frequency broadcast station to specify a different location, antenna and required coverage, to be filed within 2 weeks, and application moved from hearing docket.

KOVO—Clifton A. Tolboe, tr./as Citizens Voice & Air Show (Assignor) and KOVO Broadcasting Co. (Assignee), Provo, Utah—Motion to withdraw application for voluntary withdrawal of license without prejudice, withdrawn.

WFCI—Pawtucket Broadcasting Co., Pawtucket, R. I.—Granted modification of construction permit (B1-P-1877, for new station) for changes in directional antenna and requesting 1420 kc., under NARBA (B1-MP-1223).

WBAA—Purdue University, W. Lafayette, Ind.—Granted modification of construction permit (B4-P-2604, which authorized installation of new transmitter and DA for night use, increase in power, change in hours of operation, and move transmitter), for change in type of transmitter, and changes in DA for night use on 930 kc. under NARBA (B4-MP-1208).

KMYC—Marysville-Yuba City Broadcasters, Inc., Marysville, Cal.—Granted authority to operate a high frequency experimental broadcast station on 1390 kc., 100 watts, unlimited time. DA at night on 1570 kc. under NARBA (B4-L-1371).

WDBJ—Times-World Corp., Roanoke, Va.—Granted modification of construction permit (B4-P-2733, to move transmitter, install new transmitter and directional antenna for day and night use, change frequency, hours of operation and move of transmitter) for changes in directional antenna for day and night use, requesting 960 kc., under NARBA, and extension of completion date to 90 days after grant (B4-MP-1227).

W2XBS—National Broadcasting Co., Inc., 1208 40th St., New York, change in type of transmitter and application for renewal of license, to not later than June 1, 1941 (B1-MP-1266).

Wunic—Mission Radio Co., Inc., Grants Pass, Ore.—Granted special temporary authority to operate a high frequency experimental broadcast station on 13200 kc., for period May 1, 1941, to not later than June 29, 1941.

WNOE—WNOE, Inc., New Orleans, La.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-764).

W55NY—William G. H. Finch, New York, N. Y.—Granted modification of construction permit which authorized new high frequency broadcast station in Kentucky on 1700 kc., transmitted from 1819 Broadway, New York, to 10 East 40th St., New York, change in type of transmitter and approval of antenna system (B1-MPH-20).

KJ6G—Eagle Broadcasting Co., Inc., area of Brownsville, Tex.—Granted further temporary base of operation for relay broadcast station license, pending determination upon application for renewal of license, to not later than June 1, 1941 (B3-SRV-10).

W8XM—The Crosley Corp., Cincinnati, Ohio.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 13200 kc., 1000 watts power, special emission for frequency modulation, with the transmitter located at Corner Vine and Fifth Streets, Cincinnati, Ohio, and described as Crosby, Type EDG-2N, maximum carried power 1000 watts, for period May 1, 1941, to not later than June 29, 1941, for connection with the Tanana Ice Breakup on or before May 15, 1941, using a 40-watt, Lear crystal controlled transmitter, type UT-6 on frequency 6125 kc.

W2BLS—National Broadcasting Co., New York City—Granted special temporary authority to operate a specialized constructed 1 KW peak power, special emission laboratory

---

May 2, 1941 — 399
model FM transmitter alternately with the regular W2XBS transmitter on Channel No. 1 for the purpose of making field observations, for a period not to exceed 30 days.

W2XWG—National Broadcasting Co., Inc., New York City—Granted extension of temporary authority to operate Station W2XWG on 45100 kc., 1000 watts power, A2, special permission for frequency modulation at 350 Fifth Ave., New York City, for the period May 1, 1941, to not later than June 29, 1941, pending final authorization and completion of construction of applicant's new high frequency broadcast station.

W1XEZ—RCA Manufacturing Co., Inc., Camden, N. J.—Granted extension of special temporary authority to operate Class 1 experimental radio station W1XEZ on 43960 kc., 1000 watts power, A3, A4 and special permission for frequency modulation, using 1 KW FM broadcast transmitter, type FM-1-B, for the purpose of conducting field strength surveys; authority to be from April 27, 1941, until further order of the Commission but not later than May 27, 1941, subject to the condition that no interference results to any high frequency broadcast station.

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Denied extension of special temporary authority to operate on 1390 kc., with power of 500 watts during the hours vacated by Station WSBT (6 to 7 a.m., 12 to 3 p.m. and 8 to 12 midnight, CST), for the period April 27 to May 27, 1941, to broadcast sponsored programs as well as unsponsored programs only, pending completion of construction in accordance with construction permit for unlimited time operation.

WBST—The South Bend Tribune, South Bend, Ind.—Granted extension of special temporary authority to operate unlimited time on 960 kc., 250 watts night, 500 watts daytime for the period April 27, 1941, to not later than May 27, 1941, pending completion of construction in accordance with permit B4-P-900 as modified, provided operation on additional hours is for non-commercial programs only.

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Granted extension of license upon a temporary basis only and upon the express condition that it is subject to whatever action may be taken by the Commission upon the application for renewal of license pending before it and pending disposition of application for consent to transfer control then having been filed, in no event later than May 29, 1941.

WEAK—Lake Region Broadcasting Co., Lakeland, Fla.—Granted extension of special temporary authority to operate high frequency experimental broadcast station on 610 kc., 1 KW power, A1, unlimited time, day and night. Amended: To make changes in directional antenna.

W51R—Stromberg-Carbon Telephone Mfg. Co., Rochester, N. Y.—Granted special temporary authority to operate frequency modulation station commercially on 15100 kc., special emission, transmitter at 89 East Ave., Rochester, N. Y., from May 1 to not later than July 1, 1941, pending completion of construction (B1-PH-75).

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Continued hearing now scheduled for April 30, 1941, until May 23, 1941, in re application for construction permit to change frequency to 1110 kc.

WQDM—E. J. Regan and F. Arthur Bostwick, d/b/a Regan and Bostwick, St. Albans, Va.—Granted extension of special temporary authority to operate on frequency 11290 kc., for the period April 27, 1941, until Radio Station WWSR is authorized to conduct program tests but ending in no event later than May 7, 1941.

WMBO—WMBO, Inc., Auburn, New York.—Denied special temporary authority to remain silent after 9 p. m., LST, from April 28 to not later than May 27, 1941.

WREN—WREN Broadcasting Co., Inc., Lawrence, Kans.—Dismissed Petition for Amendment of Order of the Commission filed by WREN on March 31, 1941, directed against the Commission's action in designating application (B4-P-2272) for hearing without prejudice to the filing by petitioner of a motion for leave to amend application in accordance with Sec. 173 of the Commission's Rules and Regulations.

WIXOJ—The Yankee Network, Paxton, Mass.—Granted 60-day special temporary authority to operate high frequency experimental FM station WIXOJ on a commercial basis with call letters W33B, without prejudice to the issues in the hearing.

WSBT—South Bend Tribune, South Bend, Ind.—Dismissed petition for reconsideration of action by individual Commissioner; Thompson, Commissioner, reconsidered his action in granting additional time non-commercially, and applicant was granted 10 days' authority to operate with additional time commercially, subject to filing with the Commission information as to reason for delay in getting equipment.

KJR—Fisher's Blend Station, Inc., Seattle, Wash.—Denied petition to reconsider and grant without a hearing the application for renewal of license; cancelled hearing, and granted renewal of license to operate on 1000 kc., 5 KW, unlimited time.

APPLICATIONS FILED AT FCC

570 Kilocycles

KGKO—KGKO Broadcasting Co., P. W., Fort Worth, Texas.—Modification of license to maintain studios in Fort Worth and Dallas, Texas.

600 Kilocycles

NEW—Geneese Broadcasting Corp., Flint, Mich.—C. P., for new broadcast station on 600 kc., 1 KW power, unlimited time, directional antenna day and night.

610 Kilocycles

NEW—West Publishers, Inc., Houston, Tex.—Construction permit for new broadcast station on 610 kc., 1 KW power, unlimited time, directional antenna, DA-N. Amended: Install new transmitter, changes in directional antenna, day and night, transmitter site, change applicant from a Corporation to a Partnership composed of J. M. West, J. Marion West, Wesley W. West and P. M. Stevenson. Studio site specified as Sterling Building, Houston, Tex.

620 Kilocycles

WAGE—Sentinel Broadcasting Corp., Syracuse, N. Y.—License to cover C. P. (B1-P-1934) as modified for new station.

WAGE—Sentinel Broadcasting Corp., Syracuse, N. Y.—Authority to determine operating power by direct measurement.

740 Kilocycles

NEW—Fred Jones, Mary Eddy Jones, and W. E. Hightower, d/b/a Fred Jones Broadcasting Co., Tulsa, Okla.—Construction permit for a new broadcast station to be operated on 600 kc., 50 KW, unlimited hours, directional antenna day and night. Amended: To make changes in directional antenna and requesting 740 kc., 25 KW night, 50 KW day.

770 Kilocycles

KXA—American Radio Telephone Co., Seattle, Wash.—Construction permit to move transmitter locally.

880 Kilocycles

WHB—WHB Broadcasting Co., Kansas City, Mo.—Construction permit to install new transmitter.
920 Kilocycles

KTKC—J. E. Richmond, Percy M. Whiteside, Homer W. Wood, and Visalia Publishing Co., d/b/a Tulare-Kings Counties Radio Associates, Visalia, Calif.—Construction permit to change frequency from 920 kc. to 930 kc., increase power from 1 to 5 kW, install new transmitter and make changes in directional antenna for day and night use.

KFNF—KFNF, Inc., Shenandoah, Iowa.—Authority to determine operating power by the direct method.

930 Kilocycles

WPAT—North Jersey Broadcasting Co., Inc., Paterson, N. J.—Modification of C. P. (B1-P-2624) for new station requesting authority to change transmitter, requesting 930 kc. under NARBA.

WBEN—WBEN, Inc., Buffalo, N. Y.—Modification of C. P. (B3-P-2952) for increase in power and installation of directional antenna for night use, requesting changes in DA on 960 under NARBA.

960 Kilocycles

WCSH—Congress Square Hotel Co., Portland, Maine.—License to cover C. P. (B1-P-2555) as modified for increase in power and installation of directional antenna for day and night use. Amended: Specify 970 kc. under NARBA.

970 Kilocycles

WCSH—Congress Square Hotel Co., Portland, Maine.—Authority to determine operating power by direct measurement. Amended: Specify 970 kc.

1150 Kilocycles

WTAW—Agricultural & Mechanical College of Texas, College Station, Texas.—Authority to determine operating power by the direct method.

1230 Kilocycles

KTBM—Jay P. Beard, d/b/a Regional Broadcasting Co., Jonesboro, Ark.—Authority to determine operating power by the direct method.

1240 Kilocycles

KDLR—KDLR, Inc., Devils Lake, N. D.—Authority to determine operating power by direct measurement.

1250 Kilocycles

KBIZ—J. D. Falvey, Ottumwa, Iowa.—License to cover C. P. (B4-P-2499) as modified for new station.

1260 Kilocycles

KOCB—Oklahoma City Broadcasting Assn., Kilgore, Texas.—Authority to determine operating power by the direct method.

1300 Kilocycles

1320 Kilocycles

1360 Kilocycles

WSAI—The Crosley Corp., Cincinnati, Ohio.—Modification of C. P. (B2-P-2221) as modified for 1360 kc. under NARBA changes in directional antenna and extension of completion date. Amended: To use directional antenna day and night.

1380 Kilocycles

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Authority to install new automatic frequency control equipment.

1400 Kilocycles

WKWK—Community Broadcasting, Inc., Wheeling, W. Va.—Modification of C. P. (B2-P-2967) for new transmitter.

1410 Kilocycles

WING—Great Trails Broadcasting Corp., Dayton, Ohio.—Modification of license to make changes in directional antenna on 1110 kc. under NARBA.

1450 Kilocycles

WMAS—WMAS, Incorporated, Springfield, Mass.—Authority to determine operating power by direct measurement.

1500 Kilocycles

WJGM—George F. Meyer, Medina, Wis.—Modification of C. P. (B4-P-2501) for new transmitter, changes in antenna (1400 kc. under NARBA), increase in power from 100 watts to 250 watts, move transmitter and extend commencement and completion dates 60 to 180 days respectively.

1530 Kilocycles

WCKY—L. B. Wilson, Inc., Cincinnati, Ohio.—Modification of license to change from directional antenna for day and night use to directional antenna after sunset at Sacramento, Calif.

1560 Kilocycles

FM APPLICATIONS

NEW—M. A. Leese Radio Corp., Washington, D. C.—Construction permit for a new high frequency broadcast station to be operated on 14700 kc; coverage: 5,560 square miles; population: 899,946.

NEW—WFIL, Broadcasting Co., Philadelphia, Pa.—Modification of C. P. (B2-PH-73) for new high frequency broadcast station specifying operating constants to provide coverage of 9,800 square miles and change type of antenna.

TELEVISION APPLICATION

MISCELLANEOUS APPLICATIONS

KFDM—Beaumont Broadcasting Corp., Beaumont, Tex.—Construction permit to install new transmitter, directional antenna for day and night use, increase power from 1 KW to 5 KW, move transmitter to near highway 124, approximately 6 mi. SW of Beaumont city limits.

WBOC—Westinghouse Radio Stations, Inc., Hull, Mass.—License to cover C. P. (B1-PFB-23) as modified which authorized move of station, increase power and changes in equipment.

May 2, 1941—401
Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Dean Cabot—Charging misrepresentation in the sale of “Caboteks”, a medicinal preparation for women, a complaint has been issued against Charles Campbell Buttenfield, Sr., trading as Dean Cabot, 227 North Homewood Ave., Pittsburgh.

The complaint alleges that in advertisements disseminated in various States the respondent represented his product as a cure or remedy for delayed menstruation and as being safe for use when in fact the preparation is not a cure, remedy or competent treatment for this condition and is not safe for use as it contains the drugs ergotin, apiol green, oil savin, and quinine sulphate in quantities sufficient to cause serious and irreparable injury to health if used under conditions prescribed in the advertisements or under customary or usual conditions.

The complaint further charges that advertisements of his product disseminated by the respondent are false advertisements in that they fail to reveal the possible consequences of use of the product under these conditions (4494).

Marshall Field & Co., Chicago, has been served with a complaint charging violation of the Federal Trade Commission Act in the sale of rugs which it manufactures under the name of Karastan Rug Mills.

The complaint alleges that the respondent, in promoting the sale of certain rugs manufactured at its plant in this country, has described these products, which closely resemble true Oriental rugs in appearance, by the names of “Karastan”, “Karashah”, “Karavere”, “Kara Kirman”, and “Kharol”. Pointing out that there are true Oriental rugs known as “Kara-bagh”, “Karadagh”, “Karageuze”, “Karaman”, “Karahissar”, “Karajah” and “Kirman”, the complaint alleges that the respondent’s use of its designations tends to create the mistaken belief that its products are genuine Oriental rugs when in fact they have been woven on power looms in its own factory in the United States and are neither made in the manner of the true Oriental rug nor possess all of its characteristics.

The complaint further charges the respondent with describing certain of its rugs as “Oriental reproductions” or “authentic Oriental reproductions” when in fact they are not exact copies or reproductions of true Orientals in structure or method of manufacture, but merely simulate them in appearance. The complaint alleges that while the respondent in some instances has endeavored to copy the designs of particular Oriental rugs, in others it has used designs which it has created and which are adaptations or combinations of Oriental motifs (4493).

Radio Wire Television, Inc.—Charging misleading representations in the sale of radio receiving sets, parts and accessories a complaint has been issued against Radio Wire Television, Inc., 100 Sixth Ave., New York. The respondent has branch offices in Chicago, Boston and Atlanta.

The complaint alleges that the respondent advertises a “One-tube battery set” with which “you can tune in the world”, also a “Two-tube AC-DC kit” and a “Two-tube AC-DC set”. The complaint charges that the respondent’s “One-tube battery operated all-wave set” is not an all-wave radio set and that it cannot tune in the world. Further, the complaint alleges, the respondent’s so-called “Two-tube AC-DC kit” and “Two-tube AC-DC set” are not two-tube radio sets. According to the complaint, they are not equipped with two fully functioning tubes, respectively, but are on the contrary merely equipped with one detecting, amplifying or rectifying tube and with one nonfunctioning or tuning rectifier tube or rectifying tube. The complaint alleges that the rectifier tubes do not serve as amplifying or detecting tubes and do not perform any recognized and customary function of a radio receiving tube in the detection, amplification and reception of radio signals or programs.

The complaint points out that a substantial number of purchasers believe that the greater the number of actually functioning tubes in a radio receiving set the better it performs and the greater and clearer is its power of detecting, amplifying and receiving radio waves (4491).

Disabled American Veterans of the World War Rehabilitation Department—Charging misleading use of the name of the Disabled American Veterans of the World War, a national patriotic organization, in the sale of historical books, a complaint has been issued against the Disabled American Veterans of the World War Rehabilitation Department, a commercial corporation with headquarters at 104 South Michigan Ave., Chicago. The complaint also names as respondents Frank J. Mackey, L. C. Maier, Daniel C. Moore and Robert L. Mackey, officers of the corporation.

The complaint alleges that the respondent corporation has a contract with the Disabled American Veterans of the World War under which that organization sponsors the sale of the respondent’s two sets of books “Progress of Nations” and “Forwards March”, and that the Disabled American Veterans’ group receives from the respondent a 10 per cent royalty on all gross sales of the book.

According to the complaint, the respondents, through their salesmen and by other means, have misleadingly represented that their salesmen are representatives of the Disabled American Veterans of the World War; that the respondents’ books are being sold only to certain selected customers; that the Disabled American Veterans of the World War receives the entire profit derived from the sale of the books; that a person purchasing the respondents’ books is in effect making a contribution to the patriotic organization; that the funds derived from sale of the books will be used by the Disabled American Veterans’ organization to defray expenses of its activities in combating anti-American and subversive organizations and influences in the United States.

The complaint charges, however, that the respondents sell their books as an ordinary commercial transaction for their own profit; that the only profit derived by the Disabled American Veterans’ organization from sale of the books has been their royalty; that the sale of the books has not been restricted to any group but that they have been sold indiscriminately to the public, and that the respondent corporation’s use of the corporate name “Disabled American Veterans of the World War Rehabilitation Department” constitutes a misleading representation that the respondent corporation is identical with or is connected with the Disabled American Veterans’ organization.

According to the complaint, a further deceptive and misleading practice of the respondents is their wrongful representation that certain literature published by the Disabled American Veterans’ organization endorses the respondents’ books, when in fact such literature relates only to the general aims and purposes of the Disabled American Veterans’ organization and has no reference to the respondents’ books (4492).

STIPULATIONS

The Commission has entered into the following stipulations:

Belen Products Co., 1009 Isabella Ave., Houston, Tex., stipulated for cease advertising that its preparation “Loca Belem” will grow hair and is a remedy or cure for baldness, falling hair, aggravated conditions of the scalp, dandruff, and other scalp conditions. The respondent also agrees to desist from advertising that its product rejuvenates the scalp, stimulates or revitalizes hair cells, and adds new life to hair; that the product has been subjected to laboratory tests by the Food and Drug Administration and that, upon analysis by that administration, has been found to comply with the “Pure Food and Drugs Law” (62788).
CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Associated News Photographic Service, Inc., and Blackstone Studios, Inc., both of 20 West 57th St., New York, and Leo Fried and William Shapiro, officers and principal stockholders of both corporations, have been ordered to cease and desist from misrepresentations in the sale of photographs and photographic prints.

Commission findings are that as a sales plan to induce persons to pose for and buy photographs the respondents have misleadingly represented and implied that such pictures are for immediate "press release" or publicity purposes when actually the respondents are not in the business of taking spot or current news pictures and the number of pictures they occasionally sell to newspapers represents a minor portion of their business.

According to findings, the respondents' agents contact persons of more or less prominence by telephone, advising them that the "Associated News" or the "Associated News Photographic Service, Inc." desires their pictures or that the pictures are wanted for publicity purposes. Commission findings are further that the proofs are delivered by the respondents' representatives, or mailed to the prospective customer with an accompanying letter requesting such person to "make your selection for press release" and stating that if such person should desire some finished portraits "we shall be glad to meet your requirements".

According to findings, a representative of the respondents, calling on a prospective customer ostensibly to deliver the proofs or to obtain the one selected for "press release" engages in a sales procedure which frequently is successful in selling pictures.

With minor exceptions, the findings continue, the respondents take the pictures without prior arrangements for compensation and rely upon being able to sell finished pictures to a reasonable proportion of the persons photographed. They succeed in 25 to 30 per cent of the cases, according to findings, and their prices customarily range from $2.50 to $75 or more per finished print.

In its findings the Commission points out that the Associated Press, widely known newsgathering agency, maintains the Associated Press "News Photographic Service" for obtaining news pictures and distributing copies to member newspapers but that copies of such pictures are not furnished or sold to the persons who appear in them.

The Commission order directs that the respondents, in connection with the solicitation of permission to make photographs or the offering or sale of photographs, cease and desist from using the word "News" or words of similar import in the corporate name of the respondent, the Associated News Photographic Service, Inc., or as a part of any other trade or corporate name, to describe a business which is principally that of selling photographs to persons photographed, and that they cease representing or implying to prospective customers that the respondents are news or press photographers, or that any photograph solicited is for press or publicity purposes, unless such photograph is actually for immediate press use or news or press use (3561).

Nolan Company—Frank D. Seiple, operating as The Nolan Co., Greenville, Pa., has entered into a stipulation to cease advertising that his preparation "Slumber Ointment" is a competent treatment for athlete's foot, unless expressly limited to superficial organisms and the relief of itching. The respondent also agrees to desist from advertising that his product is of value in treating eczema, salt rheum, greasy and rubber poisoning, skin diseases, or poisoning, beyond that of temporary relief from the itching which may accompany these conditions (02784).

Scientific Products Company—Trading as Scientific Products Co., Frank L. Moscou, 3462 North Clark St., Chicago, distributor of a preparation intended for use as a treatment for athlete's foot and ingrown hair, stipulated to cease employing the words "No More Runs" or other similar words having the effect of conveying to the impression that use of this preparation on such fabrics will eliminate the possibility of or prevent runs. The respondent also agrees to desist from representing that his preparation will make fabrics fade-proof (3088).

Landers, Frary & Clark, New Britain, Conn., have entered into a stipulation to cease representations tending to convey the impression to purchasers that certain electrical heating pads, distributed by the respondents are capable of maintaining different, distinct temperatures. According to the stipulation, the operation of the switches used with the respondent's pads, advertised as "Three-Speed Pads", does not maintain three distinct temperatures but only regulates the length of time required to heat the pads to a single maximum temperature (3086).

C. W. Marks Shoe Company—Stipulations to discontinue certain representations in the sale of shoes have been accepted from C. W. Marks Shoe Co., Chicago, wholesaler; International Shoe Co., and Samuel Shoe Co., Inc., St. Louis manufacturers, and Geo. E. Kelth Co., Campbell, Mass., manufacturer.

C. W. Marks Shoe Co. agrees to cease employing the word "Doctor" or the abbreviation "Dr." in connection with a name or with any other words as a trade name, brand or designation for its products so as to imply that they are made in accordance with the design or under the supervision of a physician and contain special scientific or orthopedic features which are the result of medical determination or services. According to the stipulation, the respondent corporation caused the words "Dr. Kelly's Air-Flex Shoes" to be stamped on certain shoes for women and "Dr. Kelly's Plastic Arch" on certain of its shoes for men, when in fact the shoes so marked were neither made under the supervision of a physician nor did they contain special scientific or orthopedic features.

International Shoe Co., Samuel Shoes Co., Inc., and Geo. E. Kelth Co. stipulate that they will cease using the word "Alligator" or other similar word to describe shoes not made from alligator hide, provided that the word "Alligator" may be used to describe the finish of shoes which are made from materials other than alligator leather and are finished or embossed to resemble it. When this word is not immediately accompanied by other words clearly indicating that the designation refers only to the pattern embossed on such materials (3084-3085-3087-3089).

Coryell, Inc., F. Orlo Johnson and E. B. Masters, 7392 Churchill St., Detroit, have entered into a stipulation to cease certain representations in the sale of their preparation "Nu-Hair".

The respondents agree that in disseminating advertisements of their preparation they will cease employing the brand name "Nu-Hair" in such a way as to infer that it will grow or produce hair.

The respondents also agree to desist from advertising that their preparation represents a professional secret of a scalp specialist, is a scientific or revolutionary hair, scalp, or skin preparation, and is recommended by leading beauty shops.

The respondents further stipulate that they will cease representing their product as being capable of preventing, removing or relieving baldness, dry or itchy scalp, or other hair or scalp ailments; of conserving or restoring the natural oils secreted by the scalp or of controlling or helping to control the glandular activity of the scalp (02783).

Hasco, Inc.—A stipulation involving war orders for machinery and tools has been accepted from Hasco, Inc., 661 Frelinghuysen Ave., Newark, N. J.

According to the stipulation, the respondent corporation purchases machinery and tools and sells them to foreign powers engaged in the European war.

The stipulation relates that for the purpose of locating and purchasing used machinery and tools intended for sale and shipment abroad, the respondent adopted the trade name "Imperial Air Industries" and used it in advertisements together with the words "American Purchasing Office," when in fact the corporation is neither sponsored by nor has any official connection with a foreign government as indicated by its trade name containing the word "Imperial".

Under its stipulation the respondent corporation agrees to cease and desist from using the words "American Air Industries", alone or with the words "American Purchasing Office" as a trade name in connection with advertising, purchasing or selling its products.

The respondent also stipulates that it will cease employing the word "Imperial", alone or with the words "Air Industries" or with the words "American Purchasing Office" or other words in any manner implying that the respondent corporation is sponsored by or officially connected with a foreign government (3090).
Disorders caused by internal or systemic conditions in excess of prescription" is a cure or remedy for eczema, pimples or hives or has therapeutic value in treating these ailments or in treating skin disorders caused by internal or systemic conditions in excess of temporary relief from the symptom of itching.

The respondent is further ordered to cease advertising that its preparation has therapeutic value in treating skin blotches or the temporary alleviation of the symptom of itching or the use of an antipruritic, astringent, antiseptic, and mildly germicidal agent.

The Commission order directs the respondent to cease disseminating advertisements which represent that "D. D. D. Preparation" has any therapeutic value in excess of that afforded by the temporary alleviation of the symptom of itching or the use of an antipruritic, astringent, antiseptic, and mildly germicidal agent.

The Commission order prohibits the respondent from representing, through use of the words "stop itching" or other similar words, that its preparation will either permanently or temporarily eliminate the disease or condition causing the symptom of itching or has any therapeutic value in excess of that afforded by the temporary alleviation of the symptom of itching or the use of an antipruritic, astringent, antiseptic, and mildly germicidal agent.

The respondent is further ordered to cease disseminating advertisements which represent that her preparation is a cure or remedy or competent treatment for chronic bronchitis, or for nose, throat, tonsils, larynx or lungs, or for neuralgia or heart disease.

The Commission order directs the respondent to cease disseminating advertisements which represent that the preparation known as "Mrs. Bee Femo Caps" constitutes a competent or effective treatment for delayed menstruation, and that its use is safe or harmless, or which advertisements fail to reveal that use of the product may cause gastrointestinal disturbances and other serious consequences.

The Commission order directs the respondent to cease using the term "Camel's Hair" or "Camel" or other terms descriptive of the camel's hair on labels or otherwise to describe any fabric or product which the garments manufactured therefrom are composed entirely of fiber manufactured from camel's hair when in fact they have contained substantial percentages of wool, mohair, and other fibers.

The respondents also are ordered to cease employing any pictorial design of a camel in connection with any description of fabrics or products in which camel's hair is not the predominating fiber, and to cease representing in any manner that fabrics or products which they offer or sell contain camel's hair in greater quantity than is actually the case.

The Commission order directs the respondent to cease disseminating advertisements which represent that "Breathasy" is a cure, remedy or competent treatment for chronic bronchitis, or for eczema, hives or other skin diseases, or which advertisements fail to reveal that the respondent's preparation cannot be safely used by persons ill of high blood pressure, toxic goiter, diabetes or heart disease.

The respondent is also ordered to cease representing that its preparation is a remedy, cure or effective treatment for heart disease or cardiac distress; for gastric ulcer; for inflammation of the nose, throat, tonsils, larynx or lungs, or for neuritis or neuritis (3768).
John J. Tracey Co., 11102 Merchandise Mart, Chicago, distributor of toilet articles and soap, has been ordered to cease and desist from using the word "English" or other similar words to describe soap not made in England.

Commission findings are that the respondent corporation represented that its soap is of English origin by printing on the shipping cartons and boxes and by stamping on the soap the representations "English Lilac", "English Honeysuckle", "English Orchid", "English Carnation", and "Flaroma English Cold Cream Soap", when in fact these soaps were made in the United States (4315).

A Factual Analysis of ASCAP's Proposal to MB Stations

This is a factual analysis of proposals which ASCAP has made to Mutual Broadcasting System, Inc., and to Mutual affiliates. Under the non-discrimination clauses of the consent decree signed by ASCAP, these proposals will presumably be available to all broadcasting stations and networks. While each station will compute what the proposals mean to it individually, the NAB, in accordance with its established policy of supplying members with information on matters of industry interest, is presenting in the Reports these proposals together with this brief factual analysis which may be useful to members as a source of information.

It is, of course, impossible to state the precise legal effect of the proposals until they have been reduced to contract form. Moreover, it is impossible to cover in detail in a brief memorandum all of the points involved in such a complicated problem.

Under the recommendation made by the majority of Mutual stockholders to Mutual affiliates, it is proposed that ASCAP music be placed on the network prior to the negotiation of individual station licenses covering local business, and the cost thereof deducted from station payments, provided that a majority in number of Mutual affiliates approve the deduction of such cost. No reference is made in the proposals as to what the situation would be with respect to stations which do not assent to the making of the deductions. Stations will have to determine for themselves whether they wish to commit themselves to payment for network service before the actual submission and execution of finalized agreements covering their individual problems on local service.

According to the best estimates which can be made, the cost of the proposed licensing plan, if adopted by the entire industry and based on estimated 1940 net time sales, would be as follows:

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Payments by 781 Stations on National Non-Network and Local Net Time Sales</td>
<td>$2,374,000</td>
</tr>
<tr>
<td>Payments on Network Payments to Affiliates</td>
<td>764,000</td>
</tr>
<tr>
<td>Payments by Networks taking into account deductions for wire lines and “Sales Commissions”</td>
<td>733,000</td>
</tr>
<tr>
<td>Sustaining Fees of Stations</td>
<td>725,000</td>
</tr>
<tr>
<td><strong>Total Estimated Payments to ASCAP</strong></td>
<td><strong>$4,616,000</strong></td>
</tr>
</tbody>
</table>

The proposals are not entirely clear as to whether the charges are to be based on net time sales or, as in the case of the June 1940 contracts tendered by ASCAP, upon additional factors such as line charges, free hours, certain talent costs, etc. In the event that the June 1940 provisions remain unchanged, this would of course increase the amounts of all payments mentioned in this analysis. Also in the event that ASCAP avails itself of its privilege of discontinuing, without reduction in payment, the availability of its foreign repertory and stations find it necessary to acquire the right to perform foreign music, this would increase the amount which would have to be paid for the former ASCAP repertory, some of which, it will be remembered, is now controlled by BMI.

The foregoing computation is based upon the 3% payment fixed for the first four years of the proposal; considerably larger payments would be required when the rate is increased to 3 1/2% during the remaining four years and seven months of the proposal. It is estimated that the amount actually paid by the industry to ASCAP in 1940 was $5,100,000. In the event that none of the factors causing increase come into being, a comparison with actual 1940 payments would indicate decreased payments to ASCAP of $484,000 in the event that we assume that all stations would take out blanket licenses.

May 9, 1941 — 409
Comparison with the form of contract tendered by ASCAP in June 1940 is also necessary. This can most easily be made by taking stations in the groupings which were set up by the tendered June 1940 contract. This comparison is as follows:

(a) Stations with an annual revenue of $50,000 or less get the same terms as were tendered in the June 1940 contract for the first four years of the proposal, without reduction. For the remaining four years and seven months of the proposal, the fee to the station is increased from 3% to 3 1/2%.

(b) Stations with an annual revenue of between $50,000 and $150,000 have a reduction in commercial fees of from 4% to 3% for the first four years of the proposal and from 4% to 3 1/2% for the next four years and seven months of the proposal. These stations were, under the June 1940 contract, offered a sustaining fee equal to 75% of the sustaining fee formerly paid by the station. The annual sustaining fees, under the current proposal, are twelve times the station's highest hour rate with a maximum of 1 1/2 times the station's 1940 sustaining fees, a potential increase of 100% in sustaining fees. Stations in this class will benefit or lose by the current proposal depending on the ratio of gross business to card rate and previous sustaining fees.

(c) Stations with a revenue of over $150,000 per annum obtain a reduction from the June 1940 contract of 2% in commercial fees for the first four years of the contract and 1 1/2% in commercial fees for the remaining four years and seven months of the contract. Their sustaining fees are subject to a potential 50% increase. Stations in this category would appear to benefit from the new proposal in so far as local and national spot business is concerned.

(d) Networks, under the current proposal, will pay less than they would have paid under the June 1940 contract but would still pay a very substantial increase, as a class, over actual 1940 payments. Deductions under the new proposal decrease sharply from a maximum of 15% to a minimum of 1% in proportion to volume of business done. The effect upon stations of increased payment by the networks would depend on the extent to which the cost to the network is passed along to stations. Stations which are on more than one network or which expect to receive programs from more than one network have special problems which they will undoubtedly consider in this connection.

The proposals relate to three forms of contracts (1) a blanket single station license, (2) a per program single station license and (3) a network blanket license. No per program network license is submitted, apparently because Mutual stockholders have voted to take a blanket network license but stations have the privilege of accepting either the per program or blanket licenses which are tendered. The per program proposal which is submitted contains a provision which permits ASCAP to compel a broadcaster to shift from a per program to a blanket basis in the event that the return to ASCAP during any year is less than 2% of the station's entire revenue. The broadcaster may shift from the per program to the blanket basis if his payments to ASCAP during any year are in excess of 5% of the station's entire revenue. It will be noted that the network blanket contract provides that if network sustaining programs are broadcast by an affiliate which does not have a local blanket license, as distinguished from a per program license or no license at all, there must be paid, with respect to such sustaining programs, a sustaining fee of 1% of the card rate applicable at the time that the sustaining program is broadcast, with a maximum monthly payment of one-half of the station's highest one hour card rate, but not exceeding three-fourths of the 1940 monthly sustaining fee; or the highest one hour rate, not exceeding 1 1/2 times the monthly 1940 sustaining fees, less actual sustaining fees paid by the station under its individual per program contract. These sustaining fees are in addition to commercial fees deducted by the network.

The consent decree signed by ASCAP provides that ASCAP may not demand any percentage which is based upon a percentage of revenue of programs which do not include ASCAP music. In our opinion, therefore, the proposed per program contract, with its minimum of 2% of the broadcaster's entire receipts, does not comply with the terms of ASCAP's consent decree.

Attention is directed to the NAB Special Bulletin of June 27, 1940 which was reprinted in Vol 8, No. 26, June 28, 1940, NAB REPORTS. This Bulletin pointed out that the form of contract then submitted by ASCAP was unsatisfactory.

In the absence of a final contract incorporating all of the terms of the current proposal, it is impossible to judge how many of the defects of the June 1940 contract will remain, although some defects appear to have been eliminated. The full effect of the clause limiting the right of ASCAP to restrict compositions, for instance, cannot accurately be assessed until the language of the provision is examined, and there does not appear in the proposal anything with respect to the rates to be charged by ASCAP on optional clearance at the source on electrical transcriptions. It will also be noted that under the logging provisions of the per program contract it would appear that any number which cannot be identified by full title, author's name, copyright proprietor's name, and if the number is performed from a recording, an identification of the record, is presumed to be an ASCAP number, and that any program which contains a number which cannot be so fully identified will pay the full ASCAP per program rate. Some of these matters may be covered in the supplementary document which is on file in the
Mutual offices and which was not available to us at the time of the preparation of this memorandum.

Mr. Gene Buck, as President of ASCAP, has wired to the Association that our telegram stating that the ASCAP proposal would be analyzed is construed “as an unlawful interference with the realization of the benefits of that contract. We hold you fully responsible for all damages that we may suffer thereby. . . .” It goes without saying that nothing in this analysis is intended to deter stations from independently considering any proposals that are submitted to them solely on the basis of their own ultimate wellbeing, and that this analysis is intended only as an information service to NAB members. If any inadvertent errors have been made, despite the care which has been exercised, we shall be glad to correct them if they are called to our attention.

A BLANKET SINGLE STATION LICENSE PROPOSAL

ASCAP will issue a license granting to any station of the Mutual Broadcasting System the use of all music in its repertoire or of any of its associated or affiliated societies for local broadcasting only.

1. The consideration for the license will be:

A. SUSTAINING FEE:

A yearly sustaining fee of twelve times the highest one hour published rate of the station, provided such sum shall not exceed one and one-half times the sustaining fee paid by the station during the year 1940, unless the gross amount paid to Station for the use of its broadcasting facilities, for local broadcasts for 1940 or any year thereafter shall be less than $50,000, in which case the sustaining fee shall be $12 for the succeeding year.

B. COMMERCIAL FEE:

In addition, the station, for the first four years of the agreement, shall pay to ASCAP a sum of 3%, and for the remaining term of the agreement a sum of 3 1/2%, of its net receipts from sponsors for the use of the broadcasting facilities for local broadcasting.

The term “net receipts” from sponsors shall be construed to mean the gross amount paid by sponsor for all local broadcasting facilities, less rate card discounts (quantity and/or frequency) and any advertising agency commission not to exceed 15% actually allowed and paid to a recognized advertising agency.

2. No payment shall be required to be made hereunder with respect to any local commercial program presented by transcription in the event that payment at the source has been made with respect to such transcription program.

3. ASCAP will reserve the right to restrict, in good faith, the broadcasting of compositions from musical comedies, operas, operettas, and motion pictures, or any other composition being excessively broadcast, only for the purpose of preventing harmful effect upon such productions or compositions in respect of other interests under the copyrights thereof. In any case, however, ASCAP agrees that the maximum number of compositions which may be at any time thus restricted shall not exceed 500 and moreover limited licenses will be granted upon application entirely free of additional charge, as

to restricted compositions if and when copyright owners thereof are unable to show reasonable hazards to their major interests likely to result from such broadcasts.

Provided, however, that in no case shall any charges “free plug” or other consideration be required in respect of any permission granted to perform a restricted composition, and further provided that in no event shall any composition, after the initial broadcast thereof, be restricted for the purpose of confining further broadcasts thereof to a particular artist, station, network or program.

4. ASCAP will agree to maintain during the term of the agreement substantially the existing domestic repertoire, and agrees to identify, save and hold station, sponsors, advertising agencies, and each of them, harmless, and defend them and each of them from and against any claim, demand or suit that may be brought against them or any of them with respect to conditions given during the term hereof or any renewal, in accordance with this license, of musical compositions contained in ASCAP’s repertoire heretofore or hereafter during the term hereof copyrighted or composed by members of ASCAP.

5. The term of this agreement shall be for a period ending on December 31, 1949.

6. ASCAP agrees that if a more favorable license is granted to any other comparable broadcasting station, station shall have the right to avail itself of the terms thereof. ASCAP agrees that any station may, upon request, inspect at the offices of ASCAP, the original copy of any license agreement in effect with any broadcasting station.

7. Royalty accountings, accompanied by payment in full, shall be rendered to ASCAP on or before the twentieth of each month covering the previous calendar month.

8. ASCAP agrees to release and discharge station, advertising agencies and sponsors from any and all liability and claims whatsoever which may have heretofore arisen as a result of the broadcast by station from and after Jan. 1, 1941, of any composition or work copyrighted or composed by ASCAP members or as to which ASCAP shall have public performing rights.

9. Station shall not be required to account for any sums received from political broadcasts.

PER PROGRAM SINGLE STATION LICENSE PROPOSAL

1. For the purposes of this proposal, under which licenses to publicly perform by broadcasting the ASCAP repertoire will be upon request of any broadcaster issued, the different types of radio programs are classified variously as follows:

A. SUSTAINING, NON-MUSICAL:

Being a non-commercial, unsponsored local program, containing no music.

B. SUSTAINING, MUSICAL:

Being a non-commercial, unsponsored local program, and which shall include or present in whole or any part, any musical composition or work.

C. COMMERCIAL, NON-MUSICAL:

Being a commercial, sponsored local program during the presentation of which no musical composition or work whatever, in whole or any part, is rendered.

It is to be understood that as to sports events (excluding football games), parades and civic celebrations, where music shall be performed under exclusive control

May 9, 1941 — 411
or direction of others than the licensee and shall be merely incidental to the main event or celebration, such programs shall nevertheless be regarded as coming under this heading.

D. Commercial, Musical:

Being a commercial, sponsored local program, for the public presentation of which the broadcasting facilities of licensee have, for a consideration, been engaged by the sponsor; and which shall include or present in whole or any part, any musical composition or work; or the commercial sponsored broadcast of a football game incident to which music is used; and so-called "participating programs" using music.

E. Religious, Educational and Civic:

Being a non-commercial local program, sponsored by a religious, educational, patriotic, political or civic association or group, and presented under its official auspices, for which licensee grants the free use of broadcasting facilities.

2. ASCAP will make available to any radio broadcasting station a license to publicly perform the compositions copyrighted by its members, and by the members of affiliated foreign societies upon a "per program basis" on the following terms and conditions:

In respect of the various types of programs the following payments shall be made:

Sustaining, Non-Musical:

No payment.

Commercial, Musical:

If any or all of the musical content shall include, in whole or any part, any ASCAP composition, an amount equal to ten per cent (10%) of the net receipts of the licensee from the commercial sponsor for the use of the broadcasting facilities of the station, provided, however, that if the music used shall be limited solely to a single identical theme or signature and/or to a single identical theme or signature and incidental bridge or background music in connection with a program otherwise non-musical, the rate of payment shall be 3%; and if only incidental bridge or background musical accompaniment and/or any opening and/or closing music (not constituting a theme or signature song) is used in connection with a program otherwise non-musical, the rate shall be 1½%.

Provided further that if the commercial broadcast is of a football game, a sum equal to 1½% of the amount charged by licensee to the commercial sponsor shall be paid.

Sustaining, Musical:

If any or all of the musical content shall include, in whole or any part, any ASCAP composition, an amount equal to one per cent (1%) of the regular published full card rate of the station applicable for the broadcasting facilities used. In no case shall the maximum amount payable by licensee in respect of sustaining programs during any year exceed either twelve times the highest one hour published rate of the station or one and one-half times the sustaining fee paid by the licensee during the year 1940, whichever shall be less; and provided further that if such maximum amount is guaranteed then no payments based upon the above percentage need be made.

Commercial, Non-Musical:

No payment.

Religious, Educational and Civic:

No payment.

3. Accountings:

A. Licensee is to furnish, postage prepaid, to ASCAP monthly a copy of the complete station log for each day, in the form required by FCC Rules and Regulations, Part 3, Sec. 3.90, and as to each program thereupon listed as musical or having any musical content, shall furnish ASCAP a complete item-by-item list of each musical composition rendered in whole or in part during local programs. Such listing shall show, as to each musical composition thus rendered, the full title thereof, the name of the composer and/or author, and name of the copyright owner as imprinted on the published sheet music or orchestration. Titles may not be abbreviated but must be shown in full. These requirements apply to all such programs, without exception, and regardless of the origin of the program.

B. Such report of each accountable local program shall, if commercially sponsored, state the name of the sponsor or sponsors, and the amount charged each sponsor.

C. Royalty accountings, accompanied by payment in full shall be rendered to ASCAP on or before the twentieth of each month, covering the previous calendar month. Such statements shall show in respect of each accountable program (a) the date of rendition, (b) the title of the program, (c) the time rendered, (d) the name of each sponsor and amount charged to each, and (e) the listing of titles, composers, authors and copyright owners.

D. All accountings in respect of local "commercial musical programs" rendered in accordance with the foregoing, shall be understood to relate to the net receipts of the station, construed to mean the gross amount paid by the sponsor for all broadcasting facilities of the station, less rate card discounts (quantity and/or frequency) and advertising agency commission of not exceeding fifteen per cent (15%) if actually paid or allowed to a recognized advertising agency.

E. Where renditions are by means of phonograph records, program listings shall show the manufacturer's brand and serial number of the record.

4. Any failure to comply with the requirements set out in Article 3 of this proposal as to the complete identification of compositions performed on programs, shall create the presumption that the music and/or compositions used were ASCAP compositions.

5. No payment shall be required to be made hereunder with respect to any local commercial program presented by transcriptions in the event that payment at the source has been made with respect to such transcription programs.

6. ASCAP reserves the right to restrict, in good faith, the broadcasting of compositions from musical comedies, operas, operettas and motion pictures, or any other composition being excessively broadcast, only for the purpose of preventing harmful effect upon such productions or compositions in respect of other interests under the copyrights thereof. In any case, however, ASCAP agrees that the maximum number of compositions which may be at any time thus restricted shall not exceed 500 and moreover limited licenses will be
granted upon application, entirely free of additional charge, as to restricted compositions if and when copyright owners thereof are unable to show reasonable hazards to their major interests likely to result from such broadcasting.

Provided, however, that in no case shall any charge, "free plug," or other consideration be required in respect of any permission granted to perform a restricted composition; and further provided that in no event shall any composition, after the initial broadcast thereof, be restricted for the purpose of confining the further broadcasts thereof to a particular artist, network, station or program.

7. ASCAP agrees to maintain during the term of the agreement substantially the existing domestic repertoire, and agrees to indemnify, save and hold licensee, sponsors, advertising agencies and each of them harmless, and defend them and each of them from and against any claim, demand or suit that may be brought against them or any of them with respect to renditions given, in accordance with this license, of musical compositions contained in ASCAP's repertory heretofore or hereafter copyrighted or composed by members of ASCAP.

8. The term of the agreement may at election of licensee be fixed to cover any portion of the time between effective date and December 31, 1949, and, notwithstanding anything herein to the contrary, if during any year of the license period the total payments per annum made by licensee to ASCAP shall be less than 2% of the total "net receipts" of the station for broadcasting facilities, as the term "net receipts" is defined in the blanket license proposal for single stations simultaneously submitted by ASCAP, ASCAP may require licensee to change to the blanket licensing basis for remainder of the term, and licensee will agree to accept such blanket basis, or if such payments shall exceed 5% of such "net receipts" licensee may require ASCAP to change the formula to such basis for remainder of the license period and ASCAP will agree to accept such blanket basis; such option to be exercised within sixty days following the end of the applicable license year in which such total "net receipts" shall be less than or shall exceed the applicable percentage, the new basis to be effective as of the beginning of the license year within which such option was exercised.

9. ASCAP agrees that if a more favorable license is granted to any other comparable broadcasting station, the licensee shall have the right to avail itself of the terms thereof. ASCAP agrees that any licensee may, upon request, inspect at the offices of ASCAP the original copy of any license agreement in effect with any broadcasting licensee.

10. ASCAP agrees to release and discharge licensee, advertising agencies and sponsors from any and all liability and claims whatsoever which may have heretofore arisen as a result of the broadcast from and after January 1, 1941, by licensee of any composition or work copyrighted or composed by ASCAP members or as to which ASCAP shall have public performing rights.

NETWORK BLANKET LICENSE PROPOSAL

ASCAP will issue a license granting to the Mutual Broadcasting System the use of all music in its repertoire and of any of its associated or affiliated societies.

1. The consideration for the license to the Mutual Broadcasting System shall be:

A. SUSTAINING Fee:

(a) As to stations affiliated with Mutual having a Single Station License from ASCAP under which the said stations guarantee to pay to ASCAP an agreed upon amount fixed in dollars for the use of ASCAP music in sustaining programs, ASCAP will grant to Mutual a license to broadcast sustaining programs to such stations upon the payment to it of the sum of One Dollar annually.

(b) In the event of a situation arising in which any of the Mutual stations does not have a Single Station License from ASCAP, or if such license is a Per Program License and the station has not guaranteed to pay to ASCAP, an agreed upon amount fixed in dollars for the use of ASCAP music in sustaining programs, then Mutual may supply its sustaining programs to such stations upon the payment to ASCAP of a sum equal to one per cent of the applicable card rate of each such affiliated station receiving and rebroadcasting the said sustaining program for the time consumed, provided, however, that in no case shall the maximum amount payable by Mutual in respect of any such station for sustaining programs exceed either: (a) a monthly payment equal to one half of the highest one hour published card rate of the station but in no event more than three quarters of the monthly sustaining fee paid by the station during the year 1940, or (b) the difference between twice the amount stated in subdivision (a) hereof and the actual sum paid during such month by the station for sustaining fees; whichever of such amounts shall be less.

B. COMMERCIAL Fee:

Mutual further, for the first four years of the agreement, shall pay to ASCAP a sum of 3%, and for the remaining term of the agreement, a sum of 3 3/4%, of its "net receipts" (as hereinafter defined) received during each year for the use of the broadcasting facilities of the stations over which the sponsored programs are broadcast.

The term "net receipts" from sponsors shall be construed to mean the gross amount paid by sponsor during such year for all network broadcasting facilities, less rate card discounts (quantity and/or frequency) and any advertising agency commission not to exceed 15% actually allowed and paid to any recognized advertising agencies.

The term "net receipts after deductions" shall be construed to mean the net receipts from sponsors during such year, less the sum of the following deductions:

(a) An amount equal to the actual cost to Mutual, its members and affiliates, of all program transmission lines used during such year in the transmission of network programs from any member or affiliate station to any other member or affiliate stations, but shall not include any program transmission lines extending from a member or affiliate station to the point of origination of a remote control program. Neither shall it include the cost of any program transmission lines maintained by a regional network affiliate of Mutual other than the program transmission line connecting the key station of such regional network with any other member or affiliate (other than an affiliate of such regional network) of Mutual.
414—May 9, 1941

(b) A sales commission on the net receipts from sponsors for such year equal to the sum of the following:

Fifteen per cent (15%) on the first One million dollars ($1,000,000) or less of such net receipts;

Twelve and one-half per cent (12 1/2%) on the next Two million dollars ($2,000,000) or less of such net receipts ($1,000,000 to $3,000,000);

Ten per cent (10%) of the next Three million dollars ($3,000,000) or less of such net receipts ($3,000,000 to $6,000,000);

Seven and one-half per cent (7 1/2%) of the next Four million dollars ($4,000,000) or less of such net receipts ($6,000,000 to $10,000,000);

Five per cent (5%) of the next Five million dollars ($5,000,000) or less of such net receipts ($10,000,000 to $15,000,000);

Two and one-half per cent (2 1/2%) of the next Five million dollars ($5,000,000) or less of such net receipts ($15,000,000 to $20,000,000); and

One per cent (1%) of all net receipts in excess of Twenty million dollars ($20,000,000).

2. No payment shall be required to be made hereunder with respect to any network commercial program presented by transcription in the event that payment at the source has been made with respect to such transcription program.

3. ASCAP will reserve the right to restrict, in good faith, the broadcasting of compositions from musical comedies, operas, operettas, and motion pictures, or any other composition being excessively broadcast, only for the purpose of preventing harmful effect upon such productions or compositions in respect of other interests under the copyrights thereof. In any case, however, ASCAP agrees that the maximum number of compositions which may be at any time thus restricted shall not exceed 500 and moreover limited licenses will be granted upon application entirely free of additional charge, as to restricted compositions if and when copyright owners thereof are unable to show reasonable hazards to their major interests likely to result from such broadcastings.

Provided, however, that in no case shall any charges "free plug" or other consideration be required in respect of any permission granted to perform a restricted composition and further that in no event shall any composition, after the initial broadcast thereof be restricted for the purpose of confining further broadcasts thereof to a particular artist, station, network or program.

4. ASCAP will agree to maintain during the term of the agreement substantially the existing domestic repertoire, and agrees to indemnify, save and hold Mutual, its member and affiliate stations, advertising agencies, and sponsors from any and all liability and claims whatsoever which may have heretofore arisen as a result of any network broadcast over the Mutual network from and after January 1, 1941, of any composition or work copyrighted or composed by ASCAP members or as to which ASCAP shall have public performing rights.

8. Mutual shall not be required to account for any sums received from political broadcasts.

The New Network Rules

RULES APPLICABLE TO STATIONS ENGAGED IN CHAIN BROADCASTING

May 2, 1941.

Whereas, the Commission, on March 18, 1938, by Order No. 37, authorized an investigation "to determine what special regulations applicable to radio stations engaged in chain or other broadcasting are required in the public interest, convenience, or necessity;"

Whereas on April 6, 1938, the Commission appointed a Committee of three Commissioners to supervise the investigation, to hold hearings in connection therewith, and "to make reports to the Commission with recommendations for action by the Commission;" and

Whereas the Committee held extensive hearings and on June 12, 1940, submitted its report to the Commission; Whereas briefs were filed and oral arguments had upon the Committee report and upon certain draft regulations issued for the purpose of giving scope and direction to the oral arguments; and

Whereas the Commission, after due consideration, has prepared and adopted the Report on Chain Broadcasting to which this Order is attached;

Now, therefore, it is hereby ordered, That the following regulations be and they are hereby adopted:

Licensing Requirements

§ 3.101 Exclusive affiliation of station. No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization (The term "network organization" as used herein includes national and regional network organizations) under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization.

§ 3.102 Territorial exclusivity. No license shall be granted to a standard broadcast station having any contract arrangement, or
Regulations designed to "foster and strengthen network broadcasting by opening up the field to competition" are contained in a Federal Communications Commission order made public today. Accompanying the order is the Commission’s "Report on Chain Broadcasting," which explains the new regulations and states the premises on which they are based.

"The regulations which we are promulgating," says the Commission, "are designed to preserve without less the contributions of network broadcasting to the public and to the affiliated stations, while ensuring that licensees will exercise their responsibilities under the law. We believe that these regulations will foster and strengthen network broadcasting by opening up the field to competition."

The Commission finds a variety of restraints in the present station-network relationships which impair the ability of stations to render service in the public interest. By removing these restraints, the Commission states, there should result "an increased number of networks, and, consequently, a larger supply of available network programs and a wider latitude for all stations in obtaining network programs."

The Commission notes that there exists only two alternatives to competition as a means for protecting the public interest in radio broadcasting: government ownership and detailed regulation of the kind applicable to railroads and telephone companies. The Commission rejects both of these alternatives. It states: "We believe * * * that competition, given a fair test, will best protect the public interest. That is the American system."

Six of the eight regulations are designed to remove the restraints upon stations contained in most station-network affiliations contracts. Under the new regulations, an affiliation contract may not restrain a station from carrying programs offered by any network, or restrict a network to one station in an area. It may not bind a station to a network for more than one year, and must leave each station free to schedule programs as the station considers to be in the public interest. It may not contain an option clause requiring a station to cancel other programs merely because the network offers a program for the optioned hour; nor may it deprive a station of the final decision as to what programs shall or shall not be broadcast.

Finally, an affiliation contract may not deprive a station of the right to set its own rates, and to compete freely with networks for advertising revenues. Thus, according to Chairman Fly, "the new regulations might properly be called a Magna Carta for American broadcasting stations."

Says the Commission:

"This report is based upon the premise that the network system plays a vital role in radio broadcasting and has brought great benefits to it. We have carefully drawn our regulations so as not to interfere with any of the three major functions which a network performs—the sale of time to advertisers; the production of programs, both commercial and sustaining; and distribution of programs to stations."

The report further states:

"We are concerned * * * with insuring that at reasonable intervals a station will be free to change its regular network affiliation, and, as occasion requires, to broadcast the programs of networks with which it is not regularly affiliated, and to exercise independent judgment in rejecting or refusing network programs. To the extent that the networks' present status rests upon excellence of service rather than coercive power, it will remain substantially unaffected."

May 9, 1941 — 415
The regulations are designed not merely to introduce competition among existing networks, but also to open the door to new networks. Says the report:

"The exclusion of new networks from the industry is especially onerous because of the failure of existing networks to render service on a truly national basis. They have left a number of communities, especially in the West and Middle West, wholly without network service, and many more with inadequate service or service from only one network. Under such circumstances, it is especially important to keep the door open for new networks which may be willing to serve areas now unprovided for."

In laying the foundation for its discussion of the current network situation, the Commission report deals with the history of the Columbia Broadcasting System (CBS) and the Mutual Broadcasting System (Mutual); and places particular stress upon the history of the National Broadcasting Co. (NBC), and its parent, Radio Corporation of America (RCA). "NBC is but a branch—though an important branch—of (RCA), a corporate enterprise which straddles the fields of communication, radio-equipment manufacture, and entertainment," the Commission declares, and adds:

"RCA was originally founded to utilize wireless techniques for the transmission of messages; today it besie..."}

The report notes that stations utilizing roughly 97 per cent of the nation's total nighttime broadcasting power are affiliated with the three major networks. All but two of the nation's clear-channel stations are affiliated with NBC or CBS and the remaining two (WOR and WGN) own Mutual. Eighteen of the Nation's most powerful and most desirable stations are licensed directly to NBC or CBS.

The Commission comments:

"The United States has rejected government ownership of broadcasting stations, believing that the power inherent in control over broadcasting is too great and too dangerous to the maintenance of free institutions to permit its exercise by one body, even though elected by or responsible to the whole people. But in avoiding the concentration of power over radio broadcasting in the hands of government, we must not fall into an even more dangerous pitfall: the concentration of that power in the hands of self-perpetuating management groups."

One of the eight new regulations concerns the ownership of stations by networks, as distinguished from the affiliation of stations with networks by contract. The report notes that 18 of the most powerful and desirable stations in the country are at present licensed directly to NBC or CBS. "Competition among networks for these facilities is non-existent," says the Commission in discussing this "bottling-up" of the best stations. It finds that the "licensing of two stations in the same area to a single network organization is basically unsound and contrary to public interest," and that it is against the public interest for networks to operate stations in areas where the facilities are so few or so unequal that network competition is seriously restricted. The Commission concludes:

"Subject to the right and opportunity of CBS and NBC to show at hearing in a particular case that public interest requires otherwise, the Commission will not license to a single network organization more than one station within a given area, nor will it license stations to any network organization in communities where the available outlets are so few or of such unequal desirability as to require that all facilities be open to competition among networks for outlets and among stations for networks."

The Commission occasionally contrasts Mutual with NBC and CBS in respect to size, structure, and mode of operation, but makes it clear that in so doing it does not seek to approve Mutual practices or to set them up as ideals or models. "On the contrary," it observes, "we find a tendency in Mutual to follow the paths toward restrictive practices blazed by CBS and NBC."

Another of the new regulations concerns the operation of more than one network by one organization. The report notes: "The operation of the Red and Blue networks by NBC gives it a decided competitive advantage over the other two networks." It further notes that NBC's Red and Blue networks do not compete with one another, and that "the Blue has had the effect of acting as a buffer to protect the powerful Red against competition. * * * NBC has utilized the Blue to forestall competition with the Red."

The Commission concludes that "it is not in public interest for a station to enter into a regular affiliation contract with a network's organization maintaining more than one network." It adds:

"Under any system of broadcasting, someone must decide what a station will put on the air and what it will not. * * * Decentralization of this power is the best protection against its abuse. We cannot permit the protection which decentralization affords to be destroyed by the gravitation of control over two major networks into one set of hands. While the concentration of power resulting from operation of a network is unavoidable, the further concentration of power resulting from operation of two networks by one organization can and should be avoided."

The remaining six new regulations are concerned with the affiliation contracts between networks and stations. Among the restraints which the Commission finds in these contracts are the following:

"NBC and CBS, by contractual arrangements with their affiliates, prevent the great majority of them from broadcasting programs of any other national network."

"Programs rejected by (network) affiliates, * * * may not be offered by the network to other stations in the service area of the affiliate which rejects the program."

"The long-term (five-year) contracts of CBS and NBC were intended to, and do, prevent any real competition in the network-station market."

"National network time options have restricted the freedom of station licensees and hampered their efforts to broadcast local commercial programs, the programs of other networks, and national spot transcriptions."

"Long-term (five-year) affiliation contracts, with their exclusivity and optional-time provisions, seriously interfere with competition among networks. Ownership of broadcast stations by networks, however, goes even further. It renders such stations permanently inaccessible to competing networks."

"The operation of the Red and Blue networks by NBC gives it a decided competitive advantage over the other two national networks. * * * By tying up two of the best facilities in lucrative markets—through the ownership of stations, or through long-term contracts containing exclusivity and optional-time provisions—NBC has utilized the Blue to forestall competition with the Red."

"NBC has attempted to protect itself against competition with its affiliates for the business of national advertisers. * * * A contract of this kind, providing a severe penalty for price-cutting, is equivalent to, and has the same effect as, a price fixing agreement."

"At every turn, * * * restrictive clauses taken cumulatively operate with even greater force than their effect considered in isolation would suggest."

The six features of present affiliation contracts which the new regulations are designed to eliminate are:

1. "Exclusivity"
2. "Territorial Exclusivity"
3. Contracts binding for more than one year
4. "Network optional time"

5. Restrictions on the right to reject network programs

* * *

1. "Exclusivity"

Under the so-called "exclusivity clause," a station affiliated with one network may not carry a program of any other network. The Commission notes that there are a great many cities to which neither Mutual nor any new network can obtain any access whatever, since all the stations are already bound to NBC or CBS by contracts containing "exclusivity clauses." Thus:

"Not only is regular Mutual program service banned from large areas, but even individual programs of unusual interest are kept off the air. A concrete example of the manner in which exclusivity clauses operate against the public interest may be seen in the broadcasting of the World Series baseball games of October 1939. Mutual obtained exclusive privileges from the baseball authorities for the broadcasting of the series with the Gillette Co. as commercial sponsor. Thereupon it attempted to obtain time from various stations including stations which were then under exclusive contract to NBC and CBS. CBS and NBC immediately called upon their outlet stations to respect the exclusive provisions of their contracts. Disregard of this reminder would have jeopardized a station's rights under the contracts. This prevented certain licensees from accepting a program for which they believed there was public demand and which they thought would be in the public interest. It also deprived the advertiser of network advertising service in some areas and prevented the licensee from receiving income which could have been obtained from acceptance of the program series. As a result, thousands of potential listeners failed to hear the World Series of 1939."

Under the new regulations, stations affiliated with one network may nevertheless carry also programs offered by any other network.

2. "Territorial Exclusivity"

Similar to the "exclusivity clause" is so-called "territorial exclusivity," under which a network is bound not to send a program to any station located in an area served by its affiliated station, even though the affiliated station rejects the program. Says the Commission:

"Territorial exclusivity arrangements are important from the point of view of over-all program structure. To be sure, usually it would be wasteful duplication of service for a network simultaneously to send identical programs to stations whose service areas approximately coincide. If the only effect of territorial exclusivity were to prevent duplication, no fault could be found. But exclusivity goes much further; it protects the affiliate from the competition of another station in the same area which may wish to use programs not carried by the affiliate.

"Under territorial exclusivity, programs rejected by affiliates, sustaining or commercial, may not be offered by the network to other stations in the service area of the affiliate which rejects the program. An example of the adverse effect this may have upon the public is given in a brief filed August 7, 1940, by station WBNY at Buffalo, N. Y. WBXY related that Mutual outlets in Buffalo rejected a sustaining program series known as "The American Forum of the Air," but that its efforts to obtain this program were futile. Consequently, this worth-while program was not broadcast to the Buffalo area despite the desire of WBNY to carry it."

* * *

"It is as much against the public interest for a network affiliate to enter into a contractual arrangement which prevents another station from carrying a network program as it would be for it to drown out that program by electrical interference."

3. Long-Term Affiliation Contracts

One of the new regulations limits the term of affiliation contracts to one year. Says the Commission:

"With respect to the maximum term of the contract, no showing has been made that there is any business need for an affiliation contract longer than one year. On the contrary, competition will be strengthened if opportunity is provided for annual readjustments on the basis of comparative showings of networks and stations. We conclude, therefore, that station licensees will best serve the public interest if they refrain from entering into such contracts for periods of excess of one year and hold themselves free to negotiate with networks annually."

4. "Network Optional Time"

Another provision in standard affiliation contracts having a restrictive effect upon stations is the so-called "optional time clause," under which a station must cancel any program scheduled during an option period if the network with which it is affiliated offers a program for that period. NBC, CBS, and Mutual all have such clauses in some or all of their contracts. Says the Commission:

"A station licensee must retain sufficient freedom of action to supply the program and advertising needs of the local community. Local program service is a vital part of community life. A station should be ready, able, and willing to serve the needs of the local community by broadcasting such outstanding local events as community concerts, civic meetings, local sports events, and other programs of local consumer and social interest.

"We conclude that national network time options have restricted the freedom of station licensees and hampered their efforts to broadcast local commercial programs, the programs of other national networks, and national spot transmissions. We believe that these considerations far outweigh any supposed advantages from "stability" of network operations under time options. We find that the optioning of time by licensee stations has operated against the public interest."

5. Restrictions on the Right to Reject Network Programs

Many affiliation contracts restrict the right of a station to reject network programs, even though a better program is available for the same hour. Thus control of what a station broadcasts is in effect taken away from the station. This is especially true, because "precise information concerning the program the network proposes to distribute is not usually furnished and is not always easy to furnish." Says the Commission:

"It is the station, not the network, which is licensed to serve the public interest. The licensee has the duty of determining what programs shall be broadcast over his station's facilities, and cannot lawfully delegate this duty or transfer "the control of his station directly to the network or indirectly to an advertising agency. He cannot lawfully bind himself to accept programs in every case where he cannot sustain the burden of proof that he has a better program. The licensee is obliged to reserve to himself the final decision as to what programs will best serve the public interest.

"We conclude that a licensee is not fulfilling his obligations to operate in the public interest, and is not operating in accordance with the express requirements of the Communications Act, if he agrees to accept programs on any basis other than his own decision that the programs are satisfactory.

"Even after a licensee has accepted a network commercial program series, we believe he must reserve the right to substitute programs of outstanding national or local importance. Only thus can the public be sure that a station's program service will not be controlled in the interest of network revenues."

6. Limitation of Competition Between Network and Station

A final regulation is concerned with the station's control over its own rates. Some present affiliation contracts penalize a station for selling time to national advertisers at less than the rate which the network charges for the station's time, and thus binders it from competing with the network. "A contract of this kind, providing a severe penalty for price-cutting," says the Commission, "is equivalent to, and has the same effect as, a price-fixing agreement."

The Commission further states:

"We conclude that it is against the public interest for a station licensee to enter into a contract with a network which has the"
The door of opportunity must be kept open for new networks. We believe that the public interest will best be served and listeners supplied with the best programs if stations bargain freely with national advertisers."

Throughout the report, the need for competition as a protection to the public is emphasized. For example:

"A constantly improving service to the public requires that all the competitive elements within the industry should be preserved. The door of opportunity must be kept open for new networks. Competition among networks, among stations, and between stations and networks, all of which profoundly affect station service, must be set free from artificial restraints. It is not in the public interest for any licensee station to make arrangements which tend to close that door or restrain that competition. Pursuant to the mandate of Congress that it grant licenses and renewals only to stations operating in the public interest, this Commission must refuse further to license stations which persist in these practices."

The Commission notes that approximately the same restraints are found among some regional as among national networks, and hence the new regulations cover regional networks. According to the report:

"Restrictive contracts and other practices with which these regulations are concerned restrain competition and operate against the public interest whether the network concerned is national or regional. True, the national restraints loom larger; but *** with respect to a given station, a given community, or a given region, a restrictive contract between a station and a regional network *** may operate to foster a local monopoly and to impair station operations in the public interest just as effectively and as intensively as similar practices on a national scale."

However, the Commission notes that the regional networks are "in a state of more rapid flux than the national networks." and that therefore it "will carefully consider, in particular instances, any showing that the application of the regulations herein adopted to a station affiliated with a regional network will reduce rather than increase its ability to operate in the public interest."

The new regulations are effective immediately, except that with respect to existing contracts and arrangements, the effective date is deferred for 90 days. The regulation concerning network ownership of stations may be further extended from time to time with respect to any station to permit the orderly disposition of properties.

The "Conclusion" of the Commission "Report on Chain Broadcasting" follows in full:

"We have exercised our jurisdiction upon the premise, generally accepted by the public and the industry, that the network method of program distribution is in the public interest. We subscribe to the view that network broadcasting is an integral and necessary part of radio. The regulations which we are promulgating are designed to preserve without loss the contributions of network broadcasting to the public and to the affiliated stations, while ensuring that licenses will exercise their responsibilities under the law. We believe that these regulations will foster and strengthen network broadcasting by opening up the field to competition. An open door to new networks will stimulate the old and encourage the new."

"The prophecy that regulations such as we are adopting will 'result in the eventual destruction of national program service' and 'destroy the American system of network broadcasting' is, we believe, the exaggeration of advocacy. The practices which we find contrary to public interest were instituted to restrict competition within the broadcasting field, not to protect commercial broadcasting from competition by other types of advertising, but to familiarize the public with radio as an advertising medium. The radio reaches a different audience from other types of advertising, and that it reaches them in a different way. We doubt that the networks have so little faith in the stability of their own enterprise as is suggested by their insistence that the whole structure of commercial broadcasting will collapse if their relations with outlets are modified along the lines indicated. It is incredible that the industry's footing is so insecure. The prospect that advertisers will desert radio in favor of newspapers, magazines, or billboards is singularly unconvincing."

"We are under no illusion that the regulations we are adopting will solve all questions of public interest with respect to the network system of program distribution. For example, we have not dealt with the activities of principal networks in the fields of electrical transcription and talent supply, although we recognize, as did the committee, that their activities in these fields 'raise problems which vitally concern the welfare of the industry and the listening public.' The problems in the network field are interdependent, and the steps now taken may perhaps operate as a partial solution of problems not directly dealt with at this time. Such problems may be examined again at some future time after the regulations here adopted have been given a fair trial."

"We have been at pains to limit our regulations to the proven requirements of the situation, and especially to ensuring the maintenance of a competitive market. Radio broadcasting is a competitive industry. The Congress has so declared it in the Communications Act of 1934, and has required the fullest measure of competition possible within physical limitations. If the industry cannot go forward on a competitive basis, if the substantial restraints upon competition which we seek to eliminate are indispensable to the industry, then we must frankly concede that broadcasting is not properly a competitive industry. If this be the case, we recommend that the Congress should amend the Communications Act to authorize and direct regulations appropriate to a noncompetitive industry with adequate safeguards to protect listeners, advertisers, and consumers. We believe, however, that competition, given a fair test, will best protect the public interest. That is the American system."

The report is concurred in by Chairman Fly and Commissioners Walker, Payne, Thompson, and Wakefield; with Commissioners Case and Craven dissenting.

The Dissent

Following is the FCC's summary of the "minority comment" by Commissioners Case and Craven on the new network rules:

All members of the Commission recognize that improvements in the present broadcast service as well as in the organization thereof are not only possible but also desirable. However, the minority disagrees with the proposals which the majority has adopted as a method of securing improvements. We fear that the proposals of the majority will result inevitably in impaired efficiency of the existing broadcast organization of the country. This system has been developed as a result of practical experience over a period of years. In the main it is operating very well in the public interest. Undoubtedly it provides the public with the best broadcasting service in the world. Naturally, there are faults which may need correction. However, some of the corrective processes suggested by the majority may easily result in faults which are far more basic than the known defects which exist today. Furthermore, it appears that insufficient recognition is given to the practical considerations which are inherent in the American system of broadcasting and which cannot be circumvented. It seems that no weight is given to the fact that broadcasting is dynamic and not static. No consideration seems to be given to the probable effect of new developments. Also inadequate recognition is given to the effect of the natural and economic limitations within which broadcasting must operate. Likewise, inadequate recognition is
given to the natural laws which influence basically the manner in which broadcasting renders a social service to the public of America.

No member of the Commission condones any form of monopoly which concentrates power contrary to the public interest or which constitutes unreasonable restraint of competition. However, the majority appears to suggest that "unlimited" competition is the most important factor in securing improvements in radio broadcasting service and proposes to issue regulations the effect of which will prohibit certain contracts which now exist between chain companies and their affiliates. The intent of these regulations is to ban all arrangements which limit the ability of any broadcast station licensee to enhance at any time in any and all forms of competition. While the minority insists upon competition they suggest the principle of "Free competition accompanied by good radio service to the public" rather than competition which affects adversely program service.

The minority is of the opinion that the most important problem confronting the Commission may be stated briefly as follows:

"Considering the necessity of a balanced radio broadcast service of interest to and in the interest of the public, and recognizing the natural limitations inherent in radio, how can greater equality of opportunity be extended to persons desiring to utilize radio as a media of broadcasting information to the public?"

The solution of the problem requires a broad viewpoint as well as a balanced consideration of at least all of the following factors which among others contribute to broadcast service in the interest of the public:

1. The establishment of a "free radio" insofar as is practicable within inherent natural limitations.
2. Good programs.
3. An equitable distribution of facilities to states and communities.
4. Diversification of control of radio stations among many licensees.
5. Competition.
6. Efficiency of program distribution to the nation as a whole.
7. Operation of each station in the public interest rather than for the private interest of the licensee.
8. Natural economic laws of supply and demand.

A limited approach, or conclusions based upon over-emphasis of one phase of the problem, will result in unsound administration and unfortunate consequences to the radio service to which the public is entitled. More specifically, we fear that the revolutionary change proposed by the majority will result in the destruction of the present excellent national program distribution system and the substitution therefor of some new kind of system, the effects of which the majority does not adequately visualize.

It is axiomatic that unlimited availability of the few existing radio facilities and efficient national program distribution cannot both be attained at the same time. There is no open market condition in the business of broadcasting as in other businesses. Nature has determined that. To attempt to circumvent these basic economic laws is fraught with peril to an industry which disregard of economic laws may foster a situation in which competition among persons engaged in broadcasting serves to facilitate the attainment of a "free radio." This type of regulation differs from that applied to other private business operations in the public domain.

Thus, the question of the power of the Commission to regulate the business phases of broadcasting may be approached from the standpoint of public interest. Congress required that radio, like the press, must be free from those restraints of Government which hamper free expression and which control what may be said or who may speak. The most important function of Government should be to facilitate the attainment of a "free radio." Therefore, it may be argued that if the licensing authority intereries with the business practices of persons engaged in broadcasting, there is concentrated in a single Government agency a power which must lead inevitably to undesirable restraints upon a "free radio." Such concentration of power in Government is just as contrary to public interest as the concentration of control of broadcast stations among a limited number of licensees.

It is obvious that if all the stations in the country were licensed to one person, that person, even though regulated by the Government, would have vast power to control an important media of information. Even though such person had the best of intentions...
for the welfare of the public, his would be the sole judgment which determined how radio would be utilized to influence public opinion. Such an extreme is unthinkable. On the other hand, if we had innumerable licensees and therefore innumerable competitive judgments, all under the autocratic regulatory supervision of a single Government agency vested with final and unrestrained power of life and death over the economic destinies of each licensee, we likewise would have an intolerable situation, however well-intentioned such Government agency may be. It was for this reason that Congress provided not only for a diversification of control of radio broadcasting among licensees, but also for diversification of jurisdiction among various regulatory agencies of Government. It was not intended by Congress that any licensee merely because he was a radio broadcaster should be exempt from the application of laws directed to business enterprise. The Department of Justice and the Federal Trade Commission as well as other Government agencies include broadcasters within their jurisdiction when administering the laws relating to all business enterprise.

Congress empowered the Federal Communications Commission to regulate only that phase of radio operation which relates to licensing stations. This embraces a fair and equitable distribution of radio facilities to states, communities and persons in a manner which insures diversification of control among many licensees, as well as a good program service of interest to and in the interest of the public. It likewise includes the regulation of technical aspects of operating stations and certain other phases of radio operation affecting public interest which are not under the jurisdiction of other agencies of Government. The Commission is charged with the responsibility of determining the qualifications of licensees to operate radio broadcast stations, but the Commission does not have the responsibility to determine the guilt of licensees for violations of law, the administration of which is not under the direct jurisdiction of the Communications Commission. If licensees of radio stations are found guilty of violation of such other laws, the Commission's responsibility in the premises rests solely as to the qualifications of such licensees to operate stations in the interest of the public.

If some form of monopoly exists in radio broadcasting which is contrary to the best interests of the public, it should be remembered that the Commission has licensed all broadcasting stations in the United States after finding time and time again that each of the licensees was operating his station in the public interest. Therefore, if the Commission has erred in the past, it can now correct the mistake by exercising in individual cases the licensing power delegated to it under the Communications Act of 1934.

The Commission should encourage the organization of independent, highly competitive national networks. However, if there are limitations or barriers to the establishment of additional competitive networks, the Commission need not and should not promulgate rules the effect of which would destroy all existing systems, merely to provide some other private enterprise with an opportunity to capture the revenues of broadcasting. There are better ways to encourage and secure additional competition.

Conclusions

There are certain factors which should provide the basis for consideration of the many complex problems in the field of radio broadcasting. However, as has been stated elsewhere in this report, no abrupt changes should be attempted without positive indication that such changes will result in improved service to the public. The record in this instant investigation does not justify sweeping proposals to change the developments resulting from practical experience.

It is must be considered that since 1927, the American system of broadcasting has developed under a Congressional formula which, until recently, has been administered in its broad policy aspects with fair consistency by the Commission and, on the whole, uniformly interpreted by the Courts. It must be admitted that imperfections exist. No human institution is free from error. It is significant, however, that this record fails to disclose important abuses. Moreover, no information is available to the Commission which justifies an invasion of the business practices of the licensees of this Commission.

It is true that some of the pioneers in broadcasting have achieved conspicuous financial success. Likewise others who have made contributions to the industry and the public have been well rewarded. This fact alone affords no proper basis for a radical extension of the regulatory scheme.

The record shows that in broadcasting there exists vigorous competition in the areas that count. It is the duty of the Commission to preserve and encourage such competition. However, we should not embark upon novel or untried courses of regulation based upon mere speculation as to how American businessmen should manage their affairs. Rather we should consider that the consequences of our acts might injure or retard further improvement in the existing system and the service which it now performs.

Competition accompanied by good radio service to the public should continue to be fostered by the Commission. However, the blind adherence to the slogan "free competition", regardless of all practical factors, is unsound and will result in a conglomeration of uncoordinated radio stations rendering an inferior service to the public.

On the whole, radio broadcasting has an excellent record of public service. This includes both networks and the independent stations. Possibly with a few isolated exceptions, radio has been scrupulously fair in dealing with questions of political, social and economic importance. It has been progressive and enterprising in the entertainment field. The public has been and should continue to be its most important and only censor.

Radio is so constituted that it is sensitive to public criticism and responds promptly to changing public tastes. For this Commission or any agency of Government to attempt to substitute its judgment for that of the public involves an arrogant presumption which should be avoided at all costs. Such a policy is not contemplated by anyone on the Commission seems quite clear. However, it can be argued with logic that invasion of this economic field by the licensing authority in the absence of clear legal mandate would constitute an inevitable prelude to the second step of assuming the role of arbiter of public tastes.

Circumstances may require the Federal government to exercise broad powers in many fields of our economic life, but it is imperative that broadcasting be maintained as a free American institution. To adopt some pattern of government regulation as applied in other fields is to ignore the real nature of broadcasting. Borrowed techniques just don't fit. Broadcasting must be kept free from unnecessary Government restrictions. Nowhere has this concept been given better expression than in a recent statement of the President of the United States wherein he said:

"Your Government has no wish to interfere or hinder the continued development of the American system of broadcasting. Radio was born and developed in the real American way and its future must continue on that basis."

Our views in this matter may be summarized as follows:

1. The Commission is without jurisdiction to promulgate regulations which undertake to control indirectly the business arrangements of broadcasting licensees.
2. The record shows vigorous competition among networks and independent stations within the limitations of facilities imposed by nature and thus no finding of illegal monopoly can be made by this Commission, even if it can be assumed that this Commission had the legal authority to make such determination.

mass communication upon which so many of our people

rely for information and diversion.

EXECUTIVE COMMITTEE

The NAB Executive Committee, as instructed by the

Board of Directors, met Wednesday, May 7, in New

York. The network report, the proposed hearing on newspap¬

er ownership and the ASCAP situation were consid¬

ered. The committee decided to report to the Board at the

St. Louis meeting, Monday, May 12.

REPORT FOR SALE

The FCC’s supply of copies of its “Report on Chain

Broadcasting” is now exhausted.

However, the complete report with its associated order

(153 pages) is obtainable from the Superintendent of

Documents, Government Printing Office, Washington,

D. C., at 30 cents a copy.

REPORT TO DEPARTMENT OF JUSTICE

At a press conference on Monday, FCC Chairman

James Lawrence Fly stated that the Commission would

send a copy of the monopoly report and the complete rec¬

ord in the case to the Department of Justice.

OUTSIDE SALESMEN

A break for small stations under the Wage and Hour

Act was obtained by the NAB this week when the Wage

and Hour Division held that radio’s outside salesmen

could write their own copy without losing their exemption.

The Wage and Hour Division’s ruling followed a con¬

ference between division attorneys and Joseph L. Miller,

NAB labor relations director, who presented the indus¬

try’s story.

The definition of an exempt outside salesman says he

can do work “incidental to” his selling without losing his

exemption. The division held that copy writing was “inci¬
dental to” selling.

Announcing, however, is not “incidental to” selling.

Therefore, if an outside salesman announces more than

20 per cent as much (in time) as regular announcers who

are non-exempt, he loses his outside salesman’s exemp¬

tion.

For example, in a station where regular announcers

work 40 hours a week, an outside salesman could work

the following hours without overtime payment:

Outside selling: 40 hours

Writing copy for accounts sold: 10 hours

Announcing: 8 hours

The text of the Wage and Hour Division’s opinion:

This is in reply to your letter of April 28, 1941, in which you ask

certain questions concerning the application of the outside sales¬

man exemption provided by section 13(a)(1) of the Fair Labor

Standards Act to employees of radio stations.

Your first inquiry relates to outside advertising solicitors who

prepare the commercial “copy” for use on the programs which they

have sold. You state that you consider the preparation of the copy

to be “incidental to and in conjunction with the employee's own

outside sales or solicitations” within the meaning of section 541.5(B)

of Regulations, Part 541. If an outside advertising solicitor other¬

wise conforms with section 541.5 of the regulations, it is the opin¬

ion of this office that preparation of commercial “copy” when writ¬
ten exclusively with respect to the advertising accounts sold by

such employee may be considered to be incidental to and in con¬

junction with his own outside sales or solicitations.

Your second inquiry relates to employees who solicit advertis¬

ing away from the place of business, prepare the commercial copy

at the place of business and also announce the program as pre¬

pared by them. In the opinion of this office, the announcement of

the program is too far removed from the outside solicitations to

be considered incidental to or in conjunction therewith. Accord¬

ingly, the time devoted by the outside solicitors in question to the
announcing of programs should be considered as nonexempt work within the meaning of the 20 percent test contained in section 541.5 of Regulations, Part 541.

Very truly yours,

For the Solicitor,

(s) Rufus G. Poole,
Assistant Solicitor In Charge
of Opinions and Review.

Broadcast Advertising Record

On May 7 the NAB Research Department released Volume I of "Broadcast Advertising Record". It is a new name and a new record, formerly called the Broadcast Advertising Unit Volume Report.

The "Broadcast Advertising Record" just released presents January, 1941 unit volume of the stations reporting. The "Record" is rearranged to increase the practical value of this sales tool to business with facility in each for direct comparison of the individual station with all stations, the average station and stations located in each of five market sizes.

The "Record" was mailed to those stations actively cooperating in this undertaking by submitting monthly records of their business.

Station managers who have seen the "Record" are enthusiastic and confirm the belief of the Research Department and the Department of Broadcast Advertising that the "Record" will be the most potent business-builder in the possession of stations.

January 1941 totals of programs units and announcements carried on 227 stations and all national networks is presented in the following table:

APPLE COMMISSION USES RADIO

As previously related in these REPORTS, various interests have taken advantage of the national defense emergency to bring pressure through governmental agencies or bureaus for free radio time, under the guise of participation in national defense. An example recently cited in these columns is the Fish and Wildlife Service of the Department of the Interior, which is currently receiving $98,076.16 worth of free radio plugs per year.

In refreshing contrast is the Washington State Apple Commission, now engaged in a four-week $20,000 radio campaign in selected markets. After considerable discussion and correspondence between this Commission and NAB, a letter from C. E. Chase, Secretary-Manager of the Commission, states:

"On my return here I read with considerable interest your letter of April 4th, together with the copy which you enclosed which you had written in connection with the broadcast of fish menus. I also read your letter to the Commission at our meeting on the 19th and gave it as my reason for not having done anything in connection with getting the Department of Agriculture to put on apple radio programs. They approved the stand I had taken on account of my conference with you, and Kelsey Denton, the new Northwest manager of the J. Walter Thompson Company, also concurred.

"We are putting on a radio program for the next four weeks, starting the first of May, which will total over $20,000. While this amount does not mean much to some organizations, to us it is considerable, as you know. We hope to get splendid cooperation from the stations in this connection, as you will note by the bulletin I am enclosing where I have marked the information we are putting out to the shippers about this.

"I think you are familiar with the fact that we just concluded advertising in 45 cities, most of which expired the 26th of April. A good deal of this was radio. On this new drive, however, it is all radio, and of course in a good many cities we have posters which are still being left up even though the expiration date is past."

Certainly no comment on a letter like that is required. Instances like this, though rare, are so encouraging that NAB sincerely hopes that participating stations will do all in their power to make the apple campaign an outstanding success, for the salutory effect it will have on other groups.

SUCCESS STORIES NEEDED

To fill current requests from members, additional success stories, big or little, are urgently requested on these topics:

| Amusements | Funeral services |
| Meat products | Newspapers |

Please send what you have to the Department of Broadcast Advertising.

MOVIES USE INTERNATIONAL RADIO

A 52-week contract for two programs per week, to be broadcast over international transmitters to South America, has been signed by RKO Pictures with the International Division of NBC.

One program will dramatize highlights of current RKO Pictures, the other will dramatize the lives of RKO stars.

The contract was placed direct by the motion picture company with no agency involved, and may indicate a more pronounced trend towards the use of radio advertising by the motion picture industry.

CIRCUS SUCCEEDS WITH RADIO

In response to the item last week detailing plans to spend $350,000 in newspaper advertising this summer by circuses, Howard Loeb of WFDF, Flint, Mich., contributes an outstanding circus success story substantiating NAB's belief that not only can a circus use paid radio advertising effectively, but that it will do so if properly handled by station managers.

Writes Mr. Loeb:

"Through a mistake the big Hagenbeck-Wallace Circus and the equally big Cole Brothers Circus made arrangements to show in
Flint on exactly the same day, July 5, 1937. Their advertising representatives both frantically appealed to WFDF for help. A community of 150,000, they felt, was not big enough to support two big circuses simultaneously. They wanted to know what should be done about it.

“We suggested that we declare a ‘Circus Day in Flint’, and pointed out that if each circus would increase its advertising appropriation and place the biggest share of their budgets on our station, everything would turn out all right. This they agreed to do. Hagenbeck-Wallace placed an order with us at regular rates to be spent on three days up to and including circus day. Cole Brothers placed an order on the same basis. Both companies purchased spots announcing ‘Circus Day’, each plugging its own name and circus grounds. We did not use any program whatsoever and the circuses cut their newspaper space to a minimum, putting the big responsibility on radio.

“To say that both circuses were elated over the results would be putting it mildly, as all their tents were far too small to handle the crowds, and it turned out that two circuses on the same day in Flint are not enough—we think we might have handled several more. Attached is a copy of a letter from R. E. Hickey, General Press Representative of Hagenbeck-Wallace.”

The letter from Mr. Hickey states:

“It is indeed a pleasure for me to write you and tell you of our great success in Flint on July 5, 1937, when Hagenbeck-Wallace had opposition-day and date—with another large railroad circus. Our records for that day show two thousand more paid admissions than capacity, which is indeed a remarkable figure to attain, when you consider it was the third day of a week-end holiday, the heat and other circumstances.

“During my stay in Flint and also on circus day your station cooperated 100 per cent, and the advance press department and also the executives of Hagenbeck-Wallace wish to thank WFDF for its loyalty and the promotion of this circus.

“For the remarkable turnout of the Flint and Genesee county people and the huge Hagenbeck-Wallace business we lay a good share of the cause at the studio door of WFDF. I am highly recommending your station and its facilities to our other two major circuses, our associates.

“You may be certain of a good percentage of our advertising appropriation when next we appear in Flint. Thanks to you and all your excellent staff, and good luck and happiness.”

We suggest that you confer with your sales, program, news and special events departments, so that when the first circus approaches your station for free promotion, these letters may be put to effective use.

AFA CONVENTION PROGRAM

J. Walter Neff, president of Neff-Rogow, Inc., New York City, will speak on “Increasing the Tune-In” before the radio section at the AFA convention in Boston at 10:00 a.m. on Wednesday, May 28. This agency has achieved notable success in radio for such clients as Bond Clothes, Thom McAn Shoes, and others, and Mr. Neff has developed some unusual approaches and techniques that he will discuss for the benefit of all radio men attending.

“The Effect on Advertisers of the Monopoly Report” will be discussed by Russell Place, NAB Counsel, and “Chimes and Gongs in Radio Advertising” will be the topic of Frank E. Pelegrin, Director of the NAB Department of Broadcast Advertising. An open forum discussion of all radio topics of interest to station men and advertisers, especially those acted upon at the NAB convention, will follow. Robert S. Peare, advertising manager of the General Electric Co. and manager of broadcasting at WGY, Schenectady, will preside.

PER-INQUIRY OFFERS

“Radio Income Builders” (sic) of 225 Fifth St., Des Moines, who call themselves “Specialists in creating income producing plans for use on unsold station time,” thus frankly confess to be per-inquiry seekers. Their current effort is to put radio stations in the fountain pen business. In a four-page communication they offer to sell fountain pens direct to stations, requiring the station to pay in full ten days from date of invoice. The station is expected to sell the pens over the air on “unsold” time, pay the postage, handle the mailing, etc., and keep what profits there are, if any. No provision is made for return of unsold pens; apparently stations that fail to sell their full order are struck with the balance. The company also says “We now have in test a large number of other products,” to be later “released to our Radio Station customers.”

This company has been advised by NAB that it is the policy of most radio stations to try and operate their radio business successfully, and leave the fountain pen business to others; that stations would dislike to see fountain pen dealers and stationers begin to compete with us in the sale of advertising, and that this fair-play policy works both ways; that stations dislike to enter the direct sales field in competition with local retailers and thus incur the ill will of local merchants, whose support they need, and finally, that many per-inquiry products have been found unsatisfactory by listeners, who thus lose faith and confidence in the local station that persuaded them to buy, and the station thus loses the friendship of the very listeners who are absolutely vital to its continuance in the broadcasting business. NAB also advised that if the fountain pens are as good as the company claims, there is nothing to prevent the company from buying radio time like other advertisers, and enjoying the profits of its own confidence in its product.

Henry Holt, of Houston, Tex., is seeking per-inquiry deals on a radio log book, perhaps unmindful of the nation-wide industry drive to acquaint listeners with the new frequencies of all stations affected by the recent reallocation.

The Armand S. Weill Co., of Buffalo, N. Y., is seeking special rates on behalf of its client, Sachinol Perfumers. Telling stations they would like an inquiry cost of 11 cents or less, Mr. Weill suggests that if a station does not feel it can pay out on that basis at its regular rates, that it “let me know what rate you would set up to take care of this business. I would advise not setting it too high otherwise you will find it difficult to pay out at our desired inquiry cost.”

Golden Glint Pays Full Rate

That stations can sometimes secure business at card rates from advertisers who first seek special deals is shown by the recent experience of an NAB member, who refused an invitation to cut rates for the Golden Glint Co. Writes the member:

“Just the other day, out of a clear sky, we received another letter from them authorizing us to go ahead at our regular rate, with a series of thirteen one-minute announcements.”

“TESTED METHODS TO MAKE SALESMEN USE ‘HELPS’ MORE RESULTFULLY”

A group of forty sales managers were nearly unanimous in agreeing that their toughest continuing problem was to get salesmen to use selling helps profitably.

Sales departments invest many thousand dollars in material to help salesmen: manuals, portfolios, bulletins, etc., yet many men make little use of this excellent material, which is designed to make their selling more profitable. The trouble isn’t that they don’t appreciate it, or that the material isn’t good. It lies in the fact that the average salesman has a tendency to let things slide outside of the immediate day-to-day contact with prospects slide.

Also, the average conscientious salesman, who studies the man-
answers were all in, the sales manager prepared a complete manual.

Next, the sales manager wrote a long list of questions designed to bring out information as to the best practice among salesmen in doing their stuff. Then, the list was split up and divided among the salesmen for their answers to the questions. When the answers were all in, the sales manager prepared a complete manual which, instead of being called “Manual No. 2” was called “The Book You Wrote”. Copies were then given to each salesman, with a short personal note beginning:

“Here is the sales manual that you helped us write. Every line, every idea came from you or one of the other boys. When I tell you it’s practical, you don’t have to take my word for it. You know it’s practical because you put in it the kind of stuff that you have learned the hard way. etc.”

Plan 2

One company, creating its first manual, decided that the toughest problem involved would be to sell the salesmen the manual idea. The president wrote a letter to the salesmen, telling them a manual was being prepared, asking them to list the major objections and difficulties they encountered.

Next the sales manager requested testimonial letters, unusual performance records and other data of value. In the company’s sales meetings and bulletins each week was something about the progress of the manual, keeping it constantly before the men. After four months of collecting, sorting, dramatizing, editing and indexing material, enough data had been gathered to make up the manual.

The sales manager then called a special meeting for the presentation. It was planned not to pass out a copy of the manual to each salesman until the purpose back of each of the major sections was thoroughly explained. He used a blackboard chalk talk to show the salesmen that the manual was not a canned presentation. He then described its fine points and how it could be used. After this explanation copies were passed to each salesman and a roundtable discussion followed.

Next a boiled down presentation made from the Master Manual was given to the salesmen. They were told that such presentations could be individually built to fit the needs of every prospect. The result was a manual that was used faithfully and thoroughly by a sales force that, in the beginning, had been antagonistic toward the whole manual idea.

Plan 3

A number of companies use sales meetings to create interest in sales material. One plan calls for a “quiz program,” with questions based upon definite sales material previously furnished. A salesman cannot make a creditable showing unless he has been using this material faithfully.

Another company issues a sales bulletin weekly. After 43 bulletins, it held a prize contest, with cash awards to the salesmen who gave the best answers to questions posed in the next ten issues of the bulletin. The questions, of course, required some study of various sales material. About half the sales force submitted answers, but investigation shows that nine-tenths of the men really followed the contest pretty closely. And the salesmen gave much closer attention to the bulletins than they ever had before.

Plan 4

The company wanted to get a new visual presentation used effectively.

It prepared a mailing piece showing several interesting pages from the presentation and telling of its value. This mailing piece was sent to customers and prospects with a letter saying that the salesman calling on the recipient of the letter had a presentation and urging the prospect not to let the salesman get out of the office until he had shown the presentation.

Each salesman received a copy of the mailing and was told that he had better carry the presentation with him on every call because many prospects would be sure to ask for it.

The plan worked well. In many cases customers or prospects had their curiosity aroused to a point where they actually demanded that the salesmen show the presentation.

* * *

A study of the methods used by sales managers to get salesmen to employ sales equipment more effectively indicates that in seeking methods of doing this a number of executives have discovered that the chief reason why men would not use material was because it was not properly prepared.

Therefore, what should probably be Plan One in every sales executives’ consideration is to be sure that the material is profitably usable before asking the salesmen to make good use of it.

### BMI

#### The Song Is the Thing

BMI hits and near hits and their creators will feature a new program sponsored by the Canadian Government over the facilities of the Canadian Broadcasting Corporation. The broadcast, which will begin in the fall and run for a year, will present the news behind the song. The theme will be, the singer may be forgotten but the song lingers on, and the program will tell why it lingers on. The story of how the song came to be written and interesting incidents from the lives of the composers will be included as well as letters of greeting from the composers to the Canadian audience. Jess Jaffrey, who is in charge of the program, expects at the conclusion of this series to have the most complete record available of currently popular songs and of their authors and composers.

More BMI music is being played in Canada now than ASCAP, according to Mr. Jaffrey, despite the fact that Canadian broadcasters have the full rights to play any or all ASCAP selections. There are more requests coming in for BMI music and virtually every program by Canadian orchestra leaders features BMI tunes.

#### Foreign Language Music

There is greater demand among BMI stations for Polish music than for any other foreign music, it is revealed in a survey of requests by member stations. Italian was the second most popular foreign music, followed by Cuban and Latin American, Scandinavian and Hungarian.

In line with BMI’s policy of providing stations with music of every classification, a questionnaire covering listener preference was mailed to BMI subscribers. Latest catalogue lists music of some 33 nationalities, and negotiations are pending for the acquisition
of several additional foreign catalogues, notably of Polish music.

BMI has just closed a contract with Edward and Louis Rossi, 127 Mulberry Street, New York City, transferring the rights to some excellent Italian material, much of which is recorded. Among the recordings are the following:

*Campagnola* by Bertini and recorded by Carlo Butti; *Munez E Llenzole* by Fusco-Falvey, recorded by Gianninni; *Popolarella* by Martelli-Ruccione, recorded by Giglio; *Come Bella A Stagione* by Piasano, recorded by Cibelli, and many others.

Tid-Bits

_Cheer Up_, a BMI controlled tune, published by the Foreign and Domestic Music Corporation, has been adopted by the British-American Ambulance Corps as its official theme song and a share of the profits from all regular music sheets sold will be donated to the Corps’ fund. The publishers have a letter from the office of Prime Minister Winston Churchill thanking them for licensing the tune.

_Hey, Stop Kissing My Sister_, is not only the first song its writers have written together, but their first published song. The writers are Kay Coblin and Phil Coblin, brothers, and Eddie Peyton.

Broadcast Music, Inc., has issued a list of the popular dance numbers controlled by BMI and recorded by name bands. Virtually all of the band leaders are represented. Benny Goodman and Horace Heidt have the largest number of recordings.

**BMI FEATURE TUNES**

May 12 - May 19

1. MY SISTER AND I
2. WALKIN' BY THE RIVER
3. WISE OLD OWL
4. FRIENDLY TAVERN POLKA
5. G’BYE NOW
6. WHAT D’YA HEAR FROM YOUR HEART
7. HERE’S MY HEART
8. WITH A TWIST OF THE WRIST
9. TALKIN’ TO THE WIND
10. THE RELUCTANT DRAGON

BMI Feature Tunes

The Music Popularity chart for the week ending May 3rd compiled by Billboard, shows BMI holding firm to the first five places in leading music machine records with *There’ll Be Some Changes Made*, _It All Comes Back To Me Now_, _Amapola_, _Oh, Look At Me Now_ and _The Wise Old Owl_. _Amapola_ leads all the lists of national and regional best selling retail records. In the sheet music best sellers, it has been replaced in the south by _My Sister And I_ as the number one tune below the Mason-Dixon line. It is interesting to note that _Number 10_, _Lullaby Lane_ holds the second place in southern popularity with _Amapola_ third, with the new _Because of You_, by Arthur Hammerstein, holding fourth position. Among those coming up rapidly are: _Friendly Tavern Polka_, _G’Bye Now_, which is being themed by Horace Heidt’s Ronnie Kemper, and _Do I Worry_, on which Tommy Dorsey has concentrated. Just appearing over the horizon in fifteenth place in national sheet music best sellers is the _Hit Sat Song_, the rights to which have been acquired by BMI, and which bids fair to be the summer’s sensation.

BMI Grants Clearance at the Source to Exhibitors

The following extract of a letter from Sydney Kaye of Broadcast Music, Inc., has created wide spread comment among motion picture exhibitors:

“It is, and always has been, the principle of BMI that the right sold to a motion picture producing corporation should include not only the right to record and synchronize the music with the action of the picture, but also the right to exhibit the picture in all parts of the world, without payment of any additional sum by the theatre owner.

“This has been our policy with respect to all synchronization contracts that we have already made, and we are glad to confirm to you that it will continue to be our practice in the future. You may, therefore, be confident that where a BMI tune is legally included in a motion picture, that means that any exhibitor may freely exhibit the picture without any performing license.”

In this connection, The Independent, motion picture trade magazine, makes the following comment:

“The monopolistic practices of ASCAP have rubbed theatre owners sore for many years, and the constant hike in royalty charges has irked them that much more. The anti-ASCAP legislation in many states is a certain indication of how exhibitors in general feel and the fact that theatres were not covered in a recent consent decree entered into between ASCAP and the Department of Justice has left theatre owners amazed, for certainly the more than a million dollars a year extracted from theatres by ASCAP is a considerable item and should immediately be eliminated.”

It Happens to Titles Too

By a coincidence of this curious music business BMI finds itself in a position of licensing two songs with the same title, _Everything Happens To Me_. One song was written by Louis A. Davis and his brother, Ernest Davis and published by Davis & Ostergard, and the other song by Tom Adair and Matt Dennis, and published by Embassy Music Corporation (Tommy Dorsey). There is no similarity in the music of the songs, nor in the sentiment, nor the lyric, except the title. There is no infringement involved, but the Davis brothers have offered to do a very sportsmanlike thing and substitute, _Why Did It Happen To Me_. There will be slight changes made in the lyric, one line of the verse being re-written. M. E. Tompkins, BMI’s General Manager, is deeply appreciative of the generous attitude taken by the composers as well as by Davis and Ostergard, publishers.

BMI Subscribers More Than Doubled

When BMI entered the NAB Convention in San Francisco last August, subscribers numbered 311. They are now at a new high total of more than 700 including non-commercial. Renewals for BMI’s new year, which runs from April to April, have included all but five of the subscribers for 1940 and many new names have been added to the list. It is interesting to read some of the comment which broadcasters have made on the progress of BMI.

“Keep up the good work. You are going strong! and we like it . . . WFLA: “You are doing a great job, keep it up. We're behind you 1000 percent.” . . . WCWO: “It is a pleasure to cooperate with you in every way, and we assure you we will be glad to work with Broadcast Music, Inc., at all times.” . . . WJAX: “As always we are only too happy to do anything that would further the cause of BMI” . . . WBAP: “We are behind BMI 100%, and nothing gives us more pleasure than to give BMI and its releases all the publicity possible” . . . KOH: “KFAM is happy to acknowledge and compliment the fine policies and wonderful progress made by Broadcast Music, Inc., and its affiliated broadcasters in settling once and for all the serious question of fair practices in the use of music. You may count on our continued support in all matters” . . . KFAM.

May 9, 1941 — 425
In a large office lined with long rows of filing cases, Miss Ottalie Mark, head of the BMI Copyright Research Department, has assembled cards for hundreds of thousands of selections, each with the name of the number, its composers, publisher, date of publication and designation of the performing rights society that controls it. In other files are cards with information on thousands of publishers, not only those in the United States, but also in such distant countries as Argentina, Japan, Peru, Hungary, Haiti and many others. A third file of cards is devoted to authors and composers. Here one can look up almost any living music writer of importance of popular, standard, hill-billy, devotional, military, symphonic or any other classification of music, and secure his name and pseudonym, age, affiliation with performing society, and whenever possible, his address. Thus, Miss Mark has at her finger tips information on practically every composition that might be used today and every person who is at all important in the world of music. In addition, broadcasters can also secure information on the best sources for such obscure and little played material as Chinese, Arabian and Indian music.

According to copyright experts, no music firm has ever taken such extensive steps to avoid errors and infringements as BMI. An example of this extreme care may be seen in the copyright background of the public domain numbers being newly arranged. First, a photostatic copy of the original source material of the number is obtained, usually from the Library of Congress in Washington or the New York Public Library. The composition is then cleared by BMI’s Copyright and Legal Department when it has been definitely established as P. D. material.

After clearance, the selection is sent to the Arranging Department where it is assigned to an arranger by Arthur Gutman, head of the Department. Finally, when the composition has been scored in a new orchestration that is copyrighted, it is returned to the Copyright and Legal Departments for a final check-up. After these steps have been taken, a printed copy of the new arrangement together with all “source material” is put in a large envelope and filed away. Similar records of all BMI’s new popular and standard songs are likewise kept and put on file.

Because of the complete coverage of every aspect of musical copyright, BMI’s Copyright Department has become a sort of national fountain head of information pertaining to copyright questions that is consulted many times daily by BMI stations and also by many band leaders, singers, theatres, managers and others who want authoritative data.

“Because of You”

Without any particular attention, Because of You, a BMI tune by Arthur Hammerstein and Dudley Wilkinson, is rapidly gaining favor not only with the bands, but with concert artists. It has been sung recently on the best of the musical programs and by the best known artists of the air. Arthur Hammerstein is the same Arthur Hammerstein who produced Naughty Marietta and Rose Marie, who introduced Rudolph Friml and who brought to the public eye such outstanding composers as George Gershwin, Vincent Youmans, Jerome Kern and others. While he never wrote any of the music in the successful operettas he produced, there is no doubt that he contributed to the public reception of the hit numbers that came out of each of these productions. Now, after thirty years of producing musicals, Mr. Hammerstein and his collaborator, Mr. Wilkinson, widely known as an accompanist of concert artists, and themselves hit song writers. It is a new experience for both of them.

**BMI’s Copyright Research Department**

As Yankee Doodle was characteristic of the “Spirit of 1776” and the Battle Cry of Freedom suggested the crusading spirit of the war between the states, so Fall In, a new patriotic march, now rolling off the presses of Broadcast Music, Inc., may be said to reflect the cry that is coming to be heard everywhere today—“AMERICANS, UNITE AND HELP TO KEEP US FREE . . .”

According to its author, Welcome Lewis, radio singer, the idea and words for Fall In where inspired by President Roosevelt’s “Hand that Held the Dagger” speech which followed Italy’s entrance into the war on the side of Nazi Germany against her former ally, France.

After listening to the President, Miss Lewis was moved to write the chorus of the song . . . she says now, she didn’t know why, because up to that time she had never written a song . . . yet the words just seemed to flow from her typewriter. She put them aside and it was not until several days later that she persuaded Milton Shaw to write a melody for them.

Like many another song, Fall In was not accepted at first. Nearly everyone who read the lyric declared that it was too partisan. At that time the country and particularly the major networks were leaning over backwards in an effort to be neutral. The policy of all-out aid to Britain had not yet been endorsed by the public in the second re-election of Franklin D. Roosevelt and by Congress with the lease-lend bill.

Even though she was unable to interest a publisher, Welcome Lewis, convinced of the value of the song’s appeal, re-wrote the lyric in milder tone . . . had it okayed by music clearance and began to plug it as an unpublished number on her own audience participation show, the Welcome Lewis Singing Bee on the Columbia Broadcasting System.

The first performance of the song proved that she was right. She was deluged with letters and appeals for copies from patriotic societies as well as individuals throughout the country. For months the requests poured in, and finally in recent weeks when the appeal for Unity in the country reached national proportions and opened discussion on the floor of Congress, BMI became interested and decided to publish the song.

A stirring march, Fall In is easily singable as well as playable and will undoubtedly provide the strains for many a rookie’s daily dozen on the parade grounds.

The girl who wrote it is a Californian, a petite brunette, and a member of a large family noted for musical accomplishments.

A graduate of Venice High School and the daughter of the former Mayor of Venice, California, she studied violin under her brother, the first violinist of the Los Angeles Symphony Orchestra, but became famous as a singer on the radio despite the fact that she never had a singing lesson in her life.

Her grandfather was Frank Emil Englander, former concert master of the San Francisco Symphony Orchestra and one of the most famous musicians on the West Coast.

**I AM AN AMERICAN**

ASCAP has advised the NAB that any station has permission to broadcast the composition “I AM AN AMERICAN” on I AM AN AMERICAN DAY.

**DAYLIGHT SAVING TIME**

Replying to Neville Miller’s letter directing attention to the desirability of national daylight saving time, Mr. William S. Knudsen, Director General of the Office of Production Management, states that the matter is now
under discussion in the various sections of the Office of Production Management.

Last week at a press conference the President is reported to have said that national daylight saving time is a matter for Congress to decide. It is generally felt in Washington that when, and if the OPM indicates its approval, a national daylight saving bill will promptly be passed by Congress.

We print below the exchange of correspondence:

“April 8, 1941.
Honorable William S. Knudsen,
National Defense Commission,
Washington, D. C.

My dear Mr. Knudsen:

There have been introduced in Congress two bills to provide for daylight saving time on a nation-wide basis—one H. R. 3789 by Representative McLean (R.-N. J.) and the other H. R. 4206 by Representative Keogh (D.-N. Y.) Our Board of Directors has voted unanimously to support national daylight saving time for the reason that it will solve the broadcasting industry's semi-annual programming problems arising out of the fact that some states operate on daylight saving time and others do not. The Association of American Railroads through its Board of Directors has also, I am informed, voted to support national daylight saving time.

I do not know what consideration, if any, the Defense Committee has given to the question of the desirability of national daylight saving time as a defense measure. Our Association, and others, deem it of transcendent importance. If you concur in our view, we urge that you make a public statement to that effect.

Very truly yours,

NM/ndl Neville Miller.”

May 1, 1941.

Mr. Neville Miller,
National Association of Broadcasters,
Normandy Building,
1626 K Street, N. W.,
Washington, D. C.

Dear Mr. Miller:

This will acknowledge your letter of April 8 with reference to H. R. 3789 and H. R. 4206, bills to provide for daylight saving time on a nationwide basis.

I appreciate your thoughtfulness in bringing this matter to my attention, and it is now under discussion in the various sections of the Office of Production Management.

Yours very truly,

William S. Knudsen.”

The NAB Research Department mailed today to the NAB Board of Directors the report of the survey of broadcast stations and its study of the daylight saving time problem.

The report clearly indicates that 72% of the reporting stations favor universal daylight saving as the means to end the twice yearly programming problems which arise due to partial observance of daylight saving time.

COPYRIGHT AND LIBEL INSURANCE

The NAB Insurance Committee met in New York May 1 to review forms of insurance policies recently submitted by several insurance companies to cover broadcasters against libel, slander and copyright infringement suits. The committee passed a resolution that the Insurance Committee itself should draft a form of such an insurance policy for submission to underwriters so that they may consider writing the type of coverage recommended by the Insurance Committee, and thereby make this type of insurance—which the committee feels is sorely needed, available to all broadcasting stations. The committee instructed Charles A. Wall, NBC, a member of the committee, to begin preparation of a form of policy which will meet the needs of the broadcasters, and to negotiate with those insurance companies which are interested in writing this type of insurance.

SELECTIVE SERVICE

Responsive to numerous inquiries concerning deferment of radio technicians under the selective Service Act and Regulations, NAB today mailed questionnaires to the entire broadcasting industry to elicit the facts for submission to National Selective Service Headquarters for appropriate action. Blanket deferment is illegal under the Act, but there is the possibility that if the survey shows broadcasting to be unduly harmed by induction of technicians, the National Selective Service Headquarters may decide to instruct the 48 State Occupational Advisors to investigate all radio technicians before induction. In that event, stations should advise their State Selective Service Headquarters of the names of their technicians subject to draft, and request deferment for six months. Results of the survey, and further developments, will be released when known.

FEDERAL LEGISLATION

HOUSE

H. R. 4619 (Sacks, D-Penna.) COMMUNICATIONS ACT—To amend the Communications Act of 1934 so as to prohibit and penalize the unauthorized recording or mechanical reproduction of music and other program material transmitted by wire or radio. Referred to Committee on Interstate and Foreign Commerce.

STATE LEGISLATION

FLORIDA:

H. 666 (Overstreet) BROADCASTING STATIONS—Amend Sec. 1, Chapt. 19616, Acts of 1939, relating to civil liabilities of lessee operators of broadcasting stations and their agents and employees. Referred to Committee on Judiciary "A".

ILLINOIS:

S. 455 (Flagg) LIBEL & SLANDER—Provides no action for libel or slander shall be started against any person, firm or corporation which publishes actionable matter through an honest mistake as to the truth thereof, upon being appraised of the truth, such person, firm or corporation publishes a prominently displayed retraction of original erroneous matter. Referred to Committee on Judiciary.

S. 456 (Flagg) LIBEL—Provides no prosecution for libel where person publishes prominently displayed retraction of same. Referred to Committee on Judiciary.

MICHIGAN:

S. 382 (Baldwin) FOOD, DRUG, COSMETIC ACT—A bill to safeguard the purchasing public from injury by merchandising deceit, flowing from interstate commerce in food, drugs, devices, and cosmetics. Referred to Committee on Public Health.

S. 431 (Blondy) GROUP LIBEL—A bill to prohibit group libel, and to provide a penalty therefor. Referred to Committee on Judiciary.

May 9, 1941 — 427
TELEVISION GETS GREEN LIGHT

Following is the FCC report, giving commercial television a green light for July 1:

REPORT ON MARCH 20, 1941, TELEVISION HEARING

Docket No. 5806

By the Commission (Fly, Chairman, and Commissioners Walker, Payne, Thompson and Wakefield concurring; Commissioners Case and Craven not participating):

On March 20, 1941, a hearing was held for considering when television broadcasting "shall be placed upon a commercial basis" and for considering rules and regulations and standards for such stations.

Upon the hearings held in January and in April of 1940, the Commission found the industry divided upon the basic question whether television was ready for commercial broadcasting, and also found the industry divided as to transmission standards for television broadcast stations. Some believed that television had not reached the point where it could offer sufficient entertainment value to justify commercial operation and that standardization would result in the freezing of the science at the then level of efficiency. Others were determined to proceed at all costs with the launching of television on a large scale.

In its report of May 28, 1940, on the April hearing, the Commission declared:

"As soon as the engineering opinion of the industry is prepared to approve any one of the competing systems of (television) broadcasting as the standard system the Commission will consider the authorization of full commercialization. That a single uniform system of television broadcasting is essential—so far as the basic standards are concerned—must also be amply clear. The public should not be inflected with a hodge podge of different television broadcasting and receiving sets."

Because the situation was one which threatened to hold up coordinated television development indefinitely and to delay public service on a widespread basis, the Commission offered its cooperation to the industry along lines in furtherance of the achievement of higher standards by research and development.

First, it provided for new experimental television stations in various sections of the country to engage in practical demonstration of prevailing competing systems. Later, it collaborated with the Radio Manufacturers Association (RMA) in creating the National Television System Committee (NTSC). The RMA felt that "Because of the inadequacy of the various suggested standards for television" all existing systems should be explored and developed, and new standards formulated. The NTSC was given this task.

The Commission now finds the industry entirely in agreement that television broadcasting is ready for standardization. The standards as finally proposed by the NTSC at the March 20, 1941, hearing, represent, with but few exceptions, the unsplit opinion of the industry. Some difference of opinion exists among broadcasters as to the date when commercial operation should begin. The National Broadcasting Company and the Columbia Broadcasting System, in effect, urged some delay in beginning commercial television. However, the Commission is of the opinion that the reasons advanced for the delay are not controlling. Other leading figures in the industry that earlier opposed commercialization, such as Philco, Zenith, and De Forest, now express the view that the present stage of scientific development warrants prompt standardization and commercialization.

The demonstrations conducted by different broadcasters and manufacturers for the benefit of the NTSC and the Commission revealed the merits and demerits of the systems upon which standards could be based. The eleven volumes constituting the proceedings of the Committee and its subcommittees stand as evidence of the great volume of work done. The Commission acknowledges its appreciation to the RMA and NTSC for their cooperation in performing this worthwhile work.

The three-color television system demonstrated by the Columbia Broadcasting System during the past few months has lifted television broadcasting into a new realm in entertainment possibilities. Color television has been known for years but additional research and development was necessary to bring it out of the laboratory for field tests. The three-color system demonstrated insures a place for some scheme of color transmissions in the development of television broadcasting.

The NTSC proposals provide that color television be given a six-month field test before standardization and commercialization. The Commission finds this requirement necessary. However, immediate experimental color program transmissions are encouraged.

The standards proposed by the NTSC provide for most of the improvements held out as readily possible a year ago for monochrome transmissions (black and white pictures). These standards fix the line and frame frequencies at 525 and 30, respectively. The 525 lines provide for greater detail in the pictures transmitted than the 441 lines advocated a year ago. They give substantially equal resolution and more fully exploit the possibilities of the frequency bands allocated for television. Different line and frame frequencies will likely be required for color transmissions. This, however, is a matter for future consideration after color transmissions have been adequately field tested.

A year ago one of the weakest phases of the proposed television standards was an unreliable synchronizing pulse which frequently caused the loss of the picture under interference conditions. A few weeks before the March 20, 1941, hearing, developments were brought forth for greatly intensifying the synchronizing signals transmitted. These developments have been incorporated in the new standards. The demonstrations witnessed by the Commission impressively showed the tenacity with which this new form of synchronizing signals hold the picture in place under extremely adverse interference conditions.

The proposed standards require frequency modulation for sound accompanying the pictures. Television is therefore benefited by the recent development of frequency modulation.

The standards proposed by the NTSC reasonably satisfy the requirement for advancing television to a high level of efficiency within presently known developments. These standards are adopted by the Commission and made effective immediately.

The Commission feels that this state of the science affords some reasonable assurance against early obsolescence of equipment. At the same time, it must explicitly recognize the advancing and necessarily fluid state of the science. Accordingly, procedure has been provided for the consideration of new developments, including, but by no means limited to color television.

Procedure is also provided for expediting completion of the television stations now authorized by the Commission. Existing

1 Certain experimental systems require variable line and frame frequencies. However, the fixed values proposed appear to be best for monochrome transmissions, because only 30-frame pictures have been fully developed and as long as the frequency band for television channels (audio and visual) is limited to 6 megacycles not more than 525 lines can be employed to advantage with 30 frames.
licenses and permittees who can satisfy the Commission that their station construction will meet all the engineering requirements of the rules and regulations and standards for such stations may begin commercial operation on July 1, 1941.

The Commission finds that at least six months will be required for obtaining comparative test data on the alternative methods permitted for transmitting synchronizing signals. Such data are necessary for further limiting the signal synchronizing standards. The Commission is requesting the industry to provide the necessary test data as to both color transmissions and synchronizing signals within the six-month period following the beginning of commercial operation.

The regulations require that at least 15 hours program service per week shall be rendered by each station.

The Commission adheres to the policy set forth in its report on the April, 1940, television hearing regarding multiple ownership or control of television broadcast stations. Under this policy no person is permitted to own or control more than three television broadcast stations.

This is to preserve the public benefits of competition in the use of the limited number of channels available for television broadcasting.

The Order and appropriate regulations carrying out the principles of this report were adopted by a unanimous vote of the Commission en banc in its meeting of April 30, 1941. Copies of those documents are attached to this report.

FEDERAL COMMUNICATIONS
COMMISSION DOCKET

Following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, May 12. It is subject to change.

Friday, May 16

KMA—May Broadcasting Company, Shenandoah, Iowa.—Renewal of license, 930 kc., 1 KW night, 5 KW day, unlimited time.

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

May 26

KFNF—KFNF, Incorporated, Shenandoah, Iowa.—Renewal of license, 800 kc., 500 watts night, 1 KW day, SH-KUSD.

Consolidated Hearing

WCAM—City of Camden, Camden, N. J.—Renewal of license, 1280 kc., 500 watts night, 500 watts LS, shares WTNJ and WCAP.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Renewal of license, 1280 kc., 500 watts night, 500 watts LS, shares WTNJ and WCAM.

WTNJ—WOAX, Incorporated, Trenton, N. J.—Renewal of license, 1280 kc., 500 watts night, 500 watts LS, shares WCAM and WCAP.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—C. P., 1260 kc., 1 KW night, 5 KW day, DA-night, unlimited.

APPLICATIONS GRANTED

WWNC—Asheville Citizens Times Co., Inc., Asheville, N. C.—Granted construction permit, subject to action on renewal proceedings, to move transmitter to Emma and Maple Crest Roads, near Emma, N. C., approximately 3 miles due west of center of Asheville; install new transmitter, increase power from 1 to 5 KW day and night, and 570 kc., employing directional antenna both day and night, subject to approval by Chief Engineer (B3-P-2644).

WSYR—Central New York Broadcasting Corp., Syracuse, N. Y.—Granted construction permit to install new transmitting equipment, makes changes in directional antenna for both day and night use, and increase power from 1 to 3 KW unlimited time on 570 kc., on condition that proof of performance and installation of a recording meter at a monitoring point on the tower, WMCA, New York, be submitted (B1-P-2706).

WMCA—Knickerbocker Broadcasting Co., Inc., New York City.—Granted modification of license to increase nighttime power from 1 to 5 KW, 570 kc., 5 KW day, unlimited time, using directional antenna day and night (B1-MI-1064).

WKBW—WKBW, Youngstown, Ohio.—Granted construction permit to increase power from 500 watts night, 1 KW day to 5 KW, increase hours of operation from specified hours (sharing WOSU), to unlimited time, install new transmitter and directional antenna for night use; 570 kc. (B2-P-2547).

WKBW—WKBW, Youngstown, Ohio.—Granted modification of license to increase nighttime power from 1 to 5 KW, 570 kc., 5 KW day, unlimited time, using directional antenna day and night (B1-MI-1059).

WOSU—The Ohio State University, Columbus, Ohio.—Granted construction permit to install new transmitter, change frequency from 570 to 820 kc., increase power from 1 to 5 KW, and hours of operation from specified hours (sharing WKBW) to limited to local sunset at Dallas, Texas (B2-P-1958).

WCBD—WCBD, Inc., Chicago, Ill.—Granted construction permit to make changes in equipment, change frequency from 1110 to 820 kc., increase power from 5 to 10 KW, and change hours of operation from L-WBT, sharing WMBA, to daytime only (B4-P-2974).

WMAM—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted construction permit to increase night power from 1 to 5 KW, increase hours of operation from unlimited to unlimited time; move transmitter to Forsyth Road, approximately 6 miles west-north-west of the center of Macon, install directional antenna for day and night use; 930 kc., 5 KW day (B3-P-3043).

KGEZ—Donald Trebor, Kalispell, Mont.—Granted modification of construction permit for approval of directional antenna system for night use (B5-MP-1173).

WJBC—Arthur Malcolm McGregor and Dorothy Charlotte McGregor, a Partnership (Assignor), Arthur Malcolm McGregor and Dorothy Charlotte McGregor, and Hugh L. Gatley (Assignee), Bloomingtown, Ill.—Granted application for assignment of license of station WJBC from Arthur Malcolm McGregor and Dorothy Charlotte McGregor, a Partnership, to Edward Malcolm McGreg...
APPLICATION DENIED

W1XG—General Television Corp., Boston, Mass.—Denied petition for 30 day extension of temporary authority to operate visual and aural television transmitters (Dockets 5989 and 5989).

DESIGNATED FOR HEARING

Fairfield Broadcasting Corp., Lancaster, Ohio.—Designated for hearing application for construction permit for new station to operate on 820 kc., 250 watts, daytime only. Exact site of transmitter and studio to be determined with Commission's approval (B2-P-2976).

KEV—Evergreen Broadcasting Corp., Seattle, Wash.—Designated for hearing application for construction permit to change frequency from 1100 kc. to 1000 kc., increase power from 100 watts to 250 watts day and night, increase hours of operation from sharing with KRKO to unlimited, move transmitter and studio to 81912 Third Avenue, Seattle, and install new equipment (B5-P-2023).

Nashville Radio Corp., Nashville, Tenn.—Designated for hearing application for new station to operate on 1110 kc., 1 KW night and day, using directional antenna, different patterns day and night (B5-P-3034).

A. M. Burton, Nashville, Tenn.—Designated for hearing application for new station to operate on 1110 kc., 1 KW night and day, with directional antenna with different adjustments day and night, unlimited time. Exact studio site to be determined. Joint hearing to be held on both Nashville applications (B5-P-3072).

WPRP—Julio M. Conesa, Ponce, P. R.—Designated for hearing application for renewal of license for station WPRP and application for construction permit to increase power and change frequency, for modification of construction permit for approval of antenna site, station now operates on 1120 kc., 250 watts, unlimited (B-R-882, B-P-2377 and B-MP-1024).

MISCELLANEOUS

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Granted special temporary authority to operate from 8:30 to 11:30 a.m., CST in order to broadcast open baseball game of the Western Association on May 2, 1941, in order to broadcast said program only, using 500 watts only (B4-S-635).

KWLC—Luther College, Decorah, Iowa.—Granted special temporary authority to operate from 10:45 to 11:30 a.m., CST, May 1, 1941, in order to broadcast Convocation and chapel exercises in connection with the annual Senior Day; from 3:30 to 4:30 p.m. and 5:30 to 6:30 p.m., May 1, 1941, in order to broadcast baseball game with the University of Iowa; from 3:30 to 4:30 p.m. and 5:30 to 6:30 p.m., CST, May 6, 1941, to broadcast a baseball game with Simpson College; from 3:30 to 4:30 p.m., May 10, 1941, to broadcast a baseball game with Iowa State Teachers College; from 3:30 to 4:30 p.m. and 5:30 to 6:30 p.m., CST, May 15, 1941, to broadcast a baseball game with Northwestern University; from 3:30 to 4:30 p.m. and 5:30 to 6:30 p.m., CST, May 22, 1941, to broadcast baseball game with the University of California.

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Granted special temporary authority to operate from 8 p.m. to 12 midnight, CST, April 30, 1941, in order to broadcast the President's address and rebroadcast same in a number of foreign languages only.

WMRO—Martin R. O'Brien, North Aurora, Ill.—Granted special temporary authority to operate until 8 p.m., CST, on May 1, 1941, in order to complete a program of the Protestant Religious Educational Society at Elgin, Ill., only (B4-S-995).

KGO—Mason City Globe Gazette Co., Mason City, Iowa.—Granted modification of construction permit (B4-P-2329), which authorized installation of new transmitter and DA for night use, increase in power, change of frequency, and move of transmitter, for change in directional antenna at 1300 kc., under NARBA, and extension of commencement date to 30 days after grant and completion date to 60 days thereafter (B4-MP-1285).

WFBN—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—Granted special temporary authority to rebroadcast transmission on April 30, at 4 p.m., of aircraft radio station...
aboard U. S. Army plane in order to aid recruiting drive of the U. S. Army.

WNYE—Board of Education, City of New York.—Granted temporary authority to continue to operate noncommercial Educational Broadcast station on 11000 kc., for the period May 1 to May 30, pending completion of construction under application (B1-PED-16).

W2XOY—General Electric Co., New Scotland, N. Y.—Granted expansion of special temporary authority to operate a high frequency experimental broadcast station on 13200 kc., 2500 watts, special emission for FM, for the period May 1 to May 30, 1941.

W2XQR—John V. L. Hogan, Long Island City, N. Y.—Granted special temporary authority to operate a high frequency experimental broadcast station on 18700 kc., with 100 watts power, special emission for FM, for the period May 1 to July 1, 1941. (No authority is granted to conduct a facsimile broadcast service.)

WTBO—Associated Broadcasters, Corp., Cumberland, Md.—Granted special temporary authority to operate (from 9:15 p. m., EST, to conclusion of President Roosevelt's address on April 30, 1941, in order to broadcast said address only.

WMBS—Fayette Broadcasting Corp., Uniontown, Pa.—Granted license to use old RCA 250-D transmitter as auxiliary transmitter, for emergency use only (B2-L-1377).

WMVA—Martinsville Broadcasting Co., Martinsville, Va.—Granted license to cover construction permit (B2-P-2226) for new station; 1150 kc., 100 watts night, 250 watts LS, unlimited time (B2-L-1384). Also granted authority to determine operating power by direct measurement of antenna input (B2-Z-814).

KFOR—Cornbelt Broadcasting Corp., Lincoln, Neb.—Granted license to cover construction permit (B4-P-3087), which reinstates B4-P-2357, for changes in transmitting equipment, antenna, increase in power, and move of transmitter), on 1210 kc. under NARBA (B4-L-1375). Also granted authority to determine operating power by direct measurement of antenna input, on 1210 kc. under NARBA (B4-Z-790).

WMBS—Fayette Broadcasting Corp., Uniontown, Pa.—Granted license to cover construction permit (B2-P-7311, for new transmitter, installation of DA for night use; increase in power and change in frequency) (B2-L-1376). Also granted authority to determine operating power by direct measurement of antenna input (B2-Z-794).

KPOW—Albert Joseph Meyer, Powell, Wyo.—Granted license to cover construction permit (B5-P-2593, for new station to operate on 1230 kc., 250 watts, unlimited time), (B5-L-1378). Also granted authority to determine operating power by direct measurement of antenna input (B5-Z-795).

WIBG—Seaboard Radio Broadcasters, Inc., Glenside, Pa.—Granted special temporary authority to operate from local sunrise Glenside, to local sunset at Knoxville, Tenn. (Station WNOX) instead of daytime as stipulated in reallocation, for period beginning April 29 and ending no later than May 31, pending formal application for such authority (B2-S-339).

WSOY—Commodore Broadcasting, Inc., Decatur, Ill.— Granted petition for extension of time to May 15 in which to file amendment to application for construction permit to change frequency and increase power.

KYUM—Yuma Broadcasting Co., Yuma, Ariz.—Granted authority to determine operating power by direct measurement of antenna power on 1210 kc. under NARBA (B5-Z-799).

WAOY—Vincennes Newspapers, Inc., Vincennes, Ind.—Granted authority to determine operating power by direct measurement of antenna power on 1150 kc. under NARBA (B4-Z-805).

KDB—Santa Barbara Broadcasters, Ltd., Santa Barbara, Cal.—Granted authority to determine operating power by direct measurement of antenna power on 1500 kc. under NARBA (B5-Z-799).

WTRC—The Truth Publishing Co., Inc., Elkhart, Ind.—Granted authority to determine operating power by direct measurement of antenna power on 1310 kc. under NARBA (B4-Z-800).

WMBD—Peoria Broadcasting Co., Peoria, Ill.—Granted authority to determine operating power by direct measurement of antenna power on 1150 kc. under NARBA (B4-Z-803).

KFDA—Amarillo Broadcasting Corp., Amarillo, Tex.—Granted authority to determine operating power by direct measurement of antenna power on 1230 kc. under NARBA (B3-Z-751).

WBT—Columbia Broadcasting System, Inc., Charlotte, N. C.—Granted authority to determine operating power by direct measurement of antenna power on 1110 kc. under NARBA (B3-Z-713).

KFBB—Buttery Broadcast, Inc., Great Falls, Mont.—Granted modification of construction permit (B3-P-2920, which authorized increase in power and installation of DA for night use), for changes in directional antenna on 1310 kc. under NARBA (B5-MP-1252).

WGCA—Gainesville Broadcasters, Gainesville, Ga.—Granted modification of construction permit (B3-P-2627, which authorized a new station) for approval of antenna, of transmitter and studio sites at Athens Road, Gainesville, and request frequency 1210 kc. under NARBA (B3-MP-1040).

WWJ—The Evening News Assn., Detroit, Mich.—Granted modification of construction permit (B2-P-2880, which authorized changes in transmitting equipment, increase in power and installation of DA for night use), for changes in directional antenna on 950 kc. under NARA, and extension of completion date to 120 days after grant (B2-MP-1768).

KMA—May Broadcasting Co., Shenandoah, Iowa.—Granted authority to determine operating power by direct measurement of antenna power on 960 kc. under NARBA (conditionally), (B4-Z-808).

KHAS—The Nebraska Broadcasting Co., Hastings, Neb.—Granted authority to determine operating power by direct measurement of antenna power on 1320 kc. under NARBA (B4-Z-735).

KJUP—San Juan Broadcasting Co., Durango, Colo.—Granted authority to determine operating power by direct measurement of antenna power on 1310 kc. under NARBA (B2-Z-789).

WLAV—Leonard A. Versluis, Grand Rapids, Mich.—Granted authority to determine operating power by direct measurement of antenna power on 1100 kc. under NARBA (B4-Z-812).

WHK—United Broadcasting Co., Cleveland, Ohio.—Granted authority to determine operating power by direct measurement of antenna power on 1320 kc. under NARBA (B2-Z-794).

WLAP—American Broadcasting Co. of Ky., Lexington, Ky.—Granted authority to determine operating power by direct measurement of antenna power on 1150 kc. under NARBA (B2-Z-834).

WBAB—Press-Union Publishing Co., Atlantic City, N. J.—Granted authority to determine operating power by direct measurement of antenna power on 1500 kc. under NARBA (B4-Z-797).

WL—Missouri Broadcasting Co., St. Louis, Mo.—Granted authority to determine operating power by direct measurement of antenna power on 1230 kc. under NARBA (B4-Z-841).

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted authority to determine operating power by direct measurement of antenna power on 1070 kc. under NARBA (B4-Z-840).

WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Granted authority to determine operating power by direct measurement of antenna power on 1150 kc. under NARBA (B1-Z-745).

KOHJ—Black Hills Broadcast Co. of Rapid City, Rapid City, S. Dak.—Granted authority to determine operating power by direct measurement of antenna power on 1100 kc. under NARBA (B4-Z-797).

KVOA—Arizona Broadcasting Co., Inc., Tucson, Ariz.—Granted authority to determine operating power by direct measurement of antenna power on 1200 kc. under NARBA (B5-Z-798).

KPAB—Marvel M. Valentine, Laredo, Texas.—Granted authority to determine operating power by direct measurement of antenna power on 1400 kc. under NARBA (B4-Z-840).

WDZ—WDZ Broadcasting Co., Tuscola, Ill.—Granted authority to determine operating power by direct measurement of antenna power on 1350 kc. under NARBA (B4-Z-839).

WKBB—WKBH, Inc., LaCrosse, Wis.—Granted authority to determine operating power by direct measurement of antenna input on 1110 kc. under NARBA (B4-Z-751).

WLAP—American Broadcasting Co. of Ky., Lexington, Ky.—Granted license to cover construction permit (B2-P-2900), which authorized move of transmitter and installation of antenna power input, on 1150 kc. under NARBA, on May 9, 1941.
new antenna, specifying 1500 kc, under NARBA (B2-L-1380).

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted modification of construction permit (B5-P-63, for new transmitter and increase in power from 10 to 50 KW), for extension of completion date to July 6, 1941 (B5-P-1273).

WEBF—Head of the Lakes Broadcasting Co., Duluth, Minn.—Granted modification of construction permit (B4-P-2281, which authorized increase in power and installation of directional antenna (for night use) for changes in directional antenna on 1320 kc, under NARBA (B4-MP-1254).

KBWD—Brown County Broadcasting Co., Brownwood, Tex.—Granted modification of construction permit (B3-MP-2672 for new station), requesting approval of antenna, new transmitter studio and transmitter sites, and 1350 kc, under NARBA (B3-MP-1212).

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Granted modification of construction permit (B2-P-2394, for increase in power to 5 KW, installation of directional antenna (for night use) for changes in antenna system, and requesting 1320 kc, under NARBA; extension of commencement date to 30 days after grant and completion date to 180 days thereafter (B2-MP-1269).

WALA—Alabama Broadcasting Co., Mobile, Ala.—Granted modification of construction permit (B3-MP-932, which authorized increase in power, installation of new equipment, and DA for night use, and move of transmitter) for change in type of transmitter, and changes in directional antenna on 1340 kc, under NARBA (B3-MP-1270).

WKMO—Kokomo Broadcasting Corp., Kokomo, Ind.—Granted license to cover construction permit (B4-P-2284, as modified, which authorized new station on 1100 kc, under NARBA, 250 watts, unlimited time (B4-L-1386). Also granted authority to determine operating power by direct measurement of antenna power on 1100 kc, under NARBA (B4-Z-820).

W2XMN—Edwin H. Armstrong, Alpine, N. J.—Granted special temporary authority to operate an additional transmitter located at Alpine, N. J., on 43 mc, with power not to exceed 40 KW, using frequency modulation for a period of 10 days beginning May 9, 1941, and to operate for 15 days after commencement of the experiments on adjacent channel operation of high frequency broadcast stations and to demonstrate such operation to certain engineering committees of the RCA.

W2XBS—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate television broadcast station with special emission in addition to A3 emission on Channel No. 1, in order to conduct experimental tests for National Television Standards Committee and NBC, for period May 1 to May 25, 1941.

KGXN—Kansans Radio Broadcasting Co., Inc., Kearney, Neb.—Granted license to cover construction permit (B3-P-2969 for increase in power, 1 KW night, 2½ KW LS, to 5 KW LS, 1 KW night, and installation of new transmitter (B3-L-1387).

WAGE—Sentinel Broadcasting Corp., Syracuse, N. Y.—Granted license to cover construction permit (B1-P-1951, for new station to operate on 620 kc., 1 KW, unlimited time, DA night (B1-L-1389). Also granted authority to determine operating power by direct measurement of antenna input (B1-Z-843).

WFBL—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—Granted authority to install automatic frequency control equipment (B1-F-217).

WCLE—United Broadcasting Co., Cleveland, Ohio.—Granted authority to install automatic frequency control equipment (B2-F-218).

KGVO—Mobley’s, Inc., Missoula, Mont.—Granted authority to install automatic frequency control equipment (B5-F-220).

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—Granted authority to install automatic frequency control equipment (B4-F-219).

W69PH—WCAU Broadcasting Co., Philadelphia, Pa.—Granted modification of construction permit (B2-PH-43, which authorized a new FM station) for approval of transmitter, changes in antenna, and change in frequency from 167 So. 17th St., to 1616 Walnut St., Philadelphia (B2-MP-14).

The Metropolis Company, Ocala, Fla.—Referred to the full Commission the motion for immediate specification of issues fixing date and place of hearing and for other relief, in re application for license for new station.

Bay County Publishers, Inc., Panama City, Fla.—Referred to the full Commission the motion for immediate specification of issues fixing date and place of hearing and for other relief, in re application for license for new station.

WPAY—Chester A. Thompson (Transferor) and The Brush Moore Newspapers, Inc. (Transferee), Portsmouth, Ohio; WPAY—Vee Bee Corp., Portsmouth, Ohio.—Granted petition to hold hearing on applications for consent to transfer control of Vee Bee Corp., licensee of station WPAY together with application for rule change, in re application for license to operate from sign-off to 11 and 2 days after grant respectively (B1-MP-1297).

WJFJ—WJFJ Broadcasters, Inc., Klamath Falls, Ore.—Granted motion to dismiss without prejudice application to change frequency from 1210 to 600 kc.; increase power from 100 watts to 1500 watts for a period not to exceed 60 days, pending completion of construction pursuant to construction permit.

WRDO—WRDO, Inc., Augusta, Me.—Granted petition for leave to amend application for renewal of license.

W1XMC—McNary & Chambers, Washington, D. C.—Granted extension of special temporary authority to continue operation of high frequency experimental broadcast station on 4260 kc., 100 watts, special emission for frequency modulation, with transmitter located at 2701-14th St., N. W., Washington, D. C., for the period May 2 to not later than July 1, 1941.

WAB—Inc., Hartford, Conn.—Granted special temporary authority to operate frequency modulation station commercially on 16300 kc., 1000 watts, special emission for frequency modulation, with transmitter at Meriden, Conn., and described as Composite, Type FM1, Maximum rated carrier power 1500 watts, for a period not to exceed 60 days, pending completion of construction pursuant to construction permit.

W6HJ—W6HJ, Inc., Hartford, Conn.—Granted special temporary authority to rebroadcast high frequency broadcast stations W2XMN and WXIOJ for a period not to exceed 60 days.

WSAZ—WSAZ, Inc., Huntington, W. Va.—Granted special temporary authority to operate the relay mobile unit (WADA) of the Charleston Broadcasting Co. for a series of special programs consisting of interviews with housewives of Huntington, W. Va., to be broadcast on the studio and being transferred to the various homes where the interviews take place, during the period May 2, 9, 16, 23, 30, 1941, only.

WFRA—the Tribune Co., Tampa, Fla.—Granted license to cover construction permit which authorized a new broadcast station to operate on 930 kc., 1 KW, unlimited time, on directional antenna night (B3-L-1327). Also granted authority to determine operating power by direct measurement of antenna input (B3-Z-565).

WBEN—WBEN, Inc., Buffalo, N. Y.—Granted modification of construction permit to change in power from 1200 to 930 kc., and changes in directional antenna.

W0XKR—Balaban & Katz Corp., Chicago, Ill.—Granted extension of special temporary authority to operate two transmitter units to be installed and operated from the State-Lake Building, Chicago, Ill.; Link Transmitter Type No. 50-UTX with 100 watts power for visual and Link Transmitter Type No. 25-UBX 25 watts power for aural; temporary steel tower to be used on roof of said building, in order to conduct tests for period for May 19 to not later than June 17, 1941, in accordance with construction permit.

WHJ—Pittsburgh Radio Supply House, Greensburgh, Pa.—Granted special temporary authority to operate from 7:30 p. m. to conclusion of program, approximately 10 p. m., EST, May 6, 1941, in order to cooperate with the Indiana County Music Supervisors Assn. in the Indiana County Music Festival, to be held in the High School, Greensburg, Pa.

WEA—Central Broadcasting Co., Eau Claire, Wise.—Granted special temporary authority to operate from sign-off (April 7 p. m., CST) to conclusion of President’s radio address and Secretary of Treasury Morgenthau and Postmaster Walker, only, approximately 9 p. m., CST, April 30, 1941.

KFNF—KFNF, Inc., Shenandoah, Iowa.—Continued hearing in re application for renewal of license now scheduled for May 19, 1941, until May 26, 1941.

WWDC—Capital Broadcasting Co., Washington, D. C.—Granted modification of construction permit (B1-P-2679, which authorized a new station on 1150 kc., 250 watts, unlimited time, and 100 watt amplifier, for changes in type of transmitter and extension of commencement and completion dates to 1 and 2 days after grant respectively (B1-MP-1297).
APPLICATIONS FILED AT FCC

930 Kilocycles
WASA—WASA, Inc., Huntington, W. Va.—Modification of construction permit (B2-P-2856) for approval of transmitter site and changes in directional antenna from day and night to night use only, and 930 kc., under NARBA.

970 Kilocycles
WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Modification of construction permit (B1-P-2704) as modified, for new transmitter, install directional antenna, change in hours of operation from daytime to unlimited, increase in power from 500 watts to 1 KW and move of transmitter for extension of completion date from 5-25-41 to 7-25-41.

980 Kilocycles
KMBC—Midland Broadcasting Co., Kansas City, Mo.—Construction permit to from 950 kc. to 600 kc., power from 5 to 50 KW, install new transmitter, new directional antenna for night use, move transmitter and move studio from Kansas City, Mo., to Kansas City, Kansas, requesting facilities KGFL, KWNAD and KFEQ as proposed by NARBA. Amended: To change location of transmitter from near Wolcott, Kans., to near Sibley, Mo., omit request for move of studio, change frequency from 650 kc. to 770 kc., make changes in directional antenna for day and night use and omit request for facilities of KFEQ, KGFL and WNAD.

990 Kilocycles
WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Authority to determine operating power by direct measurement.

1050 Kilocycles
WHN—Marcus Loew Booking Agency, New York, N. Y.—Modification of construction permit (B1-P-2899) for new transmitter, directional antenna for day and night use, change in frequency, increase in power and move of transmitter, for authority to install new transmitter and make changes in antenna.

1070 Kilocycles
KFBI—The Farmers and Bankers Broadcasting Corp., Wichita, Kans.—License to cover construction permit (B4-MP-896) as modified, for decrease in power, change in hours of operation and installation of directional antenna for night use.

1090 Kilocycles
KFBI—The Farmers and Bankers Broadcasting Corp., Wichita, Kans.—Modification of construction permit (B4-MP-896) as modified, for changes in directional antenna on 1070 kc., under NARBA.

1110 Kilocycles
WCBX—WCBX, Inc., Chicago, Ill.—Authority to determine operating power by the direct method.

1150 Kilocycles
KTBC—State Capitol Broadcasting Assn., Inc., Austin, Texas.—Authority to determine operating power by direct measurement.

1230 Kilocycles
WJNO—WJNO, Inc., West Palm Beach, Fla.—Authority to determine operating power by direct measurement.

1240 Kilocycles
WJLS—Joe L. Smith, Jr., Beckley, W. Va.—Construction permit to install new transmitter, install directional antenna for night use, change frequency from 1210 kc. to 900 kc., and power from 250 watts to 1 KW. Amended: To request change in frequency from 1230 kc. (under NARBA) to 610 kc., Class II, changes in directional antenna and equipment and requesting limited time to local sunset at Los Angeles, directional antenna from sunset Beckley to local sunset Los Angeles.

1250 Kilocycles
WDSU—WDSU, Inc., New Orleans, La.—Modification of construction permit (B3-P-2923) for extension of completion date from 6-1-41 to 9-1-41.

1260 Kilocycles
KVA—Heard Radio, Inc., San Francisco, Calif.—Authority to determine operating power by direct measurement for auxiliary transmitter.

1270 Kilocycles
KFJZ—Tarrant Broadcasting Co., Fort Worth, Tex.—Modification of construction permit (B3-P-2497) which authorized new transmitter and installation of directional antenna, increase in power and move of transmitter, for extension of completion date from 5-17-41 to 8-15-41.

1300 Kilocycles
KGLO—Mason City Globe Gazette Co., Mason City, Iowa.—Modification of construction permit (B4-P-2329) as modified.
fied, for installation of new transmitter and directional antenna for night use, increase in power, change of frequency and move of transmitter, requesting changes in directional antenna on 1300 kc under NARBA, and extension of commencement and completion dates from 1-4-41 to 7-4-41 to 30 days after grant and 60 days thereafter, respectively.

1320 Kilocycles

WNEL—Juan Piza, San Juan, Puerto Rico.—License to cover construction permit (B-P-2762) which authorized equipment changes, antenna changes, increase in power and move of transmitter, specifying 1320 kc under NARBA.

1340 Kilocycles

NEW—Jefferson Broadcasting Corp., Birmingham, Ala.—Construction permit for a new broadcast station to be operated on 1340 kc, 250 watts, unlimited time. (Facilities of station WSGN when vacated.)

KVOX—KVOX Broadcasting Co., Moorhead, Minn.—Authority to determine operating power by direct measurement.

WAML—New Laurel Radio Station, Inc., Laurel, Miss.—Authority to determine operating power by direct measurement.

KMYR—F. W. Meyer, Denver, Colo.—License to cover construction permit (BS-P-2067) as modified, for a new station.

KMYR—F. W. Meyer, Denver, Colo.—Authorization to determine operating power by direct measurement.

KRBA—Redlands Broadcasting Assn., Ben T. Wilson, Pres., Lufkin, Tex.—Authority to determine operating power by direct measurement.

1360 Kilocycles

KRIS—Gulf Coast Broadcasting Co., Corpus Christi, Tex.—License to cover construction permit (B5-P-2230) as modified, for new transmitter, increase in power, move transmitter and changes in antenna.

1390 Kilocycles

KGER—Consolidated Broadcasting Corp., Long Beach, Calif.—Construction permit to make changes in equipment, increase power from 1 KW to 5 KW, install directional antenna for night use. Amended to make changes in directional antenna.

1400 Kilocycles

KRLC—H. E. Studebaker, Lewiston, Idaho.—Authority to determine operating power by direct measurement.

WOD—Spartanburg Advertising Co., Spartanburg, S. C.—Authority to determine operating power by direct measurement.

WHBQ—Broadcasting Station WHBQ, Inc., Memphis, Tenn.—Authority to determine operating power by the direct method.

WHBQ—Broadcasting Station WHBQ, Inc., Memphis, Tenn.—License to cover construction permit (B3-P-3075) for new transmitter and increase in power.

KTUC—Tucson Broadcasting Co., Tucson, Ariz.—Transfer of control from John Merino (100 shares), Glenn Snyder (50 shares), Geo. R. Cook (50 shares), Burridge D. Butler (38 shares), Carleton W. Morris (30 shares), Louis F. Long (30 shares), Ralph W. Bilby (1 share) and Frank Z. Howe (1 share) to John Merino (50 shares), Glenn Snyder (50 shares), Geo. R. Cook (50 shares), Burridge D. Butler (69 shares), Louis F. Long (30 shares), Ralph W. Bilby (50 shares) and Frank Z. Howe (1 share).

1450 Kilocycles

KDNT—Harwell V. Shepard, Denton, Tex.—Authority to determine operating power by direct measurement.

1480 Kilocycles

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Construction permit to change frequency from 1450 to 290 kc, increase power from 500 watts night, 1 KW day to 1 KW night, 5 KW day, install new equipment and directional antenna for night use and move transmitter. Class III-B station.

Amended to change power to 5 KW day and night and make changes in directional antenna for night use.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Peoples Hardware Stores—A complaint has been issued charging Domenico Del Vecchio, trading as Peoples Hardware Stores, 1434 Florida Ave., N. E., Washington, D. C., with misleading representations in the sale of paint products.

The complaint alleges that the respondent has advertised that "Our factory-to-you plan brings savings of 20% to 35%", when in fact he does not own or control a plant in which the products he sells are made but orders them from the manufacturers and his prices do not represent a saving of 20 per cent to 35 per cent to purchasers as compared to prices charged by his competitors for similar products made of comparable materials.

The complaint also alleges the respondent advertised that "Lawrence Master Painters Flat Paint—covers 1100 square feet per gallon", when in fact such coverage cannot be obtained under normal conditions of use and can be obtained only when employed over a pigment sealer on a smooth surface. (4495)

Tag Manufacturers Institute—A complaint has been issued charging the Tag Manufacturers Institute, 370 Lexington Ave., New York, Frank H. Baxter, its secretary-treasurer and executive director, and 31 member companies, with practices in restraint of trade and in violation of the Federal Trade Commission Act in the sale of tags, pin tickets and similar marking and pricing devices. According to the complaint, the respondents are majority of the country's manufacturers of such tag products.

The complaint alleges that the respondents, acting directly, through their representatives, and in cooperation with each other and with the respondent institute and the respondent Baxter,
entered into an agreement, combination and conspiracy to restrict and eliminate price competition in the sale of tag products by fixing and maintaining uniform prices, terms and conditions of sale for their products; by holding meetings under the auspices of the institute to devise methods for such price maintenance, and by a "Tag Industry Agreement." According to the complaint, the "Tag Agreement" provides:

1. That each subscribing respondent member send to the respondent Baxter a complete statement of every "general offer" to sell tag products, including available prices, terms and sale conditions, and of every "restricted offer," including prices, terms and sale conditions more favorable to the purchaser than the "general offer" for similar products.

2. That each subscribing respondent member furnish the information described in (1) above to Baxter.

3. That each respondent subscribing member furnish the respondent Baxter with duplicates of every invoice or other shipping memorandum for products sold, and duplicates of all credit memoranda covering rebates.

4. That the respondent Baxter compile and disseminate to members such information in a manner not disclosing the identity of any one subscriber or the names of any purchasers.

5. That each subscribing respondent member submit to a "Determination Board" appointed by the respondent members all pertinent records in its possession and permit an examination of such information by the board to determine whether or not such subscribing member has complied with the Tag Industry Agreement rules concerning the furnishing of such information.

6. That the determination board announces its findings pursuant to such investigations; such findings to be accepted by the subscribing members any of whom are to be subject to fines, assessments and liquidated damages in case of breach of rules or regulations.

7. That each subscribing respondent member pay annually not less than $120 to the respondent Baxter as institute secretary for an "Operating Fund," and not less than $200 into a "Revolving Fund," to provide funds from which operating and investigating expenses and into which fines and assessments are to be paid.

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Ethel Bellamy, Inc., Nutley, N. J., has been ordered to cease and desist disseminating advertisements which represent that "Ethel Bellamy Eyelash Luxuriant" possesses therapeutic value in the treatment of granulated eyelids, promotes eyelash growth, supplies pigment to the eyelashes, darkens eyelashes permanently or has any effect on eyelash color in excess of such temporary effect as it may produce by reason of its properties as a dye. (4424)

Consumers Bureau of Standards—Albert Lane, an individual trading as Consumers Bureau of Standards, who has conducted his business at various locations in New York, Chicago, Philadelphia, and Long Island City, N. Y., has been ordered to cease and desist from misrepresentations and other unfair practices in the sale of publications advertised as being the result of research on behalf of the consumer. The respondent's publications were: "Consumers' Preference," "Consumers Bureau Reports" and "Consumers Bureau Guide."

Commission findings are that:

The respondent represented the Consumers Bureau of Standards as being "a national non-profit consumers' research and educational organization which investigates, tests and reports on goods and services for the benefit of the ultimate consumer," when in fact the respondent did not conduct a real research and testing bureau for consumers and maintained no staff or laboratory equipment.

The Commission order directs that Albert Lane, trading as Consumers Bureau of Standards, or Consumers Bureau, in connection with the sale of any book, magazine, periodical or circular letter purporting to give appraisals or classifications of merchandise, goods or services, cease and desist from representing in any manner, or using any trade or other name which implies, that such publication is compiled, issued, sold or offered for sale by or under the direction of any bureau, organization, or any research group or movement; in work for the benefit of consumers, or devoted to aiding consumers in making wise or economical purchases, which by reason of any scientific or adequate tests of any nature designates the comparative consumer value of any merchandise, goods, or services.

The respondent also is ordered to cease and desist from:

1. Representing that any such publication is or will be issued, printed, or distributed at any stated time or times other than those at which it is actually issued, printed, or distributed;
2. Representing that the respondent's business is operated on a non-profit basis;
3. Representing that the respondent is or represents, any consumers' research group or movement;
4. Representing that the respondent has any arrangement with the Mellon Institute of Industrial Research, Massachusetts Institute of Technology, or any similar organizations or institutions, for the submission thereto for determination of any questions concerning the value or comparative value of merchandise, goods, or services;
5. Representing that the respondent is, or represents, any consumers' special training, education, or experience to determine, or has any employees, staff, equipment, or facilities for determining, by any scientific method or adequate investigation or tests, the value or comparative value of any merchandise, goods, or services;
6. Threatening, inferring, or implying to any manufacturer or distributor of merchandise, goods, or services that a refusal to buy copies of or contribute financially to such publication or directly or indirectly to the respondent, will or may result in unfavorable, disparaging, or derogatory listing of, or reference to, such manufacturer or distributor or his merchandise, goods, or services in or in connection with such publication. (3718)

Gly-Case Medicine Company—Medora Whitney, trading as Gly-Cas Medicine Co., and the concern's manager, Robert B. Whitney, Muncie, Ind., distributors of the medicinal preparation "Gly-Cas," has been ordered to cease disseminating advertisements which represent that their product "Gly-Cas" is a cure, remedy or competent treatment for such conditions, or has therapeutic value in treating it in excess of temporary relief afforded by causing a partial evacuation of the intestinal tract; that indigestion, gas, bloated or sour stomach, rheumatic or neuritis pains, sore or aching muscles, limbs or joints, backaches, dizziness, nervousness, kidney trouble, sleeplessness, biliousness or headaches are typical or usual symptoms of constipation or faulty elimination; that their product "Gly-Cas" is a cure, remedy or competent treatment for such conditions, or has therapeutic value in treating it in excess of temporary relief afforded by causing a partial evacuation of the intestinal tract. (4432)

Hartig Drug Co., also trading as H. K. Pharmaceutical Laboratories, and A. J. Hartig, president of Hartig Drug Co. and trading as H. K. Pharmaceutical Laboratories, 756 Main St., Dubuque, Iowa, has been ordered to cease and desist from misrepresentation

May 9, 1941 — 435
in the sale of certain medicinal preparations for women. The Commission ordered that in the sale of "Menstrual Aid Nos. 1, 2, 3, 4 and 5" the respondents cease disseminating advertisements which represent that these products constitute a competent or effective treatment for delayed menstruation; that they are scientific, safe or harmless and are warranted, and which advertisements fail to reveal that their use may cause gastro-intestinal disturbances and other serious conditions. (3406)

Universal Industries, Inc., 2222 Diversey Parkway, Chicago, and Abraham Leonard Koolish and George William Ehrlich, officers and directors of the corporation, has been ordered to cease and desist from misrepresentations in the sale of sale stimulator plans or devices including trade cards, circulars, and other advertising material, and also tableware and other products used as premium merchandise under such plans.

Commission findings are that in advertisements circulated in various States the respondents have represented that for a cost of only one cent merchants participating in the respondents' sales plans would receive $5 worth of business from their customers when in fact the merchants purchase from the respondents at 50 cents a set tableware which they resell to customers at 49 cents a set when such customers have purchased $5 worth of other merchandise.

Also, the findings continue, the merchants pay the respondents $4.95 for the sales plan which includes cards, literature and two display sets of tableware, none of which amount the respondents refund until the merchants have purchased eight dozen tableware in fact the merchants purchase from the respondents at 50 cents of only one cent merchants participating in the respondents' sales plans would receive $5 worth of business from their customers when in fact the merchants purchase from the respondents at 50 cents a set tableware which they resell to customers at 49 cents a set when such customers have purchased $5 worth of other merchandise.

Commission findings are that in advertisements circulated in various States the respondents have represented that for a cost of only one cent merchants participating in the respondents' sales plans would receive $5 worth of business from their customers when in fact the merchants purchase from the respondents at 50 cents a set tableware which they resell to customers at 49 cents a set when such customers have purchased $5 worth of other merchandise.

The respondent also agrees to cease disseminating advertisements which fail conspicuously to reveal certain dangerous possibilities in the use under certain conditions of "Magic Shaving Powder" and "Kongoleene", and which advertisements represent that "Apex Pomento" and "Humaniia Dandruff Treatment" will prevent dandruff or do more than remove dandruff already formed on the scalp; that "Humaniia Dandruff Treatment" and "Amron New Hair Aid" will stop falling hair or keep it from coming out, and other similar representations. (3094)

Charles B. Knox Gelatin Co., Inc., Johnstown, N. Y., engaged in selling Knox Gelatin or Knox Sparkling Gelatin, has entered into a supplemental stipulation in connection with the dissemination of advertising of the products in which it agrees to cease and desist from representing, directly or by implication:

(1) That scientific laboratory tests have established as a matter of scientific fact that Knox Gelatin increases vim and vitality, increases endurance, builds resistance to fatigue, cuts down and lessens fatigue, increases stamina and "staying power", curbs tiredness, restores vigor or stores energy.

(2) That Knox Gelatin or Knox Sparkling Gelatin prevents fatigue; keeps one in top form for working hard and playing hard; enables a person to sleep better or awaken more refreshed; lessens the seriousness of athletic injuries or causes minor athletic injuries to respond quicker to treatment; increases muscular work capacity 50% to 100% or is of any substantial benefit in increasing muscular work capacity; doubles energy or increases energy output 37% to 240% or is of any substantial value in increasing energy output; is an amazing discovery or stores energy.

(3) That it is a manufacturer; but nothing in the stipulation shall prevent the Charles B. Knox Gelatin Co., Inc., from representing and stating that Knox Gelatin is manufactured under the laboratory supervision of the Charles B. Knox Gelatin Co., Inc.

The stipulation provides that in the event future facts and circumstances should, in the judgment of the Commission, so warrant, such suitable modification thereof may be made as may be necessary to conform to the facts. (02436)

Leonard Sales Company—Benjamin Ingber, trading as Leonard Sales Co., 237 North Ninth St., Philadelphia, has entered into a stipulation to cease advertising that a drug preparation designated "Corn-Go" will instantly stop the pain of corns or callouses; will prevent their recurrence, and will remove bunions or has any value in their treatment. (02786)
Chairman Wheeler (D-Mont.) of the Senate Interstate Commerce Committee has called a hearing, starting Saturday, May 31, on the resolution introduced by Senator White (R-Maine) regarding the FCC network rules.

The hearing is slated to continue through Wednesday, June 4. The NAB will appear in support of the resolution, the text of which follows:

S. RES. 113
77TH CONGRESS, 1ST SESSION
IN THE SENATE OF THE UNITED STATES
May 13 (legislative day, May 8), 1941

Mr. WHITE submitted the following resolution, which was referred to the Committee on Interstate Commerce

RESOLUTION

Whereas the Federal Communications Commission (hereinafter referred to as the Commission) is an administrative agency created by the Act of June 19, 1934 (48 Stat. 1064), known as the Communications Act of 1934, as amended, by Act of June 5, 1936 (49 Stat. 175), and by Act of May 20, 1937 (50 Stat. 189); and

Whereas said Commission has by the terms of said Act certain delegated powers and duties in respect of interstate commerce in communications and the facilities and instrumentalities used and usable in said commerce and has no powers and duties not so specifically conferred upon it; and

Whereas the Commission on May 2, 1941, in a proceeding before it styled "In the Matter of the Investigation of Chain Broadcasting," Docket Numbered 5060, made and published certain rules and regulations enacted and promulgated by it which said rules and regulations are alleged to constitute an attempt upon the part of the Commission to exercise a supervisory control of the programs, of the business management and of the policy to be employed by radio-broadcast stations which are licensed by said Commission pursuant to said Act; and

Whereas it is urged that the Supreme Court of the United States in the case of Federal Communications Commission v. Sanders Brothers Radio Station, decided March 25, 1940, interpreted and construed the Communications Act of 1934, as amended, as conferring no such power or authority upon the Commission as that which it is charged the Commission has attempted to exercise in its said rules and regulations of May 2, 1941, as aforesaid, and in so doing stated:

"But the Act does not essay to regulate the business of the licensee. The Commission is given no supervisory control of the programs, of business management, or of policy. In short, the broadcasting field is open to anyone, provided there be an available frequency over which he can broadcast without interference to others, if he shows his competency, the adequacy of his equipment, and financial ability to make good use of the assigned channel."

Now, therefore, be it

Resolved, That the Committee on Interstate Commerce of the Senate, or a subcommittee thereof, be, and it hereby is, authorized and requested to undertake a study (1) of said rules and regulations; (2) of the probable effects thereof upon the broadcast system of the United States and in particular upon the network organizations and licensees affiliated with said organizations or independent thereof; (3) of the probable effects thereof upon the quality of programs broadcast to the American public; (4) of whether said rules and regulations attempt to confer or do confer upon the Commission supervisory control of the programs, business management, or policies of network organizations and of broadcast licensees; (5) of whether said rules and regulations if enforced will adversely affect the broadcast structure of the United States and the service rendered thereby to the people thereof; (6) of whether they constitute a threat to the freedom of speech by radio in the United States; (7) of whether they will contribute to Government ownership and operation of broadcast stations or to regulation of them as common carriers; (8) of whether said rules and regulations are in their effect an effort to define monopoly or monopolistic practices and to assert the power of the Commission to find a licensee guilty thereof and to deny a license to an applicant because of such finding; (9) of any problem of radio broadcasting which said committee finds is raised or is affected by said rules and regulations and of the principles and policies which should be declared and made effective in legislation for the regulation and control of the radio industry, of broadcasting and of interstate and foreign communication by radio and which should guide and control the Commission in the administration of said Communications Act of 1934, as amended; (10) and finally to consider whether said Commission is authorized by present law to promulgate and enforce the rules and regulations adopted by it as aforesaid; be it further

Resolved, That all testimony, exhibits, briefs, arguments, and reports or photostatic copies thereof, submitted by or to the Commission in connection with said proceeding Docket Numbered 5060, be transferred to and filed with said committee of the Senate for its study and consideration; be it further

Resolved, That the committee shall report to the Senate as soon as practicable its findings and its recommendations concerning the matters which it is hereby authorized to study; and be it further

Resolved, That said Commission be, and it hereby is, requested to postpone the effective date of said rules and regulations until said Interstate Commerce Committee shall have made its report to the Senate in pursuance of this resolution and for sixty days thereafter. For the purposes of this resolution the committee, or any duly authorized subcommittee thereof, is authorized to hold such hearings; to sit and act at such times and places, either in the District of Columbia or elsewhere, during the sessions, recesses, and adjourned periods of the Senate, in the Seventy-seventh Congress; to employ such experts, and clerical, stenographic, and other assistants; to require by subpoena or otherwise the attendance of such witnesses and the production and impounding of such books, papers, and documents; to administer such oaths; and to take such testimony and to make such expenditures as it deems advisable. The cost of stenographic services to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of the committee, which shall not exceed $5,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman.

The Convention

A ringing denunciation of the FCC's new network rules and unanimous approval of a plan to continue BMM were (Continued on page 438)
the highlights of the largest and most enthusiastic convention in the NAB's history, held May 12-15 in St. Louis.

By unanimous vote, the convention endorsed a resolution introduced by Senator White (R-Maine), calling for a Senate investigation of the effect of the new network rules and asking the FCC to postpone their effective date pending the investigation. (The text of the White resolution will be found on page 437).

This vote was taken at a business session following a talk by Mark Ethridge, WHAS, Louisville, Ky., in which he said that the FCC's network order was "founded on a basis of bad temper, impatience and vindictiveness." Mr. Ethridge announced that he was giving up his presidential commission to review "the status and needs of the industry" and urged the delegates to support Senator White's measure. (The text of Mr. Ethridge's talk can be found on Page 444, Printed copies are available at the NAB).

Endorsement of BMI followed the signing of a new contract between ASCAP and the Mutual Broadcasting System, a factual analysis of which appeared on Page 409 of the NAB Reports. Stations WOR, WGN and KHJ, Mutual key stations, and WFBR withdrew from the NAB on the ground that the NAB had taken sides in intra-industry disputes in both the music copyright and "monopoly" matters.

The convention was by far the largest in the NAB's history. More than 1,000 registered, while several hundred others were present.

Following is a day-by-day account of the convention:

**Monday, May 12**

The NAB Board, 24 to 1, approved Neville Miller's correspondence with officials of the Mutual Broadcasting System regarding NAB policy on the "monopoly report" and in the music copyright situation. The board then voted, 24 to 0, to extend Mr. Miller's term of office to July 1, 1944.

**Tuesday, May 13**

A panel discussion on "national defense" started the convention fireworks. Participants were Major General Robert C. Richardson, public relations director, U. S. army; Commander H. R. Thurber, public relations officer, N. S. navy; director, Office of Government Reports, and James Lawrence Fly, FCC chairman. Mr. Mellett spoke off the record; General Richardson's talk is printed on Page 448; Commander Thurber's talk is printed on Page 450; Mr. Fly's talk is printed on Page 442.

Mr. Fly dealt at some length with the network rules, charging at one point that "monopolistically controlled sources in the industry . . . to divert attention from the fact of monopolistic control in their hands, conjure up insistently the bogeyman of government operation."

At the close of Mr. Fly's talk, Neville Miller asked:

"May it not also be said that those who favor government operation conjure up the bogeyman of monopoly, to divert attention?"

That evening, informed of the withdrawal from the NAB of the three Mutual key stations, Mr. Miller said:

We naturally regret the withdrawal of any members from the NAB. However, we believe that the issues subtly concealed in the Monopoly Report represent a direct challenge to the freedom of radio, and, if not opposed, would be the first of a series of events leading to the destruction of not only the freedom of radio but also the freedom of the press and the freedom of speech.

We would be derelict in our duty not only to our members but also to the public if we sat idly by merely to maintain our membership. We intend to protect the freedom of radio in opposing all attacks upon it, including those contained in the Monopoly Report. In so doing we believe that we represent the views of an overwhelming majority of our industry and of the public.

Vice-President Henry A. Wallace addressed the Tuesday luncheon session by remote control from Washington. His speech, dealing with how radio could best serve in National Defense, is printed on Page 446.

At its annual convention Tuesday, attended by representatives of approximately 250 independently owned network-affiliated stations, IRNA adopted a resolution expressing strong disapproval of the new regulations promulgated by the FCC to regulate network broadcasting.

The resolution reads:

"Resolved, that in the opinion of the members of Independent Radio Network Affiliates, Inc., here assembled, the FCC regulations on network broadcasting issued May 2, 1941, will, if carried out in their present form, seriously impair the ability of network affiliates as radio licensees to render the service which the public has been receiving and to which it is entitled, and which has been proclaimed as the finest broadcast service in the world."

The convention also endorsed the resolution introduced this morning in the United State Senate by Senator Wallace H. White, Jr., of Maine, requesting a suspension of the new network regulations and an investigation looking toward the drafting of a new radio law.

John A. Kennedy, West Virginia Network; L. R. Lounsberry, WGR-WKBW, Buffalo; Paul W. Morency, WTIC, Hartford; C. W. Myers, KOIN-KALE, Portland, Oreg.; and W. J. Scripps, WWJ, Detroit, unanimously were reelected for three-year terms as IRNA directors.

---

438 — May 23, 1941
The IRNA board was authorized by the membership to take such action as in its judgment will be effective in carrying out the spirit of the resolution on the monopoly report.

Later, at the organization meeting of the Board of Directors of IRNA, the resignations of Samuel Rosenbaum as Chairman and Paul W. Morency as Vice Chairman, were rejected by the Board, and they were requested and agreed to continue to serve until the next meeting of the Board to be held at the call of the chair.

The Board adopted the following resolution: "The Officers are directed to prepare and submit a plan for approval by the Board and for IRNA to support such offers as will be organized by any and all agencies in the industry to endorse the White Senate resolution and endeavor to obtain its passage."

The Board also authorized the officers to submit a recommendation for the engagement of a paid representative to conduct negotiations with the networks in further offers to obtain adoption of the changes in network operating practices recommended by IRNA for the past three years.

Wednesday, May 14

At the morning session of Wednesday, Neville Miller introduced for the presentation of BMI's picture, the following speakers: Merritt E. Tompkins, Vice President and General Manager, Carl Haverlin, Director of Station Relations, Sydney M. Kaye, Vice President and General Counsel.

Mr. Tompkins gave an account of the physical operations of BMI. He pointed out that BMI had within one year built up an organization which employed 323 persons. Mr. Tompkins said: "BMI under contract has acquired for its licensees performance rights in the catalogues of 111 affiliated music publishers. I have not broken down the exact number of titles involved, but a conservative estimate would place the grand total in excess of 400,000 different compositions. . . ." He read to the meeting letters from music publishers expressing their gratitude to BMI for enabling them to popularize their music which had hitherto been barred because of the ASCAP monopoly. Said Mr. Tompkins: "Since our inception, commercial phonograph record companies have sold in excess of four millions of records of BMI copyrighted titles. Add to this an additional six million records of the music of our affiliated publishers, and we have a grand total of in excess of ten million phonograph records sold."

Mr. Tompkins further said: "From October 1, 1940 to April 30, 1941, we averaged in sales 52,250 copies weekly. For the first quarter of 1941, we have averaged 74,600 copies a week. I contend that this in an all time high record of sales from the catalogue of one publisher."

Carl Haverlin reported to the convention that during the first license period of BMI, radio stations had bought 73,692 shares of stock, which, with the BMI license fees, brought total revenue to BMI of $1,849,050.

"It is significant," Haverlin declared, "that, quite to the contrary of ASCAP's statement that BMI is controlled by the networks, only 18 1/2% of BMI stock was bought by the networks and 82% of BMI stock was purchased by independent radio stations."

The BMI renewal period which commenced April 1st of this year, he added, saw an increase in the number of stations subscribing to BMI. Over 654 stations have this year agreed to pay BMI for their license fees $1,973,500.

Haverlin pointed out that BMI was created during a series of district meetings of the National Association of Broadcasters in the winter of 1939 and spring of 1940, and that every promise made by the organization to the radio stations had, according to these stations, been completely fulfilled.

BMI took as its premises that there is a direct relation between radio performances of popular music and its popularity and sale, he explained, and that it was perfectly feasible by exploring hitherto untapped fields to bring to the public a fresh source of music supply. Special emphasis was laid by the BMI station relations director on the solidity of the industry during BMI's first and second license period, particularly among the lower income radio stations. Of this group, numbering over 400, with incomes below $50,000 per annum, 67%, or 270 stations, are BMI stockholders. It is interesting to note, he concluded, that this BMI group of 270 exceeds one-third of all the commercial stations in the United States.

Sydney M. Kaye, Vice President and General Counsel of BMI, pointed out that not only had broadcasting maintained its full advertising revenues but that listener interest in popular as well as concert music programs had, according to recent surveys, actually increased from January, February and March of 1940 to January, February and March of 1941, a period during which BMI music was exclusively on the air. Mr. Kaye pointed out that it had been conclusively established that radio performances, contrary to ASCAP's previous statements, did not hurt music sales but helped them. Said Kaye, "We have not only paid our composers well, but we have paid them honestly and on a scientific basis in exact proportion to the use which radio has made of their works. This has never been done before in this country, and BMI is proud of it." Mr. Kaye said, "The importance of radio as a medium for the exploitation of music carries with it the social responsibility not to leave that field in the hands of ASCAP, an organized monopoly. It is a fallacy to say, as ASCAP has repeatedly said, that it is none of radio's business where its money goes or how it is divided among writers. The only way to encourage creation of music is to pay for it, and the only way to do that is to see that the money which radio pays for music gets into the hands of the people who create it."

Mr. Kaye pointed out that BMI, during its first year of activity, during which it had acquired offices, fixtures, furniture, catalogues and other permanent assets, had spent $1,800,000, or less than ASCAP spends annually on the mere administrative duty of collecting license fees and paying them out again. He pointed out that BMI's income from license fees for its second year was in excess of $2,000,000.

"It is perfectly obvious," he said, "that we can do the same job for less money during the second year than we did it during the first year. We do not have the same capital investments to make or the same emergency situation to face on time limit. BMI will be able to continue an undiminished service to you at a substantial decrease in the rates you pay. The reductions of 33 1/3% which can be made in your present contract will mean that our rates will commence from 1% and will range up to 1 1/2%, dependent upon station revenue. This means that BMI can do its full job for the coming year at approximately $1,400,000, a rebate to the broadcasting industry of approximately $600,000."

Mr. Kaye also reported on the per program basis of payment which, unlike ASCAP's, involves no guaranties. Per program rates for BMI music range from 3% to 5 1/2% on commercial programs which use BMI music and from 2 1/2% to 1% on sustaining programs.

"I am almost afraid to mention these rates to you for fear that someone will think we are depreciating the value of our catalogue or thinking of cheapening our service, but that is what can be done when there is no exaggerated overhead, and no desire to fix prices on anything but a competitive and economic basis, doing full justice to authorship."

Mr. Kaye pointed out the necessity of maintaining BMI as a
competitive factor in the music business. He said, “Some people recently have treated the ASCAP tiger as though it were a pussy cat. I am not fooled. The tiger is purring only because it pays to purr. If we ever lay down BMI as a weapon, we will soon find that the tiger still has its claws.” The competition which BMI has created must be permanently maintained.”

Discussion was followed by the unanimous adoption of the following resolution:

Whereas Broadcast Music, Inc. has not only attained but has exceeded by far the expectations of the broadcasting industry in creating an alternative source of music; and

Whereas by so doing BMI has opened the door of opportunity to composers and publishers, has prevented the monopolistic control of radio by ASCAP as a means of music exploitation and has brought about the attendant benefits of competition, not only for the broadcasting industry but for all music users, and for the public at large; and

Whereas the industry recognizes a continuing obligation to maintain the open door in music;

Now, Therefore, Be it Resolved that this Convention wholeheartedly endorses the ideals, accomplishments and purposes of BMI, and reaffirms its obligation to perpetuate BMI in the field of music as a service not only to its own industry but to composers, other music users, and to the public.

Neville Miller, president of the National Association of Broadcasters, issued the following statement in connection with the MBS contract with ASCAP:

The NAB cannot agree with the statement of Mutual stockholders that “the music war is over”. The preponderant elements of the broadcasting industry, including many Mutual affiliates, have still not received terms satisfactory to them from ASCAP. Even more important, ASCAP has yet to offer a music licensing plan which complies with the terms of the Consent Decree which ASCAP signed in the action brought against it by the Government, and which becomes operative on June 1st. Until the problem is solved for broadcasters generally, not only with respect to network programs but also with respect to local programs, the NAB will continue to regard the music problem as a vital one. The music situation, as it affects the industry, will be the subject matter of discussion at the Wednesday meeting of the NAB Convention.

Broadcast Music, Inc. issued the following statement:

There is nothing in the action of Mutual stockholders in ratifying an ASCAP contract for network service which in any way affects the future plans of BMI. BMI was, in fact, organized to bring competition into the field of music licensing. BMI will continue to render a full music service not only for the benefit of those stations who are relying chiefly upon its catalogues but also for the benefit of those of its licensees who have ASCAP as well as BMI licenses. Over 95% of Mutual affiliates are BMI licensees. The character of the BMI music service has been demonstrated by the successful use which has been made of it during the last four months. During that period such hits as "Hear a Rhapsody, There I Go, You Walk By, My Sister and I", and many others have been taken to the public heart, and have proved that the younger writers of America are rich in talent. BMI’s repertory now includes the publications of over a hundred publishers whose catalogues contain in excess of four hundred thousand compositions. BMI’s perpetuation as a competitive factor in the field of music is assured, and its permanent support from Mutual stations, from stations on other networks, and from independent stations is established without question.

BMI also announced that all of the stockholders of the Mutual Broadcasting System had individually assured BMI of their continued support. This includes, of course, WOR, New York, WGN, Chicago, the Don Lee network of California, the United Broadcasting Company of Cleveland, the Yankee Network, and WKRC, Cincinnati. BMI executives expressed their gratification at the unanimous support that they had received at the Convention and at the obvious evidences that had been given of the enthusiasm and loyalty of the industry. “We are stronger than ever before,” said Sydney Kaye, executive vice president.

Wednesday Luncheon

With Chairman Fly at the speakers’ table, Mark Ethridge made his talk at the Wednesday luncheon. After adjournment of the luncheon had been announced, Neville Miller was informed that Mr. Fly had desired to reply to Mr. Ethridge. Mr. Miller immediately spoke to Mr. Fly and offered to arrange for Mr. Fly to speak then or any time Wednesday afternoon or any time Thursday. Mr. Fly declined to accept the invitation. Later Wednesday afternoon, a committee of Directors called on Mr. Fly and asked him if he wished to talk at the Thursday luncheon session. Mr. Fly said de did not. Nevertheless, Mr. Fly indicated to newspaper reporters that he had not been given a fair opportunity to reply to Mr. Ethridge and compared the “management” of the Ethridge speech and the consequent unanimous endorsement of the White resolution to “a dead mackerel in the moonlight” which “both shines and stinks.”

Wednesday Afternoon

Recording standards and daylight saving were discussed at the afternoon session. That evening, other-than-standard-band broadcasting was discussed at a public meeting.

C. J. Burnside of the Westinghouse Electric and Manufacturing Company presided at the meeting and talked about developments in general. The other speakers were:

Facsimile Broadcasting—Jack DeWitt, Jr., WSM.
International Shortwave Broadcasting—Antonio C. Gonzales, Assistant Director, Latin American Relations, CBS.

Thursday, May 15

At the business session of the Convention Thursday morning the following limitations on the length of commercial copy in 5, 10 and 25-minute programs were unanimously adopted, effective immediately:

**Daytime**

At lunch Thursday, Neville Miller made the following statement:

"Just to keep the record straight, I wish to say that Chairman Fly has been offered every opportunity to reply to Mr. Mark Ethridge before a full meeting of the NAB, and in addition was invited to be our guest speaker at luncheon today. All of these invitations he has declined."

When plans for this convention were made, we agreed that it was to have one dominating objective. That objective was to arrive at decisions on how we could be of the utmost help in the problem of National Defense. That problem, all of us still agree, is still the vital problem facing America today.

But between the laying of those plans and our arrival here, something happened. By a majority vote of 5 to 2 the Federal Communications Commission chose that time to let loose against us through the press, charges of monopoly, and regulations so drastic as to change the very structure on which the American system of radio is built.

We must confess that when we arrived here for the opening sessions of this convention we were apprehensive. In our talks with each other we have been full of grave worry. We left home with a strong desire to do everything in our power to help our country at this critical time to mobilize for national defense. We arrived filled with fear that the very freedom of radio was being endangered.

As individuals and in groups we, more than a thousand loyal American citizens from all parts of this land, have been attempting to appraise this situation, because we know that we must make a determination to do our part, come what may! Broadcasters of the United States are already rendering this nation an unparalleled service in National Defense.

Civil Service

Broadcasters are engaged in recruiting skilled workers for the United States Civil Service Commission—men to manufacture munitions, tanks, artillery, small arms, naval torpedoes, airplanes air fighting ships for the Navy. The first request for assistance to locate needed manpower came to NAB last July. The need then was for 100,000 skilled workers—men vitally needed but who could not be located through ordinary channels which had been used heretofore. The need for 100,000 men soon became 200,000; the 200,000 became 300,000 and as of the first of May, I am happy to state that the cooperating broadcasters have been able to deliver a total of 375,000 skilled workers to the Army and Navy alone, and the end is not yet in sight.

The Navy

Broadcasters are engaged in recruiting 10,000 flyers for the United States Navy. These men go to Jacksonville, Pensacola and..."
Corpus Christi for advanced flying instructions. Since the time a few months ago when broadcasters began making announce¬ments for these men, the number of accepted student flyers has increased over 600% weekly. In fact, radio has been so productive of naval aviators that temporarily the announcement for Navy flyers has been suspended. In the meantime these same radio stations are recruiting aviation mechanics—the men to keep the planes mechanically fit for the 10,000 flyers.

**Treasury Department**

Broadcasters are engaged in assisting the Treasury Department in selling several billions of dollars worth of government securities—to finance the purchase of National Defense materials and equipment. In fact, radio is the backbone of this sales effort.

**Flying Cadets**

On next Tuesday broadcasters of the United States will be mailed a letter from Arthur Stringer of the NAB staff which will solicit their cooperation in recruiting 30,000 flying cadets for the Army. This is a tremendous task. Army statisticians estimate that 120,000 eligibles will have to be examined to produce the needed 30,000 flyers.

**Broadcasters Help Raise $30,000,000**

Broadcasters have assisted in raising nearly $30,000,000 for the relief of sufferers in war-torn Europe and elsewhere throughout the world.

**Civilian and Soldier Morale**

Broadcasters have given and are giving their facilities to maintain the morale of the citizen army, the men in the United States Navy and the morale of civilians.

**Selective Service**

Not many months ago radio took the story of Selective Service to the country. Hundreds of programs were broadcast in every state.

**Alien Registration**

Alien Registration, under the direction of the Department of Justice, would never have been so successful without the help of broadcasters everywhere.

**Two Current Campaigns for Funds**

Two current campaigns, both receiving the support of the broadcasting industry, are those of the United Service Organizations and United China Relief.

“USO” is composed of the Young Men’s Christian Association, the National Catholic Community Service, the Young Women’s Christian Association, the Jewish Welfare Board and the National Travelers Aid Association. Their goal is almost 11,000,000 dollars for recreational facilities in over 339 locations adjacent to camps, naval stations and defense centers throughout the United States and its overseas bases. Five million dollars are to be raised for relief and rehabilitation of the Chinese.

These are but a few of the highlights of the National Defense services in which broadcasters are engaged.

**Friday, May 16**

The Board of Directors, after its Friday meeting, issued the following statement today in response to an attack on the Association which was released on Thursday by Chairman Fly of the Federal Communications Commission. The Chairman made his attack after he had declined repeated invitations to address the NAB convention in reply to an address critical of Mr. Fly’s administration of the FCC which had been delivered by Mark Ethridge of Louisville, Kentucky. Mr. Ethridge, in his address, announced that he was dropping a survey of the radio industry which he had been requested to undertake by President Roosevelt, explaining that in his judgment his work had been rendered ineffective by the action of the Commission’s majority in suddenly issuing regulations violently altering the structure of the American System of Broadcasting before Mr. Ethridge could complete his work and make recommendations. Mr. Fly was repeatedly invited to address a later session of the convention in reply to Mr. Ethridge, but refused to do so:

“The broadcasters have contended that regulation under the present Chairman of the FCC, Mr. Fly, has been punitive, capricious, biased and destructive.

“Mr. Fly’s violent statement of yesterday was the strongest substantiation of the truth of what we have been saying. We leave to the public the judgment of whether the state of mind exhibited by Mr. Fly qualifies him to be Chairman of a government commission calling for judicial impartiality.”

Mr. Fly replied from Washington with the following statement:

It is of no great concern to our democracy whether any one particular man or group of men shall occupy public office. It is of real concern to the Nation, however, that official positions be held by men of sufficient strength of character to do their duty in the face of the strongest pressures which can be turned upon them.

**Chairman Fly**

National defense in its narrowest aspect means purely the defense of our country against actual invasion. In its broadest aspect it includes everything which contributes towards our national existence and preservation of our American way of life. I want to talk briefly about the role of radio broadcasting in national defense construed both narrowly and broadly.

The problems of communications in the event of actual military peril are, as you know, being studied by the Defense Communications Board. Its chief focus is on communications, though it is incidentally concerned also with some technical and physical aspects of broadcasting. The Board is purely and simply a planning body. Its plans are designed to abolish the danger which lurks in “unforeseen contingencies” by applying foresight.

An example will show what I mean. In the event of an actual threat of invasion, some American broadcasting stations become potential beacons for enemy aircraft equipped with suitable direction-finding apparatus. Simultaneously these stations may be needed to perform a basic role in giving air raid alarms. How to reconcile the dangers of broadcasting in an area of military operations with the need for broadcasting service in such an area is a problem which requires our best technical skill and ingenuity.
If such plans lie idle forever—and I trust the occasion for their use will never arise—no harm is done. But if the occasion should arise, the plans will be ready.

Down in the Tennessee Valley where I served in the T. V. A. for several years, the engineers were concerned with a not dissimilar problem. They laid detailed plans for protecting the valley in the event of what they called a “hundred-year flood”. A hundred-year flood is not something which occurs every hundred years; it’s something which might occur once in a hundred years. Nevertheless, plans must be readied to meet the contingency. The Defense Communications Board’s plans are of a similar nature. In preparing them, I know that we can continue to count on the full cooperation of the broadcasting industry for information and for the technical skill required in solving such of the complex problems as relate to broadcasting. Defense in communications as you know is of much greater scope than broadcasting.

I would turn now to the broader aspects of broadcasting itself in national defense. I assume that this is the appropriate place to reiterate what I said at your San Francisco Convention and, indeed, in many expressions and statements to the industry since that time. It seems strange that there should be any necessity to repeat this thought, and I do it only in view of certain dire portents which have come recently from monopolistically controlled sources in the industry. These men, to divert attention from the fact of monopolistic control in their hands, conjure up insistently the bogeyman of government operations. I can categorically state state again that there is no present foreseeable emergency which would result in the government’s taking over the broadcasting industry. The Federal Communications Commission has no desire and no plans to take over the nation’s broadcasting system. Neither has the Defense Communications Board. Neither, so far as I know, has any other government agency.

We of the Federal Communications Commission are fully determined that control over broadcasting shall not gravitate into Governmental hands, even in the most critical foreseeable emergency. But we are equally determined that such control shall not at any time gravitate into the hands of two or three private groups. That, it seems to me, is one mainspring of the Commission’s Report on Chain Broadcasting handed down two weeks ago. I cannot make the point clearer than by quoting a passage from the report, a passage which was also quoted in the Commission’s accompanying press statement, but which I think worth repeating because I do not recall having often seen it in the press or heard it on the radio.

“...the national defense to permit its exercise to the maintenance of free institutions to prevent its abuse.”

And we also said:

“Decentralization of this power is the best protection against its abuse.”

In a very real sense, you who own and operate our radio stations have been engaged in the national defense since the first radio program went out from the transmitter of the first broadcasting station. Your news programs contribute to the national defense since the first radio program went out from the transmitter of the first broadcasting station. Your news programs contribute to the national defense directly and immediately by giving each citizen an honest picture of the state of the nation and of the world. Your forum and discussion programs, in so far as they are well-rounded, similarly contribute by giving listeners access to the pros and cons of current issues, thus enabling them to decide wisely those issues which in a democracy they and their fellow must decide for themselves. Even the lightest variety program, if it is well and sensitively produced, contributes in a measure by making us a stable and emotionally well-balanced nation.

But if control over our whole broadcasting system, or over the most important units in it, it is to be concentrated in the hands of a couple of private management groups, the situation is very different. In that event an error in judgment or in policy can have a most disastrous result for the nation as a whole. Suppose, for example, that groups exercising a tremendous degree of control over 97 per cent of the nation’s total nighttime broadcasting power should decide that the public interest required the suppression of statements by the Republican Party, or the Democratic Party, or any other party. Here more is at stake than misuse of broadcasting facilities. The very survival of our free democratic institutions—which is what national defense in its broadest aspect means—is at stake.

I could hardly render a greater service to the broadcasters of America: than to commend for their consideration the language of the Association’s President, Mr. Neville Miller, in his statement of yesterday. Mr. Miller applauded the statement by the President of the United States that we should keep radio free, and urged that we be guided by that thought (and I quote) “to the end that freedom of radio might continue to exist unimpaired and that Democracy in America as we know it may be preserved.” Mr. Miller continued, “I believe that there are those in radio who have experience and the ability and the patriotism to guide this industry, and that radio as a privately operated competitive business will render a greater service than under Government control.” These are the same thoughts which I have expressed to you today and which I have repeatedly emphasized to the industry and in public statements throughout my term in office.

Perhaps we might render a more complete and well-rounded service, however, by noting a few lines in the President’s letter immediately following the quotation stressed by Mr. Miller. There our great President frankly recognized the following problem: “how to keep radio free as part of our purpose to keep all channels of public information free. This includes, naturally, how to prevent monopoly of radio operation or ownership.”

One way of preventing such a catastrophe is to lodge in the FCC or some other government agency day-to-day supervision over the fairness and impartiality of stations and networks. The Commission unanimously rejects such proposals. We are as opposed to concentration of power in the hands of government as we are opposed to concentration in the hands of a few networks. We believe that the way to avoid abuse of the power is to decentralize it—to return it, in short, to you gentlemen, the individual licensees. That is where under the law the power and the duty lie. Let me quote again from our report on chain broadcasting:

“It is the station, not the network, which is licensed to serve the public interest. . . . The licensee is obliged to reserve to himself the final decision as to what programs will best serve the public interest.”

I have called the Commission’s chain broadcasting order a “Magna Charta of American broadcasting stations.” I should like to go even further, and call it the keystone of a free broadcasting system. The Commission is implementing the Congressional decision that control over broadcasting should rest with the hundreds of station licensees, subject only to the public interest provisions of the Communications Act. It is your unlettered judgment which must prevail if the American broadcasting system is to be set free and kept free. Such freedom, I need not remind
you, is essential to America's national defense in the broadcast sense.

As Chairman of the Commission during these critical times I shall consider that, as a part of the job of defense planning, one of my primary tasks will be to keep American broadcasters free from domination by any private corporation or combination of corporations. As I said to you in San Francisco, your freedom is essential to the maintenance of our democratic institutions.

As to the ways in which your handling of programs on a purely voluntary basis may best forward the defense needs of the Government departments, I am happy to defer to my distinguished associates here today, Mr. Lowell Mellett, General Richardson and Commander Thurber.

### Ethridge Speech

What I have to say is the hardest thing I ever had to say, and the only justification for saying it is that it is the truth, as I see it. I want to acknowledge in the beginning that for the first time in my life I agree with the Chicago Tribune. Mr. MacFarlane, Its business manager, was kind enough recently to disavow an "unnamed individual, acting as self-constituted mentor and representative of the industry," whom I took to be myself—although I wish people would call my name when they are talking about me— as speaking for him. God forbid that I should ever be able to speak for the Chicago Tribune! Nor am I speaking for the radio industry today. I have resigned every connection I ever had with this association, even to the mission which the president asked me to undertake. I speak for myself, and myself alone, and I hope that if there be those with Gestapo minds who know and like Gestapo methods, they will not visit their punishment upon you because of bias against me, or in retribution for what I have to say here.

I want to make one thing more clear. Because I feel as I do today does not mean that I have renounced the New Deal. The New Deal to which I subscribed before it came into power, to which I shall subscribe after it is history, is a basic democracy that does not like undue concentrations of power in any hands, whether private of governmental. I have never been one of those to subscribe to the absurd notion that Mr. Roosevelt wanted to be a dictator. I have felt, and I do feel, that if we ever have any perversion of democracy in this country, it might be through a form of Praetorian guard, or French bureaucracy—that is, the fast boys moving in and seizing power to defeat the people in the exercise of their rights. I think that is perhaps an element in this situation, and as far as I am able, I intend to fight it to preserve the deep, basic purposes of the real New Deal.

I am not a radio man but I assumed certain obligations from time to time. One of them was the presidency of The National Association of Broadcasters. During my term, as short as it was, I began to study radio, to try to get a philosophy about it, and to try to understand what it was all about. I found, to my dismay, that nobody, including the government, had any philosophy about where radio was going or where it should go. I undertook, three years ago tomorrow night, to give something of the viewpoint of the broadcaster. One of the things I said was:

"What is their attitude toward regulation? The great majority with whom I have talked are willing to accept the thesis that the air belongs to the people and that they are licensed to use a natural resource. The mere acceptance of that thesis implies their recognition that we not only do have, but that we should have regulation as an industry. They recognize, moreover, that the Commission and Congress . . . are groping for a permanent policy. Most of the broadcasters with whom I have talked recognize the desirability of a permanent policy, providing it is shaped toward the end of taking the confusion and uncertainty out of the industry and out of its regulation. But they do want to come out of all these hearings and all this probing, a policy that is fair to them and fair to the public, and a method of regulation that is intelligent."

That is still, I may say, what the broadcasting industry wants and that is what I have been working for for these three years. I felt a particular obligation to try to do something about it for two reasons: One was that the president had said upon one occasion that he would want my suggestions when the time came to consider a new law; and the other was that I had been concerned a long time about the trend radio regulation was taking.

I came to feel strongly some time ago that the Federal Communications law belonged to the "horse and buggy days". The President himself said, in a letter of January 24, 1939, to the chairman of the Senate and House Interstate Commerce Committees:

"Although considerable progress has been made as a result of efforts to reorganize the work of the Federal Communications Commission under existing law, I am thoroughly dissatisfied with the present legal framework and administrative machinery of the Commission. I have come to the definite conclusion that the new legislation is necessary to effectuate a satisfactory reorganization of the Commission."

"New Legislation is also needed to lay down clearer congressional policies on the substantive side—so clear that the new administrative body will have no difficulty in interpreting or administering them."

I have never abandoned that idea for a moment. In fact, since Mr. Fly took office, I have felt all the more strongly about it. I have felt, along with the radio industry, I believe, that we have been the victims of an outworn law and of bad administration. I have felt that the Commission has gone beyond any powers conferred in the law and that it has been prejudiced and frequently punitive. I have felt, moreover, that the Commission has not reflected upon the whole either the attitude or the desires of the administration. I felt, moreover, that the Commission was the victim of tremendous, and frequently improper, pressures, for which everybody was responsible.

I took occasion to say to responsible people that both the Commission and the industry had reached an almost psychopathic state—the Commission because a majority of its members displayed something that was at least close to a phychosis against certain people and elements in the industry, and those of us in the industry because of the harassments and uncertainties. The Commission could not be expected, out of that atmosphere, nor has it ever been able, in my knowledge, to formulate a policy defining what place radio was to have in the social and economic structure of the country.

What I proposed was a study of an impartial mind, trusted by the president, to determine and report to him, (1) What type of law would best serve public interest; (2) what changes in the law would make for clarification for the administrators, and stability, certainty and freedom from harassments for the industry, and (3) how to clarify a situation and bring an industry that has always been regulated, expects to be regulated, and needs to be regulated, to a better understanding of its own future and to a better atmosphere.

I urged the study as desirable for several reasons. The Commission had made an attack on every front in radio—an attack of such breadth and vigor that there was on the part of almost every person I knew the feeling that something deep and underlyling was going on. The independent stations, while not being shot at, certainly realized that whatever pattern emerged would apply to them. The networks were of course disturbed and their affiliates—about
invited memoranda from a number of them, including the attorney conversations with a great number of people in the industry and government, because, to my chagrin and disillusionment, I dis¬
on both sides.

problems that could not be worked out to the advantage of both

Almost not the time to touch us.” But it happened to be

in a war besides which the adjustment of the

was born of regulation. The govern¬

ment was its midwife; it has certified, in granting licenses, to the

doctoral, moral and financial responsibility of everybody who runs

radio stations. It has set up every situation that exists in the

country. If there be monopolies, the government made them,
frequently by granting licenses to favorites. If there are restrains

of trade in contracts, the government has been aware of them for

years. It is not a case in which the government must suddenly

step in to correct abuses which are victimizing the public. This is

a case in which the 800 licensees have been suddenly told, in a burst

of piety by the government, that they were in effect operating ille-
gally. Told that after 19 years! Told that at a time when radio

was doing perhaps the best job of any medium in bringing to the

people the realization of what all of us face in international peril,

Simple truths are sometimes more unpleasant because they are

simple. I said, and I repeat now, that it was no time drastically

to alter the radio structure of this country in pursuance of will-

o'-the-wisp theories. The most important job for all of us is to

beat Hitler, and next to the military forces, there is no instrument

more important in doing that than radio. I firmly believe the

President was deceived as to the extent of radio's ills and almost

betrayed in not being told the divisive possibilities of the sort of

fright which was being invited. If that fright comes, he must blame

the majority of the Commission which insisted upon it.

I did not want to see the fright. I felt it was tragic. When the

President asked me to make a study and assured me that Mr. Fly

would welcome it, I was glad to undertake it. (It turns out, of

course, that Mr. Fly did not welcome it.) But I did undertake it

in good faith, not with the idea of saving anybody's skin, but of

making honest and objective recommendations. I carried on con-

versations with a great number of people in the industry and

invited memoranda from a number of them, including the attorney

for Mutual, from whom I have received nothing so far. I soon

discovered that there were no insoluble problems; indeed, no

problems that could not be worked out to the advantage of both

the industry and the government if good faith were demonstrated

on both sides.

I felt that the first gesture of good faith should come from the

government, because, to my chagrin and disillusionment, I dis-

covered that so many gestures of bad faith had come from the

government. I do subscribe deeply to the idea that the air

belongs to the people and that the government is merely the

trustee for the people in issuing licenses. If that be true, there is

one test, and one test only, that should be made to determine

who shall have them: who can best use them in the public interest.

But nobody would pretend that that test has always been applied.

All too frequently, licenses have been issued upon a basis of what

appeared at least, to be, political pull.

I know of three instances in which the Commission laid down

principles, or had the determination of principles under considera-

tion, and violated them by almost immediate action in favor of

people who were not unfriendly to the administration. I believe

so strongly in democratic government that I am old-fashioned

enough to insist that it should set higher standards than the people

it regulates.

I have never defended the status quo in radio and I do not

intend to do so. I am perfectly willing to admit there are situa-
tions that call for change; indeed, I have said so inside and outside

the industry. Nobody could ever say that I have advocated a

"hold-fast-to-what-you-have policy." But I must say in all

honesty that I have found that the radio operator is willing to

take his chances with the most stringent sort of government regu-
lation if he is assured of two things: (1) That the regulation is

honest and intelligent; (2) that he has assurance that what is

done is not done to produce chaos, to further an eventual taking

over by the government, but is done in pursuance of sound policy.

Personally, I do not believe you will have that assurance until

the President and Congress jointly enunciate a policy under which

the Communications Commission shall regulate—a policy so clear

that there can be no mistake in the minds of anybody. I should

like to see a new Commission, perhaps of three men, so hedged

about by safeguards that members of Congress or radio operators

or anybody else who approached them to suggest dispositions of

licenses, except in open hearings, would be put in jail. I should

like to see full and fair hearings where substantial interests are

involved, the right of review and the assurance that the vague

standard of public interest is not to be used arbitrarily to express

and enforce personal predilections. I should like to see the SEC, or

the National Association of Broadcasters given the right to inter-

vene in connection with applications, so that known exploiters of

radio licenses could be fought. I should like to see that section

of the act as to fairness of the air strengthened. I should like to

see the industry itself assume a greater degree of self-regulation and

make a more enlightened approach to public service programs.

I think it is true, as it has often been said, that public discus-

sion is on a higher level in England than in this country. The

level of public life, or the education of public men in England

may be higher, but nevertheless I think radio in America on its

own motion can be more creative and more imaginative than it

is. That will come not by fiat, but by voluntary action and the

stimulus of a friendly commission.

I have not touched the Monopoly Report so far. I have been

represented as having so many attitudes on that that it may come

as a shock to some people to know that I had a very simple posi-

tion. In everything I said, I never once urged that the Monopoly

report be suppressed. I urged that it be brought out, "the sooner

of the act as to fairness of the air strengthened. I should like to

see the industry itself assume a greater degree of self-regulation and

make a more enlightened approach to public service programs.

is. That will come not by fiat, but by voluntary action and the

stimulus of a friendly commission.

Before it was issued, the Monopoly report had only one im-

portance to me. In the light of what I was attempting to do. That

was a psychological factor. I felt that if the time had really come

when the administration—and I mean the leaders in all branches

of government concerned—was ready to formulate a policy on

radio, then it was pointless to effectuate regulations that made

drastic changes in a structure under study. I felt that it would

May 23, 1941 — 445
be not only fair, but merely common sense, to go on and make the indictment and let all of us see what should be done about it.

I am not excited about whether the networks should have artists bureau or not. I am not excited about whether Columbia should give up some of its option time; I am not excited about whether the Red and Blue should be separated. I have no feeling against Mutual, although I believe if Colonel McCormick translated that rugged individualism he manifested in the newspaper field into radio, and spent some of his vast capital for development of Mutual, he might come out better than he will by having the government which he so much distrusts try to work matters out for him.

What I am excited about, however, is that the very way in which the report was issued raised a question of the good faith of an invitation to make the study. I know the President on his part issued the invitation in all good faith. But there has been a breach of faith, and I am perfectly certain that it can be pinned directly upon the Commission majority.

I am excited, too, about the disingenuous method by which the Commission seeks to accomplish its purposes. By directing the orders against the stations, rather than against the networks, the Commission gave frank recognition to the doubt of its powers to carry out its purposes, and in making the recognition resorted to sharp administrative practices. A more honest way would have been to seek the power from Congress.

I am excited, too, because the Commission, under cover of an alleged fear that some group would gain control of mass communication in this country—although there is every safeguard in law, in commission power and in American character against that—seeks to remake radically the system which it has set up itself— a system that, with all its faults, still has given the public the finest program service any people enjoys. I am excited about that because the Commission is transferring a latent power which has never been abused, but jealously safeguarded by the industry, to itself, where it may be abused.

The text of the new regulations demonstrates how dangerous it is for an administrative body clothed with the power of law to substitute its judgment for the experience gained over many years of trial and error by those who have built up a system of public service which is acknowledged to be the best the world provides.

The Commission's order seems to take it for granted that the net¬tion of program standards. I believe, moreover, that they may never been abused, but jealously safeguarded by the industry, to itself, where it may be abused.

The text of the new regulations demonstrates how dangerous it is for an administrative body clothed with the power of law to substitute its judgment for the experience gained over many years of trial and error by those who have built up a system of public service which is acknowledged to be the best the world provides.

The Commission's order seems to take it for granted that the network affiliates are economic serfs whom it must take into protective custody to protect them from the so-called power of the networks. The fact is that every license who holds an affiliation contract with one of the networks has entered into it voluntarily, and prizes it as a valuable franchise, eagerly sought after.

Nobody can speak dogmatically about the effect of these regulations, but I believe that it is more than probable, that the Commission's regulations will induce a lowering, rather than an elevation of program standards. I believe, moreover, that they may have the effect of cutting small stations. It is perfectly true that the Commission has undertaken to provide against that, but the provision is in the form of a threat.

Regulation, to be successful, should be intelligent and deliberate. The new order, both from its text and from the tone of the utterances of its authors in public and in private is founded on a basis of bad temper, impatience and vindictiveness. It is intended to be punitive, not constructive. It will impair the very service which it is charged with protecting.

I feel strongly that the regulations are so impractical in their working out that the Commission will engage in a constant process of tinkering, which may be fun for the Commission but, I venture, hardly so amusing to the patient, or so beneficial to the public. To my mind the Commission has embarked upon a continuing process of adjustment that will lead us sooner or later to the easy solution of having the whole thing taken over. The Chairman of the Commission has denied that is his intent and of course he speaks in all good faith, but people who set houses on fire frequently have no intent to do so.

In fairness I must point out to you the chairman's statement of yesterday that he is willing to sit down with responsible representatives of the industry to discuss the implementation, the timing and the procedure in connection with the rules and regulations, I venture the personal comment that the offer is equivalent to asking you whether you want six or eight pallbearers and whether you want to be cremated or put under ground.

My sole purpose in accepting a commission to review the status and needs of America, radio was to lay a basis for discussion in which both the industry and government could participate and out of which a new orientation of radio law and practice could emerge. I had, I felt, made considerable progress toward securing from the industry suggestions for change which would not only cure situations complained of, but considerably advance the status of radio as an instrument of public thought and national service.

But, that work has been destroyed not only by the test and tone of the Commission's order but by the evident determination of the Commission by precipitate action, to forestall the expression of views by any other agency.

However, the introduction of the White resolution in the Senate yesterday provides a broader and more public forum in which can take place the very discussion and deliberation which the industry and, I believe, the public regard as essential. I therefore have decided to stand aside as an individual and to recommend to the radio industry and to the public which has a vital interest to be served, that the White resolution be supported by every proper means. I urge that all groups, individuals and interests concerned with radio, and its development recommend the passage of the White resolution and thereafter participate in hearings. Only in such an orderly manner can the pattern of radio for the future be defined.

Vice President Wallace

In talking to the radio broadcasters, I wish first to express my high appreciation of all that you who work in radio have done. You have carried the love of good music to millions. To the lonely and sick you have brought messages of good will, and have made it possible for them to enjoy church services on Sunday. Today you are building good will in Latin America by means of a two-way radio bridge, carrying across the skies programs which will better enable us to appreciate the culture and music of Latin America, while at the same time our good neighbors are learning through the radio to know us better. You are proving that the Latin culture of the south and the Anglo-Saxon culture of the north are fundamentally alike, because both are founded on belief in democracy and freedom. So many of the broadcasters have had an awareness of the public interest in many fields that it gives me an unusual pleasure to be here today to greet the National Association of Broadcasters.

The radio-listening audience demands of the broadcasters a great responsibility. They expect of you the wisdom, the decency, the good will and the enterprise which are the heritage of America. They appreciate the way in which you have kept them up to the minute in world events. But now, in this most critical year of the world, we who use the airways find our work hard and dangerous as never before because there is an organized effort by the agents of the Nazi government to confuse the minds of the American...
people and to promote ill will and dissension among us. In spite of this evil interference continually distorting the news and spreading lies and confusion, we have to go on steadily with the democratic process of free discussion as best we can. We must defend the spirit of America in our own words and actions against the poisonous influences that are attacking us day by day. Radio has an especially deep interest in the freedom of discussion which permeates the very spirit of democracy.

When, in the year 1791, our ancestors adopted the Bill of Rights, political democracy as we understand it was a new thing in the world. The foundations of political liberty had to be laid down in freedom of speech, freedom of the press, freedom of worship, and freedom of assembly. That foundation was well and truly laid. We have not yet achieved perfection in the building of our political democracy, but we have made progress, and we are determined to hold the gains we have made and not to slip back to the savage tyranny that the Nazis threaten to impose on all free men.

But political democracy was not enough to maintain the liberty and decency that we Americans hold as our ideal for human life. We found we must also have economic democracy, and we began to establish in law and custom the rights of economic freedom. Especially since the first World War, in the feverish prosperity and the shattering depression that followed, the need of economic democracy became more and more clear. After 1929, as the unemployment deepened, men were saying in every town in America: "What good is the vote without a job?"

We had to establish the right of every man in good health to have a job at fair wages, and the right of those who were aged or sick to have help, the right of youth to a fair chance for education and opportunity, and the right of all the people to proper food and medical care. Here also we have not achieved perfection, but we have made encouraging progress. We are determined to go on and build an economic democracy that is fit for a free people, and not to let the Nazis solve all our problems for us by reducing us to slavery.

But while we were building a political and economic democracy to protect our rights, we found we must go further and build into our customs and laws, and above all into our personal lives, a democracy of responsibility for the general welfare. The threat of war brings powerfully to our attention that we have duties no less than rights. And when the danger of war is past, if we are to succeed this time in establishing a true peace at home and abroad, we shall establish that true peace only by carrying on the full duties that are the strength and support of democracy.

We know now that the failure of peace after the first World War was partly the result of our own mistakes. We did our duty in the war and we won all that any war can give—the right to make the terms of the peace. But when we had won the right to make the peace we were tired of facing hard responsibilities; and peace is a hard responsibility, at home and abroad. So we quit. We made the peace we were tired of facing hard responsibilities; and the vast majority of the people must serve on the home defense front, and home defense goes far beyond the material job of supplying food and clothing and houses. The home front includes every kind of service, and high on the list is the service of entertainment, information and inspiration that is provided by the radio.

I hope to see the radio more and more reflecting the unbeatable spirit which is America in such a way as to make us genuinely proud of our defense effort and eager to go ahead producing with every atom of our strength. Our new army camps are ninety per cent complete. The army air fields, including the overseas bases, are fully half done. Many of our big defense projects are ahead of schedule. We have worked hard, we are working hard, but we still are not working hard enough. The speed of our production, the magnitude of our defense effort during the next six months, may easily make the entire difference between peace and war for the United States. The women must not only work themselves but stand back of the men, whether they be in management, in labor or in agriculture, so that all of us will put our heads, our hearts and our hands to the task. The job which we do in the next six months, turning out war materials in ever-increasing quantities, may easily make the difference between freedom and slavery for our children's grandchildren. Never has a generation of people had thrust on it such a responsibility as that which is ours.

Whatever opinions we may hold as to the American policy in the war, we are all of one opinion as to the need of building up the strength of America at home. We can use our talents and opportunities to help the American people meet the demands of the day with courage and confidence. We can help the people to understand what is going on, and where their service is most needed, and how they can find the greatest satisfaction in the responsibilities of citizenship.

For instance, if you are operating a local station, you can play a great part in home defense by calling attention to all the constructive things that are done to improve your community. Your neighbors want to be useful. They want to belong to the community and the nation. What can they do? We can't do all the planning and organizing in Washington, and we have no desire to centralize all the planning there. Most of the organization for strengthening the life of each community will be done by local people who are self-starters and who know what the community needs. The other people who are good workers but are not able to start the work, need to be told what is going on. The radio can help the people find their places by telling the facts about organizations that serve the public welfare, as well as by spreading the official information about defense jobs.

In addition, you can do a great service by spreading widely the news of any community activity that has been tried and found successful. There will be some among your hearers who will take up the idea and use it in their own towns. Let me give you an example.

In Ohio, several farmers and their wives were asked to invite
General Richardson

I am most grateful for this opportunity to take part in the NAB convention. I come to discuss a problem of mutual and important concern to you and to the War Department: the functioning of American broadcasting throughout the present emergency.

Let me say at the start, that the officers of the Army have the highest admiration for American radio. Both at home and abroad, you have kept us informed and entertained. And, if you believe that a General cannot be as much amused at the boyish pranks of

can make to our defense is to resist this propaganda of hate at every point.

We can help the defense of America by going out of our way to encourage the service of all those minorities in our country who are loyal to the democratic ideal and anxious to belong to our brotherhood. It is good to remember that the two cheifs of the defense program are both foreign born, both natives of conquered nations, and one a Jew. Let us make a special point of recognizing the full membership in America of Jews and Christians, of Whites and Negros, of the Germans who came here for freedom's sake, of Italians who have no desire for a Nazi victory that would enslave their friends in Italy. Let us take a special pleasure in reporting the athletes, the great musicians, the business leaders, the successful Americans in every line, whose unusual names proclaim that they or their ancestors came from nations that now lie under the Nazi terror. They are glad to be Americans, and we are proud to have them among us. It is worth our while to say we are proud of Knudsen and Hillman, Einstein and Kreischer, DiMaggio and LaGuardia, and thousands of others who have made notable contributions to our life.

We shall also do well to keep our minds clear about the German people, here and in Germany. The German people are not the same as the Nazi gang that has seized control over Germany. Most Germans are not gangsters. In Germany, the majority of the people are caught in a trap. They do not dare resist the Nazis, and they are afraid if they quit the war they may be punished unmercifully for the Nazi crimes.

Let us do our part to show here in America that we can distinguish between the great majority of Germans, whom we know to be good citizens, and the few who belong to the Nazi gang. The time will soon come, I hope, when we can help to encourage the decent, civilized Germans who are still caught in Germany to release themselves from their Nazi masters. In all that we say over the radio, I believe, we shall do well to keep that object in mind, for the cure of Germany will be an essential part of a true peace.

These are the thoughts that I should like to leave in your minds. We who do the talking need to take pains to understand the democracy that we are defending. Democracy is to be understood only by getting down to cases, where people act on their own initiative to serve their country in the place where they are. Let us understand this democracy of service and responsibility, and tell the people what they are doing so that they can draw inspiration from one another. Let us do our part also to build the confidence of the people in their own strength and in the comradeship of all the free citizens of our country of every race, color and creed. By fortifying our own democratic spirit we shall help in protecting our country against the attacks that are made upon her. Beyond that, we shall help to carry the light of hope to the people of Europe who are waiting their chance to overthrow the conqueror and win back their freedom.

I am most grateful for this opportunity to take part in the NAB convention. I come to discuss a problem of mutual and important concern to you and to the War Department: the functioning of American broadcasting throughout the present emergency.

Let me say at the start, that the officers of the Army have the highest admiration for American radio. Both at home and abroad, you have kept us informed and entertained. And, if you believe that a General cannot be as much amused at the boyish pranks of
a Charley McCarthy as is a private in the ranks, then behold, in the flesh, proof to the contrary. Thus in the Army, as well as in civil life, you are each day spinning a thread of entertainment and information which is drawn through every segment of our population, uniting us in common interests and common purposes.

The Army is not unmindful that the brilliant and useful record which radio has made in this country, has been based upon a typical American concept of competitive enterprise which has furthered the social and economic advance of our country. Your industry has demonstrated a will and a capacity to serve the public interest, fairly and squarely. Through the evolution of your own system of self-regulation you have demonstrated a capacity to eliminate social and commercial abuses within the ranks. So long as you continue to operate I believe you yourselves will justify the continuance of the American System of Broadcasting by your day to day service to the nation.

Some years ago, on a certain radio program, there was a word repeated over and over again. It was said to be a "horrid" word. Today, there is a word going the rounds in radio circles which is also regarded as "horrid." It's that word "control." "The control of broadcasting during a war" with connotations that the private system of broadcasting will be washed out should the war emergency become more critical.

I wonder what is meant by that word "control"? The Army Signal Corps is exclusively concerned with the military use of radio frequencies for essential systems of Army communications. I am told they have ample frequencies for such work. In time of an actual war, where certain stations in the long band may be used as homing stations by enemy aircraft, such stations will go off the air in defense of their country as well as of their own property. Should military combat occur in areas where American radio stations are located, quite naturally such stations in such areas will be taken over and used by the military forces. Such temporary dislocations are to be expected in time of war. But I believe this is not what is in most people's minds when they speak of "radio control." I believe what they mean is the control of programs, and of news and this is where another horrid word crops up—"censorship." This is what you really want to hear about.

The control of anything is absolutely barren, unless that thing be used. Will it be necessary for the Army to take over radio broadcasting in order to use it? I do not think so. Let us go further. Why does the War Department wish to use radio? The answer is obvious: to keep the nation informed, to build confidence in our new citizen-soldier Army now in the making, and to have instantly available the ear of every man, woman and child should invasion occur and their safety be imperiled. I believe the patriotism and the honest self-interest of this industry can be depended upon to cooperate with us voluntarily in this important mission; to impose such voluntary modifications of operating policy as best serves the nation's defense, to set up a system of defense program priorities balanced between the Army and the Navy and other defense agencies, and to establish a system of technical and programming procedure, that in the dire necessities of warning services or of information services, the transmitters of every station in the nation, regardless of network or non-network affiliation will be simultaneously available to the Army's call, nationally or regionally.

The start of this important cooperative venture has already begun. Late last fall, the War Department asked for the loan of an officer of this Association whose devotion to duty and patriotism was such as to earn your confidence and the confidence of the War Department. And so Mr. Kirby, your Director of Public Relations was loaned to us for the purpose of liaison between the War Department and the radio industry. It is his job to translate the Army's radio needs to you immediately and efficiently. To assist him, a competent staff of writers and specialists has been drawn direct from your industry. These men have been selected not only because of individual abilities, but with due reference to their combined experience in every type of station and network. Thus in the Radio Branch, you will find someone conversant with your programming policies, whether yours be the smallest station or the largest network.

Now a word about that word "censorship." I believe that every thoughtful American knows that certain information such as the blueprint of the American bomb-site—the most accurate in the world—or schedules of the movements of troops, must be restricted for our own welfare and the protection of our sons. Certainly this is not censorship. Outside of these, there is no censorship of news, now, or intended. The whole function of the Bureau of Public Relations of the War Department, and of its Press, Pictorial and Radio division is just the opposite: to get the story of the Army and to make it available to press, newsreel and microphone.

The type of news which has to do with the whole national defense program will probably originate either in Washington or most appropriately be collected there. It is with such information that the War Department's Bureau of Public Relations will work most regularly. Every effort will be made to follow up inquiries, and to consolidate, from various sources within the department, the information requested. At each of the principal Army posts and camps you will find one or more public relations officers on regular assignment. These gentlemen have had, in practically all cases, an opportunity to adapt their functions to the special requirements of the radio stations in the surrounding areas. You will find in each case an earnest desire to cooperate fully in providing information and lining up broadcasts. At all stations provision has been made for receiving members of the press, radio and newsmen. There are files of Army regulations, bulletins, directories of personnel and other reference material. Many of the larger military units also have their own public relations officers, who are normally members of the intelligence staff. In the usual case the public relations officer on permanent duty at the camp or station is somewhat better equipped to meet the needs of radio in his locality; in most cases he can secure information which has been specially requested, on short notice.

Before I close, may I briefly give you a background of the Army's story, because I sincerely believe it may help you and your program builders in better understanding our purpose:

It may not be understood generally by the layman that the officials of the War Department are unable to act until the people, through Congress, have appropriated the money and passed the necessary legislation. Congress did not pass the Selective Service Act until September, nor did it authorize the President to call into Federal service the National Guard for one year; nor appropriate money for the construction of the cantonments until last September. Since that date, within the short period of 7 months, buildings have been constructed to house one million men who have been clothed, fed, armed, equipped and given basic training—all this in six months! This achievement is nothing less than a miracle of Democracy at work, American Style. Without going into too much detail, let me say that 32,000 individual buildings have been constructed, all over our country. New, and large cities of men have sprung up. There, peaceful minded men from peace-loving families are being trained in the science of war, lest anyone have the mistaken notion that Americans of 1941 will not fight to protect our individual rights of life, liberty and the pursuit of happiness, won through the years by those whose memories are already in your minds. We are, gentlemen, witnessing today the development of a tremendous story—the greatest untold story.
of the decade; the development of the powerful, the intelligent, the civilian Army of the American people. This is where you of the radio and we of the Army, find common interest; What is the story of our new Army? Why are men in camps? What do they do? How do they live? Who are they? Let me tell you: They're your boys and mine. The new Army of the United States is composed of men from every walk of life and every section of our country. It reaches into every home; into every school; into every business; into every church; into every economical and social group. The people of the United States through the Congress have entrusted to the Army and to the Navy their sons, husbands and brothers for training. To the Army and Navy, likewise, have been entrusted huge sums of money for the defense of the nation. The American people, therefore, are entitled to receive daily from the camps and the War Department, news of their Army and periodic reports on the status of the defense program.

With this thought in mind the Secretary of War decided to establish, under his personal supervision, the War Department's Bureau of Public Relations in order to provide the American people with accurate information by means of our various media of expression: the press, the radio, the newsreels, the movies and the magazines. We, therefore, have a great responsibility toward the public to see that they are kept honestly informed. In turn the public has a great responsibility toward the Army because the Army, more than ever before, is "Our Army," not "The Army." Mutual understanding is needed and frankly sought.

It is the frank desire of this Bureau to be as helpful as possible to American radio. After all, freedom of expression is one of the cherished rights which we are preparing to defend. There is no request from your great institutions that can be considered too much trouble with which to comply. I have found during my short incumbency as Director of the Bureau of Public Relations the press, magazines, radio and screen are more than cooperative. Let me observe that, as the defense program develops the public to see that they are kept honestly informed. In turn the public has a great responsibility toward the Army because the Army, more than ever before, is "Our Army," not "The Army." Mutual understanding is needed and frankly sought.

It is the frank desire of this Bureau to be as helpful as possible to American radio. After all, freedom of expression is one of the cherished rights which we are preparing to defend. There is no request from your great institutions that can be considered too much trouble with which to comply. I have found during my short incumbency as Director of the Bureau of Public Relations the press, magazines, radio and screen are more than cooperative. Let me observe that, as the defense program develops the untold story of the Army is beginning to emerge. It is a constructive story counter-balanced now and then by failures, some minor, a few serious. Tell the story, good or bad. The story of the American Army can be no better nor worse than the story of the American people. For the story of the American Army and of the American people is one and the same. Personally, I think it's a good story. I think you do, too!

**Commander Thurber**

It is my privilege to express to radio's representatives here today in annual convention the Navy's appreciation to radio organizations as a whole for their splendid cooperation in broadcasting the Navy's story during the past year. You have given us much—your wide experience in visualizing what would present the Navy's picture in words, your unfailing courtesy in arranging and dramatizing timely presentations. All this has benefited listener audiences as well as the Navy. To our far-flung, ocean-going efforts to the attention of those who cannot see our ships and their men at work is no small task. We in the Navy feel that radio has contributed to that visualization in no small measure.

There is much to be done in the days ahead. The tempo is accelerating each minute, calling for rapid, well-planned action. A minimum of confusion and a maximum of cool determination are in order. With that in mind, I wish to outline, as concisely as possible, the Navy's problems in public relations so that you in radio and we in the Navy may cooperate on close and practical lines.

Two major phases are presented—first, that which may be defined as constructive broadcasting, and second, that which involves withholding details of military value to potential enemies. Both these phases are vital—especially so today, and in the immediate future.

Let me enlarge for a moment on the negative phase—the withholding of information that affects military security. Believing that the war situation was growing serious for us, the Secretary of the Navy early this year requested all press, radio, and photographic agencies to avoid publicity, unless authorized or announced by the Navy, on four subjects affecting the success of the Navy's operations should war suddenly descend upon us. As was hoped and expected, the answers to this request were "yes"—just short of one hundred per cent. Radio set up its own list of precautions to ensure that this request was understood and carried out. From the first of this year to date, the adjustment from peacetime to emergency conditions has been accomplished with a smoothness that betokens nothing but successful continuance.

It was foreseen that in a national emergency, new situations would arise, and that inevitably there would be other requests for cooperation of this nature. Since the Secretary made his original request, new situations have developed, so that the "avoidance" list today for all publicity media is, briefly, as follows:

1. Presence, and actual or intended movements, of U. S. Navy vessels or aircraft;
2. Actual or intended movements of units of Naval (and Marine Corps) personnel;
3. Secret technical U. S. Navy weapons, or the development thereof;
4. Details of the armament, armor, speed, cruising radius of new U. S. Navy ships or aircraft;
5. Details of itemized assembly capacities, skilled machinery practices, and number of personnel employed in shipyards, aircraft factories, and industrial plants having Navy contracts;
6. Information of the military strength or defenses of our naval bases—continental and outlying;
7. Aerial photographs of U. S. Navy ships and shore establishments; and

That list is a vital one from a military standpoint. Recognizing that there are many important factors contained in the list, the Navy Department announces regularly as much as can be released on those subjects so that the people of this country may know that the Navy is on watch and under full power. But unless details are announced or authorized by the Department or responsible naval commanders, it is far better, from a military point of view, that publicity be avoided on the subjects which have just been itemized.

Although casual reporting of those subjects may be unintentionally harmless, unauthorized release of information may reveal to the enemies' observer and espionage services a missing link they are trying to discover in the chain of valuable military information. In case of doubt it is recommended you refer your questions to the Navy Department or to the Naval Districts. Incidentally, and to answer such queries, the Department early in the year began operating the press (and news radio) section of its Public Relations Office on a 16-hour basis, and last week went to a 24-hour watch. Enlargement of the Navy's public relations facilities has been carried on in the Naval Districts, so that you also may look to headquarters of these Districts for assistance.

If this country should actually enter the present conflict, you undoubtedly will be asked by the Navy to avoid publicity on two or three additional subjects. For instance, during World War I there were 20 items on the original request list issued by the Committee on Public Information. These included Navy, Army, and State Department activities on which it was deemed unwise to
report in any form whatsoever. And those 20 items were augmented as new situations arose.

Obviously, we are fortunate in having been able to discuss these "negative" subjects in advance of a possible armed conflict. In the period of adjustment from the days of reporting all news to the present time, invaluable suggestions have been made, and steps have been taken, to clarify the atmosphere. The Navy appreciates the assistance given by all agencies in approaching a working agreement for voluntary cooperation. We feel that much has been accomplished—particularly so, when recalling the many aggravations that existed during the early days of World War I. Then, the problems of voluntary cooperation were hampered by the fact that there was no "list" for specific guidance until seven weeks after hostilities began. Intelligent analysis today has ironed away many of the acrimonious difficulties encountered in that time of stress.

We turn now to what may be called the constructive phase of radio broadcasting. The field of constructive broadcasting is large and deserves our best combined thought and energy. A few thoughts are registered here as an approach to our mutual problem.

Entertainment programs for naval personnel have been staged by radio and are being increased rapidly. It is self-evident that these morale-builders are a most important contribution to the Navy, and to those at home who have the welfare of our men close to their hearts.

Dramatizations of incidents in our naval history—and the Navy is rich in tradition—offer a comparatively untapped source which could be developed with excellent effects on the esprit de corps of the Navy and the country.

Feature stories based on the regular releases from Navy press conferences and public relations offices, supplemented by our research facilities, are another source of present-day interest. As examples of these, I mention a few that were broadcast in recent months:

Personality programs—such as the six Patten brothers, aboard the USS Nevada far out in the Pacific, conversing with their father on the mainland; the Boston University football team indicating their intention to become Naval Aviation Cadets; and the many individuals involved in colorful graduation exercises at the Naval Academy; Analyses of the great progress being made in the Navy's building program; Launchings and commissionings of many historically-named ships in our "two-ocean fleet"; Activities at our three major Naval Air Stations—Pensacola, Jacksonville, Corpus Christi—and at our 16 reserve aviation bases; and Programs originating from naval aircraft, from our submarines, from our battleships far at sea.

To these valuable contributions by radio, there have been added, with the Navy's grateful appreciation, spot announcements and interviews which have aided the Navy in obtaining aviation cadets, reserve midshipmen, and enlisted personnel, so that our recruiting has remained on a voluntary basis to date, with no relaxation in the high standard of the Navy's requirements.

In furtherance of this outline of constructive cooperation, the Navy welcomes suggestions for radio broadcasts. Because of many emergency considerations, we cannot promise approval in every case. But it is the Navy's desire to render maximum cooperation with radio—to extend every effort, compatible with security, in obtaining, building, and staging naval programs of spot news, feature, special event, or other public interest. Indicative of this attitude are the cooperative measures of the Navy's public relations offices during the past year, and the steady expansion of these offices in anticipation of additional needs and requests as the pace quickens.

Your great industry, with its far-reaching voice, has been and can be of inestimable service to the Navy. We feel that radio

will continue this service as long as we are worthy of it—and, in closing, I wish to assure you that your Navy from the Secretary through all ranks and ratings, is working long hours, with all its experience and manpower, to be worthy of the trust the nation has placed in us.

---

**Resolutions**

1. **THANKS.** The National Association of Broadcasters hereby extends its hearty thanks to those who have participated in its deliberations and who aided so materially in the success of the 19th Annual Convention.

The National Association of Broadcasters extends its most sincere thanks to the Honorable Henry A. Wallace, Vice President of the United States, for his kindness in sending to the convention such an interesting and inspiring address. While we regret his inability to be with us in person, we are doubtfully grateful for his taking time out from his arduous duties to address us in these critical times.

The National Association of Broadcasters wishes to thank the Honorable James Lawrence Fly, Chairman of the Communications Commission for his attendance at the convention, and in particular for his frank and open discussion of many controversial questions confronting our industry at the moment.¹

The National Association of Broadcasters expresses its deep thanks to General Robert C. Richardson, Director of the Bureau of Public Relations, War Department, and to Commander H. R. Thurber, Director of Public Relations, U. S. Navy, and Lowell Mellett, Director of the Office of Government Reports, for their attendance at this convention, and for their fine expression of confidence in the patriotism and ability of this industry in setting up a system of voluntary self-regulation which makes of American Radio the strong right arm of the Army and Navy in these critical days of the war emergency.

We extend our thanks also to Major Edwin H. Armstrong, C. J. Burnside and Col. Willard Chevalier for their fine contributions to the convention program.

In addition, our thanks go to Honorable William Dee Becker, Mayor of St. Louis, to the Management of the New Jefferson Hotel, the Convention Committee, headed so ably by Merle Jones, to the wives of the St. Louis broadcasters, headed by Mrs. Merle Jones for providing such a fine program of entertainment for the ladies of the convention, and to all other individuals and groups from the City of St. Louis who have been exceedingly generous and cooperative with their time and talents.

2. The National Association of Broadcasters extends its thanks to the convention Entertainment Committee, headed by Bill West, to the Production Departments of CBS, MBS and NBC, headed respectively by Doug Coulier, Dolph Opfinger and Clarence Menser. We also thank Mr. Nat Abramson, the Producer of the Show and Miss Estelle Marantz and Dan Sayford for their untiring work and cooperation.

3. The National Association of Broadcasters expresses its appreciation to Edgar Bill, Chairman of the Code Committee and to those broadcasters who have served with that committee, which has given the industry a system of self-regulation and self-education bespeaking the industry's awareness of its social and economic responsibility, and which has demonstrated radio's ability to regulate itself in the public interest.

4. The National Association of Broadcasters looks with con-

tinued favor upon the constructive work in the educational broadcasting field being done by the Annual Institute of Education by Radio at Ohio State University each spring, and at the Mid-West School Broadcast Conference in Chicago each December. It is pleased that an organization to serve as a connecting link between these two conferences is now being formed. It pledges its continued cooperation for the further spread and improvement in educational broadcasting.

5. The National Association of Broadcasters expresses its high appreciation for the constructive work done by the Radio Council on Children’s Programs, and particularly to its distinguished Chairman, Mrs. Harold V. Milligan, and Vice-Chairman, Mrs. Dorothy Lewis who recently completed a nation-wide tour and survey which has uncovered valuable information upon which continued improved programming may be based.

6. The National Association of Broadcasters expresses its deep appreciation to Dr. Julio Barata, Minister of Information of the United States of Brazil, and to Mr. Glenn Bannerman, President of the Canadian Association of Broadcasters for their attendance at this convention, and for the expressions of comradeship from the Brazilian and Canadian broadcasters. The presence of these two distinguished broadcasters from our neighboring countries reflects the growing hemispheric solidarity which American radio is helping to achieve, linking the Nations of the new world in bonds of good-will and understanding by radio.

7. The National Association of Broadcasters hereby extends its thanks to its President Neville Miller and to the members of his staff for their untiring efforts in successfully scheduling and carrying out the largest convention the Association has ever held and for their extremely effective work done during the year just completed.

8. RESOLUTION

WHEREAS this convention assembled has heard the thoughtful study and inspiring report of Mark Ethridge on problems confronting the broadcasting industry, and

WHEREAS the courage, clarity, sincerity and soundness of this report has met with the overwhelming approval of the broadcasting industry as exemplified by the spontaneous approbation accorded his remarks

Now therefore,

BE IT RESOLVED that this convention express of record its sincere and grateful thanks to Mark Ethridge for the unselfish and inestimable service rendered the industry and the public by his timely presentation of his personal views pertaining to problems of fundamental importance to the nation and the industry.

9. Whereas Broadcast Music, Inc., has not only attained but has exceeded by far the expectations of the broadcasting industry in creating an alternative source of music; and

WHEREAS by so doing BMI has opened the door of opportunity to composers and publishers, has prevented the monopolistic control of radio by ASCAP as a means of music exploitation and has brought about the attendant benefits of competition, not only for the broadcasting industry but for all music users, and for the public at large; and

WHEREAS the industry recognizes a continuing obligation to maintain the open door in music;

NOW, THEREFORE, BE IT RESOLVED that this convention wholeheartedly endorses the ideals, accomplishments and purposes of BMI, and reaffirms its obligation to perpetuate BMI in the field of music as a service not only to its own industry but to composers, other music users, and to the public.

10. WHEREAS, precipitate promulgation of the Federal Communications Commission’s new rules regarding network broadcasting threatens the freedom of radio and the American System of Broadcasting; and

WHEREAS, the National Association of Broadcasters is of the opinion that the listening public and the American people as a whole should be given the opportunity to learn just what the effect of these rules would be on American radio, particularly with regard to program service;

BE IT RESOLVED that the National Association of Broadcasters urge the United States Senate to give prompt and favorable consideration to a resolution introduced by Senator Wallace White of Maine, which would result in a thorough investigation of the whole radio structure with a view to the enactment of a new radio law; and would request the Federal Communications Commission to suspend operation of the new network rules pending completion of the Senate investigation.

11. Since the observance of Daylight Saving Time in some sections of the United States and its non-observance elsewhere, disrupts radio time schedules and adds to the difficulty of the listener in knowing when to tune in programs of national importance; and since the disruption of radio time schedules twice each year curtails the effectiveness of radio broadcasting in making the people of the United States the best informed people in the world—the Association instructs its president to urge upon the duly constituted authorities, the vital necessity of establishing as a National policy Daylight Saving Time in all parts of the United States.

12. The National Association of Broadcasters reaffirms its position expressed at the time of its 1940 convention with reference to its desire and intention to cooperate in every manner possible, with the Federal Government in presenting a united front in the Defense of our free institutions and reiterates its desire to cooperate in the coordination and promotion of the country’s defense activities.

13. The 19th Annual Convention of the National Association of Broadcasters hereby approves the official acts performed since the last annual convention by its duly qualified officers.

14. The National Association of Broadcasters does solemnly rededicate the American Radio industry, with whose freedom it is entrusted to the promotion of the American way of life, and to preservation of the unity and morale of the American people.

Submitted by the Resolutions Committee:

E. E. Hill, WTAG,
Ed Yocum, KGHL,
George Cranston, WRAP,
Lee B. Wailes, Westinghouse Radio Stations, Chairman.

PROMOTION DISPLAY WINNERS

After viewing more than 275 panel displays entered by nearly one hundred radio stations, the Judges Committee of the Promotion Display at the NAB Convention today named the following stations winners of the six general classifications:

- Direct Mail Advertising—WIBW, Topeka Certificate of Merit presented by Direct Mail Advertising Association.
- Special Activities, Public Service—WAAB, Boston—Gold Plaque presented by Radio Daily.
- Station Backed Promotion—KMOX, St. Louis Statuette trophy presented by Young Men’s Division, St. Louis Chamber of Commerce.
- Program Presentations—KNX, Los Angeles Desk Set presented by Standard Radio.
- House Organs—WOW, Omaha, Trophy presented by St. Louis University.

Although no trophy was awarded in the seventh classification, Special Activities, the Judges Committee decided special mention should be given KKOK, St. Louis, for an outstanding presentation.

Stations of all classes of power, wave length, and geographic locations were represented in the display—from Duluth, Minnesota, to New Orleans, Louisiana, and from New York City to Los Angeles—from Florida to Seattle, and from Texas to Massachusetts.

J. O. Maland, Vice President

C. W. Myers, President

Don S. Elias, Executive Director

Paul H. Raymer of Chicago, station representative, and Peirce Raymer of New York, of the same firm, tied for first place (net scores, 60) in the NAB golf tournament for the Broadcasting trophy.

Gene Pulliam, Jr. of Station WIRE, Indianapolis, won the cup offered by St. Louis broadcast with a low gross of 75.

Mrs. Robert T. Convey, wife of Bob Convey, Station KWK, won the women’s trophy offered by St. Louis Broadcasters. Her score was 108.
DEALER-COOPERATIVE ADVERTISING BY TIRE MANUFACTURERS

As a result of a sales trip to Akron, Ohio, by Frank E. Pellegrin, Director of the NAB Department of Broadcast Advertising, the following information has been secured on the dealer-cooperative advertising policies of the four big tire manufacturers there. Briefly, the situation is this:

Goodyear Tire Co.—F. T. Tucker, Director of Advertising, says that a 50-50 dealer-cooperative advertising policy is in effect, with the dealer having a free choice as to which medium he prefers. Radio is on an equal basis with any other medium. If radio is bought, the dealer must use transcribed spot announcements furnished by the company, just as he must use approved mats and copy for newspaper ads, and the spot times selected must be approved by the company's advertising department. There are a few exceptions to the above, where dealers have been permitted to retain programs or other special services that have done an outstanding job over a period of time, but it is Mr. Tucker's desire to have all dealers conform to the general policy. In the case of company-owned stores, in place of the 50-50 division of costs the company pays 40%, and 60% is charged to the store's budget.

Goodyear Tire Co.—A 50-50 dealer-cooperative policy is in effect, with the dealer permitted to choose the medium he prefers. The company expresses a slight preference for newspapers because they believe it is easier to control and check, but this does not interfere with a dealer's choice of radio if he is sold on it. No special service must be purchased, but the company's advertising agency keeps a man at the Akron office who will furnish spot radio copy if requested, just as he will furnish recommended copy for newspapers or other media.

General Tire Co.—A new policy has been adopted whereby the company pays 100% of the cost of newspaper advertising placed on behalf of local dealers. R. H. Harrington, Advertising Manager, explains that this policy cannot be changed until the end of the fiscal year on December 1. The local dealer, who used to pay 50% of all local advertising, is expected to spend approximately as much as he formerly did, but now must pay in full for whatever advertising he buys. He of course has a free choice of media in spending his own money, and the advertising agency will furnish recommended radio copy upon request without charge. Mr. Harrington stated that this policy was adopted to give the company greater control of local advertising schedules. He said that under the old 50-50 system radio had been tried in many markets, but without unusual success. He believes it is harder to measure and control than newspaper, and said that overlapping coverage of radio stations, conflicting claims, difficulty of clearing desirable spots, etc., all played a part in determining the new policy. If the present plan does not work satisfactorily, the policy may be changed, but he advised stations to sell the local dealer on using radio with the funds that are supposed to be set up in his own budget.

Firestone Tire Co.—This company sponsors the “Voice of Firestone” on a national network, and feels that this gives them wide coverage of the radio market. The company also places advertising in all other national media, in its effort to do an all-around advertising job. District and local funds, however, must be placed on a 50-50 basis in newspapers only. The dealer, or the company-owned store, must pay 100% for radio, direct mail, or any other medium. Mr. Starbird, Advertising Manager, and Mr. McGinness, his assistant, emphasize that the company controls all dealer and store advertising, even selecting the particular newspapers in which ads are placed, insisting that this is necessary in their operation. They declared that radio does not lend itself to their particular localized spot campaigns because of difficulty in getting just the coverage they want, in clearing desirable spots, and because they cannot trust their local dealers to buy radio effectively. They charged that too often in the past radio stations have “sold” local dealers on whatever was available for sale, without due regard as to how it would fit the advertising problem at hand. They said it is impossible to regulate or control local radio as easily and surely as it is to insert newspaper ads—and they won't trust their dealers to do the job for them. It was also learned unofficially that the company will not give up its newspaper advertising because of fear of the “editorial club”. The company feels that it must maintain the good will of newspapers, especially in view of present industrial and labor conditions, etc. Radio, having no editorial policy, is thus handicapped.

Mr. Starbird indicated, however, that the “Voice of the Farm” series may be repeated via spot radio.

* * * *

In view of all the above, it appears that radio salesmen have their work cut out if all of these tire manufacturers are to be brought into the fold of spot radio for dealer-cooperative advertising. Each advertising manager was given as strong a selling as possible on the effectiveness of radio, and this work by NAB will continue until the job is done. Special presentations will be made, success stories submitted, evidence compiled and presented, and additional sales calls made. Every objection that was raised was answered, and additional answers are being prepared.

The job can be done better and quicker, however, with full cooperation from national radio sales representatives and especially from local sales managers. These forms of cooperation are suggested:

1. Work particularly with the local tire dealers in your market; sell them on radio to such an extent that they will request it from the company in overwhelming numbers.
2. Send to your national representatives and to NAB your particular reasons why radio should be used: your success stories on tire dealers, other automotive accounts, and various accounts in different fields but with similar problems.

With several million dollars of revenue in prospect, we suggest that it is well worth the effort.

INTERNATIONAL ADVERTISERS AGENCY

A NAB member station reports that it broadcast $756 worth of advertising for Father Hennepin’s Ointment and the Grand Island Distributing Co., placed through International Advertisers Agency, Niagara Falls, N. Y.

The station says it has received no answer from the agency in response to its statements or letters regarding them, and asks for information from other stations that have carried this business as to whether the agency did pay its bills, or what action had to be taken.

Any information on this subject, sent to NAB, will be forwarded to the inquiring member.

FINANCIAL ADVERTISERS’ MANUAL

The NAB Department of Broadcast Advertising has made arrangements with the Financial Advertisers Association to prepare a complete section on radio advertising to be furnished by them to all their members as a part of their public relations manual.

This association is made up of nearly one thousand banks, savings and loan associations, and similar financial institutions, all of which need and use advertising. Heretofore their manual has con-
tained complete sections on newspaper, outdoor and other media, but not on radio.

Already a wealth of material has been compiled by NAB for inclusion in the radio section, but more can be used. If you have any success stories on the use of radio by local financial institutions, or other data that you think will be helpful, please send it to NAB as soon as possible.

SAVINGS & LOAN REPRINTS AVAILABLE

Through the cooperation of Federal Home Loan Bank Board of Washington, the NAB Department of Broadcast Advertising has secured 500 reprints of a booklet entitled "Radio Advertising by Savings and Loan Associations", containing a variety of informative and helpful material that should assist stations in increasing this form of revenue.

While the supply lasts, copies are available to NAB members free upon request.

TO SELL SATURDAY TIME

A promotion letter by KJBS of San Francisco, pointing out the desirability of Saturday time for radio advertising, should be helpful to all sales managers and salesmen in increasing station revenue. Therefore it is reprinted here:

Saturday is the heaviest shopping day of the week. But 60 to 70% of this shopping is done during the afternoon. The purchases are PLANNED on Saturday morning!

According to a N. Y. State Chamber of Commerce check, ten of New York's largest banks report that Friday is the greatest payroll day of the week. This indicates that people have more available CASH on Saturday!

The 40-hour week has come to mean a 5-workday week for most business concerns. The 5-day week has definitely created an ALL-FAMILY listening audience for Saturday.

1. 55% of all downtown shopping in 16 representative U. S. cities is done on Saturday.

2. Three-quarters of all Saturday grocery sales are made in the afternoon.

3. 21% of large New York department store sales are made on Saturday.

4. 40% of chain grocery sales are made on Saturday in Greater New York.

5. 50% of independent grocery store sales are made on Saturday in Greater New York.

43% of all KJBS accounts are "Saturday-wise", selling new thousands of Monday through Friday workers in addition to the regular, DAILY, daytime listener—A Sunday audience on Saturday at week-day rates!

PER-INQUIRY AND FREE-TIME

Pondrom and Collins Advertising Agency of Dallas, Tex., is endeavoring to secure per-inquiry advertising on behalf of the Crazy Water Crystal Co. Stations are advised to be especially careful of this account, since it was cited in a complaint by the FTC in September of 1940 for "misrepresentation in the sale of Crazy Mineral Water, Crazy Water Crystals and Crazy Fiz". For details of the complaint, see NAB Reports for September 20, 1940, page 462.

Frank R. Steel Associates Advertising Agency of Chicago, is seeking free time on behalf of Princess Pat cosmetics by asking stations to sell lipsticks for 10 cents, and keep the dimes, saying "you can use this account as a bellwether for the sale of other national advertising". The "slow summer months" angle is again stressed. One NAB member commented in reporting this: "Why can't we once and for all stop this kind of racket? If every station would refuse it wouldn't take long."

The American Hotel Association of Washington, D. C., is seeking free spot announcements to promote National Hotel Week. NAB is advised that the association has no funds with which to purchase radio advertising. The association's director stated that newspapers are contributing some publicity in news and feature stories. NAB pointed out that "publicity" in the form of newsworthy items on regular newscasts is one thing, but "free plugs" are something else again, and suggested that local hotels be induced to pay for any announcements used.

Bozell & Jacobs Agency of Omaha, Neb., is seeking per-inquiry advertising for a hay-fever remedy called HAYO, using the angle of "spots that you probably could not sell anyway during July and August."

Rogers & Smith Agency, of Chicago, is seeking free time for Schneider Candy Co., offering to give candy free as prizes to winners of a contest if the advertising time is donated by stations.

"Radio Income Builders", of Des Moines, Ia., have a new approach on their per-inquiry fountain pen deal, not requiring stations now to buy a stock of the pens outright, but charging them an extra fee for handling the orders and mailing the pens direct. Whew!

The Armaund S. Weill Agency of Buffalo, listed in Reports of May 9 as inviting stations to cut rates for Sarchinol Perfumers, explain in answer to a letter from NAB that this was not their intention; that "The reason I put the cost per inquiry in was to show stations what we have done in the past, thus giving them a yardstick to decide whether or not they could produce enough mail to show our cost per inquiry somewhere near this figure, based of course on their card rate." Since then, letters to stations from this agency have stated: "This is not a request to take this account on a cost per inquiry basis. We will pay full card rates if you feel you can produce the response we desire."

Max Goldberg Advertising Agency of Denver, Colo., is asking stations to cut rates for a campaign of 1-minute transcribed announcements to be placed on behalf of the State of Colorado. A form letter from the agency tells each station that its rates as published in Standard Rate & Data are too high, and asks that the local rate be granted. They also want preferred spots, next to network shows or News, "preferably shortly before 6 p. m., at 5:59 if possible, paying the day rate."

In two of the cases cited above, it will be noted that advertising agencies take the angle that in seeking per-inquiry deals, stations would give them "time during the summer months that you couldn't sell anyway." It is that attitude on the part of agencies that NAB objects to.

The psychology is all wrong from the station's standpoint. Who says that radio time cannot be sold during the summer months—during any months? Why should advertising agencies, who derive their living and their jobs from commissions paid by radio stations, undermine confidence in summer radio?

If this attitude is permitted to go unchallenged, the idea will spread and a defeatist attitude will creep into your sales staff—as well as among your advertisers. Tell a salesman often enough that "radio can't be sold in the summer" and he'll begin to believe it—and have a ready-made alibi for failure to work and failure to produce results. Tell it to your prospects often enough and their budgets will go into newspapers or other media that won't permit such defeatism.

NAB suggests that the best answer to such statements is to prove that summer radio can be sold, and to start by refusing to accept chisel deals offered on that basis. Some of these agencies need a few letters from you station men, in addition to those they get from NAB.
RADIO PROGRAM AT AFA CONVENTION

The radio departmental program at the annual AFA convention has been completed for Wednesday morning, May 28. Sponsored by the Sales Managers Division of the NAB, the program includes "Increasing the Tune-In", by Walter J. Neff, President, Neff-Rogow, Inc., New York City; "The Effect on Advertisers of the Monopoly Report", by Russell Place, NAB Counsel; "Chimes and Gongs in Radio Advertising", by Frank E. Pelczein, NAB Director of Broadcast Advertising, and "Highlights of the NAB Convention", an open discussion with questions and answers. Robert S. Peare, Advertising Manager of General Electric Co. and Manager of Broadcasting, WGY, will preside. All radio men are invited.

Daylight Saving

A number of stations requested copies of the summary of the Daylight Saving Time Survey as submitted by the Director of Research at the Wednesday afternoon session at the Convention. This is repeated here for the benefit of all members:

"485 stations or 58% of the industry furnished information requested in the questionnaire. Network affiliated stations account for 73% of the replies and independent stations contributed 27%. Of all network affiliates, 68% replied. Of all independent stations, 45% replied.

"Of the 485 stations replying, 104 reported observance of Daylight Saving Time; 381 reported that their communities did not observe Daylight Saving Time.

"152 or 31.3% reported the attitude of people in their community was favorable to Daylight Saving Time. Unfavorable attitude was reported by 219 stations or 45.2%. Seventeen stations or 3.5% reported the public "on the fence". 97 stations, 20%, did not know.

"91.5% of the stations in communities observing Daylight Saving Time reported the public favorable. From communities not observing Daylight Saving Time, 31.3% of stations reported a favorable public and 45.2% an unfavorable public.

"281 stations reported the necessity for realignment of programs because of Daylight Saving Time. 50% of network affiliates and 12% of independents reported realignment problems.

"Monetary loss resulting from the shift to Daylight Saving Time was reported by 87 stations and amounted to $664,786. Assuming that an adequate sample was represented by the 87 stations, the industry loss is approximately 5 million dollars per year.

"128 stations reported that partial observance of Daylight Saving Time affected their competitive program situation. Of these, 94 reported their competitive position impaired.

"Unsolicited listener reactions were reported by 285 stations. Favorable reaction was received notably when Daylight Saving Time was observed. Unfavorable reactions to stations in areas not observing Daylight Saving Time were predominately complaints because of program schedule changes.

"The suggestions of stations of a solution to the problem—50% want a change from the present set-up; 25% want no change; 27% expressed no opinion. Of 241 stations wanting a change from the existing set-up, 62 stations (26%) want universal Daylight Saving Time; 78 stations (32%) want universal Daylight Saving Time or universal "No Daylight Saving Time"; 33 stations (14%) want universal Daylight Saving Time or radio kept on Standard Time; 51 stations (21%) want radio kept on Standard Time; and 17 stations or 7% want all Daylight Saving Time abolished.

"Summary of the above shows 72% in favor of universal observance of Daylight Saving Time.

"Universal observance of Standard Time is suggested by 7%.

"The idea of keeping radio on Standard Time, regardless of whether Daylight Saving Time is observed in the communities or not, is favored by 21%, and, as an alternative to Daylight Saving Time observance, by 14%.

"Most stations emphasized that the solution to the problem lies in National regulation.

"The three bills in Congress today propose National observance of Daylight Saving Time as a defense measure to be accomplished by Federal regulation. There is no National move to abolish Daylight Saving Time.

"Stations report in various sections that observance of Daylight Saving Time this year missed by extremely narrow margins of vote.

"One California station reported that Daylight Saving Time was defeated at the last election by "the theatrical lobby and a careless vote". It was reported that San Antonio, Texas, missed having Daylight Saving Time by a narrow margin due to the last-minute opposition of night baseball and movie interests.

"Since the Survey was begun, Lexington and Louisville, Kentucky, have adopted Daylight Saving Time, and undoubtedly nearby cities will adopt it. Peoria, Illinois, has Daylight Saving Time this year for the first time, thus further extending the Daylight Saving Time area around Chicago. Indianapolis reported pending legislation for Daylight Saving Time observance. A Wisconsin law prohibiting Daylight Saving Time missed repeal at the last session of the legislature by a vote of one.

Th following resolution was introduced by Willard D. Egolf of Station KVOO, Tulsa, Oklahoma, at the Sales Managers' meeting at the Convention:

"Whereas the Sales Managers of the Radio Industry are charged with the responsibility of selling Radio Time and further seeing that Radio Time is made productive for its purchasers and

"Whereas the observance of Daylight Saving Time in some sections of the United States and its non-observance elsewhere disrupts Radio Time Schedules and

"Whereas it is our opinion that this disruption of Radio Time Schedules is the direct cause of lost radio billing amounting to hundreds of thousands of dollars annually and

"Whereas this disruption of Radio Time Schedules occasions inconvenience to buyer, station and public.

"Therefore, Be It Resolved that all branches of the Radio Industry should cooperate in perfecting a plan whereby the observance of Daylight Saving Time shall have no effect on Radio Time Schedules and whereby 'change of Time' shall be abolished permanently."
ARMY PROGRAM DIRECTOR

Sterling Wright, program director, WSPA, Spartansburg, S. C., advises that Major Jones at Camp Croft is looking for an experienced radio program director or production man who is now in the army. If Major Jones learns where there is one, he will try to get him transferred to Camp Croft.

LEGISLATION

RADIO INCOME TAX

Introduction in the House on Tuesday of a bill (H. R. 4806) by Representative Connery (D-Mass.) to provide a radio-broadcasting tax marks another step in the campaign of the International Allied Printing Trades Council to penalize radio allegedly for causing unemployment in the printing trades. The bill would levy an "amusement" tax of 20 per cent on gross income (radio time sales less agency commission not to exceed 15 per cent) on stations whose income exceeds $500,000, a 15 per cent tax on stations whose income falls between $250,000 and $500,000, and a 10 per cent tax on stations whose income is more than $150,000 and less than $250,000.

A network "or group of stations owned, controlled or operated by substantially the same interests" would be subject to the tax on the network stations as a unit.

The measure has been referred to the Committee on Ways and Means, before which John B. Haggerty, representing the Printing Trades, appeared May 19 and urged special taxation of radio. NAB has laid the pertinent facts before the committee, and will resist any attempts to tax radio stations discriminatorily as against other media.

FEDERAL LEGISLATION

HOUSE

H. R. 4703 (Secrest, D-Ohio) COPYRIGHT—To amend sections 12 and 13 of the Copyright Act of March 4, 1909, to secure the prompt deposit of copyrightable material into the Library of Congress, and prompt registration of claims of copyright in the Copyright Office, and for other purposes. Referred to Committee on Patents.

H. R. 4806 (Connery, D-Mass.)—RADIO TAX—To provide a radio-broadcasting tax. Referred to Committee on Ways and Means.

H. R. 4826 (Kramer, D-Calif.) COPYRIGHT—To amend section 8 of the Copyright Act of March 4, 1909, as amended, so as to preserve the rights of authors during the present emergency, and for other purposes. Referred to Committee on Patents.

SENATE

S. 1518, (Walsh, D-Mass.) COMMUNICATION—To prohibit the use of the mails or other channels of interstate or foreign commerce for the delivery or transmission of any advertisements, solicitation, statement, or other communication wherein the word "olympic" or any of its derivatives is used in such a manner as is likely to deceive the public. Referred to Committee on Interstate Commerce.

S. 1519 (Walsh, D-Mass.) COMMUNICATION—To prohibit the use of the mails or other channels of interstate or foreign commerce for the delivery, transportation, or transmission of any tickets, advertisements, solicitation, statements, or other communications containing false statements or representations as to the amateur character of any event, competition, or spectacle, for the purpose of selling tickets of admission to, or raising funds for the support of such event, competition, or spectacle. Referred to Committee on Interstate Commerce.

SENATE RESOLUTION

S. Res. 113 (White, R-Maine.) COMMUNICATIONS—Authorizing a study of sundry communication problems. Referred to Committee on Interstate Commerce.

STATE LEGISLATION

FLORIDA:

H. 68 (Luckie) PROPAGANDA—RACE—Relating to propaganda inciting race, color or religious hatred. Referred to Committee on Americanism.

H. 977 (Minshall, et al.) FOODS—MISBRANDING—Amending Sec. 15, Chap. 19656, Acts of 1939, relating to the disposal or movement in commerce of adulterated or misbranded foods, drugs, devices and cosmetics; prohibiting false advertising and guaranteeing thereof. Referred to Committee on Public Health.

H. 1038 (Committee on Americanism) RELIGIOUS HOSTILITY—Prohibiting the circulation or publication of statements tending to create hatred, violence or hostility, against persons by reasons of their religious belief. Referred to Calendar.

MASSACHUSETTS:

H. 2427 (Reported on P, D, 144-Con Law) RADIO—SLANDER—Relative to slander by radio.

H. 2432 (Reported on H. 189, 324, 1721) COPYRIGHTED MUSICAL COMPOSITIONS—Requiring the filing with the state secretary of contracts pertaining to the sale, licensing or other disposition of performing rights in copyrighted musical compositions and dramatico-musical compositions, and imposing a tax on the gross profits of such sales, licenses and other dispositions of such rights.

H. 2499 (Offered by Innis as substitute for H. 2427) SLANDER—Relative to slander by radio.

MISSOURI:

H. 593—RADIO ADVERTISING—BEER—LIQUOR—Prohibits radio broadcasts advertising beer or intoxicating liquor.

PENNSYLVANIA:

H. R. 76 (Jefferson) RADIO BROADCASTING—NEGRO SPIRITUALS—Requests radio broadcasting stations to refrain from desecrating negro spirituals. Referred to Committee on Rules.

FEDERAL COMMUNICATIONS COMMISSION

FLY DISCUSSES "MONOPOLY"

At a press conference early this week James Lawrence Fly, FCC chairman said, in answer to a question, that the network monopoly report is all settled, now that the report is out and he said that the Commission has received many offers of cooperation from the broadcast industry.

Answering another question Mr. Fly said that he had seen Senator Wheeler at a telegraph hearing at the Capi-
this week, but that he had not discussed the White resolution with Senator Wheeler.

The Chairman told the newsmen that he is still optimistic about selecting a person to head the new foreign short wave propaganda analysis set up. He said he had had great difficulty in filling the job. However he said he hoped to be able to announce the new head in a few days.

HARRIS ASSISTANT GENERAL COUNSEL

The FCC announced the appointment of Thomas E. Harris as Assistant General Counsel to succeed Joseph L. Rauh, Jr., who is resigning to take a position on the legal staff of the Lease-Lend Administration. Mr. Harris, who is now in the office of the Solicitor General, will join the Commission's staff within a week.

Born at Little Rock, Arkansas, on May 25, 1912, Mr. Harris attended the local schools and was graduated from the University of Arkansas in 1932. He received his legal education at the Columbia Law School, from which he was graduated in 1935 with high honors, having served on the Editorial Board of the Columbia Law Review.

Following his graduation from law school, Mr. Harris was appointed law secretary to Mr. Justice Harlan Fiske Stone of the United States Supreme Court, and served in that capacity for one year. From 1936 to 1937, Mr. Harris was employed at the Washington law firm of Covington, Burling, Rublee, Acheson and Shorb.

From 1937 to 1939, Mr. Harris was employed by the Lands Division of the Department of Justice, where he specialized in appellate work. He was Assistant Chief of the Appellate Section during the last six months of his tenure.

In 1939, Mr. Harris became a member of the staff of the Solicitor General's office, where he is presently employed. He has had extensive appellate experience, including numerous appearances in the Federal Circuit Court of Appeals, and five appearances before the Supreme Court of the United States. His appearances in the Supreme Court included the presentation of the Government's case in two important appeals from decisions of the National Labor Relations Board—the Phelps-Dodge case and the Republic Steel case. He also presented for the Government the important case of Interstate Commerce Commission vs. American Trucking Association, involving the classification of employees of trucking companies.

Mr. Harris is married, and resides in the District of Columbia.

In submitting his resignation, Assistant General Counsel Rauh explained:

"I have only one real regret in making this move. Before leaving the Commission, I should have liked to see the chain broadcasting regulations upheld in the forum of public opinion and in the courts, as I feel confident that they shall be. I should have liked to see them become an integral part of the structure of radio broadcasting in this country. The Chain Broadcasting Report and regulations constitute, to my mind, the most forward-looking step toward the safeguarding of freedom of speech that has been taken for many years."

HILMER ASSISTANT GENERAL COUNSEL

The FCC announced the appointment of Lucien A. Hilmer as Assistant General Counsel in charge of the Broadcasting Division of the legal department. Mr. Hilmer succeeds to the position formerly occupied by Mr. George B. Porter, who resigned in the fall of 1940 to enter private practice. Mr. Hilmer has been in charge of the Broadcasting Division since Mr. Porter's resignation.

A native of New York, Mr. Hilmer is thirty-three years of age. He graduated from Williams College in 1928, and from Harvard Law School in 1931.

From 1931 to 1935 Mr. Hilmer engaged in the private practice of law in New York City. In 1935 he was appointed Assistant Counsel to the Senate Committee on Interstate Commerce, in connection with the Railroad Finance Investigation conducted by that Committee. In 1938 Mr. Hilmer was appointed as Associate Counsel to the Committee, and served in that capacity until his appointment as Special Counsel on the staff of the Federal Communications Commission in 1940.

Mr. Hilmer is married and resides in the District of Columbia.

TELEVISION APPLICATION FORMS

New application forms to expedite the transition of television stations from experimental to commercial basis have been made available by the FCC in preparation for the advent of television commercial service on July 1.

Form 330 covers construction permit for a new commercial television station under the rules and regulations and standards adopted by the Commission's order of April 30.

Form 333 covers construction permit, modification of construction permit, or modification of license for existing television stations, and can be used by the 21 present program stations for furnishing engineering information called for in the April 30 order. Information heretofore filed may be included in the application by reference.

WOC INCREASED FACILITIES

The FCC granted the application of Tri-City Broadcasting Company for a construction permit to install a new transmitter, erect a directional antenna system for nighttime use, move to another site, and to change the operating assignment of its station WOC, at Davenport, Iowa, from 1450 kilocycles, a local frequency, to the regional frequency of 1420 kilocycles, with power increase from 250 watts to 1 kilowatt, unlimited time.

In a Decision and Order (B-136), the Commission holds that operation of WOC under changes brought about by the North American Regional Broadcasting Agreement will not involve objectionable interference. However,
the grant is conditional upon WOC's submitting proof of performance of its proposed directional antenna system.

NEW CALIFORNIA STATION

On the basis of evidence adduced at public hearing, the FCC proposes to grant the application of the Broadcasting Corporation of America for a radio station at Riverside, Calif., and, because of mutually exclusive interference, deny the application of the Riverside Broadcasting Company for a station at the same place.

There is no broadcast station in Riverside at present. The Broadcasting Corporation of America seeks authority to use 1420 kilocycles with 1 kilowatt power on unlimited time. The Riverside Broadcasting Company is applicant to use 1420 kilocycles with 250 watts power, unlimited time. Their simultaneous operation is impracticable.

The station proposed by the Broadcasting Corporation of America would render primary service to approximately 152,900 persons in the daytime and to some 114,600 persons at night, whereas the other applicant proposes primary service to about 90,400 persons by day and 33,500 by night.

On the basis of such showing, the Commission, in its Proposed Findings of Fact and Conclusions (B-137), concludes:

"1. Simultaneous operation of the stations proposed by the applicants herein would result in prohibitive interference and the granting of one application would necessarily preclude the granting of the other.

2. The station proposed in the application of the Broadcasting Corporation of America would render primary service to approximately 62,500 more persons during the day and 81,300 more persons during nighttime hours than would the station proposed in the application of the Riverside Broadcasting Company.

3. The applicant, Broadcasting Corporation of America, is legally, technically, financially, and otherwise qualified to construct and operate a radio-broadcast station as proposed.

4. The granting of the application of the Broadcasting Corporation of America (Docket No. 5780) subject to the selection of a satisfactory transmitter site and complete radiating system, will serve public interest, convenience and necessity; the application of the Riverside Broadcasting Company (Docket No. 5890) should be denied."

JACKSONVILLE, ILL., BROADCAST GRANT

The FCC adopted and made final its Proposed Findings of Fact and Conclusions (B-130) to grant Hobart Stephenson, Milton Edge and Edgar J. Korsmeyer, a partnership, doing business as Stephenson, Edge and Korsmeyer, a construction permit for a broadcast station at Jacksonville, Ill., to operate on 1150 kilocycles, with 250 watts power, unlimited time. Helen L. Walton and Walter Bellatti, another partnership, had applied for the same facilities. They are subject to change.

Tuesday, May 27

KMA—May Broadcasting Company, Shenandoah, Iowa.—Renewal of License, 950 kcs; 1 kw night; 5 kw day; unlimited time.

Wednesday, May 28

WRDO—WRDO, Incorporated, Augusta, Maine.—Renewal of License, 1370 kcs; 100 w; unlimited time.

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

June 2

Hearing to be held in Pensacola, Florida, beginning June 2 and continued thereafter in Panama City, Florida and Ocala, Florida.
FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KGEI—General Electric Co., Treasure Island, San Francisco, Calif.—Granted modification of construction permit for international broadcast station to move transmitter to near Belmont, Calif.; granted extension of completion date to July 1, only (B5-MPIB-25).

WHEB—Granite State Broadcasting Corp. (assignor), WHEB, Inc. (assignee), Portsmouth, N. H.—Granted consent for assignment of license from Granite State Broadcasting Corp., licensee of Station WHEB, to WHEB, Inc. (assignor), agrees to sell and assign all of the station property to assignee for a consideration of $6,000; in addition assignee will pay to transferor for surrendering his stock (80% of the common voting stock) for cancellation, and $6,400 representing advances to the assignor for which he holds promissory notes. (B2-PH-34).

WBLJ—H. C. & T. W. Kenemer, d/b a Kenemer Bros. (transferees), J. B. Roach (transferor), Dalton, Ga.—Granted consent to transfer control of corporation, Dalton Broadcasting Corp., licensee of broadcast station WBLJ, from J. B. Roach to H. C. and T. W. Kenemer, a partnership doing business as Kenemer Bros. (59% of issued and outstanding capital stock for a cash consideration of $10,000); station operates on 1520 kc; 250 watts; unlimited time (B3-TC-248).

WJBR—J. C. Lee & E. W. Lee (Lee Bros. Broadcasting Co.), San Bernardino, Calif.—Application for construction permit to install new transmitter and antenna and increase power from 100 watts night and day to 250 watts night and day; 1450 kc; unlimited time (B4-P-2986).

WKB—WKY Radiophone Company, Oklahoma City, Okla.—Granted construction permit for approval of transmitter site for new standard broadcast station to operate on 1520 kc; area 6.298 square miles (B2-PH-34).

Edward Tom O’Brien, David Shepard, Howard S. Johnson, & John W. Boeker, d/b a as Brainerd-Bemidji Broadcasting Co., Brainerd, Minn.—Application for construction permit for new standard broadcast station to operate on 1550 kc, 1 KW, unlimited time; exact transmitter and studio sites to be determined by Commission’s approval (B4-P-3008).

WQX—J. W. Boler, d/b a as Brainerd-Bemidji Broadcasting Co., Brainerd, Minn.—Application for construction permit for new standard broadcast station to operate on 1550 kc, 1 KW, unlimited time; exact transmitter and studio sites to be determined by Commission’s approval (B4-P-3008).

Orange Broadcasting Corp., Orange, Tex.—Application for construction permit for new standard broadcast station to operate on 1600 kc, 1 KW, unlimited time (B3-P-3042).

The Gazette Company, Cedar Rapids, Iowa.—Application for construction permit for new standard broadcast station to operate on 1600 kc, 5 KW night and day, using directional antenna for nighttime use and nondirectional daytime (B4-P-2281). Above three applications to be heard at same time.

Homer Rodeheaver, Winona Lake, Ind.—Application for construction permit for new standard broadcast station to operate on 1180 kc, 1 KW daytime only (B3-P-3114).

MISSISSIPPI

WBR—Birmingham Broadcasting Co., Inc., Birmingham, Ala.—Granted modification of construction permit (B3-P-2952, with authorization of increase in power and installation of directional antenna for nighttime use) for changes in directional antenna on 960 kc, under NARBA (B3-MP-1292).
WMRF—Lewistown Broadcasting Co., Lewistown, Pa.—Granted modification of construction permit (Bl-P-2977 authorizing a new station) for installation of new transmitter, changes in antenna system, move of studio from Lewistown Heights, to 50 Market St., Lewistown, Pa., and extension of completion date to 180 days after grant (B2-MP-1276).

WTSP—Syracuse Broadcasting Co.—Granted modification of construction permit (Bl-P-2933), which authorized installation of new transmitter, changes in antenna, change frequency and increase power to change type of transmitter and extend commencement date to 90 days after grant and completion date to 90 days thereafter, and requesting 1380 kc. under NARB (B3-MP-1213).

WWNY—The Brockway Company, Watertown, N. Y.—Granted license to cover construction permit (B1-P-937) for new station (B1-L-1388). Also granted authority to determine operating power by direct measurement of antenna input (B1-Z-829).

WCSH—Congress Square Hotel Co., Portland, Me.—Granted authority to determine operating power by direct measurement of antenna power.

WCOV—Capitol Broadcasting Co., Inc., Montgomery, Ala.—Granted modification of construction permit for change in frequency from 1370 to 1240 kc. Also granted authority to determine operating power by direct measurement of antenna power on 1370 kc. under NARB (B1-L-1372).

WCHS—Superior Broadcasting Service, Inc., Carthage, Ill.—Granted special temporary authority to rebroadcast a 15-minute program, plane to ground, on May 8, 1941, in conjunction with the Air Corps Recruiting campaign only.

KGKB—East Texas Broadcasting Co., Tyler, Texas.—Granted authority to determine operating power by direct measurement of antenna power on 1370 kc. under NARBA (B4-Z-802).

KPMF—M. C. Reese, Phoenix, Ariz.—Granted authority to determine operating power by direct measurement of antenna power on 1300 kc. under NARBA (B5-Z-766).

KDNJ—Harwell V. Shepard, Denton, Texas.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-853).

KGNO—The Dodge City Broadcasting Co., Inc., Dodge City, Kans.—Granted authority to determine operating power by direct measurement of antenna power on 1370 kc. under NARBA (B5-Z-766).

KGKY—Hilliard Co., Scottsbluff, Neb.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-825).

KJUL—Don Lee Broadcasting System, Los Angeles, Calif.—Granted special temporary authority to operate a minimum of eight and one-half hours daily for the period May 19, 1941, to not later than July 16, 1941.

KDNT—Harwell V. Shepard, Denton, Texas.—Granted authority to determine operating power by direct measurement of antenna power on 1370 kc. under NARB (B5-Z-766).

KJUX—University of Minnesota, Minneapolis, Minn.—Granted authority to determine operating power by direct measurement of antenna power on 1370 kc. under NARB (B5-Z-766).

KGOD—The Dodge City Broadcasting Co., Inc., Dodge City, Kans.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-816).

KGNO—The Dodge City Broadcasting Co., Inc., Dodge City, Kans.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-816).

KJF—KJF, Inc., Walla Walla, Wash.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-820).

KGNO—The Dodge City Broadcasting Co., Inc., Dodge City, Kans.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-846).

KJUS—KJUS, Inc., Walla Walla, Wash.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-830).

KGI—KGI, Inc., Scottsbluff, Neb.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-830).

KGO—KGO, Inc., San Francisco, Calif.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-816).

KJO—KJO, Inc., Walla Walla, Wash.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-830).

KGO—KGO, Inc., San Francisco, Calif.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-816).

KFI—KFI, Inc., Los Angeles, Calif.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-802).

KCOAM—The Pittsburgh Broadcasting Co., Inc., Pittsburgh, Pa.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-838).

May 23, 1941 — 461
KWAT—Midland National Life Ins. Co., Watertown, So. Dak.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-526).

KPHO—Ariz.—Granted license to cover construction permit (B5-P-3092, which authorized installation of new transmitter.) (B5-L-1353).

WHN—Marcus Loew Booking Agency, New York City.—Granted modification of construction permit (B1-P-2899, for new transmitter, directional antenna day and night use, change in power, and move of transmitter) for authority to install new transmitter, and make changes in antenna (B1-MP-1289).

KORN—Nebraska Broadcasting Corp., Fremont, Neb.—Granted modification of license to move studio from 6th and Broad St. to Pathfinder Hotel, to transmitting location at East 16th St., Fremont, Neb. (B4-ML-1063).

W4PD—John Lord Booth, Detroit, Mich.—Granted special temporary authority to operate on RCA, 1 kw, transmitter on 14900 kc., and a temporary simple turnstile antenna having power ratio of .7 with the 1 kw transmitter for a period not to exceed 60 days, pending completion of construction in accordance with the construction permit.

Jewel Lee Noble, E. Francis Egleston, M.D., and James W. Bonner, d/b as Physicians and Surgeons Emergency Radio Call Service, San Francisco, Calif.—Granted motion for consideration of hearing on application for renewal of license from May 16 to May 27, 1941 (B4-R-531).

WGN—WGN, Inc., Chicago, Ill.—Refereed to Commission for consideration petition to intervene and to enlarge issues, filed by WGN, Inc., Chicago, Ill., in re hearing on application (B5-ML-1355) for a series of weekly wrestling matches from Vancouver, B.C., on May 2, 9, 16, 23 and 30, 1941, in order to broadcast over Radio Station KFAR.

KWLC—Luther College, Decorah, Iowa.—Granted modification of construction permit (B4-P-3003), which authorized change of frequency, increase in power, changes in hours of operation, installation of new transmitter and move) for 1240 kc. under NARBA, and extension of commencement date to 30 days after grant and completion date to 30 days thereafter (B4-MP-1257).

WPAR—Ohio Valley Broadcasting Corp., Parkersburg, W. Va.—Granted modication of construction permit (B2-P-2700 for new transmitter and increase in power from 100 to 250 watts) for new antenna, new transmitter, move of transmitter to North Parkersburg-Wheeling Highway, and requesting 1450 kc. under NARBA; extension of commencement date to 30 days after grant and completion date to 180 days thereafter (B2-MP-1211).

WBAL—WBAL Broadcasting Co., Baltimore, Md.—Granted modification of construction permit (B1-P-2200, which authorized installation of new directional antenna for night use, change in hours of operation, increase in power and move of transmitter) for changes in directional antenna on 1099 kc. under NARBA, and extension of completion date to 180 days after grant (B1-MP-1235).

WDSU—WDSU, Inc., New Orleans, La.—Granted modification of construction permit (B5-P-2923, which authorized installation of new transmitter, move of transmitter, increase in power, and installation of directional antenna for day and night use) for changes in directional antenna on 1286.25 kc. under NARBA (B1-MP-1371).

WEOA—Evansville on the Air, Inc., Evansville, Ind.—Granted license to cover construction permit (B4-P-3079) which authorized move of transmitter (B4-L-1351).

WAIM—Wilton E. Hall, Anderson, S. C.—Granted license to cover construction permit (B3-P-2935, for installation of new transmitter and antenna, and increase in power (B-3-L-2935).

KLS—Warner Brothers, Oakland, Calif.—Granted license to cover construction permit (B5-P-2826), which authorized increase in power, installation of new transmitter, and changes in antenna; 1310 kc., 1 kw, unlimited time (B5-L-1379). Also granted authority to determine operating power by direct measurement of antenna power (B4-MP-824), which authorized changes in equipment, increase in power, and 1340 kc. under NARBA (B4-L-1373).

WCLS—WCLS, Inc., Joliet, Ill.—Granted license to cover construction permit (B4-MP-824), which authorized changes in equipment, increase in power, and 1310 kc. under NARBA (B4-L-1375).

WHB—WHB Broadcasting Co., Kansas City, Mo.—Granted construction permit to install a new transmitter (B4-P-3160).

KHM—The Courier-Post Publishing Co., Hannibal, Mo.—Granted modification of construction permit (B4-P-1011, which authorized new antenna) for approval of new transmitter, site, studio and antenna; 1340 kc. under NARBA; 250 watts, unlimited time (B4-MP-1256).

Minn. Broadcasting Co., Minneapolis, Minn.; WHB Broadcasting Co., Kansas City, Mo.—The Commission on its own motion, continued the hearing now scheduled for May 19 on these applications, until June 2, 1941.

KFB1—The Farmers and Bankers Broadcasting Corp., Wichita, Kansas.—Granted modification of construction permit (B4-MP-896, which authorized decrease in power, change in hours of operation, installation and directional antenna for night use) for changes in directional antenna on 1070 kc. under NARBA (B4-MP-1286). Also granted authority to determine operating power by direct measurement of antenna power (B4-L-1360). Also granted license to cover construction permit (B4-P-3008) for new transmitter; 1 kw, unlimited time, directional antenna for night use; 1070 kc.; 1 kw night, 5 kw LS, unlimited time, DA at night (B4-L-1393).

WXVV—Allen B. Dumont Labs., Inc., New York City.—Granted license to cover construction permit for new television station to operate at 1381 kc., 1 kw, unlimited time (B5-L-1383).

WXTV—Midnight Sun Broadcasting Co., Fairbanks, Alaska.—Granted special temporary authority to operate a 40-watt Lear aircraft transmitter Type UT-6, on 19862.5 kc. for a 15-minute test period on May 6, 1941, in connection with broadcast to be made from Fairbanks to Seattle and Fairbanks over Radio Station KFAR.

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Denied request for special temporary authority to operate specified limited evening hours from 8:30 p.m. to 10 p.m., EST, on May 2, 9, 16, 23 and 30, 1941, in order to broadcast a series of wrestling matches from Vancouver Bar—racks only.

KAWM—A. W. Mills, Gallup, N. M.—Granted extension of special temporary authority to remain silent for the period ending in no event later than May 30, 1941, pending action on installation of new equipment.

WTBO—Associated Broadcasting Corp., Cumberland, Md.—Granted special temporary authority to operate from 8:15 p.m., EST, to conclusion of Americanization Program only on May 6, 1941.

WSBT—the South Bend Tribune, South Bend, Ind.—Granted extension of special temporary authority to operate limited time on 960 kc., 250 watts night, 500 watts during the day, for local use only during the day, pending action on extension of temporary license.

W2XMN—Edwin H. Armstrong, Alpine, N. J.—Granted extension of special temporary authority to operate an additional transmitter located at Alpine, N. J., on 13 mc, with a power not exceeding 1 kw, using frequency modulation for a period of 30 days beginning on May 1, 1941 and ending no later than June 9, 1941, in order to conduct further experiments on adjacent channel operation of high frequency broadcast stations and to demonstrate such operation to certain engineering committees of the Radio, Mag. Assn. (B5-L-1374).

WLO—Alvin L. Jones, Black River Falls, Wis.—Granted special temporary authority to rebroadcast program...
from Navy plane, as part of show in connection with Naval Aviation Week, Grosse Ile Naval Reserve Airport, from 11:30 a. m. to 12:30 p. m. on May 10, 1941, only.

WWJ—The Evening News Assn., Detroit, Mich.—Granted special temporary authority to rebroadcast program from SNJ Navy, June 17 on May 10 or 11, 1941, only.

WTAM—National Broadcasting Co. Inc., Cleveland, Ohio.—Granted special temporary authority to rebroadcast program originating in U. S. Navy plane flying in vicinity of U. S. Aviation Base, Grosse Ile, Detroit, between 2 and 2:30 p. m., EST, May 10, 1941.

WOSU—Ohio State University, Columbus, Ohio.—Granted special temporary authority to transcribe fifteen-minute programs to be sent to and broadcast by Government Broadcasting stations TGWA, TGWB, TGWC, Guatemala, Central America.

W4SB—The Yankee Network, Inc., Boston, Mass.—Granted special temporary authority to rebroadcast frequency modulation programs of Station W1KPW for a period ending not later than June 30, 1941.

W39B—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to operate frequency modulation station commercially on 139000 kc., 1000 watts, special emission for frequency modulation, using the transmitter of high frequency experimental station W1XER at Summit of Mount Washington, Sargent's Purchase, N. H., for period beginning May 18, 1941 to not later than June 16, 1941, pending completion of construction (Permit No. B1-PH-13).

WBPA—The National Life & Accident Insurance Co., Inc., Nashville, Tenn.—Granted special temporary authority to use an experimental 2kw FM transmitter on 12500, 125200, 159300, 161190 kc., in order to relay program from Dedication Race, Iriquois Trac near Nashville May 10, 1941.

W39B—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to rebroadcast programs of high frequency station W1XOR for the period May 18 to not later than June 16, 1941.

Natchez Radio Corp., Natchez, Miss.—Denied petition of Natchez Radio Corp., requesting (1) reconsideration and grant without hearing application of Natchez Radio Corp. for construction permit for new station at and in the vicinity of Natchez and designate for hearing the application of Natchez Broadcasting Co. for construction permit for new station.

Metropolis Company, Ocala, Fla.; Bay County Publishers, Inc., Panama City, Fla.—Denied motions for immediate specification of issues, fixing date and place of hearing, and for other relief. (Dockets Nos. 6092 and 6093.)

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Denied petition for reconsideration and grant without hearing application for construction permit to change transmitter and site, change frequency from 1200 kc. to 1410 kc., increase power from 250 watts to 1 kw, install directional antenna for night use.

Head of the Lakes Broadcasting Co., Duluth, Minn.—Placed in pending files pursuant to Order No. 79, application for construction permit for new FM station to operate on 41500 kc., with coverage of 2754 square miles (B4-PH-74).

Contra Costa Broadcasting Co., Richmond, Calif.—Placed in pending file pursuant to Order No. 79, application for construction permit for new standard broadcast station to operate on 1210 kc., 500 watts day and night, limited to WCAU (B3-P-2964).

KTHS—Hot Springs Chamber of Commerce, Hot Springs Nat'l Park, Ark.—Granted special temporary authority to operate from 7 to 7:30 p. m., CST, May 29, in order to broadcast program of First Annual Report to Nation of the National Defense Program only (B3-S-426).

WCAV—So. Dak. State School of Mines, Rapid City, S. Dak.—Granted special temporary authority to remain silent from June 1 to September 15, in order to observe summer vacation (B4-S-649).

W47A—The Capitol Broadcasting Co., Inc., Schenectady, N. Y.—Granted special temporary authorization to operate with main studio at the transmitter of FM broadcast station W47M for a period of 30 days from June 1, pending completion of STL transmitter at main studio specified in construction permit.

KTHS—Hot Springs Chamber of Commerce, Hot Springs Nat'l Park, Ark.—Granted authority to determine operating power by direct measurement (B3-Z-868).

WMAS—WMAS, Inc., Springfield, Mass.—Granted authority to determine operating power by direct measurement (B1-Z-844).

KDLR—KDLR, Inc., Devils Lake, N. Dak.—Granted authority to determine operating power by direct measurement (B4-Z-849).

KOCA—Oil Capitol Broadcasting Assn., Kilgore, Tex.—Granted authority to determine operating power by direct measurement (B3-Z-851).

KHBI—Okmulgee Broadcasting Corp., Okmulgee, Okla.—Granted authority to determine operating power by direct measurement (B3-Z-861).

KRBA—Red Lands Broadcasting Assn., Lufkin, Texas.—Granted authority to determine operating power by direct measurement (B3-Z-857).

WORLD—Spartanburg Advertising Co., Spartanburg, S. C.—Granted authority to determine operating power by direct measurement (B3-Z-865).

KTBC—State Capitol Broadcasting Assn., Inc., Austin, Tex.—Granted authority to determine operating power by direct measurement (B3-Z-848).

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Granted modification of construction permit (B1-P-2704, which authorized new transmitter, change in power and time of operation, etc.), for extension of completion date to 7-25-41 (B1-MP-1291).

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Granted authority to install new automatic frequency control equipment (B4-221).

WBIR—J. W. Birdwell, Knoxville, Tenn.—Granted license to construct permission for new station; 1210 kc., 250 watts, unilateral time (B4-L-1326). Also granted authority to determine operating power by direct measurement of antenna power (B3-Z-662).

KBIZ—J. D. Flavey, Ottumwa, I. lowa.—Granted license to construct permission for new station to operate on 1210 kc., 1000 watts, unilateral time (B4-L-1392). Also granted authority to determine operating power by direct measurement of antenna power (B4-Z-847).

WNEL—Juan Pira, San Juan, P. R.—Granted license to cover construction permit (B-P-2762), which authorized changes in equipment, antenna changes, increase in power to 1 kw, move of transmitter, and specifying 1320 kc. under NARBA (B-L-1397).

KRLC—H. E. Studebaker, Lewiston, Ida.—Granted license to cover construction permit (B5-P-3020 which authorized changes in equipment and to specify 1100 kc. under NARBA). (B5-L-1395). Also granted authority to determine operating power by direct measurement of antenna power on 1100 kc. under NARBA (B3-Z-864).

WQRX—Interstate Broadcasting Co., Inc., New York City.—Granted license to reinstate Bl-L-1344 to use old 1 kw Composite transmitter as auxiliary transmitter for emergency use only (B1-L-1391).

KALW—Board of Education of the San Francisco Unified School Dist., San Francisco, Calif.—Granted modification of construction permit (B5-PED-14, which authorized a new non-commercial educational broadcast station) for extension of completion date to August 14/41 (B3-MPED-5).

WNBI—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate International station WNBI on frequency 17780 in order to permit simultaneous operation of WNBI and WRCB on frequencies 17780 and 9670 kc., for the period May 16 to June 14.

WRCB—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate on 9670 kc., with effective power of 100 kw using separate power amplifiers feeding separate directional antennas for the period May 20 to June 19, 1941.

W55M—The Journal Company (The Milwaukee Journal) Milwaukee, Wis.—Granted extension of special temporary authority to operate frequency modulation station commercially on 45500 kc., 1 kw, special emission for FM, with transmitter located at 606 West Wisconsin Ave., Milwaukee, for the period May 29 to June 29, subject to apologies and regulations which may be adopted by the Commission.

WRDW—Augusta Broadcasting Co., Augusta, Ga.—Granted motion for indefinite continuance of hearing now scheduled for May 29, on application to change frequency, increase power and operating time.
Trent Broadcast Corp., Trenton, N. J.—Granted petition for leave to amend application for new station to request some other frequency than 12,500 kc. and application removed from hearing docket.

KDAS—KDAS Broadcasting Station, Inc., Philadelphia, Pa.—Granted motion to continue hearing for a period of 30 days from May 26 on applications of WCAP, WTJN for renewal of licenses; and application of WDAS for change in frequency, increase in power, etc.

Park City Broadcasting Corp., Park City, Utah.—Referred to the Commission to intervene in the hearing on application of WHB, Kansas City, Mo., to change frequency, etc. Also motion for continuance of hearing now scheduled for May 19.

WKZO—WKZO, Inc., Kalamazoo, Mich.— Granted petition for leave to amend application to change type of equipment, in re construction permit to increase power to 5 kW; application to remain on docket.

God's Bible School and College, Cincinnati, Ohio.—Granted petition for indefinite continuance of oral argument now scheduled for May 22, in re applications of applicants and Stephen P. Scollo, Edge & Korsmeyer, for new station in Jacksonville, Ill.

Fairfield Broadcasting Corp., Lancaster, Ohio.—Granted petition for leave to amend application for construction permit for new station, to request 880 instead of 820 kc., power 1 kW instead of 250 watts, and to notify another transmitter. Application removed from hearing docket.

KOMA—KOMA, Inc., Oklahoma City, Okla.—Denied motion to reconsider and grant without a hearing the application of KFEQ, St. Joseph, Mo., to increase power to 5 kW.

WTAQ—WTAQ, Inc., Sponsor, Inc., Green Bay, Wis.—Granted request for discontinuance of application for construction permit of Station WTAQ, in reapplications of applicants and Stephenason, Edge & Korsmeyer, for new station in Jacksonville, Ill.

KFAB—KFAB Broadcasting Co., Lincoln, Neb.; WBT—Columbia Broadcasting System, Inc., New York City, N. Y.—Granted request for extension of temporary license to operate on time previously utilized by station WMBQ, and an extension of the effective date of Commission order of December 5, 1938, for period of 60 days from May 22.

FM APPLICATIONS

W71RF—Rockford Broadcasters, Inc., Rockford, Ill.—Modification of construction permit (B4-PH-56) for change in type of transmitter and to make changes in antenna system. Population given as 278,000.

NEW—Globe Democratic Publishing Co., St. Louis, Mo.—Construction permit for a new high frequency broadcast station to be operated on 41,700 kc., population, 1,858,665; Coverage, 15,850 square miles.

WAK—May Broadcasting Co., Mobile—Construction permit for a new relay broadcast station to be operated on 1616, 2900, 2190, 2930 kc., power 25 watts, A-3 emission, Mobile 150 mile radius, Shenandoah, Iowa.

W59—The Yankee Network, Inc., Boston, Mass.—Modification of construction permit (B1-PH-13) for a new high frequency broadcast station, for extension of commencement and completion dates from 12-31-40 and 6-30-41 to 1-1-42, 6-30-42 days after grant and six months thereafter, respectively.

NEW—The Outlet Co., Providence, R. I.—Construction permit for a new high frequency broadcast station to be operated on 41,500 kc., coverage, 16,370 square miles; population, 6,263,346. Amended: To change frequency to 48,500 kc., coverage to 4,840 square miles, population to 1,556,495, make changes in antenna system and move transmitter.

W63C—National Broadcasting Co., Inc., Chicago, Ill.—Modification of construction permit (B4-PH-31) for a new high frequency broadcast station, requesting changes in antenna system and change in type of transmitter. Population, 4,869,900.

W57A—General Electric Co., Albany County, N. Y.—Modification of construction permit (B1-PH-19) for a new high frequency broadcast station, requesting change in frequency from 43,500 kc., special emission for frequency modulation, 1000 watts, unlimited hours.

NEW—Interstate Broadcasting Co., Inc., New York, N. Y.—Construction permit for a new high frequency broadcast station, for extension of commencement and completion dates from 12-31-40 and 6-30-41 to 60 days after grant and six months thereafter, respectively.

Population given as 278,000.

W65H—WDRC, Inc., Meriden, Conn.—Modification of construction permit (B4-PH-35) for a new high frequency broadcast station, requesting change in frequency to 45,500 kc., coverage to 13,944 square miles, change antenna system and increase power of transmitter. Population: 1,903,661.

NEW—Interstate Broadcasting Co., Inc., New York, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 18,700 kc., coverage, 8,550 square miles; population, 10,817,455.

TELEVISION APPLICATIONS

W3XAU—WCAU Broadcasting Co., Philadelphia, Pa.—Modification of construction permit (B2-PVB-47) as modified for a new television broadcast station, requesting extension of completion date from 7-28-41 to 7-28-42.

MISCELLANEOUS APPLICATIONS

WELB—WAVE, Inc., Mobile—Construction permit to install a new transmitter and increase power to 500 watts.

NEW—Board of Education, City of Chicago, Chicago, Ill.—Construction permit for a new non-commercial educational broadcast station to be operated on 12,500 kc., special emission for frequency modulation, 1000 watts, unlimited time.

NEW—Merced Broadcasting Co., Portable-Mobile—Construction permit for a new relay broadcast station to be operated on 1616, 2900, 2190, 2930 kc., power 25 watts, A-3 emission, Mobile 150 mile radius, Shenandoah, Iowa.
FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Lecithin Company and others—Five corporations occupying a dominant position in the production and importation of lecithin (a natural organic substance used in the manufacture of food, candy, rubber, leather and petroleum products), and certain of their officers, have been ordered to cease and desist from practices held to be in restraint of trade. The respondent companies are: American Lecithin Co., Elmhurst, Long Island, N. Y.; Ross & Rowe, Inc., New York; The Glidden Co., Cleveland; Archer-Daniels-Midland Co., Minneapolis, and American Lecithin Corporation, Bound Brook, N. J., and the two foreign companies, together with certain of their officers, on December 5, 1941, entered into an agreement providing, among other things, for the formation of a new corporation, American Lecithin Co., an Ohio corporation, to which various patents held by them should be assigned and to which the lecithin-producing respondents would sell their output. Control and management of the new corporation was to be vested in the organizers, each agreeing to refrain from competing with patents transferred to the new corporation or subsequently obtained by it. The foreign corporations were not to export lecithin to the United States or Canada and the United States parties were not to export abroad. The respondents carried out the provisions of their agreement.

American Lecithin Corporation and the other respondents, through it, have attempted to further monopolize trade in lecithin by_disparaging competitors' products, by using patents in bad faith to induce purchasers to buy the respondents' lecithin, by misrepresenting labeling requirements of the United States Government and by other means.

The Commission order is directed against American Lecithin Co. and Joseph Elchberg, Armand May, Whitney H. Eastman, Clifton M. Kolb, Richard H. Horsburgh, and Adrian D. Joyce, its officers; Ross & Rowe, Inc., The Glidden Co., Archer-Daniels-Midland Co. and Shreve Archer, its president; and American Lecithin Corporation, a Delaware corporation. Individually or in combination, they are ordered to cease and desist from:

1. Using unlawfully any patent or patents which may be held by the respondents or any of them concerning the use, production or processing of lecithin to divert trade in lecithin to themselves or away from competitors;
2. Threatening to sue agents, jobbers or sellers or other distributors of competitors' lecithin for infringement of patents held by the American Lecithin Co., or any of them, not in good faith, to enforce any patent rights which they may have, for the purpose of compelling or inducing such purchasers or prospective purchasers not to purchase lecithin from competitors; or
3. Representing that lecithin sold by the American Lecithin Company or by Ross & Rowe, Inc., or by any of the other respondents, is recommended for use by the Food and Drug Division of the United States Department of Agriculture, or any other branch of the Federal or State Governments, if in truth and in fact such is not the case;
4. Unlawfully using any patent or patents held by them or any of them in such a manner as to obtain income from the sale of unpatented lecithin rather than from the monopoly expressly granted by the patent or patents;
5. Combining, conspiring, agreeing or cooperating between themselves or any one or more of them, or with others, to eliminate, restrain or lessen competition between them in the sale of lecithin or lecithin products, by employing a common selling agency, or otherwise; provided, that nothing herein shall prevent the respondents from entering into or carrying out lawful arrangements for the exercise of rights under patents;
6. Carrying out or entering into any agreement or doing any act in pursuance of an agreement or understanding, that the American Lecithin Co. or any one of the respondents connected with the production or sale of lecithin in the United States should refrain from selling or exporting lecithin to foreign countries;
7. Entering into or carrying out any agreement or understanding with foreign producers or sellers of lecithin for the purpose of lessening, restricting or eliminating competition of lecithin into the United States or the territories thereof;
8. Carrying out or entering into any agreement or understanding to refrain from challenging or contesting patents, rights or privileges concerning the production or use of lecithin or lecithin products held by any of them jointly or individually, which said respondents are not legally precluded from challenging or contesting;
9. Entering into or carrying out any agreement or understanding to refrain from challenging or contesting patents, rights or privileges concerning the production or use of lecithin or lecithin products held by any of them jointly or individually, which said respondents are not legally precluded from challenging or contesting;
10. Combining, conspiring or agreeing to cooperate, or enter-
ing into or carrying out any contracts to restrain trade or commerce in chicory or lecithin products among the several States or with foreign nations;

12. Monopolizing or attempting to monopolize or combine or conspire with any other person or persons to monopolize any part of the trade or commerce in chicory or lecithin products among the several States or with foreign nations. (4473)

According to the complaint, the respondent designated certain rugs closely resembling true Oriental rugs in appearance by the names "Imperial Saroukan," "Iran Kashan," and "Imperial Ardavan.

Pointing out that there are true Oriental rugs known as "Sarouk," "Kashan," "Ardabil," and "Ardavan" and that "Iran" is the modern name for Persia, a place of origin of true Oriental rugs, the complaint alleges that the respondent's use of the names "Imperial Saroukan," "Iran Kashan," and "Imperial Ardavan" tends to create the mistaken impression that the rugs so designated are in fact genuine Oriental rugs when in fact they are woven on power looms in the United States, are not made by hand, and the individual threads are not knotted in the distinctive manner of the true Oriental rug.

According to the complaint, the respondent's rugs do not possess all the characteristics of true Oriental rugs but do closely simulate in appearance as to be indistinguishable from them by a large portion of the purchasing public. (4499)

J-IEee Distributing Company—A complaint has been issued charging Louis Ulrich, trading as J-Bee Distributing Co., and Julius Weinelt, manager of the business, 37 West 26th St., New York, with the use of lottery methods in the sale of watches, cameras, clocks and other merchandise. "Pull card" devices are used, according to the complaints.

Charging that the respondents' practices have been contrary to Federal Government public policy and the Federal Trade Commission Act, the complaint grants the respondents 20 days for filing answer. (4500)

The complaint charges that through certain livestock and dairy papers and other printed matter the respondents disseminated advertisements representing that their product "Man.Amar," a feed or feed supplement, when consumed by cattle or other livestock, will eliminate and prevent mastitis, eliminate practically all breeding disorders, and eliminate the necessity of veterinary services within six months.

According to the complaint, the respondents also represented that Man.Amar will cure Bang's disease, eliminate goitre, cause all serious reproduction troubles to disappear, and cause cows to show more profitable reproduction records; that it contains beneficial ingredients lacking in other livestock feeds, and will improve the health, growth, production and reproduction of all livestock and poultry.

The complaint alleges that Man.Amar is practically the equivalent of lard as a feed, and that a pound of the respondent's product will produce 12 more cups of coffee than will a pound of such other brands, that the oil in coffee imparts flavor and goodness, and that because of an unusual amount of coffee oil in the respondent's product it has more flavor and goodness than other popular brands, when such are not the facts.

The complaint charges that the respondent represented its coffee as being blended according to a secret formula which cannot be duplicated, when in fact the blend of its coffee could be duplicated by capable and experienced coffee blenders. According to the complaint, the successful blending of coffee is not dependent on the existence of any secret formula but rather upon the ability of the coffee blender to interpret the taste effects of individual coffees and mix such coffees in proper proportions to achieve the best results obtainable. (4498)

James J. Reiss Company, Inc.—A complaint has been issued charging James J. Reiss Co., Inc., 417-423 Decatur St., New Orleans, with the use of lottery methods in the sale of candy.

The complaint alleges that the respondent has sold to wholesale dealers, jobbers and retail dealers certain assortments of candy so packed and assembled as to involve the use of a game of chance, gift enterprise or lottery scheme when the candy is sold and distributed to consumers.

Charging that the respondent's sales plan involves a practice contrary to established Federal Government policy and the Federal Trade Commission Act, the complaint grants the respondent 20 days for filing answer. (4502)

Rockford Furniture Factories, Inc., 801 Passaic Ave., Newark, N. J., retail furniture dealer, is charged with misrepresentation in the sale of its products in a complaint.

The complaint alleges that through the use of its corporate or trade name, "Rockford Furniture Factories, Inc., and the designation, "Rockford Furniture Showrooms," and other representations, the respondent represents, directly or indirectly, that it is a manufacturer of furniture, that it owns, operates or controls the factories in which the furniture it sells is made, and that its furniture is manufactured in Rockford, Ill., well known furniture center, when in fact the respondent is not a furniture manufacturer or factory owner and sells little, if any, furniture manufactured in Rockford, III. (4503)

Zippo Manufacturing Company—A complaint has been issued charging George G. Blaisdell, Walter G. Blaisdell and Homer G. Barcroft, trading as Zippo Manufacturing Co., Bradford, Pa., with the use of lottery methods in the sale of cigar and cigarette lighters.

The respondents, according to the complaint, sell to dealers assortments of cigar and cigarette lighters so packed and assembled as to involve the use of games of chance, gift enterprises or lottery schemes when the same are sold to the consuming public. Punch board devices are used, the complaint alleges.

Charging that the respondents' practices have been contrary to Federal Government public policy and the Federal Trade Commission Act, the complaint grants the respondents 20 days for filing answer. (4497)

CEASE AND DESIST ORDERS

Following cease and desist orders have been issued by the Commission:

American Medicinal Products, Inc., 6630 Santa Monica Blvd., Los Angeles, and Ernest G. Rupr, its president and directing manager, have been ordered to cease and desist from disseminating misrepresentations in the sale of "Re-Duce-Oids", advertised as a treatment for obesity.

The Commission order directs that the respondents cease disseminating advertisements which represent that Re-Duce-Oids is a cure or remedy for such diseases or effective treatment for obesity, or which advertisements fail to reveal that this preparation should be supervised by persons unskilled in the diagnosis and treatment of thyroid conditions may result in serious and irreparable injury to health.

The respondents are further ordered to cease disseminating advertisements which fail to reveal that their preparation is defi-
American Plierrench Corporation, 4611 North Ravenswood Ave., Chicago, has been ordered to cease and desist from misrepresenting the earnings of persons who sell its patent tool product “The Eifel-Geared Plierrench Kit.” Commission findings are that the respondent advertised that earnings resulting from the sale of its kit by the purchasers thereof range from $35 to $125 a week and that purchasers who devote their entire time to selling the kits make as much as $1,500 to $4,000 a year, when such are not the facts. (3853)

Empire Monument Company—Mrs. Lillie M. Sentell, trading as Empire Monument Co., Atlanta, has been ordered to cease and desist from misrepresentations in the sale of cast stone tombstones, monuments, footstones or other grave markers.

Commission findings are that the respondent designated as “Marble Durastone” certain products manufactured by mixing approximately one part cement with three parts marble aggregate, moistening the mixture and compacting it in a mold. Findings are further that the respondent’s products known as “Granite Durastone” were manufactured by mixing approximately one part cement and three parts granite dust and copper slag.

Such products, according to findings, were represented as being guaranteed not to fade, crumble or deteriorate when in fact their exposure to natural weather conditions would result in their showing deterioration in from 10 to 20 years.

The National Bureau of Standards conducted for the Commission tests of the strength and durability of the respondent’s products.

The Commission order directs the respondent to cease representing that such products will not fade, crumble or deteriorate from natural causes or will retain their original beauty throughout the years; to cease representing as “free” any article the cost of which is included in the purchase price of other merchandise in connection with which such article is offered, and to cease representing that the customary prices of the respondent’s products are “sale”, “special sale”, or other special or reduced prices.

The Commission dismissed its complaint as to Charles J. McClennon, a former partner in the Empire Monument Co., who was originally named a respondent but now has no interest in the business. (3929)

Fredmorr, Inc., 110 West 42nd St., and Morris Weitz, trading as Morroco and an officer of Fredmorr, Inc., 107 West 41st St., New York, have been ordered to cease and desist from selling or distributing pencils, radios, watches, electric shavers or any other merchandise so packed or assembled that sales to the public are to be or may be made by means of a lottery, and from supplying others with push or pull cards, punchboards or other lottery devices, either with assortments of the respondents’ merchandise, or separately, which devices are to be or may be used in selling or distributing such merchandise to the public. (3982)

Jacob Holtz and Jay Holtz Company—Jacob Holtz and Abraham L. Holtz, trading as Jacob Holtz and Jay Holtz Co., 889 Broadway, New York, have been ordered to cease and desist from selling or otherwise disposing of merchandise by means of a game of chance, gift enterprise, or lottery scheme.

The Commission order directs the respondents to cease representing that their products will not clog the pore openings, and that “Petalskin Face Cream” refines or closes the pores, corrects or removes the cause of enlarged pores and cleans the pores any deeper than their external openings; that use of this preparation furnishes nourishment to the skin, supplies Vitamin F, or has any value in restoring the skin, or that “Petalskin Face Tonic” will close or refine the pores of the skin.

The order also directs the respondent to cease disseminating advertisements representing that “Petalskin Face Cream Pastelle” will refine or close the pores, correct or remove the cause of enlarged pores or have any effect thereon in excess of removing superficial dirt accumulations from the pore openings; that “Petalskin Face Powder” will not close the pore openings, and that “Petalskin Hand Cream” will penetrate the skin or counteract aging of the skin. (4128)

Rex Merchandise Corp. of America—Four New York companies and certain of their officers selling shaving creams, tooth pastes and other toilet articles to retail dealers, have been ordered to cease and desist from price misrepresentations in the sale of their products.

The respondents are Rex Merchandise Corporation of America, 1170 Broadway, and Peter Meyer, its president; Crown Laboratories Inc., 48 East 21st St., and Arthur A. J. Weglein, Alexander Hirschbein and Frances Chorba, officers; Sheray, Incorporated, and Wilshire Sales Corporation, 33 Union Square, and William and Anna Scher, their officers.

Commission findings are that the respondents, acting in cooperation, sell their shaving creams and dentifrices in tubes and cartons marked with suggested retail sales prices of from 25 cents to $1 a unit package; that the suggested prices are fictitious as the customary prices obtained by retailers for such products are actually anywhere from 15 cents to 29 cents, and that all of the respondents have known that the prices on the tubes and cartons have not been the same as which the articles are customarily sold to the public.

Among the trade names under which the respondents’ shaving creams and dentifrices have been sold, according to findings, are “D.D.S.”; “Sheray” and “Royal Blue”; “Dr. Sachs”; “Tally Ho”; “Scientific”, “Paramount”; “Royal Crown” and “Her Majesty”.

The Commission order directs the respondents to cease representing, through fictitious prices marked or stamped on, or affixed to, their products, or on the containers, or in any other manner, that such prices so marked, stamped or affixed are the regular or customary retail prices for such products, and to cease representing as the customary or regular retail prices fictitious prices which are greatly in excess of the prices at which the products are regularly offered and sold at retail.

The Commission directed that its proceeding, in so far as it relates to Wyette Meyer, named in the complaint as respondent secretary of Rex Merchandise Corporation of America, be closed. (3142)

M. J. & H. J. Meyer Co., Inc., 145 Hudson St., New York, has been ordered to cease and desist from misrepresentations in the sale of Worcestershire sauce.

Commission findings are that the respondent corporation packaged and sold its table sauce in containers simulating in appearance and dress those long used by Lea & Perrins, Inc., in the bottling and distribution of “Lea & Perrins Worcestershire Sauce,” manufactured from the original English recipe and sold in bottles of distinctive mark, size and shape.

The respondent’s product, according to findings, although designated as “Pride of England Worcestershire Sauce,” is not of English origin but is manufactured in the United States.

The Commission order directs the respondent corporation to cease representing, through the use of wrappers, containers or labels which simulate the distinctive wrappers, containers or labels used by Lea & Perrins, Inc., in marketing its Worcestershire sauce, or in any other manner, that the respondent’s product is Worcestershire sauce manufactured and distributed by Lea & Perrins, Inc.

The respondent further is ordered to desist from using the words “Pride of England” or other words which designate English origin, in any way to describe Worcestershire sauce not made in England. (3086)
Battle Creek Food Co., Battle Creek, Mich., stipulated to cease certain representations in the sale of the breakfast cereals “Fig Bran” and “Zo.”

The respondent stipulated it will cease advertising that “Fig Bran” through its effect on constipation, will relieve any definite percentage of other complaints, and that this product is rich in Vitamins A, D or E, when such is not a fact.

The respondent also agreed to cease representing that “Zo” corrects the defects of other foods and contains all the elements required to meet the demands of the body, and that the product contains milk.

The respondent further stipulated it will desist from advertising that competitive breakfast foods are usually lacking in the bone building elements. (02790)

Dr. Benz Laboratory—Trading as Dr. Benz Laboratory, Felix J. Benz, 2308 School St., Chicago, Ill., has agreed to discontinue disseminating advertisements concerning his medicinal preparation “Regulator 68B” he will cease representing that toxic poisons in the blood stream are the result of undigested food stagnating or fermenting in the intestinal tract; that his preparation is a blood cleanser; that by its use poisons will be eliminated from the system; that it regulates or stimulates the bowels, liver or digestive system to normal activity or regularity, or that its therapeutic properties are other than that of a laxative or cathartic. (3108)

Climalene Co., 1022 Ninth St., S. W., Canton, Ohio, has entered into a stipulation to cease making certain representations in the sale of its cleansing preparation “Climalene.”

The respondents also are ordered to cease using any pictorial designs of a sheep or lamb or other wool-bearing animal in connection with any reference to a textile fabric not made from the wool of the animal so depicted; to desist from representing or implying that fabrics or garments of domestic manufacture are imported from a foreign country, and to cease advertising, offering or selling textile fabrics, garments or other products composed in whole or in part of rayon without clearly disclosing the rayon content by use of the word “rayon,” and, in the case of fabrics made of both rayon and other materials, truthfully designating such textile fabrics in immediate connection with the word “rayon” and in type of at least equal size and conspicuousness. (4429)

Wholesale Radio Service Company, Inc.—A complaint issued against Wholesale Radio Service Co., Inc., of New York, and others, has been dismissed without prejudice to its right to resume proceedings should future facts so warrant.

The respondents had been charged with certain representations in the sale and distribution of radios and radio parts.

The respondents are: Wholesale Radio Service Co., Inc., of New York, and others, have been dismissed without prejudice to its right to resume proceedings should future facts so warrant.

The respondents were: Wholesale Radio Service Co., Inc., of New York City; Wholesale Radio Service Co., Inc., of Massachusetts, Boston; Wholesale Radio Service Co., Inc., of Illinois, Chicago; Wholesale Radio Service Co., Inc., of Georgia, Atlanta; Wholesale Radio Service Co., Inc., of New Jersey, Newark, and Abraham W. Pletman, Samuel J. Novich and Max H. Kranzburg, trading as Wholesale Radio Service Co. (3722)

STIPULATIONS

The Commission has entered into the following stipulations:

Baldwin Pen Company—Under a stipulation entered into, Baldwin Co., Inc., trading as Baldwin Pen Co., Atlantic City, N. J., agrees to cease representing, directly or inferentially, that its fountain pens are non-breakable, have an ink capacity exceeding that of fountain pens generally, are tipped with iridium, and that it manufactures the pens it sells. The respondent further agrees to desist from use of the word “Guarantee” or similar words unless, whenever used, clear disclosure is made of exactly what is offered by way of security, as for example, replacement or repair without charge in a stated time; to cease issuing a guarantee for any period of time greater than reasonably can be estimated as the approximate usable existence of the products, and to cease designating any representation or agreement as a guarantee or warranty which involves a service charge or calls for payment of additional money by purchasers of the merchandise. (3105)

Globe Laboratories, Fort Worth, Texas, has entered into a stipulation to cease certain representations concerning the use of its preparations “Combination R. T. Tablets” and “Avi-Nic-Tol” in treating worms in poultry, and to cease disseminating advertisements which fail conspicuously to reveal that administration of “Combination R. T. Tablets” to poultry will reduce the number and size of eggs. The respondent further agrees to desist from representing that “Poultry Mineral” will be a source of essential minerals or that this preparation or the product “Kome-Glo” is applied, or, unqualifiedly, that it is a safe detergent for use on floors, tiles or linoleum. (3099)

 Kelso Norman Organization—Kelso Norman and Louis L. Layne, trading as Kelso Norman Organization, San Francisco, an advertising agency, have entered into a stipulation to cease disseminating advertisements in behalf of Inspire, Incorporated. San Francisco, which represents that corporation’s device, the Deep-Skin Electro-Mask, will normalize the skin, constitutes a remedy for wrinkles, crow’s-feet, lines or enlarged pores, and accomplishes all the benefits of the most extravagant salon facial. The respondents Norman and Layne agree to cease employing the words “Deep Skin” as a part of the brand name of their client’s device, or representing that the effect of this product extends deeply into the skin or is more than a surface application. (02789)

Kleenmaster Corporation, Wilmington, Del., formerly of South Bend, Ind., stipulated that it will cease advertising its product “Kleenmaster Concentrate,” a cleaning compound, as being capable of removing all stains or spots, or ink stains specifically, and as being 25 times as concentrated as other products sold for the same general use. The respondent also agrees to cease advertising that its product is unconditionally guaranteed, utilizes a new or different method, or is the only product which cleans by means of a shampoo method. The respondent further stipulates that it will desist from representing that any offer is special or for a limited time.
time unless the offer expires at a definite, predetermined date. (02788)

Lobl Manufacturing Co., Middleboro, Mass., and Glencoe Electric Corporation, 731 Broadway, New York, have entered into stipulations to cease certain representations in the sale of electrical heating pads.

The Lobl Manufacturing Co. agrees to cease using the words or symbols "3 Heat" and Glencoe Electric Corporation agrees to cease using the words "Three Heat," as descriptive of their pads or the switches used with them.

The Lobl Manufacturing Co. further stipulates it will cease employing the words "i Heat" or "Low, Med., High," or other similar words or symbols, and Glencoe Electric Corporation agrees to cease employing the words or phrases "Three Heat," "Selective Heat Switch," "High-Medium-Low," or "Three Different Temperatures" or other similar words, so as to imply that their pads are capable of maintaining, or that operation of the switches results in maintaining, three distinct temperatures.

According to the stipulations, the operations of the switches merely regulates the time required to heat the pads to a single maximum temperature. (3096-3098)

Magic Chemical Company—Harry Douglas, trading as Magic Chemical Co., 2550 Quantico Ave., Baltimore, stipulated that in the sale of his product "Magic" insecticide, he will cease using the words or phrases "Forever," "Rids Them" or "Never to Return," or similar words, so as to imply that application of the product will afford permanent protection against or prevent the return of bedbugs, cockroaches or other insects. The stipulation relates that the product's effectiveness is limited to destruction of insects which it contacts and that the preparation will not afford permanent protection. (3103)

Rogers Manufacturing Co., Inc., North Attleboro, Mass., distributor of women's suits, coats and dresses, entered into a stipulation to cease using the word "Manufacturing" as a part of its corporate name or the trade name employed by it in connection with the advertisement or sale of products which it does not manufacture. The respondent also agreed to desist from using the words "Manufacturers" or "Manufacturing" or the abbreviation "Mfg." or the word "Factory", or the phrases "Factory to You" or "Save the Middleman's Profit" or other similar words tending to convey the impression that the respondent manufactures the products it sells or owns or controls the factory in which they are made, when such is not a fact. (3107)

Schwartz Manufacturing Co., Two Rivers, Wis., a manufacturer of cotton goods products for use in the dairy industry, stipulated that in the sale of its "Perfection" milk filter discs it will cease using in its advertisements statements tending to convey the impression that its discs are new or differ materially from the discs which have been in use in the industry for filtering milk; that they have a far greater surface contact and will always and under all circumstances filter ten gallons of milk in three minutes, or that their use will result in cleaner milk than ever before. (3097)

Superior Shoe Company, Inc.—In a stipulation entered into, Superior Shoe Co., Inc., 500 South Peoria St., Chicago, agrees to cease employing the word "Doctor" or the abbreviation "Dr," alone or in connection with a name or with any other words as a trade name, brand or designation for its products so as to imply that they are made in accordance with the design or under the supervision of a physician and contain special scientific or orthopedic features which are the result of medical determination or services. According to the stipulation, the respondent advertised as "Dr. Haines Shoes" certain shoes which were neither made under such design or supervision nor contained such special features. (3100)

Unique Printed Products Co., trading as Crescent Products Co., 1270 Maple Ave., Terre Haute, Ind., entered into a stipulation to cease using the term "Non-Crumbling" as descriptive of its "Spotless Wall Paper Cleaner." The respondent also agrees to desist from employing that term or the statement "This cleaner does not crumble" or any other similar statement or term tending to convey the impression that its product does not crumble when used on certain types of wall paper. (3102)

Walker Company—Four distributors of electrical heating pads entered into stipulations to cease certain representations in the sale of their products. They are: The Walker Co., Middleboro, Mass.; Varick Electric Manufacturing Co., Inc., 10 Washington Place, New York; Fitzgerald Manufacturing Co., Torrington, Conn., and Son-Chief Electrics, Inc., Winsted, Conn. The respondents agree to cease making representations which imply that their heating pads are capable of maintaining, or that operation of the switches in connection with the pads results in maintaining, three different degrees of heat. According to the stipulations, the operation of the switches merely regulates the time required to heat the pads to a single maximum temperature. (3101-3104-3106)
**The President**

Events of worldwide importance have taken place since our Convention last August in San Francisco. Primarily, the changes caused and the conditions created by these events have brought greater opportunities for radio stations to render unusual public service—to report the news of world events as they happen—to carry talks of the leaders of the nations of the world—to furnish a forum for the free and open discussion of the many problems which our own people face and upon which decisions must be made—to cooperate with the various Government agencies in the nation's defense program—and, as the tempo of our life quickens, to provide those necessary aids found in programs of music, religion, education and entertainment, which are so necessary to maintain the morale at a time like the present.

It is not the purpose of this report to survey the whole field of radio, but rather to report briefly upon the activities of your Association during the past year.

The nine months since the last NAB Convention have been nine months crowded with activity and we can look back upon the accomplishments of that brief period with a real sense of satisfaction and pride. The individual reports of the members of the Staff give detailed information concerning the activities of the various departments. It would be repetitious for me to review what is set out in detail in those reports, but I urge you to carefully read each report, because I know of no better way to become familiar with the work of your Association. Our members are continuously making greater use of the services of our Staff, and I am confident that as they become better acquainted with the Staff's activities, they will make even greater use of the services offered.

The greater portion of your President's time this year has been devoted to activities connected with the music copyright controversy. Although this has necessitated almost continuous absence from Washington, I believe it has been justified due to the importance of the matter, and I believe we can confidently state that finally we have solved a problem which has vexed broadcasters for the last two decades.

To Sydney M. Kaye, Merritt E. Tompkins and Carl Haverlin, and to the entire BMI Staff and Board of Directors, we owe a debt of gratitude for the simply marvelous job which has been done. Not only have they performed miracles, but have secured the cooperation of the broadcasters and of many other industries, to the end that what many thought was impossible is now an accomplished fact. Radio has created a competitive market of music, has opened the door of opportunity to the young author and composer and has, despite many handicaps, continued to give the American public musical programs of high quality.

Apart from the work of the BMI Staff, the greatest single factor in accomplishing this result has been the realization by broadcasters that they could no longer afford the luxury of internal warfare. The skeptical, who have often repeated that broadcasters would never approach a problem as a united industry, and those who in the past have been successful by the pursuit of a policy of divide and rule, have been sorely disappointed.

It would serve no purpose here to review the events of the past six months which are fresh in the minds of all of you, but may I repeat once more what I have so often stated; namely, that the determined manner in which the industry has fought through this fight will give courage and determination to the industry in the future and for many years to come you will be gathering additional fruits of your well earned victory.

**NATIONAL DEFENSE**

The past six months has seen a stepping-up of the activities of all Government departments with the inauguration of many campaigns in connection with the national defense programs. It is to the credit of the industry that it has cooperated wholeheartedly with all branches of the Government. The NAB Staff has been in daily contact with the officials of the various Government departments in an effort to coordinate the activities and render helpful service to both the industry and the Government.

**THE CODE**

Time continues to prove the wisdom shown by the industry in the adoption of the Code. The highlights of this past year were evidences of continual public approval of the Code, the placing of commercial sections in effect, an exhaustive survey of children's programs prepared by Mrs. Dorothy Lewis, and the continuous intelligent work of the Code Committee, under the leadership of its able Chairman, Edgar Bill.

**MEMBERSHIP, DISTRICT MEETING & CONVENTION**

Our membership has shown a continuous growth and is now the highest in our history, totaling 526 active members and 21 associate members, for a grand total of 547. Last winter, the Board of Directors adopted a new Associate Membership Plan and we wish to extend a most hearty welcome to our many new Associate Members. We believe that broadcasters have many problems in common with those engaged in other branches of the radio industry, and that through our Associate Membership Plan we shall have an opportunity to pool our energies and resources so as to better solve our common problems.

The District meetings this year have again afforded an opportunity for broadcasters to discuss their problems on an informal basis and have proven most helpful in developing an industry consciousness. The meetings of the Sales Managers in connection with the District meetings have proven successful and undoubt-
edly will be further developed under the new plans of the Bureau of Radio Advertising.

In keeping with the NAB policy of holding the Convention in a different part of the country each year, the Directors decided to hold the Convention this year in the Mid-West, since in the two previous years the Convention had been held in Atlantic City and San Francisco, respectively. Also, the time of the Convention was changed from summer to spring. We shall be interested in having the members' reaction to this change.

As is normal in any trade association, a large part of the work is performed by the Directors and members serving on various industry committees. On behalf of the entire industry, I wish to express to the members of the Board of Directors, to the members of the Executive Committee, and to those who served on the various committees, our sincere appreciation for so generously giving of their time and energy to the work of the Association. It would have been impossible to have carried on the work of the NAB without their assistance.

STAFF

There have been two changes in the NAB Staff. At the request of the War Department, the Board loaned Edward M. Kirby, our Director of Public Relations, to the War Department on a dollar-a-year basis, to direct the Radio Division of the Public Relations Division of the Army. The NAB considered such a request from the War Department not only as a compliment to Mr. Kirby and to the NAB, but also as an opportunity to make a real contribution to the National Defense Program.

Frank Pellegrin, formerly of KOIL, Omaha, has recently succeeded Samuel J. Henry, Jr., in charge of the Bureau of Radio Advertising, and plans are being made for further development of this Bureau. During the year, the Unit Volume Measurement Plan has been put in operation. We believe that with the development of this plan and with the active cooperation of the Sales Managers Committee, this Bureau will become of increasingly greater value to the industry.

What of the future? Between now and our next Convention, we shall be brought face to face with problems which are today unknown, but which I am sure radio can solve. I have read with interest the President's statement contained in a recent letter, as follows:

"We are all agreed that we want to keep radio free . . . This technical limitation on the number of transmitters gives the Government its principal function in the realm of radio, that of referring to the limited number of transmitters shall be."^3

May our actions and those of the public and of the Government be guided by the words of our President to the end that freedom of radio may continue to exist unimpaired and that democracy in America as we know it may be preserved.

I believe there are those in radio who have the experience and the ability and the patriotism to guide this industry and that radio as a privately operated competitive business will render a greater service than under Government control.

We in radio face the future with confidence and know that come what may, radio will perform its task with credit to itself, to the Government, and to the American public.

Respectfully submitted,

Neville Miller,
President.

Secretary-Treasurer

The nine months that have intervened since the 1940 convention have been unusually active and busy ones at NAB headquarters. The work incident to the music controversy consumed a great deal of the time of the staff but, nevertheless, the other activities of the Association have been maintained upon a constructive and active basis. Every effort has been made to operate the Association in a manner that will best serve the interests of broadcasters in every field of their activity. The Association has been operated on a business basis and many economies in operation have been introduced with the result that while the services of the Association have been greatly expanded, the cost of operation has been kept well within the limit of the funds available.

MEMBERSHIP

We are pleased to report that the membership of the National Association of Broadcasters as of May 1, 1941, stands at 547, an increase of 87 members since the date of the last annual convention in San Francisco in 1940. The membership is composed of 526 active and 21 associate members. Included in the 526 active members are 6 FM stations which were admitted to membership during the past year.

During the year, your Board of Directors approved a plan of associate membership which we are pleased to report has met with great success. Six industries and engagements closely allied with radio broadcasting are now eligible for associate membership in NAB as follows: transcription companies, equipment manufacturers, station representatives, news services, telephone and telegraph companies, and market research organizations. These companies hold from one to four $250 units of associate membership depending on their gross volume of business. The NAB is proud to announce that we now have 21 associate members holding 35 units of membership. Included in these 21 members are 7 transcription companies, 10 equipment manufacturers, 3 station representatives and 1 research organization.

As to the active membership, we have been able to increase this to its highest point in NAB history due to the excellent cooperation of the District Directors and by following up our membership campaign of last year.

The following tables show the increase in membership by dues classifications and by NAB Districts from July 15, 1940, as reported at the last convention, to May 1, 1941.

67% of all newspaper owned stations are NAB members.

FINANCIAL

The financial records of the Association were audited by certified
public accountants at the close of the calendar year. Their report
has been sent to the Directors and is available to any member on
request. During the year 1940 we operated well within our budget
and are at present within the budget as approved for 1941.

The following financial statement shows the receipts and disbursements of your Association for the nine months that have
elapsed since the 1940 annual convention:

HEADQUARTERS PERSONNEL

Whereas our activities have increased greatly during the past
year, our payroll on April 1, 1941, lists only 29 full and part-time
employees as compared to 26 employees reported at the last con¬
vention, a net increase of only 3 employees. The only major
change in our staff involved the resignation of Samuel J. Henry,
Jr., on January 31, as manager of the Bureau of Radio Advertising.
With his resignation, the Bureau was, upon the recommenda¬
tion of the Sales Managers Committee, abolished by the Board
and in its stead the Department of Broadcast Advertising was
created. On April 1, Frank E. Pellegrin assumed his duties as
Director of this newly created department.

A complete roster of NAB Headquarters employees follows:

**Staff Members**

Neville Miller, President
C. E. Arney, Jr., Assistant to the President
Edward M. Kirby, Director of Public Relations
Joseph J. Miller, Director of Labor Relations
J. Robert Myers, Assistant Director of Research
Frank E. Pellegrin, Director of Broadcast Advertising
Paul F. Peter, Director of Research
Russell P. Place, Counsel
Everett E. Reverbom, Auditor
Helen H. Schaefer, Assistant Director of Research
Lynne C. Smiley, Director of Engineering
Arthur C. Stringer, Supervisor of Circulation and Promotion

**Secretarial, Clerical and Part Time**

Jane E. Arnold Miriam E. Moore
Isabel G. Campbell Ella P. Nelson
Jean M. Chevanney Harriet A. Page
Thomas I. Chase Mildred M. Ramsay
Charles H. Dodge Jean Smith
Ethel M. John Molly A. Stonestreet
Nolan L. Kidwell Anne J. Weir
Lynne M. Lamm
Hester M. Laster

MEETINGS

</table>
REALLOCATION

Of prime importance during the past NAB year has been the reallocation that took place on March 29, 1941. At 3 a.m. on this date, approximately 90% of the broadcast stations in the United States changed frequency. To the credit of all concerned the job of changing was accomplished in the remarkably short time of 56 days with very little trouble. A handful of stations were not able to effect the change-over of their directional antennas in such a short time and therefore were authorized to operate with reduced power non-directional until the work was completed.

Plans were started over a year ago to meet the emergency of a short notice period. This planning was formulated in meetings of the Engineering Committee and contacts with the FCC Engineering Department. The consulting engineers were invited to a special "Reallocation Meeting" of the Executive Engineering Committee held in Washington. The Director of Engineering had prepared a 13-page analysis of the directional antennas that were to be shifted in frequency. This analysis was used as the basis of discussion. The deliberation of the meeting culminated in the preparation of a tabulation of the possible difficulties involved in the reallocation and the preparation of requests for certain concessions from the FCC during the reallocation period, such as, the easing of certain regulations. This was taken up with Mr. Ring, FCC Engineer in charge of broadcasting. Mr. Ring was very cooperative in this matter and he deserves a great deal of credit for the way in which he organized the engineering aspects of the reallocation.

Subsequent to the reallocation meeting, it occurred to the Director that it would be helpful in making the changes if the normal test period from 1 a.m. to 6 a.m. were extended to midnight to 7 a.m. This was discussed with Mr. Ring and the members of the Executive Committee. The approval of the Committee resulted in NAB officially requesting this extension and the FCC granted the request. Many engineers have reported that this additional test time materially aided them in making the changes.

The Director has also worked with Arthur Stringer for over a year on plans for the promotional work in connection with the reallocation. This work resulted in an industry-wide plan that was ready for instant use at such time as the FCC gave the go ahead. Technical articles on the reallocation were written for the NAB REPORTS, BROADCASTING, Radio Trade Journals and Servicemen's Magazines. A frequency log was also prepared by the Director and this was extensively used by broadcasters and used by many who made up logs for general distribution.

BROADCAST ENGINEERING CONFERENCE

NAB again officially cooperated in the Fourth Ohio State Broadcast Engineering Conference. This was held in February at Columbus. The preliminary program for the Conference was formulated at NAB headquarters during a two-day visit by Dr. W. L. Everitt, Director of the Conference. He was also assisted with the publicity. The Director of Engineering acted as Chairman of The General Discussion and Question Box conducted by A. D. Ring, Assistant Chief Engineer of the FCC in charge of broadcasting. The total attendance of 287 was an increase of 39 over the previous Conference. The members of the Conference presented Dr. Everitt with a wrist watch in token of appreciation for the work he has done in conducting the Conferences.

INSURANCE COMMITTEE

The Insurance Committee has been aided in handling its questionnaire and in publicity of the work being carried on by the Committee.

MEMO RECORDING

In an FCC order on October 15, 1940, the International Broadcasters were ordered to record all of their transmissions. Because the recording time per year is great the cost per hour is of utmost importance. At the time of the order, the availability of equipment was not known. At the suggestion of Mr. Arney, information was requested of all known manufacturers of such equipment.

The information was tabulated and presented to the International Broadcasters at a meeting attended by Mr. Arney and the Director. The International Broadcasters decided to standardize on one type of equipment. Several recorders were loaned by a company to be used temporarily until the permanent machines could be delivered. In this way, the International Broadcasters were able to comply with the FCC rule sooner.

BROADENING NAB MEMBERSHIP

Before the last Convention the Engineering Committee instituted proceedings for broadening the scope of NAB to include not
only standard band, but also any other broadcasters. This culmi-
nated in a suggested by-law revision that was adopted by NAB
at San Francisco. All broadcasters are now eligible for NAB mem-
bership and a number of High Frequency stations have joined.

INTERFERENCE RATING

The FCC Engineering Department has had under study for some
time, an alteration in the RSS Method of Rating Interference, sug-
gested by NAB. With the reallocation out of the way, the FCC
Engineering Department is again active in considering this matter.
It is hoped that this controversial rule will be modified soon.

TELEVISION COMMITTEE

In line with its broadened scope, NAB participated in the de-
liberations of the National Television System Committee. John
V. L. Hogan served on the main committee as NAB representative
and the Director was a member of one of the panels and also Mr.
Hogan's alternate on the main committee.

INSTITUTE OF RADIO ENGINEERS

The Director has cooperated with the IRE in publicizing its
Annual Convention. On February 6, F. E. Terman, President of
IRE asked the Director to serve on the Board of Editors and on
the same date, was requested by A. N. Goldsmith, Chairman of the
Board of Editors, to serve on the Committee on Regular Papers.
These two appointments were accepted. Mail discussions with
Dr. Goldsmith and a conference with Dr. Terman have been di-
rected toward the end that the IRE Proceedings papers be made
more attractive to the Broadcast Station Engineers.

RECORDING STANDARDS

During the past few months, discussions have been held with
station managers, agency men and engineers concerning the di-
vergence of quality on records and transcriptions produced by
various companies and played on machines manufactured by vari¬
ous companies. The Engineering Committee passed a resolution
recommending that NAB coordinate a plan to formulate recording
and reproducing standards. This resolution was referred to Neville
Miller for consideration by the Executive Committee and the
project was subsequently authorized. Time has been asked for at
St. Louis during the Annual Convention for open discussion of this
project. It is planned that the work of formulating standards will
be inaugurated by the engineers at the IRE Convention in June at
Detroit. Everyone interested in the subject, whether he be an
NAB member or not, will be invited to participate in the work.

HEARING COVERED

All FCC Engineering hearings of general interest, including the
monopoly hearing, during the past year, have been attended by
the Director and reported in the NAB REPORTS.

DEFENSE COMMITTEE

The Director was appointed Neville Miller's alternate on the
Domestic Broadcast Committee of the DCB and was appointed
NAB technical advisor. The Director is serving as Chairman of
one of the Subcommittees.

ENGINEERING HANDBOOK

A revision of the handbook is nearly completed. The time
necessary to do this job has been seriously curtailed by other more
pressing matters such as, work in connection with the reallocation
and work in connection with the Defense Committee. It is antici-
pated that the revision will be ready for distribution shortly.

SERVICE TO MEMBERS

Many minor functions have been carried on beside the main
ones mentioned, not the least of these being individual services
to members. Many of the members have availed themselves of
this service.

If you feel that the Director can be of help to you, please feel
free to call on him.

ENGINEERING COMMITTEEMEN

Without the wholehearted help of the members of the Engineer-
ing Committee, the work of the past year could not have been
accomplished. Many of the members have given generously of
their time in furthering industry-wide projects.

COMMITEE MEETINGS

The Engineering Committee met on January 9, 1941, in New
York City and on February 19, 1941, at Columbus. An Executive
Engineering meeting was held on September 26, 1940, in
Washington.

Director of Engineering.

Legal Department

This is the report of the activities of the Legal Department for
roughly eight months since the last annual meeting.

CONGRESS. To date no adverse legislation has been enacted.
In summary the radio bills and their history are as follows:

In the field of copyright, Executive E, the International Copy-
right or Berne Convention Treaty is again before the Senate. A
sub-committee of the Committee on Foreign Relations held hear-
ings at which NAB appeared in opposition. The perennial bill
for legalizing copyright in recorded renditions and interpretations
was again introduced under NAPA sponsorship, this time by
Representative Sachs (D-Penna.); no hearings have been held
or are believed likely in the near future. Companion bills for
the preservation of authors' rights were introduced by Senator
Bone and Representative Kramer; NAB appeared at the hearing
and suggested perfecting amendments. A bill introduced by

[ 3 ]
Representative Keogh (D-N. Y.), incorporating the minimum damage clause of the Duffy bill, and generally acceptable, has not been set for hearing. The Thomas bill embodying the draft of the Committee for the Study of Copyright has not been introduced; broadcasters are opposed to it.

The Johnson bill to bar broadcast of advertising of alcoholic beverages was reintroduced; when set for hearing NAB will oppose it vigorously.

The Ditter bill to amend the Communications Act and provide for five year license period and to prevent indirect censorship by the Commission was again reintroduced. Hearings have not been scheduled to date.

Bills affecting interception of messages and amendatory of the Communications Act in this respect do not disturb us.

Bills affecting national daylight saving time have been actively supported; hearings have not been set.

Three bills for improvement of administrative procedure, successors to the Walter-Logan bill, are under consideration. The Federal Communications Bar Association's draft of a bill embodying the best features of each is acceptable to counsel. As in the past, no action on such measures has been taken by the NAB.

STATE LEGISLATION. Legislatures in forty-four states have been in session this year. District Directors cooperated with counsel by appointing broadcasters in each state, and wherever possible in the state capital, to serve as Legislative Contacts for NAB. By providing an additional safeguard against overlooking the introduction of bills affecting radio, and liaison for communication on legislative matters in each state, this innovation has been most useful in this department.

Chiefly of note at this year's sessions was the introduction of 35 so-called "anti-ASCAP" bills in 18 states. Other than enactment of the Wisconsin law to provide effective enforcement of existing provisions relating to investigators and music brokers, no such bills have been enacted. The NAB did not encourage or support any legislation of this character. The Montana law of this character was repealed.

The Perry bill to bar off-the-air recording of broadcasts was again introduced, in somewhat different form, in New York. New York State Broadcasters persuaded the author to strike the enacting clause, and the measure was killed. A committee is working to perfect an acceptable bill for introduction at the next session.

Oregon passed a radio libel law, relieving broadcasters from liability for radio defamation unless the plaintiff can prove that the broadcaster failed to exercise due care. A similar bill was vetoed by the Governor of Washington.

LITIGATION. The position of the NAB in RCA v. Whiteman was sustained in the Circuit Court of Appeals and again in the Supreme Court, thus establishing the law, except in Pennsylvania, that broadcasters are at liberty to play phonograph records without license from the record manufacturer of the performing artists. This was a notable accomplishment for the industry, particularly for the smaller stations. Stuart Sprague and White and Case were on the briefs.

FACILITIES CONTRACT. Nearly five months were required in conference with the AAAA Time-Buyers' Committee to determine that complete reconciliation of views on certain provisions was impossible. The Agency Contract, recommended by the NAB March 21, is the result of the protracted discussions.

FCC APPLICATION FORMS. In cooperation with FCC staff an NAB committee was successful in securing amendment to the standard and FM forms which greatly facilitates filling out of these forms.

GENERAL. Correspondence with stations and their attorneys on numerous matters as well as assistance to staff and general office work has consumed considerable time. Since Ed Kirby's going to the War Department, the duties of Secretary of the Code Committee have temporarily devolved on counsel. Service as alternate to Neville Miller on the International Broadcasting Committee of the Defense Communications Board has not been burdensome to date. There have been no meetings of the Committee on Cooperation Between Press, Radio and Bar since the last report. The New York Tax Committee, appointed to combat assessment by the City of New York of real estate tax on station equipment, was successful in its efforts.

Respectfully submitted,

RUSSELL P. PLACE,
Counsel.

Labor Relations

Just three years ago this week the National Association of Broadcasters set up its labor relations department. Those three years—and especially the last one—have seen American industry plagued by labor trouble. One of the few exceptions has been the broadcasting industry. Paying its employees well, obeying the law and constantly seeking to understand labor's viewpoint on all questions of mutual interest, the broadcasting industry has enjoyed three years of comparative peace.

The industry's labor policy is highly respected not only in other quarters of the business world but by labor and government as well. Here are a few comments on the department's last report:

Sidney Hillman, now co-director of the OPM—"May I congratulate you on your achievements and the fine record you have maintained . . . ."

A. J. Altmeyer, chairman, Social Security Board—"May I send you my sincere congratulations on your good work?"

J. R. Steelman, director of conciliation, U. S. Department of Labor—". . . The broadcasting industry and organized labor must be proud of their record for the past year."

William Green, president, American Federation of Labor—"Such a record must be interpreted as a tribute to collective bargaining, and to the wisdom and self-restraint of management and workers."

Thomas Kennedy, secretary-treasurer, United Mine Workers of America—"That the broadcasting industry and organized labor have gone through a year without any major labor trouble is a tribute to your work in this direction."

Any of these credits which appear to accrue to the NAB's director of labor relations must be interpreted as belonging to the entire industry, for the entire industry has given the labor relations director unstinted support in his efforts.

The NAB proposes to continue its current labor policy during the coming year. Members will be kept advised of trends and developments in the field of labor relations. They will be informed of any changes in labor laws that affect their operations. They may call upon the labor relations director for direct assistance with their individual or collective labor problems. They will find available at the NAB a growing fund of information useful in collective bargaining. The labor relations director will continue his efforts to preserve and foster the general goodwill between the industry and the labor movement, and will count on the continued assistance of the entire membership in this work.

Following is a topical review of labor developments related to the industry since the San Francisco convention last August.
RADIO'S PAYROLL

Latest available FCC figures, for the week beginning October 15, 1939, showed that the average broadcasting employee, executives excluded, received $41.08. There is every reason to believe that the Commission's next report will show a considerable increase, keeping broadcasting at or near the top of the list of all industries in this respect.

For comparative purposes it is necessary to include executives, in showing the increase in the industry’s payroll and average weekly salary in recent years:

These figures do not include highly paid artists, musicians, announcers, writers and others employed for radio shows by advertising agencies. Their inclusion would raise the averages considerably.

WAGE AND HOUR ACT

The headache that came with the first application of the Fair Labor Standards Act of 1938 is gradually wearing off. The remaining dull pain results largely from the disappearance of a give-and-take arrangement as to working hours that prevailed in much of the industry before federal regulation of wages and hours. Before 1938, the broadcasting employee who wanted a day or two off usually got it without question. When he worked a long day or a long week (as the nature of the industry frequently requires), he was usually given compensatory time off. Because of the overtime payment required by the law, these practices necessarily have been discontinued in many cases. Employees have not liked this any more than have employers.

Some relief came last fall with the Wage and Hour Administrator’s redefinition of “executives, administrative employees, professionals and outside salesmen,” four classes of employees who need not be paid overtime. The new definitions, much broader than the old, exempted a great many broadcasting employees who previously had been covered by the Act. Before the new definitions were drawn, for instance, the Wage and Hour Division maintained that the broadcasting industry’s outside salesmen were not outside salesmen within the meaning of the Act. After the NAB labor relations director presented the industry’s case at hearings on proposals for the new definitions, the report accompanying the new definitions specifically stated that radio’s outside salesmen were exempt.

Only one broadcasting station got into any serious trouble with the Wage and Hour Division during the past year, and that trouble resulted largely from the station management’s misunderstanding of how to apply the Act to its employees. A court order requiring payment of back wages and an injunction against future violation resulted. Failure to keep proper records has resulted in many cases. Employees have not liked this any more than have employers.

The NAB labor relations director has advised dozens of broadcasting technicians what technicians qualify as executives, professionals or administrative employees, and what ones are clearly non-exempt.

WAGNER ACT

The National Labor Relations Board has cited only two stations during the past eight months for violation of the Wagner Act. One of these was directed to reinstate several employees alleged to have been discharged for union activity. The other case was settled "out of court."

This record is far from bad, considering the number of complaints in other industries, and also considering the number of times broadcasters have dealt with labor unions for the first time.

The NAB labor relations director has advised dozens of broadcasters how to avoid mistakes which might be construed as Wagner Act violation, and also has advised them on the technique of collective bargaining. This service should be used even more than it is.

Appointment of Dr. Harry A. Millis as chairman of the Labor Board to succeed J. Warren Madden has been generally hailed throughout the country as a step toward more harmonious labor relations. Both Dr. Millis and Dr. William Leiserson, appointed to the previous vacancy, have long records as mediators and conciliators. Both firmly believe in that technique.

STRIKES

Several incidents have led to the temporary withdrawal of union musicians from broadcasting stations, but there have been only two actual strikes in the industry during the past eight months. One was called at a southern station by the International Brotherhood of Electrical Workers (A. F. of L.) when six months of negotiations failed to produce an agreement on terms for a first contract covering technicians. The other was called by the American Communications Association (C.I.O.) at a New York City station during the course of negotiations toward a contract renewal. The latter was accompanied by sabotage. Neither strike had been settled when this report was prepared.

During a period when strikes made the headlines almost daily, the lack of any serious labor trouble in the broadcasting industry is a tribute to the industry, its employees, and the labor unions it deals with. Good wages, good working conditions, fair dealing and law obedience have paid dividends.

“CLOSED SHOP”

More often than not, the chief obstacle to a first agreement between an employer and a labor union is the union's demand for a "closed shop." The "closed shop" may take several forms:

(1) The real closed shop, or "hiring hall" system. This not only requires all employees to belong to the union but also requires the employer to take whatever employees the union sends in when vacancies occur.

(2) The preferential shop. This requires all employees to belong to the union and requires the employer to ask the union for replacements when vacancies occur. However, if the union cannot furnish suitable replacements, the employer may hire non-union employees, provided they join the union when they go to work.

(3) The union shop. This requires all employees to belong to the union while they are working, but gives the employer complete freedom to hire whomsoever he pleases.

There are many variations of these fundamental definitions. By and large, the two principal technicians’ unions in the broadcasting industry (I.B.E.W. and A.C.A.) have insisted upon the closed or preferential shops, although each has settled for a union shop
on several occasions. AFRA has asked only for a union shop.

The principal objection to a real closed shop or hiring hall system is obvious. The employer who has that relationship with a union, theoretically at least, has delegated to the union one of the functions ordinarily associated with management. On the other hand, furnishing competent employees places a tremendous responsibility upon labor unions. In some instances this responsibility has worked well, and the employer has not suffered. In other instances, it has led not only to foisting poor employees on the employer but to job-selling and other racketeering practices on the part of union leaders.

The preferential shop gives the employer, or arbiters, the ultimate word on employment, and thus should avoid most of the trouble that can result from a closed shop. Many employers have found it quite satisfactory, and have used a union to advantage as an employment agency. Others have had sad experiences with it, finding that the preferential shop, as it worked out, was really a closed shop with all the potential evils of a closed shop quickly developing.

The union shop has many advocates in both labor and industry. It is definitely to the advantage of the employer, many say, to have all his employees in the union for the sake of plant morale. Half in and half out means trouble no end, they say, with endless costly bickering. On the other hand, few employers like the idea of requiring any employee to join and pay dues to a labor union.

The NAB labor relations director sets forth these arguments for and against the various types of shops, without opinion, for the information of broadcasters who may sooner or later have to face this question in negotiations. He will be glad at any time to discuss this question further with any association members.

**ARBITRATION**

Arbitration is a well established principle in the labor policy of the broadcasting industry. Its extension is constantly advocated by the National Association of Broadcasters as fundamental to the development of sound labor relations.

Every contract between stations and the International Brotherhood of Electrical Workers and the American Communications Association, the dominant technicians unions, provides for arbitration of disputes arising under the terms of the contract. Some of these contracts go even further in providing for the arbitration of any dispute that arises during the term of the agreement. The unions, in some instances, have been hesitant in accepting the latter type of provision. Arbitration of all disputes, however, guarantees a peaceful relationship between the employer and the union for a given period of time, and makes the employer far more willing to bargain collectively in good faith than if he is faced with the possibility of “wild cat” strikes after a contract is made. There is a great variation in technicians contracts in the method of selecting arbiters. The American Arbitration Association, the U. S. Labor Department, local judges, National Labor Relations Board, State Board of Arbitration, and the prominent panel of the American Newspaper Publishers Association, and the Printing Pressmen's Union are among those specified in contracts as arbiters or selectors.

All contracts with the American Federation of Radio Artists, the dominant union of announcers, singers, and actors, provide for arbitration of disputes arising under the contract by the American Arbitration Association.

The American Federation of Musicians, the other principal union in the broadcasting industry, both nationally and locally has refused to insert arbitration provisions in its agreements. These agreements usually have provided for the reference of disputes to the national officers of the union—an arrangement obviously unsatisfactory to the employers.

**THURMAN ARNOLD**

About eighteen months ago Thurman Arnold, assistant attorney general in charge of anti-trust prosecution, started to prosecute labor unions for some of their practices which he contended were in violation of the Sherman Act. His drive got into full swing about the time that the National Plan of Settlement between the American Federation of Musicians and Network affiliates was about to expire. As you know, the A. F. of M. permitted the National Plan of Settlement, with its “quotas”, to lapse.

Mr. Arnold had listed “unreasonable restraints designed to compel the hiring of useless and unnecessary labor” as one of five restraints which he felt were “unquestionable violations of the Sherman Act”. Last month, with this type of restraint at issue, Mr. Arnold was reversed by the Circuit Court of Appeals in New York City. A few days later, with this same type of restraint at issue, Mr. Arnold was reversed by the Supreme Court. Previously he had been reversed on most of his other types of labor prosecutions.

In the New York case, Mr. Arnold had prosecuted the truck drivers’ union for requiring out of town trucks to put on an extra driver from the New York local when they entered New York and for requiring payment of New York local members for unloading out of town trucks whether or not they actually did the unloading.

The truck owners resisted these demands but the union forced its claims upon them in some instances by actual violence to their drivers and trucks; and some by threats of such violence; and others by persuading receiving clerks not to receive the loads. At times the truck owners refused to allow the New York union members to have any part in the handling of their loads; more often they let them do some of the unloading; but in almost all cases they were forced to pay a full day’s wage.

Mr. Arnold accused the union of violating not only the Sherman Act, but the Anti-Racketeering Act as well. Judge Learned Hand, however, turned Mr. Arnold down on both counts. There was no violation of the Sherman Act, he said, “for there is no evidence of any concerted agreement to fix the price of trucking, or of the commodities carried; nor was there any evidence that the action of the accused had, in fact, affected those prices”.

Nor was there any violation of the Anti-Racketeering Act (extortion), Judge Hand said, because “if the employee in good faith actually profers his services, it is the same whether or not they are accepted”.

“The position of the accused, when the operators refused to employ them, was like that of ‘stand-by’ orchestras, so called”, Judge Hand added. “If a conductor brings an orchestra from outside into the territory of a union powerful enough to coerce him he must either employ local musicians in their place, or pay an amount equal to their aggregate wages if they had played. In such cases it may be doubtful whether the local players can, in fact, substitute for the outsiders, and that might condemn them; but there was no such doubt here, for the accused were competent drivers.”

In the Supreme Court, the decision of District Judge Sullivan of Chicago was upheld, without comment, in Mr. Arnold’s case against the common laborers’ union. Mr. Arnold had prosecuted this union for requiring Chicago contractors to hire “stand-bys” when concrete mixers were used. The union made the contractors hire as many “stand-bys” as there were men replaced by the mixers.

“I am of the opinion that defendants (the union), under such circumstances, are immune from prosecution under the Sherman Act by reason of the provisions of the Norris-LaGuardia Act which enlarges the scope of section 20 of the Clayton Act,” Judge Sullivan said.
After pointing out that no labor union could be prosecuted for "normal, legitimate and lawful activities" Judge Sullivan added:

"Such normal, legitimate and lawful activities of a labor union include the calling of strikes, or threatening to call strikes in order to obtain their demands, as in the present case, a demand against labor-saving devices which will displace their members or, in the alternative, the demand that if the labor-saving device is used, the same number of men be employed as if the other type of mixer were used. These are legitimate and lawful activities which a labor union is permitted to carry on in an effort to maintain employment and certain working conditions for its members, and restraint of trade or commerce attendant thereon, is only indirect and incidental."

Last month, the New York Court of Appeals enjoined the stagehands' union (I.A.T.S.E.) from striking at theaters against "Opera On Tour," a touring opera company using mechanized musical accompaniment. The stagehands issued the strike order at the request of the A. F. of M. The New York court held that the strike issue was not a legitimate labor dispute. This decision may prove to be of far reaching importance.

**A. F. OF M.**

Only a few local incidents have marred eight months' peaceful relationship between the industry and the American Federation of Musicians (A. F. of L.).

Quite a few local contracts expired in January, and in some instances local demands for increased employment or expenditure for musicians led in several instances to temporary withdrawal of the musicians or withdrawal of name bands for network sustaining programs. Most of these situations have long since been straightened out, although a few were still pending when this report was prepared.

In the middle west, at least one local took a cue from Chicago and St. Louis, and demanded the employment of platter turners. Platter turners are union musicians whose sole duty is to place phonograph records or transcriptions on turn-tables, turn them and remove them. In the larger Chicago stations they are paid $90 for a 25-hour week.

The networks last winter made new contracts with the union covering staff musicians in New York and Chicago. The new agreements provided a wage increase. The networks refused to agree to the union's demand that they would not furnish music to affiliates declared "unfair" by the union.

**A. B. T. U.**

The Associated Broadcast Technicians Unit of the International Brotherhood of Electrical Workers (A. F. of L.) has continued its organization drive throughout the country with a great deal of success. This union said April 15 that it had contracts covering technicians at 150 stations, while organization or negotiations were underway in at least 75 others. The NAB labor relations director has assisted dozens of stations in negotiations with this union.

**AFRA**

The American Federation of Radio Artists (A. F. of L.) has been so busy during the past eight months with projects previously undertaken that it has not expanded its territory to any considerable extent.

Last fall, the issue of whether Chicago staff announcers should receive extra pay for local commercials was settled by mediation and compromise. Those making $75 or more a week staff salary are permitted to do a specified number of local commercials without extra compensation. This issue was so complicated by its place in the general AFRA-network relationship that, at the same time, the commercial code was renewed until 1943; the sustaining talent agreements were renewed, with modifications; and NBC renewed its New York staff announcers' contract.

The "Chicago Formula" for payment of staff announcers is one of four now in effect. NBC at some of its managed and operated stations outside of New York and Chicago has agreed to turn over to staff announcers all talent fees it collects. CBS at some of its managed and operated stations outside of New York and Chicago has agreed to pay specified fees for local commercial announcing outside of regular hours. In New York, the networks pay specified fees for all commercials, local and network.

Negotiations toward an AFRA transcription code, covering actors, announcers and singers on transcribed programs, have continued throughout the winter and spring.

**IATSE**

The International Alliance of Theatrical and Stage Employees (A. F. of L.) maintains it has certain jurisdiction in television, but the various jurisdictional issues in this field have not yet come to a head. This union last month also laid claim to network sound-effects men—a claim disputed by AFRA.

**ACA**

The American Communications Association (CIO) continued to confine to the larger metropolitan centers in the northeast its efforts to organize technicians, announcers, salesmen and office help. The ACA now has contracts in Washington, Baltimore, Philadelphia, New York City and Buffalo.

Last winter, all broadcasting members were shifted from other locals to Broadcast Local 1, headed by Leonard Ohl of Philadelphia, and an organization drive was announced. Joseph Selley succeeded Mervyn Rathborne, resigned, as ACA president.

**ANG**

The American Newspaper Guild (CIO) did not enlarge its activities in the broadcasting field.

**LABOR ON THE AIR**

When the NAB Code of Program Standards was adopted two years ago, we were pretty sure that we could count on an unqualified endorsement from organized labor.

We had said that broadcasting stations were obligated to carry labor programs when they served the public interest. Time should not be sold for such programs. All parties to any controversy raised in a labor program should be afforded an equal opportunity before the microphone.

In other words, when a national labor issue of importance arose, a nation-wide network was obligated to give the justified amount of network time for discussion from all viewpoints.

When a labor issue of local importance arose, a local station was obligated to give the justified amount of its time for discussion from all viewpoints.

Time should not be sold for this discussion because the employer ordinarily could out-buy the union, and thus weight the argument in his favor. That wouldn't be fair play.

It turned out that labor wasn't with us, 100 per cent. A great majority of labor leaders, however, have given the code their enthusiastic support. We have heard nothing but praise of the national network policy in regard to the amount of time accorded labor leaders and government officials dealing with labor problems. The National Broadcasting Company alone had 43 labor talks
on the coast-to-coast network last year. William Green gave six of these; John L. Lewis, five. The Columbia and Mutual Broadcasting Systems carried about the same number.

Locally, labor has fared well under the code. Let me cite an instance:

On the coast-to-coast network last year. William Green gave six of these; John L. Lewis, five. The Columbia and Mutual Broadcasting Systems carried about the same number.

Locally, labor has fared well under the code. Let me cite an instance:

Out in Cincinnati, about 20,000 of those who work in town live across the Ohio river in half a dozen communities. Until last fall, they commuted by bus lines. One of these had a closed shop contract with the "Amalgamated," an A. F. of L. union of bus drivers and street car employees. The other had a closed shop contract with the "Brotherhood," an independent union of bus drivers and railroad employees. The two lines merged. A jurisdictional strike resulted. Service stopped completely. Taxis were at a premium. Thousands had to walk to work.

The issues in jurisdictional strikes are often confused and difficult for the general public to understand. And so L. B. Wilson, manager of Station WCKY, asked representatives of the two unions, the merged companies, government conciliators, and the city managers to sit around the microphone together, to explain the issues from their respective viewpoints.

Only the bus companies turned down the invitation. They said they would not have enough time before the broadcast to prepare their case.

The program was an outstanding success. Ideas were developed that aided materially in the settlement of the strike.

After the forum program, Mr. Wilson assigned several of his best news analysts to "cover" the strike. On a news basis, statements from all sides were carried as they were issued.

After the strike eventually was settled, the station reported to us:

"We found both the companies and the unions willing to cooperate in acquainting the public with the facts, and there was not a single case of objection by the unions, companies, or the listening public to the way our strike broadcast and our strike news was handled."

The forum type of program is not the only proper medium for a labor broadcast. It is an extremely fair means of presenting the issues and the arguments of all parties—because all sides reach the same audience—and round table discussion is often more fruitful than set speeches. A forum makes a good show, too. Labor leaders—and others as well—are inclined to forget that it takes showmanship to build and hold an audience.

There have been only two outstanding complaints against the operation of the code from labor quarters. They were much alike. Both came from the C. I. O. Both resulted from the refusal of stations to continue C. I. O. local "news" broadcasts for which C. I. O. unions bought time. The first was in 1939, against a small station in Akron, Ohio. The United Rubber Workers, a C. I. O. affiliate, had been broadcasting news and views about local labor troubles for some time. After the code went into effect, the station exercised a cancellation clause in its contract with the union, maintaining that its acceptance would constitute Code violation. The union refused the station's offer, however, of free time to discuss their problems from time to time, as the public interest warranted. Last fall, a San Francisco station refused to renew an expired contract with the local C. I. O. council for a similar program. Not only the station directly involved but all other stations in San Francisco offered the C. I. O. free time, as the public interest warranted, to discuss labor questions of general public interest. To date, this offer has not been accepted. In both instances, the C. I. O. unions complained to the Federal Communications Commission. The Commission informed them that there was nothing in the Communications Act of 1934 to require a station to accept any program.

Most of the other complaints—and they have been few—have arisen from differences of opinion between local labor leaders and station managers over the air-worthiness of programs or speeches proposed by the labor leaders.

For instance, a local business agent is conducting a strike involving 200 factory employees in a city of 150,000 population. He has a great deal to say about the situation and he wants to tell the whole world, too. And so he goes to the manager of a 50,000-watt, clear channel station that serves not only the 150,000 city dwellers but farmers 100 miles around and asks to buy or get free time to air his views. The station manager informs him that he cannot buy time, under the code, and that he regrets he cannot give away the time, either, because that station's far-flung audience or a good share of it just wouldn't be interested in hearing about the merits and demerits of a small strike.

On the other hand, the size of a strike certainly is not the only criterion for a broadcaster in determining whether it should be discussed on his station. A strike of three employees in a power plant which threw a community into total darkness would surely be of prime public interest.

In this connection, the NAB code manual says:

"The broadcaster who denies time to a labor leader or organization solely because the broadcast might "stir up trouble" or disturb the status quo is treading dangerous ground."

"Of course, no broadcaster would permit his facilities to be used to incite to riot or bloodshed. When a broadcaster is in doubt on this score, after reading the proposed script, he might well consult the proper police officials.

"On the other hand, the opinion of an employer that a labor program dealing with his employees would be "dangerous" should be considered for just what it is worth. It is certainly not for the broadcaster to decide that labor unions are good or bad, and give or refuse to give them time accordingly.

Not long ago, the NAB labor relations director helped to arrange for a national network program for a labor leader who had made his first request for time. First, he was surprised that he received it, and received it so promptly. Then he submitted his script. In it, he quite strongly attacked three of the largest industrialists in the country. The network lawyers looked it over, found no libel, and gave it their O.K. The labor leader was amazed.

"Do you mean I can say all that?" he asked.

We think labor is getting a pretty good break on the air.

Just a few weeks ago, the International Ladies Garment Workers Union (A. F. of L) raised a new question which was immediately referred to the Code Compliance Committee. This union had prepared and used with a great deal of success on several stations on a commercial basis a dramatic serial type of program, frankly loaded with propaganda about the benefits of union membership. In one city, all stations refused to accept the serial on the ground that its acceptance would constitute Code violation. The union wanted to know what our attitude was. The union maintained it had as much right to sell union memberships by advertising on the air as had a soap firm to sell soap.

Respectfully submitted,

JOSEPH L. MILLER,
Director of Labor Relations.
Public Relations

At the request of the War Department, Ed Kirby, NAB Director of Public Relations, was given an indefinite leave of absence by the Board of Directors to establish a radio department for the Army. As Chief of the new Radio Branch, Mr. Kirby reports directly to Major General Robert C. Richardson, newly appointed Director of Bureau of Public Relations of the War Department.

A full description of the organization and functioning of the new radio branch follows this annual report on the NAB’s public relations activities.

In 1941, American radio must win its service chevrons in a war emergency. It is about to undergo vast economic and social readjustments. It is already accommodating itself to a war condition in every aspect of management, programming and of engineering.

The American System of privately owned and competitively operated broadcasting is facing the most crucial test in its brief but brilliant twenty year record.

Such a thought underlies the deliberations of every broadcaster in attendance at this, the nineteenth annual convention of the NAB. It is pertinent, therefore, that we prepare at once for a new order of things.

For every consideration of self-interest must be submerged in service to the national defense.

No other industry has a more important mission for no other industry reaches such vast audiences of people—and with the spoken word—directly and immediately from the scene of action or from the seat of government.

Radio has a twofold mission: to keep the nation informed, and to inspire a loyalty of country, a pride in the Army and Navy, as the facts warrant.

Its mission, also, is to keep open the channels of trade and commerce, and thus justify its economic existence; to interest and retain large audiences of people before their loud speakers that maximum numbers may be reached instantly, when information must be relayed to the civilian population without loss of time or coverage—and thus justify its social being. The one makes possible the other.

It must, in addition, continue to provide opportunity for the expression of honest diversity of opinion and ideas in accord with the democratic principles we are defending, that truth and the facts may come out, upon which we may base a course of common action.

At the same time, the microphone must be denied to those who would foul its naturally simultaneous unifying character by promoting social, racial or religious strife and discord; it must be denied those whose alien-inspired demands for broadcasting time and air carry their hate and their prejudice.

Fortunately, this country has seen examples of both types of media: the American Newspaper Publishers Association who convene once a year—a management convention—and the American Society of Newspaper Editors who convene, separately, once a year—a convention of news specialists employed by management.

But this is quite a different thing from the use of democratic channels of mass communication by those whose only purpose in invoking the right of freedom of expression is to destroy it; whose only purpose in invoking the right of freedom of worship is to kill it; whose only purpose in using our democratic rights and media is to further advance the ruthless march of those who have no friendly inclinations toward us or toward our institutions.

In a war, every radio transmitter is a military objective, and their control and use a military and political achievement.

What is to be done about it?

This is the question American radio faces at this convention, and will continue to face tomorrow, next week and next year, and perhaps for several years to come.

The beginning and end of all radio problems lies in the character and quality of program service broadcast and heard.

The public relations position of any station, of any network or of the entire broadcasting industry, fundamentally, can be no better nor worse than the character of program service heard by those served.

Through no other means can we create a story to tell, for program service is the story. All else is secondary.

Public relations activities which do not permeate the daily radio program structure, or which are not directly and completely in accord—each with the other—visibly and audibly embarrass broadcasting, which may be heard and checked by friend or foe, eighteen hours the clock round.

Broadcasting has earned and can continue to earn public confidence through no superimposed public relations program which is not imbedded in actual program structure and in program improvement, artistic, social and technical.

It is time we start our public relations thinking in the program department. In the critical days ahead, new and greater demands are going to be placed upon the limited hours available for broadcasting. How we use time and talent is all important. Each program, whether musical, entertainment or otherwise must serve some useful purpose. Each day’s schedule must be balanced to serve the war-emergency needs of our civilian population, urban and rural, hungry for news, in need of diversion and entertainment, seeking information, relaxation and inspiration from their radio sets. These have been the goals of our operating policies in normal times; they become absolute necessities during times of the war emergency.

There is immediate need for a broader interchange of information, ideas and experiences among all stations through the NAB. There is immediate need for a broader coordination of program effort, for an expansion of contact work with press and other media, and among all social and governmental agencies, telling, interpreting, designing the story of radio. There is immediate need of a central NAB clearance agency that, from the ever-increasing multiplication of demands, program priorities may be established so that prime time is available for prime purposes; that the right time is not given to the wrong person or group.

There is immediate need for considering call of a second, but different, NAB convention in the months of June or July, to which management should send those responsible for programs, for news and for special events broadcasting, in order that these specialists, immediately concerned, will have opportunity to exchange and establish programming and news policies, commercial and sustaining, needed in the emergency we now face. Ample precedent exists for such a practical and intelligent separation in our older sister media: the American Newspaper Publishers Association who convene once a year—a management convention—and the American Society of Newspaper Editors who convene, separately, once a year—a convention of news specialists employed by management.

Since its inception three years ago, the Public Relations De-
partment has taken the position that so-called industry-wide public relations begins from the grass-roots up; that a radio station must serve the local needs of its community in accord with power, policy and income position, and in like fashion, a national network must serve similar interests in the national community. That, therefore, to the individual station or network is attracted every social, religious, educational, civic, political, labor and economic interest within its sphere—the yardstick of local and national "public interest, convenience and necessity." That if these interests are honestly served and fairly balanced, the station or network has solved its own public relations problem. But that if an individual operation fails to recognize, balance and serve such social and economic interests and differences in its field, it has created a problem of public relations not only involving itself—from possibly regulatory, and perhaps economic and social standpoints—but it has also created ill-will for the entire industry.

For, unlike in the newspaper field, where an individual paper may be singled out for unfairness and cited for editorial distortion, what the individual radio operation does wrong is somehow seized upon as typical of all. Condemnation comes down, not upon the heads of the few, but upon the heads of the many—the whole structure.

Radio is no stronger in the public mind than its weakest operation.

Herein lies the basic reason for a program of self-education on the one hand, and an expanded public relations operation on the other.

**Freedom of the Air**

Throughout the past year a consistent effort has been made to drive home the importance of a free American radio. The campaign was inaugurated at the San Francisco Convention where a plaque symbolic of freedom of the air was dedicated at the Golden Gate Exposition, with simultaneous ceremonies at the New York World's Fair, each ceremony being the occasion for a three network broadcast in which several hundred independent stations participated as well.

It is gratifying to report that both the concept and the phrase "freedom of the air" have now become part of the language of the day. Seldom does any prominent speaker fail to include "freedom of the air" as a term of the "freedom of the press," "freedom of religion" and "freedom in general" are discussed.

At Radio's Twentieth Birthday Party held in the Hotel Willard, Washington, last November, both President Roosevelt and Wendell Willkie congratulated the industry for its fairness in the heated presidential campaign, and declared that a free American radio must continue to rank alongside a free American press as cornerstones of American democracy.

**Continuing Benefits of the Code**

The industry continues to receive social and commercial benefits from the operation of the NAB Code. This will be especially marked during the development of the war-emergency.

The development of the George Foster Peabody Awards for Public Service Broadcasting was one of the public relations highlights of the year.

Reflecting the public relations position over the past year of the radio industry in important related fields, are the following reports representative of outstanding national organizations and social groupings:

**From the American News Publishers Association:**

My feeling is that relationships between newspapers and radio have constantly improved in recent years. They should continue to improve with better factual understanding on both sides of the tasks involved in each of these fields of endeavor. I cannot speak too highly of the attitude displayed by the officers and staff of NAB in their consistent effort to promote such understanding. The NAB office has been both attentive and efficient in meeting every request for information which I have had occasion to make as chairman of ANPA's radio committee.

**J. W. Studebaker,**

**U. S. Commissioner of Education.**

**From the United States Commissioner of Education:**

Education by radio is becoming increasingly effective through the combined efforts of broadcasters and educators. Information being received by the Federal Radio Education Committee indicates that broadcasters throughout the country are adhering to the principles in their Code by generously offering time and facilities to schools, colleges, and universities. This fact is substantiated by reports from the Educational Radio Script and Translation Exchange, of the FREC, which each year offers practical services to approximately 15,000 educational and civic radio groups, many of which are working in close cooperation with their local broadcasters. Experimentation in the studio, in the classroom, in listening groups, and in radio workshops is constantly creating programs and methods of utilization which are making radio a truly scientific aid to learning. Forums of the air, schools of the air, and news analyses organized and produced locally, regionally, nationally, and even internationally are but a few examples of the important contributions radio is making at every level of education.

Radio is our most instantaneous medium of mass communication. Its tremendous powers are being harnessed to the task of preparing our people to face unflinchingly the exigencies of the critical days ahead. People must have the facts upon which to base their judgments. Never in the history of our country has there been a greater need for clear and intelligent thinking. Dictatorships strike with the speed of one man's decisions. Democracies act with the approval of the majority. Learning processes must be speeded up—education for democracy must go into high gear. Radio is playing an important part in meeting this great challenge.

**From the National Council of Women:**

Women have become increasingly aware of the importance of radio in shaping public opinion. They have seen how radio has been used by the dictators to pave the way for the conquest of nation after nation. They realize fully that a propaganda offensive against the United States is now being waged from abroad in an attempt to spread confusion, to create disunity and to induce paralysis of thought and action in the United States. They know that the unremitting barrage of words hurled over the ether at the Western Hemisphere is aptly described by the Nazi propaganda machine as "bombs for the mind." And because of their complete understanding of the technique being used to undermine our national morale and unity, American women turn with renewed confidence to their own American system of broadcasting for the truth. They know that the Code adopted by the National Association of Broadcasters insures an impartial presentation of controversial issues and that the news presented by American broadcasters is not tinged with propaganda.

They are indebted to the radio industry for keeping faith with the American people, and enabling them to keep informed. A nation armed with the truth can face the problems which confront it with confidence, courage and a determination to move together, as a united people.

**From the Radio Council on Children's Programs:**

Under the joint sponsorship of the National Association of Broadcasters and the Radio Council on Children's Programs, with a grant of $1,500, a survey was undertaken in 1940 to further implement the standards on children's programs as set forth in the Code, adopted by the industry in 1939. As Vice Chairman and field representative of the Council, I have participated in this project. In 39 radio stations in 39 cities, representing data on children's programs and holding conferences with 5,000 club and civic leaders and 1,200 radio executives. The tour covered 25,500 miles in 5½
in “good works” which radio in the American way produces. It is one reason for the superiority of democratic as compared with atomized radio systems, and the strong independent stations, struggle to be due in part to the friendly competition in excellence, the rivalry of religious needs of their respective audiences, additional constructive benefit would result.

From National Conference of Christians and Jews:

From the Federal Council of Churches in Christ in America:

The wise course charted by the National Association of Broadcasters in adopting the broadcasting Code has resulted in self-regulation and has removed any existing reasons for external regulation. For this accomplishment on the part of American radio we are indeed grateful and watch with ever-increasing interest the steady growth of program standards at a time of national and world-wide uncertainty.

DR. FRANK C. GOODMAN, Executive Secretary.

From the National Council of Catholic Men:

Having made a survey of religious broadcasting by Catholics only a few months ago, and a similar survey in 1938, there is no doubt in our mind that radio’s service to religion is expanding. To that majority of station operators who, conscious of their public service obligation, acknowledge that religion is a definite and an important part of the public service, we express our thanks. But what is to be done about those operators who fail to see that in giving the denominational and religious groups are helping them meet the “public interest, convenience, and necessity” clause of the Communications Act; who refuse to give sustaining time, or else the less desirable hours of early morning, for religious programs.

The whole of the radio industry pretty well stands or falls together in public opinion. Unfortunately, therefore, the broadcaster who conscientiously seeks to discharge his public service obligation stands in danger of suffering because of the defaults of the less conscientious members of the industry.

Edward J. Heffron, Executive Secretary.

From National Conference of Christians and Jews:

This year the national radio networks reached a new high in effective sustaining programs. The increasingly better quality may be due in part to the friendly competition in excellence, the rivalry in “good works” which radio in the American way produces. It takes several entries to make a good horse race. The privately operated radio systems, and the strong independent stations, struggle for the blue ribbon listening audiences. This set-up, by the way, is one reason for the superiority of democratic as compared with totalitarian radio.

An effect of this competition is the demand for good program content made upon public service and educational organizations which appeal for free time. A higher standard in program offerings is required of these organizations. Better showmanship, in the refined sense of that term, is now as characteristic of sustaining programs as of commercials.

The National Name of Christians and Jews has never been denied time by any broadcasting system when it had programs to offer which were up to the standards that the American listening public now demands. This, we think, is a tribute to NAB as well as to the individual network companies, and to independent stations.

Radio is coming of age.

MRS. DOROTHY LEWIS, Vice Chairman.

EVERT R. CLINCH, Chairman.

The Radio Branch of the Bureau of Public Relations of the War Department

Last January all public relations of the War Department were re-organized under Major General Robert C. Richardson and placed directly under the Secretary of War.

The Bureau of Public Relations of the War Department consists of a Press Branch; a Pictorial Branch, for serving newsreels, motion picture industry and still picture agencies; a Radio Branch, to serve the nation’s information media and coordinate with other activities; a Special Features Branch to serve magazine and feature writers; and a Press and Radio Intelligence and Analysis Branch.

The Radio Branch is, broadly, divided into two divisions: a writers section, and a special events division. An Administrative Executive, Robert C. Coleson, formerly in charge of Radio and Special Events at the San Francisco Golden Gate Exposition, is responsible for the assignment and scheduling of work, and the follow-through on all detail. In the writers’ division, we have Jerry Ross, as Chief Script Writer, former New York Post newspaper man, free lance radio writer, formerly with Blackett-Sample-Hummert, and author of a dozen network script shows. Morris Jacobs, formerly with Benton and Bowles, and with Blackett-Sample-Hummert, who served as Program director for the Democratic National Committee in 1936, and who has had Army experience, is another staff writer. Also we have Joseph L. Brechner who has written the scripts on most of the Army Recruiting Transcription now on some 700 stations.

In charge of the Special Events Division we have Jack Harris, formerly in charge of News, Special Events and Sports at WSM, Nashville. As associates, are Brooks Watson, formerly in charge of News and Special Events for WMBD, Peoria, Illinois, and Ross Worthington, formerly producer of We, The People, and formerly with Pathe News. Mr. Worthington is responsible for coordinating the pictorial aspects of Army radio special events with the Pictorial Branch for newsreel and still picture coverage.

As liaison with educational broadcasters, commercial and non-commercial, is Captain Harold Kent, formerly in charge of Radio for the City of Chicago Public School System.

As Chief of the Bureau, they report to me, and I, in turn, am responsible directly to General Richardson.

The following information about War Department programs and policies will be helpful to members:

1. Clearances of all national network Army programs must be made through the Radio Branch.
2. Clearance of all commercial programs, local, regional, or national, who desire to originate from an Army Post, must be made through the Radio Branch in Washington.
3. It is not necessary to clear with Washington, any local program of a non-commercial nature. These can be cleared with the Commanding Officer of the post involved through the Public Relations officer at the Camp.
4. If you do not know the name of the Public Relations Officer in your area, it is my suggestion that your program manager write or phone the Public Relations at Camps so that your station may have direct and immediate contact with the Army in your area.
5. Army personnel may appear on commercial programs, provided it is done in their own leisure time and in accord, with their own free choice as individuals. Under Army regulations, no endorsements or testimonials may be given or inferred.
6. Commercial programs from Army posts must be preceded by a disclaimer in language substantially as follows:

Radio is coming of age.
"The origination of this broadcast from (name of Fort or Camp) does not, of itself, constitute an endorsement by the War Department, or its personnel, of the product advertised, the origination of the broadcast from this station being made solely for the entertainment of the military personnel stationed here."

7 Army bands may not be used on commercial programs. Army bands may be picked up by remotes from camps, or on programs of strictly Army nature, they may now broadcast from the studios of the stations.

8 Army radio program ideas, or special events features are offered radio stations and networks purely on their merits and inherent news interest.

9 The transcriptions now being used by the Recruiting Service are regarded as its prime radio recruiting requirement; additional programs on individual stations are not requested, but there is nothing to prevent local stations from working with local recruiting officers in developing special events programs as the opportunity presents itself.

10 News broadcasters should be especially careful to check unconfirmed reports. Definite evidence exists that deliberate attempts have been made by subversive elements to manufacture fear and hysteria by starting campaigns of rumors such as epidemics sweeping over camps, hoping for publication by air or press. Every rumor and unsupported “story” should be checked immediately with the Public Relations officer of the camp. The policy of the Army is to make all facts available, except those of a strictly military secret nature, or in time of war, such stories as movements of troops, and the like, which would be helpful to an enemy.

11 The services of the Radio Branch writers division is available to any station or writer or advertising agency who desire to develop material upon which broadcasts may be based, such as the story of various divisions and regiments, their battle records, individual heroes and citations, their battle songs, traditions and story behind their insignia, etc.; human interest stories; procurement stories—stories showing the importance of the man on the production line backing up the man on the firing line; animal stories such as the training of carrier pigeons; women’s interest stories such as the new corps of women Lieutenants, Army hostesses, and Army housekeeping stories, recipes, traveling laundries; educational stories showing the training of farm and city boys to be radio operators, machinists, parachute jumpers, flying cadets, etc.

12 Our Special Events Division can, within regulation, make arrangements for clearance of broadcasts involving use of Army planes, equipment or troops. In the forthcoming Army maneuvers there will be many opportunities for exceptionally newsworthy broadcasts. These maneuvers will be the largest ever staged by any country in peace-time history. They will show the result of the intensive training our new Army has received and will test our combat ability as a fighting machine.

13 Before making public commitment to broadcast any local event of a spectacular military nature, such as blackouts of a city where use of planes and anti-aircraft artillery may be contemplated, it would be helpful to all concerned if a check were made direct with the War Department in Washington through the Radio Branch, to ascertain if the use of military equipment will be authorized. One or two stations have been innocently embarrassed because of giving advance publicity for the broadcast of events based upon the over-enthusiastic statements by local civilian groups or, in some instances, by national guard officers whose units have not been inducted into Federal service and who are not authorized to make commitments for regular Army material or troops. Inquiries may be made by mail, wire or phone. There is always someone on duty in the Radio Branch, from 8:15 A.M. Eastern Time, through to 6:30 P.M. Later on these hours will be extended on through midnight.

The following are authorized to handle telephone inquiries directly with stations:
Robert C. Coleson; Jack Harris; Brooks Watson; Ross Worthington. The War Department telephone number is Republic 6700, Washington.

In case of doubt, call, anytime.

14 Captain Gordon Hittenmark, in charge of radio for the Morale Branch of the Army, is working through the Radio Branch of the Morale Officers of the camps, so that announcements of “early bird morning broadcasts,” on stations within range of the soldiers in the various camps, may procure personal items about the soldiers in camps, etc., which fit into the structure of typical early bird shows.

15 Attention of stations is called to days around which great patriotic interest centers, such as: Flag Day, June 14, the 4th of July, September 14, the day on which Francis Scott Key wrote the Star Spangled Banner, and November 11, Armistice Day.

16 A special service is being set up to serve domestic foreign language broadcasters.

17 The development of such additional programming policies as may be needed through the war-emergency, will be cleared directly through the NAB Code Committee as new conditions warrant.

The War Department is most grateful for the wholehearted cooperation it is receiving. General Richardson on many occasions has expressed his admiration for the public-spirited, patriotic manner in which the industry is going about the service of national defense.

To these, may I add my own expression of thanks.

Respectfully submitted,

Ed Kirby,
Director of Public Relations,
Chief, Radio Branch, War Department.

Research

The NAB Research Department has materially expanded its work since the San Francisco Convention in August of 1940. The NAB Board of Directors and the San Francisco Convention approved the “Unit Plan For Measuring Broadcast Advertising Volume” which called for the collection of monthly information from radio stations giving a list of accounts and products advertised with basic information on source of business, type of rendition, broadcast time, broadcast length and the number of times per month. The information thus collected was to be tabulated in terms of time units by classes of accounts to fulfill the need in the industry for an analytical record of business done which can be used by the radio industry in selling more broadcast advertising.

The approved plan authorized experimental operation to the end of the year 1940 and asked that appropriation be made to continue the service until the Research Committee and the Research Director could recommend a permanent plan of operation.

Membership of the NAB Research Committee is as follows:

- William J. Scripps, Chairman—WWJ, Detroit, Michigan
- H. M. Beville, Jr., Research Manager, NBC, New York City
- Arthur B. Church, President, KMBC, Kansas City, Missouri
- James D. Shoate, Vice President, WLS-WSAI, Chicago, Ohio
- Frank N. Stanton, Research Director, CBS, New York City
- Theodore C. Streibert, Vice President, MBS, New York City
- Lee B. Wailes, Manager, Westinghouse Radio Stations, Inc.
- James W. Woodruff, Jr., President, WRBL, Columbus, Georgia
- Neville Miller, NABi Washington, D. C.—Ex officio
- Lee B. Wailes, Manager, Westinghouse Radio Stations, Inc.
- James W. Woodruff, Jr., President, WRBL, Columbus, Georgia
- Neville Miller, NABi Washington, D. C.—Ex officio

The experimental operation has been concluded. “Broadcast Advertising Unit Report” were released for each month, September through December, 1940. Considerable time was spent in investigating various means of presenting the information and, for that reason, no definite schedule for the release of information has yet been evolved. The September Unit Report was released in the NAB REPORTS December 6, 1940. The October Unit Report was released January 7, 1941; the November Unit Report
February 21, and the December Unit Report appeared in the NAB REPORTS March 21.

On resolution of the Research Committee in meeting January, 1941, notice was given in the December Unit Report that future reports would not appear in the NAB REPORTS, but would be sent to only those stations actually participating in the undertaking. Those stations submitting monthly reports of their business will receive monthly analyses of broadcast advertising.

**BROADCAST ADVERTISING RECORD**

Beginning with the January analysis, the Unit Plan will be operated under the name “Broadcast Advertising Record”. January “Broadcast Advertising Record”, published and released in the week of May 5, is a completely new report—revised—a new format to increase the value of this sales tool to individual stations. The Research Department, in collaboration with the Department of Broadcast Advertising, considered the direct application of the analysis to the specific station problem. After careful consideration, it was decided to rearrange the Report, adding some features and eliminating others which did not have direct application.

“Broadcast Advertising Record” consists now of three basic tables. Table I is a detailed analysis of Local broadcast advertising. Local business is presented by type of account under both retail and general advertising and is given in total units for all stations reporting. In an adjacent column, new figures are presented showing average per station. A blank column follows, headed “your station”, into which the monthly units for each station can be written in for direct comparison with the average figures. In the following five columns, Local advertising placed in five population classifications is presented to give a positive comparison of the type of business placed in markets of the size of the station using the “Record”.

Table II presents the same information for national spot business showing by type of account, retail and general, for all stations reporting with average per station. A blank column to be entered by the individual station, and national spot business placed in each of five population groups.

In evolving these tables, it was realized that the sales problem in securing local broadcast advertising is usually handled within the offices of the individual station, with a sales manager in charge and a staff of salesmen making the contacts. Separate handling of this information, presenting its complete analysis in one table, increases its value manifold. Similar handling of national spot business, which, although completely controlled by the station, is usually handled through the use of branch offices or national representatives and contact with national advertising agencies, warranted separate treatment.

The third table presents totals for the entire industry—a consolidation—presenting by type of account Local units, National Spot units, Region Network units and National Network units with a total of the four classifications.

It will be noted in the January “Broadcast Advertising Record” that a tabulation by type of station has been omitted. A decision was reached to eliminate the analysis by station classification because of its limited value. Separate grouping of clear, regional and local channel stations has statistical value, but does not contribute materially to the sales problem of selling within a specific market. Competition within the industry is seldom confined to class of stations within a metropolitan area. The real situation is that local, regional and clear channel stations compete for advertising business within cities.

The population classifications presented in the January “Record” were settled upon after considerable study. In prior analyses, nine classifications were used. However, these were regrouped because it was considered that the sales problems in broadcast advertising were not materially different in various cities to warrant the detailed breakdown. The new classification is as follows:

<table>
<thead>
<tr>
<th>Population Classification</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than 25,000 population</td>
</tr>
<tr>
<td>25,000 to 100,000</td>
</tr>
<tr>
<td>100,000 to 250,000</td>
</tr>
<tr>
<td>250,000 to 1,000,000</td>
</tr>
<tr>
<td>1,000,000 and over</td>
</tr>
</tbody>
</table>

Work is now well under way in the preparation of a master file by individual advertiser account. The record is started for the month of January. In the completed file a card will be kept for each individual advertiser showing product advertised, the stations used, with type of rendition, time of broadcast and total units. The reference value of this file will be immediately felt by the Department of Broadcast Advertising and, as it develops, its value will assume great importance to participating stations. “Broadcast Advertising Record” gives a quick answer to the question of the prospective advertiser, “How much broadcast advertising is placed by businesses like mine?” The master file will supply the normal question which follows, “What businesses?”

The suggestions of the Department of Radio Advertising and the Research Committee published in the January Broadcast Advertising Record are quoted here because they sum up the use of the “Record” in concise fashion. Those suggestions are as follows:

1. Fill in your own figures on Tables I and II.
2. See from what sources you get no business or are below average compared with other stations.
3. Compare your own Record with stations in markets of similar size and figure your own relative standing.
4. Pick out one or two sources where you are weakest. Concentrate for a time on a special drive to get such accounts, then later go on to others in turn.
5. Write to the NAB Department of Broadcast Advertising for general data on specific account classifications, plus success stories.
6. Call a meeting of your sales staff and department heads to plan a campaign with specific presentations, using this Record as a starter to show your prospect how others in this field are using radio. Add punch to your presentations with specific program ideas, announcement campaigns, success stories, etc.
7. Then let us know what success you have, so that others may profit, and vice versa.”

**OPERATION OF THE “RECORD”**

During the experimental period, the Research Department has experimented with a station reporting system designed to minimize the work involved in station cooperation. It is termed a “write-back” system. Essentially, it involves submitting forms on which the previous month’s business is typed for the station’s correction to conform with the current month’s business. A service is rendered the station by rearranging the accounts in the exact classification of advertiser used in the “Record”. This furnishes the station an analysis of its business which may be compared directly with the “Record” tabulations. Experimentation with this system of reporting has established its value and the Research Committee has decided to adopt it as standard procedure as soon as a final budget for the entire operation is adopted.

At the direction of the Research Committee, the Research Director has entertained bids from various tabulating houses for the work of machine tabulation. A recommendation will be submitted to the NAB Board at its meeting Monday, May 5, in St. Louis, on the budget required for the operation of the “Broadcast Advertising Record” and the details of how it is to be operated.
On recommendation of the Research Committee and the Director of Research, the NAB Board of Directors authorized the publication of a "Survey of Urban Radio Listening in the United States." The field work of the Survey was conducted by quarter during the years 1938 and 1939 by the Research Organization, Crossley, Inc., for the Columbia Broadcasting System and the National Broadcasting Company. The method employed in developing information on radio ownership and listening habits is basically the same as that used by the Joint Committee on Radio Research in conducting the Rural Radio Ownership Study published in 1939. Since NAB was a participant in the Joint Committee on Radio Research and a party to the publication of the Rural Survey, it was eminently proper that it sponsor the publication of an Urban Survey to complete the information on radio listening in the entire country.

On March 24, the publication "Urban Radio Listening in the United States" was mailed over to Neville Miller's signature to the NAB membership, principal radio advertisers and advertising agencies—a mailing list of some 8,000 names. The Survey was received with great enthusiasm from stations, advertisers and agencies. Letters to NAB, the Columbia Broadcasting System and the National Broadcasting Company have heralded the Survey as a major contribution to the knowledge of the broadcasting industry.

Requests for copies of "Urban Radio Listening in the United States" have just about exhausted the supply available at NAB. Consideration is now being given the possibility of printing an additional supply.

A great number of stations, advertisers and agencies have written for detailed information to CBS, NBC and the NAB following the suggestion printed on page 40 of the publication.

METHOD STUDIES

The NAB Research Committee, in addition to the work involved in the operation of the "Broadcast Advertising Record" and the publication of "Urban Radio Listening in the United States," undertook a study of methods used in measuring program audience since the San Francisco Convention.

The Committee invited the C. E. Hooper Organization to present to it a report on the method employed in the "Hooper Radio Report 'National Returns' on Radio Programs." The Hooper reports are released monthly to subscribers. The method employed is known as "telephone coincidental." The method report, submitted to the Research Committee by Mr. C. E. Hooper and Dr. Matthew N. Chappell of C. E. Hooper, Inc., shed much light on the operation of the telephone coincidental method and sought to establish the merit of the method in competition with all others employed.

On invitation of the Committee, Mr. Paul West, President of the Association of National Advertisers, arranged to have Mr. A. W. Lehman, Managing Director of the Cooperative Analysis of Broadcasting, present a report on the method employed for that program rating service. The CAB method is described as that of telephone recall. Mr. Lehman delivered a very informative discussion of the method and showed the results of some exploratory studies of its operation in comparison to other types of measurements.

It is the intention of the Research Committee to hear further reports on methods employed in program audience measurement, preparatory to the preparation of a Research Manual for the use of the membership in placing or conducting audience measurement research.

FACILITIES CONTRACT—4A CONFERENCE COMMITTEE

The Director of Research was appointed a member, ex officio, of the 4A Conference Committee. This Committee was appointed by the Association to meet with a Time Buyers' Committee of the American Association of Advertising Agencies to effect needed changes in the "standard order blank for spot broadcasting," published in 1933.

The membership of the 4A Conference Committee was as follows:

Harry C. Wilder, Chairman—WSYR, Syracuse, New York
Roy L. Harlow, Vice President, The Yankee Network
Richard H. Mason, Manager, WPTF, Raleigh, North Carolina
Edward W. Petry, President, Edward Petry & Company, Inc.
Frank A. Seitz, Vice President, WFAS, White Plains, New York
Dale L. Taylor, Manager, WENY, Elmira, New York
Lee B. Wailes, Manager, Westinghouse Radio Stations, Inc.
Paul F. Peter, NAB, Washington, D. C.
Russell P. Place, NAB, Washington, D. C.—Ex officio

John Benson, President, of the 4A's, submitted to Neville Miller, prior to the San Francisco Convention, a list of points established by the 4A Time Buyers' Committee which were felt needed correction in a revision of the standard order blank.

At the first meeting of the NAB Committee with the 4A Committee, it was established that there existed a need for a complete revision and the NAB Committee undertook the task of drawing up a new form. The Committee felt that the form should be set up as a contract, rather than as an order blank, and obtained the approval of the 4A's on this feature.

Numerous meetings of the NAB Committee, alone and in conference with the 4A Committee, resulted in the publication, January 7, of the “Standard Facilities Contract (recommended by NAB).” Publication of this form was pursuant to the instructions of the Executive Committee of the NAB Board of Directors.

The American Association of Advertising Agencies objected to certain features of the Facilities Contract and joint meetings of the two committees were resumed. After a series of meetings, a revision of the contract was submitted to the NAB Board and approved. The new form, labeled "Agency Contract (recommended by NAB, March 21, 1941)," was published in the NAB REPORTS, March 21.

Subsequent to the publication of the March 21 Agency Contract form, the 4A’s registered objections to certain features of it. It is quite apparent that the two Committees cannot reach complete agreement on the subject. However, the industry has gained much by the work of the 4A Conference Committee.

RECOMMENDED INVOICE FORM—FOR THE ACCOUNTING COMMITTEE

The American Association of Advertising Agencies indicated their desire to standardize invoice forms used in station billing for advertising service. It was pointed out that a wide variety of forms are employed on which is listed a varying amount and arrangement of information on the subject of billing, which makes it difficult for the advertising agency and the radio advertiser to effectively handle the bills.

The handling of this problem with the American Association of Advertising Agencies was originally assigned to the 4A Conference Committee in conjunction with its work on the “Facilities Contract.” Considerable progress was made in developing a recommended invoice form in consultation with the NAB Accounting Committee. The project was turned over completely to the Accounting Committee when the 4A Conference Committee had completed its work.

The membership of the NAB Accounting Committee is as follows:

H. K. Carpenter, Chairman—Vice President, WHK-WCLE, Cleveland, Ohio
S. R. Dean, Assistant Treasurer, CBS, New York City
E. J. Gluck, President, WSOC, Charlotte, North Carolina
Harry F. McKeon, Auditor, NBC, New York City
Glenn Snyder, Station Manager, WLS, Chicago, Illinois 
Harold Wheelahan, Manager, WSMB, New Orleans, Louisiana 
Paul F. Peter, NAB, Washington, D. C., Ex officio

The NAB Accounting Committee is currently reviewing invoice forms drawn up by the Research Department. The principal feature of the new forms will be the substitution of a certificate of performance offered to replace the affidavit of performance which has been used in the past. Discussions with the 4A Fiscal Committee have indicated their open-mindedness on the subject, contingent only on the NAB ability to educate advertisers and agencies on the significance of station logs.

It is hoped that agreement can be reached with the 4A’s at an early date, and recommended invoice forms published as a revision of the NAB Accounting Manual.

CENSUS OF 1940

NAB Research Department has been in contact with the Bureau of Census during the past year and has assembled a complete file of census information released to date. Final figures on population have been released by state and county. Preliminary figures from the Housing Census have been released on occupied and unoccupied dwelling units by state and county. The Bureau has started the release of valuable information to the broadcasting industry on population of metropolitan areas. The 1930 Census definition of metropolitan areas has been continued. However, rather than confine their study to areas of 100,000 population and more, the 1940 releases will include those of population down to 50,000.

Considerable information has been released on the Census of Manufactures, the Agriculture Census, the Census of Business and preliminary detail breakdowns of the Population Census.

No information has been released to date on radio ownership which was obtained in the Housing Census. The original schedule of the Census Bureau was to start releasing radio figures by state early in 1941. The work of the Bureau has been such that that schedule was abandoned and, as nearly as can be approximated now, the first releases of radio information will not be available before June. The Bureau of Census has displayed a spirit of cooperation and Mr. Howard G. Brunson, Chief, Housing Statistics, Population Division of the Bureau, in a letter dated April 8, 1941, has indicated that the radio information will be presented in the following detail:

1. All occupied dwelling units.
2. All owner-occupied dwelling units.
   a. White owners.
   b. Nonwhite owners.
3. All tenant-occupied dwelling units.
   a. White tenants.
   b. Nonwhite tenants.

The radio statistics for tenure and race, as indicated above, will be presented for each of the following areas:

1. All dwelling units in each state.
2. All urban dwelling units in each state.
3. All rural nonfarm dwelling units in each state.
4. All rural farm dwelling units in each state.
5. Each city with 50,000 inhabitants or more, separately.
6. Each metropolitan district, separately.

Statistics regarding radio will be presented in the Second Series Bulletins for all occupied dwelling units as follows:

1. All occupied dwelling units in each county.
2. All rural nonfarm dwelling units in each county.
3. All rural farm dwelling units in each county.
4. All occupied dwelling units in each urban place.

NAB DAYLIGHT SAVING TIME SURVEY

At the request of the NAB Board of Directors, the Research Department sent to all stations on March 12, 1941, a Daylight Saving Time questionnaire. The Survey was designed to develop information on the experience of the radio industry with daylight saving in effect in certain sections of the country during summer months. The questionnaire was sent to 837 stations and replies were received from 457. This represents a return of 55%.

The Research Committee reported the results of the Survey to the NAB Board of Directors.

SURVEY OF PROGRAMS ORIGINATING AT ARMY POSTS

At the request of the Public Relations Office of the War Department, the NAB Research Department conducted a survey of programs originating at army posts. A questionnaire on the subject was sent to 836 stations on March 5, 1941. The replies were received from 581 stations, a return of 40%.

The questionnaires, as submitted, have been turned over to the Public Relations Department of the War Department.

MERCHANDISING POLICY AND PRACTICE SURVEY

On request of the Sales Managers’ Committee and the Department of Radio Advertising, the Research Department conducted a survey on merchandising policy and practice among a selected group of stations in the NAB membership to obtain information on the subject for use at the St. Louis Convention. A preliminary report on the subject will be made to the Sales Managers’ meeting at the Convention.

STATION ANALYSIS

As of April 1, 1941, the stations in the United States and Possessions numbered 891. An analysis of these by class of station is presented by the following table, together with the count of NAB member stations within each classification. These classifications agree with those used by the Federal Communications Commission in analyzing financial data furnished by stations. For purposes of comparison, figures as of July 15, 1940 are also presented.

[17]
The second analysis of radio broadcast stations by population of metropolitan district or city appears in the following table. The information presented here shows the total number of stations in each classification as of April 1, 1941 and NAB member stations as of May 1, 1941. The nine population classifications agree with those employed by the FCC in their financial analyses.

**GENERAL RESEARCH ACTIVITY**

In addition to the specific projects mentioned in the foregoing paragraphs, the Research Department has continued the work of assembling basic industry data and can report progress since the San Francisco Convention. The material now at hand has enabled the Research Department to better serve the various departments of the Association, the membership, and the many requests received from advertisers, agencies and the general public.

During the course of the last year, the Research Department has devoted much time to the music copyright problem under the direction of President Neville Miller.

The Department has rendered research counsel to the Engineering Department, the Labor Relations Department, the Public Relations Department, the Department of Broadcast Advertising, the Promotion Department and the Office of the Secretary-Treasurer.

During the course of the last year, the NAB Research Department has been called upon by the membership to a much greater extent than heretofore for research counsel and general industry information.

Your Research Director feels that the Association has advanced in matters of research during the past year. He has enjoyed his work for the industry and is looking forward to further progress during the coming year.

Respectfully submitted,

**PAUL F. PETER,**
Director of Research.

**Promotion and Circulation**

National Defense, Listen Before You Vote, Radio's 20th Birthday and Reallocation were focal points of attention for broadcasters and this department since last August.

Continuing aid to National Defense is in line with the Board of Directors' 'Defense of the Nation' resolution adopted at the San Francisco Convention. The aid is a demonstration of the desire, ability and capacity of the industry to assist the nation in this period of emergency. Indications are that these duties will increase.

Assistance to various government departments has been in accordance with the accepted industry understanding of the American System of Broadcasting. This has resulted in outstanding service to the country and the economical use of facilities of broadcasters. In all contacts the fact is emphasized that listening is voluntary, cannot be commanded; that if stations were to sanction violation of the listener-interest principle, there would be only one result—less listening, fewer listeners.

**MAN POWER**

Through NAB nearly 700 broadcast stations have pledged their cooperation to secure skilled man power for national defense projects by broadcasting Man Power announcements. Through radio at least 325,000 skilled workers were added to national defense employment rolls up to April 15, 1941, according to the United States Civil Service Commission.

**NAVAL AVIATION**

Procurement of embryo flyers for the Navy continues to be another service to the nation. According to Captain F. E. M. Whiting, USN, the announcements have sharply increased the number of accepted candidates. Because of age, educational and physical requirements for Navy flyers this is one of the most difficult and exacting recruiting assignments. On April 10 Captain Whiting expressed his appreciation of the help the Navy had received from the broadcasting industry and urged its continuance.

Earlier in the year, broadcast stations throughout the country cooperated with selective service. They also cooperated with the Department of Justice in alien registration.

At this writing the Treasury Department has made known preliminary plans for the sale of securities to the public. Several conferences have been held with officials in charge.

Another service which falls into the national defense category is to provide information concerning various groups, organizations or individuals claiming to be engaged in or affiliated with national defense.

Contacts with the Army are handled directly with Ed Kirby, NAB Director of Public Relations, who has been loaned to the Army for the duration. It is anticipated that before convention time the local recruiting-radio problem will be satisfactorily adjusted.
RADIO MOVIN' DAY

Months before FCC released its orders for stations to move to new frequencies the plan for marshalling the entire radio industry had been prepared. In actual practice servicemen, dealers, manufacturers, jobbers, utilities, electric associations, educators, civic groups, governors of states, mayors of cities, all contributed to the educational and promotional efforts of broadcast stations.

The nature and amount of united effort which taught the new dial locations to 100,000,000 listeners were presented in the brochure, "56 Days," mailed all stations and agencies on March 27.

A unique feature of the campaign was the assistance received from forty-seven of the forty-eight governors and the Governor of Puerto Rico. These men issued official proclamations or statements designating March 29 as Radio Movin' Day. Proclamations received wide newspaper publication. In some instances they were broadcast by every station within a state.

The cooperating governors and the names of the broadcasters who secured the proclamations on behalf of the radio industry follow:

Governor Frank M. Dixon, Alabama
Howard E. Wills, WSFA, Montgomery
Governor Sidney P. Osborn, Arizona
Dick Lewis, KFAR, Phoenix
Governor Homer M. Atkins, Arkansas
Ed Zimmerman, KARK, Little Rock
Governor Colbert L. Olson, California
Howard Lane, KBKB, Sacramento
Governor Ralph L. Carr, Colorado
Gene O'Fallon, KFEL, Denver
Governor Spessard L. Holland, Florida
W. Walter Tison, WFLA, Tampa
Governor Eugene Talmadge, Georgia
J. Leonard Reisch, WSB, Atlanta
Governor Chase A. Clark, Idaho
C. G. Phillips, KIDO, Boise
Governor Dwight H. Green, Illinois
Leslie C. Johnson, WBHF, Rock Island
Governor Henry F. Schricker, Indiana
Eugene C. Pulliam, WIRE, Indianapolis
Governor George A. Wilson, Iowa
J. O. Maland, WHO, Des Moines
Governor Payne Ratner, Kansas
Ben Ludy, WIBB, Topeka
Governor Keen Johnson, Kentucky
W. L. Coulson, WHAS, Louisville
Governor Sam Houston Jones, Louisiana
James A. Noe, WNOE, New Orleans
Governor Sumner Sewall, Maine
George Kelley, WCSH, Portland
Governor Herbert R. O'Conor, Maryland
John Elmer, WCBM, Baltimore
Governor Leverett Saltonstall, Massachusetts
John Shepard, III, Yankee Network, Boston
Governor Murray D. Van Wagoner, Michigan
John E. Petzer, WKZO, Kalamazoo
Governor Harold E. Stassen, Minnesota
Earl H. Gammons, WCCO, Minneapolis
Governor Paul B. Johnson, Mississippi
Wiley P. Harris, WJDX, Jackson
Governor Forrest C. Donnell, Missouri
Merle Jones, KMOX, St. Louis
Governor Dwight Griswold, Nebraska
John J. Gillin, Jr, WOW, Omaha
Governor E. P. Carville, Nevada
W. D. Warren, KOH, Reno
Governor Charles Edison, New Jersey
Albert J. McCosker, WOR, New York
Governor John E. Miles, New Mexico
Ivan R. Head, KYVF, Santa Fe

In addition to the governors' proclamations there were 148 proclamations issued by the mayors of cities.

Strong support was accorded Movin' Day by utilities which serve a large segment of the entire population. Among them were:

Appalachian Power Company
Boston Edison
Buffalo, Niagara & Eastern Power Company
California Oregon Power Company
Central Illinois Electric and Gas
Central Illinois Public Service
Cincinnati Gas and Electric
Cleveland Electric Illuminating Company
Columbus (Miss.) Light & Power Dept.
Consolidated Edison of New York
Consolidated Gas, Electric Light & Power Company of Baltimore
Dallas Power & Light Company
Duke Power Company
Electric Power Board of Chattanooga
Georgia Power Company
Grays Harbor Public Utility District
Indiana Service Corporation
Kansas City Power and Light Company
Kansas Gas & Electric Company

Proclamation Statement

Governor Robert A. Hurley, Connecticut
Thomas C. McCray, WHTC, Hartford
Governor Walter W. Bacon, Delaware
J. Gorman Walsh, WDEL, Wilmington
Governor Robert O. Blood, New Hampshire
Earle Clement, WLH, Laconia
Governor Herbert H. Lehman, New York
Harold Smith, WOR, New York
Governor William H. Willis, Vermont
Charles P. Hasbrook, WCAX, Burlington

Governor J. Melville Broughton, North Carolina
Edney Ridge, WBHG, Greensboro
Governor John N. Meserve, North Dakota
F. E. Fitzsimonds, KFYR, Bismarck
Governor John W. Bricker, Ohio
Richard A. Borel, WBNR, Columbus
Governor Leon C. Phillips, Oklahoma
Neal Barrett, KOMA, Oklahoma City
Governor Charles A. Sprague, Oregon
C. Roy Hunt, KOIN, Portland
Governor Arthur H. James, Pennsylvania
Dr. Louis Levy, WCAU, Philadelphia
Governor J. Howard McGrath, Rhode Island
John J. Boyle, WJAR, Providence
Governor Burnet R. Maybank, South Carolina
G. Richard Shafto, WIS, Columbia
Governor Harlan J. Bushfield, South Dakota
A. A. Fahy, KABR, Aberdeen
Governor Prentice Cooper, Tennessee
Harry Stone, WSM, Nashville
Governor W. Lee O'Daniel, Texas
Harold Hough, WBAP, Fort Worth
Governor Herbert B. Mayhew, Utah
S. S. Fox, KDLV, Salt Lake City
Governor James H. Price, Virginia
C. T. Lucy, WRVA, Richmond
Governor Arthur B. Langlie, Washington
H. J. Quilliam, KIRO, Seattle
Governor Matthew M. Neely, West Virginia
Howard L. Chernoiff, WCHS, Charleston
Governor Julius P. Heil, Wisconsin
H. H. Born, WIBB, Sheboygan, and
James F. Kyler, Janesville
Governor Nels H. Smith, Wyoming
H. L. McCracken, KYAN, Cheyenne
Governor Guy J. Swope, Puerto Rico
John A. Zerbe, WKAQ, San Juan
Kentucky Utilities Company  
Los Angeles Bureau of Power and Light  
Louisville Gas & Electric Company  
Monongahela West Penn Public Service Company  
Nashville (Tenn.) Electric Service  
New Orleans Public Service  
Northern States Power Company (Minneapolis-St. Paul)  
Oklahoma Gas and Electric Company  
Pacific Gas and Electric Company  
Pacific Power and Light Company  
Peoples Power Company  
Philadelphia Electric Company  
Potomac Electric Power Company (Washington, D. C.)  
Public Service Company of Colorado  
Puget Sound Power & Light Company  
Rochester Gas & Electric Company  
San Antonio Public Service Company  
Southern California Edison Company  
South Carolina Electric & Gas Company  
Southwestern Gas and Electric Company  
Southwestern Public Service  
Toledo Edison Company  
Virginia Electric and Power Company  
Virginia Public Service Company  
Western Massachusetts Electric Company  
Wisconsin Power & Light Company

Most distributed stuffers but some, such as Virginia Electric and Power, bought newspaper space, air time and made car and bus cards available to local stations. One bus company included mention of the change over in a letter to a list of 100,000 patrons.

The Ohio Bell Telephone Company, Cleveland and Toledo, distributed stuffers as did the Southwestern Bell Telephone Company, San Antonio. In Tampa, the Peninsular Telephone Company included Movin’ Day stuffers in bills, the practice followed by Inter-Mountain Telephone Company, Johnson City, Tenn., and Missouri Telephone Company, Columbia.

The Northwestern Ohio Natural Gas Company, Toledo, was among the exclusive gas utilities which cooperated in Movin’ Day. Assistance was also had from the city of Richmond (Va.) Gas and Water Department.

Department stores in many cities, grocery chains and gasoline and oil marketing companies distributed hundreds of thousands of leaflets and logs.

Members of the Radio Manufacturers Association supplied several million logs and tens of thousands of window streamers and a smaller number of window trims. One company scheduled a page in the Saturday Evening Post.

“LISTEN BEFORE YOU VOTE”

Preparation for the “Listen before You Vote” campaign began prior to the 1940 NAB Convention. Tempo increased in the early fall and peaked at election time. The emphasis laid on hearing both sides of the question resulted in an increase in the stature of radio. The use of radio is credited with producing the largest number of ballots ever cast in a presidential election. The 1940 total was 49,808,624, an increase of 4,200,000 over the 1936 record.

RADIO'S 20TH BIRTHDAY

Radio's 20th Birthday was celebrated throughout the country between November 11 and 30, 1940. Station managers and their personnel proved particularly adept in building interesting programs which focused public attention on radio's contribution to the American way.

On November 26 the National Radio Birthday Party was held at Hotel Willard, Washington, D. C. Guests included all members of FCC, members of the Cabinet, Senators, Representatives and more than a score of men who had been in radio for twenty years. Letters were received and read at this birthday celebration from President Roosevelt and Wendell Willkie.

RADIO CHRISTMAS

The December promotion, “$5 Million Radio Sets by Christmas,” was widely supported. The result is seen in the findings of NAB's Research Department that the total number of sets in operation in the United States at the year's end had increased to 50,100,000.

Respectfully submitted,

ARTHUR STRINGER.

Broadcast Advertising

From May 1939 to January 31, 1941, the NAB Bureau of Radio Advertising functioned as an agency to serve the entire industry in matters relating to the commercial aspects of its business. Under the direction of Samuel J. Henry, Jr., this Bureau inaugurated many services and activities of great value to all broadcasters. The Bureau was a sub-department of the Association and its work was largely experimental. The value of the activity was made so apparent and the demand for enlarged efforts in a commercial field was so widespread, that consideration had been given for some time to the affairs of the Bureau.

With Mr. Henry's resignation on January 31, 1941 as supervisor of the Bureau, the Sales Managers Committee recommended and the Board approved, the abolition of the Bureau and the creation of the Department of Broadcast Advertising as a coordinate department of NAB. Frank E. Pellegrin was named and on April 1 he assumed his duties as Director of the newly created Department of Broadcast Advertising.

Annual Report—Department of Broadcast Advertising

Much of the time since that date has been spent on organization, the establishment of a central filing system to classify and make available useful material, in setting up policies and planning a program of action to be carried out with the assistance of the Sales Managers Committee.

The aims and policies of the Department, as approved by the Sales Managers’ Executive Committee, are as follows:

Statement of Aims, Policies and Objectives Department of Broadcast Advertising, NAB

Recognizing that the whole structure of the American system of radio is dependent upon the steady flow of revenue from the sale of commercial time, it shall be the purposes of the Department of Broadcast Advertising of the National Association of Broadcasters:

1. To promote the use of radio as an advertising medium wherever and whenever possible. To accomplish this purpose by:
   a) Maintaining a constant and practical contact with advertising agencies, manufacturers, trade associations;
   b) Helping sales departments of member stations sell more radio time—locally, regionally, nationally.

2. To uncover new, fields for broadcast advertising revenue; to develop dealer-cooperative advertising for radio; to eliminate discrimination by advertisers against radio in favor of competing media; to compile and publish lists of dealer-cooperative advertisers, with all helpful data such as percentage of cost shared by parent company.

3. To gather complete files of success stories on all types of radio advertising, and make these readily and freely available to all members; to continue Trade Studies in various fields and distribute through the “Results from Radio” series and in other usable forms. To build/Special Sales Manuals on pertinent topics, such as Real Estate, Department Stores, Automotive, Motion
Pictures, etc.; to build visual presentations promoting the sale of radio as an advertising medium, for the use of local salesmen of member stations.

4. To advise new stations in the establishment and organization of an effective sales department. To develop and distribute effective sales formulae; to make practical analyses of all available surveys; to interpret and distribute these to member stations. To build a lending library of tested, successful programs and campaigns, on transcription and in complete sales presentation form; to make these freely available to members.

5. To cooperate fully with all other departments of NAB; to interpret their work and findings to the sales managers of member stations; to review and summarize items of significance or interest to sales managers that originate in the NAB Department of Engineering, Legal Department, Research Department, the Departments of Public Relations and Labor Relations, and the Department of Circulation and Promotion, as well as in such NAB committees as the Code Committee, Program Standards Committee, etc. To work closely with the Department of Research in carrying on the Broadcast Advertising Record (formerly the Unit Plan of Volume Measurement); to articulate and explain its functions and purposes, and to point out its practical application by sales departments of member stations through using it as radio's media record to increase station revenue.

6. To encourage and give immediate attention to requests for advice, information or assistance, from stations, advertisers and potential advertisers.

7. By self-regulation through voluntary and cooperative action, to forestall and make unnecessary further governmental regulation of commercial broadcasting.

8. To cooperate with broadcasters, agencies and advertisers to increase the effectiveness of radio as an advertising medium.

9. To cooperate with broadcasters in various areas in the matter of agency recognition, with a view to establishing desirable standards and exercising wholesome control over such important commercial considerations as credit, per-inquiry or contingent offers, requests for free time for disguised commercials, requests for excessive merchandising and plus services, etc.; to persuade them to maintain ethical standards and to convert them whenever possible into buyers of commercial time at established rates; to go direct to clients if necessary to correct agency abuses.

10. To study, evaluate and provide the answers to claims of superiority by competing media.

11. To compile lists of trade papers and house organs by fields of interest; to achieve close cooperation with them and to seek publication of constructive and informative articles on the value of radio as an advertising medium. To call attention to and make available all books, articles, speeches and studies of radio as an advertising medium, wherever and whenever published in any form. To watch, study, interpret and report any significant trends by consumer groups and by organizations of all sorts that may affect commercial broadcasting. To build towards a weekly publication of constructive and informative articles on the value of radio as superior by competing media.

12. To attend district meetings of sales managers twice yearly; once for sales managers only and once in conjunction with the general district meeting; to carry on a year-round program of field work in cooperation with the Sales Managers' Committee. To participate and secure adequate representation of radio at meetings and conventions of other groups, such as the AFA, AAAA, NRDGA, ANA, etc. To cooperate along similar lines through the Sales Managers' Committee, with local advertising clubs everywhere.

13. To encourage and implement effective public relations work by sales managers in their respective localities, and to supply them with material for public speeches and programs before business, advertising, civic and social groups. To collect all speeches and articles prepared by members; to make these available to all other members; to arrange for publication in trade papers and house organs. To cooperate with schools, colleges and universities to the end that students of business and advertising may be properly and fully educated and kept abreast of the effective functions of radio as an advertising medium.

14. To study and define "Station Promotion" and "Merchandising"; to make available a study on standards of practice; to act as a buffer against undue pressure from agencies and advertisers for exorbitant merchandising services not provided for in the rate structure.

15. To encourage a standardized, uniform radio contract form and other forms, and make these freely available to members. To encourage standardized frequency discounts; standardized lengths for spot announcements, with classification of stations according to network affiliation; standardized rate practices as to 1-minute ETs, 1-minute announcements, 100-word announcements, etc.; to encourage standard practices as to special charges for ETs or talent charges for live announcements, charges for network cut-in announcements, etc.

16. To study and explain "Station Promotion" and "Merchandising"; to make available a study on standards of practice; to act as a buffer against undue pressure from agencies and advertisers for exorbitant merchandising services not provided for in the rate structure.

17. To encourage a standardized, uniform radio contract form and other forms, and make these freely available to members. To encourage standardized frequency discounts; standardized lengths for spot announcements, with classification of stations according to network affiliation; standardized rate practices as to 1-minute ETs, 1-minute announcements, 100-word announcements, etc.; to encourage standard practices as to special charges for ETs or talent charges for live announcements, charges for network cut-in announcements, etc.

18. To stress and defend the American system of commercial radio as superior to all other systems; to make increasingly plain to the listening public that the preservation of our system depends upon the ethical and profitable use of radio as an advertising medium by those who make it possible.

19. To carry on these aims, policies and objectives, plus others that may be added in the future, through the constant cooperation with and suggestions from the sales managers of all member stations, expressed through the district chairman of each of the 17 Sales Managers' Divisions by proper channels to the Sales Managers' Executive Committee, which is recognized as the policymaking group for the Department of Broadcast Advertising; and thus through this modus operandi to carry on the administrative work of this Department through the united, correlated understanding and effort of all those whose responsibility it is to maintain the unceasing flow of revenue that supports the American system of broadcasting.

Work done by the Bureau of Radio Advertising since the last annual report was submitted, and by this Department since April 1, has included the continuation of the "Results from Radio" trade studies, with printed releases issued on these subjects:

| Department Stores (2) | Light and Power |
| Furniture Stores | Drug Stores |
| Ice Cream and Confectionery | Alka-Seltzer |
| Garden and Field | Miscellaneous |

Reprints of these studies, available at cost to NAB members, are being used by over 300 stations in direct solicitations by salesmen and as direct-mail promotion pieces with the station's individual message imprinted. Five thousand copies of each issue
are printed and distributed. Many direct sales have been reported by members through the use of this material.

Special emphasis in the future will be placed on making this Department a national clearing house for radio success stories and other sales helps in all types of business, and much more of this material will be distributed to the sales departments of member stations.

Through the Bureau and Department, the radio industry was represented at many national and regional conventions of groups and associations important to the business of broadcasting, such as the Advertising Federation of America, the American Association of Advertising Agencies, the Association of National Advertisers, the National Retail Dry Goods Association, and others.

Other field work has entailed trips to N.A.B. District meetings and meetings of Sales Managers’ Divisions, and direct selling trips to call on advertisers, associations and agencies.

The Department has continued its investigation of requests for free time and for contingent or pre-inquiry deals, and in each case has enlisted the cooperation of stations and endeavored to convert the advertiser to the proper use of radio on the basis of established rates.

Working contacts have been established with several governmental agencies to render better service to commercial broadcasters, and numerous requests from members for special information or assistance have been handled.

Work has been started by this Department in cooperation with the Department of Research to interpret the “Broadcast Advertising Record” (formerly the Unit Plan of Volume Measurement), to develop this into a practical means of increasing station revenue. Already useful when properly applied by sales managers, this record will become increasingly valuable from month to month as figures are gathered to show significant upward or downward trends.

At least one meeting of the Sales Managers’ Division has been held in each district, providing a much-needed opportunity for a discussion of mutual problems, a helpful interchange of ideas, and recommendations to NAB, which have found expression in the statement of aims and policies given above.

Respectfully submitted,

FRANK E. PELLEGRIN,
Director, Department of Broadcast Advertising.
WHITE RESOLUTION HEARING

The Senate Interstate Commerce Committee's hearing on the White resolution has been postponed from Saturday, May 31, to Monday, June 2. (For the text of the resolution, see NAB REPORTS, p. 437.)

WOMEN ENDORSE RADIO

General Federation of Women's Clubs on Friday, May 23, adopted the following resolution:

"Whereas, the system of radio broadcasting extant in the United States is the most democratic in the world and is the greatest medium for the preservation of democracy, bring freedom of speech and the exchange of ideas and information directly into the homes of millions of citizens, and

"Whereas, American radio through its public service programs has contributed tremendously to culture and education, not only in the homes of this great nation, but throughout the world, and as a vehicle for entertainment has served to maintain high morale in these times of stress, therefore, be it

"Resolved, that in order to preserve the freedom of radio for the best interests of democracy, the General Federation of Women's Clubs approves and advocates further Congressional study and investigation of the problems facing the broadcasting system in this country and, be it further

"Resolved, that the General Federation of Women's Clubs be instructed to send a copy of this resolution to the President of the United States, the secretaries of the Interstate Commerce Committees of the United States Senate and House of Representatives, and to the Secretary of the FCC."

ASCAP LOSES IN SUPREME COURT

The United States Supreme Court on Monday, May 26, in an opinion rendered by Associate Justice Black, in Watson, Attorney General of Florida v. Buck, as President of ASCAP, and Buck v. Watson, sustained the anti-monopoly provisions of the Florida statute which was enacted in 1937.

Two cases involving the Florida statute were before the court for determination. The special three judge lower court had held the entire 1937 statute unconstitutional on the grounds that several sections were unconstitutional and that these sections could not be separated from the remainder of the statute. A second statute of Florida, enacted in 1939, was held by the lower court to be constitutional, with the exception of two paragraphs. The two paragraphs held unconstitutional by the lower court were one which prohibited the copyright owner from imposing a license fee on programs which did not use the material coming under the license and the provision which requires a combination of two or more separate copyright owners to afford licensees the option of paying on a per-piece basis at prices fixed by the individual copyright owner and filed with the Comptroller of the state. The Attorney General appealed from the decision covering the 1937 statute and from the ruling of the lower court that the two sections of the 1939 statute were unconstitutional. ASCAP appealed from the decision of the lower court holding the 1939 statute to be constitutional except with regard to the above-mentioned two sections. The lower court had entered a permanent injunction against the enforcement of the 1937 statute and the two sections of the 1939 statute on the grounds that they violated the federal Copyright Act and the federal Constitution.

The Supreme Court reversed the lower court with instructions to vacate the injunction and to dismiss ASCAP's bill of complaint on the grounds that the monopoly provisions of the 1937 law were constitutional and that "ASCAP comes squarely within the definition of the combinations prohibited by Section 1 of the 1937 Act." The opinion then points out that, since ASCAP is a prohibited association within the meaning of the 1937 act, the Court is not called upon at the instance of ASCAP "to pass upon the validity of other provisions which might cover other combinations not now before us. It is enough for us to say in this case that the phase of Florida's law prohibiting activities of those unlawful combinations described in Section 1 of the 1937 act does not contravene the copyright laws or the federal Constitution."

The decision leaves both the 1937 and the 1939 statutes in full force and forever lays at rest ASCAP's contention that the copyright laws granted it and copyright owners special privileges. As stated by the Court, "This contention is based on the idea that Congress has granted the copyright privilege with relation to public performances of music, and that with reference to the protection of this particular privilege, combination is essential. We are therefore asked to conclude from the asserted necessities of their situation that Congress intended to grant this extraordinary privilege of combination. This we cannot do. We are pointed to nothing either in the language of the copyright laws or in the history of their enactment to indicate any congressional purpose to deprive the states, either in whole or in part, of their long-recognized power to regulate combinations in restraint of trade."

Attorneys express the belief that, since Associate Justice Black wrote the unanimous opinion of the Court, it is proper to consider that opinion in conjunction with Justice Black's minority opinion in the preliminary hearing before the Supreme Court in the same case in 1939. It was in this minority opinion that Associate Justice Black characterized ASCAP as "a price-fixing combination that actually wields the power of life and death over every business in Florida, and elsewhere, dependent upon copyrighted musical compositions for existence."

Attorneys representing the State of Florida were Tyrus A. Norwood, Assistant Attorney General, Lucien H. Boggs of Jacksonville, and Andrew W. Bennett of Washington, D. C. Thomas G. Haight represented ASCAP.

At the same time, the Supreme Court reversed the lower court in the Nebraska-ASCAP litigation (Swanson v. Buck, et al.), in which the lower court had held Nebraska's 1937 statute to be unconstitutional in its entirety. This statute was substantially the same as the 1937 Florida law. The short opinion stated that the case was reversed and remanded with instructions to dismiss on authority of Watson v. Buck (the Florida case). The attorneys representing Nebraska were John Kiddell, Assistant Attorney General, and William J. Hotz, Special Assistant to the Attorney General. Thomas G. Haight represented ASCAP.

ASCAP LOSES IN SUPREME COURT
(Continued from page 475)

The texts of the decisions follow:

SUPREME COURT OF THE UNITED STATES

Nos. 610, 611.—October Term, 1940.

J. Tom Watson (Gibbs), individually and as Attorney General of the State of Florida, et al., Appellants,

vs.

Gene Buck, individually and as President of the American Society of Composers, Authors and Publishers, et al., Appellants,

vs.

J. Tom Watson (Gibbs), individually and as Attorney General of the State of Florida, et al.

Appeals from the District Court of the United States for the Northern District of Florida.

[May 26, 1941.]

Mr. Justice Black delivered the opinion of the Court.

In broad outline, these cases involve the constitutionality of Florida statutes regulating the business of persons holding music copyrights and declaring price-fixing combinations of "authors, composers, publishers, and owners" of such copyrights to be illegal and in restraint of trade.

The American Society of Composers, Authors and Publishers (ASCAP), one of the appellants in No. 610 and one of the appellants in No. 610, is a combination which controls the performance rights of the major part of the available supply of copyrighted popular music. The other appellants in No. 610 (appellants in No. 610) are individual composers, authors and publishers of music controlled by ASCAP. The appellants in No. 611 (appellants in No. 611) are the Attorney General and all the state prosecuting attorneys of Florida who are charged with the duty of enforcing certain parts of the statutes in question.

These two cases were originally a single action, in which ASCAP and its co-parties sought to enjoin the state officials from enforcing certain sections of the 1937 Florida statute. 1 A federal district court, composed of three judges under §266 of the Judicial Code, granted a temporary injunction, and this Court affirmed without passing upon the merits of the constitutional questions involved. Gibbs v. Buck, 307 U. S. 66.

A supplemental bill of complaint was then filed, asking that the three judge court enjoin the state officials from enforcing any part of the 1937 statute, but granted the injunction only as to certain sections of the 1939 act. 34 F. Supp. 510. No. 611 is an appeal by ASCAP and its co-complainants from the refusal to enjoin the state officials from enforcing the remainder of the 1939 act. No. 610 is an appeal by the state officials from the order granting the injunction as to the 1937 act and as to certain sections of the 1939 act.

The court below, without passing at all upon the validity of thirteen out of twenty-one sections and subsections of the 1937 act, held that the remaining eight sections deprived copyright owners of rights granted them by the federal copyright laws, and that the statute must fall in its entirety. This it did upon the premise that the sections held invalid and the other parts of the bill were intended by the Florida legislature to form "a harmonious whole" and to "stand or fall together." The ultimate questions involved are such that we must first determine whether this ruling was correct. We hold that it was not, for the following reasons.

The Florida legislature expressed a purpose directly contrary to the District Court's finding. For what the legislature intended in this regard was spelled out in section 12 of the Act in the clear and emphatic language of the legislature itself. That section reads:

"If any section, sub-section, sentence, clause or any part of this Act, is for any reason, held or declared to be unconstitutional, imper-\(\text{perative [sic] or} \) void, such holding or invalidity shall not affect the remaining portions of this Act; and it shall be construed as if \(\text{the legislative intent to pass this Act without such unconsti-}\) tutional, imperator or invalid part therein; and, the remainder of this Act, alter the exclusion of such part of parts, shall be held and deemed to be valid as if such excluded parts had not been in-\(\text{cluded herein.} \)

This is a flat statement that the Florida legislature intended that the act should stand and be enforced "after the exclusion of such part or parts" as might be held invalid. Unless a controlling decision by Florida's courts compels a different course, the federal courts are not justified in speculating that the state legislature meant exactly the opposite of what it declared "to have been the legisla-\(\text{tive intent.} \)"

But the Supreme Court of Florida recognizes and seeks to carry out the legislative intent thus expressed. Speaking of a similar severability clause of another statute, the court said:

"The Act as a whole evinces a purpose on the part of the Legis-\(\text{lature to impose a license tax on chain stores and Section fifteen provides that if any section, provision or clause thereof, or if the Act as applied to any circumstance shall be declared invalid or unconstitutional such validity shall not affect other portions of the Act held valid nor shall it extend to other circumstances not held to be invalid. Under the liberal terms of Section fifteen it may be reasonably discerned that the Legislature intended that the Act under review should be held good under any eventuality that did not produce an unreasonable, unconstitutional or an absurd result. The test to determine workability after severance and whether the remainder of the Act should be upheld rests on the fact of whether or not the invalid portion is of such import that the valid part would be incomplete or would cause results not con-
\(\text{templated by the Legislature.}\)" Louis K. Liggett Co. v. Lee, 190 Fla. 477, 481. Measured by this test the court below was in error, for there can be no doubt that section 1 and the other sections upon which the court failed to pass are complete in themselves; they are not only consistent with the statute's purpose but are in reality the very heart of the act, comprising a distinct legislative plan for the suppression of combinations declared to be unlawful. For as pointed out by the court below, the sections that were not passed on are those which outlaw combinations to fix fees and prescribe the means whereby the legislative proscriptions against them can be made effective. 2 Since, therefore, that phase of the act which aimed at unlawful combinations is complete in itself and capable of standing alone, we must consider it as a separable phase of the

---

1 Fla. Laws 1937, ch. 17807.
2 Fla. Laws 1939, ch. 19653.
3 The Court said:
"There remain: Sections 1, 2-C and 3, in effect declaring ASCAP and similar societies illegal associations, outlawing its arrangements for license fees, and proscribing and making an offense, attempts to collect them; Section 7-B, making persons acting for such a combination, agents for it and liable to the penalties of the Act; Section 8 fixing the penalties; Section 9 giving the state courts jurisdiction to enforce the Act, civilly and criminally; and Sections 10-A, 10-B, 11-A and 11-B, prescribing procedure under it."

34 F. Supp. 516. With the possible exception of section 3, nowhere in the course of the opinion were any of these sections held invalid.
statute in determining whether the injunction was properly issued against the state officials.

As a matter of fact, as the record stands the right of ASCAP and its co-complainants to an injunction depends upon this phase of the statute and is not to be determined at all by the validity or invalidity of the particular section in which the court found a conflict between the federal Constitution and the copyright laws passed pursuant to it. The ultimate determinative question, therefore, is whether Florida has the power it exercised to outlaw activities within the state of price fixing combinations composed of copyright owners. But before considering that question it is necessary that we explain why we do not discuss, and why an injunction could not rest upon, any other phase of Florida's statutory plan.

Defendants in the injunction proceedings are the state's Attorney General, who is charged with the responsibility of enforcing the state's criminal laws, and all of the state's prosecuting attorneys who are subject to the Attorney General's authority in the performance of their official duties.4 Under the statutes before us, it is made the duty of the state's prosecuting attorneys, acting under the Attorney General's direction, to institute in the state courts criminal or civil proceedings. The original bill alleged that the defendants had threatened to—enforce the 1937 statute "in each and all of its terms and the whole thereof, and particularly against these complainants and others similarly situated . . .," and that as a consequence complainants would suffer irreparable injury and damages. The supplemental bill alleged that the defendants had threatened to and will enforce such State Statutes against these Complainants and others similarly situated in the event that such Complainants and others similarly situated refuse to comply with said State Statutes or do any of the acts made unlawful by said State Statutes. It is to be noted that the court did not find any threat to enforce any specific provision of either law. And there is a complete lack of record evidence or information of any other sort to show any threat to prosecute the complainants or any one else in connection with any specific clause or section of the numerous prohibitions of the acts, subject to a possible exception to be discussed later. The most that can possibly be gathered from the meager record references to this vital allegation of complainants' bill is that though no suits had been threatened, and no criminal or civil proceedings instituted, and no part of the lengthy statutes, under any circumstances that could arise and in respect to each and every one of the multitudinous regulations and prohibitions contained in those laws. In their answers, the state's representatives specifically denied that they had made any threats whatever to enforce the acts against complainants or any one else. In their answer to the supplemental bill, however, they admitted that they would perform their duties imposed upon them by the 1939 act. The findings of the court on this phase of the case, in general, and were to the effect that "Defendants have threatened to and will enforce such State Statutes against these Complainants and others similarly situated in the event that such Complainants and others similarly situated refuse to comply with said State Statutes or do any of the acts made unlawful by said State Statutes." It is to be noted that the court did not find any threat to enforce any specific provision of either law. And there is a complete lack of record evidence or information of any other sort to show any threat to prosecute the complainants or any one else in connection with any specific clause or section of the numerous prohibitions of the acts, subject to a possible exception to be discussed later. The most that can possibly be gathered from the meager record references to this vital allegation of complainants' bill is that though no suits had been threatened, and no criminal or civil proceedings instituted, and no particular proceedings contemplated, the state officials stood ready to perform their duties under their oath of office should they acquire knowledge of violations. And as to the 1937 act, the state's Attorney General took the position from the very beginning, both below and in this Court, that under his construction of the earlier act no duties of any kind were imposed upon him and his subordinates except with relationship to prohibited combinations of the type defined in section 1.

Federal injunctions against state criminal statutes, either in their entirety or with respect to their separate and distinct prohibitions, are not to be granted as a matter of course, even if such statutes are unconstitutional. "No citizen or member of the community is immune from prosecution, in good faith, for his alleged criminal acts. The imminence of such prosecution even though alleged to be unauthorized and hence unlawful is not alone ground for relief in equity which exerts its extraordinary powers only to prevent irreparable injury to the plaintiff who seeks its aid." Beal v. Missouri Pacific Railroad Corp., 312 U. S. 45, 49. A general statement that an officer stands ready to perform his duty falls far short of such a threat as would warrant the intervention of equity. And this is especially true where there is a complete absence of any showing of a definite and expressed intent to enforce particular clauses of a broad, comprehensive and multi-provisioned statute. For such a general statement is not the equivalent of a threat that particular sections are to be begun so immediately in such number and in such manner as to indicate the virtual certainty of that extraordinary injury which alone justifies equitable suspension of proceedings in criminal courts. The imminence and immediacy of proposed enforcement, the nature of the threats actually made, and the exceptional and irreparable injury which complainants would sustain if those threats were carried out are among the vital allegations which must be shown to exist before restraint of criminal proceedings is justified. Yet from the lack of consideration accorded to this aspect of the complaint, both by complainants in presenting their case and by the court below in reaching a determination of the case, it is clearly apparent that there was no failure to give proper weight to what is in our eyes an essential prerequisite to the exercise of this equitable power. The clear import of this record is that the court below thought that if a federal court finds a many-sided state criminal statute unconstitutional, a mere statement by a prosecuting officer that he intends to perform his duty is sufficient justification to warrant the federal court in enjoining all state prosecuting officers from in any way enforcing the statute in question. Such, however, is not the rule. "The general rule is that equity will not interfere to prevent the enforcement of a criminal statute if the proceeding is in randomness of a criminal proceeding. To justify such interference there must be exceptional circumstances and a clear showing that an injunction is necessary in order to afford adequate protection of constitutional rights. . . . We have said that it must appear that 'the danger of irreparable loss is both great and immediate'; otherwise the accused should first set up his defense in the state court, even though the validity of a statute is challenged. There is ample opportunity for ultimate review by this Court of federal questions." Spielman Motor Sales Co. v. Dodge, 291 U. S. 95, 95-96.

Such "exceptional circumstances" and "great and immediate" danger of irreparable loss were not here shown. Tested by this rule, therefore, and with the possible exception of that phase of the statute outlawing Florida activities by combinations declared unlawful in section 1 of the 1937 act (which we shall later consider separately), neither the findings of the court below nor the record on which they were based justified an injunction against the state prosecuting officers.

In addition to the fact that the situation here does not meet the tests laid down in the decided cases, the very scope of these two statutes illustrates the wisdom of a policy of judicial self restraint on the part of federal courts in suspending state statutes in their entirety upon the ground that a complaint might eventually be prosecuted for violating some part of them. The Florida Supreme Court, which under our dual system of government has the last word on the construction and meaning of statutes of that state, has never yet passed upon the statutes now before us. It is highly desirable that it should have an opportunity to do so.5 There are forty-two separate sections in the two acts. While some sections are repetitious, and while other sections are unimportant for present purposes, there are two acts, many separate and distinct regulations, commands and prohibitions. No one can foresee the varying applications of these separate provisions which conceivably might be made.

---

4 The Secretary of State and the State Comptroller were added as parties defendant by a "Further Supplemental Bill of Complaint" filed October 19, 1939. The ground given by the complainants for adding parties was that certain duties were imposed on these officials by the 1939 act. The duties, however, required only that certain fees be collected, and not that actions be brought to enforce the laws.

constitutional as applied in one manner may still contravene the Constitution as applied in another. Since all contingencies of attempted enforcement cannot be envisioned in advance of those applications, courts have in the main found it wiser to delay passing upon the constitutionality of all the separate phases of a comprehensive statute until faced with cases involving particular provisions as specifically applied to persons who claim to be injured. Passing upon the possible significance of the manifold provisions of a broad statute in advance of efforts to apply the separate provisions is analogous to rendering an advisory opinion sufficient to say that the statutes before us are not of this type.

If it is of course conceivable that a statute might be flagrantly applications, courts have in the main found it wiser to delay passing upon the constitutionality of all the separate phases of a comprehensive statute until faced with cases involving particular provisions as specifically applied to persons who claim to be injured. Passing upon the possible significance of the manifold provisions of a broad statute in advance of efforts to apply the separate provisions is analogous to rendering an advisory opinion sufficient to say that the statutes before us are not of this type.

While the record and findings here are not as clear and specific as they might and should be, we nevertheless, under the circumstances of this case, proceed to this ultimate and decisive question. In the consideration of this case, much confusion has been brought about by discussing the statutes as though the power of a state to prohibit or regulate combinations in restraint of trade was identical with and went no further than the power exercised by Congress in the Sherman Act. Such an argument rests on a mistaken premise. Nor is it within our province in determining whether or not this phase of the state statute comes into collision with the federal Constitution or laws passed pursuant thereto to scrutinize the act in order to determine whether we believe it to be fair or unfair, conducive to good or evil for the people of Florida, or capable of protecting or defeating the public interest of the state. These questions were for the legislature of Florida and it has decided them. And, unless constitutionally valid federal legislation has granted to individual copyright owners the right to combine, the state's power validly to prohibit the proscribed combinations cannot be held non-existent merely because such individuals can exercise their property rights better in combination than they can as individuals. We find nothing in the copyright laws which purports to grant to copyright owners the privilege of combining in violation of otherwise valid state or federal laws. We have, in fact, determined to the contrary with reference to other copyright privileges. But complainants urge that there is a distinct difference between our previous holdings and the question here. This contention is based on the idea that Congress has granted the copyright privilege with relation to public performances of music, and that with reference to the protection of this particular privilege, combination is essential. We are therefore asked to conclude from the asserted necessities of their situation that Congress intended to grant this extraordinary privilege of combination. This we cannot do. We are pointed to nothing either in the language of the copyright laws or in the history of their enactment to indicate any congressional purpose to deprive the states, either in whole or in part, of their long-recognized power to regulate combinations in restraint of trade. Compare Waters-Pierce Oil Co. v. Texas (No. 1), 212 U. S. 86, 107.

Under the findings of fact of the court below, ASCAP comes squarely within the definition of the combinations prohibited by section 1 of the 1937 act. Section 1 defines as an unlawful combination an aggregation of authors, composers, publishers, and owners of copyrighted vocal or instrumental musical compositions who form any society, association, or the like and the members of which constitute a substantial number of the persons, firms or corporations within the United States who own or control such musical compositions and "when one of the objects of such combination is the determination and fixation of license fees or other exactions required by such combinations for itself or its members or other interested parties." Section 8 of the 1937 act makes it an offense for such combinations "to act within this State in violation of the terms of this Act." The court below found that there were 1425 composers and authors who were members of ASCAP; that the principal music publishers of the country are members; that the Society controls the right of performance of 45,000 members of similar societies in foreign countries; and that the Board of Directors of ASCAP have "absolute control over the fixing of prices to be charged for performance licenses. . . ." Since under the record and findings here ASCAP is an association within the meaning of section 1 of the 1937 act, we are not called upon at its instance to pass upon the validity of other provisions contained in the numerous clauses, sentences, and phases of the 1937 or 1939 act which might cover other combinations not now before us. It is enough for us to say in this case that the phase of Florida's law prohibiting activities of those unlawful combinations described in section 1 of the 1937 act does not contravene the copyright laws of the federal Constitution; that particular attacks upon other specified provisions of the statutes involved are not appropriate for determination in this proceeding; that the court below erred in granting the injunction; and that the bill should have been dismissed. All other questions remain open for consideration and disposition in appropriate proceedings. For the reasons given, the judgment below in No. 610 is reversed and the cause remanded to the lower court with instructions to dismiss the bill. The judgment in No. 611 is affirmed.

It is so ordered.

Mr. Justice Murphy took no part in the consideration or decision of this case.

A true copy.

Test:

Clerk, Supreme Court, U. S.

SUPREME COURT OF THE UNITED STATES

No. 312.—October Term, 1940.

Harry R. Swanson, as Secretary of State of Nebraska, et al., Appellants, vs. Gene Buck, Individually and as President of The American Society of Composers, Authors and Publishers, et al.

Appeal from the District Court of the United States for the District of Nebraska.

[May 26, 1941.]

Mr. Justice Black delivered the opinion of the Court.

Most of the questions presented by this case are the same as those that were raised in Nos. 610 and 611, this day decided. Here, as there, at the request of ASCAP and its co-complainants a federal District Court composed of three judges enjoined various state officials from enforcing a state statute aimed primarily at price-fixing combinations operating in the field of public performance of copyright music. Here, as there, the complainants alleged, and the defendants denied, that enforcement of the act had been

---

threatened. Here, as there, the court below found that threats had been made, that some of the sections of the act were invalid, that the invalidity of those sections permeated the whole, and that the state officials should be enjoined from enforcing any of the numerous provisions of the act. But, as in the Florida case, the court below proceeded on a mistaken premise as to the role a federal equity court should play in enjoining state criminal statutes. Here, there was no more of a showing of exceptional circumstances, specific threats, and irreparable injury than in the Florida case. In his brief in this Court, the Attorney General of Nebraska stated that “Appellants, as law enforcement officers, sincerely hope that no action under this law will be required. None was threatened before nor since the suit was started.” With one possible exception, the record bears out the statement of the Attorney General; there was no evidence whatever that any threats had been made, but in his answer the Attorney General stated that he would “enforce the act against the complainant Society . . . if the complainant Society would operate in the State of Nebraska in violation of the terms of the statute by conniving and conspiring to fix and determine prices for public performance of copyrighted musical compositions. . . .” As we have just held in Watson v. Buck, it was error to issue an injunction under these circumstances.

In other material respects also, this case is like the Florida case. The court below failed to pass on what we consider the heart of the statute because of what it regarded as the pervading vice of the invalid sections. But section 12 of the Nebraska statute is similar to section 12 of the Florida statute and provides that “If any section, subdivision, sentence or clause in this Act shall, for any reason, be held void or non-enforceable, such decision shall in no way affect the validity of the other parts or sections of this Act.” The legislative will is respected by the Supreme Court of Nebraska, and the court below should have followed state law in this regard. That part of the statute on which the court did not pass—and the part which the Attorney General said he stood willing to enforce if violated—set up a complete scheme for the regulation of combinations controlling performing rights in copyright music. On the authority of Watson v. Buck, the decision below is reversed and the cause is remanded with instructions to dismiss the bill.

It is so ordered.

Mr. Justice MURPHY took no part in the consideration or decision of this case.

Sales

HOW TO IMPROVE COMMERCIALS

In response to numerous requests from NAB members who attended the Sales Managers’ meeting at the convention and heard the talk by Horace Schwerin on “Improving Your Commercials,” this digest is provided. Mr. Schwerin is General Manager and Director of Research of the Raymond Spector Agency of New York City, and his talk was the result of research carried on during the past several years with the “Program Analyzer” machine, developed by Dr. Paul Lazarsfeld and Dr. Frank Stanton.

Thousands of typical radio listeners were tested for their reaction to radio commercials, in conditions as closely as possible approximating normal home listening. The machine recorded their likes and dislikes, and after a great number of tests were conducted on

4 See Petersen v. Beal, 121 Neb., 348, 355, quoting and approving the following excerpt from Scott v. Flowers, 61 Neb., 620, 622-623: “The general rule upon the subject is that where there is a conflict between an act of the legislature and the constitution of the state, the statute must yield to the extent of the repugnancy, but no further (Citing authorities). If, after striking out the unconstitutional part of a statute, the residue is intelligible, complete, and capable of execution, it will be upheld and enforced, except, of course, in cases where it is apparent that the rejected part was an inducement to the adoption of the remainder. In other words, the legislative will is, within constitutional limits, the law of the land, and when expressed in accordance with established procedure, must be ascertained by the courts and made effective.”

all types of programs and all types of commercials, it was possible to work out a practical application of these findings. Subsequent tests showed that the new commercials, written according to the new principles, enjoyed much greater attention and acceptance from listeners.

Mr. Schwerin explained in detail the methods used, illustrating his discussion with charts, graphs, transcriptions, phonographs and other material. Admitting the possibility of some errors and not claiming infallibility for the tests, he nevertheless stated that several advertisers, participating in the research, had applied its finding with their definitely improved results. He suggested that sales managers confer with their program and continuity departments in a discussion of these points, and that by working cooperatively each station could improve results for its advertisers. The conclusions reached following the tests are:

1. Program personalities should give all the commercials. This means that in news programs, for example, the newscaster should deliver the commercials.

2. The style of the commercials should be in the same tempo as the program content. For example, in a variety show the commercials should be in dialogue.

3. The commercial sentence structure should follow the same general pattern as the rest of the program (indicating collaboration between commercial copy writer and program writer). For example, news commercials should be written in short, pathy sentences.

4. Axioms make poor openings for news commercials, although they may be effective on other types of programs. The opening: “How many times have you heard it said that what you don’t know will never hurt you” is a typical example of a bad opening for a news commercial.

5. The lead into a commercial should tie-in with the mood, or “gestalt” of that program. For example in news, one effective way of doing this is to refer directly to the news itself, even if this reference is a very general one. For example: “All the news of war and blockades these days,” and “News is the story of change,” are both highly effective openings when used in commercials. However, leads into news commercials need not be news items.

6. Do not allow listeners to “anticipate” commercials. This can be avoided by shifting the middle commercial forward or backward from day to day; closing commercials should be followed by part of the program; there should never be a noticeable pause, change of tone or different emphasis and delivery at the beginning of any commercial, and commercial should not be “telegraphed” by the use of certain opening words such as “Friends,” “Well, friends,” etc.

MILLINERS BLAME RADIO

P. W. Judah, of the Associated Millinery Industries, St. Louis, Mo., writes NAB as follows:

“The millinery industry of America, giving employment to approximately 300,000 people, has been very materially and adversely affected in the past two years by radio entertainers making jokes on the styles of the hats of today.

“We realize this harm has been done in an unconscious way, and not at all maliciously; however, this entire industry is having quite a struggle at this time, and I am sure any influence you men can exert to forestall these jokes in the future, will be highly appreciated.”

It is suggested that you call this to the attention of those who are responsible for writing comedy at your station.

IMPORTANCE OF LOCAL BUSINESS

FTC figures show that the smaller the market, the more the radio station depends on local advertising. In cities of less than 25,000 population, 74 per cent of a station’s revenue comes from local advertisers. This drops to 67 per cent in cities of 25,000 to 50,000 and to 50 per cent in cities of more than 50,000.

IS RADIO ADVERTISING ECONOMIC?

The charge that radio advertising is an economic waste, so often made, is eloquently answered by Richard R. Deupree, president of Proctor & Gamble Co. Using the soap business to illustrate, he said that in 1850-90 the housewife paid 6 cents for Ivory Soap,
and still paid only 5 cents in 1941, although raw materials have doubled in price and wages have risen tenfold, and Federal taxes, unknown 50 or 60 years ago, now cost the manufacturer a sum equal to his factory payroll.

"It does not seem possible," he stated, "that expenses such as I have mentioned could be absorbed if we had not advertised Ivory almost continuously since 1882. If through false reasoning or any other cause, honest advertising is crippled and hampered, it would be the death blow to real industrial development."

HOTELS INCLUDE RADIO

It was reported to NAB that the current cooperative advertising campaign sponsored by hotels, with payment on a duebill basis, would exclude radio. Upon investigation, we are assured by the American Hotel Association that all media are equally acceptable in this campaign and will be treated impartially, provided radio stations, like other media, are willing to accept duebills in payment. Many NAB members report that they are now refusing this type of payment.

DEFENSE STAMPS AS PRIZES

Station WKAT, Miami Beach, is awarding National Defense Stamps in place of cash awards on quiz and similar programs. The suggestion has been made that if this plan were adopted by a large number of stations, it would result in increased savings, and widespread and continuing publicity to defense stamp sales.

WHY ADVERTISING IS ESSENTIAL DURING THE NATIONAL DEFENSE EMERGENCY

Some business men are prone to believe that during the period of capacity production brought about by business stimulation of the national defense program, it is unnecessary to maintain an advertising campaign. During such periods demand often exceeds supply; a "seller's market" exists, and sometimes the problem is not one of distribution and sales, but rather of producing enough to satisfy the market. Advertising expenses therefore, they say, can be curtailed or eliminated altogether.

That this reasoning is economically unsound has been demonstrated during similar periods in the past, notably 1915-1919.

Chief reasons why advertising should be continued by every business man are:

1. To maintain his market, his established routes of distribution through jobbers and dealers, consumer acceptance of his product and consumer consciousness of his brand name, so that when the crisis is over and the impetus of national defense is taken away, he can continue operating on a normal pre-crisis basis. Otherwise all these factors in successful selling may be lost to more aggressive competitors who seize upon this opportunity to establish their competitive brands.

2. During periods of national emergency we must have the highest efficiency possible in manufacturing and distribution. It is admitted that advertising contributes much to this efficiency, and therefore is of extreme importance to the economic welfare of a nation during an emergency period.

3. The nation's economic and social life must be maintained as nearly normal as possible, because normalcy in a democracy is a contributing factor to success. Advertising helps make normalcy possible in a social economy that has been so dependent on advertising.

4. Civilian morale in a democracy requires that we maintain a standard of living unknown under dictatorships. Advertising contributes greatly to our higher standard of living, and thus to the maintenance of civilian morale.

5. We must strive for a reasonable price stability. Advertising and a free competitive system aid greatly in stabilizing prices. As an example, consider P & G Ivory soap, a common household item: In the past 60 years, the price of raw materials for this product has doubled, wages have increased 10-fold, and taxes have been increased enormously. At the same time, research and constant improvements in manufacture and distribution have given the consumer a much better product—without a penny of increase in the price. Without advertising this would have been impossible.

6. During this period it is necessary to eliminate unemployment insofar as possible, so that all those not engaged in national defense can earn salaries to help pay the costs of defense, rather than be an added burden upon government or public charity.

Advertising contributes directly and indirectly to greater employment in private industry.

7. Civilian morale likewise depends greatly upon a firm belief in the democratic system, and in its features of free enterprise and competition. Advertising is of extreme importance in their maintenance.

8. In a democracy, to build civilian morale, it is important that we continue our media of entertainment and enlightenment: the press, the magazines, and the radio. Advertising supports all of these and makes them possible.

9. During times of national emergency it is important that consumers be given adequate market information: where to buy what they need, when to buy, and how to buy, in order that they may get the most out of the products and services they purchase. It is also important to regulate supply and demand, and to diversify as much as possible the spending of consumers, so that all business may prosper. Advertising is of the utmost importance in all these efforts.

10. An intangible value, and yet one of the most important possessed by any business man, is the "franchise value" of his product or business, established over a period of many years at great effort and expense. Advertising protects this priceless ingredient until return to normalcy.

11. Staggering national defense costs must be borne by taxes, which can only be paid by business and by wage earners in business. Therefore sales, wages, incomes and profits must not be maintained when increased if possible. Advertising is material aid along these lines.

12. Finally, advertising is a vital, inherent and integral part of our national economy. To stifle or curtail it would be to upset the economic balance; to foster and maintain it would be to preserve that balance, so essential to efficiency and national well-being.

NO MOVIE CHISEL FOR-CISLER

Attempts by the movies to chisel free time have increased many fold since the MBS-ASCAP rapprochement, according to evidence collected by Steve Cisler, general manager of station WGRG, Louisville.

Harry Loud, Air Trailer Division, Metro-Goldwyn-Mayer was the writer of one of the letters to Mr. Cisler which solicited free time.

"Now that the ASCAP controversy has been settled and ASCAP music is returning to Mutual affiliated stations," he wrote on May 15, "we believe you will be interested in Metro-Goldwyn-Mayer's Hollywood Radio Reporter recorded programs," etc.

Mr. Cisler replied:

"Your letter of May 15 is one of the reasons this station and others don't want ASCAP music back on the air. You movie people are getting out the chisel once again with this offer of movie radio trailers that some stations are just crazy enough to accept.

"For your own information, WGRG did not vote yes on the Mutual deal with ASCAP because we didn't think it was worth the money. We knew that the chiseling would start from movies with plugs on this or that picture, etc.

"Your local theaters are especially abusive in not buying radio time. It is chisel, chisel, chisel, free, free, free.

"So stop kidding yourself and radio time that you have something we need . . . free. Take some of that big money you pay newspapers, billboards, and magazines and BUY radio.

"So far as Louisville radio . . . movies . . . and WGRG the rule is "no cashes . . . no talkie . . . no singe.""

In a memorandum, same day, Mr. Cisler said to Fred Weber, general manager of Mutual:

"I am alarmed at the rising tide of chiseling by the movie boys in connection with Mutual's return of ASCAP music.

"It was my understanding that the new Mutual agreement did not require the announcement of movie or show titles with the playing of ASCAP tunes."
"The Adventures in Rhythm" show on Wednesday—May 21—specifically mentioned 'Last Time I Saw Paris'... from the forthcoming MGM picture... blank blank.

"Today I received this chisel letter from MGM. The answer is NO.'"

"ASCAP publishers are flooding us with mailed music, asking in practically all cases that the show or movie be credited when the number is used. We are returning all such music."

"Fred, the radio business is never going to get one dollar from movies if we keep giving it away. How about considering the evil and ask originating stations to lay off such credits?"

"We have instructed our program department to refuse all movie premieres, Hollywood chatter and to have the control man pull the switch on any network announcer who seems about to put in a plug for a movie or show.

"Plenty of radio stations didn't like these free plugs for movies on all networks prior to 1941, and lots of us don't want them restored now."

**NATIONAL DEFENSE**

Local recruiting personnel of the United States Army will no longer solicit time on broadcast stations. This change in practice became effective by order from Washington to Commanding Generals of all Corps Areas.

The weekly transcribed programs, being broadcast by more than 700 stations and the live announcements handled from NAB headquarters comprise all of the programs released in finished form for the air in behalf of recruiting.

This entire change will be discussed in detail in a letter, dated June 2, addressed to all stations by Arthur Stringer.

**Radio Branch, Bureau of Public Relations, War Department**

This Branch, headed by Ed Kirby, prepares nothing for broadcasting in finished form. It operates on the theory that what the Army does is news, purely from the standpoint of audience interest; and that a richer variety will be provided if it depends upon the various interpretations placed upon factual information by individual stations.

The Radio Branch is ready to serve all broadcasters even to the extent of doing necessary research for any program or series of programs a program manager may have in mind. Write, teletype or telephone. The number is Republic 6700, Extensions 3887, 4787 and 4788.

**Army Maneuvers**

This summer U. S. Army maneuvers will be the biggest in peace time history of any country in the world. They involve 1,500,000 men.

Such an outstanding event, occurring at this time, will naturally be covered by radio as well as by the press, magazines, syndicates and news reels. But it is much easier for fifty correspondents, armed with pencils, to cover maneuvers than for radio.

Accordingly, the Radio Branch of the Army has assigned four men from headquarters to establish a radio pool of interest and prepare schedules of events so that the stations can make a broadcast:

Ross Worthington will officiate in Texas; Jack Harris in Tennessee; Brooks Watson in Louisiana and Bob Colson on the West Coast where he is already in action.

**What a Station Can Do in Advance**

Stations can tell the public what these maneuvers mean. The purpose is to test the combat effect of the Army by simulating warfare. The boys are going to miss their meals and they are going to get dirty and dusty. The Army is going through a hardening process. Like all athletes, the boys must have conditioning and training.

And the stations can do this: in these simulated combat areas the highways will be crowded with trucks carrying troops and supplies. Because of the simulated warfare there will be no advance announcement of troop movements. When the news of a troop movement is known, the station can explain that it is unwise from a safety point of view for civilian motorists to cut through the line of travel of the convoy. These soldiers are driving trucks under order. They are instructed to observe safety measures, yet they must remain in convoy. If the residents of your service area understand these facts, accidents will be avoided. This can also be done in advance.

**Two New News Services**

This week the Radio Branch inauguates a special service for news announcers. It contains undated material processed for radio and prepared at the request of numerous smaller stations that wished to have a human interest story or a fact or two readily included in a news show.

The other news service is the story of our Army throughout the entire range of American history. In reality it is a daily diary, in one or two sentences especially prepared for radio. The facts can be used in a chatter program, a home economics program, a variety show or news.

**Educational Bulletin**

The Radio Branch issues each week an educational bulletin to the educational directors of stations.

**Red, White and Blue Network**

This is the name given to stations near Army camps which may care to use, on already scheduled "early bird" shows, bits of information concerning the group in their immediate neighborhood. Through the efforts of Gordon Hittenmark, late of station WRC, the public relations officer of the camps, the station managers and the "early bird" announcers have been brought together. The idea of this procedure is simply to facilitate the supply of suitable material for the stations.

**History of 55 Divisions**

The Script Section, Radio Branch, War Department, Bureau of Public Relations has in preparation a brief history of each of the 55 Army Divisions. The information already distributed for radio writers and radio producers concerns The "Fighting First" Division and its component units. These short histories have been condensed from hundreds of pages in the files of the War Department. Writers and producers interested in additional facts can secure them by writing directly to: Radio Branch, Bureau of Public Relations, War Department, Washington, D. C.

**Stations Can Work Out Special Stunts**

Stations that desire are naturally free to work out special stunts. The local public relations officer will lend assistance. And, on request, the Radio Branch, Bureau of Public Relations, will supply stations with needed information for the preparation of programs.

**Warning**

At the same time if an individual comes to station executives proposing some spectacular stunt, such as a black-out, it is advised that stations check with the Radio Branch, Washington, address as above, before making commitments and issuing publicity.

**IRE CONVENTION**

The Institute of Radio Engineer's summer convention will be held in the Hotel Statler, Detroit, Michigan, June 23-25. The program this year will be of unusual interest to broadcast engineers and among other subjects, are the following: UHF Antennas; Frequency Modulation; Television; Electronic Applications; Broadcast Transmitters; Standard Band Transmitting Antennas; Rectifiers; Transmission Lines; Mechanical Calculation For Di-
Erectonal Antenna Patterns; UHF Tubes; Plate Modulated Amplifiers; Square Waves and UHF Propagation.

Interesting inspection trips have been scheduled and among these are: Trip to Harper Hospital to inspect electronic medical apparatus; trip to Edison Institute Museum and Greenfield Village; trips to automobile factories and a trip to the Shrine of the Little Flower.

An interesting program has been laid out for the entertainment of the ladies.

Full details concerning the Convention can be obtained by addressing the, Institute of Radio Engineers, 350 West 42nd Street, New York City.

SEND NAMES TO NAB

NAB has been requested to secure the names and present whereabouts of radio men who have been drafted into the Army. Will station managers please send this information to NAB headquarters immediately? The request was made by the War Department in the hope that many of these men could fill public relations posts.

LARRY SUNBROCK

S. A. Cisker, Radio Station WGRC, Louisville, Kentucky, would appreciate a collect wire from anyone knowing the whereabouts of Larry Sunbrock. Sunbrock promoted a thrill show and rodeo in Louisville recently.

NAME BAND TAX

The Bureau of Internal Revenue advised the NAB this week that it was appealing a lower court decision which held that the leader of a name band was not liable for social security taxes for band members. (Griff Williams v. Collector of Internal Revenue). Under the lower court decision, a broadcaster would be responsible for social security taxes on payments to name bands. The NAB intends to review for its members soon all applicable social security tax regulations.

INSURANCE

The manual rates for compensation insurance enumerated in the NAB Reports, Page 368 of April 25th are adjusted each year to comply with the experience of the insurance companies writing compensation insurance. The rates quoted in the bulletin of April 25th are as of the date of April 4, 1941. Please correct Minnesota's rating under Code #8742 from 8 cents to 57 cents. Michigan's rating under Code #8742 should be changed from 8 cents to 39 cents. Since April 4, 1941, the rate in Utah (Code #7609) has changed from $1.13 to $1.33 and the rate under Code #7610 in Maine has been changed from 9 cents to 12 cents.

BMI

BMI Receives Canadian Fees

Broadcast Music, Inc. was recognized as a new competitive performing rights society by the Canadian Government in a decision made public on May 12th. The Canadian Copyright Appeal Board granted BMI a tariff of 1¢ per licensed set, the amount requested in October 1940 when BMI was required to file its proposed tariff for 1941. This was at a time when the music heard on the air was predominantly ASCAP's and before BMI was licensing the catalogues of many of its more important publishers.

The Canadian body, looking forward to 1942, announced that there should be a comprehensive study of the problem of performance fees. Recognizing that the basing of copyright fees upon actual use is the most satisfactory method, it requested an appropriation of $5,000 to defray the cost of making an investigation. In speaking of the necessity of a survey of this kind, the Board said:

"The entry of a second musical works licensing company in the Canadian field of radio broadcasting introduces a problem of considerable difficulty, and if this continues it is one that may require in the early future a careful reconsideration of the whole question of the licensing and performance of musical works in so far as radio broadcasting is concerned."

Britain Accepts BMI

The BMI hit, There I Go, received its first major broadcast in Great Britain recently by Bebe Daniels. Bebe and her husband, Ben Lyon, are among the best loved personalities in Great Britain. Their radio program, "Hi, Gang!", has enjoyed the longest run on the air of any show produced since the war began.

Another popular American in England, band leader Carroll Gibbens, introduced There I Go and So You're the One to British listeners, sharing the honors with the British band leaders, Jack Payne and Geraldo.

BMI FEATURE TUNES

June 2 - June 9

1. MY SISTER AND I
2. WALKIN' BY THE RIVER
3. WISE OLD OWL
4. FRIENDLY TAVERN POLKA
5. G'BYE NOW
6. WHAT D'YA HEAR FROM YOUR HEART
7. HERE'S MY HEART
8. WITH A TWIST OF THE WRIST
9. I WENT OUT OF MY WAY
10. THE RELUCTANT DRAGON
11. ALL ALONE AND LONELY

Hollywood Report

Hi, Neighbor, a new BMI song by Jack Owens, cowriter of the Hut Sut Song, will be sung by the Merry Macs in the new Universal picture, San Antonio Rose. One of the Macs, Ted McMichael, collaborated with Owens on the Hut Sut Song. This information is brought to New York by Harry Engel, head of BMI's west coast division, who points out that everyone in Hollywood with the exception of the motion picture producers owning music publishing companies is completely satisfied with the music situation as it is.

"We have had no complaints of any kind for the past three months," said Mr. Engel. "The advertising agencies and performing artists, as well as the broadcasters, are finding all the material they want for performance without difficulty. We are continuing to receive the same favorable comment from the Mutual stations that we received in the past."

Songwriters All

A galaxy of the people in all walks of life who write songs will be staged soon in the Grill Room of the Hotel Tait by Frankie Masters who has asked BMI for as large a company of talented and photogenic writers as can be assembled in New York. Those who write songs as a hobby as well as those who have become prosperous from the fat checks received from their creation will be included. Frankie will endeavor to play as many as his high standard of entertainment permits.
Among the many BMI candidates are: Joan Whitney, night club singer; Jack Baker, business executive; Helen Bliss, department store clerk; Lanny Ross, vocalist; Kent Cooper, head of Associated Press; Robert Sour, broker; Hy Zaret, lawyer; Jean Barry, clerk in Macy’s; Norman Weiser, magazine writer; Leah Worth, clerk in Hosery shop; Kay Twomey, model and designer; Sylvia Dee, housewife.

They Buy Ballads

Romantic ballads lead all other types of popular songs by a big margin in popularity with the radio audience, it is revealed in a survey of the best selling numbers published by BMI. Radio listeners buy about four times as many ballads as rhythm numbers and novelties. In the first year of operation, BMI has had some twelve outstanding hits—an unusual record for any one publishing house, and, of these, only three fell in the rhythm and novelty classification. Practice Makes Perfect, So You’re the One, and The Wise Old Owl.

Of BMI’s twelve big sellers, nine are ballads, headed by I Hear a Rhapsody, a 200,000 copy number that is 1941’s most popular song thus far. Other BMI ballads that have been great favorites all over the country are There I Go, You Walk By, High On A Windy Hill, May I Never Love Again, I Give You My Word, Walkin’ By the River, It All Comes Back To Me Now, and My Sister And I.

But David Sanders and A1 Pearson, the two Detroit boys who wrote the song, were probably the happiest of all. Jimmy Dorsey, who is billed as the “World’s Greatest Saxophonist”, might well add “World’s Greatest Tune Picker” to his billing. One of the first leaders to see the potential of High On A Windy Hill, I Hear A Rhapsody, Amapola and a score of other hit Parade favorites, Dorsey played that new tune once and put it down for immediate recording. Convinced of the commercial possibilities of the ballad, he brought it to BMI and within a few days contracts were signed with Pearson and Sanders for immediate publication of the song. All Alone and Lonely marks the first successful venture into songwriting for this newest team of composers. Sixfooter Sanders plays the piano, organ, and solovox, and has been a professional musician since the age of sixteen when he was regular organist at a Baptist Church in Wilmington, Delaware. Following that ecclesiastical booking, he went to work in Toledo speakeasies as pianist and eventually formed the small rhythm band he is now leading. His major ambition is to be a good songwriter’ and everybody at Broadcast Music, Inc. is convinced that he is on his way.

Al Pearson, the other writer of the song, is a guitarist who studied at the Detroit Conservatory of Music for three years. He has played in night clubs as master of ceremonies, tenor vocalist and featured guitarist. Pearson is still a little dazed by his new found success. After he had signed the publication contract he asked that he be notified by wire whenever his song is played on the air. If Jimmy Dorsey has picked another hit song, and BMI succeeds in making a spot on the Hit Parade for it, there’ll be a long line of messenger boys making its way to the Pearson front door.

Torah Tune

BMI’s I Went Out Of My Way, is being hailed with the same professional enthusiasm that greeted My Sister And I. Six recordings have been made or scheduled: Joan Merrill (Bluebird), Teddy Powell (Bluebird), Jan Savitt (Victor), Orrin Tucker (Columbia), Frankie Masters (Okeh), and Connie Boswell (Decca). Both words and music are by Helen Bliss who wrote The Moon Won’t Talk.

STATE LEGISLATION

FLORIDA:
H. 1429 (Burwell, et al.) MUSICAL COPYRIGHT—COLLECTIONS—Relating to the collection of fees and royalties from persons doing business in this state for the privilege of using, selling, performing or broadcasting, publicly or privately, any musical device of any nature, compositions, songs, or plays. Referred to Committee on Finance and Taxation.

FEDERAL COMMUNICATIONS COMMISSION

FLY DISCUSSES TELEVISION, FM

Progress of FM broadcasting and television are not likely to be interfered with because of government priorities, FCC Chairman Lawrence Fly said at a press conference early this week. Mr. Fly said that he has not received any official reports on this subject and the Commission is keenly alive to the problem.

The Chairman said that naturally as requirements become heavier there will be less and less supply of everything. He said that it particularly and naturally affects the entire radio field in terms of new production. He stated that priorities are inclined to weigh heavier on FM than on a going outfit, such as standard broadcast. Mr. Fly said that he doubted whether the Commission should delay commercialization of FM and television. He doubted the wisdom of such a move contending that postponing this would only be another disturbing influence. He said that he didn’t think that the Commission should move in and out in such a way. Even under present conditions, he said, the industry has an opportunity to square away and use the time to good advantage.

SUPPLEMENTAL FORM ADOPTED

Pursuant to its new chain broadcasting regulations, the FCC has adopted a supplemental form (FCC Form No. 335, “Supplement Concerning Chain Broadcasting to Application for Standard Broadcast Authorization”), in which all applicants for such broadcast facilities must attest to network affiliation, if any. Licensees are required by Section 43.1 of the Rules and Regulations to keep the Commission informed of contracts and arrangements, including changes, covering chain affiliations.

To fulfill the assurance given in the Commission report on chain broadcasting, the Rules of Practice and Procedure have been amended (Sections 1.71 and 1.81) to provide a hearing in cases where the applicant desires to enter into or retain a contract not in conformity with the chain broadcasting rules.

May 29, 1941 — 483
NEW FCC RULE

FCC has adopted Section 2.92 of the General Rules and Regulations under the heading “National defense-emergency authorization” as follows:

“The Federal Communications Commission may authorize the license of any radio station during a period of national emergency to operate its facilities upon such frequencies, with such power and points of communication, and in such a manner beyond that specified in the station license as may be requested by the Army or Navy.”

RULE AMENDED

FCC amended its Rules of Practice and Procedure by striking the third proviso of Section 1.71 thereof, reading as follows:

“Provided, further, That in cases where an applicant desires a modification of a rule or regulation, he shall submit a formal petition setting forth the desired change and the reasons in support thereof.”

The Rules of Practice and Procedure are amended by adding the following new provision:

“AMENDMENT OF RULES

“Sec. 1.81 - Requests for amendment of rules. Any person may petition for amendment of any rule or regulation. Such petition shall show the desired change in the rules and regulations and set forth the reasons in support thereof.

Paragraph (b) of Section 1.72 of the Rules of Practice and Procedure is hereby repealed, and the following provisions adopted in lieu thereof:

(b) If an applicant is requested by the Commission to file any documents or information not included in the prescribed application form, a failure to comply with such request will constitute a defect in the application.

(c) Applications which are not in accordance with the Commission’s rules, regulations or other requirements will be considered defective unless accompanied either (1) by a petition in accordance with Section 1.81 to amend any rule or regulation with which the application is in conflict, or (2) by a request of the applicant for waiver of, or an exception to, any rule, regulation or requirement with which the application is in conflict. Such request shall show the nature of the waiver or exception desired and set forth the reasons in support thereof.

(d) Defective applications will not be considered by the Commission.”

The Commission also extended the effective date of Section 3.32(b) of Standard and High Frequency Broadcast Rules which prohibits broadcasting of commercial programs under experimental authorizations, to July 29, 1941.

SHORT WAVE PROPAGANDA

James Lawrence Fly, Chairman, Federal Communications Commission, gave the following address before the Committee on Communications, American Bar Association, at luncheon, May 23, 1941:

I am happy to be here with you this noon, and to join you in showing appreciation for the services rendered by the editors of the Federal Communications Bar Journal. All of us know that foreign broadcasts—except, of course, those relayed over American networks—reach a relatively small American audience. For example, I doubt whether more than a dozen of you have listened to a foreign short-wave propaganda broadcast during the past month. How many of you have actually listened in on short-wave to British, German, Italian or other foreign broadcasts during the past month?

Experts in the field inform me that few of the propaganda devices used in broadcasting are new; they are chiefly the old devices of exaggeration, suppression, distortion, appeals to vanity, pride, and self-interest, and exploitation of previously existing jealousies and hatreds. Thus, the Germans point to the period of the American Revolution and the War of 1812; the English point to the century of good feeling which has existed since.

Even a slight difference in emphasis may have very real significance. When the British lost Sidi Barrani last fall, for example, the Italian radio acclaimed the victory as of great importance. When the British recaptured it thereafter, Italian announcers called it a "miserable victory," and deprecate its importance. Similarly, during the very first days of the Greek campaign when the Greeks were retreating, the British radio talked about the Greek army. But when the tables were turned and the Italians were hurled back into Albania, the British radio stressed the Italian defeat at the hands of "allied forces." You seldom hear much about "German victories" over the Italian radio; it always speaks of "Axis victories."

In general, programs beamed at the United States are of three types. Some are intended to appeal to Americans in general. News broadcasts and talks on current issues are of this type. A second type of program is aimed at particular groups of Americans. Night broadcasts last week, for example, BBC from London to the United States a program appealing primarily to American ministers of the gospel, while a simultaneous German program was appealing primarily to tenant farmers, share croppers, and the Oakies portrayed in "Grapes of Wrath." In general, the BBC seems to concentrate upon American groups which are in a position to influence public opinion, while Germany everts to larger but less articulate sections of the American public.

A third type of propaganda program is aimed specifically at Americans of foreign descent. Frequently these programs are in a foreign language, and it is interesting to contrast the news broadcasts in United States in English with the news broadcast immediately before or after by the same foreign station in its own language.

The real significance of such programs is seldom visible upon their face. The German radio, for example, hinted not long ago of certain frictions between the French government at Vichy and the German government, and portraying the French government as independent of German domination, in order to procure for Vichy a more favorable treatment from the United States; or else a move to prepare American listeners for some new action by the French. Other examples can be given of bow motives, and hence probable future actions, can be inferred from propaganda by radio.
The significance of such broadcasts often lies less in what is said than in the frequency with which it is said and the proportion of time devoted to saying it. The various themes which each foreign station dwells upon may have as much to do with the way that the rise and fall of stock on the stock exchange can be charted. The former director of the Princeton University listening center, now on the FCC Monitoring Service staff, has prepared a chart showing the shift in emphasis of Nazi broadcasts to the United States which occurred about May 1940, when England and Holland were invaded. In the first instance more emphasis was placed upon praise of United States isolationism than upon criticism of the United States. After May 1940, more than twice as much emphasis was placed upon criticism of the United States as upon praise of isolationism. This change of trend is a reflection of the events of the first years of the war and the increasing significance of such broadcasts often lies less in what is said than in the frequency with which it is said and the proportion of time devoted to saying it. The various themes which each foreign station dwells upon may have as much to do with the way that the rise and fall of stock on the stock exchange can be charted. The former director of the Princeton University listening center, now on the FCC Monitoring Service staff, has prepared a chart showing the shift in emphasis of Nazi broadcasts to the United States which occurred about May 1940, when England and Holland were invaded. In the first instance more emphasis was placed upon praise of United States isolationism than upon criticism of the United States. After May 1940, more than twice as much emphasis was placed upon criticism of the United States as upon praise of isolationism. This change of trend is a reflection of the events of the first years of the war and the increasing significance of such broadcasts.

One of the chief motifs of German broadcasts today seems to be the attempt to drive a wedge between the American people and what the German radio now calls "Washington politicians." Another is the driving of a wedge between Jews and non-Jews in the United States. This German short-wave anti-Semitism appears to be aimed less at injuring the Jews of the United States than at attempting to stir up American disunity and domestic strife.

I should say that the British broadcasts aimed at the United States have vastly improved in effectiveness during recent months. The British Broadcasting Company once sent us learned but dull discussions by university professors about the niceties of international law, or descriptions of Buddhism by retired army officers. Today, listeners on short-wave can hear Somerset Maugham, a novelist popular with the American public, or Leslie Howard, an actor well-known to American movie audiences. Similarly, the North American broadcasts of the French Government station, Paris-Mondial, were, when first inaugurated in the spring of 1938, extremely dull and uninspired. With the invasion of Denmark and Norway in April, 1940, a significant change occurred. "Cultural" talks and features designed particularly for women and students of art and literature were substantially replaced by news and comment designed to inspire confidence in France and hatred of Germany.

Frequently American listeners are given varying treatments of the same theme from different sources almost simultaneously. Thus, when our ambassador to England, Mr. John G. Winant, spoke at a luncheon in London some days ago, the British transcribed his address and broadcast portions of it that very evening. German listening posts evidently picked it up and transcribed it for the following evening the German radio carried portions of the speech, interlarded with German analysis and comments. Similarly each major American speech or diplomatic move is variously interpreted from London and Berlin. In such cases, the American short-wave listener has available something approach¬ing the forum debates broadcast over domestic stations, except that on the short waves he must tune to various stations to get various points of view.

The first American agencies to engage in systematic rather than casual listening to foreign short-wave broadcasts were probably those of our embassies abroad, news agencies, and news gathering agencies, and the news divisions of our broadcasting networks. The FCC's Foreign Broadcast Monitoring Service, established by the Federal Communications Commission, has had the aid and advice of these pioneers in establishing its own Foreign Broadcast Monitoring Service.

The first step in this monitoring is to record the programs picked up by a telegraph receiver or on tape and to transcribe these to paper. This transfer of the programs to paper is essential, for as repeated psychological studies have shown, human beings accept spoken words less critically than written words. With a typed script before you, you can analyze, criticize and deduce. When listening to spoken words, the tempo is such that you can only accept or reject.

Once scripts are reduced to writing, and those in foreign languages translated into English, the task is to condense. The British Broadcasting Corporation each week makes written words less than are contained in the Bible or in the works of Shakespeare. This flood of material must be reduced to manageable proportions.

In setting the grain from the chaff, trends are often more important than specific statements. A discussion of the invasion of England, for example, may serve as a summary or a discussion of Far Eastern developments from Great Britain, may have little significance. But if an increasing proportion of German radio time were devoted to invasion stories, or an increasing proportion of British radio time to the Far East, we might safely infer the preparation of some move in these directions. Likewise, much is to be learned from a comparison of the number of broadcasts to other foreign parts of the world. Thus, while the Nazi broadcasts aimed at Britain and North America in the summer of 1940 dealt menacingly and often with invasion of England, domestic German broadcasts seldom alluded to the subject. The obvious deduction was that early invasion was not actually contemplated since the German home audience was hearing little or nothing about it and was not being led to expect it.

Careful analysis of foreign short-wave broadcasts should keep the United States informed of the objectives which other countries are pursuing, and of their attitude toward the United States. The Report Section of the FCC's new Foreign Broadcast Monitoring Service will prepare confidential daily summaries, both factual and interpretative, of foreign broadcasts. These summaries will be made available for the information of various government departments.

Fear has been expressed in some quarters that foreign propaganda aimed at the United States may have considerable influence. But so long as the public trust the press nor the radio is free, propaganda broadcasts from abroad may have considerable influence. Few if any listeners will be misled by partisan propaganda from abroad.

FROM THE FCC MAIL BAG

Various letters suggesting that broadcasts in foreign languages be discontinued by domestic radio stations have been received by the Federal Communications Commission. The Commission advises that it has issued no ruling which precludes such broadcasts. An extensive study, however, has been made of foreign language programs. Each license has the initial responsibility under the law for the selection of program material, and foreign language broadcasts are subject to the same considerations that govern general broadcast service. Specific complaints regarding programs which appear to be contrary to the public interest receive prompt attention.

To a national group which urged that foreign language programs be "ruled off the air without further consideration," Chairman James Lawrence Fly stated these personal views:

"In my opinion foreign language broadcasts are of considerable value. I believe that it would be a serious mistake for either the Government or the broadcast stations to take any action at this time to discontinue or curtail them. These programs have an important place in the lives of foreign-born citizens and residents, and it is likely that their elimination would be regarded as a senseless discrimination. In particular, I wish to concur in your opinion that these broadcasts can play an important role in the 'Americanization process.' It seems clear to me that any persons ... who are bringing pressure on stations to discontinue all foreign language programs are pursuing a shortsighted policy and should not be encouraged.""

The Commission has received numerous letters regarding alleged refusal of broadcasting time to Charles A. Lindbergh. Such inquirers are informed:

"Broadcast stations are expressly declared by the Communications Act not to be common carriers and, accordingly, determination as to who shall appear on program is a matter resting in the first instance with the individual broadcast station. Broadcast stations have the duty of serving the public interest, convenience, and necessity and the discretion left to them in the selection of who may use broadcast facilities and the conditions with respect to such use is subject to this legal requirement. In carrying out the obligation to render a public service, stations are required to furnish well-rounded rather than one-sided discussions of public questions. This duty does not imply any requirement that the use of broadcast facilities shall be afforded to any particular individual or group. In other words, the duty of the station is to present both sides of public issues fairly rather
than to allow any one man to use its facilities. The Commission will give consideration to any evidence that both sides of the questions upon which Colonel Lindbergh sought to speak are not being fairly presented by any radio station."

To a woman who wants to be guest on the "I'm an American" program, the Commission reiterates that it is without authority to put anybody on or take anybody off the air; that such determination rests with the individual broadcast station. The same explanation is given to another woman who would force radio stations to use a particular song, and to a Dayton listener who protests rendition of classical music in syncopated style, and to a citizens' group which adopted a resolution favoring "less time for broadcast programs of an emotional nature and more time for programs with constructive and educational features." In the case of letters objecting to particular programs the Commission suggests that such comments be transmitted directly to the station involved.

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, June 2. They are subject to change.

**Monday, June 2**

NEW—Symons Broadcasting Company, Ellensburg, Wash.—C. P., 1110 kc., 1 KW, unlimited time.

WHB—WHB Broadcasting Company, Kansas City, Mo.—C. P., 710 kc., 5 KW, DA-night and day, unlimited time.

WTCN—Minnesota Broadcasting Corp., Minneapolis, Minn.—C. P., 710 kc., 10 KW, unlimited time, DA-night.

Monday, June 2

Hearing to be held in Pensacola, Florida, beginning June 2 and continued thereafter in Panama City, Florida, and Ocala, Florida, as follows:

Pensacola, Florida, in Court Room, County Court Building, Panama City, Florida, in Court Room, County Court House, Ocala, Florida, in U. S. Court Room, 2nd Floor, U. S. Post Office Building.

WTMC—Ocala Broadcasting Company, Inc., Ocala, Fla.—In the Matter of Revocation of License of Station.

WDL—Panama City Broadcasting Company, Panama City, Fla.—In the Matter of Revocation of License of Station.

**Tuesday, June 3**

Broadcast

Consolidated Hearing

To be held in Portsmouth, Ohio, in the Scioto County Probate Court Room.

WPAY—Chester A. Thompson (Transferor) and The Brush-Moore Newspapers, Inc. (Transferees), Portsmouth, Ohio.—Transfer on control of corp., 1570 kc., 100 watts, unlimited time.

WPAY—Cee Bee Corporation, Portsmouth, Ohio.—Renewal of license, 1570 kc., 100 watts, unlimited time.

**Friday, June 6**

NEW—Butler Broadcasting Corporation, Hamilton, Ohio.—C. P., 1170 kc., 250 watts, unlimited time.

**FUTURE HEARINGS**

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

June 27

NEW—Parkersburg Sentinel Company, Parkersburg, W. Va.—C. P., 1310 kc., 250 watts, unlimited time.

WRDO—WRDO, Incorporated, Augusta, Maine.—Renewal of license, 900 kc., 100 watts, unlimited time.

July 28

KMA—May Broadcasting Company, Shenandoah, Iowa.—Renewal of license, 930 kc., 1 KW night, 5 KW day, unlimited.

August 1

To be held in Atlanta, Georgia

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license (main and auxiliary), 890 kc., 1 KW night, 5 KW LS, unlimited time.

August 4

**APPLICATIONS GRANTED**

KENO—George Penn Foster, Maxwell Kelch and Calvert Charles Applegate, d/b/a as Nevada Broadcasting Co., (assignor), Nevada Broadcasting Co., a corporation (assignee), Las Vegas, Nevada.—Granted consent to assignment of license of station KENO from George Penn Foster, Maxwell Kelch and Calvert Charles Applegate, d/b/a as Nevada Broadcasting Co. to Nevada Broadcasting Company, a corporation; station operates on 1400 kc., 250 watts, unlimited time.

W3XE—Philco Radio & Television Corp., Philadelphia, Pa.; W3XP—Philco Radio & Television Corp., Portable (area of Philadelphia, Pa.).—Present license for television station further extended on a temporary basis only, for period June 1 to not later than July 1, 1941, pending determination upon application for renewal (B2-SVB-8) and (B2-SVB-19).

W2XVP—City of New York, Municipal Broadcasting System, New York City.—Present license for high frequency broadcast station further extended on a temporary basis only, for period June 1 to not later than July 1, 1941, pending determination upon application for renewal (B1-SHB-71).

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Present license for high frequency broadcast station further extended on a temporary basis only, for period June 1 to not later than July 1, pending determination upon application for renewal (B3-SHB-48).

W4XA—The National Life & Accident Ins. Co., Inc., Nashville, Tenn.—Present license for high frequency broadcast station further extended on a temporary basis only, for period June 1 to not later than July 1, 1941, pending determination upon application for renewal (B3-SHB-51).

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Present license for high frequency broadcast station further extended on a temporary basis only, for period June 1 to not later than July 1, 1941, pending determination upon application for renewal (B3-SHB-21).

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Granted modification of construction permit to change type of transmitter originally specified (B2-XP-1146).

**DESIGNATED FOR HEARING**

George Grant Brocks, Jr., Scranton, Pa.—Application for construction permit for new broadcast station to operate on 1100 kc., 250 watts, unlimited time, exact site and antenna system to be determined with Commission approval; requests facil...
ties of WARM. Joint hearing with application of WARM for renewal of license and application of Anthracite Broadcasting Co., Inc., for new station at Scranton to operate on 1100 kc., 250 watts, unlimited, requesting facilities of WARM.

WICA—WICA, Inc., Ashtabula, Ohio.—Application for construction permit to install a new transmitter and directional antenna for night use; increase power from 1 KW to 5 KW day, 1 KW night, and change hours of operation from daytime only to unlimited (B2-P-3081).

WWSR—Walker & Dowling Radio Corp., Pittsburgh, Pa.—Application for construction permit to change frequency from 1190 to 970 kc.; increase power from 250 watts to 1 KW night, 5 KW day; install new transmitter, move transmitter to 1 1/2 miles north of McKees Rocks Boro, S. of W., add station transmission antenna for night use; increase power from 1 KW to 5 KW day, 5 KW night; install directional antenna for day and night use. To be heard jointly with application of WICA listed above (B2-P-3055).

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—Application for construction permit to change frequency from 1170 to 1070 kc.; increase power from 5 to 50 KW; move transmitter, install new transmitter, and directional antenna for night use.

APPLICATIONS PLACED IN PENDING FILES

KMMJ—Don Searle, G. A. Searle, Jr., Helen Searle Blanchard and Herbert Hollister (Transferors); Grand Island Independent Publishing Co. (Transeree), Grand Island, Neb.—Placed in pending files pursuant to Order No. 79, application for consent to transfer all the outstanding stock of station KMMJ, Inc., from Don Searle, H. A. Searle, Jr., Helen Searle Blanchard and Herbert Hollister, to the Grand Island Independent Publishing Co. (B4-TC-268).

WTFIL—Tom M. Bryan (Assignor), Ralph A. Horton (Assignee), Fort Lauderdale, Fla.—Placed in pending files pursuant to Order No. 79, application for consent to transfer all the outstanding stock of license of station WTFIL, from the individual licensee, Tom B. Bryan to Ralph A. Horton (B3-AI-305).

WOKO, Inc., Albany, N. Y.—Placed in pending files pursuant to Order No. 79, application for new FM station (B1-PH-50).

Courier-Journal and Louisville Times Co., Louisville, Ky.—Placed in pending files pursuant to Order No. 79, application for new FM station (B2-PH-88).

MISCELLANEOUS

W2XVT—Allen B. DuMont Labs., Inc., Passaic, N. J.—Granted special temporary authority to operate a 100 watt transmitter with special emission for FM on channel No. 1 (5000-56000 kc.), in order to conduct tests, for the period May 21 to June 19, providing no interference is caused to other stations.

KRMJ—Merced Broadcasting Co., Merced, Calif.—Granted special temporary authority to operate the relay transmitter covered by pending application for construction permit (B3-PRY-245) in order to broadcast races on Inland Lake, Yosemite, San Joaquin Valley, for the period May 25 to May 31, only (B5-S-896).

KGU—Marion A. Mulroney & Advertiser Publishing Co., Inc., Honolulu, Hawaii.—Granted special temporary authority to rebroadcast transmissions of U. S. Army planes EY3, HF7 and L35 operating on 6500 kc., for a period of about one hour every day on the evening of May 20, in connection with territory “Blackouts” scheduled to take place throughout Hawaii only (B-S-124).

High Point Broadcasting Co., High Point, N. C.; Ralph L. Lewis, Greensboro, N. C.—The Commission on its own motion consolidated the hearing now set for May 21 on these two applications and continued same until May 28, 1941.

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Granted special temporary authority to operate from 7 p. m. until conclusion of Modesto Music Festival from Junior College Auditorium on May 21 only (B5-S-825).

WDAE—Tampa Times Co., Tampa, Fla.—Granted special temporary authority to rebroadcast transmission between 5:30 and 5:45 p. m. EST, May 26, of Florida Forest and Park Service, radio station WROO on 2296 kc., in special demonstration of forest fire prevention service program only (B3-S-437).

W2XBS—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate a specially constructed 1 KW peak power, special emission laboratory model FM visual transmitter alternately with the regular visual transmitter on Channel No. 1 for the purpose of making field observations, for the period May 25 to June 25, 1941.

W2XBS—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate television broadcast station W2XBS with special emission in addition to A3 emission on Channel No. 1, in order to conduct experimental tests for the XBC for period May 26 to June 24.

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-889).

WTAW—Agricultural & Mech. College of Texas, College Station, Texas.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-852).

WSBC—Radio Station WSBC, Chicago, Ill.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-872).

KHBC—Hawaiian Broadcasting System, Ltd., Hilo, T. H.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-903).

KROY—Royal Miller, Sacramento, Calif.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-900).

WEMP—Milwaukee Broadcasting Co., Milwaukee, Wis.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-869).

KTSM—Tri-State Broadcasting Co., Inc., El Paso, Texas.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-883).

KGA—Louis Wasmes, Spokane, Wash.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-903).

KLBM—Harold M. Finlay, La Grande, Ore.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-850).

KVA and Army—Ford Broadcasting Co., Inc., San Francisco, Calif.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-866) and (B5-Z-870).

KFVS—Hirsch Battery & Radio Co., Cape Girardeau, Mo.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-893).

KFFN—KFNF, Inc., Shenandoah, Iowa.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-858).

KVOX—KVOX Broadcasting Co., Moorhead, Minn.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-792).

WMPC—the Liberty St. Gospel Church of Lapeer, Mich.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-831).

KFBY—Marshay M. Prince, D. D., Alton, Ill.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-893).

KFFA—The Mid-Western Radio Corp., Greeley, Colo.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-854).

WAML—New Laurel Radio Station, Inc., Laurel, Miss.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-857).

KMED—Mrs. M. J. Virgin, Medford, Ore.—Granted authority to install automatic frequency control equipment (B3-F-187).

WFTC—J. E. Weiland, Kinston, N. C.—Granted authority to install automatic frequency control equipment (B5-F-187).

KHUB—John F. Scripps, Watsonville, Calif.—Granted authority to determine operating power by direct measurement (B5-Z-836).

WCB—WCRD, Inc., Chicago, Ill.—Granted authority to determine operating power by direct measurement (B4-Z-871).

WDAN—Northwestern Publishing Co., Danville, Ill.—Granted authority to determine operating power by direct measurement (B4-Z-871).

WHub—Anderson Broadcasting Corp., Anderson, Ind.—Granted authority to determine operating power by direct measurement (B4-Z-818).

KGHF—Arkansas Broadcasting Co., Little Rock, Ark.—Granted authority to determine operating power by direct measurement (B3-Z-857).

May 29, 1941 — 487
WRDO—WRDO, Inc., Augusta, Me.—Granted authority to determine operating power by direct measurement (B3-Z-874).

KNOY—The Valley Broadcasting Co., Loaam, Utah.—Granted authority to determine operating power by direct measurement (B3-Z-874).

KENO—Nevada Broadcasting Co., Las Vegas, Nev.—Granted construction permit to move studio and transmitter from the Meadows to El Rancho Vegas, Las Vegas (B5-P-3135).

WEBQ—Harrisburg Broadcasting Co., Harrisburg, Ill.—Granted construction permit to change type of transmitter, make changes in antenna and change location of transmitter to lower floor level same address; 1210 kc., under NARBA (B4-P-3133).

KELD—Radio Enterprises, Inc., El Dorado, Ark.—Granted construction permit to change tubes in last radio stage from four RCA 209-A to two RCA 805 (B3-F-3123).

KHIJ—Don Lee Broadcasting System, Los Angeles, Calif.—Granted modification of construction permit (B3-P-2564), which authorized increase in power, installation of DA (for day and night use, changes in equipment, and move of transmitter) for installation of new transmitter, and extension of commencement date to 60 days after grant and completion date to 180 days thereafter (B5-MP-1296).

KGBN—Don Lee Broadcasting System, San Diego, Calif.—Granted license to cover construction permit (B5-P-2940) which authorized changes in transmitting equipment and to specify 1300 kw., under NARBA (B5-L-1398).

WRDO—WRDO, Inc., Augusta, Me.—Granted authority to determine operating power by direct measurement of antenna power on 1100 kc., under NARBA (B1-Z-758).

KOMA—KOMA, Inc., Oklahoma City, Okla.—Granted authority to determine operating power by direct measurement of antenna power on 1230 kc., under NARBA (B2-Z-771).

KUSP—University of Southern Dakota, Vermillion, So. Dak.—Granted special temporary authority to remain silent for the period June 9 to 2:30 p.m., September 15, 1941, in order to observe University summer vacation (B4-S-651).

WCKY—L. B. Wilson, Inc., Cincinnati, Ohio.—Denied special temporary authority to operate daytime with non-directional antenna and to make changes in antenna system (B2-MP-21).

W6XAO—Don Lee Broadcasting System, Hollywood, Calif.—Granted license to cover construction permit (B5-P-2729), for installation of directional antenna for night use and increase in power to 5 kw. (B5-L-1339). Also granted authority to determine operating power by direct measurement of antenna power (B5-Z-739).

W45PH—Penna Broadcasting Co., Philadelphia, Pa.—Granted modification of construction permit (B2-PH-69, covering new FM station) for change in type of transmitter and to make changes in antenna system (B2-MP-21).

W6XAO—Don Lee Broadcasting System, Hollywood, Calif.—Granted license to cover construction permit (B5-P-2729), for installation of directional antenna for night use and increase in power to 5 kw. (B5-L-1339). Also granted authority to determine operating power by direct measurement of antenna power (B5-Z-739).

W45PH—Penna Broadcasting Co., Philadelphia, Pa.—Granted modification of construction permit (B2-PH-69, covering new FM station) for change in type of transmitter and to make changes in antenna system (B2-MP-21).

W6XAO—Don Lee Broadcasting System, Hollywood, Calif.—Granted license to cover construction permit (B5-P-2729), for installation of directional antenna for night use and increase in power to 5 kw. (B5-L-1339). Also granted authority to determine operating power by direct measurement of antenna power (B5-Z-739).

W45PH—Penna Broadcasting Co., Philadelphia, Pa.—Granted modification of construction permit (B2-PH-69, covering new FM station) for change in type of transmitter and to make changes in antenna system (B2-MP-21).

W6XAO—Don Lee Broadcasting System, Hollywood, Calif.—Granted license to cover construction permit (B5-P-2729), for installation of directional antenna for night use and increase in power to 5 kw. (B5-L-1339). Also granted authority to determine operating power by direct measurement of antenna power (B5-Z-739).

W45PH—Penna Broadcasting Co., Philadelphia, Pa.—Granted modification of construction permit (B2-PH-69, covering new FM station) for change in type of transmitter and to make changes in antenna system (B2-MP-21).

W6XAO—Don Lee Broadcasting System, Hollywood, Calif.—Granted license to cover construction permit (B5-P-2729), for installation of directional antenna for night use and increase in power to 5 kw. (B5-L-1339). Also granted authority to determine operating power by direct measurement of antenna power (B5-Z-739).

W45PH—Penna Broadcasting Co., Philadelphia, Pa.—Granted modification of construction permit (B2-PH-69, covering new FM station) for change in type of transmitter and to make changes in antenna system (B2-MP-21).

W6XAO—Don Lee Broadcasting System, Hollywood, Calif.—Granted license to cover construction permit (B5-P-2729), for installation of directional antenna for night use and increase in power to 5 kw. (B5-L-1339). Also granted authority to determine operating power by direct measurement of antenna power (B5-Z-739).
Lewis to sever his application from the High Point Broadcasting Co. application.

KTBC—State Capitol Broadcasting Assn., Inc., Austin, Tex.—Granted special temporary authority to operate from 5:30 to 9:10 p. m. and from 10 a. m. to 4 p. m., CST, on May 25, June 1, 8, 15 and 22, 1941, in order to broadcast a program originating in the Governor's mansion, provided WTTW remains silent.

WTAW—Agricultural & Mechanical College of Texas, College Station, Tex.—Granted special temporary authority to operate from 9 to 10 a. m., CST, on May 25, June 1, 8, 15 and 22, 1941, in order to cooperate with KTBC in a special broadcast, provided KTBC remains silent.

WHKC—United Broadcasting Co., Columbus, Ohio.—Granted special temporary authority to remain on the air from regular sign-off time (10 p. m., EST) to conclusion of Joe Louis-Bill Conn fight on June 8, 1941; to conclusion of Fritzie Zivic-Al Davis fight June 25, 1941, in event these bouts should run later than 10 p. m.

WBML—Middle Georgia Broadcasting Co., Macon, Ga.—Granted special temporary authority to rebroadcast a portion of the U. S. Army plane-to-plane communication in connection with the arrival of 160 U. S. Army training planes, 80 of which will be stationed at U. S. Army Flying School No. 1, between May 28 and June 5, 1941, only.

WSOC—Radio Station WSOC, Inc., Fort Wayne, Ind.—Granted special temporary authority to cover construction permit as modified to install new transmitter, new antenna, move studio and transmitter, and special temporary authority to operate for the period ending in no event later than June 19, 1941, for a period not to exceed 90 days, pending installation of antenna described in construction permit.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted special temporary authority to operate additional time May 27, 1941, in order to broadcast President Roosevelt's address only.

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Denied request for special temporary authority to operate on an unlimited time basis for a period of one month.

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Denied request for special temporary authority to operate on an unlimited time basis for a period of one month.

W47A—Capital Broadcasting Co., Inc., Schenectady, N. Y.—Granted special temporary authority to install at New Scotland, N. Y., and operate through a temporary antenna mounted on a 65-foot telephone pole, for a period not to exceed 90 days, pending installation of antenna described in construction permit.

WBAA—Purdue University, West Lafayette, Ind.—Granted special temporary authority to operate from 4 to 6 p. m., CST, on June 8, 1941, in order to broadcast complete Commencement Service of Purdue University only.

WBRE—Monmouth Broadcasting Co., Red Bank, N. J.—Granted extension of special temporary authority to remain silent for the period ending in no event later than June 19, 1941, pending completion of adjustments made necessary by fire.

WGE0—General Electric Co., Schenectady, N. Y.—Granted special temporary authority to operate with the last intermediate power amplifier as the last radio stage; last radio stage consists of 6 General Electric GL-858 tubes, maximum rated carrier power 50 KW for a period ending not later than September 1, 1941.

KEX—Oregonian Publishing Co., Portland, Ore.—Petition for reconsideration and grant of application for renewal of license for station KEX, granted, hearing heretofore scheduled cancelled, and renewal of license granted on regular basis.

KGALouis Wasner, Spokane, Wash.—Petition for reconsideration and grant of application for renewal of license for KGA, granted, cancelled hearing heretofore scheduled, and renewal of license granted on regular basis.

WGN—WGN, Inc., Chicago, Ill.—Granted petitions of WGN to intervene and to enlarge issues in the hearing on the applications of WTCN, Minneapolis, and WHB, Kansas City, Mo., for construction permits to change frequency to 710 kc.

Park Cities Broadcasting Corp., Dallas, Texas.—Granted motion for leave to intervene in the hearing on the application of WHB to change frequency to 710 kc., and dismissed motion for continuance of hearing.

APPLICATIONS FILED AT FCC

WSVA—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Authority to determine operating power by direct method.

WIND—Johnson-Kennedy Radio Corp., Gary, Ind.—Authority to determine operating power by direct method.

WIND—Johnson-Kennedy Radio Corp., Gary, Ind.—License to cover construction permit (B4-P-1990) as modified to increase power from 1 KW night, 5 KW day, to 5 KW day and night; changes in directional antenna system, and new transmitter.

NEW—Martha M. Russell, d/b as Russell Plantation, Russell-town, Tex.—Construction permit for a new broadcast station to be operated on 580 kc., 1 KW, unlimited hours. Class III-B. Amended to specify transmitter site as to be determined.

WKZO—WKZO, Inc., Kalamazoo, Mich.—Authority to determine operating power by direct method.

WKZO—WKZO, Inc., Kalamazoo, Mich.—License to cover construction permit (B2-P-3060) to install a new directional antenna for night use.

WIOD—Isle of Dreams Broadcasting Corp., Miami, Fla.—Construction permit to move formerly licensed RCA I-DB main transmitter to be used as an auxiliary transmitter with power of 1 KW.

WTMI—The Journal Company (The Milwaukee Journal), Milwaukee, Wisconsin.—Authority to determine operating power by direct method.

WTMI—The Journal Company (The Milwaukee Journal), Milwaukee, Wisconsin.—License to cover construction permit (B4-P-2696) as modified to install directional antenna for night use and increase power.

WJRR—WJR, The Goodwill Station, Detroit, Mich.—Authority to determine operating power by direct method.

WCAI—St. Olaf College, Northfield, Minn.—Authority to determine operating power by direct method.

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—Construction permit to install new transmitter and directional antenna for night use, change frequency from 770 to 1080 kc., power from 10 to 50 KW, hours from Simul. D, shared with WBBD, night to unlimited time and move transmitter. Amended to request 1110 kc. under NARBA and make changes in directional antenna.

WBBN—Columbia Broadcasting System, Inc., Chicago, Ill.—Authority to determine operating power by direct method.

WEAN—The Yankee Network, Inc., Providence, R. I.—Authority to determine operating power by direct method.

WEEU—Berks Broadcasting Co., Reading, Pa.—Authority to install new automatic frequency control equipment.

May 29, 1941 — 489
910 Kilocycles
WFDF—Flint Broadcasting Co., Flint, Mich.—Modification of construction permit (B2-P-2451) as modified, for installation of new transmitter and directional antenna for day and night use, increase power, change frequency, and move transmitter, requesting extension of completion date from 6-14-41 to 8-14-41.

950 Kilocycles
WRAL—Capitol Broadcasting Co., Inc., Raleigh, N. C.—Authority to determine operating power by direct method.

1000 Kilocycles
WINS—Hearo Radio, Inc., New York, N. Y.—Modification of construction permit (B1-P-3026) for approval of directional antenna system and approval of present licensed site. Amended to make changes in proposed directional antenna system, approval of studio and transmitter sites.

1040 Kilocycles
W9XC—Central Broadcasting Co., near Mitchellville, Iowa.—Modification of construction permit (B4-P-1-34) for increase in power and new equipment, to change frequency from 1000 kc. to 1040 kc., make changes in antenna and extend completion date from 10-11-41 to 150 days after date of grant.

1090 Kilocycles
WJAG—The Norfolk Daily News, Norfolk, Nbr.—Authority to determine operating power by direct method.

1110 Kilocycles
WTAW—Agricultural and Mechanical College of Texas, College Station, Texas.—License to cover construction permit (B3-MP-1006) as modified, for new transmitter, increase in power and frequency under NARB.

WDEL—WDEL, Inc., Wilmington, Del.—Authority to determine operating power by direct method.

1240 Kilocycles
NEW—R. O. Hardin, Jr. as Nashville Broadcasting Co., Nashville, Tenn.—Construction permit for a new broadcast station to be operated on 1250 kc., 250 watts, unlimited hours, Class IV. (Facilities of WSNX II and when vacated.)

WRAL—Capitol Broadcasting Co., Inc., Raleigh, N. C.—Construction permit to install new transmitter, install directional antenna for night use, change frequency from 1210 kc. to 620 kc., increase power from 250 watts to 251 watts 5 kw day, and move transmitter.

KGLO—Mason City Globe-Gazette Co., Mason City, Iowa.—License to cover construction permit (B4-P-2329) as modified to install new transmitter, directional antenna for night use, increase power, change frequency; approval of transmitter site, changes in directional antenna on 1300 kc. under NARB.

KXRO—KXRO, Inc., Aberdeen, Wash.—Authority to determine operating power by direct method.

1330 Kilocycles
WLOL—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Construction permit to change frequency from 1330 kc. to 630 kc. power from 1 kw to 1 kw night, 5 kw day, install new transmitter, make changes in directional antenna for day and night use and move transmitter. Amended to give transmitter site.

WJB—Press Publishing Co., Sheboygan, Wis.—Authority to determine operating power by direct method.

1340 Kilocycles
NEW—Southwestern Michigan Broadcasting Corp., Kalamazoo, Mich.—Construction permit for a new broadcast station to be operated on 1340 kc., 250 watts, unlimited hours.

KGZ—Donald C. Trohaor, Kalispell, Mont.—Authority to determine operating power by direct method.

1350 Kilocycles

1360 Kilocycles
NEW—McKee'sport Radio Co., McKee'sport, Pa.—Construction permit for a new broadcast station to be operated on 1360 kc., Class IV, 250 watts and daytime hours.

1380 Kilocycles
WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—License to cover construction permit (B3-P-2931) as modified, to install new transmitter, make changes in antenna, change frequency and increase in power.

1400 Kilocycles
NEW—Frank T. Nied and Perry Stevens, d/b as Nied and Stevens, Warren, Ohio.—Construction permit for a new broadcast station to be operated on 1400 kc., Class IV, 250 watts and unlimited hours. Amended to specify transmitter site.

NEW—South Jersey Broadcasting Corp., Vineland, N. J.—Construction permit for a new broadcast station to be operated on 1300 kc., 250 watts, unlimited hours. Class IV, facilities of WDAS. Amended to request 1400 kc., Class IV, facilities of WDAS when WDAS goes to 1260 kc.

WJSL—Galesburg Broadcasting Co., Galesburg, Ill.—Authority to determine operating power by direct method.

WFOR—Forrest Broadcasting Co., Inc., Hattiesburg, Miss.—Authority to determine operating power by direct method.

NEW—William J. Bray, James L. Ewing, T. B. Lanford and Frank T. Nied and Perry Stevens, d/b as Nied and Stevens, Warren, Ohio.—Modification of construction permit (B3-P-2931) as modified, for new transmitter, increase in power and frequency under NARB.

KGLO—Mason City Globe-Gazette Co., Mason City, Iowa.—Authority to determine operating power by direct method.
NEW—Air-Waves, Inc., Baton Rouge, La.—Construction permit for a new broadcast station to be operated on 1400 kc., 250 watts, unlimited hours.

1410 Kilocycles

WALA—W. O. Pape, tr. as Pape Broadcasting Co., Mobile, Ala.—Modification of construction permit (B3-MP-932) as modified, for increase in power, installation of new equipment and directional antenna for night use, and move transmitter, requesting extension of completion date from 6-29-41 to 9-29-41.

1420 Kilocycles

NEW—Anthracite Broadcasting Co., Inc., Scranton, Pa.—Construction permit for a new broadcast station to be operated on 1400 kc., 250 watts, unlimited hours. Class IV. Facilities of WARM.

1440 Kilocycles

KMED—Mrs. W. J. Virgin, Medford, Ore.—Authority to determine operating power by direct method.

1450 Kilocycles

KFIZ—The Reporter Printing Co., Fond du Lac, Wis.—Authority to determine operating power by direct method.

WNB—Harold Thomas, Bridgeport, Conn.—Modification of construction permit (B1-P-2410) as modified, for a new broadcast station, requesting change in type of transmitter, approval of studio site and extension of completion date from 6-30-41 to 90 days after grant.

WRLC—R. G. LeTourneau, Toccoa, Ga.—Authority to determine operating power by direct method.

WRLC—R. G. LeTourneau, Toccoa, Ga.—License to cover construction permit (B3-P-2767) as modified, for a new station.

WALA—W. O. Pape, tr. as Pape Broadcasting Co., Mobile, Ala.—Construction permit for a new high frequency broadcast station to be operated on 1490 kc., 140 watts, unlimited hours. Class IV. License to Martinsville Broadcasting Co., Inc.

WALA—W. O. Pape, tr. as Pape Broadcasting Co., Mobile, Ala.—Authority to determine operating power by direct method.

WGAL—WGAL, Inc., Lancaster, Pa.—Authority to determine operating power by direct method.

WKBZ—Ashbacher Radio Corp., Muskegon, Mich.—Authority to determine operating power by direct method.

FM APPLICATIONS

NEW—James F. Hopkins, Inc., Detroit, Mich.—Construction permit for a new high frequency broadcast station to be operated on 16100 kc., power 50 watts, emission: special for frequency modulation (to be used in conjunction with FM station W5SM1).

NEW—Debs Memorial Radio Fund, Inc., New York, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 18700 kc.; coverage, 8,600 square miles; population, 12,300,000.

TELEVISION APPLICATION

W9XAK—Kansas State College of Agriculture and Applied Science, Manhattan, Kansas.—Modification of construction permit (B4-PVB-25) for a new television broadcast station, for extension of completion date from 7-15-41 to 10-15-41.

MISCELLANEOUS APPLICATIONS

WCRC—Columbia Broadcasting System, Inc., Brentwood, N. Y.—Modification of construction permit (B1-P1B-26) as modified, which authorized a new international broadcast station, requesting the additional frequencies of 6120, 6170, 21570 kc., and sharing time on all frequencies with WCBX and share on 6060, 6950, 11830, 15270 and 21520 kc., with WCAB.

W2XB—General Electric Co., New Scotland, N. Y.—Modification of license to change frequency from 60000-86000 to channel No. 3, 66000-72000 kc.

NEW—Rome Broadcasting Corp., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 30830, 33740, 35830, 37980 kc., 15 watts, A3 emission.

WCBX—Columbia Broadcasting System, Inc., near Wayne, N. J.—Modification of construction permit (B1-P1B-27) for move of transmitter and increase in power, requesting additional frequencies 6060, 21550 kc., and sharing time on all frequencies with WCRC and share on 6060, 9650, 11830, 15270 and 21520 kc. with WCAB.

NEW—James Broadcasting Co., Inc., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 30830, 33740, 35830, 37980 kc., 25 watts, A3 emission.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Callaway Mills—Charging price discrimination in violation of the Robinson-Patman Act, a complaint has been issued against Callaway Mills, Lagrange, Ga., which manufactures tufted bed-spreads, bath mats, rugs and allied products and sells them for use and for resale.

The complaint alleges that the respondent has discriminated in price between different purchasers of its products of like grade and quality by selling to certain purchasers at lower prices than the

May 29, 1941 — 491
prices at which it sells products of the same grade and quality to other of its purchasers, and by allowing certain purchasers adjustments, rebates or discounts not given other purchasers.

According to the complaint, the respondent grants a five per cent rebate to any retail customer or "individual recognized department store" customer on its purchases if such purchases exceed $500 a year, the rebate being denied others of this class of customers whether or not their purchases of the respondent's products exceed $500. The complaint further alleges that the respondent grants additional rebates based on annual volume ranging from five per cent on the first $25,000 of sales to ten per cent on net volume if the volume totals $25,000 or more. (4506)

Kemico—A complaint has been issued alleging that F. W. Johnson, trading under the name Kemico, Park Ridge, Ill., has made misleading representations in the sale of 15 formulas for various medicinal and cosmetic preparations and in advertising the therapeutic values of the preparations compounded from the formulas.

According to the complaint, the respondent advertised, among other things, that: "Greaseless Massage Cream" is a cure or remedy for skin imperfections; "Hair Lay Cream" promotes hair growth and relieves itching scalp; "Dandruff Remedy" is a cure or remedy for that condition; and "Teeth Whitener Formula B," "Pine Oil Nasal Spray," "Menthol," "Camphor Nasal Spray," and "Nose Inhalant" are effective for the purposes advertised and are safe for use.

The complaint alleges that the preparations so advertised do not accomplish the results claimed; that "Dandruff Remedy" is of no therapeutic value in treating dandruff in excess of affording temporary relief from the itching symptom associated with dandruff and assisting in the temporary removal of dandruff scales, and that "Teeth Whitener Formula A," "Pine Oil Nasal Spray," "Menthol," "Camphor Nasal Spray," and "Nose Inhalant" are not entirely safe for use. (4505)

Reed Drug Company, Inc.—A complaint alleging misrepresentation in the sale of a medicinal preparation has been issued against Reed Drug Co., Inc., 106 East Main St., West Frankfort, III.

The complaint charges the respondent with disseminating advertisements in which it represents directly or by implication that the preparation denominated as "Mrs. Bee's Femo Capsules," "Femo Caps," and "Bee Caps," constitutes a safe, competent and effective treatment for delayed menstruation.

According to the complaint, the product sold by the respondent is not a competent or effective treatment for delayed menstruation and is not safe for use in that it contains certain drugs in quantities sufficient to cause harm and irreparable injury to health, if used under the conditions prescribed in the advertisements or under customary or usual conditions.

The complaint further charges that the advertisements disseminated by the respondent constitute false advertisements in that they fail to reveal that use of the preparation under such conditions may result in gastro-intestinal disturbances or other serious injury. (4507)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Allied Specialties, Inc., 621 Nobel St., Indianapolis, and Ralph J. Berry and Anne Springer, its officers, have been ordered to cease and desist from misrepresentations in the sale of "Ko-Pak-Ta" warning devices employed for displaying peanuts, and of nuts for use in the devices.

Commission findings are that:

Salesmen for the respondents advertise in local newspapers, a typical advertisement reading: "$2,600 cash will purchase controlling interest in business. Worth $5000 monthly to right man. Party selected must be between 25 and 55 years of age, and furnish references. Gentle. Unusual circumstances have made this opening available. Address Box No. ————".

Persons responding to advertisements receive special appointments with the respondents' representatives and are usually told that large profits will result from operating the nut display warmer. However, the respondents' representations are exaggerated and untrue and none of the purchasers have earned as much as $500 monthly. Instead, it has been the experience of some purchasers that the method of vending as proposed by the respondents is impractical and will not induce a sufficient amount of sales to make the investment.

The Commission order directs the respondents to cease misrepresenting the possible earnings or profits of those who purchase or operate the nut display warmers and to cease representing, directly or by inference, that the respondents guarantee any specified amount as earnings or profits to purchasers or operators.

The respondents also are ordered to cease representing, directly or by inference, that they assign exclusive territorial rights in any certain trade area, when such territory is not so allotted; that they obtain locations for nut display warmers when locations for all the warmers sold by the respondents are not so obtained, and that the respondents resell or permit the return of warmers for refund of investment in case a purchaser is dissatisfied, unless such devices are so disposed of and the investment is returned.

The Commission dismissed the complaint in this proceeding as to White, "Teeth Whitener Formula A," a medicinal preparation.

Commission findings are that the respondents disseminated advertisements in various States representing, directly or by implication, that the external application of their product constitutes a cure or remedy for various skin conditions and other ailments, and that its internal use will purify the blood and be a competent treatment for indigestion and stomach, intestinal and other disorders when in fact its use does not accomplish the results claimed and its therapeutic value is limited to that of a mild laxative or mild diuretic.

The Commission order directs the respondents to cease disseminating advertisements which represent, directly or through inference, that this preparation constitutes an effective treatment for delayed menstruation; that the preparation does not cause the user any discomfort, and that it is safe or harmless; or which advertise that this product may cause gastro-intestinal disturbances and other serious consequences. (4343)

Colonial Drug Co., Tulsa, Okla., and M. A. Younkin, president of Colonial Drug Co., and trading as Colonial Sales Co., have been ordered to cease and desist from misrepresentations in the sale of "Mrs. Bee Femo Caps," a medicinal preparation.

Commission findings are that the respondents disseminated advertisements in various States representing, directly or by implication, that the external application of their product constitutes a cure or remedy for various skin conditions and other ailments, and that its internal use will purify the blood and be a competent treatment for indigestion and stomach, intestinal and other disorders when in fact its use does not accomplish the results claimed and its therapeutic value is limited to that of a mild laxative or mild diuretic;

The Commission order directs the respondents to cease disseminating advertisements which represent, directly or through inference, that "Natural Mineral Extract" constitutes a cure or remedy for, or possesses therapeutic value in, the treatment of eczema, acne, athlete's foot, rheumatism, and some 25 other ailments; that it possesses germicidal, antiseptic, or astringent properties; that it has therapeutic value as a tonic or a blood purifier or in the treatment of women's ailments, and that it constitutes a competent or effective treatment for ill-nourished, backward or defective children. (4260)

Compressed Air Institute—A complaint charging Compressed Air Institute, 90 West St., New York, and others, with certain advertisements and in the advertising and distribution of compressed air machinery and pneumatic tools, has been dismissed. The other respondents in the case were C. Clifford Rohrbach, secretary and manager of the institute, and Independent Pneumatic Tool Co., 600 West Jackson Boulevard, Chicago; Gardner-Denver Co., South Front St., Quincy, Ill.; Ingersoll-Rand Co., 41 Broadway, New York; Worthington Pump and Machinery Corporation, Harrison, N. J.; The Cleveland Pneumatic Tool Co., 3734 East 78th St., Cleveland; The Cleveland Rock Drill Co., 3734 East 78th St., Cleveland; Sullivan Machinery Co., Michigan City, Ind., and Chicago Pneumatic Tool Co., 6 East 44th St., New York, members of the institute. (3958)
Gordon-Gordon, Ltd., and its selling agent, Princess Pat, Ltd., 2709 South Wells St., Chicago, has been ordered to cease and desist from making misleading representations in the sale of cosmetics.

Commission findings are that the respondents, in radio broadcasts and other periodicals, have made various representations purporting to be descriptive of the quality and effectiveness of their cosmetics and that the harmful effects of certain ingredients used in face powders by their competitors.

Findings are further that the respondents represented, among other things, that the use of face powders containing orris root causes the pores of the skin to clog, irritates the skin and causes skin roughness, when in fact the evidence shows there is no indication that orris root will clog the pores; that face powder containing orris root does not generally cause irritation or skin roughness; that the use of orris root is not allergic to orris root and their representation of use of face powder containing it would tend to cause skin irritation and roughness (tests showing that from 10 per cent to 24 per cent of the persons tested might be so affected), and that at the time of hearing in the Commission proceeding, only about 10 per cent of face powder manufacturers used orris root as an ingredient.

The Commission order directs the respondents to cease making the representations found to have been made concerning the effect of orris root in face powder unless such representations are limited to cases in which the face powder is allergic to orris root.

The respondents also are directed to cease representing that “Princess Pat Powder” is non-allergic to all persons, and that its application will smooth the skin, make the skin soft or pliant, or will penetrate beneath the skin surface and beneficially affect oil, “Princess Pat Powder” will prevent crow’s feet, wrinkles or sagging facial muscles or prevent coarse pores and blackheads; that use of their preparation and as “Anti-Wrinkle Cream” which includes the word “Food.”

U.S. COMMISSION, 1941 - 493
other insignia is used, unless and until the respondent has, in fact, made a sufficiently adequate and thorough investigation or inquiry as to assure the fulfillment of the claims made for such service or commercial offering in connection with the use of such insignia or representation;

5. Representing, directly or by implication, that any product, service or other commercial offering advertised in its magazines, periodicals or other publications, or for which respondent has authorized the use of any seal, emblem, shield or other insignia, is guaranteed by respondent, unless such guaranty is without limitation, or, if limited, unless all limitations upon such guaranty are clearly, conspicuously and explicitly stated in immediate conjunction with all such representations of guaranty;

6. Authorizing, or allowing others to represent, directly or by implication, that any product, service or other commercial offering advertised in its magazines, periodicals or other publications, or for which respondent has authorized the use of any seal, emblem, shield or other insignia, is guaranteed by respondent, unless such guaranty is without limitation, or, if limited, unless all limitations upon such guaranty are clearly, conspicuously and explicitly stated in immediate conjunction, or, if limited, unless all limitations upon such guaranty are clearly, conspicuously and explicitly stated in immediate conjunction, or, if limited, unless all limitations upon such guaranty are clearly, conspicuously and explicitly stated in immediate conjunction with all such representations of guaranty.

The provisions of the order do not prohibit the use of the word "recommended" on any seal, emblem, shield or other insignia when the product on which the insignia is used has been adequately and thoroughly tested by the respondent in such a manner as reasonably to assure the quality, accuracy and properties of such product in relation to the intended usage and when the form of the insignia is readily distinguishable by the consuming public from any seal, emblem, shield or other insignia bearing any guaranty.

Witol, Inc., Witol Beauty Laboratories, Inc., and William Witol, president of Witol, Inc., all of 1700 Broadway, New York, has been ordered to cease and desist from misrepresentations in the sale of cosmetic preparations.

The order directs the respondents to cease disseminating advertisements which represent that their preparations "Witol's New Liquid Skin Peel" or "Take-Off" will remove the outer layer of the skin and give the user a new, fresh surface skin; that these preparations are in treatment of eye infections, blackheads, acne, blemishes, or will cause pores and fine lines to diminish, or that the respondents' preparations are sold by means of a special or limited offer when in fact the distribution method is the usual means employed by the respondents in the customary course of business and there is no limitation of the sale of such products.

The Commission dismissed its complaint in this proceeding as to the former respondents Ann Felix, who was vice-president of the two corporations, and Hattie Blankfeld, formerly secretary of Witol Beauty Laboratories, Inc. (3872)

STIPULATIONS

Following stipulations have been entered by the Commission:

Benson & Bell, Inc., an advertising agency, of 527 South LaSalle St., Chicago, has entered into a stipulation to cease certain representations in the dissemination of advertisements concerning "Scientific Non-Irritant Compound Tablets" on behalf of F. A. Stuart Co., Marshall, Mich.

The respondent agency agrees that it will cease disseminating advertisements of the Stuart preparation which represent, directly or by implication, that the product will in no case be deleterious effects to the user, be safe for all cases, or which advertisements should reveal (1) that use of the preparation should be discontinued where a skin rash appears; (2) that it should not be used when abdominal pains or other appendicitis symptoms are present; and 3) that its frequent or continued use may result in dependence on laxatives.

The stipulation provides, however, that such advertisement need contain only a statement that the preparation should be used as directed on the label if and when the label contains the proper warnings. (02791)

Ruth Clark’s Products—Ruth Clark, trading as Ruth Clark’s Products, 430 South Broadway, Los Angeles, have entered into a stipulation to cease certain representations in the sale of food, drug and cosmetic preparations.

The respondent agrees to cease representing, directly or by implication, through use of the abbreviation "Vit" or the word "Vitamin," in connection with the letter "A" in the brand name of her products, "Vit-A-Pac," "Vitamin A Beauty Cream," and "Vit-A

Hair and Scalp Oil," that the Vitamin A content has any beneficial influence or effect on the skin, hair or scalp, and to desist from representing, through use of the word "manufacturer" in connection with the advertising of her products, that she manufactures or compounds all of the products which she sells.

The respondent further stipulates she will cease advertising that her food product, "Re-Chemicalizing Bouillon," is of value or effect in the relief, treatment or correction of arthritis, neuritis, colds, nervousness or skin troubles, or as a reducing aid of itself or when combined with "Blondavita Tea"; or that "Re-Chemicalizing Bouillon" has value in treating or correcting anemia or an underweight condition in excess of such benefits as may accrue from its food elements.

Under her stipulation, the respondent also agrees to cease representing, by use of the word "Re-Chemicalizing" in the brand name of her products, that "Re-Chemicalizing Bouillon" will rechemicalize the system.

In the sale of "Blondavita Tea," the respondent agrees to cease advertising that it has any value in the treatment of kidney, bladder, and skin ailments; that it is an aid to digestion or in the relief of insomnia, or acts as an alkalinizing agent; that it is of value of itself or when combined with the product "Re-Chemicalizing Bouillon" as a reducing aid; that, when combined with "Re-Chemicalizing Bouillon," it is of value in the treatment of arthritis or neuritis, or that when so combined it is of value in the relief of an underweight condition in excess of such benefits as may accrue from the food elements contained in the combined products.

The respondent also stipulates she will desist from representing that "Oils of Youth" will keep the body internally clean, and that "Vitamin A Concentrate" would be valuable to persons suffering from frequent colds, sinus trouble or skin infections, unless the claims reveal that this product would be of value only in cases of Vitamin A deficiency. (02792)

Clyde Collins, Inc., Memphis, Tenn., stipulated that in disseminating advertisements of flavorings designated "Vanilla Extract," "Lemon Extract," "Strawberry Extract," "Pineapple Extract," and "Banana Extract," it will cease using the words "Lemon," "Strawberry," "Pineapple," and "Banana" in combination with the word "Extract" unless the products are composed of genuine ingredients, as distinguished from synthetic chemical substitutes, and such ingredients are suspended in ethyl alcohol. The respondent further agrees to desist from employing the term "Vanilla Extract" to describe a flavoring product, unless it is prepared with a vehicle of ethyl alcohol and contains a flavoring content at least 50 percent of which consists of true vanilla made from the vanilla bean. (02796)

H. Fendrich, Incorporated, 101 Oakley St., Evansville, Ind., entered into a stipulation in which it agrees to cease certain representations in the sale of cigars. The respondent agrees to desist from representing that its "La Fendrich" cigars contain an "imported Havana-rich long filler," or from making any other representation referring to the origin of the filler tobacco of these cigars, unless the country of origin of each of the filler tobaccos used is set forth in the order of their respective predominance by weight and with equal emphasis. The respondent also agrees to cease advertising that the price of this cigar was formerly 10 cents and is now only 5 cents, or any other representation indicating a price reduction unless the price of the particular cigar referred to has recently been the price stated and the reduction has only recently become effective, or unless the date of the price reduction is stated conspicuously in conjunction with the former price. (02794)

Forster Neckwear Co., Inc., 12 West 27 St., New York, entered into a stipulation to cease certain representations in the sale of men’s neckwear.

The respondent corporation agrees to cease using the words "Silk" or "Imported Silk" or any other word or coined words containing silk in or on advertising trade literature, labels, invoices, or otherwise, to describe fabrics or merchandise not composed of silk.

The stipulation provides that (1) if the products are composed partly of silk and partly of other fiber material, the word "Silk," or similar words, if used to refer to the silk content, shall be accompanied by the word "Imported" in equal prominence and type indicating clearly that the products are not made wholly of silk; and (2) if the fiber other than silk constitutes the major content of the product, the name of the predominating material shall precede the word "Silk," as for example, "Cotton and Silk."
The respondent also agrees to cease advertising, branding, labeling, invoicing or selling neckwear or other products as “Imported Fabrics” which are composed in whole or in part of rayon without clearly disclosing the rayon content by use of the word “Rayon”; and, when materials other than rayon are also present, without disclosing in type equally as conspicuous as the word “Rayon,” each constituent fiber in the order of its predominance by weight. (3111)

General Beauty Products Company—Trading as General Beauty Products Co., and having their headquarters at 2110 West Madison St., Chicago, Hec Barth, Samuel Barth and Mrs. Hec Barth, co-partners, stipulated to cease certain representations in connection with the mail order sale of beauty supplies and equipment.

In their stipulation, the respondents agree to cease employing the words “Crystal-Sheen,” alone or in connection with the particular label and design of the container of their hair-rinse product, or, in any other way implying that the product is the widely and favorably known “Sparkle-Sheen” hair rinse, a competitive product, and to cease using any word as part of the trade name for, or any representation relating to, the product “Dandruff Eradicator,” so as to imply that the product, when locally applied to the scalp, will eradicate, remove or destroy dandruff or promote hair growth or feed or nourish dry scalps.

The respondents also stipulate they will cease using as a brand name for their emulsion the word “Lanoleen,” or any other phonetic spelling of the word “Lanolin,” alone or in connection with other words so as to imply that their product is a Lanolin product or that its Lanolin content is substantial and contributes any value.

In their stipulation the respondents, in connection with the illustration of any product, agree to cease employing the legend “Weight 4 oz.” or any other weight indication the effect of which tends to convey the impression that such indication refers to the weight of the contents of the product when in fact it actually refers to the mailing weight. (3112)

Petpak Products Co., 3264 North 33rd St., Milwaukee, has entered into a stipulation to cease certain representations in the sale of bird foods. The respondents agree to desist from advertising that the use of its “Petpak Mating Food” or any of its products will insure fertile eggs or strong, healthy fledglings, or that its products reduce bird mortality or produce stronger or healthier birds. The respondents also stipulate that it will cease representing that “Petpak Special Baby Bird Food” contains no filler, or that the potency of the vitamins in its products is preserved. (02793)

General Vitamins Company—R. V. Annen, trading as General Vitamins Co., 565 West Washington, Blvd., Chicago, has entered into a stipulation to cease certain representations in the sale of “Vey,” the trade name of a medicinal preparation.

The respondent agrees to cease advertising that “Vey” is a vitamin laxative, or, by any other terminology, that it contains vitamins in an amount sufficient to accomplish any therapeutic or dietetic effect.

The respondent also agrees to cease representing, by use of the words “end” and “eliminate” or similar words that the preparation is a remedy for or will cure constipation or has any value in treating this condition in excess of affording temporary relief from its symptoms. The respondent further stipulates that he will cease disseminating any product having value for any symptom or condition in excess of affording temporary relief or benefit for such symptoms or conditions as are due to constipation.

The respondent stipulates that he will cease disseminating advertisements which fail to reveal (1) that his product should not be used when abdominal pain or other appendicitis symptoms are present, and (2) that its frequent or continued use may result in dependence on laxatives. The stipulation provides, however, that such advertisements need contain only a statement cautioning that the preparation should be used as directed on the label, if and when the label contains the proper warnings. (02795)

Jeri Yarn Mills—Herman Rosenberg, trading as Jeri Yarn Mills, 345 Grand St., New York, has entered into a stipulation to cease and desist from certain representations in the sale of yarn.

The respondent agrees to cease employing the word “Mills” as a part of his trade name and dealing in fabrics composed wholly or partly of rayon without clearly disclosing the rayon content and, when the products contain both rayon and other materials, each constituent fiber or material in the order of its predominance by weight.

The respondent also stipulates he will desist from employing the words “Worsted,” “Tweed” or other words connoting wool to designate a product not composed of wool; or the word “Cashmere” to describe a product not composed of the hair or fleece of the Cashmere goat. The stipulation provides that in the case of a product composed in whole or in part of rayon or cashmere, the words “Worsted,” “Tweed” or other wool connoting words or the word “Cashmere,” if properly used to describe the wool or cashmere content, respectively, shall be accompanied by other words in equally conspicuous type accurately describing each constituent fiber or material of which the product is composed, in the order of its predominance by weight. (3109)

Knapp-Monarch Co., St. Louis, and Dominion Electrical Manufacturing, Inc., Mansfield, Ohio, entered into stipulations to cease certain representations in the sale of electrical heating pads.

The respondents agree that in the sale of electrical heating pads not equipped with adequate thermostat or other heat controls calibrated for three different degrees of heat, they will cease making representations which imply that the pads are capable of maintaining, or that operation of the switches used in connection with the pads results in maintaining, three distinct temperatures.

According to the stipulations, the operation of the switches merely regulates the time required to heat the pads to a single maximum temperature for which the heat control units are calibrated. (3114-3115)

Vogue Silks—Irving Roth and Arthur Bassin, co-partners trading as Vogue Silks, 724 Fifth Ave., New York, have entered into a stipulation to cease and desist from certain representations in the sale of textile fabrics.

The respondents agree to cease employing the words “Pure Dye” or any other words connoting silk to describe a product not composed of silk. The stipulation provides that if a product is composed partly of silk and partly of other fibers or materials, the words “Pure Dye” or other silk connoting words, if properly used to describe the silk content, shall be immediately accompanied by other words in equally conspicuous type to accurately designate each constituent fiber or material in the order of its predominance by weight.

Under their stipulation, the respondents further agree to cease advertising, branding, labeling, invoicing or selling products composed wholly or partly of rayon without clearly disclosing (1) the rayon content by use of the word “Rayon” and (2) each constituent fiber of products composed of both rayon and other materials in the order of each fiber’s predominance by weight, and in immediate connection with the word “Rayon.” (3113)
WHITE SHOCKED AT FCC'S ATTITUDE

Senator Wallace H. White today urged a study by Congress of all phases of American radio, including an investigation of the Federal Communications Commission and its recently promulgated regulations affecting network broadcasting. Senator White's statement was made at the opening of hearings by the Senate Interstate Commerce Committee on the resolution he introduced May 13 demanding such study.

"I have long been an advocate of a comprehensive study of this whole radio problem and of the administration of our present radio law," Senator White said.

Still Favors Study

"As far back as 1937 I offered in the Senate a resolution which was pretty general in its character, and I strenuously urged at that time that we should undertake a study of the whole radio situation, and that the Congress should particularly concern itself with matters of principles and policies as they should guide the industry, whereby we would guide our regulatory body in its efforts to administer the law.

"I still favor a comprehensive study of the whole radio situation.

"I still feel that the Congress perhaps ought to lay down more definitely than we have in the existing law, the policies and principles which should guide us and which should control the regulatory body, and which should keep the industry itself in what we believe to be the appropriate bounds."

Referring to the regulations recently promulgated by the FCC, Senator White continued, "I think those regulations suggest such an altered course and are of such importance, both to us as representatives here in the Congress, and to the industry—and I might include the regulatory body itself—that there ought to be a study of the questions raised by those regulations.

"Surprised and Shocked"

"I am very frank to say that it never occurred to me there would be any substantial opposition in any quarter to a study of the possible or probable or feared effects of those regulations. I have thought and I might as well say it here openly, that I have been rather surprised, even shocked, that the Commission itself feels it appropriate to oppose the study which this resolution suggests.

"I have been here in Congress quite a while; I think there is only one member about this table who has served longer than I, and this is the first time so far as my knowledge goes that a regulatory body of the Government, a creature of the Congress itself, has felt it appropriate to challenge either the wisdom or the right of a committee of Congress to review its acts and the policies which it is undertaking to put into effect."

Fly Opposes Review

Chairman Fly opposes a Congressional review although the broadcasting industry has gone on record as favoring one.

"I repeat," Senator White went on, "that position came to me as something of a shock, because I cannot recall another instance in the years I have been in Congress when a regulatory body set up by the Congress, as I say, has challenged the wisdom of a congressional survey of what it was doing and of its claimed rights."
"Now, I confess that I rather resent that attitude. It
seems to me it indicates the thought that the creature
has become at least as important as, if not of greater
importance than, its creator. So I just do not like that
attitude.

Industry Stirred by Regulations

"The radio industry has been greatly stirred by these
regulations. I do not know whether the criticisms of
the industry are justified or are not justified.

"I have wanted to keep an open mind as to the objec-
tives of the Commission. I have wanted to keep an
open mind so far as I could as to the effects of those
regulations upon the industry. But I confess I had
thought the resolution would be reported out, and that
then in the orderly course of events we would begin a
detailed study of the questions raised. And, so far as
I am concerned, I would have no objection to expanding
this study to any appropriate length."

FCC Chairman Fly, the only witness heard during
the first day, devoted much of his time to a resume of
the procedure and the hearings upon which the majority
of the Commission based the regulations. His testimony
was not completed.
James Lawrence Fly, FCC chairman, was on the stand throughout the second day of the Senate Interstate Commerce Committee's hearing on the White resolution (Tuesday).

Senator White (R-Maine), author of the resolution, opened with a statement that he felt Congress, not the FCC, should lay down the policies governing radio. He pointed out that in March, 1937, he had urged a congressional survey of both the industry and the FCC, and that he had reiterated this position in May, 1938, with particular reference to network broadcasting.

The Senator said he was making this statement to clarify any misunderstanding that might have grown out of Mr. Fly's remarks the previous day. Mr. Fly had said the FCC had undertaken the "monopoly" investigation and had formulated the new network rules as a result of congressional pressure, and had quoted from one of Senator White's speeches in that connection.

The Senator concluded his statement by asking why the FCC had not submitted its "monopoly" findings, along with recommendations, to Congress, and adding: "I shrink from commission-made law."

Mr. Fly opened his day's testimony by defending the FCC's right to make the new network rules. He cited the history of anti-monopoly law among the English-speaking peoples and said the feeling of Congress was so strong against monopoly that it had written an anti-monopoly policy into the radio laws of '29 and '34; and had empowered the FCC to make special regulations for chain broadcasting. At one point, Senator White stopped Mr. Fly to state that the chairman was inferring that he (the Senator) was an advocate of monopoly. Mr. Fly said he had no such intention and was sorry.

Mr. Fly then turned to the charges made yesterday by Senator Tobey (R-NH) that the commission was subject to political pressure in awarding licenses, giving power increases, etc., and had given special attention to applications from Governor Cox and Jesse Jones. Yesterday, Mr. Fly had said that a transfer application from Governor Cox had gone through with unusual speed because there were no engineering problems to consider and because the governor's financial position and other qualifications were well known. As to any Jesse Jones case, Mr. Fly said today, there had been no extraordinary speed in putting through the only one that had aroused any comment.

Mr. Fly also said he had not meant to imply by his remarks yesterday that there was no political pressure brought to bear on the commission.

"We are subject to an unmerciful line of political pressure," he said, adding that this was true "never as much as now from a scandal-mongering section of the industry."

Senator Tobey then suggested that the FCC ask all stations and networks to submit lists of all their speakers on the issue of whether this country should get into the war, along with the texts of all the speeches. He indicated that he felt some stations had not given the "anti-war" side an equal amount of time. When he asked Mr. Fly whether he felt this should be done, Mr. Fly said he concurred. Both Senator Wheeler and Senator Tobey pointed out at that point that they felt the networks had been fair in this respect, but that some individual stations had not been.

Mr. Fly then turned to that section of the new rules dealing with "exclusivity" which he discussed at great length. He was interrupted frequently by questions from the committee. At one point, in reply to a question, he
said he thought it would be "healthy" to have six national networks, and that each could be a "good, healthy, profitable operation." He was not certain that this was the proper number, however, nor was he at all certain that the establishment of any new networks (aside from the separated Blue) would result from the new rules.

Any talk that the new rules would result in a general shake-up of the industry, he said, was "just so much moonshine."

He indicated that the commission expected the new rules to be tested by litigation, and said that no punitive action would be taken against any station that entered into any *bonafide* litigation in this respect. Such a station, he said, could continue to operate as at present, pending the outcome of the litigation. He also said that the 90-day limit on sale of the Blue network by NBC could and probably should be extended to prevent a forced sale. Some observers thought that Mr. Fly did not answer definitely a question as to whether the operation of the new rules would be suspended in entirety pending the outcome of any litigation.

Senator Smith (D-SC) at one point asked Mr. Fly whether there wasn't in fact unlimited competition between the networks—"Are these two companies competing with each other or are they in cahoots?"

"I have thought in my observation that they were pretty footy-footy," Mr. Fly replied.

As the session neared a close, Mr. Fly repeated that the new rules constituted "a minor operation on a few small clauses in these (network affiliation) contracts" and "not a wrecking operation . . . except for the Red and Blue."
WHITE RESOLUTION HEARING: THIRD DAY

Senator Wheeler announced at the opening of the hearing Wednesday that after today's session the hearing would be adjourned until next Monday. Some discussion of the order of appearances indicated that Chairman Fly would conclude his testimony next Monday; that he would be followed by Mutual witnesses; that Commissioner Craven would follow these; and that industry proponents of the White resolution would appear, starting next Thursday or possibly Friday.

Mr. Fly and Senator White continued their debate as to whether the FCC had the authority to make the new network rules. The Senator contended it was never the intention of Congress to delegate such authority to the Commission and pointed out that he had some intimate knowledge of Congressional intention since he drafted several of the sections of the law upon which the FCC based its authority. The Senator said it was not the intention of Congress to give the FCC power to determine whether stations violated the anti-trust laws. That was left to the courts. The commission, he said, had been given power only to revoke licenses of those stations which the courts had found guilty of anti-trust law violation. Mr. Fly answered that surely Congress did not want the FCC to sit by and watch monopoly develop, without doing anything about it. He also quoted from a speech by Senator Dill, made at the time the radio law was being considered in the Senate, which Mr. Fly said showed that Congress intended the commission to prevent the growth of radio monopoly.

Senator Wheeler said that Congress did have in mind, when the radio law was enacted, that monopoly should not be built up in the industry, and that the FCC in issuing licenses should consider whether they tended to build up a monopoly. Senator White reiterated, however, that he was "as certain as anything human that we didn't intend by that (Section 303(i)) to give the FCC power to write an anti-trust statute of its own..." He suggested that this section should be rewritten to both grant and limit powers to the FCC in this respect. Senator Wheeler pointed out, at one point in the discussion, that radio stations had the right to go into court to determine the issue, while at another point Senator McFarland of Arizona said that there seemed to be confusion and asked why Congress shouldn't interpret what it meant and write it into law.

When Mr. Fly returned to his discussion of the "exclusivity" sections of the new rules, Senator Wheeler asked him whether it was not possible that advertising agencies in many instances would single out the most powerful stations in the best markets for their programs, thus depriving many smaller affiliates of network revenue they now enjoy. Mr. Fly said this would be possible but that he didn't think it would be feasible since the agencies then would have to go into the network business—getting wires, setting up studios, and all.

As to territorial exclusivity, Mr. Fly said he agreed that duplicate coverage in one market was not desirable, but that other stations should have the opportunity to take programs rejected by an affiliate, particularly speeches by senators and members of Congress.

As to program rejection and the terms of current network affiliation contracts dealing with this subject, Mr. Fly said the discretion for acceptance or rejection of programs was rightly lodged with the licensee and should not be transferred to "a couple of New York Corporations."

Senator Tobey remarked, "I think that is elementary."

When he turned to the sale of the Blue, Mr. Fly said he didn't think NBC would have any difficulty in mak-
ing the sale. Under independent ownership, he said, “it ought to be a much healthier network” and “will make more money than it is making today.”

In connection with the sale, discussion again turned to possible court action. Mr. Fly said he would welcome a court test, but indicated that the Commission might take steps against those involved “if they attempted to paralyze the rules through long delays,” such as the introduction of bills in Congress and similar actions.

Senator Wheeler commented that he thought the industry should not be penalized for going to court, and that the NBC should be given reasonable time to dispose of the Blue. At that point Senator Smith asked Mr. Fly whether he had understood him to say that the industry should be given time to go to court but not to go to Congress for relief. That led to an exchange between Senator White and Mr. Fly in which Mr. Fly accused the industry of “marching behind” Senator White in an effort to stymie the operation of the new rules. When the senator objected to this, Mr. Fly hastily assured him that he did not mean to imply that the senator’s motives were anything but the highest.

Senator Wheeler remarked during this discussion that there had been “too much heat” generated by both the broadcasters and the Commission in connection with the monopoly issue and that “it ought to stop.” “Those who are doing it are making a mistake from their own standpoint,” he said.

Senator Johnson asked Mr. Fly why so many affiliates didn’t want all the liberty that the FCC was proposing to give them. Mr. Fly said they hadn’t had the opportunity to express an independent opinion. Senator Wheeler added that there were two things the industry feared: the FCC and the industry. “I found out in St. Louis that they weren’t afraid of me,” Mr. Fly laughed. He agreed with Senator Wheeler about the “heat.”

At the end of the day’s hearing, Mr. Fly reiterated his frequently made assertion that “I don’t think for a moment that we ought to have government ownership” of radio. The growth of monopoly, he said, was a step toward government ownership, and the industry was “moving step by step, hour by hour, toward monopoly.”
White Hearing

Indications this week-end were that industry proponents of the White Resolution (S. 113) would start their testimony before the Senate Interstate Commerce Committee either Thursday of Friday. It is possible, however, that this testimony will not start until the third week of the hearing. The hearing, recessed Wednesday noon, will be resumed Monday at 10 a.m. Chairman Fly will appear for the fourth day. Mutual Broadcasting System witnesses are scheduled to follow Mr. Fly with about two days of testimony. Commissioner Craven who, with Commissioner Case dissented in the Monopoly Report, is to follow Mutual. Industry proponents are scheduled to follow Mr. Craven.

Following are some portions of the transcript of remarks at the hearing this week which may be of interest to members. Remarks of THE CHAIRMAN are those of Senator Wheeler, Chairman of the Interstate Commerce Committee.

Commission vs. Congress

SENATOR WHITE. About 15 or 20 minutes ago my attention was called to a newspaper account of some of the testimony of yesterday. It made particular reference to quotations by the witness from a speech which I made in the Senate in 1937. At the time the Chairman of the Commission was making reference to that speech I had not had occasion to read it for a substantial length of time. I know it was a good speech, and I recommended its reading to the chairman some time back, but I had not read it myself.

I recall that the Chairman of the Commission said that that speech of mine was a part of the motivating force for the investigation conducted by the Commission. I have no objection to that at all, because I do approve of the Commission's studying these problems, but I rather pull away from the suggestion that I think is involved in what the Chairman of the Commission said, that I necessarily approve of the findings of the Commission or of the specific recommendations by the Commission.

As a matter of fact, Mr. Chairman, I have very definite ideas as to the responsibility of the Congress itself for the determination of principles and for the laying down of policies which should guide a regulatory body in the performance of its duties; and I think, if one will read that 1937 speech I made, it will show beyond all peradventure that what I was urging was not any specific action by the Commission, and certainly they will agree that I was not approving any recommendations that the Commission might hereafter reach, but what I was undertaking to do in that speech was to stress the obligation of the Congress itself to give study to these problems and to reach its conclusions with respect to these problems, and lay down rules which should guide the regulatory body.

For the purposes of the record I want to read the very first paragraph of the speech from which the Chairman of the Commission quoted yesterday. I do not challenge the accuracy of the references or the quotations of the Chairman of the Commission, but I think a conclusion has been drawn as to what I had in mind which was not and is not justifiable.

This is a speech made on March 17, 1937—and I do not suppose there ever was a talk of mine so long remembered, before.

THE CHAIRMAN. We can all agree with you on that.

SENATOR WHITE. I said at the very start (reading):

"Mr. President, the pendency in the other body of the Congress of a resolution authorizing an investigation of various phases of the radio industry, and reports that the Senator from Montana (Mr. Wheeler), Chairman of the Interstate Commerce Committee of the Senate, contemplates the introduction of a resolution of similar purposes, prompts me to bring to the attention of the Senate some of the principles and policies embodied in existing law, summarizing the present facts which have relation to those declared policies and to voice my approval of a Congressional survey of law and facts, that we may more wisely consider what the public interest in this field of communications is, whether present law rightly declares this public interest and is calculated to serve it, and whether the Federal Communications Commission is respecting the law and, in its administration, is furthering its interest or is heedless of the Congressional purpose?"

I have read that because I think it clearly states in the very opening of the talk I made my major purpose, which was an effort to induce the Congress to undertake these studies and to reach its own conclusions.

I did not mean to suggest at all that the study by the Congress was to be exclusive of study by the Communications Commission, but I mean to say that it was then my thought, and it is now my thought, that major questions of policy should be the responsibility of the Congress to determine, and that the obligation of the regulatory body is only to make its studies and its recommendations to the Congress and to administer the law as the Congress has laid it down in accordance with the purpose of the Congress so far as that purpose can be ascertained.

And then, if I may go on for a moment, I made another speech in 1938, and in that speech I spoke of various problems. I want to quote two or three extracts from that speech, because I think they reinforce and make still clearer what my purpose was in that whole matter.

THE CHAIRMAN. We have all made speeches at times that we wish we had not made.

SENATOR WHITE. I still stand by this. I said (reading):

"Most of the problems which are confronting us today involve questions of policy and questions of principle, and I conceive it to be the duty of the legislative body to determine matters of fundamental policy and to lay down the principles which shall guide an administrative body in the performance of its legitimate functions.

"Mr. President, the Federal Communications Commission should neither have the right nor should it have placed upon it the burden of determining questions of governmental policy."

And then there was an interruption from the Senator from Montana; but I shall not quote what he said. I will pass that over in such silence as I can. Then I went on and said this:

"One of the questions which has been under agitation for a long while is the question of chain broadcasting. As early as 1927 Con..."
gess recognized that there might be special and peculiar problems arising from the development of chains throughout the United States, and it wrote into the original Act of 1927 authority in the press recognized that there might be special and peculiar problems of the problem.

Then I went on and mentioned the fact that in 1935 one of the Commissioners had moved in the Commission that the Commission undertake a study of this problem, and I mentioned the fact that although that motion had been made in 1935, up to this time—that is, May, 1938—nothing had been done, although it was understood that the Commission was about to undertake a study of the problem.

Then I went on and discussed chain broadcasting somewhat, the number of stations that were controlled by the chains, the power utilized by the chains, the hours upon which the chains had unlimited time, and so forth and so on. And then I said this:

"That, in a very brief way, is the story of the chains and of the stations associated therewith. I submit to the Senate that those facts present a problem not only to the Commission but to this body which, together with the House of Representatives, has a responsibility in the determination of the policies which shall obtain and the principles which shall be followed in the regulation of the broadcasting industry. I do not see how we, as responsible public officials, can turn our backs upon the questions presented by these facts and leave to an administrative body, a quasi-judicial body, the determination of matters of grave public policy."

Then I referred to the Senator from Montana; but I will pass him by and keep him in the background for the moment.

SENATOR HILL. That is impossible.

THE CHAIRMAN. A lot of people have tried to keep me in the background.

SENATOR WHITE. I understand that; and that is why I know better than to attempt it.

Then there was the question of the wattage which should be assigned to chains, and in what I said I had reference particularly to a suggestion that we were to have a governmental station of 500,000 watts, or something of that sort, that would be disseminating the views of the United States throughout the world.

MR. FLY. That is socialism, Senator.

SENATOR WHITE. Yes. I did not say I approved of it. I said:

"This is a question of public policy. It is not a judicial question; it is not an administrative problem to be dealt with solely by an administrative body, but is a question involving the public interest, on which the Congress of the United States ought to have opinions and ought to express them."

Then I went alone and said a lot of interesting things. I hope, and then I turned again to the question of monopoly. I said that the question of monopoly was involved, monopoly of the transmission of information to the American people, and that I happened to be one of those who did not want to see such a monopoly developed in the United States. I said, further:

"There are other questions. All of these are, in my opinion, of supreme importance to the American people. They are all problems involving principles and policies, and we in the Congress have no right to evade our responsibility. We ought to undertake a study of the problems. We ought to undertake to find an answer for them. We ought to lay down the general and the broad rules which shall guide and which shall control our creature, the administrative body."

I hope those quotations make clear my general thought about this whole subject matter, about the relative obligations of an administrative body or regulatory commission and of the Congress itself. I had felt, too, that in the very legislation proposed to guide us we had indicated clearly to the Communications Commission that in its annual reports to be made to Congress it should tell us of the results of its studies and should make its recommendations as to legislation.

Those things are all fundamental with me, and I just have the feeling—and it is one of the questions which trouble me most gravely about this whole problem—that there is a question whether you really should not have submitted to the Congress your findings of fact and your recommendations as to legislation, for I have the thought that what you are doing or attempting to do here is to lay down a principle or a basic public policy and as I said a while ago, I rather shrink from Commission-made law and from the determination of what I call basic policies by anybody other than the Congress of the United States.

I apologize for making this statement; but I did not interrupt you when you were making references to me yesterday morning, and I wanted to get this before both you and the other members of the Commission and anybody else who is interested.

THE CHAIRMAN. We all read your speech without your calling it to our attention.

SENATOR WHITE. But I do not think you profited sufficiently.

MR. FLY. May I have the liberty of amplifying Senator White’s views slightly?

THE CHAIRMAN. Proceed.

MR. FLY. God forbid such immodesty on my part as to claim to be the originator of the ancient struggle against monopoly. I certainly did not originate it. I do claim the credit of having some small part in the enforcement of the Sherman Act. But going even beyond the Sherman Act, back into days immemorial, so far as we are concerned, anti-monopoly has been the policy of the English-speaking peoples. We go back beyond the days of Adam Smith; we go back to the laws against engrossment and forestalling, and come down in the American commonwealth to the common law outlawing contracts and combinations in restraint of trade, and we come to July 2, 1890, and find that with the aggressive development in America of new industries and with the tendency to monopoly in a number of those, involving interstate commerce on a great scale, the ancient policy against monopoly demands Federal implementation. At that time Congress passed the Sherman Act, and since that time the Congress, ever cognizant of that same basic philosophy and the problems arising in new American industries, under that philosophy has supplemented that Act with such measures as the Clayton law and the Federal Trade Commission Act; and at no time has the Congress of the United States receded from that policy. Now, without further ado, the anti-trust philosophy, the rules against monopoly, become applicable to the broadcasting industry engaged in interstate commerce, and the Congress, being especially mindful of the problem of monopoly in the radio industry, took the extraordinary pains to write the policy against monopoly into the Radio Act of 1927 and into the Federal Communications Act of 1934.

I do not think that under those circumstances there can be any suggestion that this Commission has undertaken to fix that policy or to establish any rule of law other than that laid down as a clear mandate by this body.
Now, as to the implementation in matters of detailed and specific enforcement—and I think that is a much smaller question than the question as to whether or not we fixed the policy; that is, basically it is smaller, although in this situation I think it is an important question—there the Congress took special pains again to move into this particular field and to provide for special regulations applicable to stations engaged in chain broadcasting; and to further elaborate Senator White’s views, I again refer to the speech of March 17, 1937 (reading):

“Study of the facts with respect to ownership and control of stations brings the conviction that Congress must either recede from its position of hostility to monopoly or it must take steps to insure that its wishes be respected by the regulatory body.

“The provisions of the 1927 Act, which are also found in the 1934 Act, leave no possibility of doubt as to the will of Congress; they confer ample powers to make that will effective.

“The Congress at the time the 1927 Act was passed, while perhaps not fully appreciating the growth of the chain system, did recognize the possibilities of the situation and wrote into this early Act the authority to make special regulations applicable to radio stations engaged in chain broadcasting.”

The situation that the distinguished Senator was referring to there was the monopoly situation.

SENATOR WHITE. You say that with reference to 303 (i) I was referring especially to the monopoly situation?

MR. FLY. I was quoting from your speech, sir, and the reference, I take it, was to 303 (i), although I think that apart from 303 (i), with the general regulatory power and with the mandate against monopoly in the Act, then that the Commission would be obliged to use its licensing power in the public interest to forestall the establishment of monopoly.

I cannot conceive that we should continue to hold that the building up of a monopoly is in the public interest, when the Congress has taken the pains to say in this Act, “You must observe this basic law.” To say that it is in accordance with public opinion to continue to build up these monopolies I think is a fallacious contention.

SENATOR WHITE. Does anybody contend that? I do not think anyone contends that, and I do not think you ought to impute that thought to anyone.

MR. FLY. I am sorry, sir, if we are not in agreement upon that. I certainly did not intend to misrepresent your position. I did not intend to embarrass you in any way.

SENATOR WHITE. You could not embarrass me. I will take care of myself when it comes to the matter of embarrassment. But you have no right to suggest that in anything that I have ever said or that in any vote that I have ever cast with respect to monopoly in radio communications I have been an advocate of monopoly.

MR. FLY. I would not suggest that, sir.

SENATOR WHITE. You were getting pretty close to it.

MR. FLY. I think your advocacy has been all in the other direction.

THE CHAIRMAN. I did not understand Chairman Fly’s statement in that way.

MR. FLY. I am sorry if there is any misunderstanding on that point.

POWERS OF THE FCC

SENATOR WHITE. Of course what troubles me about the situation is that I see in these present regulations the very definite suggestion of an assertion of authority in the Commission to do pretty nearly whatever it wants to do if it says it is in the public interest. It is pretty hard to see, if we accept these regulations as being within the authority of the Commission, why the Commission could not assert almost anything as being in the public interest and then going ahead to do it.

MR. FLY. I would say this: If anything were written into a statute in such terms and into the philosophy of the whole system of laws, and into the matter of public interest, as is the policy against monopoly, we ought to be able to do any and everything within reasonable and proper bounds to prevent such a monopoly, and to that extent I do agree with you.

SENATOR WHITE. But of course you cannot turn to a line in the present law which authorizes the Federal Communications Commission to determine the acts which singly or in their totality are to be regarded as in restraint of competition or as monopolistic practices.

MR. FLY. Sir, I would say—

SENATOR WHITE (continuing). On the contrary the penalty for control of monopolistic practices is reposed in the courts, and under the Act as it now stands whatever authority you may have to declare a license forfeited because of monopoly, or to refuse to issue a license because of monopoly, must rest first upon the determination by a court that a licensee or an applicant has been guilty of monopolistic practices. Then you have same authority. But there was never in this Act, and there cannot be found language, nor was there the purpose to give to this Commission authority to say what constitutes a breach of the antitrust statutes. And that is pretty nearly what you have undertaken to do in these regulations. The question of whether a person or a corporation is guilty of violating the penal statutes of the United States was left to the determination of the courts; and after such determination then the Commission has authority to act.

MR. FLY. I, of course, would not urge that such a decision is not with the courts, but I would say that clearly under the statute it is not exclusively with the courts, and I do not think the Senator would urge that we should build up a monopoly if one would assume that we have the power to do it.

In order to avoid monopoly is it the Senator’s suggestion, for example, that while litigation is in progress—or I will put it this way: Suppose the Department of Justice procures an indictment, or suppose it brings an equity action alleging that there is a monopoly here, and that there is a growing tendency toward monopoly and to restraint of interstate commerce, and suppose we thoroughly agree with that. Then in the two or three years that cases are pending must the Commission go right ahead and be guilty of building up the very thing that other agencies of the Government are trying to do away with? And I ask: Is that in the public interest? I think the question answers itself I will say, because I know it is not my privilege to ask you, Senator White, questions.

SENATOR WHITE. I just said to the Chairman, and to my colleague on my left (Senator Tobey) that I had not up to this time gone into the phase of the question which most deeply interested me in connection with these regulations, and that is, the authority of the Commission to issue any such regulation. However, it does seem to me that basically you have undertaken in these regulations to describe acts which you believe are monopolistic, are monopolistic practices, and therefore against public policy.

Now, I do not believe it is within the authority of the Commission to declare that acts violate the antitrust statutes of the United States. It may be that the law should specify the things, should proscribe certain practices. But my complaint is that you did not make—and when I say “you” I do not refer to you personally but to the Commission—I ask: Is that in the public interest? I do not report its findings as to these exclusive contracts, as to the effects of these exclusive contracts, to the Congress; that the Commission did not make recommendations to the Congress for such changes in the law as it thought would be right and proper; that the Commission did not put upon the Congress the burden to determine that matter.

MR. FLY. Since we disagree upon that, Senator White, is not that the job of the courts?
ADVERTISING AGENCIES

THE CHAIRMAN. While on that question let me ask you this: What is there to the idea that has been abroad to the effect that if these stations did not have exclusive contracts, or optional time, then some advertising agency could come in and pick out just the stations they wanted and operate in that way, without taking the matter up or going through the chain broadcasters? Have you looked into that matter?

MR. FLY. I do not think that would be wholly feasible for two or three reasons: In the first place there are a number of these big basic stations that are owned by the networks; and then the agency would have to go into the full network business except for the ownership of stations. The agency would have to do the programming and have its own studios, either directly or indirectly, and do that entire job. Then it would have to arrange for its own wire facilities. And then, due to failure to get access to various key points, it has to be scattered, with stations long distances apart, even assuming that they do complete contracts for certain stations. So I cannot think that anything short of a pretty thoroughgoing network system is going to be feasible. I do not believe that advertisers can run in spasmodically and make a system of that kind.

COURT REVIEW

SENATOR WHITE. I assume that if you have power to make these regulations you have the power to modify them and change them or to wipe them out in their entirety.

MR. FLY. I do not so assume, sir, unless the modifications that we would make would be in accordance with the law, as these regulations are.

SENATOR WHITE. Do you want to start another debate?

MR. FLY. We can modify them, of course.

SENATOR WHITE. If you can make them, you can modify them or un-make them,

MR. FLY. I think, from the tone of your voice you suggest absolute discretion. But we are bound by the law and its very clear principles and we do not have that discretion that the tone of your voice suggests, sir.

SENATOR WHITE. All right. We will let that answer stand. But if your regulations are now in effect, unless you do modify them you cannot reissue the license of any station in the Red network or any station in the Blue network, can you?

MR. FLY. We can modify them in any case.

SENATOR WHITE. Of course you can modify them; but, I say, unless you do modify them, and if you stand on that regulation as it is now written you cannot reissue the license of one of the Red network stations or one of the Blue network stations until at least there is a divorcement.

MR. FLY. We must conform to these principles in the rules. I do not think it should be suggested that there would be any tendency not to give the ample time that is necessary. If there is an attempt in good faith to move this network out, with all of the success and the glory that it ought to have in going into this field and making an effective sale of it, if there is a good faith attempt to do that, you need not worry about the attitude of the Commission. And I want to make this point, because it is basic in this whole thing. If the attempt is to get these principles of the Commission held up and the processes of the administrative agency paralyzed while an effort then is made to tear down the basis of it, in effect, to wreck the decision through long delays, through extensive debates, the pendency of bills that never come out of the Senate or the House, and if in the meanwhile these gentlemen can enforce their will, their publicly announced will, by saying who shall sit and who shall not sit upon regulatory bodies, then I think you have something that challenges the very integrity of an orderly and democratic system of government.

SENATOR WHITE. If I get the real significance of what you have just said, if I or any other member of the Congress should introduce a bill which challenges the authority of these regulations, or if one of these chains or one of these affiliated stations appeals to the court, are you suggesting that there will be further penalties imposed upon them by the Commission?

MR. FLY. Oh, no, sir. Do not misunderstand me. I welcome their going to court. I think that is where these terribly legalistic questions ought to be decided; and no station is going to be injured by going to court. That is a course that I have advocated and will continue to advocate.

SENATOR WHITE. I thought there was rather a punitive suggestion in what you said, and I wanted to get that clear.

MR. FLY. No. I want to reiterate that, sir.

THE CHAIRMAN. I am afraid that you are both thinking of punitive action, and in this matter it seems to me we ought to look at it from a reasonable standpoint. Let us consider the Blue network. I do not feel that the Commission ought to say to them, "You have got to dispose of this in 90 days time."

MR. FLY. I do not, either.

THE CHAIRMAN. If in good faith they are making an effort and saying that they are going to dispose of it, I think they ought to be given six months time or such reasonable time as is necessary to dispose of it.

MR. FLY. I agree wholly, sir.

THE CHAIRMAN. And I do not think that they ought to be penalized if they go into court. I would be one of the first to criticise the Commission if I thought you or the Commission itself for one moment was going to penalize any of these people if they went into court. I think that is the wrong spirit with which the Government should act.

MR. FLY. And I would expect that criticism if we did, sir.

THE CHAIRMAN. On the other hand I know, as we all know, that in certain matters there has been an attempt, not in the radio industry, to my knowledge, but in some other matters, to go into court with litigation and tie it up, through injunctions, for a long period of time. I assumed that was what you had reference to.

MR. FLY. Yes.

SENATOR WHITE. Perhaps that was not a fair comment of mine, but your statement rubbed me a little the wrong way.

MR. FLY. I was referring to what these gentlemen are proposing, and that is a reorganization of the Commission, to be composed of men of whom they approve—stating who may and who may not go upon the Commission. It is an unfortunate fact for you, sir, that the forces that are taking that position are flying your flag. They are marching behind this particular bill which is designed to obstruct the decision of the Commission and to play for time during which the other results can be brought about. If great pressures and great schemes of propaganda can be used to such an end by the very industry that has this great public trust in its hands—and it has a tremendous public trust in its hands in the form of licenses and in the effect upon public opinion and, indeed, in the effect upon political opinion—then if they are successful in accomplishing those results, which I know you and I disagree with, then to that tragic extent democratic government is impaired.

SENATOR WHITE. You say that I disagree, and yet in the same breath you say I am flying their flag. I am flying mine. That is a wholly gratuitous and unnecessary reflection on me.

MR. FLY. I did not say that, Senator. I certainly apologize if I approached that suggestion. I say they are marching behind you, and I do not think it is your intention to lead them in that sort of a light.

500—June 6, 1941
SENATOR WHITE. Let me ask you another thing about this. Let us assume that the National Broadcasting Company wanted to dispose of the Blue network: is there anybody, outside of the other chains, to whom they could dispose of it in totality as a practical proposition?

MR. FLY. As a practical proposition, in choosing between purchasers? I know there is a ready market for the network, sir.

THE CHAIRMAN. Considering the amount of money that these networks have made, they ought not to have any trouble in selling.

The Smaller Stations

SENATOR JOHNSON of Colorado. How do you account for the fact that many of the stations do not want the liberty and freedom which you say they should have?

MR. FLY. Senator, I do not accept the premise that, in view of their close relations and the power which these networks exercise over the stations and over the means of assembling the stations and getting opinions, that we have ever had any independent expression of opinion from the stations themselves.

THE CHAIRMAN. The chains are in position to exert, if they want to—do I not know that they have, but they are certainly in position to—a tremendous economic pressure against any station against whom they want to exert it.

MR. FLY. I think that is utterly inescapable in this picture. I do not think there is any doubt that in any procedure those New York gentlemen dominate, you would get anything other than that sort of a general result; though I may say that the suggestions of unanimity, even amongst any particular groups, are just not true, because there are many dissents.

THE CHAIRMAN. There are two things that the stations are afraid of: they are afraid of the Commission and they are afraid of the industry.

MR. FLY. I found out in St. Louis that they were not afraid of me.

The following members of the committee attended the hearings:

Tuesday: Senators Wheeler (chairman), Smith, Bone, Schwartz, Hill, Stewart, Clark of Idaho, Tunnell, McFarland, White, Shipstead, Tobey, Gurney and Brooks.

Wednesday: Senators Wheeler (chairman), McFarland, White, Tobey, Gurney and Brooks.

National Defense

Constructive Suggestions Welcome

During the past two weeks many stations have written NAB to register opinions on matters centering in requests for free time by various agencies. The St. Louis convention authorized the appointment of a Radio National Defense Committee and these letters will be referred to that committee.

Prior to its first meeting, it is suggested that other broadcasters may care to make constructive suggestions. Address your letters to Arthur Stringer, at headquarters, and he will bring the file to the attention of the committee at first session.

Two Changes for the Better

Two constructive changes in handling Army and Navy recruiting announcements have already been made. In both branches local recruiting personnel has been directed to discontinue the solicitation of time. Henceforth it is planned to channel the distribution of live recruiting announcements through NAB to all stations.

Both services take the attitude that is shared by broadcasters that every effort should be made to produce maximum results with a minimum of time. This minimum time becomes extremely productive for the Army and Navy because there is almost 100 per cent cooperation by stations.

The Navy's Recruiting Campaign

The Navy's present recruiting campaign is limited to three suggested announcements per week. At the end of the current test period it will become evident whether the frequency should be reduced, maintained or increased. This can be done because broadcasters, themselves, have been good enough to specify whether they have been able to find time on their schedules for such announcements.

The Army's Recruiting Campaign

The Army's recruiting radio campaign also embraces three suggested announcements per week. These likewise are sent to all stations through NAB. There is also a weekly fifteen-minute program which has been on the air for many months. The availability of this program has been unknown by some broadcasters and this week, WTEL, Philadelphia, and WHLN, Harlan, Ky., requested it.

Radio Men in Service

WDB—TUSCOLA, ILL.
Larry Sanford, Battery D-123rd F. A., Camp Forrest, Tullahoma, Tenn.
J. Kent Saunders, 47th Infantry, Camp Bragg, N. C.
Robert B. Harrington, Scott Field, Belleville, Ill.—next July.

WMBD—PEORIA, ILL.
Lt. Frank C. Schroeder, Fort Knox, Ky.
WQXR—NEW YORK
William D. Strauss, Fort Jackson, S. C.
Herman Kuch, Fort Riley, Kans.

WIBN—UTICA, N. Y.
John Frederick Sullivan, V-6 RM3C, General Detail Receiving Ship.
Brooklyn, N. Y.

635 Stations Take Army Recruiting

Up to the middle of the week 631 stations had reported that they had found time for Army recruiting announcements. Since the list was compiled such news has come in from:

WORL—Boston
WLW—Cincinnati
WSAI—Cincinnati
WTOC—Savannah

Joseph Ries will coordinate defense programs for WLW, WSAI and the Crosley international station, WLWO.

BMI

Supreme Court Decision

Copy of letter to BMI Affiliated Publishing Companies:

Statements have been made that the recent decisions against ASCAP, rendered by the Supreme Court of the United States,
may affect BMI's ability to serve its associated affiliated publishing firms. This is not the case. The decisions will in no substantial way affect either the structure or activities of BMI, which has already taken steps to comply with the provisions of all State statutes applicable to it. The very premise upon which BMI was founded was that there should be an avoidance of all of the monopolistic features of ASCAP which have now been held to be illegal.

You may, therefore, be assured that BMI will continue to be able to make all of the music licensed by it available to all music users in all of the States of the United States.

Very truly yours,

Broadcast Music, Inc.

Hymn of Freedom

Ode To America, new BMI patriotic song by Jules Bledsoe, negro baritone, owes its inspiration to a trip to the nation's Capital. While looking down from the Washington Monument across to Lincoln Memorial, Mr. Bledsoe was stirred by the thought of what Washington and Lincoln had contributed to the freedom-loving spirit of the United States and the vitality of this spirit when it came in open conflict with the dominating philosophies of the totalitarian states.

"Conditions have not been ideal in the United States for the negro race," said Mr. Bledsoe, "but we have sound reasons to be thankful that we are Americans, as have the people of every other minority living in our country."

A line of the song, "Oh, thou land by God inspired," grew to a complete lyric by the time Mr. Bledsoe reached his home in California following his trip to Washington. He sang Ode To America on his recent concert tour where the audience was asked to join with him in this paen of triumphant praise to a freedom-loving country. He believes that as the war sentiment grows, the people of the United States will seek closer communion with religion and that much of the strength of our country will lie in genuine religious conviction.

BMI FEATURE TUNES
June 9 - June 16

1. I WENT OUT OF MY WAY
2. ALL ALONE AND LONELY
3. MY SISTER AND I
4. WALKIN' BY THE RIVER
5. WISE OLD OWL
6. FRIENDLY TAVERN POLKA
7. G'BYE NOW
8. WHAT D'YA HEAR FROM YOUR HEART
9. HERE'S MY HEART
10. WITH A TWIST OF THE WRIST
11. THE RELUCTANT DRAGON

In preparation: Wasn't It You?, by the writers of You Walk By.

With My Sister and I leading the Hit Parade as well as the list of best selling retail records, BMI entered the month of June well represented in the tunes that are "coming up," those that are "going strong," and in the surprises that await. Amapola continues its sensational run for the tenth week; the "now" songs, Oh, Look At Me Now and G'Bye Now, rank second and fifth respectively in the leading music machine records on Billboard's music popularity chart. Among those fighting for the first division are Maria Elena, Daddy, The Hut Sat Song, Do I Worry, Friendly Tavern Polka and Walkin' By the River. Just around the corner are I Went Out Of My Way and All Alone and Lonely. Awaiting introduction is Wasn't It You, a new torch tune by the writers of You Walk By, which has two of the best lyric lines that have been heard at BMI since Hy Zaret and Irving Weiser led with their hearts in There I Go. George Marlo, BMI's Professional Manager, has a theory that two good lines coupled with a good tune spell H-I-T in the popular song field. He believes that Wasn't It You says more in two lines than most popular songs say in an entire chorus.

BMI Decree Conformed to ASCAP's

Judge F. Ryan Duffy, of the Federal Court in Milwaukee, has signed an order eliminating the technical differences between the consent decrees signed by ASCAP and BMI. ASCAP's decree permitted freedom in contractual relations with licensees which was not permitted in the BMI decree. In the opinion of BMI counsel, this gave ASCAP a competitive advantage not contemplated by the Government in making the decrees. The modifications, which put BMI and ASCAP on a parity, have the approval of Thurman Arnold, Chief of the Anti-Trust Division of the Department of Justice, and Victor O. Waters, Special Government Counsel.

Exhibit

"The Evolution of My Sister And I," which was displayed at the NAB Convention in St. Louis, is now on exhibition at the High School of Music and Arts, Convent Avenue and 135th Street in New York City, and has been requested by other schools and colleges for its educational value. During the past week, the leading Kresge store in Detroit, devoted a window to My Sister And I. The center of interest was a rotating model of a little Dutch refugee boy and his sister.

Comic Strip Meets Love Song

For the first time a popular song has been written specifically for a comic continuity. The title of the song is How Long Has This Been Going On. The two hit song writers, Bobby Worth and Stanley Cowan (Do I Worry and Til Revetille), wrote the music and the lyrics are by Fred Fox. The title page of the song, published by Melody Lane and controlled by BMI, carries the subtitle, From a celebrated NEA comic strip, "Freckles and His Friends," by Merrill Glosser.

According to the story in the comic strip, the song, which Dick Jurgens will play on June 14th, has been "written" by Freckles and one of his friends. Its acceptance for performance by Jurgens and its introduction over the air from Catalina Island will be part of the story related in the continuity running in some 720 newspapers throughout the country.

Daddy

Sammy Kaye has the biggest hit of his career on his hands, and it's all the "fault" of a young University of Pennsylvania student.

Bob Troup is a senior at the University, and only 21. When he isn't studying he spends his time writing tunes. Recently he concocted a ditty he called Daddy. It had a certain bounce and some clever lyrics but Troup figured it was no better or worse than any of a half dozen others he had turned out.

Sammy Kaye was eating dinner at the Embassy Club in Philadelphia one night and heard a small four-piece band play the Troup tune. He inquired as to who wrote it, and three days later met Troup in person. Kaye, who operates Republic Music Corp., bought Daddy on the spot and published it. Soon the Kaye band was playing it. And in twenty-four hours the public was clamoring for it. Sammy's recording of Daddy sold 15,000 copies eight days after it was released.
Sales

Please direct this section to the attention of your sales manager.

NAB Sales Calls

Acting on the request of NAB Members, the Director of the Department of Broadcasting Advertising last week began a campaign to sell the J. C. Penny Co. and the W. T. Grant Co. on the use of local radio advertising. Facts learned are as follows:

J. C. Penny Co.—The Pedlar & Ryan agency has discontinued the transcribed serial story “Adopted Daughter,” but local Penny store managers can buy radio advertising if they want it. As a general policy the home office does not encourage radio because they claim it is more difficult to control than newspaper; that local managers can easily spend an excessive amount on radio advertising without an adequate day-to-day check; that home office approval depends to some extent on the particular market involved; the number of Penny stores in that area, the comparative rates of radio and newspaper advertising, etc. The agency is understood to be seeking an effective way of returning to radio on a wide scale. Meanwhile, local store managers can buy spot radio if they are sufficiently sold to insist upon it, and other managers are urged to exercise special care in developing and selling a wisely planned, economical and effective campaign, for the sake of long-range objectives. In time, by the accumulation of local successes, this company and many like it can be developed into important radio buyers.

W. T. Grant Co.—This company reports that each local store has its own advertising budget, charged entirely against that store, and that these budgets are so small as almost to preclude the possibility of consistent use of radio. Spot campaigns, chiefly announcements, have been tried by various stores but without general success. The company frequently buys programs to advertise the opening of new stores. Some local Grant managers are using spot radio, and others can do so if they are sufficiently sold to insist upon it, despite a general policy of discouragement by the home office, based on past experience. Here again the long-range objective can be attained only by careful selling and servicing on the part of local stations, so that an accumulation of successful experiences can be built up to counteract past carelessness and lack of success.

Per-Inquiry and Free Time

Harry M. Miller, Inc., of Columbus, O., is seeking cost-per-inquiry deals on behalf of a representative of the American Schools.

Metro-Goldwyn-Mayer Pictures, of Culver City, Cal., is seeking free time for a series of “Hollywood Radio Reporter” programs. Writes James L. Howe, manager of WBTM, Danville, Va., to NAB: “I believe if all of the radio stations in the country would stick together on this proposition, for once, we might con¬
grams. Writes James L. Howe, manager of WBTM, Danville, O., is seeking free time for a series of “Hollywood Radio Reporter” programs. Howe says that such programs are under the classification of commerical advertising and as such must be paid for at card rate.

We cannot agree with your premise that you are offering us the biggest names in the entertainment world and that because of that fact we should schedule the programs on sustaining time. In that event, few of the fine commercial programs on the air at the present time would be paid for as they are composed of the biggest names in the entertainment world also.

“We would like to call to your attention the fact that any¬thing that is worth asking for free is usually worth paying for. It has been our practice to cooperate with our local motion picture theatres and we have no objections in cooperating with you as a motion picture firm, but we feel that advertising cost must be paid for if we are to successfully operate a good radio station.”

“Radio Income Builders”, of Des Moines, la., previously listed in these columns, are seeking per-inquiry deals on behalf of Speed King Hot Water Heaters.

The Max Goldberg Advertising Agency, Denver, Colo., previously reported in these columns in an attempt to purchase radio time for the state of Colorado at local rates, in response to correspondence from NAB states: “Because this is the first national order we have ever placed, our over-anxiety to get as much as possible for the money allotted resulted in a letter which wasn’t worded exactly as it should have been. It certainly never occurred to us that the national radio rate was so much higher than the local rate, and it is our last thought in the world to do anything that would undermine established radio rates. Please accept this letter as a sincere apology, and completely disregard our last letter. From now on all our letters will be clear and with highest respect to established rates as well as the hours governing those rates. A letter to the member stations of NAB clearing up an uncom¬plimentary impression our letter brought about, would be most appreciated.” Mr. Goldman has been advised that NAB members are now being assured that they can work with him in the future in all confidence.

Effective Retail Selling

Because Bruff W. Olin, Jr., manager of WKHP, Poughkeepsie, N. Y., has had unusual success in selling radio advertising to retailers, he was asked by NAB to outline his sales technique, and his contribution is printed fully here for the benefit of all NAB sales executives:

I have held strictly to two basic beliefs in the selling of radio time: (1) Selling on the facts is much more permanently effective, and (2) Radio’s story of greater circulation per advertising dollar spent is really a potent sales weapon.

It has been my experience that many stations (in this whole dis¬cussion I refer to all local stations with which I am most familiar) sell the Jones Store because the Smith Store is on the air and getting good results. In the process of getting over such a sales story, the salesman inadvertently overstates Smith’s results and instills in the prospect the belief that radio’s power is so potent that his business is bound to grow beyond all reasonable expectations as soon as he goes on the air. Thus is many a 13-week sched¬ule doomed to a three-month death because the prospect is led to expect far more than any radio station can produce—far more than any medium can produce.

How much better to let your hair down and admit that only 25% of the total number of home radios are being listened to at the “peak” day-time period! But, when you do that, be armed with sufficient information about newspaper ad readership to use this information as a yard-stick by which your prospect can judge for himself whether a fair estimate of your station’s portion of the “available audience” is worth his investment.

Here is the procedure that I have found to be the most effective in selling radio. Here is the sales story, step by step:

1. Most advertisers will admit that no medium can do more than “deliver a message”; they’ll admit that advertising, therefore, is circulation—the greater the circulation, the greater the results therefrom. This is your premise.

2. Don’t even intimate that newspaper advertising is “no good”; to do so insults the intelligence of every prospect who has ever spent good money in newspapers, and most radio prospects have. Admit that it “pays out”. Then, show him, by using newspapers as a yard-stick, why radio should be even more effective.

3. Make full use of NAB’s “Radio Listening” studies. Re¬quest from NAB the breakdown of their listening studies into half-hour periods from 6:00 A.M. to Midnight. If possible, obtain a copy of ANPA’s studies showing newspaper ad readership. I believe that this idea is conveyed in the fact that a Gallup study of newspaper readership published in the February 14, 1940, issue of “Editor and Publisher” estimated the actual readership of a “better-than-average” half-page advertise¬ment to be only 10% of the newspaper’s total circulation.

Know your competing newspaper’s rates. You know, of course, your own.

4. Tear out one of the newspaper ads your prospect has run recently. Point out the probable “effective circulation” of that ad. (Note: I have found that many local newspaper advertisers have never consciously analyzed the effective circulation of their newspaper advertising; rather, they have hazy
thought of their ad's circulation as approximating the total circulation of the newspaper.) Estimate the cost of the ad.

5. Analyze the proposal for the radio time you are offering and the prospect in the light of known radio audience factors. Show him the NAB report of total actual audience at the time of day you propose he advertise on your station. Admit you haven't all the audience. Point out factors that would indicate a good audience for your station at that time. Then agree with him upon a fair estimate of your probable audience percentage. The chances are that the resulting "agreed fair estimate" will seem extremely small. But then, apply that percentage to the total number of radio homes in your station's primary area. (Here is the first factor that will boost your estimated circulation far above the newspaper's; because, the chances are that your station's primary includes far more radio homes than the total homes represented in the newspaper's circulation figure.)

6. Point out the cost of the proposal you suggest. Here is the factor that will lower your cost-per-listener-per-broadcast far below the newspaper's cost-per-reader-per-insertion; because, the chances are that the cost of a single half-page newspaper ad would be more than enough to buy a heavy series of announcements or a good program on your station. Compare the cost-per-listener-per-broadcast of your proposal with the cost-per-reader-per-insertion of the newspaper advertisement. My experience has been that these comparative costs will show the newspaper's figure to be several times greater than the figure for a well-thought-out radio advertising proposal of the difference is so great that your prospect can make all further allowances for possible errors in estimates. Also, all reasonable allowances for the oft-repeated claim that "impressions through the ear are less effective than through the eye" (don't argue about this point; it's endless), and he'll still have to admit the bare possibility that you've got something there.

This may seem like a complicated procedure. Actually, it is as simple as A-B-C if you have the information necessary, and I'm certain NAB can supply it. And, it's worth its weight in increased sales.

The practice of double-billing by some media (whereby service is rendered an advertiser at a local rate but he is billed at the national rate for collection on a cost-sharing basis from the manufacturer) is clearly unethical and dishonest. Any collusion on the part of media with local dealers or retailers is purely and simply a matter of defrauding the manufacturer or national advertiser. A recent instance was reported by an NAB member where his local newspaper competitor was engaging in this practice. NAB took the matter up with the American Newspaper Publishers Association, and received this reply:

"The ANPA does not have any control over its individual members as to what rates they should charge and how they shall make out bills. "It goes without saying that the ANPA does not countenance a statement or bill of any kind except that it represents the real facts of the true situation ..."

NAB also took this up with the Association of National Manufacturers, and received this reply:

"We have never had occasion to take any action with regard to the practice of double billing by advertising media. To the best of my knowledge such cases are relatively few and we have usually found that as soon as they are discovered by the advertiser he refuses to pay a higher rate. Certainly such practice is to be deplored and discouraged. "Therefore, anything which the media can do along this line would be of very constructive service in their own interests as well as that of their customers."

It is the opinion of NAB that radio stations encountering such unfair competition are entitled, in self-defense, to notify national advertisers using the competitive medium that a double-billing practice is being carried on.

Excessive Merchandising

Few radio stations will object to doing a reasonable merchandising job for a good client. It is the abuse of this service that causes most of the trouble, and NAB notes an alarming tendency on the part of some advertisers and agencies to over-reach themselves with excessive and exorbitant demands. So all NAB members may be fully informed, and may keep these tendencies in check, we reprint parts of a letter written by "Red" Cross, Commercial Manager of WMAZ, Macon, Ga., to George Duram of the Kastor Agency, Chicago:

"I am being deluged by your B. F. Green with requests that seem to me to be slightly beyond the pale of good business. . . . We are requested now to prepare banners and do a bill posting job on all personal appearances and we are told that many stations are providing their talent with sweaters emblazoned with some reference to Groves. To cap the climax, we are now asked to post Chill Tonic road signs and to do so without compensation to property owners or space owners. Please let me assure you we want to do everything possible within reason for any national client, but we cannot be expected to follow every mental aberration of some merchandising expert whose main job seems to be the procuring of as much free advertising as possible. "Please note that the client in this instance is now receiving free advertising weekly on the spots which are used to trail the Groves program, thereby eliminating one spot in our schedule that has a salable value. If you will check the entire setup of correspondence and our telephone conversations, the subject of Porter's Oil was never brought up until after the orders were issued covering the Chill Tonic show. No one knew that the show was carrying a tail end parasite. "I would sincerely suggest that if the client wants the whole-hearted cooperation of his talent, including boosting on all personal appearances, that you immediately make available an extra $30 weekly in talent money, retroactive. While we have facilities for the creation of drugstore displays and dealer calls, we are not in the bill posting business. This may sound like a hard letter, but the requests made by your promotion department exceed anything we have ever seen before. . . ."

It is not meant to single out this advertiser or agency, but merely to cite this as the latest example to come to our attention of the growing tendency towards exorbitant merchandising demands. Unless NAB members stand squarely together in enlightened discouragement of such excesses, they will surely grow worse, because no agency can be blamed for attempting to act as much service as possible for its client, and for attempting to outdo its competitors in this regard.

What the end result would be, of course, is obvious, and the only people who can put an effective brake on this snowball rolling downhill are the station operators themselves.

Deupree Talks Available

Through the cooperation of the ANPA, 100 copies are available of the talk given by Richard R. Deupree, president of the Procter & Gamble Co., on "Advertising Is Essential to the Proper Growth of the Nation and Its People," before the ANPA convention in New York, April 23.

As long as this supply lasts, they are available free upon request by NAB members.
AFRA, IBEW Oppose Tax

Both AFRA and the IBEW went to bat for the industry this week against the Connelly (D.-Mass.) special income tax on radio—instigated by the printing trades unions.

Said AFRA in a telegram to the House Ways and Means Committee:

"We see no justification whatever for imposing a discriminatory tax that affects radio employees only and which is class legislation not directed against any industry other than that in which we are working."

The IBEW, in a letter, called the proposed tax "unreasonable, discriminatory, arbitrary" and "pertaking of the character of class legislation," with its sole purpose to shift advertising from radio to the printed media.

Wage and Hour Act

The NAB frequently is asked whether a talent fee, when greater than required overtime payment, can be used to cover the overtime an announcer spends on the sponsored show for which he receives the talent fee.

For example:

An announcer works 40 hours for $40. He spends his 41st hour each week doing a sponsored show, for which he receives a $5 fee. Does the $5 cover the overtime?

The answer: No.

He is entitled to his $40, plus his $5 fee, plus overtime. His regular hourly rate is determined by dividing his gross earnings ($45) by his total hours (41), or $1.10. He works one hour overtime, and so he is entitled to half his regular hourly rate extra, or a total of $45.55.

The only alternative is not to give the announcer the $5 fee, but to pay him a total of $41.50 (40 hours at his regular rate plus $1.50 for an hour's overtime).

The NAB is of the opinion that neither announcers (save, possibly, chief announcers) nor technicians (save, possibly, chief engineers or supervisors) can be classified as "administrative employees" under the definitions issued by the Wage and Hour Administration. Announcers who meet the salary qualification ($200 or more a month) can usually be classified as professional employees. Ordinary technicians, usually, are subject to the hours provisions of the act, even though they make $200 or more a month. The facts must be known in each case to obtain a definite opinion.

Rennaker Heads ABTU

Russell Rennaker became business manager of the Associated Broadcast Technicians Unit of the I.B.E.W., effective June 1, succeeding D. J. Dunlop. Rennaker has been an organizer for the ABTU and has been an engineer at Stations WBBM, WJSV and WFBM.
EXCESS PROFITS TAX

Following an appearance by the NAB, the House Ways and Means Committee on Wednesday, June 4, in a preliminary vote rejected a Treasury Department request for a change in method for computing the excess profits tax that would have been adverse to the broadcasting industry. The Treasury Department request seeks a net revenue from defense profits of $85,000,000. In order to obtain this amount it was proposed that the optional method of average income during the base period, or normal income, be set aside in favor of the percentage of invested capital method for computing excess profits.

The House Committee is still committed to the request for $85,000,000 revenue from excess profits tax but has rejected the method proposed.

NAB testified at the committee's hearings on the subject. J. Robert Myers, Assistant Director of Research, appeared before the committee Wednesday, May 28th to oppose the proposed method change. Mr. Myers stated that NAB's appearance was in no way to be construed as opposition to the raising of revenue required for national defense since "when more revenue is needed, the radio industry along with every other branch of American business will gladly pay the necessary taxes." NAB did oppose the method change which in effect redefined the term—excess profits—to include far more than profits in excess of normal return during the base period, particularly as it applies to the broadcasting industry. The business of broadcasting embodies to a great extent personal service as well as invested capital, but fails to qualify as a personal service business under the excess profits tax law definition, and would be severely penalized if the average earnings method were withdrawn.

The House Ways and Means Committee is still considering the excess profits tax question and is reported to be studying various bracket changes in the present structure of the law which can increase the tax yield to the desired amount. There is every indication that the committee will evolve a revision which will materially increase the tax by raising the rates or lowering the exemptions.

NATIONAL DAYLIGHT TIME

The Office of Production Management is reported to be ready to recommend nation-wide observance of daylight saving time to conserve electric power needed for national defense production.

The OPM has been asked to report to Congress on a pending bill advocating adoption of daylight time throughout the country as a defense measure. It is reported that many of the OPM officials feel this move desirable.

NEBRASKA ASSOCIATION

Nebraska Broadcasters Association held its annual session in Norfolk on May 24 and elected the following officers and directors:

Vernon H. Smith, KOWH, Omaha, President
L. L. Hilliard, KGKY, Scottsbluff, Vice President
Art Thomas, WJAG, Norfolk, Secretary-Treasurer
W. L. LeBarron, KGNF, North Platte, Director
Don Seare, KOH, Omaha

The annual meeting also authorized a request to NAB that something constructive be done regarding the competition of various government agencies for free time.

FATHER BURK ILL

Father W. A. Burk, S.J., director of Station WEW, St. Louis, has returned to St. Mary's Hospital following a heart attack May 24. Father Burk was scheduled to return June 15 to Station WWL, New Orleans, but his return has now been postponed indefinitely.

FEDERAL COMMUNICATIONS COMMISSION

Newspaper Stations

The FCC announced June 2 that it would formally open its investigation with respect to the joint control of newspapers and radio stations, with public hearings beginning on June 25. It is felt that a substantial portion of the testimony can be taken at that time, but the Commission may schedule subsequent hearings to permit the development of more extensive studies.

This is pursuant to Commission Order No. 79 of March 20th which seeks to determine what policy or rules, if any, should be promulgated with respect to applications for high frequency (FM) broadcast stations and for the future acquisition of standard broadcast stations by newspapers without impairing existing investment.

At the time it promulgated its order, the Commission stated that its investigation does not imply that it is opposed to newspaper ownership of radio stations in general or in any particular situation. The purpose of the inquiry is to obtain for the Commission sufficient information to decide whether or not a general policy should be adopted, and if a general policy seems advisable, to shape such a policy for application in the future to particular cases involving newspaper interests.

This action was prompted by the large number of applications for FM facilities. The Commission deemed the inquiry advisable at this time, in the early development of FM broadcasting when FM is just starting and there is opportunity for evaluating the situation before there has been any considerable investment in the new service.

EDUCATIONAL FM

Applications by the Board of Education of the City of Chicago, the San Diego (Calif.) Unified School District and the University of Illinois to engage in non-commercial educational broadcast service is indicative of the value of FM in developing the live high frequency channels reserved by the Federal Communications Commission for non-profit educational use.

Common interest in making the most of the new opportunity to use these facilities is evinced in the following letter to Dr. John W. Studebaker, Commissioner of Education, from Edwin H. Armstrong, prominent in the practical utilization of FM, which was read at the recent Twelfth Institute for Education by Radio:

"I have been much gratified with the reports that are reaching me about the experiments with FM transmission conducted by the Cleveland Board of Education and I have been considering for some time what might be done to further encourage other, similar, projects.

"From time to time letters have come in from educational institutions requesting information about royalty rates under my Frequency Modulation patents in the event that these institutions should decide to erect stations and construct transmitters themselves. It has seemed to me that it might help the development of this new branch of radio if I should arrange to issue licenses, to those educational institutions which are interested in going ahead, at a nominal royalty of One Dollar. This is to advise you that I am willing to do that.

"I am writing this letter, therefore, in order that you may, if you see fit, make whatever announcement would be most effective in reaching those of your institutions that you feel could successfully carry on an educational program. This offer would, of course, apply only to stations whose purpose is educational and which do not obtain income from their broadcasting activities.

"Should there be any way in which I could assist the cause of educational broadcasting by the furnishing of technical advice or information, I hope that you will always feel free to call upon me for it."

Commissioner Studebaker hailed the offer as a spur to school systems and colleges interested in setting up an ultra-high frequency
educational radio station because it provides a sizable reduction in the cost of such a station.

"FM's value as a unit of the school system has been demonstrated by these pioneers", Commissioner Studebaker comments, "An FM station, useful to the classroom, also makes possible adult education. Educational FM channels adjoin the new commercial bands just being developed and, as FM receivers are introduced into homes, adults may tune in programs of educational radio stations."

An average school station can now be installed at the price of one classroom, according to officials of the Federal Radio Education Committee, of which the Commissioner is chairman, and requires in personnel only a radio engineer and a program director, both of whom may be drafted from the regular school staff.

"In a city", Commissioner Studebaker points out, "the potential educational value of this radio classroom is probably greater than that of any other room or shop in the school system—and the home radio class may be from ten to a hundred times as large."

"In rural areas, its comparative value is even greater. Radio can bring scattered one-room schools as close together as the classrooms of a city school building. The radio classroom in a rural area may be reasonably expected to serve all who live in the county.

When the Federal Communications Commission authorized regular FM broadcast service last year, five channels adjacent to the high frequency broadcast band were set aside for non-commercial educational use. These channels are 42,100; 42,300; 42,500; 42,700 and 42,900 kilocycles.

This rearrangement of the high frequencies to make commercial FM broadcast service possible has a distinct advantage in that the close proximity of the non-commercial educational bands and the new FM commercial bands makes it possible to adapt standard FM receivers to receive both types of broadcast. In other words, the FM receivers now being marketed are capable of receiving non-profit educational as well as the regularly sponsored programs.

Until that time only two educational bodies were making actual use of the high frequency bands long open to non-commercial educational service employing amplitude modulation. They were WNYE, the Board of Education of the City of New York, and WBOE, the Cleveland City Board of Education.

However, the University of Kentucky had received a construction permit for a system to bring educational program service to some 50 mountain schools, available to adults as well as students. The University of Kentucky, Station WBYK, now plans to substitute FM for the standard transmission.

Subsequently, the Board of Education of the San Francisco Unified School District was authorized to use radio for instructional, administrative, supervisory and other functions through the medium of 13 studios in schools in that area, all connected with the central broadcast station KALW, by leased wires.

More recently the Cleveland Board of Education, which serves the Cleveland City Board of Education, has received permission to change to FM.

Detailed regulations regarding non-commercial educational stations are contained in Sections 4.131 to 4.137, inclusive, of Part 4 of the Commission's Rules and Regulations. This pamphlet, which is obtainable from the Superintendent of Documents, Government Printing Office, Washington, at a cost of 10 cents, also includes standards of good engineering practice applicable to non-commercial educational broadcast stations.

The Commission in Section 4.131 defines a non-commercial educational broadcast station as a station licensed to an organized nonprofit educational agency for the advancement of its educational work and for the transmission of educational and entertainment programs to the general public. In Section 4.132 the Commission provides that a non-commercial educational broadcast station will be licensed only upon a showing that the station will be used for the advancement of the agency's educational program, particularly with regard to use of the educational system consisting of several units.

The Commission recognizes two phases of the service of educational broadcast stations: First, the transmissions to special schools for classroom work and, second, the transmission of adult educational and entertainment programs to the general public. The Commission requires each applicant for a new non-commercial educational broadcast station to make a complete showing as to the plans for programs of the station. For example, a municipal or common school system may use an educational station for classes transmitted simultaneously to the several units comprising the educational system. Where a prospective applicant is not itself engaged in the operation of several units of an educational system, a complete showing should be made of the cooperation with the several schools in the proposed service area which should include agreements or statements from the heads of such schools, for example, a university or college.

Development of education through radio is also being furnished by the Federal Radio Education Committee. Organized in 1935 under the Federal Communications Commission, this committee is a cooperative effort on the part of broadcasters and educators to advance the cause of education on the air. The committee has operated under private grants, chiefly from the National Advisory Council on Radio in Education, National Association of Broadcasters, Rockefeller Foundation, and General Education Board.

ILLEGAL BROADCASTER APPREHENDED

Incident to its national defense monitoring operations, the FCC uncovered, at Salida, Colorado, an unlicensed radio station which, using the unauthorized call letters "KIDA", was rendering transcription entertainment with the evident idea of soliciting commercial sponsors.

The operator, a mature man who described himself as O. W. Trueblood, was held in $1,000 bail in consequence. He was broadcasting on 890 kilocycles with 15 watts power.

The FCC announces that the work, business and functions of the Commission for the month of June have been assigned as follows:

Commissioner Walker: Designated to determine, order, report or otherwise act upon all applications of requests for special temporary standard broadcast authorizations.

Commissioner Thompson: Designated to hear and determine, order, certify, report or otherwise act upon: (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearings, including all motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission; and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission's Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission's Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

STATE LEGISLATION

CALIFORNIA:

A. 2645 (HAWKINS) COPYRIGHTS—Provides that any person may file with the Secretary of State a copy of any lecture, sermon, address, dramatic composition, story, radio script, radio program, or motion picture scenario, together with an affidavit of authorship, and thereby be entitled to all rights and benefits accruing therefrom. Referred to Committee on Judiciary General.

FEDERAL COMMUNICATIONS
COMMISSION DOCKET

No broadcast hearings or oral arguments are scheduled to be heard before the Commission during the week beginning Monday, June 9.

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

July 21

August 1

NEW—Symons Broadcasting Company, Ellensburg, Wash.—C. P., 1110 kc. (1110 kc., NARBA), 1 KW, unlimited time.

MISCELLANEOUS

KFDY—South Dakota State College, Brookings, S. D.—Granted special temporary authority to operate from 10 to 11:30 a. m., CST on June 9, 1941, in order to broadcast the inauguration of the President of South Dakota State College only (B4-S-645).

KFDY—South Dakota State College, Brookings, S. D.— Granted special temporary authority to remain silent on May 30, 1941, in order to observe Memorial Day.

KFQD—Anchorage Radio Club, Inc., Anchorage, Alaska.—Granted special temporary authority to operate on May 27, 1941, in order to broadcast the President’s speech only.

WALB—Herald Publishing Co., Albany, Ga.—Granted special temporary authority to operate unlimited time on 1520 kc., with power of 1 KW, employing a directional antenna at night for a period of 10 days.

WFNC—W. C. Ewing & Harry Layman, db/a Cumberland Broadcasting Co., Fayetteville, N. C.—Granted special temporary authority to operate additional time to broadcast President Roosevelt’s address (B2-MP-1303).

WSAZ—WSAZ, Inc., Huntington, W. Va.—Granted special temporary authority to operate additional time to broadcast the President’s speech on May 27, 1941, only.

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Denied request for special temporary authority to operate from 7:30 p. m. to the conclusion of broadcast in honor of the 20th Anniversary of the Founding of the Modesto Junior College, on May 28, 1941, only.

WXOY—General Electric Co., New Scotland, N. Y.— Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 13200 kc., 2500 watts, for period May 31 to June 29, 1941, conditionally.

KGBS—Harbanito Broadcasting Co., Harlingen, Texas.— Granted modification of construction permit (B3-P-2747) covering a new station for installation of new transmitter, changes in antenna system and extension of commencement date to 60 days after grant and completion date to 180 days thereafter (B3-MP-1305).

WBEX—WBEX, Inc., Buffalo, N. Y.—Granted modification of construction permit (B1-P-2757) for increase in power to 5 KW, installation of directional antenna for night use; move transmitter, installation of new transmitter, change frequency to 2530 kc., under NARBA, to extend completion date to September 1, 1941 (B1-MP-1302).

WCRC—R. G. LeTourneau, Toccoa, Ga.—Granted license to cover construction permit (B3-P-2767) for new station to operate on 1450 kc., 250 watts, unlimited time (B3-L-1408). Also granted authority to determine operating power by direct measurement of antenna input (B3-Z-897).

WAIM—Wilton E. Anderson, S. C.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-914).
WJAX—City of Jacksonville, Jacksonville, Fla.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-631).

KFAB—KFAB Broadcasting Co., Lincoln, Neb.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-904).

WOCO—Mississippi Broadcasting Co., Inc., Meridian, Miss.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-923).

KRSC—Radio Sales Co., Seattle, Wash.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-921).

KVG—Helen Townsley, Great Bend, Kans.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-907).

KOVC—KOVC, Inc., Valley City, N. D.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-885).

WGKV—Kanawha Valley Broadcasting Co., Charleston, W. Va.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-907).

KOV—KOV, Inc., Valley City, N. D.—Granted authority to determine operating power by direct measurement of antenna input.

KATE—Albert Lea—Austin Broadcasting Co., Inc., Albert Lea, Minn.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-879).

WBOC—The Peninsula Broadcasting Co., Salisbury, Md.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-894).

WJHO—Opelika-Auburn Broadcasting Co., Opelika, Ala.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-863).

WBK—Louis P. Thornton, Baker, Ore.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-902).

KIJK—Eagle Broadcasting Co., Inc., area of Brownsville, Tex.—Granted further extension of relay broadcast station license upon a temporary basis for the period ending July 1, 1941, pending determination upon application for renewal of license (B3-ZRY-10).

WAQL—WICA, Inc., Ashatabula, Ohio.— Granted authority to determine operating power by direct measurement of antenna input (B2-Z-879).

KDH—Telegraph-Herald, Dubuque, Iowa.—Granted license to cover construction permit (B4-P-960) for new station to operate on 1570 kc., 1 KW power, unlimited time, using directional antenna at night (B4-L-1410). Also granted authority to determine operating power by direct measurement of antenna input (B4-Z-902).

KIJO—Eagle Broadcasting Co., Inc., area of Brownsville, Tex.—Granted further extension of relay broadcast station license upon a temporary basis for the period ending July 1, 1941, pending determination upon application for renewal of license (B3-ZRY-10).

May Broadcasting Co., Portable-Mobile (Shenandoah, Ia.)—Granted construction permit for new relay broadcast station to be used with standard broadcast station KMA; frequencies 1616, 2060, 2150, 2790 kc., 25 watts (B4-PRY-243), 100 watts power (B3-LRY-225).

The Tribune Co., Portable-Mobile (area of Tampa, Fla.).—Granted construction permit for new relay broadcast station to be used with applicant’s standard station WFLA; frequencies 1616, 2060, 2150, 2790 kc., 40 watts power (B3-PRY-240).

The Tribune Co., Portable-Mobile (area of Tampa, Fla.).—Granted construction permit for new relay broadcast station to be used with applicant’s standard station WFLA; frequencies 1616, 2060, 2150, 2790 kc., 40 watts power (B3-PRY-240).

Merced Broadcasting Co., Portable-Mobile (area of Merced, Cal.).—Granted construction permit for new relay broadcast station to be used with applicant’s standard station KYOS; frequencies 1616, 2060, 2150, 2790 kc., 15 watts power (B5-PRY-245).

WALH—Circle of標準 Publishing Co., Portable-Mobile (area of Winston-Salem, N. C.).—Granted license to cover construction permit (B3-PRY-233) for new relay station to be used with applicant’s standard broadcast station WSJS; frequencies 1616, 2060, 2150, 2790 kc., 100 watts power (B3-LRY-225).
APPLICATIONS FILED AT FCC

550 Kilocycles

WKRC—The Cincinnati Times-Star Co., Cincinnati, Ohio.—Authority to determine operating power by direct method.

570 Kilocycles

KUTA—Jack Powers, David G. Smith, Frank C. Carman and Grant R. Wrathall, d/b as Utah Broadcasting Co., Salt Lake City, Utah.—Authority to determine operating power by direct method.

580 Kilocycles

610 Kilocycles

WAYS—Inter-City Advertising Co., Charlotte, N. C.—Modification of construction permit (B3-P-2878) for a new station, requesting approval of directional antenna for day and nighttime use.

WMUR—The Radio Voice of New Hampshire, Inc., Manchester, N. H.—Modification of construction permit (B1-P-2897) as modified for a new broadcast station, requesting extension of completion date to July 1, 1941.

650 Kilocycles

WSM—The National Life and Accident Insurance Co., Nashville, Tenn.—Authority to determine operating power by direct method for auxiliary transmitter.

670 Kilocycles

WMAQ—National Broadcasting Co., Inc., Chicago, Ill.—Authority to determine operating power by direct method.

680 Kilocycles

WISR—David Rosenblum, tr. as Butler Broadcasting Co., Butler, Pa.—Modification of construction permit (B2-P-3046) for a new station, approval of antenna and approval of studio and transmitter sites.

710 Kilocycles

770 Kilocycles

810 Kilocycles

KGO—National Broadcasting Co., Inc., San Francisco, Calif.—Authority to determine operating power by direct method.

860 Kilocycles

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Authority to determine operating power by direct method.

910 Kilocycles

KPOF—Pillar of Fire (a corporation), Denver, Colo.—Authority to determine operating power by direct method.

920 Kilocycles

NEW—Trent Broadcast Corp., Trenton, N. J.—Construction permit for a new broadcast station to be operated on 1230 kc., 1 kw night, unlimited hours, Class II-B, directional antenna day and night. Amended: to request 920 kc., changes in equipment and directional antenna.

950 Kilocycles

KOMO—Fisher’s Blend Station, Inc., Seattle, Wash.—Modification of construction permit (B5-P-2848) as modified, for installation of directional antenna for night use, and increase power, requesting extension of completion date from 6-22-41 to 8-1-41.

1020 Kilocycles

KFDV—Standard Broadcasting Co., Los Angeles, Calif.—Authority to determine operating power by direct method.

1030 Kilocycles

WBZA—Westinghouse Radio Stations, Inc., Boston, Mass.—Authority to determine operating power by direct method.

1100 Kilocycles

WTAM—National Broadcasting Co., Inc., Cleveland, Ohio.—Authority to determine operating power by direct method.

1110 Kilocycles

WMBI—The Moody Bible Institute of Chicago, Chicago, Ill.—Authority to determine operating power by direct method.

1170 Kilocycles

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Authority to determine operating power by direct method.

1190 Kilocycles

WOWO—Westinghouse Radio Stations, Inc., Ft. Wayne, Ind.—Authority to determine operating power by direct method.

WMXN—WMXN Broadcasting Co., St. Paul, Minn.—Authority to determine operating power by direct method.

WJBC—Arthur Malcolm McGregor, Dorothy Charlotte McGregor and Hugh L. Gately, d/b as Radio Station WJBC, Bloomington, Ill.—Authority to determine operating power by direct method.

KVSX—F. B. Clements and Co., a co-partnership, composed of F. Braden Clements, Clara D. Clements and C. C. Clements, d/b as Southern Minnesota Supply Co., Mankato, Minn.—Authority to determine operating power by direct method.

WCOL—WCOL, Inc., Columbus, Ohio.—Authority to determine operating power by direct method.

WGDE—Charles L. Jaren, Fergus Falls, Minn.—Authority to determine operating power by direct method.

NEW—R. M. Wallace and G. E. Schnibben, d/b as Norfolk County Broadcasting Co., Norfolk, Va.—Construction permit for a new broadcast station to be operated on 1190 kc., 250 watts, unlimited hours (contingent on WBOC going to 1230 kc.).

KGFJ—Ben S. McClashan, Los Angeles, Calif.—Authority to determine operating power by direct method.

WBBZ—Adelaid Lillian Carrell, Exe. of Estate of Charles Lewis Carrell, Deceased, Ponca City, Okla.—Authority to determine operating power by direct method.

WLOG—Clarence H. Frey and Robert O. Greer, Logan, W. Va.—License to cover construction permit (B2-P-3109) for changes in equipment and increase in power on 1250 kc. (Section 10c).

WHVC—The Ohio Broadcasting Co., Canton, Ohio.—Authority to determine operating power by direct method.

KVOS—KVOS, Inc., Bellingham, Wash.—Authority to determine operating power by direct method.

1240 Kilocycles

KDFI—KDFI Broadcasters, Inc., Klamath Falls, Ore.—Authority to determine operating power by direct method.

WCVO—Capital Broadcasting Co., Inc., Montgomery, Ala.—License to cover construction permit (B3-P-2802) to make changes in equipment and increase in power.

WIBU—Wm. C. Forrest, Payette, Wis.—Authority to determine operating power by direct method.

1270 Kilocycles

WHBF—Rock Island Broadcasting Co., Rock Island, Ill.—License to cover construction permit (B4-P-2568) as modified to change type of transmitter, make changes in directional antenna.

WHBF—Rock Island Broadcasting Co., Rock Island, Ill.—Authority to determine operating power by direct method.

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho.—Authority to determine operating power by direct method.

1280 Kilocycles

WMRO—Martin R. O'Brien, Aurora, Ill.—Authority to determine operating power by direct method.

1290 Kilocycles

KUOA—KUOA, Inc., Siloam Springs, Ark.—Authority to determine operating power by direct method.

1310 Kilocycles

KFBF—Buttrey Broadcast, Inc., Great Falls, Mont.—Modification of construction permit (B5-P-2920) as modified, for increase in power and installation of directional antenna for nighttime, requesting extension of completion date from 6-30-41 to 7-31-41.

1330 Kilocycles

1340 Kilocycles

WSOV—Commodore Broadcasting, Inc., Decatur, Ill.—Construction permit to change frequency from 1340 to 1320 kc. under NARBA, power from 250 watts to 1 KW night, 5 KW day, using directional antenna not makes equipment change and move transmitter. Amended; to request change in frequency to 1560 kc., power to 10 KW day and night. Change type of transmitter, changes in directional antenna for nighttime and change requested location of transmitter.

1360 Kilocycles

KGB—Don Lee Broadcasting System, San Diego, Calif.—Construction permit to increase power from 1 to 5 KW, install new transmitter and new antenna and move transmitter and studio.

1400 Kilocycles

WWSY—Board of Education, City of Buffalo, Buffalo, N. Y.—Authority to determine operating power by direct method.

WCOE—Carolina Advertising Corp., Columbia, S. C.—Authority to determine operating power by direct method.

1440 Kilocycles

WROK—Rockford Broadcasters, Inc., Rockford, Ill.—Authority to determine operating power by direct method.

1450 Kilocycles

WGL—Westinghouse Radio Stations, Inc., Ft. Wayne, Ind.—Authority to determine operating power by direct method.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Authority to determine operating power by direct method.

KEUB—Eastern Utah Broadcasting Co., Price, Utah.—Authority to determine operating power by direct method.

WNB—Harold Thomas, Bridgeport, Conn.—Modification of construction permit (B1-P-241Q) as modified, for a new broadcast station, requesting extension of completion date from 6-30-41 to 9-30-41.

1460 Kilocycles

KGNF—Great Plains Broadcasting Co. (a Corporation), North Platte, Nebr.—Authority to determine operating power by direct method.

1490 Kilocycles

WBTA—Batavia Broadcasting Corp., Batavia, N. Y.—Authority to determine operating power by direct method.

WRDW—Augusta Broadcasting Co., Augusta, Ga.—Authority to determine operating power by direct method.

1590 Kilocycles

WAKR—Summit Radio Corp., Akron, Ohio.—Authority to determine operating power by direct method.

WALB—Herald Publishing Co., Albany, Ga.—Authority to determine operating power by direct method.

1600 Kilocycles

KPMC—Pioneer Mercantile Co., Bakersfield, Calif.—Authority to determine operating power by direct method.

FM APPLICATIONS

NEW—Tribune Building Co., Oakland, Calif.—Construction permit for a new high frequency broadcast station to be operated on 146500 kc.; coverage, 1216 square miles; population, 1,350,000.

NEW—Columbia Broadcasting System, Inc., St. Louis, Mo.—Modification of construction permit (B1-P-12) for a new high frequency broadcast station, requesting approval of transmitter and antenna system and change population from 4,893,439 to 1,036,400. Amended: To make changes in transmitter and antenna system and population to 936,448.

June 6, 1941 — 511
The complaint further charges that the advertisements disseminated by the respondents constitute false advertisements in that they fail to reveal that use of the preparation under such conditions may result in gastro-intestinal disturbances or other serious injury. (4510)

**Complaints**

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

**Concord Distributing Company, Inc.**—A complaint has been issued charging Concord Distributing Co., Inc., 603 6th Ave., New York, with the use of lottery methods in the sale of cameras, souvenirs, thermometers, clocks and other merchandise.

According to the complaint, the respondents, in selling such articles, furnish various devices and plans of merchandising which involve the operation of a lottery scheme or game of chance by advertisements or under customary or usual conditions.

**Kay's Cut Rate**—A complaint has been issued against David L. Silver and O.C. Colwes, trading as Kay's Cut Rate and as Kay's Cut Rate Drugs, Beekley, W.Va., alleging misrepresentation in the sale of a medicinal preparation.

The preparation charges the respondents with disseminating advertisements in which they represent, directly or by implication, that their preparation designated as "Madame Bea's Capsules" constitutes a competent and effective treatment for delayed menstruation, and is safe and harmless in that it contains certain drugs in quantities sufficient to cause serious and irreparable injury to health, if the preparation is used under the conditions prescribed in the advertisements or under customary or usual conditions.

The complaint further charges that the advertisements disseminated by the respondents constitute false advertisements in that they fail to reveal that use of the preparation under such conditions may result in gastro-intestinal disturbances or other serious injury. (4510)

**Seamless Rubber Co.,** New Haven, Conn., in a complaint is charged with misrepresentation in the sale of electrical heating pads intended for use in treating diseases.

The complaint alleges that advertisements disseminated by the respondents in various States represented, directly or through inference, that its heating pads are capable of generating and maintaining the desired temperature and that the temperature may be controlled and the desired uniform heat obtained by simply setting the switches at points marked "L", "M", or "H".

According to the complaint, the respondents' heating pads do not maintain a temperature at the desired level and the temperature cannot be controlled, except by alternately attaching and detaching the connecting electric current cords. The complaint alleges that the pads, if connected to the current and turned on, eventually attain their maximum level of temperature and are thermostatically controlled at that level regardless of the positions at which the switches may be set. The sole function of the switches, according to the complaint, is to regulate the input or wattage of electric current used by the pads and thus to some extent control the speed with which the maximum temperature will be attained. (4509)

**CEASE AND DESIST ORDERS**

Following cease and desist orders have been issued by the Commission:

Edwin Cigar Co., Inc., 100 East 16th St., and House of Westminster, Ltd., 191 Fourth Ave., New York, and four individuals have been ordered to cease and desist from misrepresentations in the sale of cigars, smoking tobacco, pipes, tobacco pouches, razor blades, shaving cream, and novelties.

The respondent individuals are Leonard R. Edwin and Jules M. Cole, officers and directors of the two corporations; Max Rosenblum, formerly both an officer of Edwin Cigar Co., Inc., and a director of House of Westminster, Ltd., and Sadie Rosenblum (Mrs. Max Rosenblum), formerly an officer and director of Edwin Cigar Co., Inc., and a stockholder in the Westminster corporation.

The Commission order directs the respondents to cease using the name "House of Westminster, Ltd.," as a corporate, trade or other name, or employing any other distinctively British name to describe a business which is not a British concern or branch, or agent of or affiliated with a British concern. In connection with any such business, the order further prohibits the use on letterheads or otherwise of pictorial representations implying the British Royal Arms, or a Gothic cathedral or abbey, or similar representations.

The respondents further are ordered to cease employing the names "Park Royal", "The Duke of Windsor", or other distinctively British names to refer to pipes not imported from England, and the name "Belvedere London Plug Cut British Pipe Mixture" and other distinctively British names, separately or in conjunction with pictorial representations implying British origin, to refer to smoking tobaccos not imported from England.

The Commission order also bars the respondents from using the fictitious name "Westminster Steel Co." or otherwise representing that they manufacture the razor blades they sell.

The respondents also are ordered to discontinue representing that small-sized or defective cigars are full-sized, full-bodied and fine-flavored, and to cease using the term "Havana" or other terms indicative of tobacco grown in Cuba, alone or in combination with other terms, to designate cigars not made entirely of tobacco grown there. The order makes the exception that cigars containing a substantial amount of tobacco grown in Cuba may be referred to as "blended with Havana", or by any similar term, provided that the words "blended with" or other qualifying words are set out in immediate conjunction with the words "Havana" or other term indicative of tobacco grown in Cuba, and in equally conspicuous type.

Certain misrepresentations of price and the nature, size or extent of the respondents' business also are prohibited under the order.

The Commission dismissed its complaint in this proceeding as to Fredi Mannara and John Schwab, former employees of Edwin
Cigar Co., Inc., and associates in the Cigar Makers' Federation, and Ruth Hess, Charles Grothe, and Park G. Shaw, former associates in that federation. (4085)

Fong Poy—Fong Poy, also known as Fong Wan, a distributor of Chinese herbs, 576 10th St., Oakland, Calif., and his co-partners, Fong Kwongii, Yee Nun Yet, Chan Woon Sheung, and Lee Bing Lim, individually and trading as Fong Wan, has been ordered to cease and desist from misrepresentation in the sale of their herbs.

Commenting on findings made, the respondents have advertised Fong Poy as being qualified to diagnose diseases, and their herbs, when administered in the form of tea, as constituting cures or remedies for, or as possessing therapeutic value in the treatment of cancer, tuberculosis, ulcers and numerous other diseases and disorders.

Fong Poy, according to Commission findings, is not a physician and has had no formal medical or scientific training. The contention that he is qualified to diagnose human ailments and prescribe for them is based entirely on his claim that he has made a study of ancient Chinese writings upon the subject of herbs.

According to further findings, Fong Poy's methods of diagnosis are based upon doctrines which are of historical interest only, and which have had no acceptability in the scientific sense for several centuries. One such doctrine involves analogy between color of plant preparations and color of organs of the body or color of symptoms that may occur in the body.

In his purported diagnosis, the findings continue, Fong Poy places particular emphasis on the nature and sound of the patient's voice. His theory, as stated in the respondents' publication "Herb Lore," is that: "Many sufferers make a low moaning sound. This is the name of the Yil and signifies kidney trouble. A loud, cranky, quick-tempered voice indicates an ailment of the heart. A crying, choking voice signifies trouble in the lungs, while a sighing sound directs one to the spleen, intestines, etc. * * *" For persons writing to the respondents Fong Poy has selected herbs on the basis of information contained in the letters.

The evidence shows and the Commission finds that it is impossible correctly to diagnose human ailments or disorders through the method employed by the respondents.

The Commission order directs the respondents to cease disseminating advertisements which represent, directly or by inference, that their herbs constitute cures or remedies for, or possess therapeutic value in the treatment of, cancer, tuberculosis, diabetes, Bright's disease, influenza, prostate gland disorders, paralysis, varicose veins, hardening of the arteries, cross-eyes, obesity, gallstones, stomach ulcers, or pyorrhea; that the herbs are cures or remedies for heart, kidney, bladder, liver and stomach troubles, blood disorders, high or low blood pressure, or bronchial disorders; that the respondent's herbs will build up the body, purify the blood, renew strength, and wash away diseases from the body, or that Fong Poy or any of the respondents have the ability to diagnose diseases or prescribe remedies.

The respondents further are ordered to cease representing that their herbs have therapeutic value in the treatment of (1) arthritis or rheumatism, beyond affording temporary relief from symptoms of pain; (2) asthma, in excess of temporary relief from paroxysms of asthma; (3) colds, in excess of temporary relief from symptoms of congestion of the mucous membrane; and (4) goiter, in excess of supplying iodine in cases where there is iodine deficiency, and that the herbs are cures or remedies for any of these ailments. (3964)

Sheer Mold Company—LaVel Co., trading as Sheer Mold Co., 1019 North Las Palmas Ave., Hollywood, Calif., distributor of a garment designated "Sheer Mold Reducing Girdle," and the General Advertising Agency, Inc., 1265 North Vermont Ave., Los Angeles, have entered into stipulations to cease disseminating certain advertisements which contain a deceptive representation in the sale of this garment.

Under their respective stipulations, the respondents agree to cease employing in advertising the word "Reducing" as part of the trade name of the product, and to cease using the word "Reducing" or similar words as descriptive of the product or of the accomplishments which purportedly result from its use, so as to imply that the wearing of this garment will cause a reduction of local or bodily tissue or will effectively remove fat and thus overcome or lessen a condition of fatness or weight.

The stipulation of the LaVel Co. recites that while the wearing of this garment may change physical appearance by compressing that portion of the body upon which it is placed, it will not effectively remove fat. (3116-3117)

Victor Silk Hosiery Corporation of Maryland, Hagerstown, Md., entered into a stipulation to cease certain representations in the sale of women's hosiery.

The respondent corporation agrees to cease using the word "Silk" as part of its corporate or trade name, and such word or any other word or coined words connoting silk in or on advertising, trade literature, labels, invoices, or otherwise, in describing stockings or merchandise not composed wholly of silk.

The stipulation provides that (1) if the products are composed partly of silk and partly of some other fiber material, the word "Silk," or similar words, if used to refer to the silk content, shall be accompanied by other words in equally conspicuous type to indicate clearly that the products are not made wholly of silk; and (2) if the fiber other than silk constitutes the major portion of the product, the name of the predominating material shall precede the word "Silk," as, for example, "Rayon and Silk".

The respondent further agrees to cease advertising, branding, labeling, invoicing or selling hosiery or other products composed wholly or partly of rayon without clearly disclosing (1) the rayon content by use of the word "Rayon" and (2) each constituent fiber of products composed of both rayon and other materials in the order of each fiber's predominance by weight, and in immediate connection with the word "Rayon".

Under its stipulation, the respondent corporation further agrees to cease advertising, branding by transfer or otherwise labeling, invoicing or selling hosiery marked "42 gauge" when in fact it is not "42 gauge". (3120)

Westinghouse Electric & Manufacturing Co., Pittsburgh, has entered into a stipulation to cease certain representations in the sale of electrical heating pads. The respondent stipulated that in the sale of such pads not equipped with price discrimination in the sale of electrical heating pads. The respondent stipulated that in the sale of such pads not equipped with adequate thermostatic or other controls which will cause the temperature of the heating pads not to exceed 215° F., or which the heat control units are calibrated. (3119)

Wohl Shoe Co., St. Louis, and Stern Brothers, a New York department store, entered into stipulations to cease certain representations in the sale of shoes.

Under their respective stipulations, Wohl Shoe Co. agrees to cease using the word "Alligator," alone or in connection with the word "Calh," or other similar words, and Stern Brothers agrees to cease using the word "Alligator" or other similar words, to describe such of their products as are not made from alligator hide, provided that the word "Alligator" may be used to describe the finish of shoes which are made from materials other than alligator leather and are finished or embossed to resemble it, when this word is immediately accompanied by other words clearly indicating that the designation refers only to the pattern embossed on such materials. (3121-3122)

FTC CASES DISMISSED

The Federal Trade Commission dismissed complaints which charged 11 tile concerns with price discrimination in the sale of their products in violation of the Robinson-Patman Act.

June 6, 1941 — 513

The Commission orders note the record does not establish that the 9 concerns named had discriminated in price between purchasers competitively engaged, as had been alleged. Complaints also were dismissed in the cases of Trent Tile Co., Inc., Trenton, N.J. (3547), and Architectural Tiling Co., Inc., Keyport, N.J. (3552), the Commission order in the Trent case noting that concern had been adjudicated a bankrupt and dissolved.

FCC HITS INDIVIDUAL STATIONS TO REACH NETWORKS

Chairman Fly, of the Federal Communications Commission, indicated today under questioning before the Senate Interstate Commerce Committee, that the Commission does not have the power directly to regulate network broadcasting but attempts to do so indirectly by "placing a duty upon the stations."

One of the contentions of the broadcasting industry regarding the Commission's new rules is that the Commission is using these new rules to reach the networks by threatening the licenses of individual stations.

Chairman Fly was asked by Senator Johnson, of Colorado: "You do not deal with the chains directly?"

"Not directly, no sir," responded Mr. Fly. "I think there are strong arguments why the networks ought to be brought within the scope of the Communications Act."

"I do not mean to say that I think it is correct to have them excluded from regulations, in view of their great importance to the public and the great impact of network broadcasting upon the entire public of the United States. I do not believe there can be any doubt that there ought to be very explicit means of regulating these networks in the public interest. That is quite apart from the construction of the Act at the moment."

Deals With Networks Through Stations

Senator Johnson asked: "How do you control the chains—by licenses or permits?"

"By these regulations here, sir," replied Mr. Fly, "we govern all licenses of all stations, and there are particular provisions relating to stations engaged in chain broadcasting. You will note that these regulations control the station's relations to the network by means of placing a duty upon the station."

In another interchange of questions and answers, Chairman Fly first declared that under the new regulations the Commission already has the power to force the networks to carry certain programs, and then amended his answer to say the Commission cannot force any station to carry "a particular program," a contradiction which left his listeners confused as to just how the Commission interprets the new rules and how it intends to apply them.

Senator Smith, of South Carolina, had asked Chairman Fly why the Commission has not the power to force all networks to carry "important things."

"I think we have the power," declared Mr. Fly, "by applying these regulations," but he added that the Commission cannot require a station to "carry a particular program."

Effect on Small Stations

Senator Wheeler again indicated that he feared the new rules might transfer a great deal of business from the smaller to the larger stations.

Senator Wheeler: "I was going to say that some of these small stations have been worried for fear all the good programs would just go to the big stations, and that under your rules they would simply say: Well, we will not put it on the little station. For instance, we will say that NBC has a small station in a certain town, and Mutual has a big station, or vice versa, and the advertiser or advertising agency will say: We do not want to take Mutual, or National, as the case may be, on the small station, but wish to transfer it to the big station. If
that were permitted it would seem to me you would be
eliminating the small station. . . .

"Take for instance a location in the western country,
and say I want to advertise in Denver, or in Salt Lake
City. If I am going to advertise in that area I will want
to get the largest number of listeners possible. Conse-
quently it is probable that as an advertiser I would not
want to put my program on the smaller station in Spo-
kane or in Salt Lake City or in Denver.

"As to the use of stations, if one can just switch them
over I think an advertiser would want to go on the big
stations because the big stations get the listeners; and
unless the small station can get good programs you will
be giving the big stations a monopoly.

"I think that is one thing you have to guard against
because certainly when you are trying to tear down one
monopoly you do not want to be building up another—
putting the small stations out of business. That is one
thing you have to guard against."

Chairman Fly gave several reasons indicating why he
does not believe this will happen, ending with this state-
ment, "Of course it is not the intention of the Commis-
sion that the big stations shall take advantage of the
small ones. If that starts to happen we will have to re-
examine that phase of the subject."

In completing his testimony today, Chairman Fly said
that the Commission approves of this hearing and stands
ready to produce any further information called for by
the Senate committee.
FURTHER NEED OF CONGRESSIONAL REVIEW REVEALED
AT SENATE RADIO HEARING

Necessity for revision by Congress of the law governing radio broadcasting was indicated by Senator Clark, of Idaho, at today's hearing before the Senate Interstate Commerce Committee on the White resolution calling for a Senate investigation of the broadcasting industry. Senator White introduced his resolution following promulgation by the FCC on May 2nd of new rules imposing drastic restrictions upon network broadcasting operations.

"The only question that is troubling me," Senator Clark asserted, "is whether this law is in proper shape. You see these networks have grown up largely since the law was enacted. Probably Congress at the time did not contemplate the exact situation in which we are today. It is 14 years since the law was enacted."

Doubt as to just what will be the effect of the new rules was expressed a number of times during the first few days of the hearing, when FCC Chairman Fly appeared.

Further evidence of such confusion resulting from application of the rules was brought out at today's hearing during questioning of Louis G. Caldwell, counsel for the Mutual Broadcasting System, and Fred Weber, Mutual's general manager, who took the stand together.

Referring to previous discussions of difficulties which would confront radio broadcasting if exclusive contracts and option time are eliminated under the new rules, Senator Clark said, "You would have a lot of chaos there unless there is some right to option time."

Senator Clark said he can see where network broadcasters would not have a whole lot to sell an advertiser if they did not have some right to option time adding that "you would end up by having your time all messed up, particularly if other networks could come in and contract with that station for time, too."

With stations shifting from network to network under the new rules, Senator Clark asked if the result would not be that the Mutual Broadcasting System, which is supporting the new rules, would get the benefit of placing programs on stations where facilities and listening audience have been built up over a period of years in the course of affiliation with competing networks.

Senator Clark cited as an example a situation in which under the new rules Mutual would be able to offer its program to a station which had become the leading broadcasting outlet in its city through a ten-year period of affiliation with Columbia. When such a program is announced as being broadcast for the Mutual Broadcasting System, he said, "you are getting time on a station that has really been made valuable by your competitor."

During his testimony, Mr. Caldwell said that "Mutual had nothing whatsoever to do with the Commission's action initiating the investigation of chain broadcasting. Neither it nor its stockholders nor its lawyers had made any complaint to the Commission. We simply responded when asked to appear and set forth our situation as accurately and fully as we could."

Later, he said, Mutual did suggest that the Commission adopt a regulation, temporary in character, to serve somewhat the purpose of a temporary injunction "designed to preserve the status quo until the court has made its decision."

In regard to the World Series baseball games broadcast exclusively by Mutual, and mentioned several times previously during the hearings as being denied to some stations having exclusive contracts with other networks,
Senator Gurney asked Mr. Weber if Mutual did not have "an exclusive contract with the baseball people." Mr. Weber said that was true.

"You cannot," declared Senator Gurney, "stand on one leg and say the other stations could not get the program, and then on the other leg have an exclusive contract with the baseball people."

At yesterday's hearing, FCC Chairman Fly said he understood Station WCAU in Philadelphia had refused broadcasting time to Charles A. Lindbergh. Today Senator Wheeler read the following telegram from Leon Levy, president of WCAU:

"I wish to call your committee's attention and to have also entered into the record the fact that no request was made of this station to broadcast the speech. A request was made, however, to buy announcements for this meeting, but a member of the sales division interpreting the broadcasting code as applying also to such announcements refused to sell them. When my attention was directed to this fact, I issued instructions to the WCAU staff that announcements calling attention to a meeting do not come under controversial subjects and are therefore acceptable. A statement was issued to the press about these announcements and also the fact that no request was made to broadcast Lindbergh's speech and if such request was made it would receive due and careful consideration and if broadcast would be done without charge. . . . May I respectfully call your committee's attention to the fact that during the same month WCAU broadcast Lindbergh's speech on May tenth and also Senator Wheeler's speeches on May twenty-third and May twenty-eighth."

Senator Wheeler said, "I am very glad indeed to have the statement from Mr. Levy and to correct the impression which I myself and many others had with reference to the matter."
Need for amendment of the law under which the radio broadcasting industry operates was again expressed at today's hearing before the Senate Interstate Commerce Committee on the White resolution asking a study of the industry by Congress.

Yesterday Senator Clark, of Idaho, expressed doubt as to whether "this law is in proper shape," pointing out that "it is 14 years since this law was enacted," and that the radio networks have grown up since then.

Today, Senator White, of Maine, who introduced his resolution after the FCC issued new rules which would drastically affect network broadcasting, said, "I think there may be a vast difference between what the law is and what the law ought to be. I am not sure but what that is the difficulty which is confronting all of us at this time.

"I have thought the appropriate time for me to discuss that matter was when we meet in executive session. I want to discuss that matter and give the committee my views on what the law now is; but I have not felt that I wanted to make my observations a part of the testimony in the case because I do not like to be in the dual position of acting as a member of the committee and also as a witness in behalf of my own resolution."

**FCC Jurisdiction Not Settled Question**

At today's hearing Louis G. Caldwell, attorney for the Mutual Broadcasting System, and Fred Weber, general manager of Mutual, continued their testimony.

Asked by Senator Wheeler for his opinion on the disputed question of the jurisdiction of the FCC in promulgating the new rules, Mr. Caldwell, who was the first general counsel of the old Federal Radio Commission, summed up his opinion by saying, "I think there is fair legal authority, although not as precise as you might want right now, to the effect that the Commission does have this jurisdiction. I can't say that it is a settled question."

In a discussion of whether under the present legislation the principle of free competition in radio is accepted, Senator White said he does not think that is the fact at all.

"Everyone recognizes, I think," said Senator White, "that we cannot have free competition under this Act because of definite technical and physical limitations upon it. At the most, all we do is approach that, but we approach it within the limits of the legislation and within the limits of physical facts."

In the matter of control over programs, Mr. Caldwell said, "There are others who do not agree with me, but the Commission, in my estimation, has, with the help of Congress gone a little further than it should have into that field of control."

**Wants Stations To Be Free**

Speaking of the freedom of stations, which he said was an object the Committee members should keep in mind, Senator Wheeler declared that he wants the stations to be free from all "domination" including that by the Commission.

"In other words," Senator Wheeler continued, "I do not like the idea of the Commission simply saying to a radio station, 'You should not put on this program, because it does not represent the views of the Administration—' whichever administration it might be.

"I do not like the idea of the Commission's holding a club over some station if the station happens to be
owned by one who is unfavorable to the administration that might be in power at that particular time. I think there has been entirely too much of that in the past.

"As a matter of fact, the Commission for a long time was dominated as a political commission. That was true in the Republican administration, and it has been true, to some extent, in the Democratic administration."

In a discussion of a suggestion previously made as to whether the Commission has the right to alter the power of stations in any city when granting licenses, Mr. Caldwell referred to Louisville, Kentucky, where he said there is a 50-kilowatt clear channel station, a 5-kilowatt regional station and two 250-watt local stations.

In a jocular aside, Senator Wheeler suggested that perhaps the 50-kilowatt clear channel station might be taken away from the *Louisville Courier Journal* and given to Mutual, whose present affiliate is one of the 250-watt stations.

In the same spirit, Mr. Caldwell responded, "I was going to say take the 5-kilowatt station first."
COMMISSIONERS HIT FCC RULES AT SENATE HEARING

Two members of the Federal Communications Commission told the Senate Committee on Interstate Commerce today they believe that the Commission has usurped power not vested in it by Congress in issuing its new rules affecting radio broadcasting.

The FCC proposals, they said, are more likely in their effects to be “destructive rather than constructively remedial.”

These views were expressed in a joint statement by Commissioners Norman S. Case and T. A. M. Craven, which the latter presented at hearings on the resolution introduced by Senator White, of Maine, proposing that the Senate conduct a study of the Commission’s action and a general investigation of radio broadcasting.

Among other developments at today’s hearing were:

Refusal by Fred Weber, general manager of the Mutual Broadcasting System, which is supporting the FCC’s position, to answer yes or no when asked by Senator White if it is not true that “the great majority of broadcasting stations in the United States are today fearful of these regulations and are substantially opposed to them.”

Senator White’s statement that the “Commission has put the cart before the horse in this matter by first determining whether a fellow is guilty of monopoly or not and then going on to determine whether what he is doing is in the public interest or not.”

Craven States Issues

In opening his testimony today, Commissioner Craven said that the real issues between the Commission majority and minority are first, whether the majority has usurped power, and second, whether the majority would not in fact create a monopoly in broadcasting “more devastating in its effect upon the public than that which is alleged to exist today.”

Mr. Craven said the Commission minority believes, that by its action in promulgating the new rules the Commission “asserted power not vested in this agency by Congress.”

Senator Tobey, of New Hampshire, asked Commissioner Craven, “As among the three large concerns now, is there comity or unity or a gentlemen’s agreement that sets up a monopoly between any two of them?”

“Not in my opinion,” Mr. Craven replied.

“Then,” continued Senator Tobey, “there are three free individual networks, all operating separately?”

“That is my understanding, sir,” responded Commissioner Craven.

Unfortunate Consequences Feared

He and Commissioner Case believe, Mr. Craven stated, that “the solution of the problem now confronting the Commission requires a balanced and dispassionate consideration of the many factors which contribute to broadcast service in the public interest.

“We feel that a limited approach or conclusions based on overemphasis of one phase of the problem will result in unsound administration and unfortunate consequences to the radio service to which the public is entitled. It is with extreme regret that we conclude the majority has taken this limited approach.”

Speaking of the licensing power which the FCC already has over broadcasting, Commissioner Craven said, “In itself, the power to punish licensees by refusing to renew licenses constitutes a vast control,” adding that “if this
licensing power is augmented with jurisdiction to determine guilt of violation of any law of the land under the guise that such violations constitute acts against public interest, there is concentrated in the Commission undue power."

Commissioner Craven said he believes that the FCC should have made its recommendations to Congress instead of putting the new rules into effect.

Pointing out that by its new regulations the Commission proposes to interfere with the "business practices" of the broadcasting stations, Commissioner Craven said that the Supreme Court recently held in the Sanders case that the Commission is prohibited from doing that.

As at yesterday’s hearing, Senator White again today came out strongly for enactment of new legislation governing radio broadcasting.

"I should like to see," Senator White asserted, "legislation declaring in specific terms the powers of the Commission with respect to what they may do in the regulation of chain broadcasting."
FCC RULES WOULD HARM SMALL STATION, SENATORS TOLD

Small stations would be hard hit by the new FCC rules, Commissioner T. A. M. Craven and Mark Ethridge, vice-president and general manager of the Louisville Courier-Journal and Times, told the Senate Committee on Interstate Commerce at today's hearing on the White resolution asking a Senate investigation of the radio broadcasting industry. Both witnesses and several Senators urged a revision of the Federal Communications Act.

Commissioner Craven and Mr. Ethridge were the only witnesses at today's hearing. Both asked for new legislation to clear up the confusion resulting from the Commission's action which, the industry contends, hits at stations in an attempt to reach chain broadcasting.

Senators White, of Maine, author of the resolution, and Clark, of Idaho, likewise declared new legislation is needed. They said they favor holding the rules in abeyance until the legislation is enacted. Senator Wheeler, of Montana, Chairman of the Committee, agreed that the Act should be revised but said that Congressional action might take two or three sessions, and opposed holding up the rules, adding that there is a great divergence of opinion in Congress as to what the new law should be.

Says Rules Change Radio Pattern

"What is involved here," Commissioner Craven stated, "is a fundamental change in the pattern of American broadcasting. In effect it amounts to new legislation." He added that he believed the Communications Act of 1934 "should be reappraised by the Congress, rather than have the Commission institute a radical change in the pattern."

Mr. Ethridge said: "Here is an industry saying we want a new law and are willing to take our chances with Congress. We believe that the public interest demands such study be made."

Referring to the assertion of FCC Chairman Fly, during his testimony at the start of the hearings, that the Commission's action in issuing the new rules started in Congress, Mr. Ethridge asserted, "That's why we're here, with the industry as the aggressor and the FCC as defendant. To say we have no right to come to Congress is to say we have no right of petition."

Law Written 14 Years Ago

The radio law, Mr. Ethridge added, was written 14 years ago, "when neither you nor we nor anybody else knew very much about broadcasting."

Senator Clark observed, "It occurs to me that since we shall have a lot of time free this summer, we might have a subcommittee go to work on a bill, rather than a resolution, looking toward a revision of the law, and yet not unduly hold up the regulations of the Commission as issued. In that way something might be accomplished."

Commenting on Senator Clark’s suggestion, Senator White said, "I have been working on a tentative draft of legislation which I think will cure some of the serious defects in the law as it now stands. I have definitely in mind some things that ought to be dealt with that are in addition to anything I now have in the drafts to which I have referred."

"The situation which now exists has been growing up over the years, and it took the Commission all of three years to make up its mind—the majority of the Commission, I should say—which course to pursue in dealing with the thing."

"I felt it was proper and highly desirable that we ask the Commission just to hold up on the execution of its regulations until the Committee had a chance to study and possibly until the Committee had a chance to formulate legislation."

"I still believe that if the effective date of these regulations could be postponed a reasonable time, only a part of the time which it took the Commission to bring them forth, legislation could be presented which would form, at least, a basis for Committee consideration."

He suggested that Senator Clark ask Senator Wheeler
to say to the Commission, "We want to study this thing. We want to undertake some changes in the radio law. It took you three years to evolve these regulations. No public calamity will follow if you just hold up for a little while."

Later in the hearing, when Mr. Ethridge was testifying, Senator Wheeler stated, "I am not going to disagree with you as to the need for new legislation." But, he added, such legislation might require a long time and he thought the rules ought not to be held up.

**Effect on Small Stations**

Both Commissioner Craven and Mr. Ethridge pointed out that the new rules will harm the smaller stations.

One effect of the new rules, Commissioner Craven said, "is that the small stations will not be benefited and that the bulk of the business will gravitate toward the larger stations in each community." "This will result in monopoly and will help the rich to get richer and the poor to get poorer."

Mr. Ethridge elaborated on this point by referring to the situation in Louisville, where his newspaper owns the largest of four stations in the city. With stations shifting from network to network under the new rules, he pointed out, it would be possible for this station to carry the most popular programs on all networks.

In spite of this, he said, he opposed the rules, which "were no answer to the plight of the small station." Referring to the Mutual Broadcasting System, which is supporting the rules, he said they would benefit the owners of Mutual but would "gut" the small stations.

**Says Commission Confused**

During previous hearings, the point has often been made that there is much confusion over just what the rules mean and what their effect will be. The Commission itself, according to Commissioner Craven's testimony today, is as confused as is the industry. "I will wager that the majority itself does not know what the rules mean," he said.

He went on to say that "it is no exaggeration to predict that the decision of the majority, instead of resulting in free competition, would more likely create anarchy, or a kind of business chaos in which the service to the public would suffer."

"Not only will the application of the rules increase the inequalities between the small and large broadcasting stations, but the revolutionary change proposed by the majority will result in the destruction of the present excellent national program distribution system and the substitution of some new kind of system, the effects of which the majority does not adequately visualize."

This was admitted in the original draft of what is now the majority report of the Commission, Commissioner Craven testified. This draft, he said, in reference to contract provisions, contained this statement:

"We cannot now determine the competitive effect of such contractual provision; or how they will work out in actual practice. They will have to be examined later in the light of all developments in the field of network broadcasting."

This statement, Commissioner Craven brought out, was eliminated in the final draft of the report.

While, under the new rules, stations may still make affiliation contracts, and networks and advertisers may contract for outlets, Mr. Craven said he and Mr. Case believe "this can be done only for individual programs and for blocks of time."

He pointed out that "this is a 'piecemeal' basis, and affords no continuity of stability to the industry."

**"Fraught With Peril"**

It is axiomatic, he said, that "unlimited availability of the few existing radio facilities and efficient national program distribution cannot both be attained at the same time."

"There is no open market condition in the business of broadcasting as in other businesses. Nature has determined that. To attempt to circumvent these basic economic laws is fraught with peril to an industry which has hitherto achieved a marked degree of success."

"Regulation in disregard of economic laws may foster a situation in which competition among competently managed networks would be replaced by an unwholesome conglomeration of local monopolies in the various towns and cities of the nation."

With regard to the question of the power of the Commission, Mr. Craven stated: "A Commissioner is constantly confronted with the charge of either failing to do his duty under the term ‘public interest, convenience and necessity,’ or of exceeding his authority. So my plea to you is to clarify this law, to the end that the powers of the Commission may be clearly defined, and that the responsibilities of the industry may be clearly defined. I think when and if you do that you will end a great many things which I think are wrong. You will end a great deal of trouble on the Commission."

Mr. Ethridge said that FCC Chairman Fly had built up a "big, bad wattage" theory during his testimony. He pointed out that wattage does not determine a station's audience; that in Louisville a survey he had made showed that the other three stations, with only a little more than a fourth of his station's wattage, had almost half the total number of listeners in the city. The "wattage" theory, he said, was a "straw man built up in boogie-woogie style," referring to claims made by Mr. Fly that NBC and CBS had most of the night-time power.
White Hearing

Following are some sections from the transcript of the Senate Interstate Commerce Committee's hearing on the White Resolution (NAB Reports, p. 437) which may prove interesting to broadcasters who have been unable to attend. The Chairman is Senator Wheeler, committee chairman.

STRONG ARGUMENTS FOR AMENDMENT

Senator Johnson of Colorado. How do you control the chains—by licenses or permits?

Mr. Fly. By these regulations here, sir, we govern all licenses of all stations, and there are particular provisions relating to stations engaged in chain broadcasting. You will note that these regulations control the station's relations to the network by means of placing a duty upon the station.

Senator Johnson of Colorado. That is an indirect control; it is not a direct control, is it?

Mr. Fly. I would say it is the sort of impact that frequently occurs where clearly on one end of the contract it is wholly illegal. Then, of course, the contract may fall.

Senator Johnson of Colorado. But you do not deal with the chain directly?

Mr. Fly. Not directly; no, sir. I think there are strong arguments why the networks ought to be brought within the scope of the Communications Act. I do not mean to say that I think it is correct to have them excluded from regulation, in view of their great importance to the public and the great impact of network broadcasting upon the entire public of the United States. I do not believe there can be any doubt that there ought to be very explicit means of regulating these networks in the public interest. That is quite apart from the construction of the Act at the moment.

The Chairman. Why should not the Commission have the right to regulate chain broadcasting?

Mr. Fly. I think it should. I do not think there can be any logical argument against it.

The Chairman. I do not think there is any question about it at all. I think it has reached the point where we have got to have regulation of chain broadcasting.

Senator Johnson of Colorado. In your opinion, how many chains should there be in order to serve the United States? The channels are very limited now in any given city. Perhaps four or five stations would describe the average city. How many chains should there be?

Mr. Fly. Of course that is not a job that I have undertaken or a right that I have of saying who shall go into the network business or how many there must be. It is my guess, sir, that in the course of a year or so you will have a fifth network. That is wholly a conjecture. I think that the broadcasting structure at this time can support, and support in a healthy and profitable condition, five networks.

Senator Johnson of Colorado. That is counting separately the Blue network and the Red network, counting them as two networks?

Mr. Fly. Yes, sir. But you have already the limitation here which limits the number that can come in, so long as there must be a search for a good station in a city. We are up against that now, very much as the railroads were up against the problem of getting into St. Louis where there were limited terminal facilities that were available or possible. I do not think there can be a great number of networks. I think that ultimately there might be six networks.

Of course, Senator, I think we ought to bear in mind, in viewing this whole problem, that frequency modulation, which is an improved form of radio broadcasting, has already come into commercial operation. That is going to move out and will give us to a substantial degree a more diversified and improved radio service.

Senator Johnson of Colorado. That will be a chain in itself, will it not?

Mr. Fly. I think the chains will develop there. There is one now that is in the making. I think considerable progress is being made. That is something that is cooperative in nature. I think that is the present plan. And television, of course, will sweep across a broad field in the course of a few years.

EFFECT ON REMOTE STATIONS

Senator Gurney. How would you handle a situation like this? Take a program in North Dakota—Fargo or Bismarck—that came on the wire from the Twin Cities. Both of them are on the N. B. C., as I understand it, speaking of Fargo and Bismarck. Suppose they did not have these contracts and that the Fargo and Bismarck stations were left free to take a program from any network they wanted to. Suppose the Bismarck and Fargo stations did not decide to take the same program. One wanted to take Columbia, and another Mutual. Then, Fargo would have to pay—I am assuming it had the same hour—would have to pay the line charge from the Twin Cities to Fargo, and Bismarck would also have to pay the line charge from Bismarck to the Twin Cities. On a financial basis it would not be economical for the Bismarck station to get that program. Now it is possible, because they are on the same chain but split the wire charge and, therefore, can have the same program. How would you handle that situation?

Mr. Caldwell. Of course it does present considerable difficulty, but it seems to me in a situation like that, where you have great distances involved and heavy wire-line expense, we are going to get an improved situation eventually through the networks, either directly or indirectly, in the matter of dividing the expense for those wire lines. You understand that all advertisers

(Continued on page 518)
may not want to take, for instance, Fargo, and yet there will be some advertisers on each network that do wish to take Fargo.

The Chairman. May want to take one program and not take another.

Mr. Caldwell. Yes.

Senator Gurney. And one advertiser may not want to take Bismarck.

Mr. Caldwell. Oh, yes. You can now always find a difference between stations.

Senator Gurney. And the windup of the situation will be that Bismarck will not get some program.

Mr. Caldwell. I would think not. I think the two stations together would get selections from all of the networks. Some arrangement will have to be made to share the expense of the wire lines. All the stations are anxious to get network commercial programs.

Senator Gurney. I take it some suitable arrangement will have to be worked out. These stations represent a long wire line and someone must pay the charge. Bismarck cannot pay that long line charge now.

Mr. Caldwell. I cannot imagine any serious difficulty about working that matter out satisfactorily. I think you have to consider that situation in the matter of both the attractiveness of programs and the compensation to be derived therefrom. There is not likely to be any great trouble, I think, in that matter.

Senator Gurney. And if the network has to pay for it, even though an affiliate might want to carry the program, the network will not bear that long line charge?

Mr. Caldwell. In the long run it has to come out of the advertiser. This opens the road for more commercial programs to go into Bismarck and into Fargo, by reason of three networks.

Senator Gurney. I take it your answer would mean that you would raise the ante on the advertiser so that programs would get around the country?

Mr. Caldwell. Well, I do not know how that could happen. Still, you have only one wire to those two cities when you get through.

WORLD SERIES

Senator McFarland. What is your explanation of why the people of Arizona were denied the privilege of hearing the World Series baseball game broadcast?

Mr. Webber. We could produce a tremendous sheaf of correspondence and requests and pleas from stations in that territory, and they just would not carry the program.

Senator McFarland. Why?

Mr. Webber. Because of contract restrictions, from all the information we have available; because of other network contracts.

Senator Gurney. Those stations could not take the program because the National Broadcasting Company and Columbia had exclusive contracts. Was not that it?

Mr. Webber. I know of no other reason.

Senator Gurney. I know of one other reason. Mutual had an exclusive contract with the baseball people and they could not get it.

Mr. Webber. Who could not get it?

Senator Gurney. The National Broadcasting Company and Columbia.

Mr. Webber. You mean, the rights to the World Series broadcast?

Senator Gurney. That is right.

Mr. Webber. It has been customary practice to buy rights for sporting events on the part of the networks. The National Broadcasting Company has had exclusive rights for prize fights——

Senator Gurney (interposing). You cannot stand on one leg and say the other stations could not get the program, and then on the other leg have an exclusive contract with the baseball people.

MUTUAL LAWYER WANTS AMENDMENT

Senator Clark of Idaho. May I ask whether or not you think the law itself ought to be gone into, in view of later developments and the coming in of television shortly? Is the industry generally fairly well satisfied with the existing statutes?

Mr. Caldwell. I do not want to try to answer for the industry. There are some other people here who are going to purportedly speak for them. I can only give you my personal views and those of others that I know of.

With specific reference to television, I see no necessity for revision of the law. The Commission has had very extensive hearings on that subject, in which I have participated personally. The result arrived at may have been arrived at slowly; I do not know. But the result, so far as I know, is not the subject of very great complaint. I think the rules in general are sound, and I know there is no basis for investigation. I suppose your question was more general than that, however.

Senator Clark of Idaho. I was not referring specifically to the White resolution which is pending, which is a sort of hybrid thing, anyway. It may be a very good thing, but it is a little "betwixt and between." I was thinking of a general investigation if there is some dissatisfaction with the law itself, in view of the developments that have taken place in the industry since the law was enacted. Is the law, in your judgment, adequate—that is, the existing statute—to cover the smooth and efficient operation of the whole industry?

Mr. Caldwell. Yes, subject to the qualification that there are particular defects that I think you may want to cover by amendment. There is no substantial defect in this Act. It is susceptible of application and enforcement. I think, in a thoroughly just and satisfactory way.

Senator Clark of Idaho. You mentioned, though, uncertainty in the Commission's regulations. Some of the literature that I have read and also some conversations I have had would indicate that the law was so broad that it has caused confusion; that perhaps the law itself could be amended in such a way as to write salutary regulations into the statute itself, so that the

IS RADIO LIKE TOPSY? DID IT "JUST GROW"?

Listeners think it did—Broadcasters know it didn't.

"THE ABC OF RADIO"
(Second Edition)
TELLS RADIO'S STORY

We sent you a copy earlier this week. We have a plan to assist you and your fellow broadcasters in placing large quantities of this valuable book in the hands of your listeners. Now is the time to act. Write us. We will cooperate with you in every way.

NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N. W.
WASHINGTON, D. C.
industry, if I may use that term, and include you therein, would have a stable basis of not only present operation but future operation. I do not know whether I make myself clear or not.

Mr. Caldwell. I think so. I cannot answer it in a word. I can give you the type of defect that I see in the present law and you can see what I am talking about.

There are two avenues of appeal under the Act: one, certain types or classes of cases that go to the Court of Appeals of the District of Columbia; every other order of the Commission follows the same route that the Interstate Commerce Commission happens to follow, going to the courts around the country. Due partly to court construction, I think, just as much that as through any fault of the law, there are two types of orders that I think ought to go to the Court of Appeals, and yet they go to the courts in the rest of the country. I am referring particularly to orders on assignments and attempts to sell licenses. There is one; and then there is another type of order under Section 325 (b) and (c) that has to do with exporting programs. The defect is quite serious.

Senator Clark of Idaho. There might be some procedural defects, but no substantial defects; it that it?

Mr. Caldwell. There is a defect that I think is rather important. There is a case which is still pending in the Court of Appeals, and under decisions so far rendered you cannot get a stay order in that case to protect you during the pendency of the appeal. We thought the law was otherwise until last year, and that question is still pending before the full court.

Senator Clark of Idaho. That is pretty important, is it not?

Mr. Caldwell. It is very important, and until last year we had had that right granted by that court, and it was regularly exercised. To my mind, that ought to be remedied.

**NEWS COMMENTATORS**

**The Chairman.** Of course I do think this, in fairness to radio, that it must be said that it has very materially assisted in bringing about more freedom of discussion and freedom of speech in the country than we had before the radio came into being. For instance, we had the newspapers of the country to quite an extent...
side or the other, as long as that balance is preserved. But I do not like to see the Commission get into that field any more than is necessary. It seems to me now to be refraining from too much interference with programs.

Senator Clark of Idaho. I want to clear my position a little bit there. There are several commentators on each of the systems today who purport to give news and do give it in a colorful fashion. They are, in my judgment, a minority, but there are several on all of the chains. It is these other fellows that I complain about.

WILL AGENCIES "GO NETWORK"?

The Chairman. The idea has been expressed to me that if, for instance, some large advertising agency in the city of New York had advertising contracts for General Foods, General Motors, or some others of the larger companies, such as the Ford Motor Company, five or six of those companies, would it not be in a position to have the say?

Mr. Weber. It would not, unless each combination of advertisers was prepared to follow a network broadcasting system, because just the supplying of commercial programs will not supply a full service. Under these rules and regulations each station is left free to make the programs that it wants to take. There is no requirement on them. If any system is developed which destroys network broadcasting to its affiliated stations they are not going to participate in developing anything that would destroy the continuous flow of sustaining and commercial programs to them.

The Chairman. Supposing the advertising agency went to various stations in the country and said, "Here is the Ford hour; here is the General Motors hour and here are the better programs that come from these big concerns. We will furnish you six or eight or ten programs." Every station would like to get those programs from the standpoint of making money, and in addition to that they would like to have them probably because of the fact that they are good programs.

Mr. Weber. That would not be adequate. They would have to have engineering facilities; they would have to have studio facilities, promotion organizations, publicity departments. They themselves would have to go into the function of network broadcasting. They could not just simply buy a few programs. The station would have to perform the function of network broadcasting and, in addition, they would have to assure the costs of wire lines at $8 a mile to reach across the country on a permanent basis; and once you install permanent lines it is an additional service that has to be supplied in addition to good commercial programs. You have got to give sustaining service; you have got to give the whole set-up, promotion, merchandising, studios, engineering, announcers, and everything else. You could not just buy some time.

Senator Clark of Idaho. How are these wire line charges arrived at? By agreement between the networks and the telephone company?

Mr. Weber. No; there is a tariff established and filed with the Commission, established by the A. T. & T.

Senator Clark of Idaho. That tariff is established by the Federal Communications Commission?

Mr. Weber. Yes, sir.

Senator Clark of Idaho. When were the line charges established?

Mr. Weber. There have been, to my knowledge, in 15 years of broadcasting, modifications of the charges. Initially they used to charge for lines on the basis of railroad routing, and then later they changed to a system of air mile charges, and now you pay so much per mile per month, $8 per mile per month, on an air line basis, and in addition you pay for connections and loops in each community.

Senator Clark of Idaho. Was the broadcasting industry represented when those line charges were fixed?

Senator White. I suppose, under the general provisions of the law, they would make up their schedules themselves in the first instance, and they would be the legal charges unless altered by the Commission.

Senator Clark of Idaho. I have no knowledge of the fairness of them at all, but I do know that it appears to be difficult to get adequate service, by virtue of these high line charges, into the more sparsely settled areas, and I was wondering if that situation would bear looking into. Are the companies satisfied with the line charges?

Mr. Weber. We certainly would like lower line charges if it were possible to obtain them.

Senator Clark of Idaho. Of course you would, but have you conducted any independent study of them which would lead you to the belief that they might be out of line?

Mr. Weber. There has been discussion of a study. It is quite a difficult thing to determine, because the Telephone Company is in the position of stating that facilities are not available, or they have to take circuits out of telephone service to supply broadcasting. Generally with regard to the costs of lines there has been some reduction. One of the principal problems in costs of our lines was the so-called connections and loops at the stations. You have to buy them on a monthly basis, even if you use them for an hour, to connect to a permanent line. That is the thing that would act to really restrict any development of one company or one agency buying a certain number of hours, because you have to pay a monthly service to connect the station. Once you pay for a monthly service it is a pretty excessive cost.

The Chairman. Like Senator Clark, I have had complaints made to me. I have not given them any study, but why do they charge $8 per mile?

Mr. Weber. The mileage charge is $8 per mile per month, and they charge $175 a month for a connection to the station.

The Chairman. That might be perfectly all right with the bigger stations in congested areas, but certainly when you get out into the rural areas where they do not get as much advertising, where they do not get as much of a charge for their advertising, it does work a hardship on many of the rural communities.

Mr. Weber. We have argued that. We have argued that myself, personally, and the explanation is that the cost is so great to get out into the sparse locations, that that is why the charge can be lower in the larger cities, and they divide it up over the country. That is the position they have taken in regard to the charges, that it would be higher in the smaller communities if they did not average it up.

The Chairman. I think it is something that the Commission ought to go into with reference to the rural areas particularly, to see what can be done so that programs can get in there and so that the smaller stations can operate more efficiently.

Sales

Please direct this section to the attention of your sales manager.

Selling Points for Saturday

Jack Laemmar, radio time buyer for Lord & Thomas advertising agency in Chicago, recommends Saturday time for radio advertising in a letter to the NAB Department of Broadcast Advertising. He writes:

"In trying to get the advertising message to the consumer as close to the time of purchase as possible, it would seem that Saturday would be the most logical day. In every type of retail outlet, from
department stores to drug stores. Saturday ranks the highest. For example, Saturday accounts for 40% of the grocery and meat store sales of the week.

"Figures for other types of radio stories are given in a study compiled by the National Retail Grocers' Association. Based on a study of 51 Cincinnati grocers, 69% of Saturday sales are small, but it gives a good idea as to the sets available by times of the day, which is too late to shop; therefore, there is a carry-over until Saturday. For example, a program running on this station, produced in a metropolitan center and having metropolitan appeal, requires mail, and the extremely low response to date proves the program has no appeal in this area. The agency was contacted in an attempt to persuade the sponsor to use a local show with a proven mail record, but the agency answered with a definite 'no.' Its reason was that the sponsor favors the show from a personal angle, and any effort to change would result in a two-week cancellation rather than a small audience extension. I can't understand why a sincere desire by a station to do a good job should be detrimental to that station. After all, six satisfied sponsors across the board for 52 weeks is better business than 24 accounts on short contracts in that same period with no renewals, and all 24 with the opinion 'I tried radio and it doesn't get results.'"

"Another factor in favor of Saturday morning, at least for the advertising of the department store to drug stores. Saturday ranks the highest. For example, Saturday accounts for 40% of the grocery and meat store sales of the week.

"Incidentally, advertisers and agencies seem to be overlooking a good bet on Saturday. In spite of the fact that Saturday's programs are, as a whole, the weakest of the seven days, the listening audience on Saturday mornings is the largest of the week. However, based on C.A.B. figures, the Monday through Friday average is still ahead of Saturday.

"I have been trying to get late figures on the number of people who now work on a five-day-a-week basis, but to date, these figures are not available. Except for the present emergency, I believe that there will be an ever increasing number of companies turning to a five-day week, which will mean greater family availability for radio programs and greater listening.

"Another factor in favor of Saturday morning, at least for the advertising of the department store to drug stores. Saturday ranks the highest. For example, Saturday accounts for 40% of the grocery and meat store sales of the week.

"In October 1938, 'Advertising & Selling' magazine carried an article by C. E. Herrin, Director of the Market Research Division of the Hooper Homes Bureau, Inc., dealing with the use of radio sets. Saturday was found to be tied with Wednesday as the toil day of the week. 'How to Brighten Up the Home With Paint.' In "The Breakfast Club," which is on six days a week, had the highest rating on Saturday than any other day. The average for the first five days of the week based on a coincidental survey in 1937 was 5.6, and the rating for Saturday 6.9.

"A good commercial success story is one on the Benjamin Moore program. The advertiser has used an NBC network program consistently since 1931. The program was a single 15-minute daytime period, once a week, which consisted of organ music and a talk by Betty Moore on 'How to Brighten Up the Home With Paint.' In 1939 the program was shifted to Saturday, with the result that the effectiveness was increased greatly. Actually, the success of the program must be, to a large extent, dependent upon mail, and the mail of the 1939 Saturday morning program was 37% greater than the mail received during 1938, when the program was on a week day.

**Success Story Form**

The new standard form for radio success stories adopted by the Department of Broadcast Advertising has also been adopted by several NAB member stations. Although it was not intended that this form should be universally used, since many stations already have their own very effective forms, any station wishing to adopt it is perfectly free to do so.

A sample copy was sent each station over a month ago, but any members desiring additional samples may have them free upon request.

**Making Radio Effective**

Three problems worthy of sales managers' consideration, particularly at small stations, are presented by KVEC NAB member at San Luis Obispo, Cal. in the industry's effort to increase the effectiveness of radio advertising.

The first outlines the necessity of giving close attention to the proper scheduling of programs and announcements. Writes Christiana M. Jacobson:

"The sponsor on the average small station buys so many spots either locally or through an agency. The time suggested may not be right for his product in a rural area (people rise earlier, retire earlier, live at a slower pace). But our personal observation is that often no one seems interested enough to rectify the error or even make the suggestion. There are always at least two parties involved in the transaction and one or the other feels that the trouble involved is not warrant worth the trouble and time. This does not agree with the material found in the NBC-CBS joint study on the use of radio sets, but I believe the important factor is that in all cases Saturday ranks as high as it does. Whether or not it is equal to, or slightly above Monday through Friday, is really of minor consequence at the present emergency. For example, a program running on this station, produced in a metropolitan center and having metropolitan appeal, requires mail, and the extremely low response to date proves the program has no appeal in this area. The agency was contacted in an attempt to persuade the sponsor to use a local show with a proven mail record, but the agency answered with a definite no. Its reason was that the sponsor favors the show from a personal angle, and any effort to change would result in a two-week cancellation rather than a small audience extension. I can't understand why a sincere desire by a station to do a good job should be detrimental to that station. After all, six satisfied sponsors across the board for 52 weeks is better business than 24 accounts on short contracts in that same period with no renewals, and all 24 with the opinion 'I tried radio and it doesn't get results.'"

The second recommendation offered is that advertising agencies and advertising departments should furnish copy to station and sponsor, carefully prepared and attractively presented. Stating that most copy now received is poorly mimeographed, or on second sheets, often with no heading or reference to the account or product, it is stated that this cannot impress the station which is advertising this "outstanding product", and has a very bad effect upon the sponsor who is spending good money for radio time.

"In newspaper advertising, on the other hand, advertising campaigns generally come attractively prepared, with folders containing all available mats and with proofs run on fine paper, usually bound with colorful, attention-getting covers. What cannot radio continuity be presented the same way, to impress the stations, the sponsor, and its dealers or sales force? If radio stations will comment to those responsible for continuity poorly presented, and make these suggestions, many advertisers and agencies will adopt them."

The final suggestion, along similar lines, is that stations do likewise by furnishing each sponsor a clear and attractively-presented copy of his radio advertising, if produced by the station. "Copy is now often poorly presented, or is merely read to him over the telephone." Standard forms could be used, it is suggested, with space for sponsor's name, the names of continuity writer and announcer, and even a selling message from the station. It is pointed out that sponsors are given checking copies and proofs of advertising run in printed media, as evidence and a record of their campaigns, but money spent in radio advertising, unless the sponsor hears each program or announcement, often seems to leave no trace. At little extra trouble or expense, it is claimed, radio stations could thus constantly make good impressions on advertisers to the ultimate benefit of the industry.

**Recording Standards**

As broadcasting has developed the problem of reproducing transcriptions with uniform results, it has become of much concern...
to broadcasting stations. Quite a number of different characteristics have been used by the various manufacturers of transcriptions, recording equipment and reproducing equipment. Most of these characteristics produce good results by themselves when the proper playback equalization is used. Some companies have coordinated the three elements, however, in many instances this has not been so. This has made it extraordinarily difficult for broadcast stations to obtain uniform results from transcriptions manufactured by various companies and reproduced on equipment manufactured by various companies. This problem has been discussed with a number of transcription and equipment manufacturers and they have all indicated that they will cooperate in the formulation of standards.

A subcommittee of the NAB Engineering Committee was appointed by Edward L. Gove, WHK, chairman, comprised of Paul Loyet of WHO, chairman, Morris Pierce of WGAN, and Robert Morris of NBC. The subcommittee formulated a questionnaire on recording and reproducing. The questionnaire was sent to all broadcasting stations. The answers to the questionnaire show that broadcast stations use as high as ten different equalizer settings for reproducing various transcriptions. Even with such an elaborate set of equalizers it has not been possible to entirely obtain uniform results from various transcriptions.

The Engineering Committee recommended that NAB coordinate the formulation of "Recording and Reproducing Standards." Neville Miller has informed the Engineering Committee that the Executive Committee has authorized this project. In accordance with this the first meeting of the "Recording and Reproducing Standards Committee" will be held at the Statler Hotel in Detroit on Thursday, June 26, the day after the Institute of Radio Engineers Convention. All parties interested in this project are invited to attend.

The correspondence regarding this project should be addressed to Lynne C. Smeby, director of engineering.

BMI

New Log Service

A daily logging service to get underway within the next two weeks, has been set up under the supervision and control of John G. Peatman, Director of the Office of Research of the Department of Psychology of the College of the City of New York. BMI will pay the costs of operations.

Service of the listening post thus established, will consist of the following:

a. A full daily report of all programs on stations WOR, WJZ and WABC between the hours of 8 a.m. and 5 p.m.

b. A full daily report of all programs on stations WABC, TWF, WJZ, WOR, WMCA, WHN, WOV and WNEW between the hours of 5 p.m. and 1 a.m.

Report sheets of the new Service will contain a complete record of the number of performances received by each composition heard during the above listening periods as well as a detailed log showing program listings of all musical compositions heard on each of the stations. The Service’s full program report will include:

1. Time of the program.
2. Contents of the program, including each individual composition broadcast.
3. Sponsor or place of origin of the broadcast.
4. Name of the performing artist.

In addition, it will indicate whether the individual composition was performed in whole or in part. It is understood that the Department of Psychology of the C. C. N. Y. will have full control of the operations of the project, including the hiring of all employees and that BMI shall in no way be responsible. The Department expressly agrees that it shall act independently and not as an agent or representative of BMI.

New Compositions

Broadcast Music, Inc., announces the addition of nine new compositions to its catalogue of original material and twenty-five copyrighted arrangements of familiar music in the public domain. Prominent among the popular songs made available to the radio station members of BMI, was "Dixie Girl," a ballad by Kent Cooper, head of the Associated Press. Other numbers released at the same time included "All Alone and Lonely," by Milton Schwartz, David Sanders and Al Pearson, and "I Went Out of My Way," by Helen Bliss, for both of which BMI officials predict a great success. Olsen and Johnson, stars of Hellzapoppin', were represented with "My Heart's in America," an original composition from their production, "New Hellzapoppin'."

Among the twenty-five "cross-cued" arrangements of public domain material, now bringing this portion of the BMI library to approximately 600 selections, were such familiar compositions as Tchaikowsky's "Dance Chaconne" from the Nutcracker Suite; John Phillip Sousa's "On Wings of Lightning;" Schubert's "Serenade;" Sibelius' "Romance in D Flat," and Grieg's "Repose of the Forest."

License Forms Approved

The Board of Directors of BMI, at a meeting on Tuesday (June 10), approved the forms of blanket and per program contracts for broadcasting stations, as well as a contract permitting optional clearance at the source for electrical transcriptions. Forms of contracts are understood to be undergoing minor technical revision and will be sent out to broadcasting stations shortly. As announced at the convention, holders of BMI blanket contracts may ratify the same and thus obtain a one-third reduction in present license charges bringing the present scale of payment down from a maximum of 2½% to a maximum of 1½%, and the minimum from 1½% to 1%. Per program rates run from 3½% to approximately 5½% for commercial programs using BMI music, and from ½% to 1% for sustaining programs using BMI music. The latter charge being figured on card rates applicable at the time of broadcast. Directors also approved numerous plans for the development and expansion of BMI’s activities, subject to the discretion of the management. The directors announced with regret the resignation of Ted Streibert as a director of the company. Mr. Streibert is an officer of Bamberger Broadcasting Service, Inc., which has resigned from the National Association of Broadcasters, and he stated that he felt that as a representative of that company he should also resign from BMI which represents a type of industry activity. It was confirmed that Mr. Streibert’s resignation would have no effect on the continued support of BMI by WOR.

BMI FEATURE TUNES
June 16 - June 23

1. I WENT OUT OF MY WAY
2. ALL ALONE AND LONELY
3. MY SISTER AND I
4. WALKIN’ BY THE RIVER
5. WISE OLD OWL
6. FRIENDLY TAVERN POLKA
7. G’BYE NOW
8. WHAT D’YA HEAR FROM YOUR HEART
9. HERE’S MY HEART
10. WITH A TWIST OF THE WRIST
11. THE RELUCTANT DRAGON

In preparation: "Wasn’t It You?" by the writers of You Walk By.
Extra Copies

There are extra copies available of the first volume of the BMI Index. These volumes will be sent to any BMI subscribers who desire them until the supply on hand is exhausted. There will be no charge to subscribers except the necessary postage which will be collected on delivery.

Requests

The following quotation is from the head of the music division of two stations having ASCAP licenses:

"My particular purpose in writing you at this time is to inform you that of the request programs currently running on both stations it is interesting to note that over 75 per cent of the requests are for BMI or for BMI controlled tunes. Also, as you know, we are now in a position to use ASCAP material, but our BMI users have not fallen appreciably when considered on the basis of monthly use."

And speaking of preferences, Bill Brennan, WORC, Worcester, Mass., stopped in this week to tell us that a request program on that station, "Five O'Clock Varieties," received no letters asking for ASCAP music from January 20th to May 1st. All requests were for either BMI published or BMI controlled tunes. There were no calls for the "Old favorites" which ASCAP claimed so loudly around the first of the year were indispensible. Among the requests it is interesting to note that over 50 per cent of the requests were for BMI or for BMI controlled tunes. Also, as you know, we desire them until the supply on hand is exhausted. There will be no charge to subscribers except the necessary postage which will be collected on delivery.

BMI Opens the Door

In its first year, BMI brought the public the music of more than 500 writers who had little if any opportunity to reach the public under the conditions which prevailed prior to April 1940. This music came from all parts of the country and from all walks of life. It did not reflect the ideas of any one group; it included the work of those who devote their entire time to the creation of music and those to whom this creation has been a happy interval in an otherwise busy life. Broadcasters can take pride not only in the effectiveness of their work in the formation of BMI, but in the development of the conditions which made BMI essential. The growth of a lively interest in music in all parts of the country and in all sections of the people was fostered by the progress of commercial broadcasting. During the past twenty years, American symphonic orchestras have grown from about twenty to about three hundred and the interest in their maintenance has broadened from that of a few rich families to thousands of music lovers throughout the country. During the same period, an awakening of interest in music in the public schools has built some 50,000 bands, nearly as many orchestras and almost twice as many choral groups.

That radio has been the principal factor in this musical growth goes without saying. A common feeling for melody, rhythm and harmony resulted from radio carrying the best music to all of the people at the same time. Never before the period of commercial broadcasting would such a unified musical movement have been possible.

Native Latin American Music to Be Popularized

Maurice Russell Goudey (outstanding authority on the interpretation of South American folk music), who has spent the last six years teaching and directing radio orchestras in Buenos Aires, has been selected by Peer International Corporation to set up a catalogue of the native Latin American music available for broadcasting in the United States.

Mr. Goudey plans to start with what he calls the A-H-C of South American music—Argentina, Brazil, and Chile. As the field develops, he plans to introduce the tunes of the smaller countries, such as Columbia, which he states is particularly rich in beautiful and unusual music.

"My job," says Mr. Goudey, "will be to select the repertory, aid the American orchestras in their arrangements and rehearsals with an eye to combining authenticity of interpretation with popular performance."

Available

Announcement is made of the availability of the publications of Cundy-Bettoney Co., Inc., in Boston, Mass., for broadcasting. This company has lists of the band and orchestra music and solos for wind instruments available for this purpose.

Lists of suggested music material for Independence Day programs has been issued. Included is a list of marches for military bands from the catalogue of Jean Missud.

The Mud and the Stars

Under the headline, "And Some of Them Saw Stars", the Everybody's Weekly section of the Philadelphia Enquirer makes the following comment on the new BMI song Stars Went to Sleep, which was written by three prisoners within the walls of the Oklahoma State Penitentiary:

"Thus the chance meeting of two prisoners was made into a song; then into a partnership of many songs . . . , the idea of a poet proved true:

'Two men looked through prison bars,
One saw mud, the other stars. . . ."

"At the same time scores of other prisoners were heartened to new efforts by the examples of these two. Hearing or reading the story, they resolved to make the best use of their enforced separation from the world and to prepare themselves for an eventual return to that world as more useful citizens."

Soaring

Sales of My Sister and I passed the 150,000 mark early this week and are going strong. It looks as if the song will set up a new high record for BMI.

The Career Open to Merit

Additional evidence that if a song has a germ of a good idea, BMI editors will spare no effort to place it before the public is illustrated by the history of the new tune Have You Changed. This song was first submitted in August of 1940. It came in the mail one morning in August 1940 from Jay Gordon of Wilmington, Delaware, without benefit of even so much as an accompanying letter. A reviewer referred it to the Editorial Committee. The title, the tune and the first line of the lyric inspired enthusiasm. The rest was silence. In other words, the various questions asked under the Have You Changed inquiry were not appealing, as they completely lacked the nostalgic quality necessary to awaken pleasing memories. A lengthy correspondence ensued asking for additional lyrics and one after another were submitted, all equally bad, until Mr. Gordon's permission was obtained to call in Sylvia Dee, an experienced lyric writer, and see what she could do. Miss Dee "sparkled" immediately on the idea. She liked it and turned out three good lyrics over night. That was about three weeks ago. Since that time, the best lines have been merged from these three lyrics, one or two new ones added, and it looks as if BMI has another potential hit.

IRNA Committee Meets ASCAP

From Samuel R. Rosenbaum, Chairman of IRNA:

A committee of officers and directors of IRNA supplemented by several other representative affiliates met Wednesday afternoon at NAB with Messrs. Paine, Mills and O'Connor of ASCAP. ASCAP explained fully the present status of the ASCAP deal as consummated with Mutual and as modified in the offer to the other networks, and the present status of the ASCAP deal to be submitted to affiliates in the form submitted to Mutual affiliates. The committee was told that ASCAP explained in detail the question of the potential hit. The representative made it clear that they were not a negotiating committee and were meeting with ASCAP in order to learn fully the status of the present ASCAP offers which would be reported back to the IRNA Board for consideration and further discussion. Those present for IRNA were: Rosenbaum, Morency, Craig, L. B. Wilson, Kennedy, Myers, Shouse, O'Fallon and Moses.
MIRNA Disbands

Mutual Broadcasting System announced Thursday that it had been notified by S. A. Cihler, WGRC, that the Mutual Independent Radio Network Affiliates, a committee set up at the St. Louis convention, had been disbanded. Difficulties between Mutual and some of its affiliates which led to the organization have been straightened out, MBS announced.

FEDERAL COMMUNICATIONS COMMISSION

WFMC

The FCC, on June 10, approved the application of W. C. Ewing and Harry Layman (Cumberland Broadcasting Company) to transfer the license of Station WFMC, Fayetteville, North Carolina, to W. C. Ewing and T. K. Weyher (Cumberland Broadcasting Company) and renewed the station's license.

KEVR

The FCC, on June 10, approved the application of Evergreen Broadcasting Corporation (KEVR) of Seattle, Washington, for a construction permit upon assurance to the Commission that within one year it will file an application for a new construction permit requesting authority to operate with power of 5 kilowatts to effect a more efficient use of the frequency (1090 kilocycles).

FCC Propaganda Study

The FCC announced the appointment of Lloyd A. Free as Director of its Foreign Broadcast Monitoring Service and the retention of Harold N. Graves, Jr., as Administrative Assistant of that unit. They will supervise the recording, translating and analysis of foreign short-wave broadcasts, a duty undertaken last March by the Commission in cooperation with the Defense Communications Board.

From the FCC Mail Bag

A broadcast station seems perplexed about whether to pick up a bellow-by-bellow description of a bullfight. The question of programming is a matter for the station itself to decide in the first instance. The FCC has no specific regulation on this subject but points out:

"However, there is language in some of the decisions (see e.g., in re Station WMCA, 2 F. C. C. 76, 77; United States Broadcasting Corporation, et al., 2 F. C. C. 208, 219) to the effect that "broadcast programs which are offensive to the sensibilities of the people generally are not in the public interest." As bearing on the determination of this matter, your attention is invited to the fact that bullfighting has never been legalized in this country, and it is believed the history of efforts to legalize it in some of the States will disclose considerable public opposition to the fact that bullfighting has never been legalized in this country."

To a New Yorker who complains about rates for broadcast time, the Commission cites the Communications Act in declaring that broadcast stations shall not be deemed "common carriers," hence it is equally without authority to pass upon advertisements in a telephone directory. Or to require a magazine to readjust its radio schedule to the satisfaction of a California reader. Since the Commission functions primarily as a licensing authority, it has no say in the selection of radio station personnel. Consequently, it has no rules or regulations governing the hours that an employee may work. To a Massachusetts inquirer on the latter subject, it advises that the radio-broadcast industry is subject to the Fair Labor Standards Act and that any complaint on that score should be made to the Wage and Hour Division of the Department of Labor.

The Commission receives many complaints about radio interference of local electric origin. To such persons, it explains that it is without power to intervene, but points out that some municipalities have ordinances on the subject, adding: Many public service companies maintain investigation departments and upon request are generally willing to assist in locating the source of the trouble and in correcting it, if possible.

The Commission is unable to help a New Yorker who claims his invention "for the development of music" has been suppressed by certain business interests. And the only thing the Commission can do with a sample of corn remover sent to it is to turn it over to the Federal Trade Commission, to which it should have been addressed.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, June 16. They are subject to change.

Monday, June 16

Broadcast

WHB—WBB Broadcasting Company, Kansas City, Mo.—C. P., 710 kc., 5 KW, DA-night and day, unlimited time. Present assignment: 880 kc., 1 KW daytime.

KFNF—KFNF, Incorporated, Shenandoah, Iowa.—Renewal of license, 890 kc., 300 watts night, 1 KW day, SH-KUSD.

Television Broadcast

W2XD—General Electric Company, Schenectady, N. Y.—For license to cover C. P., 162000-168000 kc., 40 watts, emission A-5, Sec. 4.4(a).

Wednesday, June 18

WBRE—Louis G. Baltimore, Wilkes-Barre, Pa.—C. P. to erect a synchronous station, 1310 kc., 100 watts, unlimited time.

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

Monday, June 23

WFNC—W. C. Ewing and Harry Layman, d/b as Cumberland Broadcasting Co. (Assignor) and W. C. Ewing and T. K. Weyher, tr/as Cumberland Broadcasting Co. (Assignee), Fayetteville, N. C.—Voluntary assignment of license, 1340 kc., 250 watts, daytime.

WFNC—W. C. Ewing and Harry Layman, d/b as Cumberland Broadcasting Co., Fayetteville, N. C.—Renewal of license, 1340 kc. (1370 kc. under NARBA), 250 watts, daytime.
Tuesday, June 24

Wednesday, June 25

Investigation to determine what policy or rules, if any, should be promulgated in connection with operation of new high frequency (FM) broadcast stations and for future acquisition of standard broadcast stations by newspapers, pursuant to Order No. 79.

Thursday, June 26

Monday, June 30

NEW—KNOE, Incorporated, Monroe, La.—C. P., 1420 kc., 250 watts, unlimited.

Monday, July 7

KWTO—Ozarks Broadcasting Company, Springfield, Mo.—C. P., 505 kc., 1 KW night, 5 KW day, unlimited, DA-night.

Consolidated Hearing

NEW—Ralph L. Lewis, Greensboro, N. C.—C. P., 1370 kc., 100 watts, unlimited time.

APPLICATIONS GRANTED

New STL Broadcast Station—Capital Broadcasting Co., Inc., Schenectady, N. Y.—Granted construction permit for new STL (studio transmitter link) broadcast station to operate on frequency 331000 kc. (experimentally); power not in excess of 50 watts; special emission for frequency modulation with a maximum frequency swing of 300 kc. (B1-PST-1).

DESIGNATED FOR HEARING

Washington Broadcasting Co., Washington, Pa.—Application for construction permit for new station to operate on 1130 kc., 250 watts power, unlimited time (B2-P-3088).

APPLICATION PLACED IN PENDING FILES

Star Times Publishing Co., St. Louis, Mo.—Placed in pending file pursuant to Order No. 79, application for construction permit for new FM station (B4-PH-7).

MISCELLANEOUS

KMPC—The Station of the Stars, Inc., Beverly Hills, Cali.—Granted petition to intervene and to enlarge the issues in re hearing on application of Minnesota Broadcasting Corp. (WTCN), Minneapolis, Minn., for construction permit to change frequency from 1250 to 710 kc., increase power from 1 KW night, 5 KW day to 10 KW unlimited, using directional antenna night.

KIRO—Queen City Broadcasting Co., Inc., Seattle, Wash.—Granted petition to intervene and to enlarge the issues in re hearing on application of Minnesota Broadcasting Corp. (WTCN), Minneapolis, Minn., for construction permit to change frequency from 1250 to 710 kc., increase power from 1 KW night, 5 KW day to 10 KW unlimited, using directional antenna night.

WDAE—Tampa Times Co., Tampa, Fla.—Granted petition for leave to withdraw without prejudice application for construction permit to change frequency from 1250 to 710 kc., and increase power from 5 KW to 10 KW, unlimited time, using directional antenna for night only.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

New STL Broadcast Station—Capital Broadcasting Co., Inc., Schenectady, N. Y.—Granted construction permit for new STL (studio transmitter link) broadcast station to operate on frequency 331000 kc. (experimentally); power not in excess of 50 watts; special emission for frequency modulation with a maximum frequency swing of 300 kc. (B1-PST-1).

DESIGNATED FOR HEARING

Washington Broadcasting Co., Washington, Pa.—Application for construction permit for new station to operate on 1130 kc., 250 watts power, unlimited time (B2-P-3088).

APPLICATION PLACED IN PENDING FILES

Star Times Publishing Co., St. Louis, Mo.—Placed in pending file pursuant to Order No. 79, application for construction permit for new FM station (B4-PH-7).

MISCELLANEOUS

KMPC—The Station of the Stars, Inc., Beverly Hills, Cali.—Granted petition to intervene and to enlarge the issues in re hearing on application of Minnesota Broadcasting Corp. (WTCN), Minneapolis, Minn., for construction permit to change frequency from 1250 to 710 kc., increase power from 1 KW night, 5 KW day to 10 KW unlimited, using directional antenna night.
Olympic Radio Co., Hoquiam, Wash.—Granted authority to determine operating power by direct measurement of antenna input (B-2-Z-939).

WBRE—Louis G. Baltimore, Wilkes-Barre, Pa.—Granted authority to determine operating power by direct measurement of antenna input (B-2-Z-940).

KITE—First National Television, Inc., Kansas City, Mo.—Granted authority to determine operating power by direct measurement of antenna input (B-4-Z-929).

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Pa.—Granted authority to determine operating power by direct measurement of antenna input (B-4-Z-952).

KRIC—KRIC, Inc., Beaumont, Tex.—Granted authority to determine operating power by direct measurement of antenna input (B-3-Z-955).

KSL—Radio Service Corp. of Utah, Salt Lake City, Utah.—Granted authority to determine operating power by direct measurement of antenna input (B-3-Z-890).

WCAL—St. Olaf College, Northfield, Minn.—Granted authority to determine operating power by direct measurement of antenna input (B-4-Z-948).

WGEZ—Donald C. Treloar, Kalispell, Mont.—Granted authority to determine operating power by direct measurement of antenna input (B-5-Z-947).

WJNO—WJNO, Inc., West Palm Beach, Fla.— Granted authority to determine operating power by direct measurement of antenna input (B-5-Z-811).

WMRO—Joplin Broadcasting Co., Joplin, Mo.—Granted authority to determine operating power by direct measurement of antenna input on 1150 kc. (B-4-Z-703).

WELB—Wave, Inc., Portable Mobile (area of Louisville, Ky.).—Granted construction permit to install a new transmitter and increase operating power of relay broadcast station to 50 watts (B-2-PRE-389).

WHER—Westinghouse Radio Stations, Inc., Portable mobile.—Granted construction permit to install new transmitter and increase power to 25 watts, for relay broadcast station (B-2-PRE-244).

WEIE—Havens and Martin, Inc. Portable mobile area of Richmond, Va.—Granted license to cover construction permit for changes in type of transmitter and to decrease power to 2 watts, (B-3-LRE-349).

WAXA—WJCAU Broadcasting Co., Philadelphia, Pa.— Granted modification of construction permit (for new television station) for extension of completion date to July 28, 1942 (B-2-MPV-41).

WQXER—Midland Broadcasting Co., Kansas City, Mo.— Granted authority to determine operating power by direct measurement of antenna input on 4500 kc., 1500 watts, special emission for frequency modulation with a maximum frequency swing of 75 kc. granted on experimental basis only, conditionally (B-4-LEX-16).

KRNT—Koplin Broadcasting Co. Des Moines, Iowa.—Granted modification of construction permit (for move of transmitter, install directional antenna for night use and new transmitter and increase in power) for changes in directional antenna for night use on 1350 kc. and extension of completion date from June 22, 1941, to 120 days after grant (B-4-MP-1360).

KGGF—Hugh J. Powell, Colleyville, Kans.—Granted motion to amend application to specify power of 1 kw instead of 5 kw, unlimited time, using directional antenna for night, operating on 690 kc. (B-3-LRE-349).

Orange Broadcasting Corp., Orange, Tex.—Granted motion for dismissal without prejudice, application for construction permit for new station to operate on 1550 kc., 1 kw. unlimited time.

KSET—Radio Service Corp., Pocatello, Idaho.—Granted motion for withdrawal of application for construction permit to change from 990 kc. 250 watts, 1 kw. L.S. to 600 kc., 1 kw. unlimited time, using directional antenna night and day.

KGU—Marion A. Mulroy and Advertiser Publishing Co., Ltd., Honolulu, T. H.—Returned to Commission petition to intervene in re hearing on application of Hawaiian Broadcasting System, Ltd., for construction permit for new station to operate on 1310 kc., 250 watts, unlimited time. Also returned to Commission petition to hold hearing in Honolulu and to set date for such hearing.

Olympic Radio Co., Hoquiam, Wash.— Granted motion for continuance to July 15, 1941, of hearing on application for construction permit for new coastal harbor station, now set for June 30, 1941. Also, granted motion for authority to take depositions, upon condition that authority to take depositions is limited to duration of hearing only (B-2-S-495) grants the pending motion to transfer hearing to State of Washington.

C. R. Anderson, business manager of The Lamar Broadcasting Co., Lamar, Colo.—Dismissed without prejudice to participating in a hearing with other stations in the hearing on application to hold record open in re application for construction permit to determine operating power by direct measurement of antenna input (B-5-Z-948).

God's Bible School and College, Cincinnati, Ohio.—Denied petition to hold record open in re application for construction permit for new international broadcast station; Application dismissed without prejudice to the filing of a new application.

Natchez Radio Corp., Natchez, Miss.—Denied request for dismissal of petitioner's application for construction permit for new station to operate on 1570 kc., 250 watts.

KIDW—The Lamar Broadcasting Co., Lamar, Colo.—Granted special temporary authority to determine operating power by the indirect method for a period not to exceed 30 days.

WBNV—Roy L. Albertson, Buffalo, N. Y.— Granted special temporary authority to broadcast musical programs from 8:30 to 10 a.m. Monday through Friday from June 16 to July 15, 1941, only.

WCLE—United Broadcasting Co., Cleveland, Ohio.— Granted special temporary authority to operate from local sunset (June 8 p.m.) to conclusion of night baseball game between the Cleveland and Boston American League Professional Baseball Clubs on June 4, 10 p.m.

WMRO—Martin R. O'Brien, Aurora, Ill.— Granted special temporary authority to operate from 7:30 to 10 p.m., CST, on June 5 and 16, in order to broadcast the community high school graduation exercises of the Oswego Community High School, West High School, Aurora; and East High School, Aurora, respectively.

WRC—National Broadcasting Co., Inc., Washington, D. C.— Granted modification of construction permit for increase in power and installation of directional antenna for night use, for extension of completion date from June 5 to August 5, 1941; 980 kc., 5 kw, unlimited time (B-1-MP-1309).

KKOK—Star-Times Publishing Co., St. Louis, Mo.— Granted special temporary authority to rebroadcast program of Army plane to ground communications in connection with Army Flying Cadet week, between 9:45 and 10 p.m., on June 5, 1941, only.

KMO—Carl E. Haymond, Tacoma, Wash.—Granted special temporary authority to rebroadcast transmissions of amateur radio stations W7LB, W7BHQ, W7IMB, W7AEA, and W7IMB, respectively.

W7LH—临时 authority to rebroadcast transmissions of amateur radio stations W7LB, W7BHQ, W7IMB, W7AEA, and W7IMB, for a period of 15 minutes, from 7:30 to 10 p.m., on June 5, 1941, only.

KMO—Carl E. Haymond, Tacoma, Wash.—Granted special temporary authority to rebroadcast transmissions of amateur radio stations W7LB, W7BHQ, W7IMB, W7AEA, and W7IMB, respectively.

KAVP—临时 authority to rebroadcast transmissions of amateur radio stations W7LB, W7BHQ, W7IMB, W7AEA, and W7IMB, for a period of 15 minutes, from 7:30 to 10 p.m., on June 5, 1941, only.

WSAJ—Grove City College, Grove City, Pa.—Granted special temporary authority to remain silent for the period June 12 to 18, inclusive, in special emission (B-2-S-345).

The Cincinnati Times-Star Co., Cincinnati, Ohio.—Granted special temporary authority to operate relay broadcast stations WLWE and WŁWF licensed to the Crosley Corp. on 30820 kc. on June 13 and 14 only, in connection with golf tournament to be broadcast by WKRC (B-2-S-280).

WAAU—Columbus Broadcasting System, New York City.—Granted special temporary authority to operate relay broadcast station WAAU in an Eastern Airlines Plane flying over Birmingham, Ala., for purpose of relaying description of Air
Carnival for broadcast over station WAPI, Birmingham, on June 7 and 8.

W45D—The Eve, News Assn., Detroit, Mich.—Granted extension of special temporary authority to operate FM station commercially on 41500 kc., using 3 KW power for period of 30 days from July 5 ending August 3, pending installation and preparations necessary to operate the complete transmitting plant in accordance with construction permit (B2-PH-21) and modification (B2-MPH-3) without prejudice to determination of the issues in the hearing on Order 79.

W39B—The Yankee Network, Boston, Mass.—Granted special temporary authority to operate from 7:30 p. m. to conclusion of broadcast of High School Commencement Exercises on June 11, only (B5-S-825).

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Granted special temporary authority to operate FM station commercially on 14300 kc., 1 KW power, special emission for FM, using transmitter of FM experimental station WIXER at summit of Mount Washington, Sargent's Purchase, N. H., for period June 17 to July 16, 1941, pending completion of construction (B1-PH-11).

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Granted special temporary authority to operate from 7:30 p. m. to conclusion of broadcast of High School Commencement Exercises on June 11, only (B5-S-825).

W. C. Ewing and Harry Layman, d/b/a as Cumberland Broadcasting Co. (Assignor), and W. C. Ewing and T. K. Weyher, trading as Cumberland Broadcasting Co. (Assignee), for assignment of license of WFNC, Fayette, N. C., and W. C. Ewing and Harry Layman, d/b/a as Cumberland Broadcasting Co., for renewal of license of WFNC.—Granted petition to reconsider and grant without hearing their applications for consent to assignment of license and for renewal of license, respectively, of station WFNC; hearing scheduled for June 23 cancelled; and the application for renewal of license granted for 1570 kc., 250 watts daytime, and voluntary assignment of license to a new partnership was likewise granted (B3-AL-288 and B3-R-1070).

KGU—Marion A. Mulroy and Advertiser Publishing Co., Ltd., Honolulu, T. H.—Granted petition for leave to intervene in the hearing on the application of Hawaiian Broadcasting System, Ltd., Honolulu, T. H., for a new station. Denied petition to hold hearing on said application in Honolulu; said hearing to be held in Washington on July 28.

APPLICATIONS FILED AT FCC

600 Kilocycles

WICC—The Yankee Network, Inc., Bridgeport, Conn.—Authority to determine operating power by direct method.

610 Kilocycles

WAYS—Inter-City Advertising Co., Charlotte, N. C.—Modification of construction permit (B3-P-2878) for a new station, requesting approval of directional antenna, for day and night use.

620 Kilocycles

North Jersey Advertising Co., Elizabeth, N. J.—Construction permit for a new broadcast station to be operated on 620 kc., 250 watts, unlimited time. Amended: re corporate structure and finances.

630 Kilocycles

KVOD—Colorado Radio Corp., Denver, Colo.—Construction permit to install new transmitter and increase power from 1 to 5 K W, directional antenna for day and night use. Amended: to make changes in directional antenna for day and night use.

640 Kilocycles

WHNC—United Broadcasting Co., Columbus, Ohio.—Authority to determine operating power by direct method.

680 Kilocycles

WPTF—WPTF Radio Company, Raleigh, N. C.—Authority to determine operating power by direct method.

WPTF—WPTF Radio Company, Raleigh, N. C.—License to cover construction permit (B1-P-2319) as modified, for changes in directional antenna, request for new transmitter, increase power, and make changes in directional antenna for night use only.

WPTF—WPTF Radio Company, Raleigh, N. C.—License to use old RCA Type 1005-B 5 KW transmitter as an Auxiliary.

710 Kilocycles

WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.—Modification of construction permit (B1-P-2319) as modified, for changes in directional antenna system, for extension of commencement date from 1-1-41 to 7-1-41 and extension of completion date from 7-1-41 to 1-1-42.

WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.—Modification of construction permit (B1-P-2319) for changes in directional antenna, request for further changes in directional antenna and extension of commencement and completion dates to 60 days after grant and 180 days thereafter, respectively.

790 Kilocycles

KECA—Earle C. Anthony, Inc., Los Angeles, Calif.—Authority to determine operating power by direct method.

KECA—Earle C. Anthony, Inc., Los Angeles, Calif.—License to cover construction permit (B5-P-2698) as modified for increase in power and installation of directional antenna for night use.

810 Kilocycles

KOAM—The Pittsburg Broadcasting Co., Inc., Pittsburg, Kans.—Construction permit to change power and hours of operation from 1 KW daytime to 500 watts nighttime, 1 KW daytime, unlimited time, and install directional antenna for night use.

840 Kilocycles

WHAS—Courier-Journal and Louisville Times Co., Louisville, Ky.—Authority to determine operating power by direct method.

870 Kilocycles

WKAR—Michigan State College, East Lansing, Mich.—Authority to determine operating power by direct method.

WHCU—Cornell University, Ithaca, N. Y.—Authority to determine operating power by direct method.

880 Kilocycles

Fairfield Broadcasting Corp., Lancaster, Ohio.—Construction permit for a new broadcast station to be operated on 820 kc., 250 watts, daytime. Amended: To request 880 kc., 1 KW, changes in transmitting equipment, antenna, and make changes in finances.

910 Kilocycles

WGBI—Scranton Broadcasters, Inc., Scranton, Pa.—Authority to determine operating power by direct method.

WQAN—The Scranton Times (co-partnership), E. J. Lynett, Wm. R. Lynett, Elizabeth R. Lynett and Edward J. Lynett, Jr., Scranton, Pa.—Authority to determine operating power by direct method (auxiliary transmitter).

WRNL—Richmond Radio Corp., Richmond, Va.—Construction permit to install new transmitter, make changes in directional antenna for night use, and increase power from 1 to 5 KW. Amended: To request 910 kc. under NARBA and changes in directional antenna.

920 Kilocycles

KUSD—University of South Dakota, Vermillion, S. D.—Authority to determine operating power by direct method.

WBA—Purdue University, West Lafayette, Ind.—Modification of construction permit (B4-P-2604) as modified, for in-
stallation of new transmitter and directional antenna for night use, increase in power, change in hours of operation, and move of transmitter, requesting extension of completion date from 6-22-41 to 9-22-41.

WBAA—Purdue University, West Lafayette, Ind.—Authority to determine operating power by direct method.

WBBB—Alamance Broadcasting Co., Burlington, N. C.—Modification of construction permit (B3-P-3593) for a new broadcast station, requesting approval of antenna and approval of transmitter and studio sites.

930 Kilocycles

WPAT—North Jersey Broadcasting Co., Inc., Paterson, N. J.—License to cover construction permit (B1-P-2624) as modified for a new broadcast station.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Authority to determine operating power by direct method.

950 Kilocycles

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Authority to determine operating power by direct method.

1080 Kilocycles

KYOS—Merced Broadcasting Co., Merced, Calif.—Authority to determine operating power by direct method.

1130 Kilocycles

KWDM—E. F. Peffer, Stockton, Calif.—Authority to determine operating power by direct method.

1150 Kilocycles

KSWO—Willard Carver and Byrne Ross, Lawton, Okla.—Authority to determine operating power by direct method.

KWJW—Willard Carver and Byrne Ross, Lawton, Okla.—License to cover construction permit (B3-P-2664) as modified, for a new broadcast station.

WAPQ—W. A. Patterson, Chattanooga, Tenn.—Authority to determine operating power by direct method.

WJBO—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Authority to determine operating power by direct method.

1190 Kilocycles

KEX—Oregonian Publishing Co., Portland, Ore.—Authority to determine operating power by direct method.

1210 Kilocycles

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—License to cover construction permit (B2-P-3106) for installation of new auxiliary transmitter.

1230 Kilocycles

KAST—Astoria Broadcasting Co., Astoria, Ore.—Authority to determine operating power by direct method.

KVEC—Christina M. Jacobson, tr. as The Valley Electric Co., San Luis Obispo, Calif.—Authority to determine operating power by direct method.

WISE—Radio Station WISE, Inc., Asheville, N. C.—Authority to determine operating power by direct method.

WJOB—O. E. Richardson and Fred L. Adair, Hammond, Ind.—Voluntary assignment of license from O. E. Richardson and Fred L. Adair to O. E. Richardson, Fred L. Adair and Robert C. Adair. Amended: To change name of assignee from O. E. Richardson, Fred L. Adair and Robert C. Adair to O. E. Richardson, Fred L. Adair and Robert C. Adair, d/b/a Radio Station WJOB.

WLOG—Clarence H. Frey and Robert O. Grever, Logan, W. Va.—License to cover construction permit (B2-P-3109) for changes in equipment and increase in power.

WLVA—Lynchburg Broadcasting Corp., Lynchburg, Va.—Authority to determine operating power by direct method.

1240 Kilocycles

KDON—Monterey Peninsula Broadcasting Co., Monterey, Calif.—Authority to determine operating power by direct method.

KWJB—Barry T. Sims, tr. as Sims Broadcasting Co., Globe, Ariz.—Authority to determine operating power by direct method.

KWO—Tribune Printing Co., Jefferson City, Mo.—Modification of license to change frequency from 1310 kc. to 1210 kc.

WGGB—Harry H. Carman, Freeport, N. Y.—Authority to determine operating power by direct method.

WJEJ—Hagerstown Broadcasting Co., Hagerstown, Md.—Authority to determine operating power by direct method.

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—Authority to determine operating power by direct method.

WHAR—John W. Hauizes, Greenfield, Mass.—Authority to install new automatic frequency control equipment.

WMT—Francis M. Kadow, Manitowoc, Wis.—Authority to determine operating power by direct method.

WSAY—Brown Radio Service & Laboratory (Gordon P. Brown, Owner), Rochester, N. Y.—Authority to determine operating power by direct method.

1250 Kilocycles

KWSC—State College of Washington, Pullman, Wash.—Authority to determine operating power by direct method.

1260 Kilocycles

WNAC—The Yankee Network, Inc., Boston, Mass.—Authority to determine operating power by direct method.

1270 Kilocycles

WXYZ—King-Trendle Broadcasting Corp., Detroit, Mich.—Authority to determine operating power by direct method.

1300 Kilocycles

WASH—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Authority to determine operating power by direct method.

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Authority to determine operating power by direct method.

1310 Kilocycles

WIBA—Badger Broadcasting Co., Inc., Madison, Wis.—Authority to determine operating power by direct method.

WRR—City of Dallas, Texas, Dallas, Tex.—Modification of construction permit (B1-P-2279) for new equipment, increase in power, move of transmitter, and installation of directional antenna for night use, requesting extension of completion date from 6-30-41 to 9-30-41.

1320 Kilocycles

WATR—The WATR Company, Inc., Waterbury, Conn.—Modification of construction permit (B1-P-3532) for increase in power, installation of new transmitter, and changes in directional antenna for day and night use, requesting changes in directional antenna and extension of commencement and completion dates from 6-22-41 and 12-22-41 to 30 days after grant and 180 days thereafter respectively.

WEBC—Head of the Lakes Broadcasting Co., Duluth, Minn.—Authority to determine operating power by direct method, auxiliary transmitter.

1340 Kilocycles

KCKN—The KCKN Broadcasting Co., Kansas City, Kans.—Authority to determine operating power by direct method.

KCRJ—Central Arizona Broadcasting Co., Jerome, Ariz.—Authority to determine operating power by direct method.

KFPI—C. C. Baxter, Dublin, Tex.—Construction permit for authority to make changes in tubes in last radio stage.

KFWO—Plains Radio Broadcasting Co., Lubbock, Texas.—Authority to determine operating power by direct method.

KROS—Clinton Broadcasting Corp., Clinton, Iowa.—Modification of construction permit (B4-P-1907) for a new station, requesting approval of antenna, approval of transmitter and studio sites, and installation of new type transmitter.
KSUR—Southern Utah Broadcasting Co., Cedar City, Utah.—Authority to determine operating power by direct method.
WAIR—C. G. Hill, George D. Walker & Susan H. Walker, Winston-Salem, N. C.—Authority to determine operating power by direct method.
WCMJ—The Ashland Broadcasting Co., Ashland, Ky.—Authority to determine operating power by direct method.
WDMJ—Lake Superior Broadcasting Co., Marquette, Mich.—Authority to determine operating power by direct method.
WGH—Hampton Roads Broadcasting Co., Newport News, Va.—Authority to determine operating power by direct method.
WJMA—John and Marcia Arrington, d/b as Arrington and Arrington, Covington, Va.—License to cover construction permit (B2-P-3066) for a new station.
WJMA—John and Marcia Arrington, d/b as Arrington and Arrington, Covington, Va.—Authority to determine operating power by direct method.
WSOY—Commodore Broadcasting, Inc., Decatur, Ill.—Authority to determine operating power by direct method.

1350 Kilocycles

KID—KID Broadcasting Co., Idaho Falls, Idaho.—Authority to determine operating power by direct method.

1360 Kilocycles

KMO—Carl E. Haymond, Tacoma, Wash.—Authority to determine operating power by direct method.
WKAT—A. Frank Katzentine, Miami, Fla.—License to cover construction permit (B3-P-3120) to use formerly licensed W. E. 310-B, 250-watt transmitter as auxiliary and install new crystal oscillator.
WKAT—A. Frank Katzentine, Miami Beach, Fla.—Authority to determine operating power by direct method.

1380 Kilocycles

WAZW—Pillar of Fire, Zarephath, N. J.—Authority to determine operating power by direct method.
WAZW—Pillar of Fire, Zarephath, N. J.—Construction permit to install new transmitter and increase power from 1 KW day and night to 1 KW night, 5 KW day, directional antenna for day and night use.
WMBG—Havens & Martin, Inc., Richmond, Va.—Construction permit for changes in directional antenna system, for night use only. (Modified license granted for 5 KW, subject to filing this application.)

1390 Kilocycles

KLPM—John B. Cooley, Minot, N. D.—Authority to determine operating power by direct method.
WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—Modification of construction permit (B1-P-2523) as modified, for change in frequency, increase in power, and installation of directional antenna for night use and new transmitter, requesting authority to change type of transmitter and extend completion date 180 days after grant.

1400 Kilocycles

Air-Waves, Inc., Baton Rouge, La.—Construction permit for a new broadcast station to be operated on 1400 kc., 250 watts, unlimited time.
KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Authority to determine operating power by direct method.

1480 Kilocycles

KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—Construction permit to change frequency from 1480 kc. to 1060 kc., change power from 1 KW to 5 KW and 10 KW day, install a new transmitter, install directional antenna for night use, and move transmitter, Amended: to change requested location of transmitter.
KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—Authority to determine operating power by direct method.

1490 Kilocycles

KBIX—Oklahoma Press Publishing Co., Muskogee, Okla.—License to cover construction permit (B3-P-3112) for new transmitter, increase in power, and new frequency under NARBA.
KPLT—North Texas Broadcasting Co., Paris, Texas.—Authority to determine operating power by direct method.
KTOI—Garden Island Publishing Co., Ltd., Libby, Hawaii.—Authority to determine operating power by direct measurement of antenna power.
KVWC—Northwestern Broadcasting Co., Vernon, Texas.—Authority to determine operating power by direct method.
KXO—Valradio, Incorporated, El Centro, Calif.—Authority to determine operating power by direct method.
WMRF—Valradio, Incorporated, El Centro, Calif.—Authority to determine operating power by direct method.
WWRL—Long Island Broadcasting Corp., Woodside (L. L), N. Y.—License to cover construction permit (B2-P-2977) as modified for new broadcast station.
WNLN—The Sun Company of San Bernardino, California, Crestline, Calif.—Authority to determine operating power by direct method.
W2XCB—Columbia Broadcasting System, Inc., Portable-Mobile.—Modification of construction permit (B1-PV-46) as modified for new television relay station, requesting extension of completion dates from 7-7-41 to 1-7-42.
W6XLA—Television Productions, Inc., Portable-Mobile.—Modification of construction permit (B5-PV-73) for a new television station, requesting extension of commencement and completion dates from 1-5-41 to 10-15-41, respectively.
W9XCB—Columbia Broadcasting System, Inc., Chicago, Ill.—Modification of construction permit (B4-PV-74) for a new television station, requesting extension of completion date from 7-15-41 to 1-15-42.
W39B—The Yankee Network, Inc., Sargent’s Purchase, N. H.—Modification of construction permit (B1-PH-43) for a new high frequency broadcast station, requesting changes in antenna system and extension of commencement and completion dates from 12-31-40 and 6-30-41 to 60 days after grant and 180 days thereafter, respectively.
W75C—The Moody Bible Institute of Chicago, Chicago, Ill.—Modification of construction permit (B4-PH-5) for a new high frequency broadcast station, requesting change in coverage from 10,800 to 10,950 square miles and change in antenna system.

MISCELLANEOUS APPLICATIONS

Birney Imes, Tupelo, Miss.—Construction permit for a new broadcast station to be operated on 1210 kc., 250 watts, unlimited time. Amended: To change requested frequency from 1210 kc. to 1190 kc.

WQBC—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Modification of license to change frequency, power, and hours of operation from 1390 kc., 1 KW, daytime, to 1170 kc., 500 watts nighttime, 1 KW daytime, unlimited time.

Don Lee Broadcasting System, Berkeley, Calif.—Construction permit for a new high frequency broadcast station to be operated on 13550 kc.; coverage, 6980 square miles; population, 1,428,331. Amended: To change transmitter site; make changes in antenna system, change coverage to 18,050 square miles and population to 1,095,612.

King-Trendle Broadcasting Corp., Detroit, Mich.—Construction permit for a new high frequency broadcast station to be operated on 47300 kc.; coverage, 6900 square miles; population, 2,564,008. Amended: To change coverage to 6,750 square miles and population to 2,675,580.

The La Crosse Tribune Co., east of La Crosse, Wis.—Construction permit for a new high frequency broadcast station to be operated on frequency of 16500 kc.; coverage, 4,520 square miles; and population, 166,600.

National Broadcasting Co., Inc., New York, N. Y.—Authority to transmit programs to a foreign country; CMQ, Havana, Cuba, via International Broadcast Stations WCRA and WNBI.* PROGRAM—Recorded Spanish translation of the previous night’s news commentary by Raymond Gram Swing on Monday, Tuesday, Wednesday, Thursday, and Saturday evenings from 7:00 to 7:15 p. m., EST.

Tri-State Broadcasting Co., Inc., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 1622, 2658, 2150, and 2790 kc., 50 watts, A3 emission.

The Sun Company of San Bernardino, California, Crestline, Calif.—Construction permit for new high frequency broadcast station to be operated on 41100 kc.; coverage, 17,101 square miles; population, 853,524.

R. M. Wallace and G. E. Schnibben, d/b/a Norfolk County Broadcasting Co., Norfolk, Va.—Construction permit for a new broadcast station to be operated on 1490 kc., 250 watts, unlimited time, contingent on WBOC going to 1290 kc.

KOAY—Don Lee Broadcasting System, Portable-Mobile.—Modification of construction permit (B5-PRE-297) as modified, for a new relay broadcast station, requesting change in type of transmitter and extension of commencement and completion dates from 12-23-40 and 6-21-41 to 60 days after grant and 180 days thereafter, respectively.

KGD—Courtney, Inc., Portland, Ore.—Construction permit to change frequency from 1350 to 1140 kc., change hours of operation from daytime to unlimited time, using 1 KW day and night, and install directional antenna for night use.

WCBJ—Lehigh Valley Broadcasting Co., Portable-Mobile.—License to cover construction permit (B2-PRY-231) for a new relay broadcast station.

WNB—National Broadcasting Co., Inc., Bound Brook, N. J.—Modification of construction permit (B1-PB-28) as modified for change in frequencies, equipment and increase in power, requesting extension of completion date from 6-19-41 to 6-8-41.

* NBC studios at 30 Rockefeller Plaza, N. Y.
The complaint alleges that in newspaper, radio and other advertising matter the respondent has represented that its apparatus may safely be used by the unskilled lay public in treating self-diagnosed diseases and ailments by individual self-application in the home, without waiting for professional supervision. In support of the complaint, the respondent has represented that its device is a scientific, safe, harmless and effective means for treating rheumatism, arthritis, sinus, hay fever, laryngitis, neuritis, high blood pressure and some thirty other diseases and pathological conditions, and that use of the device will have no ill effects upon the user.

The complaint alleges that the individual self-application of the respondent's device by unskilled persons in the home, either under conditions prescribed in the advertisements or under customary or usual conditions, will not accomplish the results claimed and is not a scientific, safe, harmless or effective means for treating the ailments or conditions mentioned.

Pointing out that there are many diseases and conditions in which diathermy is contra-indicated and in which its use will aggravate the disease and be injurious to health, the complaint charges that the advertisements disseminated by the respondent are false in that they fail to reveal that the device may be safely used only after a competent medical authority has determined, as a result of diagnosis, that diathermy is indicated, and that prescribed frequency and amount of application of the device and that the user has been adequately instructed by a trained technician in the operation of the device. (4501)

**Graphic Arts Club of Charlotte, Inc.**—A complaint has been issued charging the Graphic Arts Club of Charlotte, Inc., Charlotte, N. C., its officers and directors and 14 member commercial printing companies in Charlotte, with entering into and carrying out agreements, combinations and conspiracies to suppress competition and create monopoly by fixing and maintaining uniform prices and discounts in the interstate sale of printed products.

The complaint charges that pursuant to their agreements and combinations the respondents fixed and maintained uniform prices and discounts for printing and engraving products for publication in newspapers and magazines and that certain of the member respondents are in no danger from carbon monoxide gas escaping from open mufflers or carbureters. Furthermore, the complaint alleges that photographs which they loan the respondents for reproduction, are produced at a high cost and are superior to those offered for sale by other manufacturers and vendors; and that the products are coated with a metallic finish which permanently prevents rust and corrosion, when such are not the facts. (4513)

**Master Artists’ Association, Inc.**—A complaint has been issued charging Eugene M. Woolard, trading as Master Artists’ Association, Inc., East St. Louis, Ill., and 12 business associates, with violation of the Federal Trade Commission Act in the sale of tinted or colored enlargements of photographs or snapshots and the frames for such pictures.

According to the complaint, the respondents, under the control and direction of the respondent Woolard, and pursuant to various understandings, agreements, combinations and conspiracies, visit prospective customers in various parts of the country to sell the respondents’ products, making various representations, among which are that they are advertising agents of an association of artists known as Master Artists’ Association, Inc. and that the respondents’ products are “paintings”, “hand-painted portraits” or “original works of art.”

The complaint alleges that the respondents’ representations are deceptive and misleading; that the Master Artists’ Association, Inc. is not and never has been an art association but is a business enterprise, and that the pictures sold by the respondents are not portraits or paintings but cheap, quickly made photographic enlargements.

The complaint further alleges that the respondents’ selling methods are directed primarily at selling picture frames at exorbitant prices. According to the complaint, they conceal from prospective customers that the portrait, which is ordered, is one of a series of standard portraits, that the finished product will be delivered in a peculiar, convex form, shape and size, and that it will be impossible for the customer thereafter to obtain a frame to fit the “portrait” except from the respondents and at prices which they fix.

The complaint charges that purchasers are given the impression that photographs which they loan the respondents for reproduction will be returned upon delivery of the finished picture. However, according to the complaint, the respondents, in many instances where the purchaser refuses to buy a frame, retain the loaned photograph and refuse to deliver the finished picture, regardless of whether or not it has previously been paid for in full, until a frame is ordered or a claimed balance is paid in full. (4514)

**Mineral Wells Crystal Producers, Inc.**—A complaint has been issued charging Mineral Wells Crystal Producers, Inc., of Mineral Wells, Tex., with misleading representation in the sale of mineral crystals intended for use in treating diseases.

According to the complaint, the respondent advertises as follows: “Mineral Wells Crystal Producers, Inc., Manufacturers, Certified Mineral Crystals—Mineral Wells Crystal, ‘The Doctor’s Rock’; ‘Made from Texas mineral water’; ‘Here’s to Health, Use Certified Mineral Crystals’; ‘* * *’.”

Through these and other representations, the complaint alleges, the respondent represents that its mineral crystals are produced exclusively from mineral water obtained in its natural state from the earth at or in the vicinity of Mineral Wells, Tex., and that such product has been endorsed as to quality and fitness by some governmental, scientific or other recognized agency empowered and qualified to certify as to the product’s attributes.

International Parts Corporation, 1514 South Michigan Ave., Chicago, is charged, in a complaint, with misrepresentation in the sale of replacement mufflers for use on automobiles.

The complaint alleges that in catalogs, prospectuses and other printed matter the respondent represents that its mufflers have “Electric welded seams throughout—not locked, crimped or spot-welded,” and that the occupant of a car equipped with a locked-seam, crimped or spot-welded muffler is in danger of injury from carbon monoxide gas through leakage of exhaust gases through the seams.

The complaint further alleges that the respondent’s mufflers are in fact spot-welded. According to the complaint, occupants of a car equipped with a locked-seam, crimped or spot-welded muffler are in no danger from carbon monoxide gas escaping from openings of the seam in the muffler as such methods of manufacture produce seams equally as effective as that used by the respondent in preventing the escape of exhaust gases. Furthermore, the complaint alleges, the escape of exhaust gases through a defect in the seams of the muffler of a car would not place the occupants in danger of carbon monoxide injury.

According to the complaint, the respondent also represents that its mufflers increase gas mileage; that the baffle-plates in its mufflers are a new engineering achievement; that because of their design and construction its mufflers are superior to all other mufflers and that they are offered for sale by other manufacturers and vendors; and that its products are coated with a metallic finish which permanently prevents rust and corrosion, when such are not the facts. (4513)
The complaint charges, however, that the respondent's product
is not processed from mineral water obtained in its natural state
in the Mineral Wells, Tex., vicinity, nor is it made directly from
Texas mineral water or any other natural mineral water. On the
contrary, according to the complaint, the preparation is produced
by mixing ordinary city water with commercial chemicals, heating
the solution until it reaches a proper gravity and then cooling the
concentrate in refrigerated compartments. The complaint alleges
that the product is not properly described as "Certified" because
it has not been endorsed by qualified authorities.

The complaint further alleges that the respondent's use of the
words "Mineral Wells" as part of its corporate name constitutes a
false and misleading representation that its product is produced
from mineral water obtained from the wells at Mineral Wells,
Tex., which are favorably known for their mineral water contain-
ing certain constituents. (4512)

Parfum L'Orle, Inc.—Charging unfair and deceptive practices
in the sale of perfumes and related products, a complaint has been
issued against Parfum L'Orle, Inc., 6 East 39th St., New York.
The complaint alleges that the respondent represents, directly or
by inference, through use of its corporate name "Parfum L'Orle,
Inc." and of French names for its perfumes and the names
"London" and "Paris," in advertising or other printed matter, that
it is a French company; that it has offices and business connections
in London and Paris, and that its products are made or com-
ounded in France and imported into the United States, when
in fact the respondent is not a French company and does not have
the foreign connections indicated, and its products are made in
the United States.

According to the complaint, the respondent's sales plans in-
clude the furnishing to dealer-customers of so-called "re-order
blanks" and other printed matter containing in parallel columns
a list of the French names of the respondent's products opposite
a list of trade names of certain well known perfumes manufac-
tured by others. The complaint alleges that the respondent has
attempted to show a marked similarity in odor between its own
products and the well known perfumes listed and that it uses
the parallel lists in a plan to fill orders for perfume with its own
products instead of the well known perfumes listed. (4511)

CEASE AND DESIST ORDERS

Following cease and desist orders have been issued by the
Commission:

Altman Neckwear Corporation, 333 Fifth Ave., New York,
has been ordered to cease making misleading representations
in the sale of neckties and other similar merchandise.

Commission findings are that the respondent sells one style of
neckties labeled "Cherokee Indian Homespun Wool" with the
 likeness of an Indian depicted thereon, when in fact these ties are
not made from materials woven or manufactured by the
Cherokee or any other Indians. Another style of tie is labeled
"Duo-Silk-All-O Lined Throughout," when in fact these ties are
not made entirely from silk but, instead, the tie materials consist
of a mixture of silk and rayon, usually with rayon predominating,
and with a lining of rayon and an interlining of wool or cotton.
The Commission order directs the respondent to cease using the
unusual term "Duo-Silk" or other terms of similar meaning to
designate any fabric or product not composed wholly of silk;
provided that such terms may be used as descriptive of the silk
content of fabrics or products composed in part of silk and in
part of other materials if accompanied in conspicuous type by
words truthfully designating each constituent fiber or ma-
terial including the rayon in equally conspicuous type.

The respondent also is ordered to cease employing the term
"Duo-Silk-All-O" or other terms of similar meaning on labels or
otherwise to refer to fabrics or products not composed wholly
of silk.
The order further prohibits the advertisement or sale of neckties
or other products composed wholly or partly of rayon without
clearly disclosing the rayon content and, in the case of fabrics or
products composed partly of rayon and partly of other fibers or
materials, truthfully designating each constituent fiber or ma-
terial including the rayon in equally conspicuous type.

The respondent is further directed to cease using the term
"Cherokee Indian Homespun Wool" or other terms of similar
meaning on labels or otherwise to describe a fabric or product
not woven or manufactured by the Cherokee Indians; to cease
employing any pictorial design of an Indian in connection with
the sale of neckties and other similar merchandise.

Joseph Glueck & Co., Inc., 305 Seventh Ave., New York,
importer and distributor of neckties, has been ordered to cease and
desist from employing the term "Cherokee" or any term which
includes it or any colorable simulation thereof, or other term of similar meaning on labels or otherwise to designate fabrics or products not made by the American
Indian. (4226)

Art-Web Manufacturing Co., Inc., 86 Meserole St., Brooklyn,
A. M. Webb & Co., Inc., 93 Worth Street, New York, and Leon
J. Isaacs and Jesse Kohm, owners and officers of the capital stock,
of the two corporations, have been ordered to cease and desist
from misleading representations in the sale of wearing apparel.

Commission findings are that the respondents sold polo shirts
labeled with the words "Edward VIII Sportwear "Fit for a King"
supplied by pictorial representations closely resembling the
British Royal Crown. These products, according to findings,
were packaged in containers bearing similar wording, with a
depiction simulating the British Royal Crown and the word and
figures "Edward VIII".

According to findings, during part of the time that the respond-
ents were using these designations Edward VIII was King of Great
Britain. The labels used by the respondents represented and
implied approval of the respondents' products by a member of the
British royal family and that the goods bearing the labels were
of English manufacture and imported into this country, when
such was not the fact.

The Commission order directs the respondents to cease using the
designation "Edward VIII", either separately or in conjunction
with any pictorial representation simulating the British crown,
as a label for, or to designate or describe, any article of wearing
apparel; or otherwise to represent or implying that such products
are of British manufacture, or imported from Great Britain, or
have the approval of or warrant from any member of the British
royal family. (3471)

Sol. Raphael, Inc., 333 Seventh Ave., New York, an importer
and distributor of neckties, has been ordered to cease and desist
from certain representations in the sale of his products.

The Commission order directs the respondent to cease using the
words "Khandah," "Aristan," "Karachi," "Numdah," "Cal-
or "Chinese," or any other words or names indicative of the Orient, or pictorial representations of a star and crescent simulating the Turkish emblem, or other Oriental emblems, to designate rugs not made in the Orient
and which do not possess all the essential characteristics and struc-
ture of the type of Oriental rug which they purport to be.

Stephenson Laboratories Trust, also trading as Stephenson
Laboratory, 5 Irvington St., Boston, has been ordered to cease and
desist from misleading representations in the sale of licenses
to manufacture foot supports and foot exercisers, and of corre-
spodence courses in the treatment of foot troubles.
Commission findings are that the respondent represented in periodical and circular advertisements that its devices, corrective system and instruction are developed and disseminated by a "laboratory"; that persons of ordinary intelligence mastering its courses are able to distinguish between surgical and non-surgical foot conditions; and cure all foot troubles not requiring operative surgery, and that such students of its system can earn large incomes, when such are not the facts.

The Commission order directs the respondent to discontinue employing the term "Laboratory" or "Laboratories" or other terms of similar meaning in its trade names, or in any advertisement it uses in the conduct of its business, or otherwise representing that it maintains a laboratory in which its system of foot culture or instruction courses in that subject were or are developed or prepared.

The respondent further agrees to cease representing that its course will equip anyone with learning and proficiency adequate to: (1) diagnose and determine whether or not foot troubles require surgical treatment; (2) effectively and successfully treat non-surgical foot troubles, regardless of the origin or cause; and (3) effectively and successfully treat foot troubles which may result from systemic causes, such as achy feet, excessive or insufficient perspiration, foot neuralgia, painful heel, and enlarged joints; or foot troubles which may require operative surgery, such as Morton's toe, hammer toe, and bunions; or foot troubles which require immobilization as a part of any competent treatment, such as stretched ligaments, exclusively by foot supports and exercise.

The Commission order further directs the respondent to cease representing that any purchaser who masters its correspondence course is assured of a profitable business or will be able to obtain trade without solicitation, delay, or expense. (3622)

Wood & Hyde Co., Groversville, N. Y., manufacturer of glove leathers, has been ordered to cease and desist from violation of the Federal Trade Commission Act in the sale of its leather.

Commission findings are that the respondent uses the trade name "Kinkid" in connection with branding, labeling and advertising part of its products made from "cape skin" and "cabretta" sheepskin leathers; that many of its best pieces of leather sold and shipped to glove manufacturers bear the "Kinkid" label; that various glove manufacturers using the respondent's glove leathers are supplied with "Kinkid" transfer stamps for stamping the name "Kinkid" on the inside of gloves manufactured by them from such products, and that the respondent's use of the name "Kinkid" tends to lead consumer-purchasers into believing that such gloves are made from genuine kidskin.

The Commission order directs the respondents, in connection with the sale of glove leathers and other similar products, to cease and desist from using the word "Kid" or other words of similar meaning, alone or in combination with any other words, in advertising or otherwise, to describe or refer to any leather product which is not made from the skin of a young goat; and to cease employing the term "Kinkid" or any other term which includes the word "Kid" or any colorable simulation of it, or using other terms of similar meaning on labels or otherwise, to designate or refer to any leather product not made from the skin of a young goat. (4235)

STIPULATIONS

The Commission has entered into the following stipulations:

Adolph's Beauty Products Co.—Adolph R. Phillips and Daniel B. Scott, Jr., trading as Adolph's Beauty Products Co., 330 North Fifth St., Philadelphia, entered into a stipulation to cease advertising that their preparation "Formula-X," consisting of two medicinal preparations known as "Formula-X Liquid" and "Formula-X Pomade," will cause hair to grow or is of value in the treatment of dandruff and eczema in excess of temporarily relieving itching, and that this product is of value in the treatment of falling or brittle hair. The respondents further agree to cease and desist from disseminating any advertisement of Formula-X Liquid which fails to reveal that unless used in specified proper dilution it would cause a marked local inflammation or other injury. The stipulation provides, however, that the advertisement need contain only a statement that the preparation should be used only as directed on the label, if the label contains the proper cautionary language. (02802)

Lucky Tiger Manufacturing Co., Sixth and Delaware Sts., Kansas City, Mo., entered into a stipulation to cease advertising that either of its products known as "Lucky Tiger" and as "Lucky Tiger with Oil" removes the causes of dandruff or has therapeutic value in treating it in excess of temporary removal of loose dandruff scales; that either product will permanently stop scalp itching; that either preparation represents a part of the "Ne-Wa-Te Native Herbal Treatment," will reduce or prevent the loss of hair or eliminate or end scalp disorders, and that no competitive product will produce like results. The respondent further agrees to cease representing that "Lucky Tiger" removes the cause of or cures dry hair or that "Lucky Tiger with Oil" removes the cause of, cures or affects any condition other than by supplementing with oil to relieve the condition temporarily. (02801)

Midget Radio Co.—W. P. Beshore, C. S. Beshore, D. L. Beshore, and P. S. Beshore, co-partners trading as Midget Radio Co., Kearney, Neb., entered into a stipulation to cease certain representations in the sale of radio sets. The stipulation is supplemental to one accepted by the Commission in July, 1937, from Tinytone Radio Co., a corporation formerly owning and operating the business method in which the respondent co-partners were officers or directors.

Under the supplemental stipulation the respondents agree to cease representing that their crystal type of midget or pocket radio receiving set is other than a crystal or crystal type set or is "wireless"; that the dial of this radio is of such luminosity as to be visible in the dark, or will afford perfect tuning; that this radio is guaranteed, without setting forth all essential terms and conditions; that this radio, as newly designed, weighs between one and one-quarter ounces or is smaller than the ordinary cigarette package; and that all competitive crystal radio sets with walnut cabinets are of the same quality and value, or that any of such sets retailing for more than 69 cents are necessarily excessively priced.

The respondents further agree to cease making any statements which misrepresent the quality or value of competitive sets or which otherwise falsely disparage such sets. (01798)

Monongahery Ward & Co., entered into a stipulation to cease certain representations in the sale of "Wards Supreme Electric Fence Controller" and "Wards Standard Electric Fence Controller." Under its stipulation, the respondent agrees to cease representing that the use of its electric fence controllers is a positive or certain method of confining livestock or that use of these devices will prevent the escape of livestock under all conditions, and that the respondent's electric fence controllers or fences require no attention, care or maintenance service.

The respondent corporation further agrees to cease from advertising that the use of its controllers will effect any stated amount or percentage of saving in "farm fencing costs" as compared with the costs of other types of fences, without stating the type or types of fence used as a basis for such comparison, and without taking into consideration in such comparison all costs including both initial costs and costs of maintenance.

The respondent also agrees to cease representing that all parts necessary for construction of an electric fence cost two cents a rod or any other amount less than the actual cost of construction, and that its electric fence controllers automatically adjust voltage, amperage or time interval of the electrical charge in a fence necessary for varying conditions of operation. (02797)

Ne-Wa-Te Company.—Osco F. Fox and W. Harvey Patterson, trading as Ne-Wa-Te Co., Greenville, S. C., has entered into a stipulation to cease representing that "Ne-Wa-Te Native Herbal" is an effective treatment or competent remedy for stomach, liver and kidney diseases and other ailments, and that the use of the
Paramount Hosiery Co.—Holland E. Shoaf and Robert Shoaf, trading as Paramount Hosiery Co., Lexington, N. C., entered into a stipulation to cease certain representations in the sale of hosiery, lingerie, or other textile fabrics.

The respondents agree to cease using the words "Silk," "Satin," "Crepe," "Chiffon," or other silk-connoting words to describe a product not composed of silk, and, when the silk content of a product consisting partly of silk and partly of other fibers or material is properly described by the word "Silk" or other silk-connoting word, to accurately designate each constituent fiber or material in equally conspicuous type in the order of its predominance by weight.

Under their stipulation, the respondents further agree to cease advertising, branding, labeling, invoicing or selling products composed wholly or partly of rayon without clearly disclosing the rayon content by use of the word "Rayon," and without disclosing in type equally conspicuous as the word "Rayon" each constituent fiber in the order of its predominance by weight when a product consists partly of rayon and partly of other fibers or materials.

The respondents further agree to cease representing as the customary prices of their product prices which are fictitious and in excess of the regular prices. (3123)

Ray Products Co.—Marvin W. Ray, trading as Ray Products Co., 80 Federal St., Boston, stipulated that he will cease advertising his preparation for treating hosiery and lingerie known as "Marv-Ray" as being a mysterious new preparation or new discovery. The respondent further agrees to cease representing that "Marv-Ray" stops runs in women's hosiery or banishes forever imperfections in hosiery or other wearing apparel and will discontinue using the word "slightly" as modifying the word "imperfect" or in any manner so as to imply that imperfections in hosiery or other wearing apparel are slight or negligible when, in fact, they are such as to be improperly referred to by the word "slightly." (3126)

Paul Rieger & Co., trading as Dorothy Boyd Art Studios, 220-230 Commercial St., San Francisco, selling pajamas, kimonos and other apparel for women, entered into a stipulation to cease using the words "Silk," "Silk Crepe," "Silk Pongee," or "Satin," alone or in combination with other words of similar meaning to describe any fabric or other product not composed wholly of silk.

The stipulation provides that such terms may be used to describe the silk content of fabrics or products composed in part of silk and in part of other materials if they are accompanied in conspicuous type by words truthfully designating each constituent fiber or material. The respondent further agrees to cease representing that it imports any article, when such is not a fact. (02799)

John Sheu Co., trading as Shea Feed Stores, 53 Railroad St., Lawrence, Mass., entered into a stipulation to cease advertising that the feeding of "New England Economy Laying Mash" to hens will cause the resulting eggs to be better tasting, larger, better shaped or more uniform in color, than eggs produced when hens are fed other similar products. The respondent further agrees to desist from representing that the feeding of this mash will develop a proper gizzard or purify the entire system of the bird and will produce high gear egg production at all times. (02800)

United Radio Co.—Herman Lubinsky, 58 Market St., Newark, N. J., stipulated that in the sale of radio accessories he will cease representing by any specified sum or in any other manner that the regular price of any product is any amount in excess of the price for which the article is regularly sold; that the price of any article is a special price when in fact it is the regular price, and that any article cannot be purchased elsewhere for less than the represented amount, when such is not a fact. The respondent Lubinsky further agreed that when the former price of an article is quoted, he will with equal conspicuousness disclose the fact that such price was the price of the article before it became obsolete. (02798)

Waltham Pen Co.—Joseph Starr and William Starr, co-partners trading under the names Starr Pen Co., and Waltham Pen Co., 300 West Adams St., Chicago, have entered into a stipulation to cease certain representations in the sale of fountain pens.

According to their stipulation, the respondents adopted the name "Waltham Pen Co." as one of their trade names and used the name "Waltham" in a manner tending to cause the belief that their "Waltham" fountain pens were manufactured and guaranteed by the Waltham Watch Co., well known watch manufacturer. Under their stipulation, the respondents agree to cease using the word or name "Waltham" in connection with or as part of their trade name or as a brand or label for fountain pens, and to desist from the issuance and dissemination of "Life Time Service" certificates or "Guaranteed for Life" certificates as pertaining to such merchandise; or the designation of any representation or agreement as a guarantee, guaranty or warranty which involves a service charge or calls for payment of additional money by the purchasers of the merchandise.

The respondents further agree to cease using purportcd retail selling prices which are fictitious and in excess of the customary prices asked for the pens, and to discontinue representing that the respondents manufacture such pens. (3124)
SENATOR WHEELER SAYS RADIO LAW SHOULD BE AMENDED

Senator Wheeler, Chairman of the Senate Committee on Interstate Commerce, during testimony today before the Committee by William S. Paley, president of the Columbia Broadcasting System, said he thinks the radio law ought to be amended and intimated that a new bill might be introduced. He suggested that a way might be found through court procedure for staying the effective date of the new FCC rules.

For several weeks the Committee has been holding hearings on a resolution to investigate the broadcasting industry introduced by Senator White, of Maine, following promulgation by the Federal Communications Commission on May 2 of regulations drastically affecting network broadcasting.

“What’s the Rush Here?”

In his testimony, Mr. Paley pointed out that there is no wide-spread public demand for any such radical procedure as that followed by the FCC, and said the industry is asking, “What’s the rush here?”

He reminded the Committee that the Federal Communications Act was passed 14 years ago and that in the meantime radio broadcasting in the United States had grown swiftly in national importance. Now, he asserted, the FCC has decreed new rules, effective 90 days from the date of promulgation, and that he and his associates, “were at a loss as to how to operate a network successfully” under them.

Senator Wheeler said he did not want to be understood as agreeing entirely with the Commission’s report, in which the new rules were embodied. He agreed there was need of clearing up some points in the present radio law. If a new bill is introduced, he added, there would be hearings on it. If there are any objections to points in the law, the industry could appear so that all such points would be threshed out.

Mr. Paley declared he was appearing primarily to urge that Congress enact a new radio law.

Paley’s Suggestions for Legislation

“There are four things,” he asserted, “that I think it is most important to have in that new law:

“First of all, I think that radio networks should be licensed by the Commission.

“Second, I think fairness in dealing with controversial questions and with news, already voluntarily adopted as the code of practice by the vast majority of networks and stations, should be made a condition to having or holding a network license or a station license.

“Third, I think the powers and duties of the Commission should be very much better defined than they are today, so that the Commission will know exactly what the Congress desires it to do and so that we broadcasters will know exactly what it is empowered to direct us to do.

“Fourth, I think, because of the grave danger of a Commission abusing the licensing power over the most important single means of mass communication in America with the inevitable ultimate effect of destroying freedom of the air, there should be a Commission divorced from the common carrier field, with which the regulation of broadcasting is now intertwined. Also there should be clear and specified provisions for proper judicial review which cannot be evaded by subtle legal technicalities either by the Commission or by any broadcaster.”

Need for Licensing Networks

On licensing of networks, Mr. Paley recalled that no one foresaw when the radio law was first enacted that network broadcasting would become such a major part of radio in the United States. So swiftly has broadcasting developed, he said, that the 14 years since the law was enacted “may well be the equivalent of 50 years in an older and less dynamic industry.”

Radio’s popularity both with the listening audience and with advertisers shows, he added, that it has developed along the lines most acceptable to the American radio audience.

“While all this has been happening,” Mr. Paley asserted, “the Commission seems to have been obsessed in its whole thinking by the fact that it is radio stations and not networks that hold the licenses. It seems to feel that under the circumstances the success of the networks must be in some way improper. From this they have gone on to reason that virtually every practice which we in long experience have found to be essential is wrong and must be stopped regardless of the effects on programs and the public service.

“That is why I said to you at the very outset that I think the time has come when the Congress should recognize the validity of networks and should license them.

“Once they are licensed it should cease to be fashion-
able in Commission circles to indicate that they are an illegitimate factor in the industry or that in any sense they are evading their responsibilities or inducing licensees to evade theirs.

Broadcasting has never been, Mr. Paley said, a recalcitrant or defiant industry, nor is it now. "We are perfectly willing," he added, "to abide by the decision of the Congress if it will only make an unprejudiced examination of all the facts and then tell us the answer. The very fact that in the things it seeks to do right now the Commission seems to find it necessary to slip through the back door and strike at us through the licensing power it holds over our affiliated stations is proof that there is something inadequate in the statute itself."

By being licensed under a properly drawn statute, the status of the network, Mr. Paley believes, will be recognized and its rights safeguarded.

**Fears Oppression**

In regard to making fairness a condition to having or holding a license, Mr. Paley pointed out that he had advocated this six years ago and added that he believes it more emphatically now than then.

"If this policy is not set and implemented by the Congress, I fear, from what I have observed in the past few years, that we will drift into an exercise of vague and undetermined powers by the Commission. I can even see conditions under which such vague powers can be used by a Commission, however confident it may be in the righteousness of its own intentions, as an instrument of oppression and a threat to genuine freedom of the air."

Powers and duties of the Commission should be better defined, Mr. Paley stated, because "any responsible business would always rather obey a law than obey a man."

"Certainly there has been ample evidence that some who have appeared here and the members of this Committee itself differ on the meaning of the law and the powers of the Commission. The Commission at times seems to rely upon a vague phrase here and there in the statute in seeking to exercise constantly broader powers."

**Not Common Carriers**

His fourth recommendation, the need for divorcing the Commission which administers the broadcasting law from the administrative body dealing with common carriers, such as the telephone and telegraph companies, has long been apparent to some students of broadcasting, Mr. Paley said.

"Congress," he pointed out, "very wisely decreed in the beginning that we were not common carriers subject to the precise and minute kind of regulation appropriate in that field. Yet a single group of men is now trying every day to think one minute in terms of that kind of common carrier regulation and in the next minute to think about the mere licensing regulation of a non-carrier which is in part a business and in part an art which deals so incessantly with public affairs."

"The passage of the White resolution will give this Committee and the Congress an opportunity to investigate and determine whether in the public interest there should be a separation of these two fields of activity, one calling for close and detailed regulation and the other calling for a large measure of unrestricted freedom."

As to judicial review, he said that "it does seem to me that it should be possible and that it certainly is desirable for Congress to make the legal rights in this field crystal clear. There should not be any chicanery or evasion or technical fencing in such an important matter."

"I do not believe that a sensible businessman today wants to use the courts just to create delay. What he really wants to do is find out where he stands and to know that there is reasonable protection against infringement of his rights. That is all we ask in this respect, and certainly the present Act does not seem to afford us that much."

In advocating network licensing and a new radio law, Mr. Paley said he did not want to create the false impression he was suggesting the industry should be put "into a strait-jacket of hampering and restricting regulation."

The industry could neither grow nor render the fullest public service in that way, he added, and "the harm that would be done to a medium of free expression and creative programming would be far greater than any theoretical good that might be accomplished."

Saying that the Commission had come into being because there had to be a "sort of traffic policing of the air," Mr. Paley asserted he thinks the new law should, in effect, limit the Commission to three things:

1. To doing this unquestionably necessary traffic job.
2. To insuring that the medium is used fairly and without editorial bias.
3. To reviewing the operations of any network or station and making a broad general decision based upon competent evidence as to whether that network or station is operating in the public interest."

**Stations Now Benefit**

As far as Mr. Fly's charge of monopoly is concerned, Mr. Paley said that under the existing physical situation there is, of course, a limit on radio facilities, and that as a result there is a corresponding restriction on the number of networks that can compete with each other.

"There is no testimony whatsoever," he declared, "except the suppositions of Chairman Fly that this condition has harmed the public. It is scarcely conceivable that a greater number of networks using the existing facilities, and therefore each reduced to scant resources, would have served the public better."

"Certainly money-wise the public has not been hurt because the public in America gets radio broadcasting service free. It is equally evident that the advertiser has not been hurt because he weighs our medium against other competitive media with extreme care and has over a period of years spent an increasing amount of money for network broadcasting. When Congress makes a thorough study of this subject, as eventually it must, I am sure it will find that the stations generally instead of being hurt have been economically benefited by the present system of operation."

The testimony so far in the hearings has not only failed to reassure him and his associates, Mr. Paley said, but has made them more uneasy.

"The repeated, easygoing assurances of Mr. Fly to the effect that he will take care of everything and that everything will be all right, despite his evident difficulties encountered in these very hearings in applying his theoretical reforms to the problems of practical operation, do not jibe with my practical experience over many years."
"I want to tell you that if a surgeon suddenly decided to cut off my leg without giving me an anesthetic, his assurances that he was performing a minor operation and that no substantial injury to my person was intended would neither ease my pain nor save me from spending the rest of my life on crutches."

The statement of Mr. Fly that "two men control 86 per cent of the nighttime power of broadcasting in the United States" was characterized by Mr. Paley as an "unjustified accusation," and "demagogic" twisting of the fact that "most of the radio stations in America turn to the best program services."

The real heart of this "charge of domination," Mr. Paley asserted, "is the implication that the networks either can or do somehow manipulate public opinion to serve their own ends or the ends of favored persons or causes. This whole charge is false.

"The public today is too well educated for any broadcaster even to dare to try to use his facilities for sinister purposes. Public opinion will stop him, the code will stop him, and Congress certainly could, would and should if it ever became necessary."

In trying to create this "bogy man," Chairman Fly and the Commission in its report overlook, according to Mr. Paley, the fact that the local station has access to the news of the press associations, the local newspapers and the news and views of its local community. Under these circumstances, he asked how it would be possible for the networks to "dominate and control" public opinion.

**Describes CBS Operations**

The operations of Columbia were described by Mr. Paley, who said CBS had more than 2,000 employees in general management, sales, engineering, advertising, publicity, sales promotion, research, administrative and creative program functions and supervision.

CBS is set up, according to Mr. Paley, to originate programs in various parts of the country, principally at the key stations in New York, Chicago and Los Angeles, and to pick up programs from outside points, sometimes producing and broadcasting as many as four different programs to different sets of stations at the same time.

He described the care taken to maintain a balanced program service, without too many programs of the same kind or an overweighing of commercial programs.

CBS network overhead, he said, is more than $10,000,-000 a year, not including payments to stations for commercial programs, and sustaining programs alone cost more than $500,000,000 a year, the network agreeing to provide in most instances a minimum of 60 hours of sustaining programs a week to affiliates, which are not required to take any of these programs unless they wish to do so.

Moreover, the local station, Mr. Paley declared, can always displace a network commercial program with any event of local interest it wants to carry on a sustaining basis.

"The exclusive arrangement here," Mr. Paley told the Senators, "is a two-way street. The station and the network agree with each other that it is in their mutual interest to operate in this way. Neither is compelled to make the bargain."

When the contract is terminated, either party is free to negotiate for new terms or new arrangements, and, he added, more often than not it is the station which is more insistent upon exclusive and long-term contracts because it knows the network will not then switch to another affiliate.

**Station Network Income Increasing**

"In 1931," said Mr. Paley, "the independent stations affiliated with us received 21.53 per cent of the income we received from the sales of these stations on commercial hookups. In 1940 this percentage had risen to 45.58 per cent. Thus in 10 years the stations' receipts had more than doubled percentage wise. This hardly sounds as if they were helpless captives with no bargaining power."

Mr. Paley said that national advertisers have invested so heavily in radio advertising only because they were assured of time for their programs and a nationwide audience, adding that he thinks the Commission has failed to grasp this fundamental of how broadcasting and advertising work. The advertiser must plan his program and time requirements well in advance, and Mr. Paley asserted he would not be able to do this under the new rules.

Against the background of the CBS operations, Mr. Paley took up the rules in detail. Before adjournment he covered only three: the rule forbidding a station to contract exclusively with only one network, that forbidding a station to contract for a network's exclusive services in a particular territory, and that forbidding the present arrangement under which a network has an option on a certain portion of the time of a local station.

The Commission, he declared, forbids "exclusivity anywhere in the country and under all circumstances, even in places like New York, Chicago and Los Angeles where there are three or four times as many stations as there are networks."

Some markets, he went on, will support only two stations just as some towns will support only two newspapers or movie houses or restaurants.

**Says Rules Would Hit Smaller Stations**

If two stations in a town make their facilities available to all four networks as the new rules provide, instead of to two networks, as is the existing practice, he reminded the Committee that each network would receive only half the income possible at present. Multiply this by 50 stations, he said, and the reduction in income would be considerable with a corresponding decrease in the network's ability to provide sustaining service.

Moreover, the advertiser, he continued, would want the larger stations, so the smaller would suffer a decrease in income, as had previously been contended by other witnesses.

Mr. Paley intimated the rule forbidding exclusive contracts with any network might benefit the Mutual Broadcasting System, which is supporting the rules, but said it would severely hurt the other networks. If Mutual wants to compete on an equal basis and provide network service instead of carrying sustaining programs originating on local stations, Mr. Paley asserted the way is already open for it.

**World Series Broadcasts**

The World Series baseball games, mentioned a number of times previously in discussions of this rule, Mr. Paley
termed one of the "most misrepresented" topics presented at the hearing. He said NBC and CBS "had believed for years that nobody should try to sew up the World Series," since baseball is the national game, and had urged the baseball managements to make the games available to all networks on a sustaining basis.

They were shocked, he went on, when "Mutual suddenly turned up with an exclusive contract to broadcast the World Series on a commercial basis."

Although NBC and CBS wrote to Judge Landis offering to broadcast the games on a non-commercial and non-exclusive basis with courtesy announcements for Mutual's sponsor and the baseball clubs, Mr. Paley said they received no response.

This information had been given to Mr. Fly, according to Mr. Paley, who said Mr. Fly "sat here before you and tried to make it appear that it was Columbia and National who were responsible for a large number of stations not having the World Series, whereas Columbia and National year after year had worked to the opposite end and it was Mutual which was simply and solely responsible."

Cites CBS Study

A study by CBS traffic experts, was cited by Mr. Paley as showing that it would be feasible under the rules for an advertiser or advertising agency to take his pick of stations and link them in a temporary network for commercial programs, thus freezing out regular networks and many small stations normally included in such hookups, because the advertiser or agency would furnish no sustaining or similar network service so that his cost would be less.

The rule forbidding a station to contract for a network's exclusive services in a particular territory would work similar hardships upon the stations, and networks, Mr. Paley said. In addition, he continued, "if the local station affiliated with the network does not wish to take any particular program from the network, it must face the possibility, if the new rule is in operation, that if another station in its territory desires to take that program the refusing station not only contributes to the success of a competitor, but actually faces competition for audience supplied by the very network with which it is affiliated."

"A Masterpiece of Disruption"

The rule forbidding option time was characterized by Mr. Paley as a "masterpiece of disruption."

"The more I realize its actual effects," he said, "the more evident does it become to me that the Commission either did not know or did not care what was going to happen to network broadcasting."

"This rule means that network broadcasts, local broadcasts and phonograph records, including the large-size records known as transcriptions are all on a parity, and the necessary priority of network operations is ignored. Since a network can only exist when a number of stations are joined together for simultaneous broadcasting, it seems evident that there must be some kind of priority for the through program unless the whole network operation is to be haphazard, accidental, difficult and often impossible except on a patchwork basis."

"The national advertiser is interested in nationwide coverage and must be able if he is to use our medium to reach his whole market and to prorate the great expense of his program over the many millions of listeners from Coast to Coast who are his potential customers."

Unless the network can get an option on station time, Mr. Paley contended, a network will be blocked, even when only a few key stations are tied up either by local programs or phonograph records.

Under this rule, Mr. Paley said, "our schedule of available time across the country would be like a jig-saw puzzle, except that if you have time and patience you can put the pieces of a jig-saw puzzle together, and there is absolutely no assurance of how often we can put a network together under these conditions."

Mr. Paley had not concluded his testimony when the hearings adjourned today. He will take the stand again tomorrow morning.
HEADS OF THE TWO MAJOR NETWORKS TESTIFY BEFORE SENATE COMMITTEE ON INTERSTATE COMMERCE

HEADS OF THE TWO MAJOR NETWORKS TESTIFY BEFORE SENATE COMMITTEE ON INTERSTATE COMMERCE

Heads of the two major network broadcasting companies, testifying before the Senate Committee on Interstate Commerce, today asked Congress to enact a new radio law which would define the powers of the Federal Communications Commission and the position of the industry.

As a first step toward clarification of the 14-year-old statute, all three of the witnesses heard today, William S. Paley, president of the Columbia Broadcasting System, Niles Trammell, president of the National Broadcasting Company, and Judge John B. Burns, CBS counsel, urged approval by the Committee of the White resolution calling for a congressional investigation of the broadcasting industry and the Commission.

The White resolution was introduced following the promulgation by the FCC on May 2 of new rules which both network presidents said today would have disastrous effects upon the broadcasting structure of the nation.

SAYS AGENCIES GIVEN TOO MUCH POWER

At one point in the testimony, Senator Wheeler, chairman of the Committee, said, "I think there has been too much power given to various agencies of the Government, and I have opposed it from time to time. We are fast getting into a position in this country today where we are having government by man as distinguished from government by law."

At another time he said, "I do not want you to get the idea that I am upholding entirely the procedure of Commissions. I realize the fact that they become exceedingly arbitrary at times, and when they once make up their mind they do not want to recede from it in the slightest degree."

Previous testimony during the hearings has brought out the fact that there is great confusion over the meaning of the rules. Today Senator Wheeler said to Mr. Paley, "You stated upon this witness stand that your lawyers and yourself did not know what those rules mean; and I can agree with you on that because I think different conclusions can be reached as to them."

Commenting upon a statement by Judge Burns concerning one part of the Commission's report in which the new rules are embodied, Senator White, of Maine, author of the resolution, indicated that there the Commission majority seemed to "proceed on the basis that what is possible is probable and may be assumed to be true."

In closing his testimony this morning, Mr. Paley said, "We have told you as earnestly as we can that we believe these regulations really imperil the broadcasting structure of this country."

He added that testimony, questions asked by Senators and other developments during the hearings cast "doubt on the workability of the whole scheme and suggest that the public interest cannot be seriously damaged by holding up the effectiveness of these rules until you can reach your own orderly decision."

"We are hopeful that a careful, impartial and judicial examination of broadcasting by Congress will provide us with a law that is clear and a manner of administration that is fair."

"We are hopeful that as a result of your deliberations we will no longer be besieged by doubt and confusion and threatened with punitive action, and that we will be allowed to bend our energies toward evolving a constantly improving broadcasting service."

"We are hopeful that as a result of your deliberations we will no longer be besieged by doubt and confusion and threatened with punitive action, and that we will be allowed to bend our energies toward evolving a constantly improving broadcasting service."

"We are hopeful that an investigation such as is called for by the White resolution will provide a law that insures freedom of the air and eliminates the threats which radio is now facing."

"We are hopeful of all these things, and I am convinced they can be accomplished."

CONGRESSIONAL STUDY ASKED

In opening his testimony late this afternoon, Mr. Trammell said he advocated approval of the White resolution because of three things:

"First, as one who has been in the radio industry since its inception, it is my firm belief that the orders and regulations recently issued by the Federal Communications Commission will disastrously affect the entire broadcasting structure of the nation."

"Second, the issues raised by the new regulations are not merely industry issues; they are distinctly public issues. They affect the users of fifty million radio receiving sets; they affect thousands of radio programs and those public interests which provide them; they affect the business life of the nation; and they affect the morale and welfare of the American people."

"Third, a national radio policy defined by Congress is urgently needed, at the present time, to protect by clear mandate the freedom of the air against either private or governmental control, and to insure the con-
continued operation of broadcasting under the American system of private enterprise.”

Judge Burns, in his testimony, called the roll on those who are favoring and opposing the new legislation which the industry is asking.

**Support New Legislation**

Among those who are on record as supporting such legislation, he listed President Roosevelt, who in 1939 asked a new radio law in a letter addressed to Senator Wheeler. Mr. Burns pointed out that Senator Wheeler, too, has stated several times that the present law needs amendment.

Commissioner T. A. M. Craven, who appeared last week to present to the Committee his own views and those of Commissioner Norman S. Case, strongly advocated new legislation clearly defining the powers and duties of the Commission, Judge Burns continued.

Even Louis G. Caldwell, counsel for the Mutual Broadcasting System, the only network supporting the FCC’s position, indicated, said Mr. Burns, under questioning by Senator Clark, of Idaho, that he believes clarification of some points in the present law to be desirable. In an article Mr. Caldwell wrote for the Annals of the American Academy of Political and Social Science in 1935, Mr. Burns went on, he was more explicit, declaring that too much power was being exercised by the Commission.

To these, Judge Burns said, practically the entire broadcasting industry except Mutual, may be added.

A number of Senators, including White and Clark, have likewise indicated during the hearings that they believe new legislation should be enacted.

Chairman Fly, Judge Burns asserted, is thus practically alone in opposing the legislation.

When he resumed his testimony today, Mr. Paley took up the new FCC rule forbidding stations to contract with a network for more than one year at a time.

**Says Rules Harm Small Stations**

“‘This is not practical,’” Mr. Paley said, “‘for either the network or the station and seems to me a glaring example of the lengths to which the Commission has gone to upset existing arrangements and practices just for the sake of upsetting them, although its announced purpose is to protect the stations.

‘You are going to have a reshuffling of network alignments every year, assuming that these alignments mean anything at all in face of the total effect of the various rules. One result of this one-year rule if these major outlets come into the market every year will be annual competitive bidding for the most desirable outlets in the large markets.

‘This can well force networks to pay those stations which are already exceedingly prosperous so much money that there is not going to be enough of the network dollar left properly to compensate stations in smaller markets where the competition for outlets is not so keen.”

Such things as studio construction and engineering installations cannot be undertaken on a one-year basis, Mr. Paley reminded the Committee. Artists, features like the Philharmonic Symphony Orchestra, management and personnel likewise must be reasonably secure, he added.

Citing an investment of $700,000 in a studio annex in New York by CBS a little more than a year ago, Mr. Paley said that with “the uncertainties now projected into our business” such investment would not be justified.

“No responsible business management,” he stated, “can enter into such normally necessary business arrangements knowing that it can continue to do business only on a transient basis.”

On the rule regarding network ownership of stations, Mr. Paley pointed out that CBS owns seven and leases one of the 127 stations in the Columbia network.

“Should we arbitrarily,” asked Mr. Paley, “and without any evidence in the record that we have abused this ownership, be stripped of interests lawfully acquired? When I recall to you that in relicensing these stations year after year the Commission has certified that we have operated them in the public interest, I think you will find yourselves confronted, among other things, with the plain issue of fairness.

“If the Commission can find a single one of the stations we own which, in the testimony of its own community, is not a better station today than it was before we owned it, I will agree right here and now to give up that station without an argument.”

The rule on network ownership of stations is based, he said, on the argument that such stations will naturally favor the network to which they belong, and thus make their facilities unavailable to other networks.

**Sees Threat To Broadcasting**

“If there is any validity to this restriction,” asserted Mr. Paley, “then I do not see how a network organized on a mutual plan is to be allowed to operate at all. If the network is owned by the stations affiliated with it, won’t those stations favor their own network? And is this not in the Commission’s view an evil? In the light of Mutual’s own testimony here that it now has seven stockholders, and is about to add two or four more, the Commission’s argument that it should disturb our ownership and leave Mutual’s unmolested seems pretty lame.

“I am not upholding the validity of the Commission’s argument; I am just pointing out how here again it strains and strives to injure Columbia and NBC and help Mutual. Its argument that there is some kind of evil in affiliates leaning toward a network seems to me one of the most destructive it has ever advanced, but it does argue that way, and yet insists that it is all right for Mutual to be owned by 15 stations and all wrong for us to own seven.”

The rule forbidding stations to agree with networks as to rates was termed by Mr. Paley “a threat as dangerous to the individual radio station as it is to the networks.”

CBS, he said, does not have any agreement with its network affiliates as to rates which they shall charge other users of their time.

**Industry Harassed and Worried**

“We point out, however,” he went on, “That private contractual arrangements designed to prevent unfair competition are not necessarily undesirable.

“Moreover, if the Commission can do this there is no apparent limit to the extent to which it can control the whole financial structure of radio. Once let it control the economics of the industry, and its power over broadcasting will know no bounds.”
The whole industry, Mr. Paley declared, is harassed, worried and jittery as the result of the new rules.

"If Chairman Fly," he said, "can successfully assert these revolutionary powers over the business practices of the networks and the stations, make no mistake about it, his control will be so absolute that we will have in this field regulation by raised eyebrows, in which a nod will put one program on the air and a frown will keep another off. If this type of regulation is dangerous with respect to public demand or a deficiency of service. They are the public's problem, and the Congress's problem, and the courts, Mr. Paley said, "May I point out to you that we could well suffer irreparable damage in the years ahead, while the legal fight was in progress, and if I am sound in my contents, the public would suffer with us at the very time when broadcasting should, more than ever before, be a powerful instrument for the public good. If we win, it may well be too late. If we lose on the technical issue of the Commission's power, the important issue of public policy still is this: Did the Congress intend and does the Congress now want a radical revision of the whole broadcasting structure by administrative fiat?"

Public Interest Seen at Stake

Pointing out that the five men comprising the Commission majority constituted the sole complainant, Mr. Paley asked the Committee to stay the regulations and "call off the wrecking operation."

Mr. Trammell told the Senators that not only are the operations of NBC seriously affected and the welfare of the 2,300 NBC employees at stake, but that NBC's interests are closely interwoven with the public groups the network serves, the independent radio stations affiliated with it and the "vast radio audience which has so heartily approved our service."

He did not oppose, he said, proper regulation of broadcasting under the licensing powers authorized by Congress and administered by the FCC.

"Such regulation is essential," he went on, "but we are operating under a law conceived fourteen years ago and before the present problems of network broadcasting could be foreseen. The vagueness of this old law, the lack of clarification of certain vital principles, and the limited rights of appeal all argue strongly for new legislation as the only solution of the major problem confronting us."

Says Rules Would Disrupt Service

The American public today, Mr. Trammell said, receives the greatest broadcasting service in the world.

"The changes decreed by the orders of the FCC," he continued, "will disrupt the present orderly distribution of this broadcast service. They are not the result of public demand or a deficiency of service. They are the result, apparently, of unproven charges of domination, control and monopoly. They stem from the competitive cry of those who seek, through Commission edict and without competitive effort, to replace the pioneers who developed our American system of network broadcasting.

"The Commission now essays to regulate the business practices of the industry. Therein lies the great danger of the new regulations. We have not believed Congress intended to give the Commission the power to prescribe business rules or program practices for the broadcasting industry. We have believed that Congress intended to give the Commission power to regulate the industry, not to operate it."

Mr. Trammell said that neither the broadcasters, nor the Commission, nor Chairman Fly knows how the American system of broadcasting can operate under the new rules.

He pointed out that while the Commission promises to go to Congress for legislative help "if the new order does not function," the industry is asking for that help now.

"I believe," Mr. Trammell declared, "that we are properly apprehensive about the willingness of the Commission to perform a serious, and perhaps fatal, operation while limiting Congressional help to post mortem relief. "There is no substitute, I am convinced, for legislative study and action on the problems that confront broadcasting."

Warns Against Chaos

The uncertainty of the Commission itself as to the effects of the new rules, Mr. Trammell indicated, is shown by the statement that if they do not achieve the purposes hoped for, Congress "should amend the Communications Act to authorize and direct regulations appropriate to a non-competitive industry."

He charged that "the Commission foresees the possible breakdown in the competitive system of broadcasting now maintained by private enterprise. It is perfectly willing, when the chaos and business anarchy predicted by the dissenting Commissioners becomes a reality, to recommend that a government controlled monopoly be legislated by Congress as the only alternative method of operation."

"The confusion and chaos that must follow the sudden removal of the business and contractual props upon which chain broadcasting now rests will signal the assumption of more and more control by the Commission. Neither the industry nor the FCC has any illusions about that."

Certain clauses in the contract between NBC and its affiliated stations, Mr. Trammell said, had been criticized by FCC Chairman Fly in his testimony earlier in the hearings. These were the clauses requiring the stations to give five years' notice of cancellation of agreement as against one year's notice for the network, preventing stations from having local rates below network rates, and that requiring stations cancelling network commercial programs for local commercial programs to rebate the difference between what the network would have paid for the network commercial and what the station received for the local program.

Eliminates Clauses from Contracts

None of the clauses, he said, has ever been a matter of issue between NBC and the stations, the first two never having been enforced, and the third invoked "only on rare occasions when a supplemental arrangement had been mutually agreed upon by the station and NBC."

In addition, many of the affiliated stations, he continued, do maintain different rates for local and national spot business.

Nevertheless, Mr. Trammell stated, he had asked all NBC affiliates affected by these contract provisions to
agree to eliminate those clauses from their contracts.

In addition, he said that a total volume discount permitted by NBC since 1927 to advertisers on both the Red and Blue networks is being eliminated.

Mr. Trammell told the Senators he had taken this action to eliminate any need for consideration of lesser matters and so that there can be no confusion between the major and minor issues to be considered.

Of the 233 contracts NBC now has with affiliated stations, he said, 117 are firm commitments with equal rights of cancellation on the part of stations and NBC, and the other 116 contracts give NBC an option to cancel on a year's notice.

"The history of NBC," Mr. Trammell stated, "is public property. Its progress has been a source of pride to those in the company and of satisfaction to a vast American radio audience. The list of its contributions to broadcasting development, both in engineering technique and program service, is a matter of record. If it is a crime to grow, to extend service, to make reasonable profits—then we are guilty. But I submit that our record of achievement and public service is a matter for commendation, not condemnation."

In his statement to the Committee, Judge Burns attacked the Commission's majority report both as to content and the manner in which it had been arrived at. He also supplemented Mr. Paley's testimony with respect to the destructive effect of the new rules and analyzed the difficulties which will confront the networks if they attempt to secure relief through judicial review of the Commission's action.

Mr. Burns said that FCC Chairman Fly had gone "to great length to make out a very appealing case of due process" in connection with promulgation of the rules by having made a demonstration of holding lengthy hearings, taking voluminous testimony and giving opportunity for briefs, suggestions and arguments.

Nevertheless, he said, the Commission's report "still does not reflect what the testimony was before that Commission." He added that the Commission had never produced, during its so-called "monopoly investigation," any testimony to contradict evidence by the industry that the abolishment of the existing type of contract relationships between the stations and the networks would be "serious."

Mr. Burns pointed out that Commissioner Craven has already testified before the Senate Committee that an earlier draft of the report contained a statement confessing the majority's inability to predict what the effect of the rules might be in "actual practice."

"This," he said, "is the very guts of the problem: What is going to happen to the business when you put these new, revolutionary, radical, undreamed-of reforms into effect?"

Mr. Burns quoted at length from a brief filed by the FCC in the Sanders case, in which the Commission argued that "there is not a single provision in the Act from which it can be inferred that Congress intended, by providing a licensing procedure for the use of radio transmitting equipment, to subject to regulation the business of the licensee." In addition, the Commission added in this brief that it "is not authorized to regulate the business of selling radio advertising or any other commercial use of radio frequencies; it is not authorized to regulate the rates for radio service or to limit the return upon the investment in radio broadcast stations."

In his review of alternative methods of seeking judicial relief, Judge Burns said that the primary difficulty was that in recent years the courts had demonstrated a disposition to reverse administrative rulings only where there was error in law.

The Commission, he said, has been "notorious in its efforts to immunize itself from judicial review and to free itself from any supervision by the courts. It has successfully established in the courts the principle that only errors of law will be considered by the reviewing court."
INDEPENDENT STATIONS OPPOSE RULES, ASK NEW LAW

Owners and operators of independent radio broadcasting stations joined with representatives of the industry’s principal trade associations at today’s hearing on the White resolution before the Senate Committee on Interstate Commerce in opposing the new rules promulgated by the Federal Communications Commission and in urging Congress to enact a new radio law.

Witnesses today included Neville Miller, president of the National Association of Broadcasters, Paul W. Morency, vice-chairman of Independent Radio Network Affiliates, John J. Gillin, Jr., general manager of Station WOW, in Omaha, Neb., Samuel H. Cook, co-owner of Station WFBL, in Syracuse, N. Y., and D. M. Patrick, counsel for the National Broadcasting Company.

These witnesses pointed out that the present radio law was enacted 14 years ago when broadcasting was still in its early, experimental stages and network broadcasting was only beginning to develop.

Stations Oppose Rules

Mr. Miller placed in the record a resolution adopted by unanimous vote of the industry present at the Association’s annual convention in St. Louis, May 12-14, urging passage of the White resolution “with a view to enactment of a new radio law,” and a stay of the Commission’s rules.

Mr. Morency presented a similar resolution adopted by the independent radio affiliates group and testified that polls of the membership showed they opposed the new rules by at least ten to one.

“Broadcasters are very apprehensive of these regulations,” Mr. Miller said. “They believe, as has been stated here so many times, that the proper procedure is to have the Senate make a study and draft new legislation.”

The rules, he testified, may cripple a vital instrument of national defense in a time of crisis.

There has been no complaint from either the public or the advertisers about radio service, Mr. Miller said. He questioned the claim by FCC Chairman Fly that the rules would be the “Magna Carta” to free the stations from the networks.

“Mr. Fly talked about this ‘Magna Carta’ for the small stations,” said Mr. Miller, “as if he were freeing a group of slaves, as if he were issuing a second Emancipation Proclamation. I was not alive when the first Emancipation Proclamation was issued, but I am quite sure that it was received with a great deal more enthusiasm than this is being received by these stations which, as far as I can find out, do not want to be liberated from the condition they are in, because they are not being dominated and they are getting along very nicely.

“I think this is just a technique that Mr. Fly has developed for the purpose of beclouding the issue.”

Mr. Miller said he would be remiss in his duty if he did not tell the Committee the broadcasting industry is operating in a very fearful state of mind.

“I think,” he continued, “that emphasizes one thing which I should like to say, and that is that we are getting very close to censorship. Stations have to come up every year for licensing. The licensing power is very broad. Whether or not they take a speech may come into the question of whether they get a renewal of license.

“If it gets to be known that the Commission or those in authority feel that this is a good kind of program, that this is a good speech, or that this is a bad speech, you are going to find the radio stations, as they are today, becoming very fearful, and you are going to get to the place where we lose freedom of speech over the radio.

“I think that one thing we overlook is that Chairman Fly seems to believe that you can tinker with radio and that you will not hurt radio sets at all. If you start knocking off sustaining programs and start knocking off the good programs, you are going to find out that you will have fifty million idle radio sets and that the public will turn for its information to other places. You will not have the system you now have.”

Advertisers Concerned

Mr. Miller also placed in the record a letter from John Benson, president of the American Association of Advertising Agencies, who said national advertisers are disturbed over the new rules. Mr. Benson’s letter asked adoption of the White resolution, revision of the present law and that the rules be held up until a proper study can be made.

Mr. Morency said the present radio law “gives no recognition whatever to the fact that national service is network service,” because the law deals exclusively with licenses to individual stations.

The new regulations, he pointed out, are “aimed primarily at the terms of the contracts and relations between affiliates and networks, although the entities consisting of network organizations are unknown to the present law.”

Mr. Morency declared that “it is clear that the overwhelming majority of contract affiliates believe the regulations as drawn go too far and will impair service to the public.”

Describing radio as a part of the daily life of the
American home, Mr. Morency said, “It would be tragic to disrupt this medium of cheer and recreation in the world of trouble of today only to try out a theory of operation which most of the more experienced broadcasters believe is not practical.

“Before this risk is taken, affiliates believe the field should be studied more broadly, so that a new statement of the law may be made to catch up with the progress of the art since 1927.”

Mr. Gillin, who said that his station, WOW, owned by the Woodmen of the World, is one of the oldest in the United States, testified that in his opinion as a broadcaster of fourteen years' experience, the rules would make national public service programs a “thing of the past,” and would harm the small station.

An exclusive arrangement between the broadcaster and the network, forbidden under the new rules, means “reasonable permanency,” Mr. Gillin asserted. He said “this is the only way that a broadcaster can be assured of a steady program, a continuing program of outstanding national public service programs and international news broadcasts and national special events.”

If a station does not have an exclusive contract, Mr. Gillin told the Committee, “you can rest assured that the national public service programs that are not of a commercial character will be a thing of the past, because the network does not have any assurance under the rules and regulations that it can clear, even for commercial programs.

“Certainly it is not going to have the initiative it has had in the past to try to clear for public service programs.”

Concerning the rule forbidding affiliation of a station with a network for more than one year, he said if this rule becomes effective “there will be a continual jockeying on the part of networks to get the best possible stations in each market, and, in the last analysis, the larger stations, namely the clear channel stations, will for the most part be the beneficiary.”

Says Small Stations Would Get “Leavings”

Mr. Gillin said that under the new rules the stations with the poorer frequencies in each market will “receive only the leavings,” whereas “the best station in each market will receive the most money.

“The other stations in the market proportionately would be hurt. The second, third and fourth stations, which are now associated with some network exclusively, would not receive the proportion of commercial programs they are receiving today. Therefore, the second, third and fourth stations in each market in attempting to keep their heads above water, would take on the commercial programs of a much less desirable type of advertiser. This would do much harm to radio.”

Mr. Gillin said he believes Congress should specify the power of the FCC in a new radio act and that the present rules should be stayed.

Mr. Cook, president of the Onondaga Radio Broadcasting Corporation, which owns and operates WFBL, told the Committee that as the result of a building and improvement program involving an outlay of approximately $140,000, he and his associates had sought and obtained an extension of their network contract, because they wanted to be assured of service for as long a period as they could obtain it. The contract, which would have expired in January, 1943, was extended last year until January 1, 1945.

“Had we known,” Mr. Cook said, “of the impending regulations to be issued by the Federal Communications Commission, we might not have gone ahead with such ambitious plans.”

Mr. Cook told the Committee that although the network had an option on all the station's time, this “has never prevented us from rendering commercial service to our local advertisers desiring to use our facilities,” nor “from carrying all the local public service programs required by our community interests.”

The station was always free, he said, to cancel network commercial programs whenever they conflicted with local public service programs.

“We are definitely convinced,” Mr. Cook asserted, “that the granting of option time to a network and term contracts longer than one year, and fully as long as at present, are necessary both for the orderly operation of a station and for its sales, and that these are good business practices, essential to the best interests of both station and network.

Station Owners Disturbed

“My associates and I regret, with all due respect, that the Commission saw fit to issue regulations at this time, especially when we have made this expenditure, so drastically changing the system of broadcasting, which we as station operators have felt has been doing a thorough and inclusive job of broadcasting with the interests of the public always in mind.

“As businessmen, we would like to know where we are going. We confess we are completely in the dark and are greatly concerned about what may happen to the networks and to the stations when and if the regulations of the FCC go into effect next August 2.

“We urge this Committee to pass the White resolution. We urge that a thorough study be made looking toward the enactment of a new law which will definitely set out the powers of the Commission and will leave to Congress the determination of terms and policies under which we are to operate in the future.”

Mr. Patrick's testimony dealt with questions of the power of the FCC and of judicial review. He pointed out that the United States Court of Appeals for the District of Columbia in the Scripps-Howard Radio case, decided last February that it did not have power to grant a stay order during the pendency of an appeal, a reversal of the Court's previous position.

He asked Chairman Fly, who is to take the stand again, if he thinks the District Court of Appeals has power, in view of its decision in the Scripps-Howard case, to grant interim relief; under what circumstances the FCC would consent to granting such relief; if the FCC could extend a license on a temporary basis while an appeal is pending; whether if the Court does not have power to grant interim relief how the Commission would grant interim relief under certain conditions; and if interim relief were granted by the FCC or the Court, and the Court decided in favor of the Commission, would the FCC relicense the station immediately after demonstration that it would conform to the disputed regulation.

Mr. Patrick charged that the promulgation of the rules by the FCC was “usurpation of legislative power.”
Niles Trammell, president of the National Broadcasting Company, asked Congress today to free radio broadcasting in the United States from the danger of political domination by the Federal Communications Commission by laying down a clearly defined national radio policy in new legislation.

Mr. Trammell, the only witness at today's hearing before the Senate Committee on Interstate Commerce on the White resolution calling for a Congressional investigation of the broadcasting industry and the FCC, declared that "the worst domination that could be visited upon public opinion is domination by a political commission."

Senator White, of Maine, introduced his resolution following promulgation by the FCC on May 2 of new rules which both Mr. Trammell and William S. Paley, president of the Columbia Broadcasting System, have testified would imperil the whole structure of broadcasting in this country. Both Mr. Trammell and Mr. Paley have urged Congress to enact a new radio law to replace the present 14-year-old statute adopted before broadcasting had developed to its present position.

Fear Revolutionary Change

Two members of the FCC, Commissioners T. A. M. Craven and Norman S. Case, have also said they "fear the revolutionary change proposed by the majority will result in the destruction of the present excellent national program distribution system."

One of the new rules would force NBC to divest itself of its Blue network. Speaking of this rule, Mr. Trammell said, "If the majority of the Commission are allowed now to compel us to dispose of half our property, lawfully acquired and lawfully operated for fourteen years, on their determination alone, and if Congress does nothing about it, don't be surprised if six months from now Mr. Fly comes in and tells us to get rid of half the Red network. It will then be too late to protest, because his power has been conceded.

"Not only is the subject matter, in our opinion, outside the power delegated to the Commission by Congress but nowhere in the history of administrative regulation has so brutal a method for the amputation of a major portion of a great enterprise been invoked."

"Here, in effect, Chairman Fly proclaims: 'Bend your knee, concede my power, give up the Blue, and I will let you live—you may keep the Red.'"

"The first cracks in the structure of democracy are often invisible to the unaided eye, but if Congress, by failure to act now, concedes to Chairman Fly the power to force us to give up half our property, then Congress need not be surprised when it learns, in the not too distant future, that Chairman Fly has taken over the entire radio industry."

Wheeler Favors Option Time

Another of the Commission's new rules forbids a station, under penalty of losing its license, from giving a network a firm option on any part of its broadcasting time. Senator Wheeler, of Montana, chairman of the Committee, today said he thinks the Commission is wrong in its attitude on option time and that he sees no reason why a station, if it wishes to do so, should not give a network an option to sell part of its time.

In his testimony, Mr. Trammell reviewed the growth of the National Broadcasting Company.

"In 1926," he said, "before the Radio Act was adopted by Congress, the NBC was organized in a pioneer attempt to provide a truly national service of broadcasting. It established what is now known as the NBC Red network. This network had no competitors, because no one else was ready to take the investment risks and hazards of such a major venture."

"In January, 1927, because of the requests of competing local stations in the same cities for another broadcasting service, NBC established its second network service, known as the Blue. Today the NBC operates only ten of the 828 stations in the United States. Because of its Red and Blue network services, it has been licensed for many years to operate two stations in New York, in Washington, in Chicago, and in San Francisco."

Public Service Endangered

The new FCC rules, Mr. Trammell asserted, would strike a heavy blow at the public service programs now provided by NBC. He pointed out that the National Farm and Home Hour, in which the United States Department of Agriculture participates, has been on the air for 12 years and is presented over the Blue network, which NBC could no longer operate under the new rules.

Among other programs created and maintained as Blue network features by the NBC, Mr. Trammell listed the Toscanini Concerts, the Town Meeting of the Air, the Damrosch Music Appreciation Hour, the Metropolitan Opera broadcasts and many others. These are endangered, he said, by the new rules.

"A fifteen-year record of constantly improving service," he said, "ought not to be so lightly overlooked or brushed aside. Disregarding questions of jurisdiction, disregard-
ing the rewards due pioneering enterprise, service to the public should be the major test.

"I may add that the National Broadcasting Company has expended more than forty-five million dollars on sustaining programs—that is, programs that carry no advertising—to carry out its responsibilities towards the government and public which it serves.

"I do not say these things boastfully. I merely list them to indicate the extent to which NBC has rendered service in the public interest, convenience and necessity through the operation of its Red and Blue networks." NBC has spent millions of dollars in developing television, Mr. Trammell pointed out, adding that it has established and maintained television program service without any revenue for more than two years.

Network Revenues Support Television

"We are now ordered," he continued, "to divest ourselves of one of our network services, and threatened with the loss of operation of standard broadcast stations, while, at the same time, the licensing policy of the Commission encourages our entrance into the operation of new stations in the fields of television and frequency modulation.

"The older service of broadcasting is profitable, but the new services are yet to produce any revenue. Apparently the Commission favors our loss of present investments and revenue, but wants us to invest in new fields.

"Under such circumstances how can anyone know what to do? We cannot plan our course until the Congress has determined, definitely, what it expects of those engaged in the business and service of broadcasting sound and sight."

During the hearings, Mr. Trammell reminded the Committee, a reference was made to the inability of the Mutual Broadcasting System, which is the only major network supporting the rules, to get a full-time station affiliation in Cleveland.

"The Commission's files on the Cleveland situation," Mr. Trammell said, "indicate clearly that a fourth full-time station could have been established years ago in the sixth largest market of the country."

Applications for such station have been rejected by the Commission, he continued, although it "has granted regional stations in areas with greater interference than they contend would exist in Cleveland."

"Too Much Favoritism," Wheeler Charges

Senator Wheeler interjected, "Perhaps the political pull was not so great in Cleveland as it was some place else. That is really one of the bad things that have gone down at the Commission, that there has been too much favoritism shown here or there."

The Commission's policy on hearings for licenses or transfers was also criticized by Senator Wheeler, who said, "The Commission goes ahead without hearings and determines, definitely, what it expects of those engaged in the business and service of broadcasting sound and sight."

"Under such circumstances how can anyone know what to do? We cannot plan our course until the Congress has determined, definitely, what it expects of those engaged in the business and service of broadcasting sound and sight."

During the hearings, Mr. Trammell reminded the Committee, a reference was made to the inability of the Mutual Broadcasting System, which is the only major network supporting the rules, to get a full-time station affiliation in Cleveland.

"The Commission's files on the Cleveland situation," Mr. Trammell said, "indicate clearly that a fourth full-time station could have been established years ago in the sixth largest market of the country."

Applications for such station have been rejected by the Commission, he continued, although it "has granted regional stations in areas with greater interference than they contend would exist in Cleveland."

"By preventing a station from being the exclusive outlet of a network, and a network from offering a fixed and definite lineup of stations, these rules cut an essential link out of the broadcasting chain, and set stations and networks adrift. In essence the rule more viciously fosters monopoly than could any possible restraint which now exists."

Rules Favor Monopoly

"Under the new rule all will be chaos and confusion. Stations will rush for the best features of every network service. Advertisers will try to preempt the best hours on the best stations. Time brokers will inject unfair methods of competition. Advertising agencies will make their own arrangements for 'front-page' position with the bigger and better stations.

"If the existing networks lose key stations and therefore advertising support, the responsibility for public service from the national standpoint will be nobody's business. Then the FCC will have the opportunity it foresees in its Report on Chain Broadcasting. Private enterprise will have failed, and a non-competitive, government-controlled operation will be necessary."

Large advertisers, Mr. Trammell declared, could put together networks made up of the best stations from all the existing networks. He introduced maps to illustrate this possibility. One map showed a 64-station network that would reach approximately 92 per cent of all the radio families in the country. To approximate this coverage, the second map showed another advertiser would have to include 160 of the remaining stations and then could reach only about 76 per cent of the radio families. A third advertiser, according to another map, would not be able to approximate the coverage of the other two regardless of the amount of money spent or time bought on the remaining stations.

"True national coverage," asserted Mr. Trammell, "under the new regulations, will become the opportunity of a relatively few major advertisers. The bulk of the advertising revenue under these new regulations will go to a relatively few of the country's major stations."

Choice is Government vs. Free Radio

The rule prohibiting option time, he said, "strikes directly at the heart of network broadcasting," because the networks cannot reserve definite fixed time for fixed features. Likewise, the rule forbidding contracts between stations and networks for more than a year threatens broadcasting stability, he asserted.

Mr. Trammell said that the question involved in the new rules is that of extent of business control of broadcasting by the FCC. Business control, he added, is program control.

"Involved here," he declared, "is the choice between operation of broadcasting by private industry and operation by government. The breakdown of our present broadcasting structure inevitably would make it incumbent on the government to step in and, perhaps, finally to subsidize stations or to tax listeners.

"While I am concerned as to the future of the company which I represent, I am deeply apprehensive concerning the continuance of our American system of broadcasting. Its freedoms are in jeopardy. To safeguard them, I earnestly urge approval of Senator White's resolution."
Representatives of church groups and women's clubs together with owners and operators of small broadcasting stations in various sections of the country today appeared before the Senate Committee on Interstate Commerce to express their concern over the effects of the rules recently promulgated by the Federal Communications Commission and to ask Congressional consideration of the present broadcasting situation with a view to enactment of new legislation.

Frank C. Goodman, executive secretary of the Federal Council of Churches of Christ in America, representing approximately 140,000 churches, Mrs. Harvey W. Wiley, chairman of the department of legislation of the General Federation of Women's Clubs, representing 14,600 clubs and 2,000,000 women, and Edward J. Heffron, executive secretary of the National Council of Catholic Men, appeared for their organizations.

Mr. Goodman also placed in the record statements by the International Council of Religious Education, the Foreign Missions Conference of North America, representing 188 foreign mission boards of the Protestant groups in America, the American Bible Society, one of the oldest and largest Bible organizations in the country, and a copy of the letter addressed to President Roosevelt by Dr. Harry Emerson Fosdick and 60 other leading clergymen of the Protestant church.

Effects of Rules Feared

All the statements and letters voiced misgivings over the effects of the new rules on broadcasts of public service programs in which the groups are especially interested and asked Congress to make sure that no hasty and ill-considered action is taken to imperil broadcasting.

Clarence Wheeler, vice-president of Station WHEC, in Rochester, N. Y., Jonas Weiland, owner of Station WFTC, in Kinston, N. Car., J. W. Lee, manager of Station KGFF, in Shawnee, Okla., and C. P. Hasbrook, owner of WCAX, in Burlington, Vt., told the Committee they believe Congress should study the broadcasting industry and enact a new radio law because they fear the rules issued on May 2 by the FCC will harm their stations.

Addressing the Committee, Mr. Goodman said, "In my 24 years of service to the churches, I do not recall any development that has concerned the leaders of our major Protestant organizations quite as much as the unexpected new regulations of the Federal Communications Commission.

"Radio has furnished the first opportunity of developing an appreciation of the message of the Christian gospel, on the part of the unchurched people of our country, and any move by a government agency that may cause confusion within the radio industry, is looked upon with grave misgivings by the delegated leadership of a large section of our churches."

Mr. Goodman told the Committee that to expedite the hearings, which have extended over a period of three weeks, he was asking permission to place in the records his own statement and those of four interdenominational church groups, each with a nation-wide constituency.

Says Churches Have Stake in Radio

In his statement, Mr. Goodman pointed out that he has had a long period of experience in religious radio in an executive relationship.

Reminding the Senators that this is a time of crisis for the churches as well as for the rest of the country, Dr. Goodman stated that during the depression "the Church lost surprisingly little in influence and activity, and we attribute this to the facilities we received from the free and uncensored American system of radio."

Under the direction of the Radio Department of the Federal Council of Churches, he said, 1,100 church men produced 8,000 network programs in the last 18 years, and 800 churchmen appointed by denominations produced 5,000 non-network programs in the last five years.

In the production of these programs, Mr. Goodman declared, "we have not received one complaint of censorship or control" on the part of the networks, the stations associated with them, or the other radio stations of the country.

More than five million letters from urban and rural audiences were received, he said, while more than two million requests for sermons were made to his office in the last six years.

The churches of the country, he continued, "have a real stake in American radio, and the Congress, we feel, should recognize this as our reason for requesting a thorough investigation of the American broadcasting system.

"Any compulsory re-organization of a fully developed business, charged with national and international commitments of far-reaching importance, may prove most unfortunate for the Church at a time of stress and strain, and if the new regulations of the Federal Communications Commission are likely to disrupt the radio industry, it will surely be a blow to national unity, and the spiritual and mental well-being of our people."
Mrs. Wiley presented a resolution adopted by the General Federation of Women's Clubs at Atlantic City on May 23 advocating "further Congressional study" of the present broadcasting problems to preserve the "freedom of radio for the best interest of democracy."

"The women of the Federation," Mrs. Wiley stated, "are grateful to the radio chains and stations for their splendid cooperation. They do not wish to see the aid which broadcasters have given to the work of their Clubs interrupted or jeopardized in any way."

Citing his statement the aid given to the Catholic Radio Bureau of his organization, Mr. Heffron told the Committee that he believes there should be "a sound basis for the assurance" that public service network broadcasts should not be destroyed or impaired.

"We hope that this Committee," he testified, "will not only see to it that this assurance is given but that it is properly implemented and capable of being backed up."

**Says Rules Would be Detrimental**

The first of the station owners to appear at today's hearing, Mr. Wheeler said, "I think the proposed regulations would be very detrimental to the industry, would injure the program structure, and would certainly be detrimental in many ways, as far as WHEC is concerned."

He testified he believes it would be helpful if "the Congress would consider the whole question of regulation of radio and enact new legislation."

Network affiliation, he said, is "of real value to a station like WHEC," because it helps to build up the station audience and makes available a national sales force.

The only change in the terms of his station's contract with CBS was made, he stated, at the station's request and added that "I have never seen any evidence of monopolistic power on the part of the networks," contrary to the FCC majority contention of "monopolistic powers" alleged to be held by the networks.

Since 1931, he stated, WHEC has invested upwards of $200,000 in improving facilities, and added he is fearful the rules would make valueless "this affiliation that we have deemed so stable and made it possible for us to make these large expenditures."

Mr. Wheeler said he fears that important network commercial programs may be shifted under the new rules to another station with a clear channel and higher power.

Mr. Weiland told the Committee his station, WFTC, was "right in the middle of a lot of trouble" over the new rules.

Until June 1, WFTC and another station at Wilson, N. C., according to Mr. Weiland, had shared the costs of a line to Raleigh where the Mutual Broadcasting System has a line, and the two stations had been affiliated with Mutual, which, unlike NBC and CBS, does not pay all wire charges to affiliated stations.

On June 1, the Wilson station, Mr. Weiland testified, canceled its arrangement, "based upon the fact that the present rules would seem to necessitate it, and we were sitting right down at the end of the line without any network service available to us."

He said his station could not afford to pay the whole cost of the line from Raleigh to Kinston, since that would be "in the vicinity of $500 a month."

Arrangements were made for affiliation of his station with NBC Blue, he testified.

"I applied," said Mr. Weiland, "to the FCC for permission to sign the contract. They advised me that the present rules are in operation."

"It is very difficult for us to operate without a network affiliation because our listeners have become used to network service, and as a local station we cannot give the type of service the network was able to give us."

Saying that he favored a long-term contract and option time provisions, Mr. Weiland declared, "the present rules promulgated by the FCC puts our station out of the possibility of network service and possibly they would have the same effect upon a whole lot of small broadcasting stations that are trying to serve their communities."

Mr. Lee told the Committee, "We desire affiliation with only one network. We have tried affiliation with two networks. For four and a half months of this year we were affiliated with both the Mutual network and the NBC Blue network. We found that to be impractical and confusing to our listeners. It created an insurmountable traffic problem."

Conflicts in time, he said, prevented giving the station's listeners major features of the two networks.

"I think," Mr. Lee asserted, "the matter of line charges has not been stressed enough in these hearings from the point of view of the small station. For four years our station paid line charges to bring the Mutual service into our station, and paid in cash. We never derived enough revenue from the Mutual network to offset this cash outlay for line charges."

"Now we have no cash outlay for our NBC affiliation. We pay for the lines that bring these programs to us in time, a commodity that we can afford to pay with. We have a net saving of several thousand dollars a year that can now be diverted into improving our local station."

**Thinks Rules Have Damaged Station**

Mr. Lee said his station wanted an exclusive long term contract and that option time is "no handicap to us."

"The Chairman of the FCC," he declared, "has said that if the small stations are harmed by the regulations in practice, something will be done about it. That is not enough assurance for us. That is like calling the doctor after the patient is dead. We feel that the FCC has already damaged our station in creating a public misunderstanding as to the fate of the Blue network."

Senator Bone asked a number of questions about line charges and indicated he thinks these should be studied.

Mr. Hasbrook testified that the new rules "will bother me very seriously. What they are doing is to take the foundation out from under me when I am halfway across the bridge."

After being granted permission by the FCC to increase the power of his station from 250 watts to 1,000 watts, Mr. Hasbrook said, he had started construction of a new station.

His station, he testified, has a contract with CBS, which has been paying the line charge, quoted, he added, at the time of contract negotiations, at from $7,500 to $10,000 a year.

Mr. Hasbrook told the Committee he couldn't afford to pay for the line in money instead of time, and feared he might lose his network affiliation due to the rules.

Saying he has never been able to find out "who has been hurt by the present method of broadcasting," Mr. Hasbrook declared, "I just do not understand why in these times we have to change the whole system."
The following excerpts from the transcript of the Senate Interstate Commerce Committee's hearing on the White Resolution may prove interesting to broadcasters. The Chairman is Senator Wheeler.

The Chairman. Let me ask you a question right there: Let us suppose that the National Broadcasting Company, or the Columbia Broadcasting System, or any one of them, should come to the Commission and ask for a station—or, let me put it this way: ask permission to buy all broadcasting stations in the country, what would you say about that?

Mr. Craven. It is my understanding that in the Communications Act of 1934 our power with respect to concentration of stations in the hands of any one person is in the licensing authority, and I feel that we cannot grant licenses for too many stations to one person.

The Chairman. Why cannot you do that?

Mr. Craven. Because it would be against public interest.

The Chairman. And why would it be against public interest?

Mr. Craven. Because I think the Act implies that we shall not have concentration of licenses in the hands of a few.

The Chairman. Exactly. And that is because of the fact that to do so would be in effect to create a monopoly. I mean if you were to have all broadcasting stations in the hands of one person, owned by one person.

Mr. Craven. But that is quite a different thing, Mr. Chairman, in my view of passing upon business practices.

The Chairman. Just one minute.

Mr. Craven. Excuse me.

The Chairman. If you have that power, and then, as you say, you have the right to say that there shall not be too much concentration of broadcasting stations in the hands of one chain—and you do feel that you have that right, do you not?

Mr. Craven. In the matter of the licensing power.

The Chairman. Yes, that is in the licensing power. Now, if instead of giving them the actual license you give them control, is not that after all in effect the same thing?

Mr. Craven. No, sir. There is another section of the Communications Act, Section 309 (b) (2) and Section 310 (b) which gives explicit instructions with respect to control and transfer of control of stations. But that is a different thing from this.

The Chairman. But when you transfer control over a station and give all of the time of that station to anybody, you are giving him control of that station.

Mr. Craven. That would depend a good deal upon the circumstances. My position is that the type of contracts which the chain has with its affiliates does not represent transfer of control of operation of stations in the same sense as is meant in Sections 309 and 310 of the Communications Act. If that were the case then any time they made a sale to anybody of time it would be implied.

Mr. Craven. I will admit that the question of the power of the Commission is a most debatable subject, and so far as I know there is a vast difference of opinion existing even in Congress and among the members of this committee. Yes, among the members of the Commission, among the Commissioners who are lawyers, as well as among the lawyers on the staff of the Commission. And I will say that there is a vast difference of opinion among lawyers engaged in outside practice.

Furthermore, we were deeply concerned when we were convinced that the majority desired to usurp the power rather than refer the matter to Congress for a clear determination of our power and an unequivocal standard of public policy.

The Chairman. The trouble about that is that whatever Congress might write into the law there would still be contention in the minds of lawyers as to what Congress meant. That would be true regardless of what Congress actually meant, and consequently I think the only way it can be cleared up is for the courts, which have the final say as to what the intent of a statute is, to decide whether or not in their opinion it means this, that or the other. They may be right or wrong in their construction, but anyway they have the final say.

Mr. Craven. Might I say something on that point?

The Chairman. Yes, certainly.

Mr. Craven. I agree with you. There is nothing wrong in anyone going to court; and it is a pity that the industry has not the courage to take that course of action.

However, I think more than that is required in this instance. What is involved here is a fundamental change in the pattern of American broadcasting. In effect it amounts to new legislation. I believe regardless of the power of the Commission the Communications Act of 1934 should be reappraised by the Congress rather than have the Commission institute a radical change in the pattern.

Senator Clark of Idaho. This resolution that is pending before us does not, of course, look to that end, as I understand it. It seems to be more or less a resolution calling for a committee review of the Commission's order or regulations looking to an order.

Suppose that the pending resolution were held in abeyance and that extensions were granted by the Commission for the going into effect of its regulations and order. Then, suppose a bill were introduced in the Senate and in the House looking toward hearings (Continued on page 538)
on an ultimate revision of the law as it now exists and that the
Commission would agree to grant reasonable stay orders on the
effectiveness of its regulations, while a subcommittee appointed
by this committee acted in good faith expeditiously. Do you
think something would then be gained in the revision of this entire
law? I do not know whether or not I have made myself clear.

Mr. Craven. Yes, sir, you have. I hesitate, however, to tell
the committee things which it knows, but I should think that
would be helpful.

Senator Clark of Idaho. This resolution as introduced is a pecu¬
liar thing. It is not the ordinary resolution looking toward leg¬
sislation—with all due deference to the dean of the committee
in point of service—I suppose—Senator White. Is that right?

Senator White. No. Not in point of capacity, anyway.

Senator Tobey. Scripture says; "He that humbleth himself
shall be exalted."

Senator Clark of Idaho. I know, of course, that Senator
Wheeler is the chairman, but I thought perhaps Senator White
had served longer; however, that is of no consequence in my
remarks.

I was just wondering whether this thing could not be approached,
perhaps, from a little broader aspect than this resolution contem¬
plates. If the law should be revised, Mr. Chairman, I think there
is one particular in which it might well be done. Now the sta¬
tions are required to give equal time on political broadcasts, but
they are not apparently required to give equal time on pub¬
lic service programs. It occurs to me that since we shall have a lot
of time free this summer, we might have a subcommittee go to
work on a bill, rather than on a resolution, looking toward a revi¬
sion of the law, and yet not unduly hold up the regulations of
the Commission as issued. In that way something might be accom¬
plished.

Do you care to comment, Commander Craven?

Mr. Craven. I prefer not to, sir; I think that is a matter for
the committee.

Senator White. Mr. Chairman, may I say a word about the
suggestion of Senator Clark? I think I have said that I have been
working on a tentative draft of legislation which I think will
cure some serious defects in the law as it now stands. I have
definitely in mind some things that ought to be dealt with that
are in addition to anything I now have in the drafts to which
I have referred.

I introduced this resolution because I could not see any imme¬
diate prospect of legislation and because I thought there was pre¬
presented to us a definite and a clear-cut issue to which we should
give study and which we ought to face. I felt very definitely
that this was not something emergent that had arisen in front of
us. The situation which now exists has been growing up over
the years, and it took the Commission all of three years to make
up its mind—the majority of the Commission, I should say—which
course to pursue in dealing with the thing.

I felt it was proper and highly desirable that we ask the
Commission just to hold up on the execution of its regulations
until the committee had had a chance to study and possibly until
the committee had had a chance to formulate legislation. I still
believe that if the effective date of these regulations could be
postponed a reasonable time, only a part of the time which it
took the Commission to bring them forth, legislation could be pre¬
sented which would form, at least, a basis for committee con¬
sideration.

If the chairman of this committee would just say to this com¬
mission. "We want to consider legislation. We want to deal with
this subject matter to which these regulations are primarily
addressed. We want to consider some other phases of the present
law that are not satisfactory to us. We suggest to the Commis¬
sion that it hold up until we have had a reasonable chance to
do it." I think this whole problem could be solved, for the
moment anyway.

Of course, you are always going to have problems, because the
law is never going to keep up with the changes in the industry,
the art, and the science; it will always be lagging somewhat behind.
But I would definitely join with the Senator from Wyoming.

The Chairman. From Idaho.

Senator White. From Idaho. Excuse me. I knew it was
out in the open spaces.

The Chairman. One of those backward states, like Maine.

Senator White. It is backward because it is so far away
from Maine. (Laughter.)

I want to concur with the Senator from Idaho.

Senator Clark of Idaho. I was just thinking out loud when
I made that suggestion.

Senator White. That is what I am doing, so I think I must
be somewhere near right. All that needs to be done is to have
your work on the chairman. (Laughter.)

Get him to say to this commission, "We want to study this
thing. We want to undertake some changes in the radio law. It
took you three years to evolve these regulations. No public
calamity will follow if you just hold up for a little while."

I think we could accomplish something really worthwhile.

Mr. Craven. I think that if we need power, we should come
to this Congress and ask for it, in order to do certain things; that
we should recognize that there are other jurisdictions. One is the
Federal Trade Commission, and the other is the Department of
Justice. I do not think it is in the public interest—

Senator Tobey. And one is the courts on appeal?

Mr. Craven. Yes, sir. I do not think, Senator, that it is in
the public interest for the Communications Commission to usurp
power. I think that is just as much of importance in this whole
matter of public interest as anything else.

The Chairman. I entirely agree with you in your idea that the
Federal Communications Commission should not usurp power.
I agree with you entirely when you say they should not usurp power.

The question here is as to whether or not they did usurp power,
and secondly, if they did usurp power, of course, there exists the
right to go into court to test the Commission's authority.

I also agree that the law is not as explicit as it should be.
It can easily lead to some confusion. Probably it should have been
made cleaner with reference to monopolies. There is confusion
as to whether or not the Commission has the right, under the
language of the statute, to regulate monopolistic practices and to
say, "This is a monopoly; therefore we are going to find that it
is a monopoly and punish you."

On top of that, you have the question of public interest. The
term "public interest" has been recognized by the courts generally
and in these regulatory commissions as giving the commissions
very broad authority.

It seems to me, therefore, that the real question is whether or
not the Commission, under the provisions with reference to public interest and under the provisions giving them special authority with reference to chain broadcasting, have usurped authority. I think that probably the law ought to be clarified, but in the meantime there is the question whether or not Congress ought to go ahead now and say to the Commission, "Hold up all your orders while we pass a law," because if we undertake to pass a law, it may be at this session of Congress, it may be at the next session of Congress, or it may be that it will not be for two or three sessions of Congress that we will get a law passed that we might like to see.

Senator White. Mr. Chairman, may I comment just briefly on what Senator Tobey said?

The Chairman. Of course.

Senator White. I am, of course, in complete agreement with him that the Commission was entirely within its authority when it determined upon the investigation of these subject matters. I think it was within its authority, and I think it was meeting the obligation which had rested on it for a long while.

It does not follow, however, that because the law authorized the Commission to make an investigation, and the Commission upon its own responsibility determined to go ahead and make an investigation that any and every regulation which it may agree upon as a result of that investigation is either in the public interest or is within its authority to make a particular recommendation which they presumed to make.

Senator Tobey. Right there, who is to determine whether or not it is in the public interest? The courts?

Senator White. I want Congress to say something about it.

Senator Tobey. That puts Congress in the position of reviewing decisions of bureaus. We would then become a body reviewing every decision that is made.

Senator White. As a matter of fact, when we look at the legislative history—and we do it only occasionally—we will not find many occasions when that has been done.

Of course, basically it does not involve criticism of the Commission because it has made its study. It does not involve criticism of the Commission because it has reached conclusions of law. The criticism rests upon my deep conviction that the Commission undertook in these regulations to define monopolistic acts. I do not think that is within its province, and I do not think we should yield to that situation. I do not think it is the right of a regulatory body to say that this thing is a monopolistic act; that thing is a monopolistic act, and the other thing is a monopolistic act.

Then, I would not think it is within the right—and we never ought to concede it—that it is within the right of a regulatory body to determine whether you have breached the particular things which they say constitute monopoly, and pass judgment on it. You, if you go down to the Commission, are not advised, except perhaps in the most general terms, of the issue before the Commission. They have conducted hearings in which they did not permit a man to put on witnesses in his own behalf. They have conducted hearings there where they did not permit the interested party to examine, through his counsel, hostile witnesses. They have no set rules of evidence, and they have a vagrant authority and a vagrant practice and procedure. I just think that it is fundamentally wrong that we should permit that type of authority and that degree of authority in a regulatory body.

The Chairman. I am sure you would not feel that this committee, or any other committee, as a practical matter of administration of law, every time a commission decides some case or makes some rule which a particular industry or a particular party may feel affects them adversely, should permit them to come to Congress and ask us to review the decisions of that particular commission. If that should happen, then as a practical matter you would not have any decent administration of law by these commissions. It is, frankly, in my judgment, and always has been assumed to be very bad practice. But I can understand that, if that is done, then the committee, as a matter of fact, ought to lay down the rules, instead of having the Commission do it. From a practical standpoint we just could not do that. We have to leave a lot of these matters to the Commission. In this particular instance I am not going to disagree with you at all about the need of some clarifying legislation. I certainly hesitate to do it. While we have done it in some few instances, it has been generally recognized as a bad practice. Every time the Interstate Commerce Commission hands down a decision or makes some rule, we might disagree with it or the industry might disagree with it, as has happened in the past. But if we undertook to try to correct it, then you are going to have these commissions constantly looking to the Congress and being afraid to act because of the fact that they might be yanked up here to Congress. In some cases we have a right to investigate the commission, the same as we have the right to investigate the industry itself. But I am extremely hesitant about simply taking over and saying that the Interstate Commerce Commission hands down a decision, every time it makes a rule that the industry does not like or that somebody else does not like, should be brought up here before the Committee.

I think the hearings that have gone on will do some good for both sides. I think probably they will.

Senator White. May I make an observation in answer to what you have said, Mr. Chairman?

The Chairman. Certainly.

Senator White. If this were a decision by the Commission in a particular case I would have a good deal of sympathy with your point of view; but the truth about it is that this is a declaration by the Commission of a far flung and revolutionary policy. It is something that the Commission has determined to do after three years of study. That might suggest that the Commission was right.

But I think it also cries aloud that the Commission was dealing with something which it itself recognized as a basic change in the practice which had been followed by the previous Commission and by this Commission over a period of many years. There is a vast difference, I submit, Mr. Chairman, between reviewing an isolated or a particular case and giving consideration by a committee to the effects of such a change as the Commission now proposes; and I think there is a vast difference between passing upon a particular case and this committee and the Congress giving consideration to whether or not the action of the Commission is authorized by law.

That is where I pull away from you; and when I pull away from you I always have doubts as to whether I am right, but I feel very strongly that I am right with respect to this matter.

Mr. Ethridge. May I add this, Senator? I hope you will read the first two pages of my statement. I think you were out of the room when I made it. I stated then, and I repeat it, not to embarrass you, but to express the point—

The Chairman. You cannot embarrass me; too many people have tried that.

Mr. Ethridge. In the high power situation you felt it was of great moment and you introduced a resolution which was a direction of policy to the Commission. Now, I feel very strongly that this body, the Senate and the House, are responsible to the public and the public will in a degree that an administrative agency is not, and that where you have a major matter of national policy and an imminent action, as you have here, paralleling your high power matter, it is eminently proper for this body to take cognizance of it. I have rested on that particular thing and said that it was an anomalous situation where the industry was the aggressor and the Commission more or less the defendant in resisting a study of its action.

The radio industry subscribes heartily to the President's desire for a new law—in fact, much more heartily than ever since Mr. Fly has testified, because his testimony is in conflict with another expression from the President:

"This technical limitation on the number of transmitters gives the Government its principal function in the realm of radio, the right of referee to determine who the operators of the limited number of transmitters shall be."

June 20, 1941 — 539
In the same letter the President also expressed the desire to know how to keep radio free "as part of our purpose to keep all channels of public information free . . . how to prevent monopoly of radio operation or ownership and how best to utilize radio in the public interest."

We do not feel, therefore, that we are either improperly or whimsically before this committee. Personally, I am hoping that the committee will share the feeling of Senator Smith when he said: "I wish I knew more about this whole operation," and undertake to find out more; and of Senator Wheeler, when he said on page 213: "There are vital problems of national policy involved in this matter."

We of the radio industry might not like the result when it is transformed into law, but it will at least be more democratic if 96 Senators and 435 Representatives make the law than if seven men make it.

Personally, I feel that it will be a fairer law and a fairer administration if you make the rules.

Mr. Fly occupied almost four pages setting out the number of witnesses and the number of words in the hearing in giving the radio people what he called "not only the due process of law to which they are legally entitled but a full measure in excess" in the hearings on the regulations. The only figures he left out were the weight of the volumes in pounds and how much they would measure if laid end to end. But what he did not say was what he could not say, but which we can—that a least a great many of us in the radio industry feel that the verdict was arrived at before the indictment was drawn.

When I was a newspaper man in Georgia there was a negro by the name of John Downer who was arrested for rape in north Georgia. He was granted a change of venue to the adjoining county. The National Guard was called out and lined the walk way from the jail to the court house and occupied all of the seats in the court house except those reserved for the jury, the judge, and counsel. In the afternoon of the day he was arrested, or the day the Guard was called out and the indictment was drawn, he was tried and convicted and sentenced to be electrocuted.

Everybody knew in advance what would happen, but the State of Georgia was proud that it had not lynched him. It had given him due process of law, but none of the substance of justice.

That is the way I feel about this matter. I feel that it is only necessary to have the Commission's order for hearing, which is in the record at page 95 and was read earlier by Senator Tobey, to know in general terms what the outcome will be. I think that is probably true in the newspaper case as well. The order is indeed likely to be a death sentence.

I favor the White resolution because I hope it will result in a new law clarifying what Congress intends and defining the Commission's powers, duties, and limitations.

The Chairman. It seems perfectly simple to the laymen; but if the White resolution holds up the orders of the Commission—and I am frank to say that we are too severe in giving such a short time in some instances, but they have the right to go to court, and I think they not only should have the right to go to court in a particular instance where it is felt that the Commission has exceeded its jurisdiction, but the Commission ought to grant them a stay. I do not agree with the Commission's actions in refusing a stay. I think it is wrong, particularly if application is made in good faith. But I think you can appreciate some of the difficulties you are going to have with new legislation, because you will find that there will be a great divergence of opinion both in the House and the Senate upon what the provisions of the new law should be. That is going to be particularly true when you come to write into the law specific rules and regulations. You are going to have a very wide divergence of view upon that question, both in the committee itself, and in the floor of the Senate and in the House, which will probably mean a long delay in getting legislation through. That is where most of the difficulty comes in connection with legislation, when you begin to write out the rules and regulations which should govern the Commission.

Mr. Ethridge. I am speaking of the course of regulation. The Pottsville case and the subsequent decision the Circuit Court gave the industry no great hope as to regulation. I for one felt it was bad to abolish the system of open examinations of license applications in public hearings. I felt that under the Commission's theory, set out in one section of the Sanders case, cited by the Chairman of the Commission in his testimony, too little attention was being paid to the economic consequences of indiscriminate license granting. By that I mean I had thought just a mere granting of more licenses for the sake of removing restraint of trade or creating competition might be a good thing in some circumstances but one must consider the consequences that may arise. I have seen that happen in the case of newspapers where they took all sorts of advertising.

The Chairman. I think it a mistake to grant too many stations in a community because you may force them to put on more advertising.

Mr. Ethridge. Yes, sir.

The Chairman. Or to put on cheap advertising that would destroy the effectiveness of programs.

Mr. Ethridge. But, Senator Wheeler, the Sanders case is the Commission's theory at the moment that does not conform to the economics of the situation. That is another argument moving us to ask the Senate to give us a new law. I think it is bad for radio.

The Chairman. You cannot disagree with me in the matter of the need for a new law.

We have been very happy to hear the Chairman of this Committee say on several occasions that he thinks the networks have been fair in broadcasting discussion of current controversial questions. At the same time, it is apparent that there is in his mind and in the minds of many other thoughtful persons uneasiness on this score. I stated publicly six years ago that I thought fairness in news and discussion, and freedom from editorial bias, should be a condition to holding a broadcasting license. In that public statement I said that the Commission if it had the power, and the Congress if the Commission did not, might well make such a fairness a condition to receiving or holding a license. I have come now to believe more emphatically than I did six years ago that such fairness is absolutely essential on the part of a limited medium if it is to fulfill its social obligations in a democracy. I am absolutely confident that under Columbia's publicly proclaimed code and under the similar codes of the National Association of Broadcasters, the other networks and most of the individual broadcasters, this fairness is assured.

The Chairman. I should think it would be helpful to the industry itself if something of that kind were written into the law, because then, in instances in which pressure was brought to bear you could turn to the law.

Mr. Paley. At least it would eliminate the vagueness that now exists in the minds of some broadcasters and, I think, in the minds of some Commissioners.

The Chairman. It would eliminate vagueness when people undertook to put pressure on you. You could simply turn to the law and say, "This is what we have got to do."

The Chairman. Did they not serve you with a copy of these rules prior to their adoption?

Mr. Paley. There were suggestions made, I think, at the December hearing, various suggestions, none of which went to the extremes that the rules now represent. I think, as a matter of fact, there were three or four alternative suggestions as to what the Commission might do; and at that time we objected to the rules very strenuously and tried to point out why, even in the form when they were not quite so drastic, we thought our operations would suffer tremendously and that public service as such would also suffer.
The Chairman. Did you ever give the Commission any constructive alternative suggestions yourself? I understood from Chairman Fly that you did not.

Mr. Paley. Our suggestion made at that time, and it is the suggestion we have been making ever since, that if anything as drastic and revolutionary as that is to be done to any broadcaster or any group of broadcasters, that should be a problem for the Congress or some higher authority, for them to have something to say about that.

The Chairman. But it does seem to me that, in the first place, you ought to have tried to work things out; that when they made certain suggestions which you thought were wrong you should have pointed out to them the mistakes as you saw them, and made to them some alternative suggestions. Instead of that as I understand the situation, you turned everything down.

Mr. Paley. Well, Senator Wheeler, I can remember one conversation I had with Chairman Fly when we were given to understand that we would probably be outlawed about these things, and he said maybe they were not so drastic as I thought them. I said, "Now, really what have you in mind? How do you intend to offer a solution of this? How do you answer the practical suggestions that we make?" And the only answer I got was, "Wouldn't I be a fool to tell you what I have in mind." That was as far as I got with Chairman Fly in trying to work this thing out.

The Chairman. And what do you think he had in mind?

Mr. Paley. Oh, I know what he had in mind—these very rules we are now here talking about; rules that I think will destroy our industry, or at least destroy network broadcasting as a part of the industry.

Mr. Paley. Going back to the argument about exclusivity, I want to point out that unlike the publication field a station affiliated with a network has two functions. In the publication field you have the local newspaper and you have the national magazine, each attempting to do a part of the job. A broadcasting station affiliated with a network has to do the combination of the local and the national job. He provides his own local programs in an attempt to render the public service necessary for that community to have in that regard. Then he turns to us to do the national job. So, as you will see, it is the over-all job. As long as we are doing a complete national job over that station we can do a very well ordered and balanced national job, one which, from the record, a record that has been made by the broadcasters of this country, demonstrates the fact that we have been able to respond to the public desires and needs, and demonstrates that we can take care of the public service in a very fine way. When a station starts out to take this national service from two or three sources it gets a certain amount of duplication. And you start to take our incentive away from us, because someone will be cashing in on what we have built up.

The Chairman. Oh, now, I do not think they will take your incentive away.

Mr. Paley. Well, if stations won't take our time that will happen.

The Chairman. It might and it might not, but I do not think it will happen that it will take your incentive away.

Mr. Paley. I see that I have not convinced you, Mr. Chairman. Nevertheless I want to say to you that I think I am right, that I feel certain I am right about it.

The Chairman. You have not convinced me that it will take your incentive away when you have done the job you have; when you came into the radio broadcasting field without anything and licked N. B. C., you certainly cannot convince me that you are not going to continue.

Mr. Paley. I am only talking now about the incentive toward developing that kind of service, that kind of service you want from us.

The Chairman. You are going to have the same incentive and the same service; yes, you must have the same incentive in your own system, and each of the other companies will have it. You will want to build up your stations and you will want to build up the Columbia Broadcasting System.

Mr. Paley. But we do not want to build it up for someone else to come in and cash in on us. Let us suppose that a lot of advertising hook-ups developed. In that case I think you would have chaos and that it would be destructive.

The Chairman. I think it can be worked out in fairness to the chains. I think we want to be fair to the chains and at the same time be fair to everybody else.

Mr. Paley. I want to say one thing right there as we seem to disagree on this particular point and yet we seem wholly to agree on other points I have discussed here. For instance, this whole question of option time—

The Chairman (interposing). This has to be worked out.

Mr. Paley. But elimination of option time is a part of the rules under which we are supposed to operate.

The Chairman. I understand that, and am not agreeing entirely with the report of the Commission by any manner of means.

Mr. Paley. And is not that a good reason for passing this White resolution?

The Chairman. No, I do not think so. From a practical standpoint the contention here is that what you want first is a hearing and an investigation of the matter. You are getting that without the adoption of the resolution, if we were to pass the resolution and hold hearings the only thing would be that you would come here and testify all over again.

Mr. Paley. Oh, no.

The Chairman. This is just a cold-blooded practical matter. You would not get as many people to attend those hearings as you have now, because to a large extent you have covered that same thing. Frankly it may be necessary and probably some think it would be best to have an entirely new law, or at least some amendment of the present law. I think that subject should be gone into, and it may very well be gone into. I do think the law ought to be amended in some particulars. I think some of these points should be clarified to the end that the industry may know as definitely as possible what they are going to have to do, and what rules of the game will be set out, instead of depending on those who may be on the Commission at the time. I think there is a great deal in that. I have had that feeling for a considerable period of time.

Now, there is the probability of a bill being introduced, and when it is introduced you will have a hearing upon that particular bill. We will discuss its various provisions, and doubtless some of them you will oppose and then that bill will be threshed out.

In the meantime I think you can go into court, if you wish to do so, and have, as Chairman Fly intimated, the knowledge that the matter of the rules will be held up by stay order while the case is in court.

Mr. Paley. If you think there is going to be a new radio law, and I certainly devoutly hope so, would not that be the time to have all these considerations looked into? What is the rush here? We have had the law for 14 years and have operated pretty well. Why have these drastic and revolutionary ideas from day to day when broadcasters are giving the best public service any industry has ever been called upon to give?

The Chairman. You will have to ask the Commission about that.

Mr. Paley. We are asking you to hold up the Commission's action by passing this resolution. That is the only way we can have any assurance it will be held up. We can very well wait a
year or so if necessary; and if a new law is to be written is not that time to look into all these things so that we may have a well-rounded radio law? Would not that be better than having the radio industry damaged to a great and unnecessary degree? And that is just what will happen if we have to live under these rules or parts of these rules for the next year or so. Why jump onto something that has rendered pretty good service indeed?

The Chairman. You do not think it necessary to prove that?

Mr. Paley. As a matter of fact I would like to have you see some of the serials that have been gotten out.

The Chairman. I think on the whole the chains have rendered a very good service. On the other hand, I do not think you are lily white by any manner of means in all of your dealings.

Mr. Paley. I agree with that.

The Chairman. Either in your dealings with the Commission or in your dealings with the public or anybody else. But nobody is. Candidly I think every new industry that has come up as chain broadcasting has shows some of these situations, but for a new industry you are less subject to criticism than almost any new industry that has sprung up.

Mr. Paley. Then, what is the rush? Why cannot this thing be held up until you gentlemen here in the Congress have had an opportunity to write a new law that will take care of the advance in the art, that will take care of the changes that have come about since the present law was enacted?

The Chairman. That is a question you will have to propound to the Commission.

Mr. Paley. I did, and my answer was the eight rules and regulations we are now complaining about; and that is why we come before you, to try to get relief. Give us peace while you have an opportunity to examine the whole radio structure. Then, after you have decided what if anything is wrong with us, you can put into the new law those things you think ought to be prohibited, or those things that would spell the kind of regulation you think we should have in the future.

As a matter of fact, even if the Commission has the power now, and let us forget for the moment the question of jurisdiction, they may not be wisely exercising it. They may be doing things you would not go along with.

The radio industry comes to this committee and asks that you give us peace, so that these things may not happen. We ask you to examine this question very carefully and at the end of the hearing give us a law, a well-defined law, under which we may live. We think that is not asking too much.

And now, finally, gentlemen, may I just very briefly tell you why I felt that if the Commission can exert the kind of powers it now seeks to exert, can regulate the whole business of network broadcasting and network station relationship, can impose a whole multitude of conditions under which it threatens to jerk stations' licenses, nobody in broadcasting is going to have the faintest conception of what its ultimate powers may be and nobody is going to be able to call his soul his own.

The whole industry today is harassed, worried and jittery and finds itself threatened and condemned as if its history were shabby and evil. If Chairman Fly can successfully assert the revolutionary powers over the business practices of the networks and the stations, make no mistake about it, gentlemen, his control will be so absolute that we will have in this field regulation by rule, by parts of these rules for the next year or so. If this type of regulation is dangerous with respect to a business dealing with wholly physical things, how much more deadly is it in the whole realm of information, ideas and culture.

I have heard it argued that since the Commission's lawyers assert the broad powers which we here assail, and our lawyers strenuously deny, the whole issue is one for the courts. May I point out to you that we could well suffer irreparable damage in the years while this legal fight was in progress, and if I am sound in my contentions, the public would suffer with us at the very time when broadcasting should, more than ever before, be a powerful instrument for the public good. If we win, it may well be too late. If we lose on the technical issue of the Commission's power, the important issue of public policy still is this: Did the Congress intend and does the Congress now want a radical revision of the whole broadcasting structure by administrative fiat?

I want to say this. We have been operating under the present law for fourteen years. I believe that every Government department and every defense agency in Washington will tell you that we are doing a job for national defense. Our stations are satisfied, and only a Commission majority, which has been constantly cynical about the major networks, and only a small segment of the industry, are complaining; and this small segment of the industry complains solely in the interest of being enabled to sell commercial programs to the affiliates of other networks. If this monkey wrench is to be thrown into the machinery it should not be thrown at a time like this. I hope you will stay these regulations and work out a new law. Under such a program we can devote ourselves immediately, completely, and fully to our broadcasting again and play an important part in the present emergency.

You have expressed some hesitancy, Senator Wheeler, on the score of how long it will take legislation to go through. I cannot dispute with you as to how long it will take to get new legislation. You know and I do not.

The Chairman. I do not think anybody knows.

Senator White. I can tell you how long it will take to pass it in the Senate if Senator Wheeler gets back of it. He can produce a draft in 24 hours, can get it reported out of his committee in 48 hours, and get it through the Senate in ten days' time.

The Chairman. I will say you are stretching it.

Mr. Paley. I can assure you in complete good faith that the broadcasters will do everything they can to expedite the obtaining of whatever information your committee may want in this connection. I am told that there are Senators on this particular committee who are perfectly competent to work out problems as intricate as ours, with fairness to the public and to all parties concerned, and to do so with reasonable dispatch.

We have told you as earnestly as we can that we believe these regulations really imperil the broadcasting structure of this country. The questions that have been asked by a number of the Senators on this committee, and the statements which have been made have indicated to you about the wisdom of some of these rules. Chairman Fly himself seems to have made some on the spot modifications while he was testifying, and he has just released a telegraphic interpretation of one rule and a formal modification of another. All this casts doubt on the workability of the whole scheme and suggests that the public interest cannot be seriously damaged by holding up the effectiveness of these rules until you can reach your own orderly decision.

We are hopeful that a careful, impartial and judicial examination of broadcasting by Congress will provide us with a law that is clear and a manner of administration that is fair.

We are hopeful that as a result of your deliberations we will no longer be besieged by doubt and confusion and threatened with punitive action, and that we will be allowed to bend our energies toward evolving a constantly improving broadcasting service.

We are hopeful that an investigation such as is called for by the White Resolution will provide a law that insures freedom of the air and eliminates the threats which radio is now facing.

We are hopeful of all these things, and I am convinced they can be accomplished.

First of all, I do not think that the primary issue before this committee is a question of jurisdiction, because, after all, if the
Commission did not have jurisdiction, if it exceeded its powers and if we can get into court to test that—and about that there are some handicaps which I will explain later, pursuant to Senator White's suggestion that we address ourselves to the question of procedure—why, then, we will get to court, and if we are right, the action of the Commission will be set aside.

But, as has been pointed out by Senator Johnson and mentioned by Mr. Ethridge, the Supreme Court has recently pointed out how limited is the scope of judicial review in administrative affairs. In the Pottsville case Mr. Justice Frankfurter practically invited those who quarrel with the wisdom or lack of wisdom on the part of administrative agencies to come to Congress, saying, in effect, that Congress is the agency to correct administrative mischief.

The Chairman. Of course the reason he probably said that was to "pass the buck" back to Congress.

Mr. Burns. I do not think that is so. Senator Wheeler. Apart from any judgment you might want to express about the Court, I think for the last ten years there has been a steady development in our system whereby the courts, either because of words in the statutes or because of a feeling that under our constitutional system it is not a judicial task to review administrative action, they have said, "We will only look to see whether or not errors of law have been committed."

Where can you go except to this committee? We say, quite apart from the issue of jurisdiction, that these regulations are unwise.

The issue of jurisdiction is important, because if the Chairman and his majority associates have acted without jurisdiction, it certainly throws light upon the question of wisdom. Secondly, in the Supreme Court it may well be that our activities will be so circumscribed that serious damage to private and public interests will have been brought about.

The Chairman. I think that there probably is a very close question as to whether or not the Commission has jurisdiction in certain instances. Of course if it has exceeded its jurisdiction, certainly the courts would take cognizance of that and say that it had exceeded its jurisdiction; there is not any question about that.

Mr. Burns. But, in the meantime, we may have been very seriously damaged, because it may take a year or a year and a half before that issue is ultimately decided; and in any event we will be back here, because when a commission can make a judgment after 14 years, and when you have considered the other factors which have been brought out here, and additional ones which I hope to call to your mind, it is plain that the law needs clarification; it has to be stream-lined and brought up to date, because 14 years ago what is today a major force in radio broadcasting, namely, the networks, was virtually unknown. Certainly networks were unknown in so far as their present operation is concerned.

The quarrel we have with the Commission is that it did not pay any attention to our evidence but went ahead on preconceived prejudices, and out of it came first the committee report. Some of you Senators are familiar with the shortcomings of that report, where it was shown in a committee hearing that it was false in certain instances. Of course if it has exceeded its jurisdiction, certainly the courts would take cognizance of that and say that it had exceeded its jurisdiction; there is not any question about that.

Mr. Burns. But, in the meantime, we may have been very seriously damaged, because it may take a year or a year and a half before that issue is ultimately decided; and in any event we will be back here, because when a commission can make a judgment after 14 years, and when you have considered the other factors which have been brought out here, and additional ones which I hope to call to your mind, it is plain that the law needs clarification; it has to be stream-lined and brought up to date, because 14 years ago what is today a major force in radio broadcasting, namely, the networks, was virtually unknown. Certainly networks were unknown in so far as their present operation is concerned.

The only evidence dealing with exclusivity and time option was where the same identical objections are raised. Is not that due, to a large extent, to the engineering side of it?

Mr. Trammell. Senator, of course I cannot answer that, but here is a case where the interference in Cleveland would be up to the 4.8 millivolt line, and the Commission has subsequently, in spite of the need, as Mutual has stated here, for a full time station in Cleveland, denied the application, and later in other cities it has granted applications where the interference was much greater.

The Chairman. Perhaps the political pull was not as great in Cleveland as it was some place else. That is really one of the bad things that have gone on down at the Commission, that there has been too much favoritism shown here or there. I do not think that NBC has suffered any from it.

Mr. Trammell. We have certainly not opposed any station coming into Cleveland, Senator.

The Chairman. No; I know you would not. I do not think NBC or Columbia either, has suffered any at all.

Mr. Trammell. We have certainly not opposed any station coming into Cleveland, Senator.

The Chairman. No; I did not mean to infer that you had. There is another thing: The Commission goes ahead without hearings and grants licenses or transfers, and in other instances it holds hearings. It seems to me there ought to be a general rule laid down by the Commission so that everybody who comes in there, regardless of whether he is poor or rich, or whether he is influential or whether he has political backing or not, would know what is going to happen, and that rule should be adhered to.

Mr. Trammell. I agree with you fully.

The Chairman. I think some of the things done in that respect are outrageous. That is one of the reasons why the Interstate Commerce Commission with all of its difficult problems has certainly in my time not been accused of being influenced by members of Congress. I certainly would hate to try to do it myself.

Senator White. Mr. Chairman, you have made a good statement on that score and I will remain silent. I have some ideas myself on that subject but will let your statement stand for me, if you do not object.

I note in the Wednesday, June 18, 1941 issue of Variety, a headline reading: "Rivals Exploit Radio Grief. Say Air Ads to
Cost More. Network Sales Departments Aware of Newspaper and Magazine Contact Staffs Making Capital of Present Trouble with FCC—but They Are Readying Counter-Blasts When Hearings Are Out of Way."

The Chairman. What is that paper?

Mr. Trammell. That is Variety.

The Chairman. That does not worry you very much?

Mr. Trammell. I do say this, Senator: Without our being able to deliver stations, without having any option time, and in trying to sell coast to coast, advertisers will be going into other media.

The Chairman. Frankly, I cannot see very much excuse for not giving you option time. I may be wrong about it, but I cannot see very much reason why you should not be able to have it. If I wanted to give you an option on some of my time, I do not see any reason why I should not be permitted to give you some option time. I am frank to say that, unless there is some reason I do not know of now, I think the Commission is wrong in saying you should not have any option time at all.

Chairman Interprets Regulations

In response to many requests made to him for a brief interpretation of the Federal Communications Commission's new chain broadcasting regulations, Chairman James Lawrence Fly today released the text of a recent telegram to a broadcast station covering certain phases of this subject:

"May 24, 1941
Day Letter Prepaid

"Mr. Gordon P. Brown
Radio Station WSAV
192 S. Goodman Street
Rochester, New York.

Retel May 23 you are authorized to release following statement as my interpretation of the chain broadcasting regulations. The regulations do not prohibit a contract establishing a network and station affiliation whereby a network agrees to offer all its programs to one particular station in a community. However, the station must make a reasonably prompt determination whether it will carry any program and there can be no restriction upon the right of other stations in the community to make arrangements for the broadcast of any refused or rejected programs. Nor do the regulations prohibit a contract whereby a station agrees to take all the programs of a network if the time is available when such programs are offered, subject to the station's right to refuse or reject the programs pursuant to section 3.105 of the regulations.

JAMES LAWRENCE FLY,
Chairman, Federal Communications Commission."

Chairman's Letter to Committee

Chairman Fly made public the text of a letter he has addressed to Senator Burton K. Wheeler, Chairman of the Senate Interstate Commerce Committee. It reads as follows:

"June 14, 1941.

The Honorable
Burton K. Wheeler,
United States Senate,
Washington, D. C.

Dear Senator Wheeler:

"I shall, of course, remain at the service of the Committee during the course of the current investigation and shall be prepared to appear later to assist the Committee to the best of my ability. Meanwhile, I think it may be helpful to comment now on two significant points mentioned by recent witnesses:

"1. Witnesses have urged that the large stations may take over the good programs from the small stations. On the contrary we have consistently pointed out that a station may make a contract with a network which will give that station first call upon all the network's programs. This being true, no station can deprive another station of its network programs unless the latter station, itself, has voluntarily rejected those programs. This was made clear in my telegram to Gordon Brown of Rochester, New York, on May 24. For the information of the Committee, I attach herewith a copy of that telegram. I have checked the point with the Commission and we are agreed upon the foregoing construction of the rule.

"2. It has been suggested that there has been a reversal of the practice by which the Commission has maintained a station on the air throughout the administrative proceedings and throughout the litigation involving the question as to whether the station should continue on the air. This is a long-standing policy of the Commission and this is the policy which I, as Chairman of the Commission, assured the Committee would be applied in connection with the antimonopoly rules. The case urged upon your Committee was that involving the granting of nighttime permission to Station WHDH at Boston on the same wave length as Station KOA at Denver. KOA unsuccessfully sought to stay the grant to WHDH. There was no threat to the continued existence of KOA as a 50 kw station and there is no real impairment of its day or night service. Permitting the Boston station to operate at night during the period of litigation is a far cry from the notion that the license of any station would be terminated without a completion of any judicial proceeding involving that question.

Respectfully yours,

JAMES LAWRENCE FLY,
Chairman."

Commission Clarifies "Blue" Order

To clarify the Commission's intent that the National Broadcasting Company shall have ample time in which to dispose of one of its two networks in order to conform to the new chain broadcasting regulations, the FCC amended the last paragraph of its order of May 2 so as to leave no question but that the stipulated 90-day deferment period pertains to disposal of one NBC network as well as to the disposition of individual stations by networks, and, further, that the effective date of compliance in either case "may be extended from time to time in order to permit the orderly disposition of properties."

The concluding paragraph of the order, as amended, now reads:

"IT IS FURTHER ORDERED, That these regulations shall become effective immediately: Provided, That, with respect to existing contracts, arrangements, or understandings, or network organization station licenses, or the maintenance of more than one network by a single network organization, the effective date shall be deferred for 90 days from the date (May 2, 1941) of this Order: Provided further, That the effective date of Regulation 3.106 with respect to any station and of Regulation 3.107 may be extended from time to time in order to permit the orderly disposition of properties."

In thus clarifying its purpose that the networks and stations concerned shall have ample time for adjusting themselves to the new requirements, the Commission points out that it is now permissible for stations to enter into new affiliation contracts with NBC, pending disposal by the latter of one of its networks, if such contracts satisfy all other requirements of the May 2 regulations.

Technicians Shortage

Following is a summary of a survey of the shortage of broadcast technicians which the NAB is sending to the National Selective Service Board. That board, if it finds it advisable, can recommend that local boards give special consideration to broadcast technicians. Under the law, no blanket exemptions are permitted. Broadcasters may be able to use this information to advantage in discussing individual problems with local boards. Seventy-six percent of the radio technicians employed by the Broadcasting Industry May 1, 1941, are either within the Selective Service ages 21-35 or hold reserve commissions.
More than six percent of the radio technicians have been drawn from the industry to the armed forces by Selective Service, enlistment or call to duty as reservists. Three percent of presently employed technicians hold reserve commissions and are subject to immediate call. Twenty-three percent of presently employed technicians are single men, subject to early Selective Service call.

In addition, heavy toll in technical ranks has been taken by the FCC, apparently for monitoring service; by the Civil Service Commission for specialized training courses; by other Federal Agencies, and by other defense industries in need of men with such training.

This heavy drain is not being replaced. Training schools which formerly trained men for technical positions in the broadcasting industry are now devoting their entire facilities to training men for Army, Navy and Aircraft communications services.

The stringency of the situation is reflected in the majority of stations reporting difficulty in securing technical replacements. Many stations report inability to obtain any replacements and are forced to operate “short-handed” with costly over-time payments. Others have been forced to take inexperienced replacements who lack the required FCC operator’s license and are of little value until trained for six months. Those reporting no particular difficulty yet are, for the most part, larger stations. These have drawn replacements from the ranks of the smaller stations by the ability to pay higher salaries.

As of the time of this survey the situation is difficult, but the above facts reveal that it is rapidly moving to a point where continued operation of the nation’s broadcast stations is endangered.

BMI

BMI Composers Hit the Jack Pot

Broadcast Music, Inc. announced today that checks were being sent out to authors and composers in compensation for the performance of their works on the air during the first quarter of 1941. This marks the first time in the history of music that authors and composers have been paid performance royalties on popular music in direct ratio to the performance of their compositions in the United States. They are receiving 2¢ per performance per station, representing double the amount which BMI originally stated it would pay. In the case of a network hookup, payment is made for each participating station. Publishers’ payments will go out next week and will include a 1¢ bonus per performance per station over the contract price.

Under the BMI system of performance payments, individual hit numbers earned from $800 to $1200 for their writers in the first quarter of this year. Research reveals that the amount BMI is paying on performances for a hit number for a quarter-year is higher than that paid heretofore to all but approximately 175 writers for the performance of their works for an entire year.

Authors and composers of BMI hits are individually receiving more than five thousand dollars a quarter from their combined royalties (air, sheet music and mechanicals). These payments are going to writers who, for the most part, have not been able to earn any money from their talents for musical composition prior to the formation of BMI.

ASCAP Decrees Suit

ASCAP has announced that it has authorized its legal counsel to institute civil suit for damages under the Sherman Anti-Trust Act against the NAB, BMI, NBC and CBS. The suit, if brought, will be vigorously defended.

New Radio Logging Begins

The radio log and program analysis of popular music compiled by the Office of Research, Radio Division, and directed by Dr. John G. Peatman, Professor of Psychology of the College of the City of New York, got under way on Monday, June 16th with the most complete records of performance which have been made available. BMI is financing the research job by Dr. Peatman following a refusal by the Accurate Reporting Service to check performances on all New York Stations. The work is done both day and night and distributed the following morning to those interested in performance compilations. The figures constitute a valuable record which will be useful later on in combining trend studies in regard to popular music.

Suit to Clarify Performance Rights in Marks’ Songs

Broadcast Music, Inc. and Edward B. Marks Music Corporation commenced suit against ASCAP for a declaratory judgment in the Supreme Court of New York today (Wednesday). The action is a test case which does not seek damages but asks that “the court declare the rights and other legal relations of the plaintiffs and ASCAP in certain musical compositions. The compositions selected for the test case are Bluebird by Louis Pollack and Tob Seymour, You Fit Into The Picture by Bud Green and Jesse Greer, and Mississippi River by J. Rosamond Johnson and Frank Abbott. All of the composers of these compositions, except Abbott, are members of ASCAP.

Edward B. Marks Music Corporation resigned from ASCAP at the end of 1940 and granted all of its performing rights in the works included in their catalogue to BMI. The suit does not involve in any way the numbers in the Marks’ catalogue which are presently being performed by BMI licensees. However, BMI has to date voluntarily refrained from the performance of works written by ASCAP members during the period of their membership in ASCAP as ASCAP has asserted certain rights in these works. BMI officials pointed out that a clarification of the issues involved would be beneficial to all parties concerned and to the public as the result of ASCAP’s claims has been to prevent certain works from being performed. Under the agreements between ASCAP writers and their respective publishers, an executive of BMI said. ASCAP writers assigned all of the performing rights in their works to their publishers. As a result, Edward B. Marks Music Corporation claims that it owns all of the performing rights in the works named in the suit. ASCAP has not hitherto made clear whether it contends that the performing rights under these works are the property of ASCAP’s publisher members or ASCAP’s composer members. The suit is intended to have the court declare who owns the rights so that the compositions involved will be available for performance.

Let’s Look at the Record

Listening to musical radio programs has increased since January 1st.

The “vested interests” of the musical world said it couldn’t be done. They said that after January 1st, 1941 the public would stop listening to musical programs on the radio. They said their music was indispensable.

What actually happened? Let’s look at the record.

<table>
<thead>
<tr>
<th>Average C.A.B. Rating for Period</th>
<th>Popular</th>
<th>Concert</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jan. 1940 to April 20, 1940</td>
<td>10.0</td>
<td>9.6</td>
</tr>
<tr>
<td>Jan. 1941 to April 20, 1941</td>
<td>10.2</td>
<td>10.2</td>
</tr>
<tr>
<td>Percent of Increase 1941 over 1940</td>
<td>2.0%</td>
<td>6.2%</td>
</tr>
</tbody>
</table>

Listening to musical programs went up. This increase ran against the general listening trend. More network programs of popular music are being sponsored. The Hooper analysis shows an increase of 9% in the number of hours devoted to sponsored popular music on networks.

Musical Feast

There are so many solid hits now among the BMI controlled tunes that coin machines are not only reaping a harvest, but records
are selling unusually well. The *Hut Sat Song* is the sensation of the year having climbed to the top more rapidly than any other song this season.

*Amapola* is still going strong; *G'bye Now* is fighting for the top and *My Sister And I, Maria Elena* and *Daddy* are all in the first division. Coming into the spot light of popularity are, *Everything Happens To Me, A Little Bit South of North Carolina, Green Eyes, Let's Get Away From It All, Friendly Tavern Polka,* and *The Things I Love.* Among the possibilities, Billboard has this to say in regard to BMI's *The Reluctant Dragon:* "This song comes from the soon-to-be-released Walt Disney movie cartoon feature of the same title. It is quite possible that it may be a strong follow-up to the currently popular *Daddy*".

**“Dipping Into the Claret”**

Under date of June 18th, *Variety* points out in a Hollywood dispatch that a lifetime studio job awaits the songwriter who can get picture tunes on the air. Says the correspondent:

“Understood studio heads have grapevined the word that the one who comes through with a solution to the problem goes on the payroll for life, or rather the life of the studio. Unique arrangement is the result of the alarm felt at 20th-Fox and other major studio front offices over the dismal grosses of musicals. Since the first of the year, when the broadcasters broke with ASCAP, not a single musical has earned its keep and the red smears are said to be broad and scarlet.

“While in somewhat of a dilemma over the reasons behind the alarming grosses, studio heads concede it is no secret why musicals are hitting so many sour notes at the box office. It is pointed out that in previous depressions in picture revenue, musicals arc hitting so many sour notes at the box office. It is pointed out that in previous depressions in picture revenue, musicals were the only bright spots. But in the current situation, musicals are lagging behind the other picture divisions.

The Labor Department reports that the cost of living advanced 0.7 per cent from April 15 to May 15, and on the latter date was 2.4 per cent above the level of last June. The increase since August, 1939, has been 4.4 per cent.

**A.C.A Plans**

The A.C.A (C.I.O.) has decided to concentrate its drive to organize broadcasting employees to the area “bounded roughly on the north by the Great Lakes, on the east by Boston, on the south by Virginia and on the west by Pittsburgh.” This was decided at an executive committee meeting May 17 in Philadelphia.

**Cost of Living**

The Labor Department reports that the cost of living advanced 0.7 per cent from April 15 to May 15, and on the latter date was 2.4 per cent above the level of last June. The increase since August, 1939, has been 4.4 per cent.

**A. F. of M. Convention**

The Seattle convention of the A. F. of M. directed the union’s executive board to “make every endeavor... at the earliest possible moment” to solve what the delegates apparently thought was an extremely serious situation growing out of the use of recordings.

This action was taken in lieu of action on several resolutions directed at the making and use of recordings.

The convention rejected a resolution which would have revoked a recent rule by the national officers against the announcement of engagements by bands playing on the radio.

All officers were reelected, and Dallas, Texas, was chosen for the next convention.

James C. Petrillo opened the convention with a lengthy attack on Thurman Arnold.

**Bankers Hear Talk on Radio**

*Representing the NAB, Craig Lawrence, commercial manager of the Iosca Broadcasting Co. and member of the NAB Sales Managers’ Executive committee, addressed the annual convention of the American Industrial Bankers Association June 17, at Colorado Springs, Colo., on “Radio and the Industrial Banker.” Highlights of Mr. Lawrence’s speech are given here. A limited number of complete copies of the talk are available free upon request while they last.*

Broadcasting is one of the greatest social forces of our time, as its growth during the past ten years will illustrate. In 1930 there were 12 million radio homes in the United States; in 1940, over 29 million, a gain of 250 per cent. In 1930 there were no automobile sets; last year there were 8 million. Ten years ago the total sets in use were 13 million; today we have the staggering total of 50 million sets, exceeding the number of telephones, electric refrigerators and washing machines combined.
Radio has an especially significant social aspect, representing the quickest way to communicate with our millions of citizens. Seventy per cent of the radio homes in the United States—the Glutzes and the Morganbnits—heard President Roosevelt declare a total emergency, by radio, meaning that 90 million people in over 20 million homes were listening.

Although a child of the depression years, radio advertising has increased from a gross of 62 million dollars in 1930 to 207 millions in 1940. It caused a radio increase of 850 per cent, outdoor advertising declined 30 per cent, newspapers declined 31 per cent, and farm paper advertising fell 51 per cent—chiefly because radio is extremely sound as a social force.

The real meat of radio consists not merely of entertainment, but in the free services given the radio public: the broadcasting of News, fast, accurate, unbiased; of such undramatic things as weather forecasts, temperature reports, livestock and grain quotations, and other public service features of that type. It is the broadcasting of King Edward's abdication speech, a Roosevelt Fireside Chat, Winston Churchill reporting to an empire, America's Town Meeting of the Air, a Toscanini Symphony, the New York Philharmonic, and dozens of other educational and cultural features for men, women and children. That's why Americans listen to 50 million radio sets an average of four and one-half hours per day. That's what really makes broadcasting.

David Sarnoff has said "The richest man cannot buy for himself what the poorest man gets free by radio." That is radio as a social force. To me it is actually remarkable that business men are permitted to buy advertising (and fellows like me are permitted to sell it) in connection with an instrument of so much public influence. It could hardly have happened in America. Yet, that is what has built American radio broadcasting and that is why the American public gets the most complete, the most satisfactory and the most expensive radio service in the world today.

Comparison of Media

Since our organization publishes four newspapers and operates four radio stations, I can regard both forms without prejudice. They have several points in common: circulation, space, and selling copy.

In all media, circulation is potential: the total distribution of newspapers and total number of radio homes; and it is actual: the number that actually sees or hears your advertisement. Radio leads among all media in establishing means of learning the actual circulation of its programs. Continuous listener check-ups, organizations such as the C.A.B., the C. E. Hooper Co. and others are constantly enabling advertisers to follow the trends of its programs, and making it easier to buy radio because it is the only medium so far in which there is a constant over-all check-up of net, or actual, circulation.

The primary function of the newspaper advertisement or the radio program is to attract attention and arouse interest. In the newspaper this is done by the proper combination of layout, art work and heading; in radio by a well-balanced, well-produced program of entertainment or service value. The size of the ad or length of the program has a bearing on the amount of actual circulation you get, and the favorable setting created for the selling copy.

In both media, selling copy must complete the job, because all media are only a means of contact between you and your prospect. You can influence your results by the effectiveness of what you say.

The one big advantage radio enjoys is the human voice. Since time began the voice has been the natural and most used form of communication, and now through the miracle of radio it reaches bigger audiences than were ever before possible by any means. Our educational system is based on it (what if we had to depend entirely upon correspondence schools?); most business is conducted upon exchange of ideas or agreements through the spoken word. You can complete arrangements for a loan with a man and his wife much easier in your office than you can by mail. Experiments by institutions such as Harvard and Ohio State College show that the ear gets information easier and retains it longer than the eye.

To advertise your product, which is money, first give plenty of attention to the subject of whom you wish to reach and the best way of doing it. Who are your prospects? What type of people are they? How do they live? Are they married or single?

Radio is an extremely elastic medium. You can build your program or select your time to reach any type of person, or any income group; by using the proper program content you can control your circulation to an amazing degree.

Borrowing or investing money is a serious concern in the business of running a home, decided nine times out of ten by the board of directors which consists of Mr. and Mrs. America. Here is another of radio's unique advantages; you have the family board of directors together, listening to your program. There is no competition from any other advertising at the time they are listening, no big or little advertisements playing around on all sides of it, vying for their attention—extremely important from a sales and public relations standpoint. Radio's ability to deliver uninterrupted and undivided attention for your message in the homes of your prospects is definitely worth money to you.

The Federal Home Loan Bank System, querying its 1200 members, learned that the average spent by each of these on radio advertising was $898 per year, but the most successful advertisers spent more than that. When expenditures were over $1000 the ratio of satisfied sponsors to dissatisfied sponsors was three to one; the average expenditure of those experiencing good or excellent results was $1518 per year, and the average duration of their campaign was 32.3 weeks per year. There is a great argument there for consistency, true of any advertising but particularly true of radio.

The most satisfactory unit of time was 15 minutes; next, 5 minutes; next, one minute, and next, 30 minutes. The most satisfactory frequency was a five-per-week schedule for programs; most announcement users were on the air either six or seven days per week. One-third of all campaigns consisted of spot announcements; music and News programs ranked next, and News sponsors reported the highest proportion of good or excellent results.

Answers to Questions

"Which is most effective, intensive broadcasting or periodic broadcasting?" Unless your short-time schedule is very sensational, it will probably not be as effective as regular, consistent, 52-week advertising, because of the habit-forming characteristics of radio, because constant repetition in selling is a strong factor, because of the economy of frequency discounts. Stop-and-go advertising is often expensive.

"What percentage of the budget should be devoted to radio?" That depends upon the size of the total appropriation, competition and other factors. To do a thorough, consistent job, in some cases it might require 90 percent, or 50 percent, or only 15 or 20 percent.

"What type of radio is most effective?" The Federal Savings and Loan report lists News and popular music programs as highly effective, but also shows a great variety including news commentators, five-minute talks, Musical Clocks, women's participating programs, man-on-the-street, historical, little-known facts about the city, etc. Let's put it this way: find a program with a built-up audience among the type of people you want to reach, at a time they are available, or build one which will create such an audience quickly. I suggest you put the burden of proof and selection on the radio station; all radio men I know are anxious to get results for their advertisers. Talk over your problems, the type of people who borrow or invest with you, determine your budget, and let him deliver the maximum on your investment.

"Do you recommend large stations and fewer announcements or programs, or small stations and more advertising for the same budget?" This depends on the coverage you want, relative station popularity, and whether or not your budget will buy a consistent, adequate service.

"Is radio more effective in large or small cities?" There is prac-
tically no difference; radio success stories come from markets of all sizes.

"Is it effective for a small company in a large city?" Especially so; few people can compare one institution with another and tell which is bigger or more substantial, and very few care to look at financial statements to find out. To them the size of the company is whatever they make it in their own minds. In creating this mental picture of your business and the desirability of doing business with you, they depend upon your advertising. A small business, advertising credibly on a good radio station in association with leading advertisers, benefits from this association.

"How much commercial should a 15-minute News program contain?" This is a matter of judgment, of course, but generally not over 2-1/2 to 3 minutes, preferably divided into two sales talks at approximately the 5-minute and 12-minute points, and with the commercials in the same tempo and mood as the program itself.

"What times and frequency are most effective for spot announcements?" Personally, we have had best results from spot announcements scheduled three or more times per day, seven days per week. A morning-afternoon-and-evening schedule gives you a very large circulation; otherwise, times should be selected to reach the type of audience you want.

"What length of campaign is most effective?" I would say that your first contract should preferably be for 52 weeks, with 26 weeks as a minimum. A large agency states that from its records it can usually gauge a program's success at the end of the 26th week. Their formula requires checks at the end of the 6th, 13th and 26th weeks; they say the 13-week response should double the 6th, and the 26th should double the 13th. Some programs draw immediate response; others require a longer build-up. I recall one large bakery which saw no sales increase at the end of 11 weeks, and almost cancelled the program which later the same year gave them increases up to 25 per cent of their monthly volume.

"Can 50-word announcements have real advertising pull?" Absolutely, if you have an interesting story to tell. The highlights can easily be told in 50 words.

"What type of bank clients are secured by radio advertising?" Mr. Pittman, president of the Morris Plan Bank of Philadelphia, says: "We were told before our broadcast started that radio would reach a lower income group mass audience; however, we found that many of our new customers came from a higher income group than our advertising had previously attracted. The size of our average loan increased 21 per cent in the first eight months of our radio campaign. Results not only kept pace but each succeeding month produced greater results than the previous one. During our first year on the air our loan volume increased 51.7 per cent over the same period the previous year; our savings increased by the unbelievable total of 152.9 per cent." This firm sponsors a daily evening News broadcast.

Let me add an evangelistic note. More people are listening to more radio sets more hours every day than ever before, because radio is basically sound, is the most direct and fastest means of communication in existence today, and is one of the greatest social forces of our time. In any business, such as yours, where public relations is such a vital factor, you must look to the future. Advertising, your chief means of public relations, is also communication, and communication changes. The jungle method of smoke fires and tom-toms seems ludicrous today. Who knows what the next ten years will bring, such as in the fields of frequency modulation and television? In other words, radio is of today and tomorrow. Every business firm which is in tune with progress and is looking to its future will do well to begin to use radio broadcasting, and find the most effective formula for its use today. It is something that will pay great dividends—immediately and in the years to come.

Per-Inquiry and Free Offers

Requis Advertising, New York, is seeking per-inquiry deals for the Nu-Platonic Corporation, manufacturers of phonograph records.

Metropolitan Life Insurance Co., New York, offers a free "information service" to broadcasters.

Miami Beach, Fla., is reported by NAB members as securing considerable free radio time by promoting a contest to select the "Radio Queen of the South." In a newspaper publicity story the contest director boasts that last year's contest "produced some 7,000 in free radio publicity for Miami Beach." Comments an NAB member: "This prejudices the opportunity of selling resort advertising. Potential advertising from municipalities, chambers of commerce and individuals with resorts and vacation spots can constitute a sizeable amount of business, but if we give it away we have little chance of ever selling it."

Ringling Brothers Circus, through its advance man, is reported to be offering passes in exchange for time.

Correction in Dates

In the article on "Effective Retail Selling" by Bruiff Olin published here in the June 6 issue, it was said that "a better-than-average half-page newspaper advertisement is read by less than 10 per cent of a newspaper's circulation" according to Editor & Publisher of February 8, 1940. The date should be the issue of February 8, 1930.

Legislation

New Recording, Libel Laws

Florida legislature effective June 12 abolished any asserted common law rights to collect royalties on the recorded performances embodied in phonograph records and electrical transcriptions once the records and transcriptions are sold in commerce for use in Florida. This act, in effect, writes the holding of the court in RCA v. Whiteman into the statute law of Florida.

The act is as follows:

An Act to prevent claims for additional compensation, fees or payment after sale of phonograph records, transcriptions or any form of recorded music and entertainment, or collection of licenses for the use of same after sale, by any performing artist, manufacturer or organization representing such performing artist or manufacturer, and to protect the purchaser thereof in its or their use for any purpose whatsoever.

Be it enacted by the Legislature of the State of Florida:

Section 1. When any phonograph record or electrical transcription, upon which musical performances are embodied, is sold in commerce for use within this State, all asserted common law rights to further restrict or to collect royalties on the commercial use made of any such recorded performances by any person is hereby abrogated and expressly repealed. When such article or chattel has been sold in commerce, any asserted intangible rights shall be deemed to have passed to the purchaser upon the purchase of the chattel itself, and the right to further restrict the use made of phonograph records or electrical transcriptions, whose sole value is in their use, is hereby forbidden and abrogated.

Section 2. Nothing in this Act shall be deemed to deny the rights granted any person by the United States Copyright laws. The sole intent of this enactment is to abolish any common law right attaching to phonograph records and electrical transcriptions, whose sole value is in their use, and to forbid further restrictions or the collection of subsequent fees and royalties on phonograph records and electrical transcriptions by performers who were paid for the initial performance at the recording thereof.

Section 3. If any section in this Act or any part of any section shall be declared invalid or unconstitutional such declaration of invalidity shall not affect the validity of the remaining portions thereof.

Section 4. All acts or parts of acts in conflict herewith are hereby expressly repealed.

Section 5. This Act shall take effect upon its approval by the Governor.

Approved June 12, 1941.

Also on June 12, an amendment to the Florida libel law became effective. By this amendment a radio station has the right, but
is not compelled, to require the submission of written script 24 hours before the time of broadcast. If submission of the script is so required, the station is freed from liability for any libelous or slanderous utterances broadcast which were not contained in the script.

The amendment is as follows:

An Act to amend Section 1 of Chapter 19616 Laws of Florida, Acts of 1939 entitled "An Act in Relation to the Civil Liability of Owners, Lessees, Licensees and Operators of Radio Broadcasting Stations and the Agents and Employees of Any Such Owner, Lessee, Licensee or Operator, for Radio Defamation or Libelous Statements."

Be it enacted by the Legislature of the State of Florida:

Section 1. That section 1 of chapter 19616 laws of Florida, 1939, be and it is hereby amended to read as follows:

"Section 1. The owner, lessee, licensee or operator of a radio broadcasting station shall have the right, but shall not be compelled, to require the submission of a written copy of any statement intended to be broadcast over such station twenty-four hours before the time of the intended broadcast thereof; and when such owner, lessee, licensee or operator has so required the submission of such copy, such owner, lessee, licensee or operator shall not be liable in damages for any libelous or slanderous utterance made by or for the person or party submitting a copy of such proposed broadcast which is not contained in such copy; but this Act shall not be construed to relieve the person or party, or the agents or servants of such person or party, making any such libelous or slanderous utterance from liability therefor."

Section 2. If any section in this Act or any part of any section shall be declared invalid or unconstitutional such declaration of invalidity shall not affect the validity of the remaining portions hereof.

Section 3. All acts or parts of acts in conflict herewith are hereby expressly repealed.

Section 4. This Act shall take effect upon its approval by the Governor.

Approved June 12, 1941.

National Defense

Radio Men in Service

KNX—Los Angeles

War Department Transcriptions

It is understood that the FCC has approved War Department transcription programs containing incidental personal messages.

Gilbert Newsome

Edward E. Bishop, WGH, Norfolk, Va., asks for information as to the whereabouts of Gilbert Newsome, an announcer.

Father Burk

Father W. A. Burk, S. J., has had another serious heart attack which has made it impossible for him to return from St. Louis to Station WWLL, New Orleans, as planned. Although the date of Father Burk's return to radio is now indefinite, the NAB and all its members join in hoping that it will be soon.

FCC Refuses Stay

The FCC on June 12 refused to stay its decision of April 1, pending appeal by NBC, of an order permitting Station WHDH, Boston, to share a “clear channel” with Station KOA, Denver. Said Chairman Fly in his “specially concurring” opinion:

"For the reasons stated above and particularly since there is no real injury to Station KOA, and since Station WHDH moves forward with knowledge of any legal risks involved, I concur in the foregoing decision denying the stay. The Commission has arrived at a final decision upon the merits of this case, in which I did not participate, and I do not want by expressing any opinion on a procedural matter to be understood as expressing an opinion on the merits of the decision. At the same time I entertain no doubt as to its legality.

Great waste results from the fact that clear channel stations whose raison d’être is to serve over great distances and in vast rural areas of the country, have to a great extent been concentrated along the coasts and the borders of the country. The power is impacted into the lucrative markets of large metropolitan areas which are already fully served. If, in fact, not over served, while a great portion of the signal strength of the clear channel station is wasted upon the sea. Thus, while listeners in New York, Chicago, and Los Angeles may tune in on a dozen stations, there are vast rural regions in upper New England, in some areas of the South, and in the great trans-Mississippi area where the listening public has difficulty in receiving programs of even one station. The need for a studious, careful appraisal of this vital problem is apparent. If the clear channel wave lengths are to be further exploited, the plans for that exploitation ought to be made in the light of these dominant factors and as a result of a full study.

“Little Brooklyn Cases”

Though radio stations have “a recognized duty to present well rounded programs on subjects which may be fairly said to constitute public controversies of the day within the framework of our democratic system of government,” the FCC “will not tolerate hostile propagandizing in the interest of any foreign government which has repeated and flagrantly expressed its enmity to this country and to the continued existence of its basic system of government."

The Commission so declared in adopting its decision and order in the so-called “Little Brooklyn cases,” which involved 11 Brooklyn, N. Y., radio stations or applicants. The Commission has concluded on the basis of the record, and in view of the oral argument, to depart from its Proposed Findings of Fact and Conclusions (B-131), as announced February 5 of this year, and to leave the parties as it found them at the date of the oral argument.

Consequently, today’s decision and order grants renewal of the license of WCJW, Arthur Fiske, which the Proposed Findings and Conclusions would have denied.

The decision and order permits WWRL, Long Island Broadcasting Corporation, Woodside, Long Island, N. Y., to operate
as now, but denies WWRL's request to assume the operating hours of WCNW, which had been proposed.

In modifying its proposed findings to permit the two stations to operate on the same time-sharing basis as now, the Commission comments:

"In so doing the Commission is not to be construed as departing from its position that time-sharing stations "do not represent a healthy situation and are not to be encouraged. The Commission does feel, however, that there is nothing in the record to warrant the economic death penalty on either station at the instance of the other. The situation as it now exists will be permitted to continue but the Commission will be continually interested in the public service records which these two applicants may compile."

Commissioner Case voted for adoption of the proposed findings and conclusions as adopted February 5.

New York "FM" Congestion

Because applications for FM broadcast stations in New York City exceed the number of available frequencies for operation in that locality, the FCC is considering establishment of a North Jersey service area, meanwhile making certain reallocations to that locality, the FCC is considering establishment of a North Jersey FM service area, the situation as it now exists will be permitted to continue but the Commission will be continually interested in the public service records which these two applicants may compile.

In view of these adjustments, the Commission is now able to announce the grant of three additional New York FM applications as follows:

- Muzak Corporation, to use 44700 kilocycles (Class B channel), to serve 8500 square miles.
- Interstate Broadcasting Company, Inc., to use 45900 kilocycles (Class B channel), to serve like area.
- City of New York Municipal Broadcasting System, to use 43900 kilocycles (Class C channel), to serve 3900 square miles.

FCC Notice

Report No. 9—Actions on Rules and Regulations

The Commission en banc today modified the Rules Governing STL (Studio Transmitter Link) broadcast stations effective immediately as follows:

At each place in which the designation "STL" appears in Section 4.31-4.36 inclusive, of the Commission's Rules and Regulations, the designation "STL" is hereby stricken and the designation "ST" substituted therefor.

Footnote No. 1 appended to Section 4.31 of the Rules is hereby amended to read as follows:

1 The abbreviation "ST" is derived from "studio-transmitter."

Order Amendment

The FCC adopted an amendment to the order in the matter of the applications of Hobart Stephenson, Milton Edge, and Edgar J. Korsmeyer, d/b as Stephenson, Edge and Korsmeyer, and Helen L. Walton & Walter Bellatti, all applicants for a new station in Jacksonville, Ill. (B-130).

The sixth paragraph of the Order of May 22, 1941, referring to grant of Stephenson, Edge and Korsmeyer application, was amended by inserting therein the following:

"Prior to the issuance of a construction permit, the applicant shall obtain approval of the Commission of the exact transmitter location and antenna system to be used. Application for such approval shall be filed within two months after the effective date of this order. If for any reason such application cannot be submitted within the time allowed, an informal request for extension of time must be submitted stating the necessity therefor."

897 Stations

During the month of May, 1941, the FCC issued operating licenses to thirteen stations and granted seven permits for the construction of new stations. One station was deleted. A comparative table by months follows:

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

Monday, June 30

Broadcast

NEW—KNOE, Incorporated, Monroe, La.—C. P., 1120 kc., 250 watts, unlimited.

KFNF—KFNF, Incorporated, Shenandoah, Iowa.—Renewal of license, 920 kc., 500 watts night, 1 KW day, SH-KUSD.

Television-Broadcast

W2XD—General Electric Company, Schenectady, N. Y.—For license to cover C. P., 163000-165030 kc., 40 watts, emission A-5, Sec. 4.4(a).

Wednesday, July 16

Broadcast

Consolidated Hearing

NEW—Mid-America Broadcasting Corporation, Louisville, Ky.—C. P., 1010 kc. (1080 kc. NARBA), 1 KW night, 5 KW day, unlimited time, DA-day and night.

Monday, July 21

Broadcast

KGO & Aux.—National Broadcasting Company, Inc., San Francisco, Calif.—Renewal of license. Main: 810 kc., 7½ KW,
FEDERAL COMMUNICATIONS
COMMISSION ACTION

APPLICATIONS GRANTED

Standard Broadcasting Co., Los Angeles, Calif.—Granted construction permit for new high frequency (FM) broadcast station in Los Angeles to operate on frequency 45300 kc., with a service area of 7,000 square miles (B3-PH-32).

Muzak Corporation, New York City.—Granted construction permit for new high frequency broadcast station (FM) to use 45700 kc. (Class B channel), to serve 8,500 square miles (B1-PH-48).

Interstate Broadcasting Co., New York City.—Granted construction permit for new high frequency (FM) broadcast station to use 45300 kc. (Class B channel) to serve 8,500 square miles (B1-PH-109).

City of New York Municipal Broadcasting System, New York City.—Granted construction permit for new high frequency (FM) broadcast station, to use 43500 kc. (Class C channel) to serve 3,900 square miles (B1-PH-83).

WCBF—WCBF, Inc., Chicago, Ill.—Granted modification of construction permit (B4-P-2974) for decrease in power of station WCBF from 10 KW (under construction permit) to 5 KW and increase hours of operation from limited to daylight time and until sunset at Fort Worth, Texas; extend commencement date to 1 day after grant and completion date to 10 days thereafter. Also adopted order granting dismissal of petition of Ohio State University (WOSU) for rehearing in the above entitled matter and dismissed said petition (B4-P-2974).

KWLM—Lakeland Broadcasting Co., Willmar, Minn.—Granted construction permit to make changes in transmitting equipment and increase power from 100 to 250 watts on 1310 kc. (B4-P-3155).

W2XB—General Electric Co., New Scotland, N. Y.—Granted modification of license of experimental television broadcast station, to change frequency assignment to 65000-72000 kc. (Channel No. 3).

WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—Application for modification of license to change frequency from 1290 to 1400 kc., increase power from 100 watts night, 250 watts day to 250 watts, and change time of operation from specified hours to unlimited time (B2-ML-1055).

James F. Hopkins, Inc., Ann Arbor, Mich.—Application for construction permit for new station at Ann Arbor, to be operated on 1600 kc., with power of 1 kw, unlimited time (B2-P-3073).

APPLICATIONS PLACED IN PENDING FILES

J. I. Sims, Orangeburg, S. C.—Placed in pending files pursuant to Order No. 79, application for new station to operate on 1450 kc., 250 watts, unlimited time (B3-P-3169).

Fort Smith Newspaper Publishing Co., Fort Smith, Ark.—Placed in pending files pursuant to Order No. 79, application for new station to operate on 550 kc., with power of 1 kw, using directional antenna, unlimited time (B3-P-3117).

WNAD—University of Oklahoma, Norman, Okla.—Granted modification of construction permit (for new antenna system, change in hours of operation, frequency and move of transmitter) for approval of antenna at new site; 410 kc., 1 kw, daytime (B3-MP-1296).

W0XKB—Balaban & Katz Corp., Chicago, Ill.—Granted extension of special temporary authority to operate two transmitter units to be installed and operated from the State-Lake Bldg., Chicago: Link Transmitter Type No. 50-1TX, with 100 watts power for visual and Link Transmitter Type No. 25-UBX, 25 watts power for aural; temporary steel tower to be used on roof of said building, in order to conduct tests for the period June 18, 1941, to not later than July 17, 1941, in accordance with construction permit.

K45LA—Don Lee Broadcasting System, Los Angeles, Calif.—Granted extension of special temporary authority to operate frequency modulation station commercially on 43500 kc., 1000 watts, special emission for frequency modulation, with transmitter located on top of Mt. Lee, Los Angeles, Calif., and described as Western Electric type 503-A-1, maximum rated power 1000 watts and using a 4-bay, metallic, temporary steel tower to be used on top of said building, in order to conduct tests for the period June 18, 1941, to not later than July 17, 1941, in accordance with construction permit.

KFNF—KFNF, Inc., Shenandoah, Iowa.—Hearing on application for renewal of license now scheduled for June 16, 1941, was continued two weeks.

KGEZ—Donald C. Treloar, Kalispell, Mont.—Ordered issuance of construction permit for approval of directional antenna system for night use on 1160 kc.; station operates on 100 watts (construction permit for 1 kw) (B3-MP-1173).

Cascade Broadcasting Co., Inc., Everett, Wash.—Ordered issuance of construction permit for new station to operate on 1600 kc., 500 watts, unlimited time, employing non-directional antenna system (B5-P-2008).
WNBI—National Broadcasting Co., Inc., New York, N. Y.—Granted extension of special temporary authority to operate international station WNBI on 17700 kc., in order to permit simultaneous operations of Stations WNBI and WNBC on frequencies 17700 kc. and 9050 kc. for the period June 15, 1941, and ending not later than July 14, 1941.

WNBI—National Broadcasting Co., Inc., New York, N. Y.—Granted extension of special temporary authority to utilize the presently authorized WRC-A power amplifier NAR503, Serial No. 62283, for WNBI operation on 11900 kc., for a period June 14 to not later than July 13, 1941.

WSAZ—WSAZ, Inc., Huntington, W. Va.—Granted special temporary authority to operate mobile relay station WADA licensed to Charleston Broadcasting Co., on June 13, 20 at 12:01 AM, and June 14, 1941, on the frequencies 9670 kc., 1150 kc., and 1450 kc.

KOA—National Broadcasting Co., Denver, Colo.—Denied petition for stay during appeal to the Court of Appeals for the District of Columbia, from the Commission’s order of April 7, 1941, granting application of WHDH, Matheson Radio Co., Inc., Boston, Mass., for unlimited hours of operation on frequency 859 kc., with power of 5 KW (B-121), and amending its rules accordingly. The Commission reaffirmed its order of April 7, 1941. (Chairman Fly and Commissioners Walker and Thompson voted for denial of petition; Commissioners Case and Wakefield against; Commissioners Cranston and Payne absent.) The Chairman submitted a specially concurred opinion.

WREN—The WREN Broadcasting Co., Inc., Lawrence, Kans.—Granted motion for leave to amend application to specify frequency 1000 kc. and 50 KW power. Application directed be removed from Hearing Docket.

K DRO—Drohlich Brothers, Sedalia, Mo.—Granted motion to continue hearing to August 25, in re application for construction permit to change frequency from 1190 to 800 kc.; power from 250 watts to 1 KW, and time of operation unlimited.

The Evening News Press, Inc., Port Angeles, Wash.—Granted petition to amend application to specify 1150 kc., and 250 watts, unlimited time, instead of 1300 kc., 100 watts night, and 250 watts, unlimited time.

K FNF—KFNF, Inc., Shenandoah, la.—Dismissed motion for continuance of hearing date on application for renewal of license.

KORN—C. J. Malmsten, S. S. Sidner, A. C. Sidner, H. A. Gunderson, E. J. Lee (Transferees) and John F. Palmquist and Paul Bover, co-partners, d/b/a Fremont Broadcasting Co. (Transferees), Fremont, Neb. —Granted authority to transfer control of station KORN.

KONB—C. J. Malmsten, John K. Morrison and Arthur Baldwin (Transferees) and Ross C. Glassman, Wm. W. Glassman, Blandly V. Glassman (Transferees) and Paul Bover, co-partners, d/b/a Fremont Broadcasting Co. (Transferees) for approval of transmitter and studio sites at National Bank Bldg., Jefferson & Main Streets, Burlington, approval of antenna, and installation of new type transmitter; 3090 kc., 250 watts, unlimited time (B4-MP-1301).

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Granted special temporary authority to operate from 9 to 10 p. m., DST on June 14, 1941, in order to broadcast the Convention Dinner held in Boston on Flag Day only.

KBUR—Burlington Broadcasting Co., Burlington, la.—Granted modification of construction permit (B4-P-1779), authorizing new station, for approval of transmitter and studios at National Bank Bldg., Jefferson & Main Sts., Burlington, approval of antenna, and installation of new type transmitter; 11900 kc., 250 watts, unlimited time (B4-MP-1301).

WIS—The Liberty Life Ins. Co., Columbus, S. C.—Granted modification of construction permit (B3-P-2870) to make changes in directional antenna system and increase power to 5 KW day and night, for extension of commencement and completion dates to July 15, 1941, and Jan. 15, 1942, respectively (B3-MP-1304).

WALA—Pape Broadcasting Co.—Granted modification of construction permit (B3-MP-932), which authorized increase in power, installation of new equipment and directional antenna for night use, and move of transmitter), for extension of completion date to Sept. 29/41 (B3-MP-1312).

WBVN—Unified Broadcasting Corp. of Brooklyn, Brooklyn, N. Y.—Granted modification of license to change licensee’s name from Unified Broadcasting Corp. of Brooklyn to WBVN—Brooklyn, Inc. (B1-ML-1073).

WTSB—Charles Photographers, Inc. St. Petersburg, Fla.—Granted authority to determine operating power by direct measurement of antenna power on 1380 kc. under NARB (B5-Z-789).

WMUR—The Radio Voice of New Hampshire, Inc.—Manchester, N. H.—Granted modification of construction permit (B1-P-2897, for new station) authorizing extension of completion date to July 1, 1941 (B1-MP-1320).

KORB—Putty广播 Inc., Great Falls, Mont.—Granted modification of construction permit (B5-P-2410, authorizing new station) 1000 kc. completion date to September 30, 1941; 1150 kc., 250 watts, unlimited time (B1-MP-1310).

WENE—WJIM, Inc., Portable-Mobile, Area of Lansing, Mich.—Granted modification of construction permit (B2-MRE-368, which authorized changes in equipment and increase in power to 50 watts in relay station), for extension of commencement and completion dates to 30 and 180 days respectively, after grant (B2-MPRE-51).

KGHE—Curtis P. Ritchie, Pueblo, Colo.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-910).

WBBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-849).

WJNR—WJR, The Goodwill Station, Detroit, Mich.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-849).

WMIN—WMIN Broadcasting Co., St. Paul, Minn.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-924).

WSVS—Board of Education, City of Buffalo, Buffalo, N. Y.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1035).

WBBZ—Adelaide Lillian Carrell, Executrix of Estate of Charles Lewis Carrell, Deceased, Ponca City, Okla.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1008).

KYSM—Southern Minn. Supply Co., Mankato, Minn.—Granted authority to determine operating power by direct measurement of antenna input (B5-MP-1031).

KMXO—Columbia Broadcasting System, Inc., St. Louis, Mo.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-926).

KEUB—Eastern Utah Broadcasting Co., Price, Utah—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1009).

KSAN—Golden Gate Broadcasting Corp., San Francisco, Cal.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-991).

KGNE—Great Plains Broadcasting Co., (a Corp.), North Platte, Neb.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-997).

WOMT—Francis K. Kadow, Manitowoc, Wis.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-997).

KUOA—KUOA Inc., SiuLoan Springs, Ark.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-984).

KWG—McClatchy Broadcasting Co., Stockton, Cal.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-927).

KGFJ—Ben S. McGlashan, Los Angeles, Cal.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1030).

WJBC—Radio Station WJBC, Bloomington, Ill.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-946).

WMBE—The Moody Bible Institute of Chicago, Chicago, Ill.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1003).
WEEU—Berks Broadcasting Co., Reading, Pa.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-978).

WMAQ—National Broadcasting System, Inc., Chicago, Ill.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-980).

WTAM—National Broadcasting Co., Inc., Cleveland, Ohio—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-978).

WSM—The National Life and Accident Ins. Co., Nashville, Tenn.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-978).

WJZ—National Broadcasting Co., Inc., New York City—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-978).

KPOF—Pillar of Fire (a Corp.), Denver, Colo.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-983).

KVOL—Evangeline Broadcasting Co., Inc., Lafayette, La.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-978).

WRAW—Reading Broadcasting Co., Reading, Pa.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-978).

WBTH—Williamson Broadcasting Corp., Williamson, W. Va.—Denied request for authority to determine operating power by direct measurement of antenna input (B4-Z-985).

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted special temporary authority to operate from 12 midnight to 1 a.m. for the period June 15 to not later than July 14, 1941, in order to conduct a non-commercial experimental program consisting of Associated Press News, music and Americanization talks.

WAGA—National Life and Accident Insurance Co., Nashville, Tenn.—Granted special temporary authority to operate from 1 to 5 KW (B2-P-2898, Docket No. 6055).

WWL—Loyola University, New Orleans, La.—Granted authority to determine operating power by direct measurement of antenna power on 1500 and 1170 kc., with a power of ½ watt in order to record on the ground and to rebroadcast over WLS the human voice and the rate of the heart beat, and other scientific data during a free fall in the air prior to the opening of a parachute, for the period June 12 to not later than July 11, 1941, with an additional 1000 kc. frequency to be used to provide a means of communicating with a public address system, and signals from locations where wire facilities are not available (B2-LARE-1).

WMT—Ocala Broadcasting Co., Inc., Ocala, Fla.—Granted special temporary authority to operate from 10:45 to 11:30 p.m. CST on June 18 and 25, and July 2, 1941, in order to broadcast the Lutheran Church Conference of the South for Pensacola, Fla., and thereafter at Panama City and Ocala, Fla., to specify that the said hearing shall be held on June 16, 1941, at Jacksonville, Fla., and thereafter at Ocala, Panama City and Pensacola, Fla., as directed (Docket Nos. 6000 and 6001).

WCH—Luther College, Decorah, Iowa—Granted special temporary authority to operate from 4:30 to 5:30 p.m. on June 14, 1941, in order to observe College summer vacation only.

WNCW—Arthur Fiske, Brooklyn, N. Y.—Denied request for special temporary authority to operate from 12 midnight to 1 a.m. for the period June 15 to not later than July 14, 1941, in order to conduct a non-commercial experimental program consisting of Associated Press News, music and Americanization talks.

WBPB—National Life and Accident Insurance Co., Nashville, Tenn.—Granted special temporary authority to use an experimental 20 watt FM transmitter on the K group of frequencies as a relay broadcast station in order to broadcast the Americanization talks on 1604 kc., and K group frequencies as relay station on an experimental basis only; frequency 910 kc., 1 watt; to be used to provide a means of communicating with a public address system, and signals from locations where wire facilities are not available (B2-LARE-1).

WAB—Agricultural Broadcasting Co., Chicago, Ill. (WLS)—Granted special temporary authority to operate a special laboratory transmitter as a relay broadcast station on 5340 kc., with a power of ½ watt in order to record, to relay signals from various sources to the ground and to rebroadcast over WLS the human voice and the rate of the heart beat, and other scientific data during a free fall in the air prior to the opening of a parachute, for the period June 12 to not later than July 11, 1941, with an additional 1000 kc. frequency to be used to provide a means of communicating with a public address system, and signals from locations where wire facilities are not available (B2-LARE-1).

WJKO—WKZO, Inc., Kalamazoo, Mich.—Adopted order granting petition of WKZO to vacate the order of April 8, 1941, designating for hearing application for construction permit; vacated Commission action of April 8, and canceled hearing, and granted authority to construct station WZKO on the 1 group of frequencies for Panama City and Pensacola, Fla., to specify that the said hearing shall be held on June 16, 1941, at Jacksonville, Fla., and thereafter at Ocala, Panama City and Pensacola, Fla., as directed (Docket Nos. 6000 and 6001).
granted said applications (B1-LVB-24; B1-RVB-26, and B1-RVB-25).

W2XBS—National Broadcasting Co.—Adopted order granting application for construction permit for commercial television broadcast station pursuant to Commission's Order of April 30, 1941, together with license to cover said construction permit (B1-PCT-1 and B1-LCT-1).

APPLICATIONS FILED AT FCC

550 Kilocycles

KFUO—Evangelical Lutheran Synod of Missouri, Ohio and Other States, Clayton, Mo.—Modification of construction permit (B4-P-2882) for installation of new transmitter and vertical radiator, increased power to 5 KW day and night, requesting extension of completion date from 7-13-41 to 8-13-41.

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—Construction permit to change frequency from 550 to 910 kc., increase power from 1 KW night, 5 KW day to 50 KW day and night, install new transmitter and new directional antenna for night use, and change transmitter location, requesting WTAD be transferred from 830 to 550 kc., unlimited time.

570 Kilocycles

WOSU—Ohio State University, Columbus, Ohio.—Modification of construction permit (B2-P-3138) for change in frequency, increase in power, change in hours of operation, and installation of new transmitter, requesting authority to install new transmitter and extension of commencement and completion dates to 30 days after grant and 90 days thereafter, respectively.

910 Kilocycles

WFDF—Flint Broadcasting Co., Flint, Mich.—License to use old Collins 300B-100-watt main transmitter as an auxiliary transmitter with power of 100 watts.

WGBI—Scranton Broadcasters, Inc., Scranton, Pa.—Authority to determine operating power by direct method (Auxiliary transmitter).

WQAN—The Scranton Times (Co-partnership), E. J. Lynett, Wm. R. Lynett, Elizabeth R. Lynett and Edward J. Lynett, Jr., Scranton, Pa.—Authority to determine operating power by direct method.

960 Kilocycles

WSBT—The South Bend Tribune, South Bend, Ind.—Authority to determine operating power by direct method.

WSBT—The South Bend Tribune, South Bend, Ind.—License to cover construction permit (B4-P-900) as modified, to install directional antenna, change frequency and hours, and move transmitter.

970 Kilocycles

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Authority to determine operating power by direct method.

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—License to cover construction permit (B1-P-2704) as modified, to install new transmitter, directional antenna for night use, change hours of operation from daytime (to 6 p.m.) to unlimited time, increase power from 500 watts to 1 KW day and night and change transmitter site.

980 Kilocycles

WHAL—Harold F. Gross and Edmund C. Shields, Saginaw, Mich.—Modification of construction permit (B2-P-936) as modified, for a new station, requesting additional time for commencement and completion of construction from 1-14-41 and 7-14-41 to 10-14-41 and 180 days thereafter, respectively.

990 Kilocycles

WIBG—Seaboard Radio Broadcast Corp., Glenside, Pa.—Construction permit to install new transmitter, direction antenna, day and night use, increase power from 1 to 10 KW, time from day to unlimited, move transmitter and move studio.

1120 Kilocycles

WCBD—WCBD, Incorporated, Chicago, Ill.—Modification of construction permit (B1-P-2974) to change frequency, increase power and change hours of operation; requesting decrease in power from 10 to 5 KW, change hours of operation from daytime to limited to sunset at Fort Worth, Texas, change transmitting equipment and extension of commencement and completion dates from 6-30-41 and 12-30-41 to 1 day after grant and 10 days thereafter, respectively.

1210 Kilocycles

Contra Costa Broadcasting Co., Richmond, Calif.—Construction permit for a new broadcast station to be operated on 1210 kc., 500 watts, limited time, and for changes in antenna. Amended: To change proposed transmitter location.

1240 Kilocycles

KBIZ—J. D. Falvey, Ottumwa, Iowa.—Modification of license for increase in power in 100 watts to 250 watts.

KFBC—Frontier Broadcasting Co., Cheyenne, Wyo.—Authority to determine operating power by direct method.

KOVO—Clifton A. Telhoe, tr. as Citizens Voice & Air Show, Provo, Utah.—Authority to determine operating power by direct method.

WGCN—WGCN, Incorporated, Gulfport, Miss.—Authority to determine operating power by direct method.

WJIM—WJIM, Incorporated, Lansing, Mich.—Authority to determine operating power by direct method.

WSAY—Brown Radio Service & Laboratory (Gordon P. Brown, Owner), Rochester, N. Y.—Authority to determine operating power by direct method.

1260 Kilocycles

KGGM—New Mexico Broadcasting Co., Albuquerque, N. Mex.—Authority to determine operating power by direct method.

1290 Kilocycles

KRGV—KRGV, Incorporated, Weslaco, Texas.—Authority to determine operating power by direct method.

1320 Kilocycles

KLCN—Fred O. Grimwood, Blytheville, Ark.—Authority to determine operating power by direct method.

1340 Kilocycles

Birney Imes and Robin Weaver, d/b as Imes-Weaver Broadcasting Co., Columbia, Tenn.—Construction permit for a new broadcast station to be operated on 1350 kc., 250 watts, unlimited time.

KFL—C. C. Baxter, Dublin, Texas.—Authority to determine operating power by direct method.

KVSF—New Mexico Broadcasting Co., Santa Fe, N. Mex.—Authority to determine operating power by direct method.

WGAA—Northwest Georgia Broadcasting Co., Cedartown, Ga.—Modification of construction permit (B3-P-3029) for new broadcast station, requesting changes in transmitting equipment.

WSSN—The Birmingham News Co., Birmingham, Ala.—Authority to determine operating power by direct method.

WTAM—Florida Capitol Broadcasters, Inc., Tallahassee, Fla.—Authority to determine operating power by direct method.

1350 Kilocycles

WORK—York Broadcasting Co., York, Pa.—Construction permit to install new directional antenna system for night use only.

1390 Kilocycles

QWC—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Authority to determine operating power by direct method.

1400 Kilocycles

WCBR—Baltimore Broadcasting Corp., Baltimore, Md.—Authority to determine operating power by direct method.

WMGA—Frank R. Pidcock, Sr., Moultrie, Ga.—Authority to determine operating power by direct method.

WPAY—Vee Bee Corporation, Portsmouth, Ohio.—Authority to determine operating power by direct method.

554—June 20, 1941
1450 Kilocycles

WGOV—E. D. Rivers, Valdosta, Ga.—Authority to determine operating power by direct method.

WPAD—Paducah Broadcasting Co., Inc., Paducah, Ky.—Authority to determine operating power by direct method.

WHTC—WHFC Inc., Cicero, Ill.—Authority to determine operating power by direct method.

WACO—Frontier Broadcasting Co., Inc., Waco, Texas.—Authority to determine operating power by direct method.

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Modification of construction permit (B2-P-2637) for new transmitter.

KGIW—E. L. Allen, Alamosa, Colo.—Construction permit to increase power from 100 watts to 250 watts and install new transmitter.

WACO—Frontier Broadcasting Co., Inc., Waco, Texas.—Authority to determine operating power by direct method.

WHFC—WHFC Inc., Cicero, Ill.—Authority to determine operating power by direct method.

WPAD—Paducah Broadcasting Co., Inc., Paducah, Ky.—Authority to determine operating power by direct method.

1470 Kilocycles

KELA—Central Broadcasting Corp., Centrailia-Chehalis, Wash.—Authority to determine operating power by direct method.

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Modification of construction permit (B2-P-2637) for new transmitter, directional antenna for day and night use, increase in power, and unlimited time, requesting change in frequency to 1470 kc., under NARBA and changes in directional antenna system and type of transmitter.

1480 Kilocycles

KGCX—E. E. Kresbach, Wolf Point, Mont.—Modification of license to move studio to transmitter location.

1490 Kilocycles

R. M. Wallace & G. E. Schmibben, d/b as Norfolk County Broadcasting Co., Norfolk, Va.—Construction permit for a new broadcast station to be operated on 1490 kc., 250 watts, unlimited time, requesting change in frequency to 1450 kc., under NARBA and changes in directional antenna system and type of transmitter.

KDB—Santa Barbara Broadcasters, Ltd., Santa Barbara, Calif.—Authority to transfer control of corporation from Thomas S. Lee and R. D. Merrill, Executors of Estate of Don Lee, deceased, to Don Lee Broadcasting System.

KSAM—Sam Houston Broadcasting Ass'n., H. G. Webster, Pres., Huntsville, Texas.—Authority to determine operating power by direct method.

WMIS—Natchez Broadcasting Co., Natchez, Miss.—License to cover construction permit (B3-P-2999) for a new broadcast station.

WMIS—Natchez Broadcasting Co., Natchez, Miss.—Authority to determine operating power by direct method.

1590 Kilocycles

KITE—First National Television, Inc., Kansas City, Mo.—Authority to determine operating power by direct method.

WALB—The Herald Publishing Co., Albany, Ga.—License to cover construction permit (B3-P-2774) as modified, for a new broadcast station.

FM APPLICATIONS

W6XEA—Earle C. Anthony, Inc., Los Angeles, Calif.—Modification of construction permit (B5-PV-B-26) for a new television station, requesting extension of commencement and completion dates from 1-15-41 and 7-15-41 to 1-15-41 and 1-15-42, respectively.

W45BR—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—License to cover construction permit (B3-PH-4) for a new high frequency broadcast station, and change studio site.

W47C—WJJD, Inc., Chicago, Ill.—Modification of construction permit (B4-PH-17) for a new high frequency broadcast station, requesting change in type of transmitter, antenna changes, and change population from 4,051,000 to 4,750,000.

MISCELLANEOUS APPLICATIONS

KEHT—The KANS Broadcasting Co., Portable-Mobile.—License to cover construction permit (B4-PRE-388) for a new relay broadcast station.

WAUR—University of Illinois, Farm Area, South of Champaign, Ill.—Reinstatement of construction permit (B4-PRY-220) for a new relay broadcast station to be operated on 1616, 2090, 2190, and 2890 kc., 20 watts.

Bay County Publishers, Inc., Panama City, Fla.—License for a new broadcast station to be operated on 1230 kc., 100 watts night, 250 watts day, unlimited time, facilities of WDTL. Amended: Re Section 15(a).

Binney & Smith & Robie, Inc., d/b as Imes-Weaver Broadcasting Co., Cleveland, Tenn.—Construction permit for a new broadcast station to be operated on 1560 kc., 250 watts, unlimited time. Amended: To specify transmitter site as site to be determined, Cleveland, Tenn.

The Metropolis Co., Ocala, Fla.—License for a new broadcast station to be operated on 1490 kc., 100 watts, unlimited time, facilities of WTMN. Amended: Re Section 15(a).

KGGF—Hugh J. Powell, Colleyville, Kans.—Construction permit to increase power from 500 watts night, 1 kw. day, to 5 kw. move transmitter, change hours from specified to unlimited, and request 630 kc. under NARBA. Amended: To increase power from 500 watts night, 1 kw. day, to 1 kw. change transmitter, and make changes in directional antenna for night use.

Bernard N. Walker, Concord, N. C.—Construction permit for a new broadcast station to be operated on 1100 kc., 250 watts, unlimited time.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against them.

Harper Manufacturing Co.—Alleging misrepresentation in the sale of men’s clothing, a complaint has been issued against J. Fred Malone and Joe P. Malone, Rome, Ga., who are in business under the names of Harper Manufacturing Co., Malone Clothing Manufacturing Co., Gray-Dickson Clothing Co., and Piedmont Clothing Co.

The complaint alleges that the respondents’ sales representatives, in promoting the sale of men’s clothing, represent that The duPont Company is back of or associated with the respondents in their business; that the material used in their suits is manufactured by The duPont Company, and that The duPont Company furnishes the goods to be used in making the garments sold, the buyer paying only for the labor involved, when in fact The duPont Company is in no manner associated with the respondents and does not manufacture the material used in the respondents’ garments, and the customer pays not only for the labor involved in making a suit but for the material used and for a profit to the respondents.

According to the complaint, the respondents’ agents also represent that garments will be made-to-order or measure and be of a certain material, color, design, weave or pattern, as per sample shown; that the customers will have opportunity to inspect and try on the garments before accepting them and paying the C. O. D. balance due, and that the respondents neither manufacture all the garments they sell nor ship them direct from their factory.
Jewelers, all of 545 Fifth Avenue, New York, sellers and distributors of jewelry locally and who also conduct a retail mail order business in jewelry, are charged in a complaint with misrepresentation.

In catalogs distributed through several States, the respondents are alleged in the complaint to have represented that diamond and precious stone jewelry was available "at authentic manufacturers wholesale prices." Among other representations were:

"SOLITAIRE ENGAGEMENT RING,
yellow gold; 1 large round white center diamond, and 1 round white diamond on each side.
Customary retail price: $50
Our net cost to you: $25"

The complaint alleges that these representations are false and misleading in that the prices designated by the respondents as the "customary retail prices" are inflated and fictitious. In truth, the complaint alleges, the prices quoted are those at which the respondents customarily sell their jewelry at retail to the purchasing public and are substantially the same as, or higher than, the customary retail prices of the same or similar articles of jewelry of comparable quality and value offered by other retailers.

The complaint also alleges that in the respondents' catalogs descriptions of many of the rings offered for sale include representations and statements as to the carat weight of the diamonds in the rings in such a manner as to mislead the purchasing public and cause it to believe that the carat weight so set forth is the weight of the largest diamond in the ring, when actually the carat weight given is the combined weight of all the diamonds in the ring. (4518)

Kol-Tone Manufacturing Co.—A complaint has been issued charging Gus. H. Cohn, trading as Kol-Tone Manufacturing Co., 7316 Delmar Blvd., St. Louis, with misrepresentation in the sale of chemicals mixed to form the product "Kol-Tone," formerly called "Koltrat," designed for use with water as a treatment for bituminous coal and bituminous coal products, and in the sale of such product and a bituminous coal product treated with "Kol-Tone."

The complaint alleges that in newspaper and periodical advertisements circulated in various States the respondent has represented and implied that "Kol-Tone" or "Koltrat," when used in treating or processing bituminous coal or bituminous coal products, accomplishes a material reduction in soot and smoke, a saving in fuel, and increased efficiency with less combustibles remaining in the ash, and that it gives the purchaser more for his money than would be received through the use of such coal or coal products not so treated or processed.

The complaint further alleges that the respondent's product is a chemical mixture consisting largely of common salt, with a small proportion of metallic salts, and has no material or appreciable beneficial effect when used in treating or processing bituminous coal and bituminous coal products. According to the complaint, neither the respondent's product "Kol-Tone," nor its bituminous coal product treated with "Kol-Tone," will accomplish the results claimed. (4515)

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

Consolidated Cigar Corporation, 730 Fifth Ave., New York, stipulated to cease certain representations in the sale of its "Harvester Cigars." The respondent agrees to cease advertising that these cigars depend entirely for their flavor upon Havana tobacco, or by the unqualified use of the phrase "Heart of Havana," or in any other manner, that the filler of its cigar is composed predominantly of tobacco grown in Cuba but consists in comparatively small part of genuine Havana tobacco blended with much greater amounts of tobaccos originating from other sources. (02804)

W. H. Kirkland Co.—A stipulation was accepted from an Anniston, Ala., co-partnership to cease certain representations in connection with the sale of cast iron soil pipe, pipe fittings and other allied products. The respondents are W. H. Kirkland, Alfred H. Kirkland and Elbie K. Weatherly, who, from 1934 to 1940, engaged in the sale of such products under the firm name of W. H. Kirkland Co.

The respondents agree to cease employing in their advertisements the words "Manufacturers" or "Manufactured" to identify the business conducted by them, and to desist from use of these words or other words of similar import which imply that they manufacture the products they sell or own, operate or control the factory in which they are made. (3150)

National Woolen Co.—Chester Krone, trading as National Woolen Co., 15 East 17th St., New York, entered into a stipulation to cease representing as the customary or regular prices or values of men's suits prices or values which are in fact fictitious and in excess of the customary prices. According to the stipulation, the respondent's agents represent that the regular price of certain suits is $35, but that they are being sold at a special price of $23.95, when in fact the customary price is not $35 but $23.95. (3129)

Nutty Brown Mills—C. A. Sears, trading as Nutty Brown Mills, Houston, Tex., entered into a stipulation that the respondent will cease advertising "Nutty Brown Bread" as being beneficial in reducing or maintaining body weight, unless used as an integral part of a diet intended for that purpose. The respondent also agrees to cease representing that this bread contributes less fat-producing substances than ordinary breads, gives one the assurance of Vitamin B adequacy, or is low in assimilable carbohydrates. The respondent further agrees to cease representing that the protein of Nutty Brown Bread products is complete in its biologic value and supports normal growth; that the average thin slice contains only 20 calories, and that the respondent's bread is essentially a protein food. (02805)

Walter-Lewis Woolen Corporation, 450 Seventh Ave., New York, entered into a stipulation to cease certain representations in the sale of textile fabrics.

The stipulation points out that the Wool Products Labeling Act of 1939 defines the term "wool" as meaning the fiber from the fleece of the sheep or lamb or hair of the Angora or Cashmere goat (and may include the so-called specialty fibers from the hair of the camel, alpaca, llama and vicuna) which has never been claimed from any woven or felted wool product.

In the sale of textile fabrics composed predominantly of fibers other than camel's hair, the respondent agrees to desist from use in its brands, labels, or other trade indicia, of the words "Camels" or "Camels Hair" or a depiction of a camel, or of other words of similar meaning so as to imply that camel's hair constitutes a substantial proportion of the fiber content of such fabric. The stipulation provides, however, that the words "Camels Hair" or other words properly descriptive of the so-called specialty fiber content of the fabric may be used to describe the so-called specialty fiber content when immediately accompanied in equally conspicuous type by accurate designations of each constituent fiber or material in the order of its predominance by weight and specifying the proportion or percentage of such so-called specialty fiber as, for example, "Wool and Camels Hair, Camels Hair 15%." (3127)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Von Schrader Manufacturing Co.—H. D. Rench and Francis U. Von Schrader, trading as Von Schrader Manufacturing Company, 1600 Junction Ave., Racine, Wis., engaged in the sale and distribution of electrically operated portable carpet washing ma-
The Commission finds that the respondents, in magazines and other publications, represented to prospective purchasers and operators that the "Von Schrader Carpet Washer" removes "the deeply imbedded grime and the microbes of disease which are carried into the home by every shoe that crosses the threshold," and "When you are getting started, naturally your profits depend on how diligently you go after business, but $200 to $400 a month is an easy average."

The Commission finds further that the soap solution used in the machines sold by the respondents, which perform their cleaning function by means of rapidly oscillating rubber brushes, is not a germicide and will not "destroy every vestige of germ" or remove "the microbes of disease," as represented. The cleansing action of the machine is limited to the removal from rugs and carpets of such dirt and other foreign material as may be loosened by the scrubbing action of the machine and incorporated in the lather which is then removed.

The Commission finds that $200 to $400 a month profit is not an "easy average" for operators of the respondents' machines, nor in fact an average of any kind of such operators' earnings. Because of the seasonal nature of the rug cleaning business, the findings continue, representations as to large gross amounts that may have been earned by individual operators in their best day, week, or month are misleading in that they represent exceptional rather than normal conditions.

The respondents are ordered to cease and desist from representing or implying:

1. That the Von Schrader rug and carpet washer, or any substantially similar machine, will in any way or to any degree restore the original color or colors of rugs or carpets;
2. That the Von Schrader rug and carpet washer, or any substantially similar machine, will destroy germs or other microorganisms in, or otherwise sterilize or substantially sterilize, rugs and carpets;
3. That the profits of operators of the Von Schrader rug and carpet washer, or any substantially similar machine, average $200 or $400 per month, or any other sum in excess of the actual average net profits of such operators over a sufficient period of time to give effect to the seasonal nature of such business, or using statements of specific sums earned by any particular operator or operators in any stated periods of time in a manner which imports or implies that any unusual or exceptional earnings represent the usual and ordinary course of business.
The Senate Interstate Commerce Committee's hearing on the White Resolution recessed Friday, June 20, probably to reconvene after July 4. Here are some excerpts from the last two days of the hearing:

D. M.Patrick. When Chairman Fly appeared before your committee he placed certain interpretations upon these rules with which I am unable to agree and which Commander Craven stated he was unable to agree. On June 13, 1941, the Commission made public a telegram sent to a licensee by the chairman on May 24, 1941, which shows a different interpretation of the rules than that which I am able to place upon them having regard for the language employed by five members of the Commission on May 2, 1941.

Now, I am also true that since the sending of that telegram Chairman Fly sent a letter over here, which the chairman of this committee read into the record, and in which he said he had the approval of his colleagues for the interpretation which I place upon it. But I submit that you cannot make what he said in that letter out of the language employed by five members of the Commission on May 2, 1941.

On June 14th the Commission itself amended its order in certain respects. If the Commission has power to promulgate these regulations it also has power to further amend them in other material respects either before or after the institution of any judicial action. In other words, we are shooting at a moving target, if you please, and the target can be further moved.

Under such circumstances there is no way in which I or any other lawyer can now correctly evaluate either the procedural problems involved in or the possible outcome of judicial action. I say that in all sincerity. But I do know that if it be the decision of this committee that all legislative action be abandoned and that the industry be left with recourse only to the courts, the remedy is more apparent than real. Aside from the procedural problems involved in questions of the wisdom, propriety and long-term effect of these rules, the industry cannot be adequately dealt with in any judicial proceeding.

But there are other reasons why judicial relief cannot afford an adequate remedy. I disagree with the distinguished counsel for Mutual who stated in effect that no major amendments of the Act are needed. I believe, and submit that it has already become apparent as a result of this hearing, that major changes are needed. The question is, when? The questions presented and emphasized here constitute only one phase of the problem which confronts the industry and the Commission.

Questions of procedure before the Commission and judicial review of Commission orders urgently need attention and solution by the Congress. The question of a stay order is only one part of it. The question of who can operate and under what circumstances is another part. And there is the question of a procedure before the Commission itself, and who can intervene, and whether he may intervene as a matter of right or merely as a matter of grace.

Senator Andrews. You are, then, opposed to the regulations?

Mr. Morelmy. We are opposed to the regulations as in their present form; yes.

The next day, May 14, 1941, in accordance with views expressed by the convention, the board of directors of IRNA adopted the following resolution (reading):

"The Officers are directed to prepare and submit a plan for approval by the Board for IRNA to support such efforts as will be organized by any and all agencies in the industry to endorse the White Senate resolution and endeavor to obtain its passage."

For the purpose of report to the Interstate Commerce Committee of the Senate, letters were sent to all Affiliates on all national networks asking if they approve or disapprove the foregoing convention resolution regarding the new regulations. Replies were received from a total of 216 stations, of which 62 are affiliated with Columbia, 55 with National Red, 66 with National Blue, and 51 with Mutual. On the convention resolution on the Affiliates who replied as recorded as follows:

Columbia, 61 approved and 1 disapproved.
National Red Network, 52 approved and 1 disapproved.
National Blue Network, 66 approved and none disapproved.
Mutual System, 37 approved and 11 disapproved; making a total of 216 approvals and 13 disapprovals.

Of the Mutual affiliates replying, 17 also have affiliations with other networks: 3 with Columbia, 10 with National Blue, 1 with National Red, and 3 with both Red and Blue.

In the same letter IRNA asked the opinion of Affiliates regarding the resolution adopted by the directors to support the White Senate resolution. On this subject the replies were as follows:

Columbia, 60 approved; 1 disapproved.
National Red, 49 approved; 2 disapproved.
National Blue, 65 approved; none disapproved.
Mutual, 38 approved; 12 disapproved.
Making a total of 210 for approval and 15 for disapproval.

In the same letter IRNA asked three other questions on which the replies are as follows: They are (reading):

3. The IRNA directors interpret the attitude of affiliates to be that while there are a number of points in which there is dissatisfaction among affiliates with network operating practices, nevertheless affiliates believe it is in the best interest of the industry and the public for such questions to be settled by business negotiations between affiliates and networks and not by government regulation. Do you approve or disapprove this view?

On this question the replies were as follows:

Columbia, 60 approved; 1 disapproved.
National Red, 51 approved; 1 disapproved.
National Blue, 60 approved; 4 disapproved.
Mutual, 34 approved; 17 disapproved.
Making a total of 205 for approval and 18 for disapproval.

(Continued on page 560)
WHITE HEARING

(Continued from page 559)

The next question asked was this (reading):

"4. A number of affiliates including many Mutual affiliates, feel that it is necessary to accomplish needed changes by govern¬
ment regulation, and therefore they are prepared to accept the regulations in their present form, even though they may not agree with them entirely. Do you approve or disapprove this view?"

On this question the replies were as follows:

- Columbia, none approved; 58 disapproved.
- National Red, 1 approved; 51 disapproved.
- National Blue, none approved; 64 disapproved.
- Mutual, 10 approved; 37 disapproved.

Making a total of 210 who disapproved and 11 who approved.

The last question was this (reading):

"5. Finally, we are informed there are some affiliates who believe the changes they want can only be accomplished by govern¬ment regulation but they think the new network regulations go entirely too far and believe some middle ground should be found by negotiation. Do you approve or disapprove this view?"

On this question the replies were as follows:

- Columbia, 13 for approval; 46 disapproved.
- National Red, 15 approved; 37 disapproved.
- National Blue, 16 approved; 47 disapproved.
- Mutual, 17 approved; 30 disapproved.

Making a total of 61 for approval and 160 for disapproval.

Senator Brooks. Do you hold any office in IRNA?

Mr. Gillin. No, sir; I do not.

Senator Brooks. Do they pretty effectively represent the independent stations?

Mr. Gillin. I think that they effectively present our views to the networks; but whether they have accomplished the results desired by the members of the Independent Radio Network Affili¬ates is another question.

Senator Brooks. What is their major function as it relates to your station?

Mr. Gillin. The major function as it relates to WOW or any other station is to try to work out the problems that the affiliates have with the networks. For instance, the affiliates believe that we should have the opportunity to place after each special program or each specified program a commercial announcement and station break. As you know, the Federal Communications Commission's rules specify that you must identify your station each half hour. Because of that particular rule it is the assumption on the part of the advertiser that we should not put a station break on the quarter hour. The Chesterfield program, on the basic Red, runs 14 minutes, and then they have an announcement of a different product made by the same company; in other words, to have two products advertised on the same program. Those are things that we are trying through this organization to work out with the network.

Senator Brooks. Do you have any specific example of prob¬lems that have been successfully worked out through that organization, where complaints have been made and results have been obtained by virtue of that organization's existence?

Mr. Gillin. Well, I believe that one thing that a number of us were concerned about was the fact that the advertiser was calling upon stations to place commercial announcements, live announcements, so to speak, on a network program at the end of every program with no cut-in charge. A number of us complained to the National Broadcasting Company and they took the matter up and protected us. I say they protected us, because of the fact that the client was large enough to demand that co¬operation from the station. That extra kind of announcement is now being paid for.

Senator Tunnell. What I was trying to find out was if the network or the station cannot make a contract for longer than a year it was going to result in their having a gentlemen's agree¬ment for a five-year contract.

Mr. Cook. As I understand the situation, if there is any im¬plication that you have a gentlemen's agreement, under these regu¬lations you may be subject to the loss of your station. If a fellow came in and said, "Here, I want that time," could you refuse him? If you do, isn't somebody going to come around a month or two later and say, "You refused him. That time was not sold. You must have something in the back of your head about some¬body else." It is going to be very dangerous.

Senator Tunnell. The question is whether there is a gentle¬men's agreement.

Mr. Cook. Yes. The question is whether somebody may have described it as a gentlemen's agreement, whether or not it is.

Senator Tunnell. It would not be criminal or subject to punishment if it were not there.

Mr. Cook. How are you going to prove it is not there? That would be my trouble. I do not know whether I would be able to prove it was not there.

As to this matter of exclusivity, our contract gives WFBL first call on all Columbia programs, and we have always been able to take care of the business Columbia has sent to us. In the instance of the American Oil Company's program, featuring Mr. Edwin C. Hill, and scheduled for 6 p.m., where we have had and now have the Socony Vacuum program, it appeared for a time that Columbia would have to place this program on another station. If that had to be done, it was all right with us. But we, of course, did not like to have a well-known Columbia artist building up a listening audience for a possible competitor of ours, so we found a place on our program equally desirable, and by transcribing we were able to give that program to the public.

Clarence Wheeler. I am fearful that the agencies who handle the larger programs of the national advertisers will scan the new possibilities offered to them under the new rules and it could easily come about that the Ford Hour we have carried since its inception because we were on Columbia, might migrate to the 50-kilowatt clear channel competitor as the agency might find it in their interest to do so because that would give them a larger audience.

It could easily work out that the agency and the sponsor could pay the higher rate and make such a change, in which case I would have to seek programs from other networks to fill in that hour or originate local programs.

If this took place throughout the country the clear channel stations would be so crowded with national programs that they

(Continued on page 562)
THE MYSTERY OF THE VANISHING RADIO AUDIENCES

When radio listeners plug up their ears and head for the nearest swinging doors, my dear Watson, there's a reason. And as likely as not that reason is an acute case of boredom brought on by the well meaning, but badly planned programs of organized groups to whom broadcasters have given their facilities.

"HOW TO USE RADIO"
(Second Edition)

Tells the public groups that ask for time how to use that time effectively from an audience-building standpoint

We sent you a copy earlier this week. We have a plan to assist you and your fellow broadcasters in placing large quantities of this valuable book in the hands of your listeners. Now is the time to act. Write us. We will cooperate with you in every way.

NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N. W.
would have no time to devote to the job they were set up for, to cover the rural areas of the nation with a view of keeping them informed on market information, agricultural reports, and all sorts of information necessary to the rural areas.

We have found in practice that long-term contracts with Columbia work to our advantage. If we did not feel reasonably secure that we were going to continue as their affiliate we would not have expended these large amounts for local improvements; in fact, we would not have had it to spend except for our affiliation with Columbia. We have found them very cooperative in meeting problems which at times came up when we were asked to clear time for a national network program.

Mr. Weiland. I have been the owner of Radio Broadcasting Station WFTC, at Kinston, North Carolina, for six or seven years; at least I have owned that station for the last five years.

When I established that station in Kinston it was one of the first to be established in a small community.

I am also a partner in the ownership of a station at Martinsville, Virginia; and have had an interest in a station at Goldsboro, North Carolina. I am also president of a station to be established in Newbern, North Carolina. These are all small markets. All of my experience in broadcasting practically has been in small markets.

I felt that the value of network affiliation is very great to a small station. I operated the station in Kinston for two or three years without any network affiliation. After the first two years of operation the novelty of the station wore off and people started to get tired of home talent, hill billies and the type of programs we could produce with our means.

So I looked around for a network. Eventually I was fortunate enough to get an affiliation with the Mutual Broadcasting System.

That was about a year and a half ago.

I felt that network affiliation is very important, especially to a small station. First of all, because of the sustaining programs we are able to bring to our communities, such as in eastern North Carolina, the type of programs that people in large cities are able to get; the type of programs that are of great interest so far as sustaining value is concerned.

For instance, we have had President Roosevelt as well as almost every other national figure any listener would like to hear, whereas prior to our network affiliation our people could not hear such national programs. That was because of the fact that there was only a secondary coverage in our market.

We are rather isolated, and if we do not give listeners the type of program they want there is not very much we can do, for we cannot give them very much of a choice otherwise.

Conditions are a lot better now. We feel that network commercial programs are very important because their quality is generally high; in fact, I might say that we have carried commercial network programs sometimes even though we were not paid for carrying them, and we did it because we felt it was in the public interest to do so.

We had our Mutual network service up until June 1st of this year—

Senator Tunnell (interposing). Do you mean that you carried network programs before you had your contract with the Mutual Broadcasting System?

Mr. Weiland. No.

Senator Tunnell. You said you carried network programs at times when you were not paid for them because it was for the public good. What did you mean by that statement?

Mr. Weiland. That was even during the time when we had a network contract. I do not think the advertiser thought our market was important enough to him to purchase time, but there were various programs sent out over the network and that were not sold there, and we did get permission to carry them because we thought they were of great enough interest to our listeners.

In the first place, the most of the national advertisers are not sufficiently interested in our market because we are secondary; that is, those who buy network time.

I will say that while we were getting Mutual's service there was another station, in Wilson, North Carolina, and that station and my station were sharing the line cost to Raleigh, where Mutual had a line. But on June 1st the station at Wilson which was sharing that line charged us with, cancelled its arrangement based upon the fact that the present rules would seem to necessitate it; and we were sitting right down at the end of the line, without any network service available to us.

I tried to make an arrangement with the telephone company on a temporary basis, but was not able to do it; and we could not afford to pay the whole of the line charge from Raleigh to Kingst.

That left our listeners without any network service. I then got in touch with the N. B. C. blue network, which has a line running down our way. I believe they have a line that passes directly through our town. I do not know how the line actually runs from the mileage standpoint but at least it runs through our community. And so it was that N. B. C. blue network was willing to accept our station as an affiliate.

However, that contract is in violation of these new F. C. C. Rules. I applied to the Federal Communications Commission for permission to sign the contract. They advised me that the present rules are in operation. So we are right in the middle of a lot of trouble, and that comes right on top of losing our power because in a wind storm it blew down. And right the next week we lost our network affiliation, and now we do not seem able to get one.

Senator Bone. I would rather own one telephone line and hire a few men to keep it up than run a radio station. You fellows ought to get out of the radio business and go into the telephone business.

Mr. Hasbrook. Perhaps many of us have thought of that in recent months.

Senator Bone. I just pass it on to you as a happy thought for today. I am astonished that you gentlemen have overlooked that.

Mr. Hasbrook. If you will permit me to say so, Senator, they got there ahead of us. (Laughter.)

I should like to say something, however, about the network program advantage as it has affected us. We are, for instance, the primary voice of the University of Vermont. It is their one way of reaching these back-hill farmers and telling them something about modern agricultural processes, and so forth.

Without the educational, religious, and governmental programs that come to you through a network connection such as Columbia’s School of the Air, which now operates in practically every one-room schoolhouse in northern Vermont, because they are able to hear it for months, you would not have your public interest; they would not listen to your station; consequently, they would not absorb the local information that the authorities wish to bring to them.

So it has very widely improved our ability to serve our community by having this network connection. Of course, you gentlemen understand the tremendous necessity, if not advantage, in those times, for people back home to know something about what you are thinking about here in Washington. The only way in which I could broadcast a statement by Senator Austin, for instance, was to get him to come to the Columbia station in Washington, put it on the wax, as they say, and mail it to me first class, special delivery, and then I could come along as the 48th state 24 hours after the other 47 had heard him make his speech on this network, without going under. It was a definite handicap, bringing government information, and even controversial information, to the people. The network has enabled us to offset that.
Senator Tunnell. I noticed you did not say anything about the political broadcasts in Vermont.

Senator Bone. They have only one party up there, Senator.

Mr. Hasbrook. If I might leave radio for a moment, it might surprise you, Senator, to know that we perhaps were extremely active in the newspaper end of our business in electing a Democratic mayor in our city. So, we have more of a political interest in Vermont than I think the public sometimes realizes.

Senator Tunnell. I am glad to hear that.

Mr. Hasbrook. There is another aspect of this network contractual arrangement that is very important from my standpoint. That is the straight aspect. People have spoken of the necessity for option time in order to protect the local businessman in his desire to sell his own products. Well, actually practically every network advertising program is a local program. When they are promoting the sale of coffee, for instance, there are in our area some five or six hundred grocers who are very vitally interested in the sale that that program is hoped, at least, will produce, and it trickles back into the public pocket in taxes, payroll, and the other normal things.

I do not look upon network advertising as something that has come to us from outside designed to take some of our money out of our pockets and out of our city and hand it to someone else. It is a very definite part of the merchandising system as it is now operated; and that goes for the wholesaler as well as the retailer. The local advertiser, who might perhaps come into opposition with the network program, usually wants daytime hours at least he does in our area. I have never at any time checked up with our local men—of course it may occur but it has not occurred with us yet, because they seem to want two different things, and are perfectly delighted to have New York money come up there with us yet, because they seem to want two different things, and it trickles back into the public pocket in taxes, payroll, and the other normal things.

I do not look upon network advertising as something that has come to us from outside designed to take some of our money out of our pockets and out of our city and hand it to someone else. It is a very definite part of the merchandising system as it is now operated; and that goes for the wholesaler as well as the retailer. The local advertiser, who might perhaps come into opposition with the network program, usually wants daytime hours at least he does in our area. I have never at any time checked up with our local men—of course it may occur but it has not occurred with us yet, because they seem to want two different things, and are perfectly delighted to have New York money come up there and help them in their business.

**New Mutual Contract**

The Mutual Broadcasting System has informally submitted to the FCC a form of a contract between that network and its affiliates. The contract form, which has been approved by the stockholders of Mutual, the FCC says, is non-exclusive, contains no provision for option time, makes it possible for the stations to determine their network affiliation at yearly intervals, and insures station responsibility in the selection and rejection of programs.

The Commission has not formally passed upon the validity of the contract form, and will give continuing study, the FCC says, to the development of network-station relations under such contracts. The Commission believes that the new Mutual network form of affiliation contract, as it understands the operations intended thereunder, will be in compliance with the letter and spirit of the regulations.

Commissioners Case and Craven dissented.

**MPPA Notice**

A notice dated June 17, 1941, was sent to broadcasting stations by Harry Fox of the Music Publishers' Protective Association, an organization made up almost entirely of ASCAP publishers. The notice is reprinted herewith.

HARRY FOX
Agent & Trustee
International Building
45 Rockefeller Plaza
New York

June 17th, 1941—No. 4194.

**Notice to Radio Stations**

To correct any confusion or misconception on your part which may have arisen from a bulletin recently issued by Standard Radio, of 6404 Hollywood Boulevard, Hollywood, California, and in order that you may avoid the possible commission of copyright infringements, I am herewith giving you notice, on behalf of the principals and copyright owners listed on the enclosed schedule, for whom I act as agent and trustee, that the broadcast reproduction of copyrighted musical compositions through such infringing instrumentalities as unlicensed electrical transcriptions constitutes an infringement for which all contributing parties, including the radio station, are liable.

This notice concerns itself only with presently unlicensed electrical transcriptions manufactured for the purposes of broadcasting and not with ordinary phonograph records.

Lest you infer from the aforementioned Standard Radio Bulletin that you may, with impunity, broadcast presently unlicensed electrical transcriptions of copyrighted musical compositions by merely holding the ordinary performing rights license, such as issued by the American Society of Composers, Authors and Publishers, you are herewith forewarned, upon advice of counsel, that such is not the case and that no such instrumentality which, in itself, is an infringing device, can be utilized for the purposes of broadcasting. The electrical transcriptions of Standard Radio presently constitute such unlicensed instrumentalities or devices as a result of the failure of Standard Radio to renew the licenses which it has held from my principals for many years past.

The other normal things.

I have not at any time checked up with our local men—of course it may occur but it has not occurred with us yet, because they seem to want two different things, and are perfectly delighted to have New York money come up there and help them in their business.

Very truly yours,

Harry Fox, Agent and Trustee.

The attention of broadcasting stations is called to the significance of the claim contained in the notice. Briefly, it is that a station with an ASCAP license cannot play ASCAP music in recorded form unless the recording has been specially licensed by the ASCAP publisher. The notice is limited to electrical transcriptions. However, the claim would apply equally well to phonograph records, and it may be noted that the communication says that the notice "concerns itself" only with electrical transcriptions but does not say that the claim may not be made with respect to phonograph records.

The immediate cause of the notice appears to be the practice of Standard Radio of relying upon the provisions of Section 1(e) of the Copyright Law which provides that one who makes a musical work has permitted the use of the work upon a mechanical instrument "any other person may make similar use of the copyrighted work upon payment to the copyright proprietor of a royalty of two cents on each such part manufactured, to be paid by the manufacturer thereof . . ." We are informed that Standard Radio is paying the two cents. The ASCAP publishers, as represented by MPPA, however, have contended that they are entitled to sums in excess of two cents, and in the past they have threatened to restrict performances of works electrically transcribed in the event that the payment was not made. This practice is now expressly forbidden by the ASCAP Consent Decree.

The consequences of the claim, if supported, however, would be much more far reaching than the individual situation involved. In its widest sense the claim is that a broadcasting station is liable for the $250 minimum damages for playing an ASCAP tune, even though it has an ASCAP license, unless the manufacturer of the transcription has a special license calling for additional payment above that provided in the Copyright Law. The notice applies to "unlicensed instrumentalities." Even on the claim as now made, if a phonograph manufacturer made records and then went bankrupt before payment of royalties was made (as recently happened in one instance), broadcasting stations are alleged to be liable for $250 for each infringing performance of tunes published by MPPA publishers. The claim also leaves the door open for a contention that more than the two cent charge can be made by MPPA publishers for ordinary phonograph records.

Broadcasters who intend to play ASCAP music from recorded
sources should, therefore, keep this claim in mind in order to protect themselves from suit.

It will, of course, be recollected that BMI is licensing all recordings, including transcriptions, at the standard two cents required by the Copyright Law, or less.

New BMI Contract

BMI sent to its subscribers a new contract form in line with the consent decree signed last winter. Any subscriber who has not yet received the new contract form should advise BMI immediately. Any other broadcaster who is interested may obtain the form from BMI.

CBS Counter-Proposal

CBS last week submitted a counter-proposal to ASCAP. A spokesman for CBS said:

"Columbia has consistently taken the position that it desires to have ASCAP music available for all of its programs at a fair price and under conditions which are economically feasible.

"In preparing this counter-proposal, Columbia has consulted with three of its affiliates, spokesmen for which said they believed these terms are fair and would be accepted by the station licensees if licenses on these terms were made available by ASCAP.

"Terms of CBS's proposal to ASCAP follow:

Since the Columbia Broadcasting System operates both a network and an individual stations, this proposal is for a complete deal covering both network and station operations.

It is also our belief that the deal should be made as comprehensive as possible to eliminate all possible causes of future friction. Therefore, in broad outline, our counter-proposal is as follows:

Blanket Network License

For the Columbia Broadcasting System Network operations as now constituted, we propose to pay 2% of the entire network net receipts (defined as gross sales from the sale of time less time discounts and advertising agency commissions actually allowed) after deducting the cost of permanent lines of the Columbia network as now constituted, or as constituted in the future (including the cost of operation of any delivery methods other than lines such as, frequency modulation transmitters and booster stations, or such other developments as may occur) and with deduction for expenses calculated as follows:

- 15% on the first $15,000,000 of net receipts as defined above
- 25% on the next $5,000,000
- 35% on the next $5,000,000
- 45% on all over $25,000,000.

If during the term of the contract, Columbia Broadcasting System no longer operates eight stations but operates any lesser number down to and including a minimum of three, an additional amount of $500,000 per annum shall be added to the network expense deduction stated above for each station less than eight. If the number of stations owned and operated by Columbia shall be reduced below three, then Columbia and ASCAP shall re-negotiate the terms of this contract and in the event of their failure to arrive at an agreement, the matter shall be submitted to arbitration, the results of which shall be binding upon both parties.

Local Station Blanket License

For local station blanket license for its owned and operated stations, Columbia proposes fees as follows:

- 2% on the net receipts (defined as gross from the sale of time less discounts and advertising agency commissions actually allowed) from local and national spot sales over its stations as averaged for the years 1936 to 1939, inclusive.
- 15% on the excess of such net receipts over this average.

In figuring sales during the term of the license, any programs cleared and paid for at the source shall be excluded, in the same manner as network programs are excluded.

For commercial programs using substantial ASCAP music—6.66% of net receipts (as defined above).

For commercial programs making only incidental use of ASCAP music (such as single theme or signature, bridge or background music, arrangements of public domain music and incidental music in connection with public events or sports broadcasts)—1.25% of such net receipts.

For sustaining use—1% of net revenue which would have been received if sustaining program had been sold at card rates for maximum number of weeks and times per week with allowance of maximum discounts and advertising agency commissions—but not exceeding 1½ times sustaining fee paid by the station in 1940.

In computing net receipts, whether for commercial programs or as assumed for sustaining programs, any program cleared and paid for at the source shall be excluded, in the same manner as network programs are excluded.

For local station blanket license since the draft promulgated in the spring of 1940 now constitutes, we propose to pay 2% of the entire network net receipts made to ASCAP by CBS which is equal to 2% of network payments to stations.

The balance of this 2% payment to ASCAP will be borne by CBS.

ASCAP shall agree in its contract with CBS that no payment will be made in respect of network revenue represented by the sale of broadcasting time over states in states with laws which prohibit operations as contemplated or payment by stations of license fees or reimbursements to the network. (This condition, subject to agreement on language to be incorporated in the contract has already been agreed to by ASCAP negotiators.)

This proposal is subject to the following conditions:

1. All contracts to be for term expiring Dec. 31, 1949, subject to a five-year extension at option of licensees, at rates and terms to be fixed by arbitration.

2. As under the Consent Decree and this proposal there is complete clearance at the source on network programs, it is obvious that this entire burden cannot be borne by CBS without assistance from stations. Accordingly, it is a condition that substantially all of the CBS affiliated stations shall agree to reimburse CBS that portion of the 2% payment on network net receipts made to ASCAP by CBS which is equal to 2% of network payments to stations. The balance of this 2% payment to ASCAP will be borne by CBS.

3. ASCAP shall agree in its contract with CBS that no payment would be made in respect of network revenue represented by the sale of broadcasting time over states in states with laws which prohibit operations as contemplated or payment by stations of license fees or reimbursements to the network. (This condition, subject to agreement on language to be incorporated in the contract has already been agreed to by ASCAP negotiators.)

4. Licenses shall be available to television, frequency modulation, short-wave and experimental stations owned by a regular station licensee—such licenses to be at a nominal fee until such time as revenues from such stations are equal to operating expenses and thereafter the license fee to be upon the same basis as for regular broadcast stations.

5. All claims of any nature of ASCAP and its members against licensees to be released.

6. Acceptance of a mutually satisfactory form of contract in each case. In that connection we have not seen a draft of network blanket license since the draft promulgated in the spring of 1940 and subsequently withdrawn, but attached hereto is a memorandum of partial comments on the June 6, 1941 draft of single station blanket license, which will indicate generally some of the questions to be decided.

7. No deal will be considered made until all points are resolved and acceptable contracts actually signed or tendered.

Also attached to CBS's counter-proposals is a "Memorandum of Partial Comments" anent the single station blanket license. These contain changes desired, and objections to certain paragraphs or clauses.
ASCAP Writers to Publish Through BMI

Several prominent ASCAP writers have entered into contracts with Broadcast Music, Inc., for the publication of their songs. Performing rights on these songs will be licensed directly to the broadcasters without payment of any fee. Music by leading ASCAP writers will, as a consequence, form part of the broadcasters' repertory. BMI will control the publication and mechanical rights in this music.

Comment on Marks Suit

Widely divergent opinions as to whether the performing rights in compositions are basically owned by writers, by publishers, or by both jointly, were expressed following the commencement of a suit by BMI and Edward B. Marks against ASCAP for a declaratory judgment. ASCAP has never taken a definite stand on this matter and the question has been a frequent bone of contention between ASCAP writers and ASCAP publishers. It is not yet known what stand ASCAP will ultimately take in the suit. All of this confusion indicates that it is necessary to clarify ownership of performing rights so that the rights of all concerned may be determined.

BMI FEATURE TUNES

12. THE RELUCTANT DRAGON

A BMI Success Story

Hy Zaret is celebrating his first anniversary with BMI, and in looking back over the year finds that the sale of sheet music of songs in which he has been a co-writer have averaged about 10,000 a week. The first big success was There I Go of which Hy wrote the lyrics and Irving Weiser the music. This tune, now enjoying popularity in England, ran for twenty-one consecutive weeks on the Hit Parade establishing a new high record for performance on that program. Following There I Go, Hy joined Joan Whitney and Alex Kramer in writing So You're the One, It All Comes Back to Me Now and My Sister And I. At one time he was identified with three and one-half songs on the Hit Parade, the half being the theme song at the end of the program, So Long For A While.

Asp to comment, Hy contributes the following:

"The task of a popular song writer is to express the feelings of all the people, not just one section of them, such as jitterbugs, long hairs, music critics or debs. A song can be good and be popular. Every song writer with a reasonable amount of ability expresses his personality in his songs. The sooner a writer finds out what his contribution is, the more consistently he expresses it, and the more assured is his position in the song world, provided, of course, that his craftsmanship is good enough and his personality strong enough. I believe that inspirational song writers who never have to sweat to write good songs are a species that doesn't exist."

My Sister And I jumps from fourth place to first place this week among national best selling retail records. The Hut Sut Song follows closely, and Daddy and Maria Elena occupy the third and fourth positions. Among the regional best sellers, the Hut Sut Song leads in the west and mid-west; Maria Elena in the east and Daddy in the south. In the sheet music best sellers, Hut Sut grabs the top spot nationally, in the east, in the mid-west, on the west coast, and second only to Intermezzo in the south. G'bye Now, the favorite from Hellzapoppin', is going strong for the fifth week and now holds third place among the leading music machine records. It is interesting to know that Jimmy Davis' You're My Sunshine, hillbilly tune, which does not show at all in the east, holds eighth place in the sheet music best sellers in the south, fifth place in the mid-west and eleventh place nationally.

Hut Sut Song

Strangest fluke to hit the music business in a long time is The Hut Sut Song which, from all indications, threatens to become the smash hit of the year, what with 10 recordings having been made of the number and practically every program listing it. It all started with a line of giberish dreamed up by a young attorney named Leo V. Killion. Incidentally, Killion insists on having the initial "V" in his name, although he refuses to divulge what it stands for. With the exception of this particular ditty, Killion never wrote a song in his life, preferring to save his line of chatter for the courtrooms. However, one day he sat himself down and rattled off an unintelligible but catchy bunch of phrases and took the stuff over to his chum of high school days, Ted McMichael who, by that time, had become one of the famed Merry Macs. Ted thought there was something intriguing about the lyric, although he couldn't understand a word of it. But then, neither could Killion, so they were even on that score. Ted called up his friend Jack Owens, lyric and song writer, and asked him to come over. Jack did, and he hasn't been the same since. The song, at that time, wasn't anywhere near its present form, but it had the nucleus of the tuneful germ that has infected the nation. The three boys put their heads together and knocked out The Hut Sut Song.

Before the song became a hit, Killion and Owens were doing nicely in a modest, unknown sort of way, but McMichael was hitting on all cylinders in the radio world. Now, all three of them are basking in the light of Dame Fortune. Leo has become the "piece de resistance" of the town of Sacramento, where he lives. He's a lawyer of the Sacramento State Legislature, and they're so proud of him they accept his word as law... which helps his political position no end. Not that he needs help. He's a good lawyer, Jack Owens had a song accepted by BMI, You Didn't Steal That Kiss, before the Hut Sut number made its debut, but since then he's had five accepted by publishing firms in rapid order. Jack is a handsome lad with about six feet of personality. He has a way of presenting a song that makes you tap your feet in rhythm when you listen to him sing. He's been in and out of show business for years, but show business hasn't cared much either way. Now, he's becoming so famous that there's a good chance of his getting a two weeks' engagement at the Paramount Theatre in New York, at a mighty healthy sum on condition, of course, that he plays and sings The Hut Sut Song.

How the boys got the song published is one of those things, Jack took it to two publishers who turned it down for the very legitimate reason that it was a--quote-- silly song--unquote. Then Jack took it to Alan Ross, music contact man in Los Angeles; Alan took it to Walter Schumann, music contact man

June 27, 1941 — 565
in Los Angeles. Walter Schumann got bitten by the "Hut Sut bug and considered going into the music publishing business on the strength of this one song. He did, and has never regretted it. The song took off over to Freddie Martin, who became Hut Sut conscious and introduced the song on his broadcasts from the Coconut Grove. Freddie hasn't regretted it. Neither has Ted McMichael. Neither has BMI, through whom the brand new Schumann Music Publishing Company releases the number. About the only people who regret are those who start singing it and can't, for the life of them, get the catchy tune and garbled words out of their minds.

As for the phrases being Swedish, about the only resemblance they have to Swedish is this—the "Rillerah" is a stream that runs through some Swedish colony in a town in the Middle West ... the boys think it's Minnesota. From there on, the gibberish is on its own ... and doing mighty well!

"With Me, It's You"

Miss Jane Crenshaw, dancing teacher of North Bergen, New Jersey, has won first prize for her title and lyric idea submitted in the contest held by Song Parade Magazine. The title, "With Mr. It's You", is based on the idea that "everything comes in pairs". The song will be heard for the first time on the sustaining programs of the Columbia Broadcasting System this week (June 29-July 5). The music and lyric based on the idea submitted by Miss Crenshaw were written by Henry Manners and Jimmy Shirl, who wrote "Braggin'" and other BMI hits.

Miss Crenshaw's letter to Song Parade Magazine follows:

"Dear Sir:

I wish to submit the following title for your contest:

'With Me, It's You'.

This title occurred to me while I was thinking of my boy friend. Everything comes in pairs—bacon and eggs; house and lot; preacher and marriage; etc.—and as I tried to put into words my thoughts about him, I thought, 'With Me, It's You!' It seems to me that this is the idea everyone has in connection with the one they like a lot. I like your magazine so much. Well, here's hoping!

Sincerely,

Jane Crenshaw (signed)"

New BMI Publishers

Broadcasting and television rights in the music of twelve new publishing companies are now available to all BMI subscribers. The new publishers are: American Melodies; Block Publishing Co.; Eugene Casivant; Fine Songs; Freeman Music Company; Graham Music Company; Greater New York Music Corporation; Reid and Singer Music Publishing Company; Sheppard Music Corporation; Stark Music Printing Company; Urban Publications and Worldwide Music Publishers.

Martin Block, conductor of WNEW's "Make Believe Ballroom" program, is the head of Block Publishing Co., which opened offices in New York early this week. Mr. Block's newest song, "I Guess I'll Have to Dream the Rest", is in the Block catalogue.

Music Programs Popular

Listening to musical radio programs has increased since January 1. The "vested interests" of the musical world said it couldn't be done. They said that after January 1st, 1941, the public would stop listening to musical programs on the radio. They said their music was indispensable.

What actually happened? Let's look at the record.

<table>
<thead>
<tr>
<th>Average C. A. B. Rating</th>
<th>Popular Music</th>
<th>Concert Music</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jan. 1940 to April 20, 1940</td>
<td>10.0</td>
<td>9.6</td>
</tr>
<tr>
<td>Jan. 1941 to April 20, 1941</td>
<td>10.2</td>
<td>10.2</td>
</tr>
</tbody>
</table>

Percent of Increase 1941 over 1940 . 20% 6.2%

Listening to musical programs went up. This increase ran against the general listening trend. More network programs of popular music are being sponsored. The Hooper analysis shows an increase of 9% in the number of hours devoted to sponsored popular music on networks.

The music supplied for broadcasting by BMI and the 191 music publishers associated with us has met the public taste. It has brought more listeners to musical radio programs. Here at BMI we are proud of this record. With our associated publishers we dedicate ourselves to supplying America with an ever-increasing flow of music everyone likes to play and hear.
“I believe that a uniform method of handling these situations could be adopted on the part of stations. Do you feel that it would be asking too much for the advertiser to furnish some assurance to the station that all mail responses will receive prompt and proper attention? Do you think this could be incorporated in our present mail form?”

Any station which has a solution or suggestion regarding this problem is asked to write to NAB.

**Free Time for Circus Denied**

Ever since “Editor & Publisher” printed a statement this spring that the circus would spend $300,000 in paid newspaper advertising this season, radio stations have stiffened in their attitude towards giving free time for circus promotion. The following letter from S. A. Cisler, general manager of WGRC, Louisville, Ky., is worthy of the attention of every station and sales manager. He writes to NAB:

“The famous theory of P. T. Barnum that ‘one sucker is born every minute’ evidently continues with the Ringling Brothers, Barnum & Bailey circus which is now passing through Louisville.

“WGRC was approached by one of these circus ‘radio contacts’ and implored to run as an ‘educational’ broadcast one or more transcriptions the circus man had under his arm.

“We asked if the circus fed Mr. and Mrs. Gargantuana, the zebras, the trapeze artists, and Mr. John Ringling North himself on ‘education.’ Further, if the circus was so educational why not have a special event, then offered to trade tickets to the equal of time for the circus man arrives in the late morning and tries to get time for the circus. . . .

“But how on earth do you expect a station to sell a platter when it be published in our weekly bulletin, along with my letters on your wonderful platters and interviews.”

“Lest we confuse all circuses with the so-called ‘greatest show on earth’ let me say that Cole Brothers Circus began its spring tour in Louisville with liberal purchases of radio time at regular card rates without any of the chiseling or stooping to label obvious plugs ‘educational.’ If one of the small shows like Cole Brothers can pay why not the biggest show on earth?"

“Let me urge every station to cooperate with Cole Brothers in their honest effort to pay their way and to give this enterprise 100% value in announcement or program positions on your station. Our power companies have never been paid off in ‘education.’ But we will never discourage the Barnum & Bailey boys until they go through a season with a procession of ‘no . . . no . . . no . . . no.’ ”

Although paying for newspaper space, posters and other forms of advertising, the circus has adopted a radio policy of “time for talent,” offering to furnish circus talent free for interviews or other programs if the time is donated. In reply to a letter from F. Beverley Kelley of the circus, Mr. Cisler wrote:

“I can’t blame you for taking free time if stations want to give it. That is good business for you and poor business for those stations who give away the only merchandise they have to sell.

“Your circus is a business enterprise, operated not as a public service but to make money. If you use radio to attract customers you should pay for the time, even though you are providing your own talent as a means of making that time productive and interesting.

“I fear for the fate of radio if the sponsors of Jack Benny, Bing Crosby, Major Bowes, Kate Smith, etc., had the same idea as your circus. They pay for talent and time and the combination is paying a profit. What’s so different from selling Jell-O by the package and a peek at Gargantuana for 50 cents? . . .

“I do not question the listener interest of your transcriptions. But how on earth do you expect a station to sell a platter when the circus man arrives in the late morning and tries to get time that afternoon? Evidently there was no expectation that a station would or could sell your platter locally in order to obtain regular revenue from promotion that would be practically 100% for the circus.

“So far as the circus not having anything to offer newspapers comparable to the platter or live talent programs you want to give free to radio stations—brother, let me have some of that cash money you pay to the newspapers and you can have all your marbles for me."

“I am sending a copy of your letter to NAB with a request that it be published in our weekly bulletin, along with my letters on the subject. For your information, the NAB has now changed and seems a bit more active in rooting out chiseling practices and urging stations to stand firm in resisting free time deals from enterprises that do have cash advertising budgets.

“Let me ask one question which I hope you will answer: Would the circus buy radio time if they could not get it free? And in parting, I still am glad Cole Brothers Circus pays its way even though the ‘greatest show on earth’ tries to get the same radio time free or for some passes.

“We will buy our tickets to your circus and your circus must buy its way to our audience!”

Permission to print Mr. Kelly’s letter was not received, so it cannot be quoted here.

**Per-Inquiry**

**International Advertisers Report**

Some radio stations did not receive payment for broadcasting services rendered to International Advertisers, Niagara Falls, N. Y., on behalf of Father Hennepin’s Ointment (Grand Island Distributing Co.). A report on this agency from the National Better Business Bureau, Inc., states:

“This firm was operated by Roderick G. Manson, whose present whereabouts are unknown to us.

“Apparently the whole thing was a fictitious setup, not entirely rational. The incident occurred in January, and Manson apparently sent announcements to radio stations all over the country without any intention of paying for them. He lived in a rooming house from which he was ejected for non-payment of rent.”

Incidents like these should serve to impress upon all stations the absolute necessity of checking beforehand on agencies or accounts of doubtful credit, or of requiring cash with contract.

**National Defense**

WJSV telephoned that beginning with Wednesday night (June 25) “Keep ‘em Flyin’” would be incorporated in the regular sign off. In the new sequence “Keep ‘em Flyin’” immediately precedes the playing of the national anthem.

What is believed to be an unfortunate trend in programming is apparently being reversed. One time a number of stations set aside a definite period each day to carry various types of national defense announcements. This was undoubtedly done as a result of the unprecedented number of requests for time but the procedure did not work out successfully for many types of national defense announcements. Audience availability was sometimes at a low ebb so far as particular announcements were concerned.

For example, it was felt that 3:00 p. m. was no time to broadcast recruiting announcements for highly specialized young men who can qualify for Army or Navy flyers.

All in all the program managers are doing an exceptionally fine job. Results are more effective than in the past because they are
using extreme care to spot announcements at the most appropriate available periods.

Seven hundred twenty-nine (729) stations have reported cooperation in the campaign to recruit 120,000 Flying Cadet applicants for the Army.

Station WIOD, Miami, has established a “Defense Activities Department.” Frank Jaffe is director.

Patriotic Announcement

Dr. Frank Kingdon has made the suggestion that radio stations across the country insert a single sentence at a certain time each day, emphasizing the unity of their communities and the United States. For example:

1. This is Station XYZ in Los Angeles where a million and a half people of all races and religions are united in devotion to freedom and democracy.
2. This is Station XYZ in Los Angeles broadcasting in a land pledged to liberty and justice to all.

We pass this on to members for consideration in the light of such activities as they may be engaged in to further the understanding of the principles for which this country stands.

Bonus Plans

A member has asked the Labor Relations Department for “good workable bonus plans” for employees. The Labor Relations Director would appreciate an outline of any now in effect in the industry.

FEDERAL COMMUNICATIONS COMMISSION

Newspaper Hearing Postponed

The FCC announced that it had postponed until July 23 the hearing which was scheduled to begin June 25 in connection with its inquiry pursuant to Order No. 79, to determine what policy or rules, if any, should be promulgated in connection with newspaper operation of high frequency (FM) broadcast stations, and future applications for standard broadcast stations by newspapers.

This action was prompted by a petition filed by Harold Hough, chairman of the Newspaper-Radio Committee, which asked for postponement until September 15 in order to give the newspaper-radio interests more time in which to prepare their presentation.

Questionnaire on War Broadcasts

In compliance with a request by the Senate Interstate Commerce Committee, the FCC will issue a questionnaire to all networks and standard broadcast stations to ascertain whether they have “presented well-rounded rather than one-sided discussions regarding the role of this country with respect to the war abroad.” In particular, the Commission was requested to obtain from the stations and networks compilations showing the names of speakers who have been heard on this issue, and the dates and time of such broadcasts.

The networks and individual stations are to be asked to furnish this information for the five-month period from January 1 to June 1 last, and to return the questionnaires to the Commission by July 21 next.

Service Broadcasts Expedited

At the request of the Secretary of War and in view of the growing public demand for broadcasts from military establish-

ments, the FCC has suspended Sections 3.408(d) and 4.21 of its rules and regulations insofar as they relate to rebroadcast and relay of non-commercial programs from camps and other points by local arrangement where Government facilities are employed. The suspension of these rules will permit the expediting of such programs.

Educational FM Station

The San Diego (California) Unified School District has been granted a construction permit by the FCC for a non-commercial educational broadcast station to serve 55 educational units in that area. It is authorized to operate on 42300 kilocycles, with 1 kilowatt of power, employing frequency modulation (FM).

The San Diego school system intends to utilize this service to advance its educational program by rebroadcasting to specific classes or schools recorded talks, plays, musical programs and events of an educational or historic nature, provide the various schools with talks, plays, musical programs, and other special activities as presented by classes in the school system, and, incidentally, to train students in the field of radio communication.

The cost of the system is estimated at slightly more than $6,000. It is proposed to locate the transmitter at 348 West Market Street, San Diego.

New York City Station

The FCC on June 17 granted the application of the City of New York, Municipal Broadcasting System, for a frequency assignment, 43500 kilocycles.

Rules and Regulations

The Commission en banc June 24 took the following action on Rules and Regulations:

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, June 30. They are subject to change.

Monday, June 30

Broadcast

NEW—KNOE, Incorporated, Monroe, La.—C. P., 1420 kc., 250 watts, unlimited time.

KFNF—KFNF, Incorporated, Shenandoah, Iowa.—Renewal of license, 920 kc., 500 watts night, 1 KW day, SH-KUSD.

Consolidated Hearing

Further Hearing to be Held in Washington, D. C.

WPAY—Chester A. Thompson (Transferor), and The Brush-Moore Newspapers, Inc., Portsmouth, Ohio (Transferee).—Transfer of control, 1400 kc., 100 watts, unlimited time.

WPAY—Clyde Lee Corporation, Portsmouth, Ohio.—Renewal of license, 1400 kc., 100 watts, unlimited time.

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.
Wednesday, July 23

Investigation to determine what policy or rules, if any, should be promulgated in connection with operation of new high frequency (FM) broadcast stations and for future acquisition of standard broadcast stations by newspapers, pursuant to Order No. 79.

Thursday, July 24

WBGB—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Renewal of license, 890 kc., 1 KW, daytime, and 1 KW, night.

Friday, July 25

KORN—Clark Standiford (Transferor), and C. J. Malmsten, A. C. Sidner, S. S. Sidner and Arthur Bakówin (Transferees), Fremont, Nebr.—Transfer of control, 1400 kc., 250 watts, unlimited time.

Consolidated Hearing

WCAM—City of Camden, Camden, N. J.—Renewal of license, 1310 kc., 500 watts, S-WT NJ and WCAP.

WCAP—Radio Industries Broadcast Co., Ashbury Park, N. J.—Renewal of license, 1310 kc., 500 watts, S-WT NJ and WC AM.

WTNJ—WOAX, Incorporated, Trenton, N. J.—Renewal of license, 1310 kc., 500 watts, S-WCAM and WCAP.

WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Lester Q. Krasin & Otto A. Krutzner, d/b as Krasin and Krutzner, designees; WFIL Broadcasting Co., Philadelphia, Pa.—Granted consent to voluntary transfer of 50% interest of WFIL Broadcasting Co., licensee of station WIFIL, from Strawbridge & Clothier to Lit Brothers, for a consideration of $126,000; station operates on 560 kc., 1 KW, unlimited time (B2-TC-254).

KROW—Educational Broadcasting Corp., Oakland, Calif.—Granted construction permit authorizing increase in power from 1 to 5 KW, installation of new transmitting equipment and directional antenna for night use, and move of transmitter to Union Stock Yards, approximately 5 miles south-southwest of the center of San Francisco. This grant is made subject to any future action Commission may take regarding the problem of multiple ownership (B5-P-2803).

Desig-nat-ed for Hearing

WAFF—Drovers Journal Publishing Co., Chicago, Ill.—Application for construction permit to increase hours of operation from day to unlimited time; move transmitter site to Union Stock Yards, install new transmitter and install directional antenna for nighttime use; 950 kc., 1 KW (B4-P-3077).

KALB—Alexandria Broadcasting Co., Inc., Alexandria, La.—Application for construction permit to install a new transmitter and directional antenna for use during nighttime; change frequency from 1530 kc. to 580 kc., and increase power from 250 watts to 1 KW, unlimited time (B3-P-3062).

Miscellaneous

WOD—King-Trendle Broadcasting Corp. (assignor), WOOD Broadcasting Corp. (assignee), Grand Rapids, Mich.—Granted motion for continuance of hearing on application for voluntary assignment of license of Station WOOD, now scheduled for June 20, 1941, until June 27, 1941 (under authority of Paragraph 6 of Administrative Order No. 2).

KFDF—S. Dak. State College, Brookings, S. Dak.—Granted special temporary authority to remain silent for a period beginning June 15 and ending Sept. 15, 1941 (B4-S-645).

Upstate Broadcasting Corp., Saranac Lake, N. Y.—Granted special temporary authority to operate, a Composite 1-watt MOPA transmitter on 33830 kc., installed in a private plane, in order to relay broadcast of Saranac Lake Airport Dedication exercises only, to radio station WBNS at July 14 and 15.

W8XAD—WHEC, Inc., Rochester, N. Y.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 14500 kc., 1 KW, special emission for FM, with transmitter located at 979 Mt. Read Boulevard, Rochester, for the period June 30 to August 29, 1941.

W43B—The Yankee Network, Boston, Mass.—Granted extension of special temporary authority to operate frequency modulation station commercially on 14500 kc., 50 KW, special emission for FM, using the high frequency experimental station WIXO at summit of Asnebikshit Hill, Paxton, Mass., for period June 28 to August 28, 1941, without prejudice to issues to be determined in hearing on application B1-PH-51.

WHYN—The Hampden-Hampshire Corp., Holyoke, Mass.—Granted special temporary authority to rebroadcast transmissions of a U. S. Army bomber on June 17, in conjunction with the local U. S. O. drive.

W8XVH—WBNS, Inc., Columbus, Ohio.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 14500 kc., 250 watts, special emission for FM, with transmitter located at 50 W. Broad St., Columbus, for the period June 30 to August 29, 1941.

W65H—WDRC, Inc., Hartford, Conn.—Granted extension of special temporary authority to rebroadcast high frequency broadcast stations W2XMW and W1XOJ, emissions for a period June 30 to August 28, 1941.
WlXK—Westinghouse Radio Stations, Inc., Hull, Mass.—Granted extension of special temporary authority for the period June 20 to August 29, 1941, to operate a high frequency experimental broadcast station on 42600 kc., 1000 watts, special emission for FM, with transmitter located at Newport Road, Hull, Mass.

WlXSN—Westinghouse Radio Stations, Inc., E. Springfield, Mass.—Granted extension of special temporary authority for the period June 30 to August 29, to operate a high frequency experimental broadcast station on 42600 kc., 1 kw, special emission for frequency modulation, with transmitter located at 625 Page Blvd., E. Springfield, Mass.

W6H—WDRC, Inc., Hartford, Conn.—Granted extension of special temporary authority to operate FM station commercially on 16500 kc., 1000 watts, special emission for FM, with transmitter located at Meriden, Conn., for the period June 30 to August 28, pending completion of construction pursuant to construction permit (B1-PH-357).

WTM1—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Granted license to cover construction permit (B4-P-2696) to install directional antenna for night use and increase power from 1 kw night, 5 kw day, to 5 kw, unlimited time (B4-L-1422). Also granted authority to determine operating power by direct measurement (B4-Z-970).

WIBF—Rock Island Broadcasting Co., Rock Island, Ill.—Granted license to cover construction permit (B4-P-2568) for change in type of transmitter and change in directional antenna (B4-L-1427). Also granted authority to determine operating power by direct measurement of antenna input (B4-Z-993).

WNAB—Halo Thomas, Bridgeport, Conn.—Granted modification of construction permit (B1-P-2263) which authorized installation of new transmitter and directional antenna for night use; increase in power, change in hours of operation and move of transmitter) for extension of completion date to Sept. 22/41 (B4-MP-1315).

WGMA—Arrington & Arrington, Covington, Va.—Granted license to cover construction permit for new station (B2-P-3066); 1340 kc., 250 watts, unlimited time (B2-L-1433). Also granted authority to determine operating power by direct measurement of antenna input (B2-Z-1023).

KGLM—Mason City Gazette Co., Mason City, Iowa.—Granted license to cover construction permit (B4-P-2329) to install new transmitter, approve transmitter site, directional antenna for night use only, and increase in power to 1 kw, change frequency and directional antenna on 1360 kc., NIRBA (B4-L-1411). Also granted authority to determine operating power by direct measurement (B4-Z-908).

WBTA—Batavia Broadcasting Corp., Batavia, N. Y.—Granted license to cover construction permit (B1-P-2909) for a new station to operate on 1490 kc., 250 watts, unlimited time (B1-L-1340). Also granted authority to determine operating power by direct measurement of antenna input (B1-Z-1026).

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Granted modification of construction permit (B5-P-2848, for installation of DA for night use; increase in power to 5 kw), for extension of time in which to complete construction from June 22 to August 1, 1941 (B5-MP-1316).

WTJS—The Sun Publishing Co., Inc., Jackson, Tenn.—Granted modification of construction permit (B5-P-2525, for change in frequency, increase in power, installation of new transmitter and directional antenna) for authority to change type of transmitter and extend completion date to 180 days after grant (B3-MP-1322).

WGAN—Portland Broadcasting Co., Portland, Maine.—Granted license to use formerly licensed Western Electric 352-K-1 main transmitter as an auxiliary using 500 watts power (B1-L-1420).

WOR—Bamberger Broadcasting Service, Inc., Newark, N. J.—Granted modification of construction permit (B1-P-2319 for changes in antenna system) for extension of commencement date to July 1 and completion date to Jan. 1, 1942 (B1-MP-1324).

WLOG—Clarence H. Frey & Robert O. Greever, Logan, W. Va.—Granted license to cover construction permit for changes in equipment and increase in power; 1320 kc., 250 watts, unlimited time (B2-L-1423).

WWSK—Vermont Radio Corp., Inc., St. Albans, Vt.—Granted license to cover construction permit for new station; 1150 kc., 1 kw, daytime (B1-L-1406). Granted authority to determine operating power by direct measurement of antenna input (B1-Z-591).

W9B—The Yankee Network, Inc., Boston, Mass.—Granted modification of construction permit for new high frequency broadcast station, for extension of commencement and completion dates from December 31, 1940 and June 30, 1941, to 60 days after grant and 6 months thereafter, respectively (B1-MPH-26).

K4SLA—Don Lee Broadcasting System, Los Angeles, Calif.—Granted modification of construction permit for new high frequency broadcast station, for extension of commencement and completion dates from December 31, 1940, and June 30, 1941, to 60 days after grant and 180 days thereafter, respectively (B5-MPH-30).

W9XAK—Kansas State College of Agriculture and Applied Science, Manhattan, Kans.—Granted modification of construction permit for new television station for extension of completion date from July 15, 1941, to October 15, 1941 (B4-MPVB-42).

WXBI—National Broadcasting Co., Inc., Bound Brook, N. J.—Granted modification of construction permit as modified, for change in equipment, frequencies and increase in power, for extension of completion date from June 18 to August 6, 1941 (B1-MPBI-29).

WHAU—John W. Haisig, Greenfield, Mass.—Granted authority to install new automatic frequency control equipment (B1-P-226).

WEBC—Head of the Lakes Broadcasting Co., Duluth, Minn.—Granted authority to determine operating power by direct measurement of antenna input (for auxiliary transmitter) (B4-Z-1097).

WXYZ—King-Trendle Broadcasting Corp., Detroit, Mich.—Granted authority to determine operating power by direct measurement of antenna input (for auxiliary transmitter) (B2-Z-1034).

WSM—The National Life & Accident Insurance Co., Nashville, Tenn.—Granted authority to determine operating power by direct measurement of antenna input (for auxiliary transmitter) (B2-Z-938).

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Granted authority to determine operating power by direct measurement of antenna input (for auxiliary transmitter) (B3-Z-954).

KAST—Astoria Broadcasting Co., Astoria, Ore.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-956).

WRAL—Capitol Broadcasting Co., Inc., Raleigh, N. C.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1074).

KRE—Central Calif. Broadcasters, Inc., Berkeley, Calif.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1074).

WBLK—Charleston Broadcasting Co., Clarksburg, W. Va.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1022).

WBU—Wm. C. Forrest, Pouyette, Wisc.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-999).

KTOH—Garden Island Publishing Co., Ltd., Lihue, T. H.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-1945).

WJEW—Hagerstown Broadcasting Co., Hagerstown, Md.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-1019).

KJFI—KFJ1 Broadcasters, Inc., Klamath Falls, Ore.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1014).

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1029).
APPLICATIONS FILED AT FCC

550 Kilocycles

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Modification of construction permit (B5-P-2422) to install new transmitter, directional antenna for day and night use, increase in power, and move transmitter, requesting extension of completion date from 7-14-41 to 10-14-41.

580 Kilocycles

WJAC—Enrique Abarca Sanfeliz, San Juan, Puerto Rico.—Modification of construction permit (B-2136) for a new broad-
cast station, requesting approval of antenna system, change in type of transmitting equipment, increase in power from 1 KW night, 5 KW day, to 5 KW day and night, and approval of transmitter and studio sites.

620 Kilocycles

WTMJ—The Journal Company (The Milwaukee Journal), Milwaukee, Wisc.—Authority to determine operating power by direct method.

WMLJ—The Journal Company (The Milwaukee Journal), Milwaukee, Wisc.—Modification of license to increase power of auxiliary transmitter from 1 KW night, 5 KW day, to 5 KW day and night.

790 Kilocycles

KGHL—Northwestern Auto Supply Co., Inc., Billings, Mont.—Modification of construction permit (B5-P-2701) as modified, for installation of directional antenna for night use and increase in power, requesting extension of completion date from 7-16-41 to 9-16-41.

930 Kilocycles

Paducah Newspapers, Inc., Paducah, Ky.—Construction permit for a new broadcast station to be operated on 930 kc., 1 KW, unlimited time, using directional antenna for day and night.

960 Kilocycles

WDBJ—Times-World Corporation, Roanoke, Va.—License to cover construction permit (B2-P-2522) as modified, for installation of directional antenna for night use, increased power, and approval of transmitter site.

1240 Kilocycles

KGBS—Harbenito Broadcasting Co., Harlingen, Texas.—Modification of construction permit (B3-P-2747) as modified, for a new broadcast station, requesting authority to move studio.

KXOL—Sweetwater Radio, Inc., Sweetwater, Texas.—Authority to determine operating power by direct method.

WCOV—Capital Broadcasting Co., Inc., Montgomery, Ala.—License to cover construction permit (B3-P-2802) to make changes in equipment and increase power.

1340 Kilocycles

KAND—Navarro Broadcasting Ass'n, J. C. West, President, Corsicana, Texas.—Authority to determine operating power by direct method.

WEHE—Ruben E. Bronheim, Fitchburg, Mass.—Modification of construction permit (B1-P-3061) for a new station, requesting approval of antenna and transmitter site.

1400 Kilocycles

KTEM—Bell Broadcasting Co., Temple, Texas.—Authority to determine operating power by direct method.

WBTM—Piedmont Broadcasting Corp., Danville, Va.—Construction permit to install new antenna, increase power from 100 watts night, 250 watts day, to 250 watts day and night, and move transmitter.

1450 Kilocycles

KGW—E. L. Allen, Alamosa, Colo.—Construction permit to increase power from 100 watts to 250 watts and install new transmitter.

1490 Kilocycles

WERC—Presque Isle Broadcasting Co., Erie, Pa.—License to cover construction permit (B2-P-2251) as modified, for a new station.

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Authority to determine operating power by direct method.

1530 Kilocycles

WCKY—L. B. Wilson, Inc., Cincinnati, Ohio.—Construction permit to make changes in directional antenna system, and to change from directional antenna day and night to directional antenna after sunset at Sacramento, California.

1570 Kilocycles

KOMA—KOMA, Inc., Oklahoma City, Okla.—Construction permit to install new transmitter and directional antenna for day and night, increase power from 5 to 50 KW, change frequency from 1520 kc. to 1600 kc., to Kansas City, Kansas, move studio from Lawrence, Kansas, to Kansas City, Missouri, and change power from 1 KW day and 5 KW day to 5 KW. Amended: To request power of 25 KW night and 50 KW day, make changes in directional antenna, and use facilities of KGGF.

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Modification of license to change frequency from 1250 kc. to 1250 kc., to Kansas City, Missouri, and change power from 1240 kc. to 1250 kc., unlimited time, facility vacated by KXYZ.

WGVO—E. D. Rivers, Valdosta, Ga.—Construction permit to install new transmitter, increase power from 250 watts to 500 watts night and 1 KW day, and change frequency from 1150 kc. to 1160 kc.

WREN—The WREN Broadcasting Co., Inc., Topeka, Kans.—Construction permit to install directional antenna for day and night use, move transmitter from Tonganoxie, Kansas, to Kansas City, Kansas, move studio from Lawrence, Kansas, to Kansas City, Missouri, and change power from 1 KW night and 5 KW day to 5 KW. Amended: To change frequency from 1250 kc. to 1060 kc., increase power from 5 to 50 KW, change hours of operation of S-KFUS to unlimited time, make changes in directional antenna for night use only, change transmitter location from Kansas City, Kansas, to Jarbola, Kansas, and studio location from Kansas City, Missouri, to Topeka, Kansas, and install new transmitter.

H. C. Cockburn, tr. as San Jacinto Broadcasting Co., Houston, Texas.—Construction permit for a new broadcast station to be operated on 1470 kc., 1 KW, unlimited time, facilities vacated by KXYZ.

Binney Imes & Robin Weaver, d/b as Imes-Weaver Broadcasting Co., Murphysboro, Tenn.—Construction permit for a new broadcast station to be operated on 1520 kc., 250 watts, unlimited time, facilities of WSIX.

Evening News Press, Inc., Port Angeles, Wash.—Construction permit for a new broadcast station to be operated on 1350 kc., 250 watts, unlimited time, facility vacated by KXYZ.

Bernard N. Walker, Concord, N. C.—Construction permit for a new broadcast station to be operated on 1100 kc., 250 watts, unlimited time.

National Broadcasting Co., Inc., New York, N. Y.—Construction permit for a new television broadcast station to be operated on Channel 21, 50000-56000 kc.; emission, A5 and special for frequency modulation; ESR: 1500, unlimited time.

National Broadcasting Co., Inc., New York, N. Y.—License to cover construction permit (B1-PCT-1) for a new television broadcast station.

KNET—Bonner Frizzell, Palestine, Texas.—Authority to determine operating power by direct method.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Construction permit to change frequency from 1450 kc. to 1450 kc., increase power from 250 watts to 1 KW, install new transmitter, and make changes in antenna. Amended: To change type of transmitter.

WGN—F. C. Todd, Gastro, N. C.—Authority to install automatic frequency control equipment.

MISSCELLANEOUS APPLICATIONS

KOMA—KOMA, Inc., Oklahoma City, Okla.—Construction permit to install new transmitter and directional antenna for day and night, increase power from 5 to 50 KW, change frequency from 1520 kc. to 1600 kc., to Kansas City, Kansas, move studio from Lawrence, Kansas, to Kansas City, Missouri, and change power from 1 KW night and 5 KW day to 5 KW. Amended: To request power of 25 KW night and 50 KW day, make changes in directional antenna, and use facilities of KGGF.

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Modification of license to change frequency from 1250 kc. to 1250 kc., to Kansas City, Missouri, and change power from 1240 kc. to 1250 kc., unlimited time, facility vacated by KXYZ.

WGVO—E. D. Rivers, Valdosta, Ga.—Construction permit to install new transmitter, increase power from 250 watts to 500 watts night and 1 KW day, and change frequency from 1150 kc. to 1160 kc.

WREN—The WREN Broadcasting Co., Inc., Topeka, Kans.—Construction permit to install directional antenna for day and night use, move transmitter from Tonganoxie, Kansas, to Kansas City, Kansas, move studio from Lawrence, Kansas, to Kansas City, Missouri, and change power from 1 KW night and 5 KW day to 5 KW. Amended: To change frequency from 1250 kc. to 1060 kc., increase power from 5 to 50 KW, change hours of operation of S-KFUS to unlimited time, make changes in directional antenna for night use only, change transmitter location from Kansas City, Kansas, to Jarbola, Kansas, and studio location from Kansas City, Missouri, to Topeka, Kansas, and install new transmitter.

H. C. Cockburn, tr. as San Jacinto Broadcasting Co., Houston, Texas.—Construction permit for a new broadcast station to be operated on 1470 kc., 1 KW, unlimited time, facilities vacated by KXYZ.

Binney Imes & Robin Weaver, d/b as Imes-Weaver Broadcasting Co., Murphysboro, Tenn.—Construction permit for a new broadcast station to be operated on 1520 kc., 250 watts, unlimited time, facilities of WSIX.

Evening News Press, Inc., Port Angeles, Wash.—Construction permit for a new broadcast station to be operated on 1350 kc., 250 watts, unlimited time, facility vacated by KXYZ.

Bernard N. Walker, Concord, N. C.—Construction permit for a new broadcast station to be operated on 1100 kc., 250 watts, unlimited time.

National Broadcasting Co., Inc., New York, N. Y.—Construction permit for a new television broadcast station to be operated on Channel 21, 50000-56000 kc.; emission, A5 and special for frequency modulation; ESR: 1500, unlimited time.

National Broadcasting Co., Inc., New York, N. Y.—License to cover construction permit (B1-PCT-1) for a new television broadcast station.

KNET—Bonner Frizzell, Palestine, Texas.—Authority to determine operating power by direct method.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Construction permit to change frequency from 1450 kc. to 1450 kc., increase power from 250 watts to 1 KW, install new transmitter, and make changes in antenna. Amended: To change type of transmitter.

WGN—F. C. Todd, Gastro, N. C.—Authority to install automatic frequency control equipment.

1490 Kilocycles

WERC—Presque Isle Broadcasting Co., Erie, Pa.—License to cover construction permit (B2-P-2251) as modified, for a new station.

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Authority to determine operating power by direct method.
WOKO, Inc., Albany, N. Y.—Construction permit for a new studio transmitter broadcast station to be operated on 1340 kc., 50 watts, special emission for frequency modulation, to be used in conjunction with applicant's proposed high frequency broadcast station.

Northeastern Pennsylvania Broadcasters, Inc., Wilkes-Barre, Pa.—Construction permit for a new broadcast station to be operated on 1210 kc., 250 watts, unlimited time, facilities of WIBAX.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against them.

S. Angell & Co.—Alleging misrepresentation and the use of lottery methods in the sale of furs and fur garments, a complaint has been issued against Steven Angell and Asimo Liampos, trading as S. Angell & Co., 236 West 27th St., New York, manufacturers.

The complaint alleges that the respondents engage in the practice of failing to disclose the true nature and origin of their fur products and of affirmatively misrepresenting their nature and origin by means of tags, labels, advertisements, circulars, price lists and other printed matter.

According to the complaint, the respondents represent products made from rabbit or other peltries as being made from mink, seal, beaver, muskrat, skunk, sable, squirrel and broadtail lamb peltries by dressing and dyeing them to resemble these peltries and by use of such terms as "Minkolet," "Minkolene," "Norwegian Seal," "Hudseal," "Beaverette," "Mendoza Beaver," "Silvertone Muskrat," "Skunkolene," "Sabellette," "Squirrellette," and "Broadtail"; and represent by use of the word "Norwegian" that certain of their products are made from peltries imported from Norway, when such is not a fact.

The complaint further alleges that the respondents, in selling their products, furnish various devices and plans of merchandising which involve the operation of lottery schemes when such products are sold and distributed to ultimate consumers.

Miles Brokerage Co., Inc.—Alleging violation of the brokerage provision of the Robinson-Patman Act, a complaint has been issued against Miles Brokerage Co., Inc., Clearfield, Pa., which also maintains an office in Buffalo; Miles & Co., Inc., DuBois, Pa.; Miles-Bradford Co., Bradford, Pa., and Miles-Kane Co., Kane, Pa.

The complaint points out that the capital stock of Miles Brokerage Co., Inc., is held by twenty-two stockholders and that the capital stock is identified with the three buyer respondent corporations, is a stockholder in the brokerage company and takes a share in the corporation's earnings and profits; William H. Miles, president of the three buyer respondent corporations, is a stockholder in the brokerage company and takes a share in the corporation's earnings and profits.

The complaint further alleges that in the buying and selling transactions resulting in the delivery of merchandise from one or more sellers to the three respondent buying companies, upon their own purchases, violates the brokerage provision of the Robinson-Patman Act. (4520)

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

Bean Brummel Ties, Inc., also trading as Weibaulm Bros., Brewer Co., Cincinnati, entered into a stipulation to cease certain representations in the sale of neckties and mufflers.

The respondent agrees to cease employing the words "Silk," "Pure Dye," or other words connoting silk to describe a product not composed of silk. If, according to the stipulation, the product is composed partly of silk and partly of other fibers and the word "Silk" or other silk-connoting word is used properly to describe the silk content, such words shall be accompanied by other words in equally conspicuous type to accurately designate each constituent fiber or material in the order of its predominance by weight.

The respondent also stipulates that it will cease offering for sale or selling any silk product containing any metallic weighting without full and nondeceptive disclosure on labels, tags and all advertising matter of the presence of this weighting and its percentage or proportion, and that it will cease advertising, branding, labeling, invoicing, selling or offering products composed wholly or partly of rayon without clearly disclosing the presence of the fiber content by use of the word "Rayon" and without failing to disclose in equally conspicuous type any other constituent fibers in the order of their predominance by weight.

The respondent further agrees to cease and desist concealing within neckties composed in whole or in part of rayon, labels or tags or partly of rayon without clearly disclosing the presence of the fiber content by use of the word "Rayon" and without failing to disclose in equally conspicuous type any other constituent fibers in the order of their predominance by weight.

Hamann Institute of Music—Engaged in selling correspondence courses of 52 lessons for the study of piano, Hawaiian (steel) guitar, and Spanish guitar, Harry Hamann, trading as Hamann Institute of Music, 3019 North 24th Place, Milwaukee, has entered into a stipulation that he will cease certain representations in the sale of his products.

"Play songs almost instantly," the respondent Hamann advertised, according to the stipulation. "Let me prove that you too can become an expert, up-to-date player for less than two cents a day."

Under his stipulation, the respondent agrees to cease advertising that his courses will enable a purchaser to learn to play current entertaining music practically overnight, or become a skilled or expert player, and that any price is the regular price for any of his courses, unless such price is in fact the customary price.

Under his stipulation, the respondent agrees to cease representing, by use of the word "Institute" in the trade name or of syllables

June 27, 1941 — 573
or letters which simulate that word, that his business is an institute, by use of the word "Registrar," that he employs a registrar in his business; and by use of the word "President," that his business is a corporation or association or anything but a privately owned, personally conducted business. (02813)

Jones Laboratories—J. M. Jones, trading as Jones Laboratories, 724 West Trade St., Charlotte, N. C., distributor of a drug preparation designated "Jones' Dog Hulls," entered into a stipulation in which the respondent agrees to cease representing, directly or by implication, by use of the word "Laboratories" as part of his trade name, that he owns, operates or maintains a laboratory for manufacturing his product, or for testing and experimenting with the preparation. The respondent further agrees to cease advertising, directly or by implication, that "Jones' Dog Hulls" will stop running fights. (02816)

King's Goat Milk Laboratories—Cornelius J. King, trading as King's Goat Milk Laboratories, 1848 Hone Ave., New York, and engaged in the manufacture of various products composed either entirely or in part of goat's milk, entered into stipulation to cease certain representations in the sale of his products.

The respondent agrees to cease representing or using representations the effect of which tends to convey the belief, among other things: that goat's milk contains far more, or, in fact, any more of Vitamins A, B, C, D and G than does cow's milk; that goat's milk is more suitable in infant and child feeding than cow's milk, or is the best substitute for human milk in such feeding; and that the fat globules in goat's milk are in more perfect emulsion than in any other milk, or that they are usually digested in twenty minutes.

The respondent further agrees to discontinue representing or using representations the effect of which tends to convey the belief, among other things: that goat's milk contains far more, or, in fact, any more of Vitamins A, B, C, D and G than does cow's milk; that goat's milk is more suitable in infant and child feeding than cow's milk, or is the best substitute for human milk in such feeding; and that the fat globules in goat's milk are in more perfect emulsion than in any other milk, or that they are usually digested in twenty minutes.

The respondents and the hair dye products they sell are: Tintz Co., Chicago, "Tintz Creme Shampoo Hair Coloring" (02806); G. P. Brandt, trading as Zephyr Laboratories, Chicago, "Brandt's Olive Oil Shampoo Tint" (02807); American Beauty Products Co., Chicago, "Brandt's Olive Oil Shampoo Tint" (02807); H. L. Baum, trading as Beauty Products, Denver, Colo., "Noreen Super Color Rinse" (02809); Chilor, Inc., Stamford, Conn., "Special Chilor" and "Instant Chilor" (02810); Bes-Tone, Ltd., New York, "Bes-Tone" and "Bes-Tonal Oil Shampoo Tint" (02811); Nu-Gloss Mfg. Co., Inc. New York, "Nu-Gloss Tintinsce" (02812); Rap-I-Dol Distributing Corporation, New York, "Rap-I-Dol Hair Coloring" (Supplemental Stipulation 01812); and Paragon Distributing Corporation, also trading as Paragon Laboratories, Inc., Eterne Manufacturing Corporation, and Paragon Institute, New York, "Old Reliable Tintinsce" and "Paragon Hair Coloring" (Supplemental Stipulation 02112).

A. Rhodes Co., Inc., Lowell, Mass., "Rhodes' Quick Color for Gray Hair" and "Rhodes' Shampoo Tint for Gray Hair" (3131); George Kremer, trading as Roux Distributing Co., New York, "Roux Shampoo Tint" (3132); Norman W. Siebrs, trading as Lady Lannex Co., Memphis, Tenn., "Lady Lannex Hair Coloring", (3133); Clifford S. Donnell, trading as Queen Ann Manufacturing Co., New York, N. J., "Queen Ann Liquid Hair Coloring" (3134); Humm Laboratories, Inc., Duart Manufacturing Co., Inc., Ltd., Humbert Miraglia, and William H. H. Davis, Oakland, Calif., "advertisement for hair dye product containing thirty different shades (3135); Godefroy Manufacturing Co., St. Louis, "Larieuse" (3136); Sales Affiliates, Inc., New York, "Loxel", "Inecto" or "Inecto with Lustrum" (3137); Fan Tan Co., Inc., trading as Black Strand Co., Chicago, "Black Strand Hair Coloring" (3138); Keysttone. The Old Reliable Co., trading as Memphis Mail Order House and The Hi-Hat Co., Memphis, Tenn., "Hi-Hat" and "Four Star" (3139); and Jose G. Gonzalez and Mrs. Henry (Felicitas G.) Myers, Laredo, Tex., "Malintzin" (3140).

The respondents agree to cease disseminating advertisements which fail conspicuously to reveal therein the following: "Caution: This product contains ingredients which may cause skin irritation on certain individuals and a preliminary test according to accompanying directions should first be made. This product must not be used for dyeing the eyelashes or eyebrows; to do so may cause blindness."

The stipulations provide that such advertisements need contain only the statement: "Caution: Use only as directed on label" if and when such labels bears the first described caution displayed conspicuously thereon, and the accompanying labeling bears adequate directions for such preliminary testing before each application. A. Rhodes Co., Inc., Lowell, Mass., further stipulates that it will cease disseminating advertisements of its product "Rhodes' Reju-Vena", a solution containing metallic salts, which fails to conspicuously reveal therein a cautionary statement to the effect that this product is not to be used under certain conditions or circumstances, provided, however, that such advertising need contain only the statement: "Caution: Use only as directed on label" if and when such label bears the above described cautionary statement conspicuously displayed thereon. (02806-02812, inc., supplemental 01812, 02112, 3131-3140, incl.)

The Philip Ritter Co., Inc., 511 Fifth Ave., New York, an advertising agency, entered into a stipulation to cease disseminating certain advertisements on behalf of Grace Donohue, Inc., New York, for its preparation "Grace Donohue Cleanser." The respondent agency agrees to cease advertising that this product is a remedy or cure for, or works wonders with, blackheads or whiteheads; and that it is a healing agent and an efficient method of preserving a clear, smooth or attractive complexion. (02814)

Tutz Co.—Nineteen dealers selling coal tar hair dye products have entered into stipulations to cease disseminating advertising matter which does not contain proper precautionary statements regarding use of their products.

The respondents and the hair dye products they sell are: Tintz Co., Chicago, "Tintz Creme Shampoo Hair Coloring" (02806); G. P. Brandt, trading as Zephyr Laboratories, Chicago, "Brandt's Olive Oil Shampoo Tint" (02807); American Beauty Products Co., Chicago, "Brandt's Olive Oil Shampoo Tint" (02807); H. L. Baum, trading as Beauty Products, Denver, Colo., "Noreen Super Color Rinse" (02809); Chilor, Inc., Stamford, Conn., "Special Chilor" and "Instant Chilor" (02810); Bes-Tone, Ltd., New York, "Bes-Tone" and "Bes-Tonal Oil Shampoo Tint" (02811); Nu-Gloss Mfg. Co., Inc. New York, "Nu-Gloss Tintinsce" (02812); Rap-I-Dol Distributing Corporation, New York, "Rap-I-Dol Hair Coloring" (Supplemental Stipulation 01812); and Paragon Distributing Corporation, also trading as Paragon Laboratories, Inc., Eterne Manufacturing Corporation, and Paragon Institute, New York, "Old Reliable Tintinsce" and "Paragon Hair Coloring" (Supplemental Stipulation 02112).

A. Rhodes Co., Inc., Lowell, Mass., "Rhodes' Quick Color for Gray Hair" and "Rhodes' Shampoo Tint for Gray Hair" (3131); George Kremer, trading as Roux Distributing Co., New York, "Roux Shampoo Tint" (3132); Norman W. Siebrs, trading as Lady Lannex Co., Memphis, Tenn., "Lady Lannex Hair Coloring", (3133); Clifford S. Donnell, trading as Queen Ann Manufacturing Co., New York, N. J., "Queen Ann Liquid Hair Coloring" (3134); Humm Laboratories, Inc., Duart Manufacturing Co., Inc., Ltd., Humbert Miraglia, and William H. H. Davis, Oakland, Calif., "advertisement for hair dye product containing thirty different shades (3135); Godefroy Manufacturing Co., St. Louis, "Larieuse" (3136); Sales Affiliates, Inc., New York, "Loxel", "Inecto" or "Inecto with Lustrum" (3137); Fan Tan Co., Inc., trading as Black Strand Co., Chicago, "Black Strand Hair Coloring" (3138); Keysttone. The Old Reliable Co., trading as Memphis Mail Order House and The Hi-Hat Co., Memphis, Tenn., "Hi-Hat" and "Four Star" (3139); and Jose G. Gonzalez and Mrs. Henry (Felicitas G.) Myers, Laredo, Tex., "Malintzin" (3140).

The respondents agree to cease disseminating advertisements which fail conspicuously to reveal therein the following: "Caution: This product contains ingredients which may cause skin irritation on certain individuals and a preliminary test according to accompanying directions should first be made. This product must not be used for dyeing the eyelashes or eyebrows; to do so may cause blindness."

The stipulations provide that such advertisements need contain only the statement: "Caution: Use only as directed on label" if and when such labels bears the first described caution displayed conspicuously thereon, and the accompanying labeling bears adequate directions for such preliminary testing before each application. A. Rhodes Co., Inc., Lowell, Mass., further stipulates that it will cease disseminating advertisements of its product "Rhodes' Reju-Vena", a solution containing metallic salts, which fails to conspicuously reveal therein a cautionary statement to the effect that this product is not to be used under certain conditions or circumstances, provided, however, that such advertising need contain only the statement: "Caution: Use only as directed on label" if and when such label bears the above described cautionary statement conspicuously displayed thereon. (02806-02812, inc., supplemental 01812, 02112, 3131-3140, incl.)

Weyleur-belg Shue Manufacturing Company, Milwaukee, Wis., a corporation engaged in the manufacture, sale and distribution of shoes, one line of which is sold under the name of "Massagic," has entered into a stipulation in which it agrees to cease and desist from use of terms, phrases or representations, so as to import or imply or tend to convey the belief to purchasers that “Massagic” shoes massage the feet; that the shoes produce "massaging resilience"; that the shoe "exercises and massages the
serving used or second-hand products without disclosing that such instruments are used or second-hand, they do not make such disclosure; and that, through the use of advertisements and their failure to disclose that such instruments are used or second-hand, they represent that certain of them are new and unused, when such is not a fact. (3813)

The respondents are ordered to cease and desist from representing, directly or by implication, that used or second-hand products are new or unused, and from advertising, offering for sale or selling used or second-hand products without disclosing that such products are in fact used or second-hand. (3813)

Clayton Candy Co.—Prohibiting the use of lottery methods in connection with the sale of merchandise to ultimate consumers, cease and desist orders have been issued against C. T. Clayton, trading as Clayton Candy Co., Phenix City, Ala., candy manufacturer, and J. R. Stewart, trading as Stewart Bros., wholesale distributor of smoking pipes; J. C. Helms, trading as H & L Candy Co., Marshallville, N. C.; Helen Harrison Candies, Inc., Chicago, and Gordon Foods, Inc., Atlanta, distributor of nut assortments and other food products. (4395, 4401, 4455, 4467 and 4438)

The Firestone Tire & Rubber Co., The Goodyear Tire & Rubber Co., and its sales subsidiary, The Goodyear Tire & Rubber Co., Inc., and The B. F. Goodrich Co., all of Akron, Ohio, and Sears, Roebuck & Co., Chicago, and Western Auto Supply Co., Kansas City, Mo., have been ordered to cease and desist from price misrepresentations in connection with the sale of automobile tires and tubes.

Commission findings are that the tire company respondents issued retail price lists for various grades of tires for the use of their retail stores; furnished lists of suggested retail prices to their dealers, and, during nation-wide sales periods, advertised and recommended that their dealers advertise in a large number of newspapers that certain tires were offered at savings and discounts from the regular or list prices. Sears, Roebuck & Co. and Western Auto Supply Co., according to findings, also issued price lists but permitted their stores to sell at less than the suggested prices.

The Commission finds that during the periods in which the advertisements in question were published the respondents advertised and offered certain alleged savings and discounts on tires and tubes. The purported savings and discounts, according to findings, were not in fact as represented for the reason that they were not based or computed upon the regular current retail selling prices but upon amounts which were higher than the current retail selling prices.

Findings are further that in certain instances, the represented savings and discounts were exaggerated for the reason that the purchaser was not credited with the usual part-payment trade-in allowance for used tires turned in at the time new tires were purchased.

Certain of the respondents, according to findings, represented that savings were afforded, based upon the advertised selling price and that the advertised prices were not the regular current retail selling prices but upon amounts which were higher than the current retail selling prices.

Commission findings are further that substantial numbers of purchasers misunderstood that advertised savings or discounts are reductions from the regular retail selling prices ordinarily charged for merchandise immediately prior to advertised sales; that they understand that "list prices," as used in tire advertising, mean regular retail selling prices of the tires advertised, and that any represented savings or discounts from such list prices are reductions from the regular retail selling prices in effect immediately prior to the advertised sales.

The Commission orders direct all of the respondents to cease and desist from employing the term "List Price" or any term of similar significance to designate prices which are not in fact the bona fide regular established selling prices of the tires or tubes advertised and offered for sale, as established by the usual and customary sales in the normal course of business.

The respondents also are ordered to cease representing, directly or indirectly:

That any specified amount is the customary or regular price of a tire or tube advertised when such amount is not in fact the bona fide actual selling price as established by usual and customary sales.

That any specified amounts or percentages are savings or discounts when they are not actual savings or discounts computed on the bona fide, usual and customary selling prices in effect immediately prior to such representations.

That specific savings or discounts are afforded a purchaser upon the purchase of tires or tubes when such savings or discounts do not take into account the trade-in allowances customarily made to purchasers in the ordinary course of business.

June 27, 1941 — 575
The respondents, except Western Auto Supply Co., are also ordered to cease representing, directly or indirectly:

That any specified savings or discounts are offered a purchaser upon the purchase of certain tires or tubes when such savings or discounts are computed upon the regular selling or list prices of higher priced tires or tubes.

That a specified tire or tube is offered for sale when such merchan-"dise is not offered for sale but instead another tire or tube of different kind or brand is offered.

The orders against Sears, Roebuck & Co., and Western Auto Supply Co., also prohibit those respondents from representing, directly or indirectly, that any savings or discounts are afforded a purchaser upon the purchase of their tires or tubes when such savings or discounts are computed upon prices of competitors' tires and tubes, unless the prices of the respondents' tires or tubes and also those of their competitors are the regular current retail selling prices, and that certain amounts are the prices at which such competitors sell their tires or tubes in the ordinary course of business.

Sears, Roebuck & Co. also is ordered to cease representing, directly or indirectly, that a specified tire or tube is of a certain grade, kind or line when it is of a different grade, kind or line, and that its tubes can be bought for a designated amount, or at a designated savings or discount, in combination with a tire or tubes when the designated amounts, savings or discounts in such combination offer are not computed upon the regular retail selling prices of the item itemized.

In the Firestone case, the Commission ordered that the complaint be dismissed as to Firestone Tire & Rubber Co., sales subsidiary of The Firestone Tire & Rubber Co., the sales subsidiary having been dissolved, and that certain charges in the complaint be dismissed without prejudice to the Commission's rights thereon in that matter (3983, 3984, 3985, 4043 and 4054).

John J. Fulton Co., San Francisco, distributor of "Uvursin," advertised as a treatment for diabetes mellitus, has been ordered to cease and desist from misrepresentations concerning the preparation.

The Commission finds that through the dissemination of advertisements in the United States mails and by various other means in commerce the respondent has represented that the medicinal preparation "Uvursin" has substantial therapeutic value in the treatment of diabetes mellitus and that when used with a diet recommended by the respondent, it substantially increases the efficacy of the diet as a treatment for diabetes mellitus. The Commission finds that the preparation is not efficacious for treating this disease as it does not deal with the causes and its use may be definitely harmful to a patient suffering from diabetes mellitus in that it would give a false sense of security and delay the inauguration of effective treatment.

Further findings are that there is no accepted treatment for diabetes other than diet and insulin adjusted properly to meet the needs of each patient.

The respondent is ordered to cease and desist from disseminating or causing to be disseminated any advertisements by means of the United States mails or by any means in commerce, which advertisements represent that the preparation "Uvursin" constitutes a competent or effective treatment for diabetes or has any therapeutic value in the treatment of diabetes (3819).

Gland Estemeter Corporation and William Estep, its president, 30 North La Salle St., Chicago, formerly of Kansas City, Mo., have been ordered to cease and desist from misleading representations in the sale of their "Gland Estemeter" device intended for use in diagnosing diseases.

The Commission finds that the respondents advertised their device as being capable of detecting or disclosing improper or abnormal functioning of the glands, when in fact it is incapable of such detection and possesses no value in diagnosing diseases or conditions of the body.

The Commission further directs the respondents to cease disseminating inadvertisements which represent, directly or through inference, that all ailments or diseases are caused by improper or abnormal gland functioning; that the respondents' device detects or discloses such improper functioning, reveals vitamin deficiencies. The respondents' device is capable of detecting whether the blood is acid or alkaline, discloses the condition of the blood with respect to energy or activity, analyzes or discloses impairments of the mental processes, and that this device possesses any value in the diagnosis of any ailment or body conditions (4328).

E. B. Muller & Co.—The two principal processors of granulated chicory, a product used with coffee for flavoring and other purposes, have been ordered to cease and desist from price discriminations in violation of the Robinson-Patman Act, and from selling below cost, disparagement of competitors' products and other practices in violation of the Federal Trade Commission Act.

The respondent chicory companies are E. B. Muller & Co., Port Huron, Mich., and Heinr. Franck Sons, Inc., Flushing, N. Y., both controlled and directed, according to Commission findings, by David McMorran, and principally owned by David McMorran and his wife, Charlotte H. McMorran.

Commission findings are that the businesses of the two respondents are largely complementary, one to the other, and that there exists a percentage of business with each other. Their principal competitor has been R. E. Schanzer, Inc., operating in New Orleans, the principal consuming market for chicory, and maintaining a chicory drying plant in Linwood, Mich., in the limited area in which domestic chicory is grown.

According to findings, the respondents have followed a general pattern of price discrimination under which they have made low prices in several southern States where they have been in active competition with R. E. Schanzer, Inc., and have recouped in part for these lower prices by charging higher prices in other areas where their competitor does not attempt to and cannot, because of transportation costs, sell its products.

The respondents, according to findings, also have discriminated in price as among other purchasers within the same southern States and among other purchasers elsewhere, and in many instances have maintained discriminatory prices as between customers located in different areas.

Detailed cost studies of the respondents' business operations show, according to findings, that they sold chicory below cost in territory where R. E. Schanzer, Inc., operated, with the deliberate purpose of injuring and, if possible, destroying this competitor, and that they sold at higher prices in other territories.

The respondent E. B. Muller & Co., according to findings, frequently disparaged the Schanzer chicory products by representing to purchasers that they contained molasses, sugar beet or other foreign substances, and the respondent has threatened Schanzer customers with seizure by governmental authorities of chicory purchased from R. E. Schanzer, Inc., as being adulterated.

E. B. Muller & Co., according to findings, artificially colored granulated chicory by adding iron oxide which produced an exceptionally desirable and uniform color and represented that the color and uniformity of color of its chicory were achieved by a superior method of roasting and a painstaking selective process.

The Commission order directs the respondents to cease disparaging the products of competitors and representing that artificially colored chicory is not so colored, and to cease selling or furnishing chicory at a price less than the cost thereof to respondents with the purpose or intent, and where the effect may be, to injure, suppress, or stifle competition or tend to create a monopoly in the production or sale of such products (the term "cost" meaning the total cost to the respondents of any such transactions of sale, including the costs of acquisition, processing, preparation for marketing, sale, and delivery of such products).

The respondents are further ordered to cease discriminating directly or indirectly in the price of such products of like grade and quality, as among purchasers from either or both of them, where the differences in price are not justified by differences in the cost of manufacture, sale, or delivery resulting from differing methods or quantities in which such products are sold or delivered:

(A) By selling any material quantity of such products to purchasers in one or more general trade areas at prices different from those to purchasers in any other general trade area.

(B) By selling such products to some purchasers in any general trade area at prices different from those to other purchasers in the same general trade area (3224).

Neo-Vim Co., 400 North High St., Columbus, Ohio, and six of its officers or former officers have been ordered to desist from misleading representations in the sale of their medicinal preparation designated "Neo-Vim" or "Neo-Vem" and their cosmetic preparation "Hi-Ho Tooth Paste."
The respondent officers or former officers are A. L. Riaff, L. M. Jensen, W. C. Pollard, Edwin L. Miller, L. R. Dillow, and Carl G. Rossel, all of Columbus.

The respondents are ordered to cease and desist from disseminating advertisements which represent, directly or through inference, that "Neo-Vim" or "Neo-Vern" is a tonic; that its use will supply increased energy or vitality; that it will increase the appetite or flow of gastric juices; that it will increase the quantity of the blood or improve the quality of the blood; that the preparation constitutes or provides effective treatment for indigestion; or that it has any therapeutic value other than that possessed by an ordinary laxative.

The Commission order further directs the respondents to cease disseminating "Hi-Ilo Tooth Paste" representations, directly or through inference, that the preparation will serve to keep gums healthy or add firmness to the gums; that the use of the preparation will prevent impure breath or offensive odors; or that it is a competent or effective agency for brightening the teeth in excess of the results obtained from the use of any ordinary dentrifice (3969).

Omega Manufacturing Co., Inc.—Two distributors of devices advertised for use in the electrolytic removal of hair have been ordered to cease and desist from misrepresentations in the sale of their products.

Respondents in the cases are Omega Manufacturing Co., Inc., trading as Omega Electrolysis Institute, and Milton L. Brown, shield, president of the corporation, New York, selling the "Omega Home Use Portable Machine," or "Omega Method," and D. J. Mahler Co., Inc., East Providence, R. I., selling the "Mahler Electrolysis Apparatus," or "Mahler Method.

The orders direct the respondents to cease disseminating advertisements which represent, directly or through inference, that their products are safe devices for the electrolytic removal of superfluous hair from the body by individual self-application in the home.

Omega Manufacturing Co., Inc., and the respondent Brown, shield are further ordered to cease representing that their device is painless, quick and easy to use and will have no ill effects upon the body, and D. J. Mahler Co., Inc., to discontinue representing that its device can be operated with ordinary care and skill.

Under their respective orders, the respondents are further directed to cease disseminating advertisements which fail to reveal that the use of their devices or apparatus by persons not trained in the technique of removing superfluous hair from the body by electrolysis may result in permanent disfigurement or cause infections or other irreparable injury to health, and that the devices should not be used to remove hair from cancerous or syphilitic lesions, pigmented moles or other areas showing local pathological conditions.

In each case the respondents had been restrained by United States District Courts, on petition of the Commission from disseminating certain advertisements of their devices pending final disposition of the Commission's cases against them (4146 and 4228).

J. R. Pharmacal Company—J. R. Olney, Sr., and J. R. Olney, Jr., trading as J. R. Pharmacal Company, Chester, Pa., have been ordered to cease and desist from misleading representations in the sale of a medicinal preparation designated "J. R.

Commission findings are that the respondents advertised their preparation as constituting a cure or remedy for all cases of athlete's foot, when such is not a fact.

The respondent officers or former officers are W. D. Snyder, Karl Hansen, and Fred Dittmann, in connection with the sale of plate, window, safety, rough rolled, wire, art and structural glass, to cease and desist from entering into or carrying out any agreement or undertaking among themselves or with any competing corporation or person for the purpose of restraining competition in the sale or distribution of such glass in commerce.

These respondents are further directed to cease, pursuant to such agreements, understandings or undertakings, (1) establishing or maintaining the prices at which such glass is sold to dealers, the retail trade or consumers in the New Orleans trade area; (2) at meetings held by the respondents or any of them to establish or maintain the prices for such glass; (3) exchanging information with reference to the respondents' respective businesses and activities where the purpose is to establish or maintain prices; (4) adhering to duplicate or uniform price lists for the sale of such types of glass in the New Orleans area; and (5) changing simultaneously the prices at which they sell the glass.

The glazing contractor respondents Pittsburgh Plate Glass Co., Karl Hansen Co., Inc., David Bernhardt Paint & Glass Co., Inc., Joseph B. Crasto, formerly trading as Joseph B. Crasto Glass Co., glassing contractor, and his successor, Joseph B. Crasto Glass Co., glassing contractor, and Lloyd Crasto, its acting manager, Warner, F. Flaumhaft, glassing contractor, all of New Orleans, and Edmund W. Ulrich, manager of its glassing contracting division; Joseph B. Crasto, formerly trading as Joseph B. Crasto Glass Co., glassing contractor, and his successor, Joseph B. Crasto Glass Co., glassing contractor, and Lloyd Crasto, its acting manager, and H. Flaumhaft, glassing contractor, all of New Orleans, have been enjoined from violating the Federal Trade Commission Act in conducting a series of prize contests to promote the sale of cosmetics. (4304)

Saunders Manufacturing Co.—Three southern concerns have been ordered to cease and desist from entering into and carrying out agreements and undertakings to establish or maintain the prices for their products and apportion among themselves the glassing contracting business in New Orleans and other districts.

Respondents are Pittsburgh Plate Glass Co., distributor and glazing contractor with headquarters at Memphis, Tenn.; and W. D. Snyder, manager of its New Orleans branch; Karl Hansen Co., Inc., distributor and glazing contractor, and Karl Hansen, its president; David Bernhardt Paint and Glass Co., Inc., distributor and glazing contractor, and Paul D. Dinsmore, its manager; and Karl Hansen Co., distributor and glazing contractor, and Karl Hansen, its president; David Bernhardt Paint and Glass Co., Inc., distributor and glazing contractor, and Karl Hansen, its president; and Karl Hansen Co., distributor and glazing contractor, and Karl Hansen, its president.

The Commission order directs the distributor respondents Pittsburgh Plate Glass Co., Karl Hansen Co., Inc., David Bernhardt Paint and Glass Co., Inc., and the individual respondents W. D. Snyder, Karl Hansen, and Fred Dittmann, in connection with the sale of plate, window, safety, rough rolled, wire, art and structural glass, to cease and desist from entering into or carrying out any agreement or undertaking among themselves or with any competing corporation or person for the purpose or with the effect of restraining competition in the sale or distribution of such glass in commerce.

These respondents are further directed to cease, pursuant to such agreements, understandings or undertakings, (1) establishing or maintaining the prices at which such glass is sold to dealers, the retail trade or consumers in the New Orleans trade area; (2) at meetings held by the respondents or any of them to establish or maintain the prices for such glass; (3) exchanging information with reference to the respondents' respective businesses and activities where the purpose is to establish or maintain prices; (4) adhering to duplicate or uniform price lists for the sale of such types of glass in the New Orleans area; and (5) changing simultaneously the prices at which they sell the glass.

The glazing contractor respondents Pittsburgh Plate Glass Co., Karl Hansen Co., Inc., David Bernhardt Paint & Glass Co., Inc., Joseph B. Crasto, Joseph B. Crasto Glass Co., and H. Flaumhaft, and the individual respondents W. D. Snyder, Karl Hansen, Edward W. Ulrich, and Lloyd Crasto, in connection with the sale of their various glass products or with the making of glazing contracts in the New Orleans area, are ordered to cease entering into agreements or undertakings among themselves or with other competing corporations or persons, for the purpose of curtailing competition. They are further ordered to cease, pursuant to such agreements or undertakings, (1) apportioning among themselves the glazing contracting business in New Orleans; (a) establishing the amount of the bids to be submitted respectively by them for supplying and installing glass in buildings in the New Orleans trade area; (b) separating meetings for the purpose of establishing the amount of the respective bids which the respondent glazing contractors submit on particular jobs; (4) holding meetings for allocating among the respondent glazing contractors glazing contracts for jobs within the area; and (5) exchanging information with reference to their respective businesses and activities where the purpose is to establish or attempt to establish the amount of the bids to be submitted respectively by the respondent glazing contractors for jobs in the New Orleans trade area.

Thomson-King & Co., Inc., Chicago, the Winship Corporation, Des Moines, and 37 individuals who are or were either officers of the respondent corporations or associated in the businesses conducted by the respondents, have been ordered to cease and desist from violations of the Federal Trade Commission Act in conducting a series of prize contests to promote the sale of cosmetics.

Commission findings are that the respondents have disseminated false and misleading advertisements containing puzzle or picture contests, and the other prizes for their solution; that the contests are easy of solution and have been used as a "bait" to obtain the names of people to be encouraged to enter competitive

June 27, 1941 — 577
solving contests, and that the puzzle contests have been in fact
buying contests requiring quantity purchases of the respondents'
cosmetic products by the so-called contestants. According to
findings, the respondents have sold as much as $1,643,000 in cos-
metics to contestants in one of the contests.

Commission findings are that the respondents, individually and
in cooperation, in the furtherance of a common plan, have or-
ganized and operated approximately 16 corporations operating
under trade names for the dissemination of advertisements con-
cerning numerous prize contests. The findings further recite that
when one of these companies would be cited to appear before the
Federal Trade Commission the respondents in some cases would
enter into a stipulation with the Commission to cease the practices
being conducted, and would make little effort to comply with the
stipulation but instead would either discontinue or dissolve the
particular operating company, organize a new company, and
proceed with practices substantially similar to or identical with
those which they had stipulated to discontinue.

The Commission order directs the respondents, individually or
by concerted action in connection with a contest in which the pur-
chase or sale of cosmetics or other articles is essential to
participation in any awards given to cease disseminating advertise-
ments which represent, directly or by implication, that the re-
pondents are conducting a contest confined to solution of a
picture puzzle which involves only competition in skill without
expenditure of money or work in order to win a prize; to cease
representing that they are giving away a substantial sum of money
or merchandise as prizes to a certain limited number of persons
that they have been granted an exclusive advantage in
connection with the sale of cosmetics, the order also prohibits
the use of advertising matter in a contest which sets out a portion
of the terms and conditions without stating that they are only a
portion of the requirements; the use of lottery methods, and the
representation, directly or by implication, that the respondents'
cosmetic preparations will restore a youthful condition to the
skin, remove wrinkles or strengthen muscles.

The Commission order is directed against Thomsen-King &
Co., Inc., The Winship Corporation, James M. Woodman, Jesse
L. Stewart, Merrol Johnson, G. Fred Stayton, Joseph Furth,
Albert L. Bisson, Leta M. Frazier (formerly Leta M. Clanton),
Glenn Tate, George Thomsen, Amber M. McCluskey, James L.
Decker, Sibley F. Everitt, Walter G. Phillips, Paul H. Williams,
Don M. Parmelee, George Schaffer, Evelyn Henderson, Richard
E. Williams, Prentice W. Shaw, John F. Woodman, Steve W.
Phillips, Warren Lee Eastman, Ernie A. Storesund, A. Leonard
Anderson, Gerald G. Grant, W. W. Young, Paul Manning, Fred
W. Fitch, Mrs. Fred W. Fitch, Lucius W. Fitch, Mrs. Lucius W.
Fitch, Gail W. Fitch, Mrs. Gail W. Fitch, Lester R. Sandahl,
Mrs. Lester R. Sandahl, Richard H. Young and Mrs. Richard H.
Young.

The Commission order directs that the complaint in its proceed-
ing be dismissed as to F. W. Fitch Co., Des Moines, and as to
J. G. Hamer, B. Brown, H. Rosenstein, Claude T. Burnett, Ross
J. Miller, Joseph Kane and Walter Rubens. (3998)

United Sales Co.—Max Cohen, 4042 South Broadway Place,
Los Angeles, has been ordered to cease and desist from misrepre-
sentations in the sale of photographic enlargements and frames.
The respondent Cohen is in business under the names United
Sales Co., United Art Display and Sales Co., Art Display Co.,
United Art Display Co., and United Display Co.

Commission findings are that the respondent, through two types
of salesmen, one known as "grabbers" and "initial solicitors" and
the other as "proof passers" or frame salesmen, engages in elaborate
and deceptive sales methods which are directed to the primary
purpose of selling photographic enlargements and frames.

The Commission order directs the respondent and his agents
to cease representing that colored or tinted pictures are paintings,
and that the respondent is engaged in the business of procuring
to use in advertising various products or that any picture so
procured by him will be sold to any advertiser.

The respondent is further ordered to cease from representing
that pictures submitted to the respondent or photographic en-
largements made therefrom will be entered in any picture contest,
unless such contest is then, in fact, being conducted and such
pictures or enlargements are eligible for entry; that any photo-
ograph or colored enlargement has been entered in any competition
or that an award has been made; that the respondent is con-
ducting any special or advertising campaign in a particular
locality unless such is a fact, and that the respondent's business
is operated under sanction of the United States Supreme Court
or any other court or tribunal.

The order further prohibits the representation that prices and
values which are fictitious and in excess of the regular prices are
in fact the customary prices or values for pictures or frames, and
the representation that the respondent will pay half the cost of
the frame of any picture when in fact the frame is sold to the pur-
chaser at a price in excess of the customary price. (4161)

Fred P. Weissman, Inc., 270 West 35th St., New York,
has been ordered to cease and desist from misrepresentation of
the fiber content of certain products sold by it. The respondent sells
and distributes women's coats and other garments.

The Commission finds that the respondent has caused to be at-
tached to its products certain labels purporting to designate and
describe the constituent fibers or materials of which such products
are made. One of such labels carries the legend "100% CAMEL'S
HAIR." The Commission finds that this representation is false
and misleading in that the garments so labeled contained only 30
per cent camel's hair, the remaining fibers being wool and mohair
in about equal proportions.

The respondent is ordered to cease and desist from using the
term "100% CAMEL'S HAIR" or any other term of similar
import or meaning to designate, describe or refer to any fabric
or product which is not composed entirely of camel's hair, and
from representing in any manner that the respondent's products
contain camel's hair in greater quantity than is actually the case
(3532).
NATIONAL BROADCASTING COMPANY'S PROPOSAL TO ASCAP

Proposal

This proposal covers the Red and Blue Networks and the Managed and Operated Stations of the NBC. It contemplates the execution of separate network licenses for each NBC network, and individual local station agreements for each of the 9 NBC M & O Stations.

As used herein, the term "net receipts from sale of time" shall be deemed to mean the actual amounts received by NBC from the sale of time after deducting (1) discounts, (2) rebates, (3) advertising agency commissions actually allowed.

We propose that separate licenses be executed on each of the following bases:

Blanket Network Commercial License

NBC would execute separate network commercial contracts with ASCAP under which NBC would pay ASCAP as a commercial license fee, covering all NBC network commercial programs, 2½% of its net receipts from sale of time for network broadcasting over each of its networks, after deducting a sales commission equal to 15% of NBC's net receipts from the sale of time for network broadcasting and the actual cost to NBC of the wire lines, or other means of connections, between the member stations of the networks.

Blanket Network Sustaining License

NBC would execute separate network sustaining contracts with ASCAP under which NBC would pay ASCAP, as a sustaining license fee, covering all NBC network sustaining programs, $200 per year, in advance, for each contract year, for each station managed and operated by it or regularly affiliated with it during such year. In the event a station is managed and operated or regularly affiliated with NBC during a part of any contract year, the network sustaining fee will be pro-rated. A station shall not be deemed to be regularly affiliated with NBC where the networks only feed to it occasional sustaining programs in the public interest, and in such cases no network sustaining fees will be paid.

Local Station Blanket Commercial License

Each NBC M & O station would execute a separate local station blanket commercial license agreement under which it would be obligated to pay ASCAP 2% of its net receipts from the sale of time for local and national spot broadcasting after deducting a sales commission equal to 15% of its net receipts from the sale of such time.

Local Station Blanket Sustaining License

Each NBC M & O station would execute a separate local blanket sustaining license agreement under which the station would pay an annual sustaining fee of

(a) 12 times the highest ½ hour card rate of the station if it has net receipts from the sale of local and national spot business in excess of $150,000 per year, or,

(Continued on page 580)
NATIONAL BROADCASTING COMPANY'S PROPOSAL TO ASCAP
(Continued from page 579)

(b) 12 times the highest 1/4 hour card rate of the station if it has such net receipts between $50,000 and $450,000 per year, or,
(c) $12.00 for any station which has such net receipts of less than $50,000 per year.

While NBC, for its networks and M & O stations, is willing to contract with ASCAP on the above blanket basis, many of our affiliates desire a per use basis. We, therefore, suggest a per program plan which we would be willing to recommend for consideration by those of our affiliates desiring this type of license:

Local Station Per Program Commercial License
ASCAP would offer each such station a contract under which the station would agree to pay to ASCAP,
(a) 8% of its net receipts from the sale of time for local and national spot broadcasting, after deducting a sales commission equal to 15% of such net receipts, on programs which use ASCAP music except those programs making only incidental use of ASCAP music as provided in (b),
(b) 2% of its net receipts from the sale of time for local and national spot broadcasting, after deducting a sales commission equal to 15% of such net receipts, on all local and national spot commercial programs which use no music licensed by ASCAP other than bridge or background music, themes or signatures, ASCAP arrangements of public domain works, or such music as is incidental to the broadcast of a public or sports event.

Local Station Per Program Sustaining License
ASCAP would offer a local sustaining per program agreement under which the station would agree to pay to ASCAP, on all its sustaining programs, using ASCAP music, 1% of the card rate of the station which would be applicable to the time, if sold. From the card rate however there shall be deducted amounts equivalent to the discounts and agency commissions which normally would apply and a sales commission of 15%. In no event shall the sustaining fee of any station exceed the sustaining fee which the station would have paid had it executed the local blanket sustaining license agreement mentioned above.

We recommend that ASCAP offer to all NBC affiliates the opportunity of contracting on any one or on any combination of the foregoing local station license plans.

In the case of all local station licenses, no fees shall be payable to ASCAP on any program whether live talent or recorded, network or local, sustaining or commercial, where the performing rights have been cleared at the source.

ASCAP shall not restrict any composition in order to obtain additional consideration for the performance thereof, or for the purpose of fixing or regulating fees for the recording or transcribing of any composition.

Since NBC now proposes to clear at the source on network programs and cannot bear the entire expense of network commercial licenses itself, it must arrange with its affiliated stations to reimburse it for part of the network commercial license fees which it proposes to pay ASCAP. Therefore, the proposed blanket network commercial and sustaining license agreements shall be conditioned upon substantially all NBC affiliated stations agreeing to reimburse NBC to the extent of 21/2% of the compensation paid the station for broadcasting network commercial programs.

Among Other Detailed Conditions to Be Negotiated the Proposed Contracts Between ASCAP and NBC Shall Contain Provisions to the Following Effect:

(1) All contracts shall terminate on December 31, 1949.
(2) All claims, causes of actions and pending actions as of the date of closing against NBC or against the affiliates of NBC by ASCAP or any of its members shall be dropped and dismissed forthwith, and full releases will be delivered by ASCAP and its members.
(3) All network licenses shall permit all NBC affiliates and M & O stations to broadcast ASCAP music on NBC network programs but no license fees shall be payable with reference to the broadcasting of any network program over stations located in states which have statutes prohibiting ASCAP from operating in such states as herein contemplated or which prevent NBC from obtaining reimbursement from its affiliated stations in such states.

Likewise no license fees shall be paid by NBC with respect to broadcasts or net receipts from the sale of time on stations located outside the United States of America.
(4) It is proposed that ASCAP grant blanket licenses for nominal fees covering FM, Shortwave, Television, and experimental stations, operated by any ASCAP licensee, and at such time as the stations have commercial income, the fees specified in the contracts covering local standard band broadcasting shall apply thereto.

(5) All contracts will be reduced to writing and will not become binding until signed by both parties.

(6) ASCAP must warrant that both its foreign and domestic catalogues will not be substantially reduced during the term of the agreement.

(7) The agreements must cover all compositions written, composed or copyrighted by ASCAP members or in which they have an interest, whether or not such compositions are published or unpublished, copyrighted or uncopyrighted.

(8) The agreements must make clear that major non-dramatic works are within the terms of the ASCAP licenses.

(9) ASCAP'S indemnification must cover all compositions the performance rights in which are allegedly controlled either by an ASCAP member or a member of one of its affiliates.

(10) Provision must be made for right of NBC and its affiliates to record NBC programs for reference, file, audition and delayed broadcasting purposes, and for the performance of ASCAP compositions by NBC affiliates and M & O stations on delayed and repeat broadcasts of network shows.

(11) ASCAP must specifically give us the right to make and use arrangements and transpositions.

(12) The ASCAP restricted list has been abused in the past and a specific clause must be drafted which will give reasonable protection both to ASCAP and the licensee.

(13) The license to broadcast must include without additional fee the right to perform before an audience in a theatre or studio incidental to the broadcast.

(14) NBC must have the right to terminate if network broadcasting as now constituted is substantially changed.

(15) The licenses may at the end of any contract year by notice to ASCAP shift from a blanket to a per program basis of licensing or visa versa on the most favorable terms ASCAP has at the time in effect with any other broadcaster similarly situated.

(16) If ASCAP obtains from its members the right to contract for a period beyond December 31, 1949, NBC shall have the right to extend its license agreements for a similar period subject to all the terms and conditions therein contained except as to the fees to be paid which shall be determined by mutual agreement failing which they will be set by arbitration.

While this proposal contains the more important terms which NBC considers must be contained in any contract between it and ASCAP, the details and other provisions of the agreements must be worked out in mutually satisfactory language.
ASCAP Writers License New Compositions for Broadcasting

Andy Razaf, composer of Honeysuckle Rose, and J. Russell Robinson, composer of Margie, have granted broadcasters a non-exclusive license, to continue until December 31, 1950, to perform, broadcast and televise new compositions written by them which will be published by BMI. The compositions are, I'll Be A Good Soldier, Too, by Andy Razaf and J. Russell Robinson and We'd Rather Die Upon Our Feet (That Live Upon Our Knees) by J. Russell Robinson, Henry A. Murphy and Lewis Fuchs (the last two are not members of ASCAP). The authority is granted in accordance with the Consent Decree executed by ASCAP, BMI, as publisher, joins in the grant to its licensees.

Andy Razaf (Andrea Razafkerielo), one of two colored composers who have succeeded in making a living by writing songs, is a nephew of the late Queen of Madagascar, Ranavalona, III. He is the only living negro with a rightful claim to a throne. His grandfather, John L. Waller, was United States Consul to Madagascar under President Harrison. His mother married the brother of the Queen. When the French overran the Island, his father died at the head of a Madagascar regiment. His mother and grandfather were subjected to many abuses and were robbed of their property. In fear of their lives, they fled to America, and Andy was born in Washington, D.C. Andy believes that the radio is the surest medium for popularizing a song. He is considered by many the most prolific and outstanding songwriter of his race and has written more than a thousand songs. With the possible exception of Irving Berlin, Razaf's name appears on more popular songs than that of any other writer. In addition to Honeysuckle Rose, some of Razaf's outstanding hits are: Ain't Misbehavin', S'pose, Make Believe Ballroom, Memories of You, Keepin' Out of Mischief, If It Ain't Love, Patty Cake, In the Mood, Peach Tree Street, Stompin' At the Savoy and many of the most popular tunes played by Cab Calloway, such as Ain't Got A Gal In Town, Reefer Man, Yeah Man, J. Russell Robinson has written Mary Lou, Agravatin' Papa, What Are Little Girls Made Of, Just Because You're You, Stop the Sun, Stop the Moon, (My Man's Gone), and many of the most popular tunes played by Cab Calloway, such as Ain't Got A Gal In Town, Reefer Man, Yeah Man and hundreds of others. He is a professional musician and was the pianist of the original Dixie Land Band, the first jazz band in London. He wrote the first song to be sung as a solo by Beatrice Lillie; he has served as accompanist for Singin' Sam, Marion Harris, Aileen Stanley and many other singers.

In regard to the melody of We'd Rather Die Upon Our Feet, he tells that it was written while seated in a cafe while entertainers were singing and playing. His ability to compose under the most confusing and uncomfortable conditions he ascribes to the twelve years he spent in motion picture theatres playing music. He tells that it was pretty easy to be fooled and so their unknown inspiration has never received her share of the boodle, which in the case of You Walk By has run into quite some boodle. The Wise Old Owl, twenty-two year old orchestra leader, has tapped the till with Joe Ricardel, twenty-two year old Greek boy, who wrote the music for I Hear A Rhapsody when he was fifteen; Bernie Wayne and Ben Raleigh, writers of You Walk By and a new one called Wasn't It B. You. Formerly, they owe their success to a breath-taking blonde who inspired the words, "You walk by and children pause at play. You walk by, December seems like May." The boys were thinking of advertising in the Lost and Found columns but they decided that it was pretty easy to be fooled and so their unknown inspiration has never received her share of the boodle, which in the case of You Walk By has run into quite some boodle.

Una Mae Carlisle, a young colored girl from Zanesville, Ohio, is cashing in with Walkin' by the River. Joe Ricardel, twenty-two year old orchestra leader, has tapped the till with The Wise Old Owl. An earlier success, the first BMI hit, Practice Makes Perfect, gave Ernest Gold, Robert Sour and Don McCray no cause for regret. The Same Old Story was a new story for Newt Oliphant and Michael Field, who, though they had written popular tunes prior to the formation of BMI, had never watched their notes turn into cash.

Hit Writers and Hobby Writers

There are many songwriters in all parts of the country who have profited from the opportunity BMI affords. There is Jack Owens who wanted to be a singing evangelist and composed The Hut Sat Song. There is Helen Bliss, who formerly worked in Macy's and is now a dentist's assistant. Helen wrote The Moon Won't Talk and the new BMI hit, I Went Out Of My Way: George Fragos, twenty-two year old Greek boy, who wrote the music for I Hear A Rhapsody when he was fifteen; Bernie Wayne and Ben Raleigh, writers of You Walk By and a new one called Wasn't It B. You. Formerly, they owe their success to a breath-taking blonde who inspired the words, "You walk by and children pause at play. You walk by, December seems like May." The boys were thinking of advertising in the Lost and Found columns but they decided that it was pretty easy to be fooled and so their unknown inspiration has never received her share of the boodle, which in the case of You Walk By has run into quite some boodle.

Kornheiser Joins BMI

Phil Kornheiser, General Manager of Leo Feist for more than twenty years, has become associated with Broadcast Music, Inc., and will serve as a consultant to Merritt E. Tompkins, BMI's Vice President and General Manager. Mr. Kornheiser's entire experience has been in the field of popular music and he has developed a reputation of knowing what to do with a song to turn it into a hit.

A Publisher Comments

New Era Music Corporation has released the following statement through its General Manager, Harold Oxley:

"Late in 1940 when New Era Music signed with BMI, we said, 'The BMI way of dealing with writers is the best thing that has ever happened to American music. New Era music is going to BMI because BMI gives the fairest deal.'

"I can say that we still feel the same way. The check we received for performance royalties for the first quarter of 1941 under the BMI system represents the most equitable method of payment in the music business. New Era Music Corporation, owned by Jimmie Lunceford, prominent orchestra leader, signed a contract with BMI in December, 1940. The catalogue contains many well known rhythm novelties and instrumentals, among them What'cha Know Joe?"
The song, I'll Spend the Rest of My Life by Franklin D. Roosevelt, Jr., and Kendrick Sparrow, while it failed to fascinate any band leader, earned $81.84 for each of its writers in the first three months. Phantom In the Dark, a tune without words by a fifteen-year-old Brooklyn schoolgirl, Laurette Carroll, brought home close to $200 on performances, and yet it is safe to say that most of us never heard of it. The Plains of Old Wyoming by Gomer Cool of Los Angeles, though rarely heard on the networks, returned Cool $159.36, while a highly sophisticated song, The Morning After, by Lee Wainer and Bob Sour brought each of its writers $166.88.

This sort of compensation is most unusual for songwriters. Most music publishers accept only those songs which they can exploit to the fullest extent and the result is that songwriters are either "in the money" or living on "cakes and cofee."

Tunes appealing to a wide variety of tastes, brought home the BMI bacon. Johnny Messner's Clarinet In a Haunted House rang up $264.60 while Au Old Easy Chair By the Fireplace by Curt Poulton of Tuscola, Illinois sent $141.92 into Tuscola. Dabney Carr of Houston, Texas, now in the Army Air Force, and his partner, Richard Shannon, each collected $125 for Walkin' On Air. Night Game In Brooklyn was heard enough to return Charles Boutelle of Bayside, Long Island, $121.28. And so it goes. More than 1000 writers in all parts of the country made money as a result of the existence of BMI.

Belgians and French to Hear BMI Tunes

Starting July 7th, Belgians and the French, or those of the populations of the two countries who own short-wave radio sets, are to hear BMI songs with French lyrics sung over NBC short-wave by Enny de Vries, who enjoyed widespread popularity in Brussels before the Nazis overran Belgium. Miss de Vries will also be heard in French Canada and French possessions. Married to an American, Miss de Vries has spent six weeks out of every year in the United States and has introduced many of our best known popular songs to the Belgian and French public. She composes as well as sings, and some of her songs have been published for sale in French Canada.

Sales

Networks Recognize Cash Discount

Because it was being rumored that the networks were about to allow a "2% cash discount," the NAB Sales Managers Division has conferred with NBC and CBS network officials who have been engaged in cash discount negotiations with advertisers and agencies. This report is a resume of what has happened, so that all NAB members may be fully informed to date.

Since radio is the one major advertising medium that has not generally allowed a cash discount, it is important that the details of the present negotiations be known so that station managers will not be unnecessarily alarmed, but rather that everyone keep an even balance through an understanding of the facts.

Advertising agencies unquestionably have a continuous and serious credit problem. It is well known that some agencies have media billings of such magnitude that even with their sizable cash reserves they could carry these huge billings for less than a month unless they receive prompt payment from their clients. Practically all media except radio have made it a practice to allow cash discounts, and thus it has almost become a habit for advertisers to pay their agency accounts promptly. However, recent action by the Curtis Publishing Company, in withdrawing the cash discount, was of serious concern to agencies because of the fear that this might be the signal for a general withdrawal by other publishers and other media. If this happened, it was possible that the ever-present credit problem might become so acute as to threaten the present agency structure.

For several years, and more notably in the past several months, the American Association of Advertising Agencies has been trying to persuade the networks to accept the "principle" of the cash discount. Because of recent developments, many of the nation's leading advertisers finally joined forces actively with the agencies in order to safeguard present agency structure, and added the weight of their appeal to the negotiations. The Association of National Advertisers, representing a great number of the country's most substantial advertisers, joined in the effort.

An authorized committee of leading agency executives finally approached CBS and NBC with a request that the cash discount principle be recognized, on the assurance that the method, to be later worked out, would not decrease the net billings; in other words, that the networks or anyone else who would accept the proposal could not possibly lose one dollar of net revenue.

After considerable negotiation and a thorough analysis of the problem from all angles, CBS and NBC found no valid reason for not agreeing to this proposal, but added two other conditions: that any cash discount would not require an increase in rates, and that the method finally to be adopted would have to be approved by the advertisers, with this approval to be secured by the agencies rather than by the medium.

NBC is understood to have modified the rate condition, whereby a slight change in rates might have to be made for this reason: If a cash discount is provided through the technique of reducing the present volume discounts by a comparable amount (for example, 2% in each case), there will be a slight mathematical difference because volume discounts are taken off the gross, and the cash discount would be taken off the net. The objective is to keep net billings the same, and to achieve this NBC points out that, depending upon the final method adopted, some minute rate change may be necessary.

The conditions therefore are:

1. Any cash discount to be allowed cannot reduce revenue.
2. It is not to take the form of a rate increase (except as modified above).
3. The idea and method must be "sold" to the advertisers by the agencies.

Only on these three conditions will the principle of a cash discount be recognized, and there will be no deviation from these conditions, it was definitely stated.

What the final method of figuring the discount will be was not definitely decided as this was written, but two general proposals are being considered:

1. That a cash discount be provided, by reducing the present volume discounts (weekly and annual) by an equivalent amount, so that the net payment by due-date would be at least equal to what it is now. In this event, instead of reducing radio revenue, the result would be to increase it by the amount of the cash discount in the event of non-payment of bills on time.
2. That a "surcharge" be added to present net billings if not paid by due-date. Under this plan, present discounts would remain the same, with the surcharge added for failure to pay when due. This also would result in a net increase of radio revenue if due-dates were not met. It is understood that CBS favors this method of meeting the problem and has so advised the agencies.

MBS is also understood to be considering the problem, and since the initiative in each case comes from the agencies and the advertisers, it is believed that Mutual has received similar proposals.

In effect, therefore, although recognizing the principle of the cash discount as a service to advertising agencies and as a means of assisting them to operate on a sound basis, adoption of either of these proposals would in reality constitute not an additional discount, but rather an additional charge for non-payment of bills when due.

Any plan adopted by any or all of the networks would have no direct effect upon stations, either network-owned, network-affiliated, or independent. Each station, of course, is perfectly free to do what it wishes in the matter: to maintain its present practice or to change its policy in any way it wishes.

It is the desire of the Sales Managers Division of the NAB that no one misconstrue these moves by believing that a new, additional discount is to be allowed, or that present rate structures will be
matteredly changed. When everyone concerned is fully informed of the facts as given above, it is believed that the problem confronting the agencies will be appreciated, the reasonableness of their request will be admitted, and the action of the networks will be understood. Thus no one will become unnecessarily upset one way or the other, and stations will not be led into precipitate action either way. In fact, it seems to the NAB that at this moment no action by individual stations is indicated at all.

Mail Clause in Contracts

With further reference to the problem of handling a client's mail containing money, previously discussed here, we are advised by station WCAU, Philadelphia, that it now incorporates in its contracts this clause:

"It is understood that if, under the terms of this Contract, any offer is to be made in connection with any programs to be broadcast hereunder, or if station shall in the future agree to broadcast any offer during said programs, all mail addressed to the station in response to said offer shall be handled by this station at the advertiser's sole risk, and station in no wise shall be responsible for any losses, no matter how they should occur."

National Defense

Fourth of July

Radio is to play a prominent part in this year's Fourth of July celebration. Hundreds of independent stations and stations affiliated with networks are to carry the 4:00 p.m., Presidential address. Up to press time (Wednesday, July 2) a number of stations had completed arrangements for piping the address to large crowds at sporting events and to theatres, hotels and clubs.

John Shepard, III, president of the Yankee Network, arranged for the ceremony to be broadcast, not only at the ball park, but at the Suffolk Downs race track, near Boston.

Frank P. Schreiber, WGN, has arranged for an impressive ceremony at the Cubs' Park, Chicago.

Bernard Gimbel, Jr., WIP, is to handle the affair at the baseball game in Philadelphia.

Robert DeHaven, Production manager, WTCN, wrote that his station would feed the President's address to the Lexington Baseball Park in St. Paul. The ball club will hold up the start of the game so the crowd can hear the talk and recite the pledge of allegiance in unison.

WTMV, East St. Louis, Ill., is to broadcast the Fourth of July celebration, according to William H. West, president. The station will be fed by CBS.

In Washington, NBC is to feed the program to MUSAK, Loew's and other theatres.

It is anticipated that scores of other mass radio Fourth of July celebrations will be reported as soon as they are completed but after this edition of NAB REPORTS has gone to press.

Radio to Conserve Power

In a letter to utilities in seven southeastern states NAB this week suggested the use of radio to stimulate the conservation of power for national defense.

This is in line with the findings of several government departments that a definite shortage exists in Alabama, Florida, Mississippi, North Carolina, South Carolina, Tennessee and Virginia; and that the domestic load must be curtailed if the defense industries are to have sufficient power.

According to Broadcasting, Georgia Power Company, which serves approximately 75% of the State of Georgia, has already begun such a campaign over eighteen Georgia stations.

Another letter went to all stations in the seven states urging them to contact these utilities. Names of officials to whom letters were sent were included in the mailing.

Radio Locates Manpower

How efficiently radio continues, month after month to secure skilled workers for national defense is indicated in the June "Bulletin" of the United States Civil Service Commission. Under the caption of "Radio Flashes Recruiting Needs to the Nation" the article reads:

"By the space-devouring medium of radio, thousands of persons have heard of the civilian recruiting work of the U. S. Civil Service Commission under the national defense program who might otherwise never have had it brought to their attention."

"The radio is one of the outstanding recruiting aids contributing to the speed with which the Commission has been able to locate and examine, and furnish to War and Navy Department appointing officers since June 1, 1940, more than 400,000 qualified workers of skilled trades and technical fields."

"Through the cooperation of the National Association of Broadcasters, the Commission has been enabled to have civil-service recruiting messages broadcast frequently over more than 800 different radio stations in all parts of the nation. About 50 million radios are on the receiving end to hear these messages."

"The wording of each "MANPOWER ANNOUNCEMENT," as the message is called, is based on the actual needs for personnel as reported to the Civil Service Commission each week by War and Navy Department appointing officers in military and naval construction and industrial establishments throughout America."

Richard E. Schneider, United States Civil Service Commission, said that this bulletin was mailed to 12,000 Legion Posts and an equal number of Ladies Auxiliary Secretaries.

Radio Men in Service

Philip Bernheim, operator-announcer, KVOS, Bellingham, Washington, to the Army.

Stations Support Registration

Second Selective Service Registration was expedited in San Francisco by KSFO. Special Events Director Robert W. Dumm arranged an 8:45 p.m. program which recited all registration locations in the Bay Area. Among other stations reporting "extra" promotions were: WWL, New Orleans; KGHL, Billings; KCKN, Kansas City, Kansas; WCOL, Columbus, Ohio; and WJBK, Detroit.

Radio Delivers for Army

Seven hundred thirty-four (734) stations are actively backing the recruiting of Army flyers. Five cooperating stations unreported in the releases of June 9 and June 30 are:

KFDM, Beaumont,
WAB, Boston,
WPAC, Boston,
WLEU, Erie,
KFSF, San Diego.

How productive broadcast stations are in giving this help to national defense is indicated by one of the hundred-word spot announcements, prepared by the Army, and, included with the June 30 mailing to stations. The second sentence of this spot reads:

"LAST WEEK MORE MEN AVAILED THEMSELVES OF THE ARMY AIR CORPS AVIATION TRAINING THAN EVER BEFORE IN THE HISTORY OF AVIATION."

Labor

Wage-Hour Act

The United States Circuit Court of Appeals at New Orleans on June 27 upheld a district court ruling that the A. H. Belo
Corporation was within its Wage and Hour Law rights in estab-
lishing what amounted to a “guaranteed overtime” plan at its
newly-acquired radio station (WKRC). It said, “It was in the
interest of the public that the employees should receive a
uniform weekly wage and that they be guaranteed a min-
imum of $40.00 in weekly pay. In our judgment, the
Wage and Hour Division undoubtedly will appeal to the Supreme
Court next fall. Meantime, the court’s opinion is “the law” only
in the territory covered by the court.

To illustrate how the plan approved by the court works, a sec-
tion of the company’s brief is quoted:

So the problem is how to provide uniform weekly compensa-
tion as to employees who necessarily work fluctuating hours in many
weeks and overtime hours in at least some weeks.

Surely the public interest is in favor of permitting wage ar-
rangements that will produce a uniform compensation. Surely
the Wage and Hour Act was never intended to outlaw such wage
arrangements. Surely it was never the purpose of the performer
Congress to stand in the way of such wage arrangements. Surely
it would not do violence to any objective of the Act to permit
such wage arrangements.

Yet the Act, as it is now interpreted by appellant, does stand in
the way of such arrangements.

Suppose an employee who works fluctuating hours, say 40 hours
in one week and 50 hours in the next week, has been receiving a
level wage each week of $40.00. Suppose, when the Act comes
into effect, both the employer and employee wish to continue the
existing wage arrangement. Surely the employee is entitled to
the uniform weekly wage of $40.00, as before. So the employer
and employee sit down at the table together to make a contract that will assure
such uniform wage and will fully comport with the law.

The first thing they must do is to agree upon a regular hourly wage for the
hours worked over 40 in any week payment must be based on the basis of at least one and one-half times the regular hourly wage.

They cannot fix the regular hourly rate at $1.00 because, although this would work out as desired in the 40-hour week, it
would produce a total of $55.00 in the 50-hour week, and $55.00
is more than the employer can afford to pay and more than the
employer expects to pay and more than the employee expects to
receive.

They cannot agree upon 73¢ per hour because, although this
would work out as desired in the 50-hour week, it would produce only $39.20 in the 40-hour week, which is less than it is agreed
that the employee shall have.

They cannot split the difference at 73¢ because this will produce
$54.80, less than desired, in the short week, and $47.80, more than
desired, in the long week, and violates the underlying desire for
uniformity.

So they do what seems the natural and reasonable thing to do:
they agree upon 73¢ per hour as the regular rate of pay and agree
that overtime shall be paid on the basis of at least one and one-
half times such regular rate, and agree that in short weeks, when the
compensation on the basis of one and one-half times 73¢ is inadequate
and there is no public policy which says that more than one and one-
half times such regular rate is too low for overtime pay. Surely
there is no public policy which says that more than one and one-
half times such regular rate is too high for overtime pay. Indeed,
on every score it would seem that the public policy involved is in
favor of what the employer and employee have done.

WKRC Strike

Four of 17 artists at Station WKRC, Cincinnati, walked out
Friday, June 20, after negotiations between AFRA and the station
management failed to produce an agreement. The station has been
picketed since the strike started, and AFRA has threatened to
strike all agency-produced commercials which MBS feeds to the
station on July 9. An independent union of WKRC has petitioned the
Labor Relations Board for certification as representative of a
majority of the employees in the program department.

“Your Career in Radio”

by

Norman V. Carlisle and Conrad C. Rice

The primary purpose of this new book, written by two men
long experienced in every phase of radio, is to answer the question,
“How can I get into radio?” This is accomplished by taking three
boys from Central High School through a large broadcasting
station. From these men they learn of the duties involved in each
job and the approximate salary paid to each.

This book not only will help any young man or woman interested
in breaking into radio, but also will serve as a guide to those seek-
ing information about radio. (E. P. Dutton & Co., New York,
$2.00)

FEDERAL COMMUNICATIONS COMMISSION

Monopoly Hearing

FCC chairman, James Lawrence Fly, said at a press conference
early this week that he doubted very much if he would go back
to the Capitol to testify further in connection with the White radio
resolution. He said he felt as though he was about finished there.
He said he has had no instructions from the committee to return
for further testimony.

During the summer months Mr. Fly said that the commission
will meet frequently if not regularly. He called attention to the
fact that last summer the commission functioned under an Adminis-
trative order delegating authority in the absence of a quorum.

Mr. Fly said that the Commission cooperated with the FBI in
connection with the recent spy clean up. The experts of the Com-
mision worked with FBI on the illegal radio station which the
spies were reported to have operated.
Procedure for Newspaper Hearings

Hearings under Order No. 79, which are to commence July 23, 1941, will be conducted in accordance with Section 1.192 of the Rules and Regulations, Part I, Rules of Practice and Procedure, providing for informal hearings upon the Commission's own motion. The purpose of the hearings under Order No. 79 is to obtain information necessary and helpful to the Commission in the determination of its policies, the carrying out of its duties, and if need be, the formulation of rules and regulations or recommendations to Congress.

For purposes of the Inquiry under Order No. 79, the Commission hereby establishes the following procedure, subject to such amendment from time to time as shall be determined to be advisable.

I. Appearances for the purpose of introducing evidence

Persons desiring to be heard by the Commission with reference to the investigation conducted under Order No. 79 shall file with the Secretary of the Commission petitions or letters setting forth the position and interest of the petitioner in the proceedings, the evidence or information which the petitioner desires to present or adduce, the pertinency and relevance of such evidence or testimony to the matters designated by the Commission in supplemental Order No. 79-A, the names of, and other important facts pertaining to, the witnesses which the petitioner desires to call, and the volume and character of the documentary evidence which the petitioner desires to present.

Such written request shall be filed not later than the fifth day before the day on which hearings are scheduled to begin.

Such petitions or letters also should show that the proposed appearance will bring before the Commission evidence and testimony of a character which will inform and enlighten the Commission with regard to the considerations of public interest involved in the investigation ordered under Order No. 79 and the specific matters set forth in supplemental Order No. 79-A. In the interests of an expeditious hearing and of a complete survey of the matters under investigation, the Commission will be disposed to avoid if possible the introduction of purely cumulative or repetitious evidence or testimony.

II. Other Appearances

Since the sole purpose of these hearings is to obtain evidence and information, there will be no need for appearances or representation at the hearings other than for the purpose of presenting evidence, facts, or legal considerations to the Commission. The Commission, therefore, will not permit appearances for other than the above-described purposes.

III. Calling of Witnesses by the Commission

The Commission will call witnesses in its discretion to present various sides of the problem. It will also introduce exhibits and documentary evidence and invite others to introduce such evidence as occasion requires.

IV. Appearances after Hearings have begun

Persons who have not submitted written requests to appear in the proceedings or who have not been granted permission so to appear may, if they feel that any testimony taken during the proceedings has been injurious to their reputation or character or affects matters of which they have immediate knowledge and concerning which they have additional or contradictory evidence of value to the Commission, file with the Commission in writing a petition or letter setting fully the matters which affect them personally or matters of which they have personal knowledge or additional information which they believe the Commission should have, and requesting opportunity to be heard concerning those matters or to call additional witnesses concerning them. Such requests shall set forth the same matters and be subject to the same considerations as those described in section I hereof. The Commission shall make such disposition of such petitions or letters as shall in its judgment best serve the purposes of the hearing and equitable treatment of such petitioners.

V. Order of the Hearings

The Commission will exercise full discretion with regard to the order of witnesses and the order in which testimony and exhibits shall be presented.

Order No. 79-A

Whereas, the Commission by Order No. 79 (March 20, 1941) directed that an investigation be undertaken "to determine what statement of policy or rules, if any, should be issued concerning applications for high frequency broadcast stations (FM) with which are associated persons also associated with the publication of one or more newspapers and that public hearings with respect thereto be held at such times and such places as the Commission may direct, and that such investigation and public hearings shall also include consideration of statements of policy or rules, if any, which should be issued concerning future acquisition of standard broadcast stations by newspapers";

Now, Therefore, It Is Ordered, That, pursuant to the aforesaid order, testimony and other evidence be taken with reference to the following matters, in addition to such other matters as the Commission may from time to time direct:

1. To what extent broadcast stations are at present associated with persons also associated with publication of one or more newspapers; the classification (in terms of power, location, network affiliation, etc.) of broadcast stations so associated, the circumstances surrounding such association, and the tendency toward such association in the future.
2. Whether joint association of newspapers and broadcast stations tends or may tend to prejudice the free and fair presentation of public issues and information over the air, or to cause editorial bias or distortion, or to inject editorial policy or attitude into the public service rendered by broadcast stations as a medium of public communication.
3. Whether joint association of newspapers and broadcast stations tends or may tend to restrict or distort the broadcasting of news, or to limit the sources of news to the public, or to affect adversely the relation between news-gathering services and broadcast stations.
4. Whether the joint association of newspapers and broadcast stations has or may have any effect upon freedom of access to the radio forum, for the discussion of public issues.
5. Whether the joint association of newspapers and broadcast stations tends or may tend to lessen or increase competition among broadcast stations or to result in the monopolization of local broadcast facilities.
6. Whether the joint association of newspapers and broadcast stations tends or may tend to increase or decrease concentration of control over broadcast facilities or the use thereof.
7. Whether the joint association of newspapers and broadcast stations constitutes or may constitute an undue concentration of control over the principal media for public communication.
8. Whether joint association of newspapers and broadcast stations tends or may tend to result in the utilization of improved facilities and skilled, experienced personnel for the procuring and dissemination of information and opinion by broadcast stations.
9. Whether joint association of newspapers and broadcast stations tends or may tend to insure greater economic stability for broadcast stations and to encourage the maximum technological development of radio.
10. What considerations influence newspaper interests in acquiring broadcast stations.

FEDERAL COMMUNICATIONS COMMISSION.

T. J. SLOWIE,
Secretary.

Subscriber Broadcast Service without Advertising Proposed

A new type of subscriber broadcast service is proposed by the Muzak Corporation, New York City, in connection with a construction permit for a developmental FM broadcast station authorized by the FCC on an experimental basis only. This corporation, which is now in the business of furnishing wired musical programs without advertising to hotels, restaurants and home subscribers
on a contract basis, contemplates experimenting with a like service by means of radio.

According to the applicant:

"The purpose of the experiment is to determine whether the public or a sufficiently large portion of the public would prefer to obtain radio programs by direct payment for the service. The experiment will be conducted by offering a service to the general public in New York City and furnishing this service to those of the general public who pay for the service. There will be no advertising in connection with the service and the success or failure of the experiment will depend upon the willingness of the public to pay an amount which will warrant the furnishing of such a service as an established business."

The applicant intends to restrict the reception of its non-advertising programs to subscribers by transmitting an accompanying "pig squeal" or discordant sound which can only be eliminated by special receivers leased from the applicant.

Pointing out that this will enable persons to obtain selected radio programs by direct payment rather than by indirect payment through purchasing products advertised on the air, the Muzak Corporation holds in connection with its application that "there is no basic or inherent reason why the American public should be compelled to pay for its radio programs by submitting to advertising announcements." It adds:

""There is no reason why the public should pay directly for moving pictures and indirectly for radio. It is merely a matter of circumstance that radio in the United States is available to the public only in connection with advertising announcements which frequently are highly disturbing or irritating. The American people have never decided or been given the opportunity to decide that radio should not be sold in the usual manner by direct payment for the service."

The applicant will broadcast no commercially sponsored programs, and no advertising continuity whatever will be used. Because of its regular business, the applicant states that it has a greater use of the facilities of the broadcast station devoted to other established services. An action looking to establishment of the projected new type of service upon a regular basis would require consideration of the problem of finding frequencies for allocation to such service. Therefore, the immediate grant "is not to be construed as a finding by the Commission that the operation of the proposed station upon the frequency authorized is or will be in the public interest beyond the express terms of the grant." The Commission stipulates that FM must be used.

The Commission states that the Muzak operation will be purely experimental in connection with "the development of a subscriber broadcast service in accordance with Sections 4.151 and 4.153 subject to the condition that no interference is caused to any established services."

The proposal, according to a Commission memorandum opinion issued in conjunction with the grant, "is unique in the annals of radio broadcasting in this country." Such an experiment has not been conducted in this country, and the Commission believes it worthy of investigation in the public interest. It comments:

"A broadcast station is defined, both by treaty and statute, as one licensed for the transmission by radiotelephone emissions primarily intended to be received by the general public. The first such stations licensed in this country were sought and obtained by individuals or organizations engaged in manufacturing or similar enterprises who desired either to advertise their own product or to promote public good will in their own behalf. Licenses, in order to meet the increasing cost of providing broadcast programs, gradually entered into the practice of transmitting, for a fee, advertising matter for other persons. As the effectiveness of radio as an advertising medium developed broadcasting became a business in its own right. Thus arose the practice in this country of public support of broadcast service, not through any direct charge, but through the purchase of articles and services advertised by radio. This is not true in all countries of the world."

The service which this applicant proposes will be available to the general public; any member of the public, without discrimination, may lease the equipment to receive the service. The distinguishing feature will be that those receiving the programs will pay directly rather than indirectly therefor. Operation of a station in this manner is within the definition of broadcasting.

A change in the frequency of the proposal service is an integral and inseparable part of the experiment. The rule prohibiting a direct or indirect charge by the licensee of a developmental broadcast station for the transmission of programs was promulgated in the light of the existing practices of broadcast stations. Under the circumstances here presented, we are of the opinion that the rule should be construed in such a manner as to permit the proposed operation."

Defense Communications Board

Appointment of a subcommittee of the Defense Communications Board to collaborate with a similar subcommittee of the Office of Civilian Defense was announced today by James Lawrence Fly, chairman of the subcommittee of the Defense Communications Board and of the Federal Communications Commission. The action followed a conference between Chairman Fly and Mayor Fiorello LaGuardia of New York, director of the Office of Civilian Defense.

Members of the DCB subcommittee named were Captain Donald S. Leonard of the Michigan State Police, representing the International Association of Chiefs of Police; Herbert A. Friede of the District of Columbia Fire Department, representing the International Association of Fire Chiefs; Major Francis H. Lanahan, Jr., of the War Department; and Commander E. M. Webster, Assistant Chief Engineer of the Federal Communications Commission.

Effective use during war or other emergency of police radio systems, several thousand of which are now in operation, is one of the topics to be considered jointly by the DGB and OCD subcommittees, it was announced.

Thompson's Term Expires

The term of Commissioner Frederick I. Thompson expired June 30 at midnight. He had not been reappointed at the time this was written nor had anyone been nominated by the President to fill the vacancy on the Commission. Commissioner Thompson took the oath of office on April 13, 1939 to fill the vacancy caused by the resignation of Commissioner Eugene O. Sykes.

FCC Order No. 82 Amended

The FCC has announced the following amended order:

At a general session of the Federal Communications Commission held in its office in Washington, D. C., on the 24th day of June, 1941,

The Commission having under consideration a request of the Secretary of War for the suspension of certain rules of the Commission in order to facilitate the broadcasting of programs affecting the military and naval establishments of the United States; and

IT APPEARS, That public interest, convenience and necessity will be served by the suspension of said rules of the Commission as herein ordered;

IT IS ORDERED, That, until further order of the Commission:

(1) Section 3.408 (d) of the Rules Governing Standard and High Frequency Broadcast Stations BE, AND THE SAME IS HEREBY SUSPENDED only in so far as it requires the prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by United States Government radio stations;

586 — July 3, 1941
(2) Section 4.21 of the Rules Governing Broadcast Services other than Standard Broadcast BE, AND THE SAME IS HEREBY SUSPENDED only in so far as it precludes by definition the use of a relay broadcast station where wire facilities are available for the transmission of programs from points under the jurisdiction of the military or naval establishments of the United States, where the broadcasting of such program has been requested by the appropriate establishment.

This order shall become effective immediately.

FCC July Assignments

FCC has announced that the work, business, and functions of the Commission for the month of July have been assigned as follows:

Commissioner Case—Designated to determine, order, report, or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Commissioner Wakefield—Designated to hear and determine, order, certify, report or otherwise act upon: (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearings, including all motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission’s Rules of Practice and Procedure, and the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission’s Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearing is scheduled to be held before the Commission during the week beginning Monday, July 7. It is subject to change.

Monday, July 7

KWTO—Ozarks Broadcasting Company, Springfield, Mo.—C. P., 560 kc., 1 KW night; 5 KW day, unlimited. DA-night.

FUTURE HEARINGS

Following hearings for future dates have been announced during the past week in broadcast cases. They are subject to change.

August 7

WJAG—The Norfolk Daily News, Norfolk, Nebr.—C. P., 770 kc., 1 KW, daytime. DA-night. Present assignment: 1090 kc., 1 KW, limited to WBAL and WTIC.

August 11

Broadcast Consolidated Hearing

NEW—Nashville Radio Corporation, Nashville, Tenn.—C. P., 1110 kc., 1 KW, unlimited. DA-day and night.

NEW—A. M. Burton, Nashville, Tenn.—C. P., 1110 kc., 1 KW, unlimited. DA-day and night.

September 4

WPRP—Julio M. Conesa, Ponce, Puerto Rico.—C. P., 1420 kc., 1 KW night, 5 KW day, unlimited. Present assignment: 1420 kc., 250 watts, unlimited.

WPRP—Julio M. Conesa, Ponce, Puerto Rico.—Modification of C. P., 1420 kc., 1 KW night, 5 KW day, unlimited. Present assignment: C. P. for 1480 kc., 1 KW night, 5 KW day. unlimited.

WPRP—Julio M. Conesa, Ponce, Puerto Rico.—Renewal of license. 1420 kc., 250 watts, unlimited.

September 8

NEW—Dorman Schaefer, Klamath Falls, Ore.—C. P., 1400 kc., 250 watts, unlimited.

September 11

October 1

Broadcast Consolidated Hearing

NEW—Ralph L. Lewis, Greensboro, N. C.—C. P., 1370 kc., 100 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

New Station

San Diego Unified School District, San Diego, Calif.—Granted construction permit for new non-commercial educational broadcast station to operate on 1030 kc., 1 KW power, unlimited time, special emission for frequency modulation (B5-PED-20).

Miscellaneous

WCPB—Massachusetts Broadcasting Corp., Boston, Mass.—Granted modification of construction permit (B1-P-2710), for approval of directional antenna for night use and transmitter site at 300 feet northwest of present site. Speedway, west of Soldiers Field, Boston, Mass. This grant is made subject to any future action Commission may take regarding the problem of multiple ownership (B1-MP-1176).

KGA—Louie Wasmier, Spokane, Wash.—Granted construction permit to move transmitter to 4102 S. Reaal St., Spokane, Wash. (6 miles southeast of center of Spokane); move studio to Radio Central Bldg., Spokane; increase power from 5 to 10 KW night and day; install new transmitter and direct-
tional antenna for night use; 1510 kc. This grant is made subject to any future action Commission may take regarding the multiplicity of ownership problem (B1-MP-1576).)

WFTL—Radio Station WFTL, Tom M. Bryan (assignor), Ralph A. Horton; Granted special temporary authority to operate on an unlimited time basis for a period not to exceed 30 days; 1340 kc., 1 KW, daytime only (T2-P-2915).

WIOD—Isle of Dreams Broadcasting Corp., Miami, Fla.—Granted construction permit to change frequency from 1340 kc. to 1390 kc., increase power from 100 watts to unlimited, and extend commencement date to 1 day after grant and completion date to 2 days thereafter (B3-MP-1327).

WMBI—Moody Bible Institute of Chicago, Chicago, Ill.—Adopted order granting petition for reconsideration and grant without hearing application for modification of license upon express condition that WMBI operate with frequency 1110 kc., with 5 KW LS; KFBI (B4-P-3047).

W2XVP—City of New York Municipal Broadcasting System, New York City.—Application for construction permit for new broadcast station to operate on 1340 kc., 250 watts night and day, unlimited time, subject to any future action Commission may take regarding the multiplicity of ownership problem (B4-P-2989).

WJOQ—Carroll H. Ouellette, W. J. Solano (assignor), W. J. Solano; Granted construction permit to change from 1510 kc. to 1560 kc., 1 KW, 500 watts night and day, limited time (B3-SHB-51).

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Present high frequency broadcast station license further extended upon a temporary basis for the period ending August 1, 1941, pending determination upon application for renewal of license (B3-SHB-21).

Columbia Broadcasting System, Inc., New York City.—Granted construction permit for existing experimental television broadcasting station W2XQ to operate on Channel No. 2, 60000-66000 kc.; ESR 2400. Further program tests may be authorized pursuant to Sec. 243 (B1-P-243).

WLOL—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Granted modification of license to change from directional antenna day and night to directional antenna only; 1340 kc., 1 KW night and day (B4-ML-1658).

KARM—KARM, The George Harm Station, Fresno, Calif.—Granted construction permit to change frequency from 1340 kc. to 1130 kc., increase power from 500 watts day and night to 5 KW night and day, install directional antenna for day and night use; move transmitter to corner of Alluvial Ave. and North Van Ness Blvd., near Fresno, Calif., and install new transmitter at 1130 kc. (B4-MP-1280).

WIGM—George F. Meyer, Medford, Wis.—Granted modification of construction permit to install new transmitter, make changes in antenna, change frequency from 1560 kc. to 1490 kc., increase power from 100 watts unlimited to 250 watts unlimited, change transmitter and studio site to Highway No. 13, and extend commencement and completion dates to 60 days after grant and 180 days thereafter, respectively (B4-MP-1230).

KQW—Pacific Agricultural Foundation, Ltd., San Jose, Calif.—Ordered issuance of temporary license for 5 KW, unlimited time, employment time table; 1100 kc., 5 KW LS; RDFI (B2-P-1038).

WFTL—Radio Station WFTL, Tom M. Bryan (assignor), Ralph A. Horton; Granted special temporary authority to operate on an unlimited time basis for a period not to exceed 30 days; 1340 kc., unlimited time (B2-P-1038).

WALB—Herald Publishing Co., Albany, Ga.—Granted application for construction permit to change alignment of directional antenna from 35 degrees to 6 degrees true and extend commencement date to 1 day after grant and completion date to 2 days thereafter (B3-MP-1327).

W2XVP—City of New York Municipal Broadcasting System, New York City.—Application for construction permit for new broadcast station to operate on 1100 kc., 250 watts, unlimited time; exact transmitter site and ground system to be determined subject to Commission approval (B5-P-3158).

Barclay Craighead, Butte, Mont.—Application for construction permit for new broadcast station to operate on 1490 kc., 250 watts night and day, unlimited time (B5-P-3103).

Southern California Broadcasting Co., Pasadena, Calif.—Application for construction permit for new broadcast station to operate on 1430 kc., 1 KW day, daytime only (B5-P-3108).

Jefferson Broadcasting Corp., Birmingham, Ala.—Application for construction permit for new broadcast station to operate on 1340 kc., 250 watts night and day, unlimited time; (requests facilities of WSGN when vacated) (B3-P-3105).

Wilkes-Barre Broadcasting Corp., Wilkes-Barre, Pa.—Application for construction permit for new station to operate on 1230 kc., 250 watts night and day, unlimited time; (requests facilities of WBAX); exact transmitter site and antenna system to be determined subject to Commission’s approval (T2-P-2915).

Frequency Broadcasting Corp., Borough of Brooklyn, N. Y.—Application for construction permit for new station to operate on 620 kc., 500 watts day; daytime only (B1-P-2989).

WJPR—John R. Pepper, Greenville, Miss.—Application for construction permit to change frequency from 1340 kc. to 1600 kc., increase power from 250 watts to 1 KW night and day and install new transmitter (B3-P-3099).

KGK—KGKO Broadcasting Co., Fort Worth, Texas.—Application for modification of license to make two main studios, one at 10th and Burnett Sts., Fort Worth, Texas, and one at Thomas Bldg., Dallas, Texas; station operates on 570 kc., special temporary authority to operate on the same frequency band in Minneapolis-St. Paul metropolitan area, grant limited to 60 days after grant and 180 days thereafter, respectively (B4-P-1230).

KGU—KGUG Broadcasting Co., Minneapolis, Minn.—Granted permission to change frequency of call to KGUG, and increase power of transmitter to 500 watts day and 5 KW night (B2-P-1038).

WIOD—Isle of Dreams Broadcasting Corp., Miami, Fla.—Adopted order granting petition for reconsideration and grant without hearing application for modification of license upon express condition that WMBI operate with frequency 1110 kc., with 5 KW LS; KFBI (B4-P-3047).

W2XVP—City of New York Municipal Broadcasting System, New York City.—Present high frequency broadcast station license further extended upon a temporary basis for the period ending August 1, 1941, pending determination upon application for renewal of license (B2-SVB-19).
1 KW night, 5 KW day, directional antenna night, unlimited time (B3-ML-1065).

MISCELLANEOUS

W2XO—Jansky & Bailey. Washington, D. C.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 117350 kc., using special emission for frequency modulation with a maximum bandwidth not to exceed 200 kc, subject to the condition that no interference is caused to other stations on same or adjacent channels, for period July 11, 1941, to not later than September 8, 1941, in order to conduct tests pending completion of new FM station No. 31NY. Also granted extension of special temporary authority to operate a high frequency experimental broadcast station on 124800 kc., 40 KW, special emission for frequency modulation, with transmitter located north of Alpine, N. J., described as Composite, Type RCA, maximum rated carrier power 40,000 watts, for period June 30, 1941, to not later than August 28, 1941, pending completion of new FM station W3I NY. Also granted special temporary authority to retransmit the transmissions of experimental high frequency broadcast stations W2XAG, W65N (WIXPW) and WlXOj (W43B) for the period June 30 to not later than August 28, 1941, in order to continue rebroadcasting experiments.

WPRP—Julio M. Conesa, Ponce, P. R.—Granted special temporary authority to remain silent July 4, 1941, only, in order to observe Independence Day.

KGY—KGY, Inc., Olympia, Wash.—Granted modification of construction permit to install vertical antenna and increase in night power, for period June 30, 1941, to not later than August 29, 1941, pending construction of directional antenna and increase in night power, (B4-P-2609, as modified, for installation of directional antenna until sunset at Sacramento, Cal., for a period not exceeding 30 days).

KOIL—Central States Broadcasting Co.—Granted motion for continuance for a period of 60 days of hearing now scheduled for June 30 on application for new station to operate on 1129 kc., 250 watts, unlimited time, and directed said hearing to be continued to August 29, 1941.

WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Granted special temporary authority to operate Haliincrafters HT-6, Type 807 in final stage, as a relay broadcast transmitter, with power of 25 watts on 2070 kc, in order to broadcast the opening program of the new park and animal farm in Saranac Lake on June 29, only.

W2XWG—National Broadcasting Co., New York, N. Y.—Granted special temporary authority to operate a high frequency experimental broadcast station on 432000 kc., 1000 watts, special emission for FM, with transmitter located at 1219 Wisconsin Ave. N.W., Georgetown, D. C., for the period June 29 to August 28, 1941.

WJAG—Carman R. Runyon, Jr., Yonkers, N. Y.—Granted extension of special temporary authority to operate on 487100 kc., 1 KW night, 5 KW day, directional antenna night, unlimited time, for period July 1, to July 31, 1941, only, due to closing of Federal Market News Offices.

KVOE—KQEO, Inc., Monroe, La.—Granted motion for continuance for a period of 60 days of hearing now scheduled for June 30 on application for renewal of license for station WBAX, for period June 29 to August 28, 1941, pending final authorization and completion of construction of station WBAX upon a regular basis for the period ending June 1, 1942, in lieu of the temporary license under which said station has been operated.

WCKY—WCKY, Inc., Columbus, Ohio.—Granted special temporary authority to operate daytime with a non-directional antenna until sunset at Sacramento, Cal., for a period not to exceed 30 days.

WHA—State of Wisconsin, Madison, Wis.—Granted special temporary authority to remain silent July 4, 1941, only, in order to observe Independence Day.

WHKC—United Broadcasting Co., Columbus, Ohio.—Granted special temporary authority to remain on the air from regular sign-off time (10 p.m., EST), to the conclusion of the Fritzie Zivic—Al Davis fight on July 1, 1941, only, in event this bout should run later than 10 p.m.

WLAL—State of Wisconsin, Stevens Point, Wis.—Granted special temporary authority to remain silent July 4, 1941, only, due to closing of Federal Market News Offices.

KNOE, Inc., Monroe, La.—Granted motion for continuance for a period of 60 days of hearing now scheduled for June 30 on application for new station to operate on 1129 kc., 250 watts, unlimited time, and directed said hearing to be continued to August 29, 1941.

KSAE—Sam Houston Broadcasting Association (H. G. Webster, President), Huntsville, Texas.—Granted order authorizing issuance of license upon a regular basis for station KSAM to H. G. Webster, C. N. Shaver and W. Bryan Shaver, co-partners, d/b as Sam Houston Broadcasting Association, for the period ending July 31, 1941, under special temporary authority to operate a high frequency broadcast station on 117430 kc., 40 KW, special emission for frequency modulation, with transmitter located at 3104 Northern Blvd., Long Island City. This authority is for the period this bout should run later than 10 p.m., subject to the condition that no interference is caused to other stations on same or adjacent channels, for period June 30, 1941, to not later than August 29, 1941, pending completion of new FM station No. 31NY.

WTRY—Troy Broadcasting Co., Inc., Troy, N. Y.—Granted order granting petition of WTRY for reconsideration and grant of special temporary authority to remain silent; cancelled hearing previously heretofore scheduled, and granted renewal of license to operate on 980 kc., 1 KW, unlimited time, DA.

WBT—Columbia Broadcasting System, Inc., Charlotte, N. C.; KFAB—KFAB Broadcasting Co., Lincoln, Neb.; WBWM—Columbia Broadcasting Co., Glenside, Pa.; WJAG—The Norfolk Daily News, Norfolk, Neb.—Designated for further hearing the following: application of WBT to install DA for nighttime use (B3-P-1735); the application of KFAB for construction permit to install new equipment, DA for nighttime use, move transmitter site and increase power and time of operation (B4-P-1736); application of WBWM for modification of license to change hours of operation to unlimited time (B4-ML-450); and application of WJAG to change frequency, hours of operation and make changes in program (B4-P-1736).
of park service officials, to be received from Station KNJN on June 25, 26, 27, and 28, 1941, only.

KAXZ—United Air Lines Transport Corp., Washington, D. C.—Granted special temporary authority to operate already licensed aircraft radio transmitter KHAZT aboard plane owned by United Air Lines Transport Corp., as a relay broadcast station on 2758 kc, to relay broadcast program in connection with the dedication of the new Chicago Municipal Airport to Radio Station WENR and NBC Red or Blue Network, between 2:30 and 5:30 p.m., EDT, on June 29, 1941, only.

WMRF—Lewistown Broadcasting Co., Lewistown, Pa.—Granted license to cover construction permit as modified for new station; 1400 kc., 250 watts, unlimited time (B2-L-1437). Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1102).

KSO—Iowa Broadcasting Co., Des Moines, Iowa.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-896). Special temporary authority to operate already licensed aircraft radio transmitter, increase power to 5 KW day and night, and change frequency to 1250 kc. (B1-L-1401). Granted authority to determine operating power by direct measurement of antenna input (B1-Z-896).

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Granted license for reinstatement of auxiliary license; 950 kc., 500 watts, auxiliary purposes only (B1-L-1417).

KSWO—Willard Carver & Byrne Ross, Lawton, Okla.—Granted license to cover construction permit as modified for new station; 1150 kc., 250 watts, daytime (B3-L-1413). Granted authority to determine operating power by direct measurement of antenna input (B3-Z-925).

WNEW—Wodaam Corp., New York, N. Y.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-925).

WNAC—The Yankee Network, Inc., Boston, Mass.—Granted license to cover construction permit as modified for installation of directional antenna for day and night use, increase power to 5 KW day and night, and change frequency to 1250 kc. (B1-L-1401). Granted authority to determine operating power by direct measurement of antenna input (B1-Z-896).

KFPL—C. C. Baxter, Dublin, Texas.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-896). Special temporary authority to operate already licensed aircraft radio transmitter, increase power to 5 KW day and night, and change frequency to 1250 kc. (B1-L-1401). Granted authority to determine operating power by direct measurement of antenna input (B1-Z-896).

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Granted license for reinstatement of auxiliary license; 950 kc., 500 watts, auxiliary purposes only (B1-L-1417).

WSHY—The Crosley Corp., Cincinnati, Ohio.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 1300 kc., 1000 watts, special emission for frequency modulation, with the transmitter located at corner Vine and Fifth Streets, Cincinnati, Ohio, as described as Crosley Type EDS-213-M, maximum rated carrier power output 1000 watts, for the period June 30 to not later than September 28, 1941.

WFIL—C. C. Baxter, Dublin, Texas.—Granted construction permit for authority to make changes in tubes in last radio stage (B3-P-1396).

KSO—Iowa Broadcasting Co., Des Moines, Iowa.—Granted modification of construction permit (B4-P-2777, which authorized installation of new transmitter and new directional antenna for night use, move transmitter, and increase power) for changes in directional antenna for night use on 1150 kc., under NARBA (B4-MP-1307).

WNAC—The Yankee Network, Inc., Boston, Mass.—Granted modification of construction permit (B1-MP-322 as modified, which authorized increase in power, changes in equipment, and installation of directional antenna for day and night use) for changes in directional antenna on 1250 kc., under NARBA (B1-MP-1279).

WGBO—Harry H. Carman, Freeport, N. Y.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-7048).

WCOS—Carolina Advertising Corp., Columbia, S. C.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-942).

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1093), as modified (B3-Z-942).

WASH—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1040).

KWGB—Nation's Center Broadcasting Co., Inc., Hutchinson, Kans.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-942).

WAPC—W. A. Pattensen, Chattanooga, Tenn.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-7048).

WBAA—Purdue University, West Lafayette, Ind.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1093).

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1041).

WWWS—Walker & Downing Radio Corp., Pittsburgh, Pa.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1041).

WRDW—Augusta Broadcasting Co., Augusta, Ga.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1028).

WHAS—CBS Broadcasting Co., Inc., Louisville, Ky.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1058).

WACO—Frontier Broadcasting Co., Inc., Waco, Texas.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1058).

WINS—Heard Radio, Inc., New York City.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-933).

WNB—Wylie B. Jones Advertising Agency, Binghamton, N. Y.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-930).

KCKN—The KCKN Broadcasting Co., Kansas City, Kans.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1043).

WDMJ—The Lake Superior Broadcasting Co., Marquette, Mich.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1098).

KPLT—North Texas Broadcasting Co., Paris, Texas.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1098).

KWDC—Northwestern Broadcasting Co., Vernon, Texas.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1082).

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1043).

WCOL—WCOL, Inc., Columbus, Ohio.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1010).

WDEL—WDEL, Inc., Wilmington, Del.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-936).

WIND—Johnson Kennedy Radio Corp., Gary, Ind.—Granted license to cover construction permit (B3-P-1396), to increase power to 5 KW day and night; make changes in directional antenna system and install new transmitter (B4-L-1421). Also granted authority to determine operating power by direct measurement of antenna input (B4-Z-969).

KBIX—Oklahoma Press Publishing Co., Muskogee, Okla.—Granted license to cover construction permit (B3-P-3112), for new transmitter, increase in power to 250 watts, and for frequency 1490 kc., under NARBA (B3-L-1346).

WTSP—Pinellas Broadcasting Co., St. Petersburg, Fla.—Granted license to cover construction permit (B3-P-2933 as modified, to install new transmitter, make changes in antenna, change frequency from 1380 to 1399 kc., and increase power from 250 watts to 500 watts night, 1 KW-LS (B3-L-1424).

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Granted license to cover construction permit (B2-P-1106) for installation of new auxiliary transmitter; 1210 kc., 1 KW, auxiliary purposes only (B1-L-1931).

KBMC—Midland Broadcasting Co., Kansas City, Mo.—Granted modification of auxiliary license to increase power from 1 KW, 250 KW-LS, to 250 KW day and night, using directional antenna at night (B4-ML-1071).

KJG—Eagle Broadcasting Co., Inc., area of Brownsville, Texas.—Present license for relay broadcast station further extended upon a temporary basis only, pending determination upon application for renewal of the license filed by applicant, and all applications for license renewal for the period ending not later than August 1, 1941 (B3-SRY-10).

KRBA—Red Lands Broadcasting Assn.—Lufkin, Texas.—Adopted order authorizing issuance of license upon a regular basis for Station KRBA to Ben T. Wilson, R. A. Corbett and Thomas W. Baker, co-partners, doing business as the Red Lands Broadcasting Association, to operate as a Class 1 station under NARBA for the period ending October 1, 1941, in lieu of temporary license under which station has been operating (Docket No. 5837). Commissioner Payne dissented.

KGF—Eagle Broadcasting Co., Inc., Brownsville, Texas.—Adopted order authorizing issuance of license upon a temporary basis for a period of 30 days from July 1, 1941, during which time said licensee shall fully comply with the provisions of the Commission's Order entered in the instant matter on April 2, 1941 (Docket No. 5854). Commissioner Payne dissented.

W6XDI—Don Lee Broadcasting System, San Francisco, Calif.—Modification of construction permit (B5-PV-B-19) as modified, for a new television station, requesting extension of commencement and completion dates from 11-30-40 and 5-30-41 to 5-30-41 and 10-30-41, respectively.

MISCELLANEOUS APPLICATION

W10XF—National Broadcasting Co., Inc., Portable.—Modification of license to change the type designation of transmitter.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Bank & Stoller Corp.—Charging unfair and deceptive practices in the sale of photographic miniatures, sometimes known as goldstone miniatures, a complaint has been issued against Blank and Stoller Corporation, 227 East 45th St., New York, and against Harry J. Long, George Stoller, Maurice Schultz, and Randolph Fajen, individually and trading as Blank & Stoller Studios. The respondents Long, Stoller and Schultz, according to the complaint, are officers of the corporation and control its activities.

The complaint alleges that pursuant to understandings, agreements and conspiracies the respondents, in order to obtain photographs and negatives from which to produce miniatures for sale, have falsely represented that they were connected with one or more newspapers or press associations and desired to take photographs of individuals for use by such newspapers or press associations at future dates, when in fact none of the respondents have had newspaper or press association connections. (4523)

Paramount Yarn Company—Alleging violation of the Federal Trade Commission Act in the sale of knitting yarns, a complaint has been issued against Louis Glasser, trading as Paramount Yarn Co., 362 Grand St., New York.

The complaint alleges that the respondent, in seeking to sell his products, has misleadingly represented the constituent fiber or material of which they are made, such representations appearing in catalogs, color charts, sample books and other printed and written material and on labels. (4524)
Penn-Lub Oil Products Co., 85 Gotthart St., Newark, N. J., engaged in the sale and distribution of reclaimed motor oils to wholesalers and retail distributors is charged in a complaint with misrepresentation.

The complaint charges that in the sale and distribution of its product the respondent has caused to be imprinted upon the containers in which the product is displayed and sold statements and representations such as: “PENN-LUB 100% PURE PARAFFIN BASE MOTOR OIL,” and “MOTOR OIL SPECIALLY PROCESSED FOR HIGH SPEED MOTORS.” (4524)

Rudolph Wurlitzer Company, 121 East Fourth St., Cincinnati, piano manufacturer and distributor, is charged in a complaint with misrepresentation.

The complaint charges that in advertisements in newspapers, magazines and trade journals the respondent has represented, among other things, that pianos manufactured by it are “Finished in Kordevon, a remarkably beautiful and durable finish featured exclusively by Wurlitzer” and “Wurlitzer is first with Kordevon, a new finish, hailed with enthusiasm by leading decorative authorities for its unique beauty, its soft, rich texture, its variety of tasteful shades” and in advertisements in trade magazines intended for the trade and for the respondent’s dealers, but not for the purchasing public, that “In appearance Kordevon is almost exactly like lightly tooled leather. In fact, the average laymen would likely think it was leather unless told otherwise.” (4525)

Success Portrait Co.—Charging violation of the Federal Trade Commission Act in the sale of tinted or colored photographic enlargements and miniatures, and frames, a complaint has been issued against Success Portrait Co., which also operates as Chattanooga Art Medallion Co, and as Art Trade Studios, with headquarters in Chattanooga, Tenn., and four of its officers, also representatives who operate under various trade names, and the representatives’ sales agents.

The complaint alleges that the respondents have entered into and carried out various understandings, agreements, combinations and conspiracies with each other for the sale of their products through misleading and deceptive practices. (4522)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Grand Rapids Exchange, Inc., 55 Hope St., Brooklyn, also trading as Denis Furniture Co., 2182 Third Ave., New York, has been ordered to cease and desist from misrepresentation in the sale of furniture.

The Commission finds that the respondent has represented, on conspicuous signs on its places of business in each city, that it maintains “The Original Grand Rapids (Exc., Inc.) Furniture, Main Show Rooms,” and has also made oral representations to purchasers that “We are the real McCoy because we have our factory in Grand Rapids, Michigan, and the name of it is the Grand Rapids Furniture Company.” (3703)

Pelican State Candy Co., a corporation, 1501 North Rampart St., New Orleans, and Max J. Pinski, its president and chief stockholder, have been ordered to cease and desist from lottery methods in connection with the sale of candy or other merchandise to ultimate consumers. The respondent Pinski formerly was in business as an individual in New Orleans under the names Pelican State Candy Co. and Royal Chocolates. (4210)

STIPULATIONS

During the past week the Commission has entered into the following stipulations:

Adams Paint Co., agrees to cease representing that the usual and customary earnings or profits to be derived from the sale of its paint products by salesmen or agents are larger than the customary earnings actually so earned under normal conditions.

The respondent corporation further stipulates that it will cease representing that salesmen or agents or others can, within a specified time, make profits or earn such as exceed the average net profits theretofore consistently made in like periods by its full-time agents under normal business conditions. (3148)

Beeche Laboratories, Inc., St. Paul, Minn., has entered into a stipulation to cease representing that its livestock preparation “Blackleg Apressor (Cultural)” produces life immunity, or offers unequalled assurance, against blackleg, and to discontinue advertising that this product or the preparation “Blackleg Eductor,” or the combination of the two, produces an immunity more rapidly or that lasts as long as that produced by natural aggrassion; or that one vaccination with the combination is sufficient to produce immunity that lasts for the life of the animal. (02817)

Binks Manufacturing Co., manufactures spray guns and compressors of various types, including its so-called “Roche Compressor,” a part of its “New Roche Painting Outfit.” The respondent corporation agrees that in the sale of its outfit it will cease employing the statement “3 C.F.M. at 40 lbs. Working Pressure” as descriptive of its device, and will desist from the use of this or other statements implying that the device, when and if operated at the designated pressure, will produce an output of cubic feet of air to the minute or any other claimed output which is in excess of actual accomplishment. (3153)

Blackstone-Marshall Publishing Co.—Engaged in the sale of a booklet entitled “Your Will and How to Write It,” a Washington, D. C., co-partnership has stipulated that it will cease and desist from certain representations in the sale of the booklet. The respondents are Richard J. Bashor, Webster C. Patterson, Richard S. Patterson, and Robert T. Patterson, trading as Blackstone-Marshall Publishing Co., 1110 F. St., N. W., Washington. (3146)

Charles Henry Brown & Son, Inc., 47 West 34th St., New York, and Charles B. Brown, Charles Henry Brown, and Mrs. Charles Henry Brown, its officers and principal owners, entered into a stipulation to cease using, in connection with the sale of their arch supporters designated “Glide-o-Matic Arch Resters”, statements or representations tending to cause the impression that such devices or their use can be depended upon to afford relief from foot pains, fallen arches, callouses, metatarsal troubles or other ailments.

The respondents further agree to cease representing that a single type of arch support generally will afford relief or be corrective when the use of arch supporters is indicated. (3150)

Buchanan-Thomas Advertising Company—C. Cee Buchanan and Lyman H. Thomas, trading as Buchanan-Thomas Advertising Co., 412 South 19th St., Omaha, Neb., have entered into a stipulation in which they agree to cease certain representations in the advertisement of “Butter-Nut Coffee” on behalf of Paxton and Gallagher Co., Omaha. The respondent advertising agency stipulates that it will cease representing, directly or by implication, that Paxton and Gallagher Co. discovered a new or extraordinary process of maturing coffee, that this company’s method of maturing coffee eliminates all trace of harshness or coffee acids, and that a pound of Butter-Nut coffee makes more cups of coffee than a pound of any other coffee. (02824)

Harry T. Campbell Sons’ Co., Towson, Md., have entered into a stipulation in which it agrees to cease certain representations in the sale of “Campbell’s Calcite Grit,” a poultry food supplement.

Under its stipulation, the respondent corporation agrees to desist from representing that its product is the only grit having a natural manganese content; and that it is necessary to supply supplementary commercial feeds, unless this representation is specifically limited to feeds deficient in this mineral. (02820)

Cliff-Edwards Hair-Way—Cliff Edwards, conducting a business under the name Cliff-Edwards Hair-Way, 8026 Hollywood Blvd., Los Angeles, entered into a stipulation to cease representing that his preparations for the hair known as “Cliff Edwards No. 7” and “Cliff Edwards No. 1” will cause hair to grow in any way aid in growing hair on a naturally bald head; that the preparations, or either of them, are new in the sense that they consist of ingredients other than such as have been long recognized for use in scalp treatments; and that the preparations were created by a prominent cosmetologist and dermatologist. (3147)

Penman Tracing Co., Inc., 18 West 21st St., New York, entered into a stipulation to cease using representations implying that the perfumes which it sells are French perfumes manufactu-
tured in France and sold in the United States. The respondent corporation also stipulates that it will cease employing any French words or language in its literature or on its cartons or packages in such a manner as to lead the public to believe that the contents of the packages are of French origin and have been manufactured in France, and that it will cease using the word “Paris” on its labels, letterheads and other advertising matter in connection with the sale of its products in the United States.

The stipulation is supplemental to a stipulation previously accepted by the respondent. Under the supplemental stipulation, the respondent agrees to desist from disseminating advertisements which represent that “Nox-Em Tablets and Capsules,” “Ka-No-Mor Capsules,” “Nox-Pan Tablets,” and “Luebert’s Laxative Tablets” are in all cases safe or harmless; or which fail to reveal that the frequent or continued use of “Nox-Em Tablets and Capsules,” “Ka-No-Mor Capsules,” and “Nox-Pan Tablets” may be dangerous, causing serious blood disturbances, anemia, collapse, or a dependence on them, and that no more than the dosage recommended should be taken, and that they should not be given to children; or which advertise that “Luebert’s Laxative Tablets” should not be used when abdominal pains, nausea or other appendicitis symptoms are present; and that their frequent or continued use may result in dependence on laxatives, and that if a skin rash appears, its use should be discontinued. (0304)

Montgomery Ward & Co., Inc., Chicago, stipulated that in the sale of coal tar hair dye preparations designated “Inecto” and “Claireol” it will cease disseminating advertisements which fail conspicuously to reveal the following: “Caution: This product contains ingredients which may cause skin irritation on certain individuals and a preliminary test according to accompanying directions should first be made. This product must not be used for dyeing the eyelashes or eyebrows; to do so may cause blindness.” The stipulation provides, however, that such advertisement need not contain only the statement: “Caution: Use only as directed on label,” if and when the label bears the first-described caution conspicuously displayed and the accompanying labeling contains adequate directions for such preliminary testing before each application. (02821)

Newbro Manufacturing Co., 188 Walker St., S. W., Atlanta, stipulated that in the sale of its cosmetic and medicinal preparations it will cease representing, directly or by implication, that “Tuxedo Club Pomade” invigorates the scalp or helps the hair as nothing else will; that “Queen Hair Dressing,” also designated as “New Improved Queen Hair Dressing,” is a hair grower or supplies food for the hair; that “Queen Instant Skin Whitener,” also designated as “New Improved Queen Instant Skin Whitener” and as “Queen Skin Whitener Ointment,” improves the tone of the complexion or retards the formation of blackheads; that “Queen Skin Soap,” also designated “New Improved Queen Skin Soap,” helps to heal skin blemishes; that “Peroxide Vanishing Cream,” also designated “New Improved Peroxide Vanishing Cream,” is made from fabric composed of rayon, or which contains rayon without clear and unequivocal disclosure of the fact that the fabric is made of or contains rayon, as the case may be, on labels or tags conspicuously affixed to the merchandise, and on the invoices and in all advertising and promotional matter, however disseminated or published. (02818)

Peerless Smoking Jacket Co., Inc., 16 East 34th St., New York, distributor of men’s specialty garments, including robes, house jackets, sports coats and shirt and slacks ensembles, stipulated that it will not offer for sale, sell or distribute any merchandise which is made from fabric composed of rayon, or which contains rayon without clear and unequivocal disclosure of the fact that the fabric is made of or contains rayon, as the case may be, on labels or tags conspicuously affixed to the merchandise, and on the invoices and in all advertising and promotional matter, however disseminated or published. (3155)

A. D. Sutton & Sons—David A. Sutton and Sam Sutton, trading as A. D. Sutton & Sons, 13 West 37th St., New York, distributors of bandkerchief and handkerchief fabrics to their original brilliance and beauty, and that its customers are protected by Lloyd’s of London against any personal or property damage resulting from the use of Tru-Clean Tablets, and are afforded legal redress against Lloyd’s of London for any such damage. (02822)

Valeria’s Products—Dave Boston and Wilma Boston, co-partners trading as Valeria’s Products, and as Valeria’s, 589 East Adams Ave., Detroit, entered into a stipulation in which they agree to cease representing that “Valeria’s Hair Grower” will cause the natural oils of the scalp to be retained; overcome dryness of the scalp; stop excessive dandruff or falling hair, or cause hair to grow. The respondents further agree that in the dissemination of advertisements they will cease representing, by use of the words “Hair Grower” in the designation of their preparation, that the product will grow hair. (02819)

Whelan Candy Company—John J. Whelan, trading as Whelan Candy Co., and as The Whelan Co., Bradford, Pa., stipulated that in connection with the sale of candy and other merchandise, he will cease supplying to others candy, cigar lighters or other merchandise together with punch-boards, push cards, or other lottery devices, or such devices either with assortments of candy or other merchandise or separately, which devices are to be or may be used in selling such candy or other merchandise to the public. (3149)

FTC CASE DISMISSED

July 3, 1941 — 593
DEFENSE COMMITTEE MEETS

The new NAB National Defense Committee will meet at the NAB in Washington, Tuesday, July 15. Members of the Committee are: John Shepard, 3rd, Yankee Network, Chairman; A. J. Fletcher, WRAL; Leo Fitzpatrick, WJR; H. Vernon Anderson, WJBO; Ben Ludy, WIBW.

EXECUTIVE COMMITTEE

The NAB Executive Committee will meet Monday, July 14, in Washington to consider a number of matters.

THE MUZAK LICENSE

The recent grant to Muzak Corporation of a construction permit for a development FM broadcast station has been hailed in a recent FCC release as the inauguration of a new type of service in the field of radio broadcasting. However, the uniqueness of the service is questionable, since the applicant, Muzak Corporation, at present furnishes transcribed musical programs by telephone wires to hotels, restaurants and homes on a subscription basis and now proposes to furnish relatively the same service by substituting transmission by radio in place of the use of telephone wires. It would appear that this was contrary to the Commission's policy of not permitting the use of radio for transmission where wires are available.

The Commission's apparent interest in this new type of broadcasting service is worthy of attention not only by broadcasters but also by advertisers and by all who use radio and are interested in the great public service rendered by radio. In its announcement, the Commission quotes from a statement by the promoter of this new service as follows:

"There is no reason why the public should pay directly for moving pictures and indirectly for radio. It is merely a matter of circumstance that radio in the United States is available to the public only in connection with advertising announcements which frequently are highly disturbing or irritating. The American people have never decided or been given the opportunity to decide that radio should not be sold in the usual manner by direct payment for the service."

It is true that the Commission does not say specifically that it is in agreement with these views, yet it is significant that such views and the philosophy they express are set forth at such length in a routine announcement of the granting of an experimental radio broadcasting license.

The American system of broadcasting, the Commission says, is not practiced in all countries of the world. Quite so. However, because under the American system radio has been able to pay its way it has been able to maintain its freedom and has not been dependent upon a government subsidy, nor is it subservient to any political party or power.

Advertising, in addition to making private broadcasting possible, has also provided the basis for a competitive system and has thereby stimulated both broadcasters and advertisers to produce a variety of programs and a standard of performance unequalled throughout the world.

It is hoped that the criticism of all advertising as contained in the release is due to draftsmanship, and does not indicate an official policy of the Commission.

National Defense

Flying Cadet Campaign

Seven stations, listed below, are longtime cooperators in the Flying Cadet campaign for the Army. These, with 645 stations reported on June 9, 82 on June 30, 5 on July 3, bring the total to 739.

Unreported previously are:

KFUO—St. Louis, Mo.
KGGI—Brownsville, Texas
KPOW—Powell, Wyo.
WHMA—Anniston, Ala.
WLA—Lawrence, Mass.
WASZ—Huntington, W. Va.
WTJS—Jackson, Tenn.

Selective Service Drawing

The lottery in connection with Second Selective Service Registration has been set in Washington, D. C., for 7:00 p. m., EST, July 17. It is estimated the drawing of the 750 numbers will occupy approximately two hours. Thereafter the news will originate in various centers throughout the country served by broadcasting stations.

Because some stations reported inability to get lists from local boards promptly during the prior lottery, it is suggested that stations immediately re-establish contacts with the sources of local names.

If the likelihood of any difficulty is in prospect it is suggested that the circumstances be reported to NAB headquarters.

This suggestion is made in accordance with a letter received on Thursday from Major Ernest M. Culligan, Public Relations Officer, Selective Service System. On that date he wrote:

"It is my pleasure to assure you that instructions have been issued to all members of the Selective Service System to make information regarding Selective Service readily available to the press and radio news agencies. During the past several months we have corrected many situations where local boards were reluctant to release information and I am sure that radio stations will not encounter any difficulty in this connection.

"Should any situation come to your attention that requires corrected action, please advise me and I assure you the matter will be straightened out."

Caption of a letter accompanying Navy announcements dated July 14, reads:

ALL OUT FOR THE NAVY!

Details of the urgent need for regular and reserve enlistments are covered in a memorandum to all stations.

(Continued on page 596)
NATIONAL DEFENSE

KFYO, Lubbock, Texas (population 31,853), home of Texas Technological College, proudly boasts that the city rates second for furnishing enlistments to Naval Air Corps. John Bradford, traffic department, writes that Texas Tech placed second with a total of 67 enlistments, and that first place was held by State of Texas University. KFYO for many months has been backing the Navy's air program.

Paul J. Miller, production manager, WWVA, Wheeling, has scheduled a program, "Defending America," in which are presented various defense announcements which need to reach a maximum audience. They are broadcast Monday through Friday, 7:55-8:00 p.m.

FOURTH OF JULY PROGRAM

WHOM, Jersey City

West W. Willcox, assistant manager, writes that the station broadcast a complete daily series of spot announcements on July 1, 2, 3 and 4, not only in English but in native-tongue announcements in Polish, German, Italian, Spanish, Lithuanian and Jewish. The station also carried the 4:00-4:10 p.m. presidential broadcast via cooperation of NBC.

WEMP, Milwaukee

C. J. Lanphier, manager, broadcast the President's speech at the Milwaukee Ball Park through the cooperation of President Bill Veeck, head of the Milwaukee Ball Club.

KCKN, Kansas City, Kans.

Ellis Atteberry, manager, took Mutual's feed of the Fourth of July broadcast from WHB, Kansas City, Mo. The 10-minute program became part of the station's baseball broadcast in the afternoon. Full-hour patriotic program on the morning of the Fourth served to promote the afternoon feature. On prior days there was an effective teaser campaign.

KGNC, Amarillo

John Ballard, manager, scheduled a three-day Americanism theme which culminated with the Fourth of July presidential broadcast. Speakers included Mayor Joe A. Jenkins, American Legion officials, Postmaster W. D. De Grassi, and others.

KGHL, Billings

Ed Vucic released a series of live spots to secure a full audience for the Fourth of July presidential broadcast.

WITH, Baltimore

Thomas Tinsley, president, arranged to take the presidential speech from one of the Baltimore network stations.

KITE, KCKN, WHB, Greater Kansas City

According to a note from WHB: "All seven radio stations in the Greater Kansas City area logged the same program for another 'first time in local radio history' on Friday, July 4, when President Franklin D. Roosevelt addressed the nation. WHB-Mutual, KMBC-Columbia, WDAF-National Red and WREN-National Blue carried the President's talk on their regular network service. KCMO, local independent, received the program from NBC Blue via the AT&T test board. KITE and KCKN were fed the Mutual origination through the WHB control panel in accordance with the NAB's request for cooperation in this matter."

WGR-WKBW, Buffalo

During the Fourth of July broadcast Herbert C. Rice, program manager, arranged for a chorus of thirty Boy and Girl Scouts to recite the pledge of allegiance in unison with Chief Justice Stone.

WOR, New York

Ted Streibert, vice president, wrote on July 2 that he had arranged for the President's speech to be broadcast over a PA system at Ebbets Field and Empire City race track.

KFVS, Cape Girardeau, Mo.

This is another of the independent stations to carry the Fourth of July program.

KGW-KEX, Portland; KAST, Astoria; KSLM, Salem; KWJJ, Portland

H. Quentin Cox, assistant manager of KGW-KEX, broadcast the presidential talk to several meetings over PA systems; and fed the program to KAST, KSLM and KWJJ.

A total of 36 spots were broadcast by KGW and KEX in behalf of the Second Selective Service registration on June 29 and 30.

BMI NOTES

More New Songs for Broadcasters

Completion of contracts with six publishing firms for the licensing of music to subscribers, publication of eight new popular tunes, thirty Public Domain arrangements and twelve new compositions in the BMI Standard Black and White Series were announced this week.

The newly affiliated publishers are Fountain Music Company; Harmony Music Publishers; Melo-Dee Music Company; Modern Standard Music Company; Merrell Schwartz Music Company; and Meredith Willson.

With the addition of these twelve original compositions, the BMI Black and White Series offers seventy-two compositions of the type used on concert programs. These additions include three poems by Christopher Morley, poet and novelist, set to music by E. S. Nolling. You and I, which comes to BMI with the Meredith Willson contract, was written by Willson as a theme song for the Maxwell House Coffee program. An active demand for the song was evident after Bing Crosby and Rudy Vallee featured it on their own programs. Willson organized his own company and published it. Initial sales on the west coast were so good shortly after publication that the composer was unable to buy a piano copy for his own use. Recordings of the song by Kate Smith (Columbia), Bing Crosby (Decca), Glenn Miller (Bluebird), and others are scheduled for release in the next few weeks.

New BMI Subsidiary

Radio Tunes, Inc., has been organized under the laws of the State of New York as a subsidiary of Broadcast Music, Inc., to engage in the publication and exploitation of popular music.
Sydney M. Kaye, Merritt E. Tompkins and Robert J. Burton are directors. Chief executives of the new company have now been selected. Plans call for the establishment of a Professional Department and other departments necessary to a music company. Principal purpose for the formation of the new company is to give the music world an increasing variety of popular tunes. In establishing a subsidiary, BMI is profiting from the experience of other music publishers who have found additional companies useful in the promotion of their music.

The ‘Hi, Neighbor’ Policy

Written by Jack Owens, who wrote the music of the Hut Sut Song, and featured by Jane Frazee and the Merry Macs in the new Universal picture, “San Antonio Rose,” BMI’s Hi, Neighbor looks as if it may become an important song for group singing.

The number has been adopted in Santa Catalina, California, as the official greeting song and is broadcast every night. The Santa Catalina band plays it as the welcomer for all visitors to Catalina. Over July Fourth, more than one half million people were on the Island and many of them were whistling the tune. This is the first time that Catalina has adopted a welcoming song, but the words, Hi, Neighbor, have been used there for several years as a greeting phrase.

Not only in Catalina, but throughout the country, the times have been crying for a song of this sort. People are eager to “break the ice” that surrounds human relationships, but there has been no song that hit just the right note.

Jack Owens struck gold with the Hut Sut Song and many of his friends feel that he has done it again with Hi, Neighbor. The lyrics follow:

“Listen, you sisters and brothers,
I’ve got some very good advice.
Hear me, you sons of your mothers,
We’re really gonna break the ice.

CHORUS:

HI, NEIGHBOR! HI, NEIGHBOR!
What do ya’ know and what do ya’ say?
HI, NEIGHBOR! HI, NEIGHBOR!
Throw all your worries away.

Come on and shake my hand and let a grin do the rest.
It makes ya’ feel so grand to get your chin off your chest.
I’m shoutin’, HI, NEIGHBOR! MY NEIGHBOR!
Time to play and say, HI!”

Copyright 1941, Broadcast Music, Inc.

I Hear America Singing

One of this year’s outstanding compositions becomes available for broadcasting by BMI subscribers with the publication by E. B. Marks of George Kleinsinger’s patriotic cantata, I Hear America Singing. This number has been recorded for RCA Victor by John Charles Thomas and the ILGWU Radio Chorus with an orchestra led by Nathaniel Shilkret. (Victor Musical Masterpiece Album No. M.777.)

Written for a baritone with mixed chorus and orchestra, I Hear America Singing is based on Walt Whitman’s epochal work, Leaves of Grass. Glorified in stirring music are the people, farms, cities, splendor and majesty of America and the spiritual values for which it stands. Kleinsinger selected such excerpts from the Whitman works as Song of Myself, O, Pioneers! O, Pioneers!, For You, O Democracy and fused this material into a dramatic and brilliantly unified composition.

The twenty-seven-year-old composer has played piano in a jazz band; studied dentistry; been Musical Director of the Eastern CCC camps; graduated from New York University; won a fellowship at the Juillard School of Music; and created countless musical works, among them a violin concerto and several string quartets.

BMI FEATURE TUNES

July 14 - July 21

1. I WENT OUT OF MY WAY
2. WASN’T IT YOU
3. ALL ALONE AND LONELY
4. MY SISTER AND I
5. BECAUSE OF YOU
6. G’BYE NOW
7. WITH A TWIST OF THE WRIST
8. THE RELUCTANT DRAGON

In preparation, two great rhythm numbers—Yo Te Amo, an unusual novelty, and Hi, Neighbor.

BMI continues to lead in all indices of popularity. 13 out of 15 sheet music best sellers are BMI controlled, according to the Billboard compilation, and 11 out of 15, according to Variety. Billboard gives 10 of the 14 leading money makers in the coin machines to BMI, and Variety credits 11 out of 19. In best selling phonograph records, 8 out of 10, according to Billboard, are BMI published or BMI controlled.

The Hut Sut Song has jumped into first place in national sheet music best sellers, leading in the mid-west and south and ranking second to Intermezzo in the east. Out on the west coast Maria Elena has supersedes it as the number one song. Sammy Kaye’s Daddy is the sensation of the week in record sales, leading nationally in the east, in the mid-west and in the south, and ranking third on the west coast. G’bye Now and My Sister And I are still “going strong” after seven weeks and rank second and third respectively in record sales. Those “coming up” in Billboard’s Record Buying Guide are led by Things I Love and Good Bye, Dear, I’ll Be Back In A Year and Green Eyes.

Kent Cooper’s “Dixie Girl”

For the first time on any stage, Dixie Girl, recently published by BMI and written by Kent Cooper, General Manager of the Associated Press, was sung at the Radio City Music Hall in Leon Leonidoff’s stage revue which opened June 26.

Earl Wrightson, baritone, sang it as part of the Music Hall Symphony Orchestra’s overture, Southern Rhapsody.

Mr. Cooper, who writes music for his own amusement and relaxation, composed Dixie Girl in 1923 for his daughter, had it copyrighted but never presented it for publication. It was only as the result of losing a bet on a golf game that he consented to have the song released this year.

The Answer

Bobby Warren of Warren Publications is frequently asked what city has the address, Number 10, Lullaby Lane. He knows the answer now: It’s City of Heaven (Population Two), Warren’s new song which he is presenting to BMI broadcasters as “the newest addition to our household at Number 10.”

A Yard Bird Song

Time’s A’ Wastin’, by Olsen and Johnson, inspired by “Snuffy” Smith of the “Snuffy” Smith and Barney Google cartoon running in the Hearst papers, is being published by BMI. The tune will be promoted by BMI and King Features with the cooperation of Billy de Beck, the cartoonist, and orchestra leaders and movie stars who have expressed interest in the tune. “Snuffy” enlisted in the army recently and the song is expected to form an important part of his adventures.

July 11, 1941 — 597
Comment and Contrast
The Buffalo, N. Y., News says under date of June 24th:

"BMI DOUBLES ROYALTIES"

"Bennie Simon, local lawyer, and Dick Ullman, WGR-WKBW executive, who turned out the 'My Mind's On You,' got a pleasant surprise the other day in ripping open their royalty check for the tune. BMI voluntarily had doubled its payments to songwriters."

"Quite a contrast from a year or so ago when, with ASCAP in the saddle, Ruth Lowe got not a cent for all the times 'I'll Never Smile Again' was played on the air because she didn't belong to ASCAP."

Si Steinhauser of the Pittsburgh Press writes:

"Under the BMI royalty setup for the first quarter of 1941—and that's the period covered by the checks—individual song hits earned their composers from $800 to $1,200 for radio performances only. The figures do not include recording royalties."

"These royalties go, for the most part, to composers who have not been able to earn a penny from their music prior to the formation of BMI which opened its services to composers, rich or poor, famous or unknown."

"Radio, except for a few stations, has gone along without ASCAP music. The answer is simple. BMI has found composers of definite hits."

"Although ASCAP has been taking it on the chin, heaviest losers in the fight are movie theatre owners. Because ASCAP has the film industry tied to contracts, song hits featured in pictures are not on the air. Result: say the theatre men, people are not going to the movies to see the musicals."

Variety admits:

"Jack Robbins points to 'Aurora' as retribution of a pet Tin Pan Alley theory that the coin-machines can 'make' a song hit. Jack Kapp, prez of Decca, recorded this Brazilian 'carnival' song eight different ways, and guarantees Robbins 1,000,000 platters on Decca alone. It's also been widely waxed elsewhere."

"But it has only sold a meager 12,000 copies so far."

"In contrast, 'Hut Sut Song,' from a small coast publisher, but with an advantageous radio plug, will see 200,000 copies sold."

SALES MANAGERS COMMITTEE NAMED

Following a new method of station representation, appointment of the new seven-man executive committee for the NAB Sales Managers Division was announced today by President Neville Miller.

In accordance with a board of directors ruling, the new committee consists of a chairman selected at large, one member each representing the small, medium and large stations, and one representing each of the networks.

Eugene Carr, veteran member of the committee and assistant manager of WGAR, Cleveland, Ohio, is the new chairman.

Representing large stations is John M. Butler, Jr., commercial manager of WSB, Atlanta, Ga.; medium stations, E. Y. Flanigan, commercial manager, WSPD, Toledo, Ohio, who was chairman of the committee last year; small stations, Robert MacKenzie, manager, WCM1, Ashland, Ky.

Network representatives are Arthur Garfield Hayes, CBS Radio Sales, New York City; George H. Frey, sales service manager of the eastern division of NBC Sales department, New York City; and Linus Travers, vice president of the MBS-affiliated Yankee network and WAAB, Boston, Mass.

Serving on the committee last year, besides Flanigan and Carr, were Craig Lawrence, KSO-KRNT, Des Moines, Iowa; Ellis Atteberry, KCKN, Kansas City, Kans.; Willard Egolf, KV0O, Tulsa, Okla., and Charles Caley, WMID, Peoria, Ill.

Carr was due to arrive in Washington Thursday for a two-day conference with Frank E. Pellegrin, director of the Department of Broadcast Advertising, preparatory to calling the first meeting of the new executive committee later this summer.

Audience Reaction Reported

An article on "Ups and Downs in Audience Interest," by Joseph Creamer and George H. Allen, in the July issue of Advertising and Selling, is recommended to every station manager, sales manager and program director. It is a graphic account of the research conducted under the supervision of Horace Schwerin with the "Program Analyzer" machine, testing the reactions of thousands of typical listeners to various types of programs and commercials.

The article, factual, indicative and revealing, should be of great practical value to all broadcasters. Publication office is Chestnut at 50th St., Philadelphia, Pa.

Advertiser Seeks Commission

The Jaques Manufacturing Co., makers of K C Baking Powder, has been offering to place a spot announcement campaign direct, provided it is allowed 15 per cent agency commission.

The company states "this is the basis on which all of our newspaper contracts as well as radio contracts have been placed—our company having been recognized just the same as advertising agencies for a great many years." Merchandising and dealer contracts are also requested.

In reporting this to the NAB, a member comments that checking shows a number of broadcasters, "including some very large stations," are allowing the 15 per cent commission direct.

That this is a bad business practice seems to he obvious. If stations will allow an "agency commission" to one advertiser who places his business direct, it is hard to see how they can logically withhold a similar commission or rebate from all similar advertisers.

In fact, it is difficult to understand how any sort of "agency commission" can be allowed when there is no agency involved at all. Therefore, reduced to plain terms, this becomes a special rate reduction of 15 per cent allowed to one advertiser, or a rebate of 15 per cent allowed to one but denied to others.

Abuses such as these will do more to break down established practices and the radio rate structure than almost anything else that can be imagined. It has long been recognized in ethical advertising circles that to grant special rebates to one advertiser, thereby discriminating against others, is contrary to the best interests of the media, of advertising agencies, and of the whole business of advertising. Such action is certainly inimical to the industry's efforts to build and maintain high ethical standards, and for that reason stations that have been persuaded to comply with this advertiser's request, thinking more perhaps of the contract at hand than of its long-range effect, are advised to reconsider the matter carefully.

Cost-Per-Inquiry

Armie Products Co., of West Frankfort, Ill., on behalf of X-Pel, an athlete's foot remedy, is seeking cost-per-inquiry deals.

Allen A. Funt, Radio Productions, of New York, is seeking per-inquiry "propositions" from stations on behalf of a tobacco client, the House of Westminster, Inc.

Both advertisers have been advised of the NAB attitude on this subject, and have been cordially invited to use radio properly at established rates.

The Business Outlook

Facts learned from the weekly bulletin of the U. S. Department of Commerce, believed to be of interest to radio sales managers as possible sources of increased revenue, are as follows:

Personal finance company consumer loans rise 13 per cent over a year ago during the period ending May 1, with balances

598 — July 11, 1941
The question is: Can this employee be classified as an "outside salesman" for Wage and Hour Act purposes.

May I say that many smaller radio stations have employees with a similar multiplicity of duties and that your help in clearing up classifications will be greatly appreciated.

Following is the reply:

On the basis of these facts it would appear that the employee in question cannot be classified as an "outside salesman" within the meaning of section 541.5 of the regulations. The time which the salesman spends in broadcasting his programs must be counted as non-exempt work, and it would seem that the amount of non-exempt work performed by this employee does not meet the 20 per cent test laid down in subsection (B) of section 541.5.

Wage-Hour Pamphlet Revised

A thoroughly revised second edition of "The Wage and Hour Act: How It Affects a Broadcasting Station" has gone to press and will be mailed to all members next week.

Any member who has not received "A Sample Labor Contract Covering Technicians," mailed last week, should write in for one.

WKRC Strike

The AFRA strike at WKRC, Cincinnati, was still in progress Thursday, July 10. Four of 17 artists were on strike, AFRA has threatened to strike all MBS agency-built commercials fed to WKRC on Thursday unless the station comes to terms meanwhile. Negotiations were in progress Thursday.

Army Training

A thorough schooling as a radio technician in the Army Air Corps is assured all students at the Army Air Corps Radio Operators and Mechanics School at Scott Field, Belleville, Illinois. The school, the largest of its kind, is training radio experts at the rate of approximately 20,000 a year. Soldiers enter in classes of approximately 800 every two weeks. Graduates of the 22-week radio course are thoroughly trained in the operation, and line maintenance of aircraft radio equipment, and in the installation, operation and field maintenance of tactical ground radio equipment.

FEDERAL COMMUNICATIONS COMMISSION

Army Station Call Letters Changed

The Army Amateur Net Control Station has changed its call letters to W3USA—indicating "United States Army." The old call letters of the station, which is located in the War Department Message Center, Washington, D. C., were "W3CXL." The old call letters had been used since the station was established in 1929. W3USA normally will operate on the amateur 3,500-4,000 kilocycle, 7,000-7,300 kilocycle, and 14,000-14,400 kilocycle frequency bands with sufficient power to be heard throughout the United States, Puerto Rico, Panama, Alaska, Hawaii, and, at times, even to contact the Philippine Islands.

From the FCC Mail Bag

An Illinois radio fan complains to the Federal Communications Commission about the use of the expression "now we have news" in connection with commercial announcements. The Commission
Amateur Rules Amended

At the request of the American Radio Relay League, the Federal Communications Commission has amended its rules governing amateur radio service to make it an additional 400 kilocycles available for voice communication (Section 12.115), and has allocated 50 kilocycles for utilization of frequency modulation (Section 12.117).

As a result, radiotelephony is now authorized on the amateur band 28,100 to 30,000 kilocycles instead of the 28,500 to 30,000 kilocycles as heretofore, and the frequencies 29,250 to 30,000 kilocycles are assigned for FM transmission. The present extent of the amateur band remains unchanged.

This action was taken to accommodate the increasing number of amateur radio telephone stations and, at the same time, to encourage activity of amateurs in developing FM equipment, as well as to obtain data respecting characteristics of this band for FM use.

At the same time the Commission, on its own motion, amended Section 12.63 to clarify operation of amateur stations by remote control. This amendment will tend to eliminate misunderstanding about the Commission's requirement that an amateur desiring to operate a station by remote control must submit complete information regarding location of the control point, his right to the use of the premises, the means by which remote control is effected, and the equipment to be used to monitor the transmissions from the control point. As has long been the case, amateur operation, directly or remotely, is prohibited on premises controlled by an alien.

Section 12.83, which concerns transmission of call signals, was amended to facilitate Commission monitoring of amateur stations in the present emergency.

---

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

September 5
KWTO—Ozarks Broadcasting Co., Springfield, Mo.—C, P., 560 kc., 1 KW night, 5 KW day, unlimited time, DA-night. Present assignment: 560 kc., 1 KW night, 5 KW day, SH-5 a.m. to 12.

September 9

FEDERAL COMMUNICATIONS COMMISSION ACTION

Applications Granted

Lake Worth Broadcasting Corp., Lake Worth, Fla.—Granted construction permit for standard broadcast station to operate on 1340 kc., 250 watts, unlimited time, exact site to be determined subject to Commission's approval (B3-P-3161).

W2XCB—Columbia Broadcasting System, Inc., Portable Mobile (area of W2XAB, New York City).—Granted modification of construction permit to change frequencies of television relay broadcast station from 336000-338000 kc, to 316000-338000 kc, upon an experimental basis only, with peak power 25 watts (B1-MPVB-43).

KINY—Edwin A. Kraft, Juneau, Alaska.—Granted construction permit to make changes in equipment and increase power from 1 to 5 KW, unlimited time, subject to approval of transmitter antenna and transmitter site (B-P-3069).

WSYB—Philip Weiss, tr/As Philip Weiss Music Co., Rutland, Vt.—Granted construction permit to install new transmitter, directional antenna for night use, change frequency from 1490 kc, to 1480 kc, and increase power from 350 watts to 1 KW day and night, granted subject to antenna approval (B1-P-3090).

W59C—WGN, Inc., Chicago, Ill.—Granted temporary authority to operate FM station W59C with power of 1 KW; this authority is granted without prejudice to determination of hearing under Order No. 79.
KXYZ-KPRC—Harris County Broadcast Co., Houston Printing Corp. (both of Houston, Texas).—Granted authority for KXYZ and KPRC to make joint use of one common antenna for both day and night operation.

WCNC—Audrey G. McCabe and Trim W. Aydlett, d/b/a Albermarle Broadcasting Co. (assignor); Albermarle Broadcasting Co. (assignee); Elizabeth City, N. C.—Granted petition to extend without hearing application for consent to assignment of license for Station WCNC from present licensee partnership (McCabe and Aydlett, doing business as Albermarle Broadcasting Co.), to a corporation of the same name. (Docket No. 5978.)

WCBD—WCBD, Inc., Chicago, Ill.—Granted authorization to use the call letters WAIT and deleting present call letters WCBD, 820 kc., 5 KW power until sunset at Fort Worth, Texas.

DESIGNATED FOR HEARING

WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Application for modification of license to change hours of operation from daytime to limited to Knoxville, Tenn.; station operates on 900 kc., 1 KW (B2-ML-1060).

Park Cities Broadcasting Corp., Dallas, Texas.—Application for construction permit for new standard broadcast station to operate on 710 kc., 5 KW night and day, directional antenna nighttime, unlimited time (B3-P-2860).

Midstate Radio Corp., Utica, N. Y.—Application for construction permit for new standard broadcast station to operate on 1150 kc., 250 watts, unlimited time; transmitter site and antenna system to be determined subject to Commission’s approval. Joint hearing with applications of Utica Observer-Dispatch, Inc. (File No. B1-P-2702), and Utica Broadcasting Co., Inc. (B1-P-3206), for new stations at Utica to operate on same frequency and same power (B1-P-3171).

KGGM—New Mexico Broadcasting Co., Albuquerque, N. M.; KVSF—New Mexico Broadcasting Co., Santa Fe, N. M.—Application for construction permit to move transmitter to North 2nd St., Albuquerque, install new transmitter, change frequency from 1250 kc. to 500 kc., increase day and night power from 1 to 5 KW, and install directional antenna for night use; to be heard jointly with applications of Arizona Broadcasting Co., Inc. (KVOA), Tucson, Ariz., for change in frequency from 1290 kc. to 520 kc. on 1 KW, unlimited time, directional antenna day and night; and application of KVSF for construction permit to change frequency from 1310 kc. to 1260 kc., increase power from 160 watts to 1 KW night and day, install new antenna and move transmitter and studio sites locally.

W3XWT—Allen B. DuMont Laboratories, Inc., Washington, D. C.—Granted modification of construction permit which authorized the television broadcast station for extension of commencement and completion dates from January 1, 1941 and July 1, 1941, to July 1, 1941, and January 1, 1942, respectively (B1-MPVB-49).

W47A—The Capitol Broadcasting Co., Inc., Schenectady, N. Y.—Granted extension of special temporary authority to operate with main studio at the transmitter of High Frequency Broadcast Station W47A for a period of 30 days beginning July 1, 1941, pending completion of STL transmitter at main studio specified in construction permit.

W9XYH—Head of the Lakes Broadcasting Co., Superior, Wis.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 43000 kc., 1000 watts, special emission for frequency modulation, with transmitter located at 39th St. and Tower Ave., Superior, described as General Electric and Composite 1 KW and Type 4-GP1A, maximum carrier power output 1000 watts, from July 1 to not later than August 30, 1941.

W51R—Stromberg-Carlson Telephone Mfg. Co., Rochester, N. Y.—Granted extension of special temporary authority to operate a frequency modulation station commercially on 14100 kc., special emission for frequency modulation with transmitter located at 89 East Ave., Rochester, N. Y., described as R.E.L. Type Cat. No. 519, maximum rated carrier power 3 KW, beginning July 1, 1941, to not later than September 1, 1941, pending completion of construction pursuant to construction permit.

WIXSO—The Trans-Mississippi Broadcasting Service Corp., Hartford, Conn.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 45700 kc., 1000 watts, special emission for frequency modulation, with transmitter located at Avon, Conn., and described as C.B.T., maximum carrier power output 1000 watts, for period July 1, 1941, to not later than September 1, 1941.

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Denied special temporary authority to operate from sign-off (July 7, 30 p.m., PST) to the conclusion of the Independence Day Celebration of Modesto and Stanislaus County, Calif., on July 3, 4, and 5, 1941, only.

WABY—Adirondack Broadcasting Co., Inc., Albany, N. Y.—Granted motion to dismiss without prejudice application for modification of license to change frequency from 1400 kc. to 1210 kc., using 250 watts, unlimited time (B1-MP-1053).

Val Curler Broadcasting Corp., Schenectady, N. Y.—Withdraw petition to intervene in above matter (WABY), inasmuch as application was dismissed.

King-Trendle Broadcasting Corp., Detroit, Mich.—Granted motion to dismiss without prejudice application for construction permit for new station to operate on 1010 kc., 250 watts, unlimited time (B2-P-1994).

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Granted motion to dismiss without prejudice application for construction permit to move transmitter to 569 kc., 1 KW night, 5 KW day, unlimited time, directional antenna night, from July 7 to September 5, 1941.

W47A—Capitol Broadcasting Co., Schenectady, N. Y.—Granted extension of special temporary authority for construction permit to operate a new high frequency broadcast station, for extension of completion date from June 30, 1941 to July 31, 1941 (B1-MP-32).

WMUR—The Radio Voice of New Hampshire, Inc., Manchester, N. H.—Granted motion to dismiss without prejudice application for construction permit for new station to operate on 1350 kc., 1000 watts, for period July 1, 1941 to August 1, 1941 (B1-MP-1347).

Northern Radio Co., Seattle, Wash.—Granted temporary authority to operate 65-watt Northern Electric 395A Radio telephone aboard Ferryboat Fox Island 224559 on frequency 3090, 3190 or 2830 kc., once only during the period July 1 to July 10, 1941, in order to relay to Station KVOS at Bellingham, Wash., program in connection with the initial ferry run between Bellingham and Orcas Island.

WADA—WSAZ, Inc., Huntington, W. Va.—Granted special temporary authority to operate relay mobile station WADA, licensed to the Charleston Broadcasting Co., for a series of special programs consisting of interviews with housewives of Huntington, W. Va., the program originating in the studios of WSAZ and being transferred to selected points in various parts of the city of Huntington, on July 4, 11, 18 and 25, 1941, and August 1, 1941, only.

WEVD—Detroit Mutual Radio Fund, Inc., New York City.—Granted modification of construction permit for installation of directional antenna for day and night use, increase in power and install new transmitter, move transmitter, for 1530 kc. and changes in directional antenna, extend commencement and completion dates from April 18, 1941 and October 18, 1941 to 60 days after grant and 180 days thereafter, respectively (B1-MP-1308).

KSRO—Ernest L. Finley, Santa, Rosa, Calif.—Granted modification of construction permit which authorized installation of first transmitter and directional antenna for day and night use, change in frequency and increase in power, for installation of new type transmitter, changes in directional antenna on 1350 kc., and extend commencement and completion dates from February 4 and August 4, 1941 to 1 day after grant and 30 days thereafter, respectively; 1350 kc., 1 KW, unlimited time, directional antenna day and night (B5-MP-1336).

WMNN—Monongahela Valley Broadcasting Co., Fairmont, W. Va.—Granted modification of construction permit for changes in directional antenna system, 320 kc., to extend completion date to August 1, 1941 (B1-MP-1295).

W63C—National Broadcasting Co., Inc., Chicago, Ill.—Granted modification of construction permit for new high frequency broadcast station, for changes in antenna system and change type of transmitter (B4-MP-23).
KVD—KVD Broadcasting Co., Idaho Falls, Idaho—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1076).

WKPT—Kingsport Broadcasting Co., Kingsport, Tenn.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1061).

WJDX—Lamar Life Insurance Co., Jackson, Miss.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1121).

KVOS—Merced Broadcasting Co., Merced, Calif.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1077).

WTMV—Mississippi Valley Broadcasting Co., Inc., East St. Louis, Ill.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-1053).

KDON—Monterey Peninsula Broadcasting Co., Monterey, Calif.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1109).

WSFA—Montgomery Broadcasting Co., Inc., Montgomery, Ala.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1063).

KTO—Oklahoma Broadcasting Co., Inc., Oklahoma City, Okla.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1090).

KVFO—Plains Radio Broadcasting Co., Harlan, Ky.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1124).

WHLS—Port Huron Broadcasting Co., Port Huron, Mich.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1124).

WRK—Rockford Broadcasters, Inc., Rockford, Ill.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-1092).

KWJB—Barry T. Sims, tr/ as Sims Broadcasting Co., Globe, Ariz.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1080).

KUSD—University of South Dakota, Vermillion, S. D.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-1044).

KPVW—Southwestern Hotel Co., Fort Smith, Ark.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1127).

KTBS—Tri-State Broadcasting System, Inc., Shreveport, La.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1112).

WGCN—F. C. Todd, Gastonia, N. C.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1093).

KID—KID Broadcasting Co., Idaho Falls, Idaho—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1076).

WGBT—Baltimore Broadcasting Corp., Baltimore, Md.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-1060).

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-1075).

WSOY—Commodore Broadcasting, Inc., Decatur, Ill.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1126).

KWXi—Valencia Co., El Centro, Calif.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1129).

WISE—Radio Station WISE, Inc., Asheville, N. C.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1038).

WCR—WCR Broadcasting Co., Baltimore, Md.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-1142).

WORL—Broadcasting Service Organization, Inc., Boston, Mass.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-1075).

WSSY—Commodore Broadcasting, Inc., Decatur, Ill.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1126).

WHIS—Daily Telegraph Printing Co., Bluefield, W. Va.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-1120).

WTAL—Florida Capitol Broadcasters, Inc., Tallahassee, Fla.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1079).

WAZL—Hazleton Broadcasting Service, Inc., Hazleton, Pa.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-931).
WLVA—Lynchburg Broadcasting Corp., Lynchburg, Va.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1070).

KYAK—Carl Latenser, Atchison, Kans.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-1092).

KGGM—KWMX Broadcasting Co., Albuquerque, N. Mex.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1106).

WAUR—University of Illinois, S. of Champaign, Ill.—Granted W9XCB—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted construction permit for new relay broadcast station; 1616, 2090, 2190, 2830 kc., 20 watts (B4-PRY-249).

KAOY—Don Lee Broadcasting System, Portable-Mobile, area of Los Angeles, Calif.—Granted construction permit for new relay broadcast station for change in type of transmitter and extend commencement and completion dates from December 23, 1940, and June 21, 1941, to 60 days after grant and 180 days thereafter, respectively (B5-MPRE-52).

WJRB—WJR, The Goodwill Station, Detroit, Mich.—Granted license to cover construction permit for new high frequency broadcast station to operate on 15675, 15755, 159975, 161925 kc., 100 watts (B2-LRE-348).

WXXB—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted modification of construction permit for new television station for extension of completion date from July 15, 1941, to January 15, 1942 (B4-MPVB-44).

W2XCB—Columbia Broadcasting System, Inc., area of New York City, Portable-Mobile.—Granted modification of construction permit for new television relay broadcast station, for extension of completion date from July 7, 1941, to January 7, 1942 (B1-MPVB-45).

W6XLA—Television Productions, Inc. (area of Los Angeles, Calif.), Portable-Mobile.—Granted modification of construction permit for new television relay broadcast station for approval of transmitter and antenna (B1-PRY-242).

City of New York: Municipal Broadcasting System, Portable-Mobile.—Granted construction permit for new relay broadcast station; 1622, 2058, 2150, 2790 kc., 50 watts (B1-PRY-238).

WCBJ—Lehigh Valley Broadcasting Co., area of Allentown, Pa., Portable-Mobile.—Granted license to cover construction permit for new relay broadcast station; 1622, 2058, 2150, 2790 kc., 3 watts (B2-LRY-226).

WGGG—Northwest Georgia Broadcasting Co., Cedartown, Ga.—Granted modification of construction permit for installation of directional antenna for night use and increase in power, for extension of completion date from July 16 to September 16, 1941; 790 kc., 5 KW, unlimited time, directional antenna night (B3-MP-1333).

KGHL—Northwestern Auto Supply Co., Inc., Billings, Mont.—Granted modification of construction permit for installation of directional antenna for night use and increase in power, for extension of completion date from July 16 to September 16, 1941; 790 kc., 5 KW, unlimited time, directional antenna night (B3-MP-1333).

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Granted modification of construction permit for installation of new transmitter, directional antenna for day and night use, increase in power, move transmitter, for extension of completion date from July 14 to October 14, 1941; 530 kc., 1 KW, 5 KW LS, unlimited time (B5-MP-1333).

KMB—Worcester Broadcasting Corp., San Diego, Calif.—Granted modification of construction permit for new broadcast station, for approval of vertical antenna, transmitter site, studio and transmitter site; 1150 kc., 250 watts, unlimited time (B5-MP-1155).

WBZ—Westinghouse Radio Stations, Inc., Boston, Mass.—Granted license to cover construction permit for new transmitter, directional antenna for day and night use, and move (B1-L-1337). Granted authority to determine operating power by direct measurement of antenna input (B1-Z-663).

WISR—Butler Broadcasting Co., Butler, Pa.—Granted modification of construction permit for new station, for approval of antenna system, studio and transmitter site; 680 kc., 250 watts, daytime (B2-MP-1317).

KFOX—Angelo State University, San Angelo, Tex.—Granted construction permit for installation of new transmitter and vertical radiator and increase in power, for extension of completion date from July 30 to August 31, 1941 (B4-MP-1334).

WOU—The Ohio State University, Columbus, Ohio.—Granted modification of construction permit for new transmitter, change in frequency, increase in power, for installation of new transmitter and extend commencement and completion dates to 30 days after grant and 90 days thereafter, respectively, of transmitter and antenna (B3-MPRE-52).

KECA—Earle C. Anthony, Inc., Los Angeles, Calif.—Granted license to cover construction permit for increase in power and directional antenna for night use; 790 kc., 5 KW, directional antenna night, unlimited (B5-L-1435). Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1073).

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Granted license to cover construction permit as modified to new transmitter, directional antenna for use at night, change hours of operation to unlimited, increase power from 1 KW to 5 KW, directional antenna for day and night use, and transmitter (B1-L-1439). Granted authority to determine operating power by direct measurement of antenna input (B1-Z-1157).

WSVA—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Granted authority to determine operating power by direct measurement of antenna input (B2-Z-971).

W2XLD—General Electric Co., New Scotland, N. Y.—Granted extension of special temporary authority to operate high frequency experimental broadcast station on 43200 kc., 2500 watts, special emission for frequency modulation, with transmitter General Electric, Type G1F1G1A, Exciter 4GF1A1, Amplifier 4AF1A1, maximum rated carrier power output 2500 watts, for period June 29, 1941, to not later than July 29, 1941.

WRR—City of Dallas, Tex.—Granted modification of construction permit with authorization to increase power transmitter, installation of directional antenna for night use, increase in power, and move, for extension of completion date from June 30 to September 30, 1941; 1280 kc., 5 KW, directional antenna night, unlimited (B5-MP-1323).

WPBL—Pensacola Broadcasting Co., Pensacola, Fla.—Granted special temporary authority to operate already licensed Ship Station WFLT aboard the yacht Electrice, owned by Broward Rainwater of Pensacola, Fla., as a relay broadcast station on 1622, 2038, 2150, and 2790 kc. in order to relay broadcast program in connection with the Annual Fishing Rodeo to Station WCOA on July 4 and 5, 1941, only.

WDAY—WDAY, Inc., Fargo, N. D.—Granted special temporary authority to operate with directional antenna for 30 days after grant and 90 days thereafter, respectively, of transmitter and antenna (B3-MPRE-52).

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Upon consideration of request for reconsideration and grant conditioned upon operation with 200 watts power, granted special temporary authority to operate with power of 200 watts from sign-off (July 7:30 p.m., PST) to conclusion Independence Day.
of the Independence Day Celebration of Modesto and Stanislaus County, Calif., on July 3, 4, and 5, 1941, only.

WHKC—United Broadcasting Co., Columbus, Ohio.—Granted special temporary authority, to remain on the air from regular sign-off time (10 p.m., EST) to the conclusion of the Fritzie Zivic-Al Davis fight on July 2, 1941, only, in the event this bout should run later than 10 p.m.

KFXM—Lee Bros. Broadcasting Co., San Bernardino, Calif.—Granted special temporary authority to operate simultaneously with Station KPPC from regular sign-off time (7 p.m., PST) to conclusion of the Fritzie Zivic-Bummy Davis fight on July 2, 1941, only, in the event this bout should run later than 7 p.m.

W49D—John Lord Booth, Detroit, Mich.—Granted extension of License to cover construction permit (B-P-3069) for move of formerly licensed RCA 1-D, 1-KW transmitter for use.

Fairfield Broadcasting Corp., Lancaster, Ohio.—Placed in pending files pursuant to Order No. 79, the application for construction permit for new standard broadcast station to operate on 1150 kc., and a temporary antenna for period July 6 to not later than September 4, 1941, pending completion of construction in accordance with permit.

Chattahoochee Broadcasting Co., Columbus, Ga.—Placed in pending files pursuant to Order No. 79, the application for construction permit for new standard broadcast station to operate on 1150 kc., 250 watts, unlimited time (B3-P-3023).

Fairfield Broadcasting Corp., Lancaster, Ohio.—Placed in pending files pursuant to Order No. 79, application for construction permit for new standard broadcast station to operate on 880 kc., 1 KW, daytime only, exact site subject to approval by Commission (B2-P-2976).

KTBC—State Capital Broadcasting Assn., Inc., Austin, Texas.—Placed in pending files pursuant to Order No. 79, application for consent to transfer of control of State Capital Broadcasting Assn., Inc., licensee of station KTBC, from R. B. Anderson, R. A. Stuart, and A. W. Walker, Jr., to J. M. West, J. Marion West and P. M. Stevenson (B3-TC-207).

APPLICATIONS FILED AT FCC

550 Kilocycles

NEW—Bob Jones College, Inc., Cleveland, Tenn.—Construction permit for a new broadcast station to be operated on 550 kc., 1 KW, daytime.

570 Kilocycles

WSYR—Central New York Broadcasting Corp., Syracuse, N. Y.—Modification of construction permit (B1-P-2706) for installation of new transmitter, changes in directional antenna for day and night use, and increase in power from 1 to 5 KW, requesting changes in directional antenna and extension of completion date to 180 days after grant.

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Modification of construction permit (B2-P-2547) for new transmitter, installation of directional antenna for night use, increase in power, and change in hours, requesting authority to install new transmitter.

590 Kilocycles

KGMB—Hawaiian Broadcasting System, Ltd., Honolulu, T. H.—License to cover construction permit (B-P-3069) for move of formerly licensed RCA 1-D, 1-KW transmitter for use as auxiliary transmitter.

610 Kilocycles

WCKY—L. B. Wilson, Inc., Cincinnati, Ohio.—Construction permit to make changes in directional antenna system, change frequency from 1580 to 1640 kc., and change transmitter site from near Crescent Springs, Ky., to near New Burlington, Ohio, contingent on WHKC's change to 690 kc. and WHKC's change to 610 kc.

620 Kilocycles

NEW—Yankee Broadcasting Co., Inc, New York, N. Y.—Construction permit for a new broadcast station to be operated on 620 kc., 1 KW, unlimited time, directional antenna for day and night use. Amended: re directional antenna, changes in frequency from 620 to 1580 kc.

640 Kilocycles

NEW—Northern Ohio Broadcasting Co., Elyria, Ohio.—Construction permit for a new broadcast station to be operated on 610 kc., 1 KW, limited time (S-KFI), contingent on grant of WHKC's application (B2-P-2833) for change in frequency; facilities of WHKC requested. Amended: to omit request for sharing time with KFI, request facilities of WCLE, and specify studio site.

700 Kilocycles

WLW—The Crosley Corp., Cincinnati, Ohio.—Construction permit to increase power from 50 to 650 KW, make changes in W8XO's transmitter for use by WLW, and install directional antenna for night use.

710 Kilocycles

KIRO—Queen City Broadcasting Co., Seattle, Wash.—License to cover construction permit (B5-P-2437) as modified, for new transmitter, installation of directional antenna for day and night use, increase in power from 1 to 50 KW, and move of transmitter.

KIRO—Queen City Broadcasting Co., Seattle, Wash.—Authority to determine operating power by direct method.

790 Kilocycles

KECA—Earle C. Anthony, Inc., Los Angeles, Calif.—Authority to determine operating power by direct method. (Auxiliary transmitter.)

830 Kilocycles

WCCO—Columbia Broadcasting System, Inc., Minneapolis, Minn.—Authority to install new automatic frequency control equipment.

910 Kilocycles

WMAS—WMAS, Inc., Springfield, Mass.—Construction permit for increase in power from 250 watts to 1 KW, change in frequency from 1150 kc. to 910 kc., install new transmitter and directional antenna for day and night use, and change transmitter site from Springfield to West Springfield, Massachusetts.

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Authority to transfer control of corporation to Sheldon F. Sackett by transferring 5 shares of stock from D. Elwood Caples.

930 Kilocycles

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—License to cover construction permit (B5-P-2848) as modified, for increase in power and installation of directional antenna for night use.

KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Authority to determine operating power by direct method.

980 Kilocycles

WRC—National Broadcasting Co., Inc., Washington, D. C.—License to cover construction permit (B1-P-243) as modified, for increase in power and installation of directional antenna for night use.

1080 Kilocycles

WCBD—WCBD, Inc., Chicago, Ill.—License to cover construction permit (B4-P-2974) as modified, for change in frequency and change in hours of operation.

1110 Kilocycles

KWCO—KWCO, Inc., Chicago, Ill.—Authority to determine operating power by direct method.

1140 Kilocycles

KSOO—Sioux Falls Broadcast Association, Inc., Sioux Falls, S. D.—Construction permit to change power from 5 to 10 KW,
- time from limited to unlimited, change directional antenna, and move transmitter. Amended: To make changes in directional antenna.

1170 Kilocycles
WWWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Authority
NEW—Key Broadcasters, Inc., Wilkes-Barre, Pa.—Construction
1800 Kilocycles
KOZ—Albuquerque Broadcasting Co., Albuquerque, N. M.—
WOL—American Broadcasting Co., Washington, D. C.—Construction
1240 Kilocycles
NEW—Key Broadcasters, Inc., Wilkes-Barre, Pa.—Construction
1260 Kilocycles
WOL—American Broadcasting Co., Washington, D. C.—Construction
1270 Kilocycles
KFJZ—Tarrant Broadcasting Co., Fort Worth, Texas.—Modification of construction permit (B3-P-2497) as modified, for new transmitter and increase in power from 1 to 5 KW, requesting extension of completion date from 7-6-41 to 8-5-41.

1280 Kilocycles
WKST—WKST, Inc., New Castle, Pa.—License to cover construction permit (B2-P-2809) as modified, for installation of directional antenna for night use, increase in hours of operation and power, and change in frequency under NARBA.

1340 Kilocycles
WTAL—Florida Capital Broadcasters, Inc., Tallahassee, Fla.—License to cover construction permit (B3-P-3175) for changes in transmitting equipment.

1360 Kilocycles
KMO—Carl E. Haymond, Tacoma, Wash.—Modification of construction permit (B5-P-2707) as modified, for new transmitter, increase in power from 1 to 5 KW, and change in antenna, requesting extension of completion date from 8-22-41 to 10-22-41.

FM APPLICATIONS
W71SB—South Bend Tribune, South Bend, Ind.—Modification of construction permit (B4-PH-54) for a new high frequency broadcast station, requesting change in transmitter location, antenna system, and transmitter, increase in coverage from 4,300 to 7,900 square miles, and extension of commencement and completion dates from 4-4-41 and 10-4-41 to 60 days after grant and 180 days thereafter, respectively.

NEW—Portland Broadcasting System, Inc., Falmouth, Maine.—Construction permit for a new high frequency broadcast station to be operated on 17100 kc.; coverage: 5,050 square miles; population: 256,466.

W47A—Capitol Broadcasting Co., Inc., New Scotland, N. Y.—Modification of construction permit (B1-PH-23) for a new high frequency broadcast station, requesting extension of completion date from 6-30-41 to 7-31-41.

TELEVISION APPLICATIONS
NEW—Philco Radio and Television Corp., Philadelphia, Pa.—Construction permit for a new commercial television broadcast station (formerly W3XWE) to be operated on Channel #2, 66000-72000 kc., A5 and special emission for frequency modulation, unlimited time.

NEW—General Electric Co., New Scotland, N. Y.—Construction permit for a new commercial television broadcast station (formerly W2XMB) to be operated on Channel #3, 66000-72000 kc., A5 and special emission for frequency modulation, unlimited time.

NEW—National Broadcasting Co., Inc., Washington, D. C.—Construction permit for a new commercial television broadcast station (formerly W3XMB) to be operated on Channel #2, 60000-66000 kc., A5 and special emission for frequency modulation, unlimited time.

W3XWT—Allen B. DuMont Laboratories, Inc., Washington, D. C.—Modification of construction permit (B1-PVB-31) as modified, for a new television station, requesting extension of commencement and completion dates from 1-1-41 and 7-1-41 to 7-1-41 and 1-1-42, respectively.

MISCELLANEOUS APPLICATIONS
NEW—Westinghouse Radio Stations, Inc., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 31220, 35620, 37820, and 39260 kc., power of 2 watts, A3 emission.

NEW—Westinghouse Radio Stations, Inc., Portable-Mobile.—License to cover construction permit (B2-PRE-392) for a new relay broadcast station.

NEW—Westinghouse Radio Stations, Inc., Hull, Mass.—Construction permit for a new developmental broadcast station to be operated on 9570 kc., 700 watts, A0 and A1 emission, limited to WBOS.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS
Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Association of Law Book Publishers—Twenty-eight publishers and distributors of law books and other legal publications are charged, in a complaint, with engaging in a combination to fix, maintain, and increase in the sale of their products, price fixing and other practices. The complaint also charges their trade association, the American Association of Law Book Publishers, Rochester, N. Y., and its officers, with aiding the respondents in carrying out their undertakings. (4526)

Colonnade Advertising Agency—Ferd T. Hopkins, trading as D. Watson & Company and as Colonnade Advertising Agency, 430 Lafayette Street, New York City, is charged in a complaint
with misrepresentation in the sale and distribution of a medicinal preparation advertised as "Dr. J. Lariviere's Vegetable Compound." (4527)

Louis A. Walton Co., 407 South Market Street, Chicago, Kling Bros. & Co., Inc., 333 West Van Buren Street, Chicago, and Leopold Kling and Samuel Kling, individually and as officers of the corporations, are charged in a complaint with misrepresentation in the sale of clothing. The Louis A. Walton Co. is a wholly owned subsidiary of Kling Bros. & Co., Inc., and is operated as a department of that company. (4528)

**CEASE AND DESIST ORDERS**

Commission has issued the following cease and desist orders:

**General Grocer Co.**—St. Louis food wholesaler, has been ordered to cease violations of the brokerage provision of the Robin¬son-Patman Act.

Commission findings are that the respondent corporation, in connection with purchasing its commodity requirements, received and accepted substantial allowances and discounts in lieu of brokerage from the sellers. (4281)

**Hy-Phen Corporation,** Matoska, W. Va., successor to Bradley’s Laboratory, Inc., has been ordered to cease and desist from misrepresentation in the sale of “Hy-Phen,” a medicinal product.

The Commission finds that through advertisements in newspapers, radio continuities and other means, the respondent has represented that the preparation will prevent colds; is a cure or remedy for colds and is a competent and effective treatment for toothache, neuralgia, and other pains and ailments and that it will relieve the pain attendant upon such conditions more quickly and for a longer period of time than any other preparation. (4418)

**Pine Hill Lime & Stone Company**—Nineteen southern producers of lime and Hal S. Covert, of Knoxville, Tenn., their former paid representative, have been ordered to cease and desist from engaging in a combination or conspiracy to maintain a delivered price system for their products.

Commission findings are that the respondents' system of identical delivered prices was based on the use of a number of so-called basing points whereby all delivered prices were calculated as though shipments were made by rail from a single basing point or from points having a common or the same freight rate to the respective destination or destinations. (3591)

J. H. Thorp & Co., Inc., 350 Park Avenue, New York City, has been ordered to cease and desist from certain misrepresentations in the sale of textile fabrics.

The Commission finds that the respondent, which has a branch office and place of business at 10 East 34th St., New York City, and is a seller and distributor of various grades and types of textile fabrics, has represented that certain of its fabrics are “sunfast,” “tubfast,” “fadeless” or “washable” when, in fact, they will change or lose color when exposed to sunlight and otherwise deviate from their original colors or designs when washed or laundered. (4310)

**Wellworth Sales Company**—Orders prohibiting the use of lottery methods in connection with the sale of merchandise to ultimate consumers have been issued against Isidore Halperin and Morris Orenstein, trading as Wellworth Sales Co., New York, and Acme Premium Supply Corporation, St. Louis, distributors of novelty merchandise; H. W. Lyovd & Co., Inc., Atlanta, distributor of food products; and P. D. Meadors and M. M. Meadors, trading as Meadors Manufacturing Co., Greenville, S. C., candy and nut product manufacturers. (3470-4198-4439-4473)

**STIPULATIONS**

During the past week the Commission has entered into the following stipulations:

**Allergy Research Institute, Inc.,** 809 Walnut St., Cincinnati, has entered into a stipulation to cease certain representations in the sale of devices advertised as being effective in the treatment of hay fever, rose fever and seasonal asthma. (3625)

**Derby Knitting Mills, Inc.,** 122 Fifth Ave., New York, manufacturer of men's hosiery, has entered into a stipulation to cease and desist in connection with the sale of certain representations in the sale of its product.

The stipulation recites that the respondent caused labels bearing the words “Genuine English Ribbed” to be affixed to hosiery knit by it in the United States on machines of English style or manufacture, and that the respondent more recently used stencils on the inside prominently displaying the words “Genuine English Ribbed,” followed by the words “Made in U.S.A.”, printed in much smaller letters and less prominent form. (3161)

**Lloyd's**—John M. Lloyd, trading as Lloyd's, Kansas City, Mo., has entered into a stipulation to cease and desist from certain representations in the sale of textile fabrics.

Under his stipulation, the respondent agrees to cease advertising, branding, labeling, invoicing or selling products composed wholly or partly of rayon without clearly disclosing the rayon content by use of the word “Rayon,” and without disclosing in type equally conspicuous as the word “Rayon” each constituent fiber in the order of its predominance by weight when a product consists partly of rayon and partly of other fibers or materials. (3158)

**W. H. Long Company**—W. H. Long, trading as W. H. Long Company, Chicago, engaged in the sale and distribution of office equipment and supplies, including fluorescent lighting fixtures and bulbs, has entered into a stipulation in which he agrees to cease and desist, in connection with the sale and distribution of his products, from representing that the use of “Fluorescent Daylight Lamps” will "Cut Your Electric Bills as much as 85%," that a “15 Watt UNIT will replace any incandescent bulb up to 100 Watts,” or that “a double 18"—"30 Watt UNIT replaces any incandescent bulb up to 200 Watts," and from any other inaccurate, exaggerated or misleading statements tending to confuse or mislead purchasers. (3160)

**Multiprint Company**—Nettie M. Gorov, trading as Multiprint Company, 666 Lake Shore Drive, Chicago, engaged in the production of illustrative pictures for use by manufacturers of and dealers in furniture, machinery and other products, has entered into a stipulation in which she agrees in connection with the advertising, offering for sale, sale or distribution of her products...
in commerce to cease and desist from the use of the word “Photo” or the word “Photograph” as descriptive of reprints of photographs; and from the use of the word “Photo” or the word “Photograph” or of any other words of similar import in referring to her products, the effect of which may tend to convey the belief to purchasers or prospective customers that the products are photographs. (3157)

National Stamping & Electric Works, 3212 West Lake St., Chicago, stipulated that it will cease certain representations in the sale of electrical heating pads.

The respondent agrees that in the sale of electrical heating pads not equipped with three or more adequate thermostatic or other heat controls calibrated for three distinct temperatures, it will cease using the words “three-heat” as descriptive of the pads or the switches used in connection with them. (3162)

Storm Flooring Company, Inc., 2500 Park Avenue, New York City, engaged in the sale and distribution of flooring and related products, has entered into a stipulation with the Federal Trade Commission in which it agrees to cease and desist from the use of the word “Producers” or “Mills” on its stationery or in its advertising or other printed matter as descriptive of its business, and from the use of any representation, statement or depiction in any way so as to imply that it produces or manufactures such products or that it actually owns and operates or directly and absolutely controls a mill, factory or plant in which such products are produced or manufactured. (3159)

FTC CASE DISMISSED

ANPA INTERVenes

On Tuesday, July 15, the American Newspaper Publishers Association filed a motion to have the FCC vacate Orders No. 79 and No. 79-A (the “newspaper hearing” orders) and terminate the proceedings. No action had been taken by the Commission through July 17, with the hearings themselves scheduled to begin next Wednesday, July 23, at 10 a.m.

ANPA contends that the Commission is without power under the Constitution to lay down such a policy.

The FCC announced that the public hearing, scheduled to begin next Wednesday, July 23, in connection with its inquiry into newspaper operation of radio stations, will be held in the auditorium of the National Archives Building, Pennsylvania Avenue at Seventh Street, Northwest, with entrance on Pennsylvania Avenue. Daily sessions will open at 10 A.M. and close at 4:30 P.M.

DEFENSE PROGRAM PRIORITIES

The broadcasting industry is going to give priority to those government programs dealing with the essentials of national defense.

This was the opinion of the NAB National Defense Committee, following the adoption of a “priorities” resolution for the guidance of the industry.

The committee pointed out that governmental agencies had made so many requests for time on the air that many stations were finding it impossible to grant all of them and, at the same time, to preserve a balanced program service. Such a balanced program service was necessary, the committee said, to continue to attract and hold the large listening audiences, without which governmental programs and announcements would be ineffective.

Therefore, the committee recommended that all stations give priority to governmental programs in substantially the following order:

1. Enlistment of man power for both the armed services and national defense industries.
2. Defense financing, such as the sale of Defense Bonds.
4. Activities of government agencies not primarily connected with national defense.

The committee also approved the resolution adopted by the NAB Executive Committee reaffirming “the industry’s desire to continue its present practice of making its facilities available at no cost to governmental agencies engaged in promoting the national defense program.”

Among other aspects of the relationship between radio and the defense program discussed at the committee’s two-day meeting was the development of an adequate supply of radio technicians for both the government and the industry. The committee advised both the War and Navy departments that the industry was ready to do its part in a large-scale training program to help fill any need.

The NAB National Defense Committee was appointed to assist the National Association of Broadcasters in making effective radio’s “all-out-for-defense” resolution adopted at the NAB convention last May in St. Louis:

“...and realigned its program to the extent of its desire and intention to cooperate in every manner possible with the Federal Government in presenting a united front in the defense of our free institutions ...”

John Shepard 3rd, of Boston, Mass., Yankee Network, is committee chairman. Other members are: H. Vernon Anderson, WJBO; Leo. J. Fitzpatrick, WJR; A. J. Fletcher, WRAL; Ben Ludy, WIBW; F. M. Russell, NBC, and Harry Butcher, CBS.

DEFENSE RESOLUTION

Whereas, in accordance with its traditional policy of public service, the radio broadcasting industry is assisting the National Defense Program of our country; and

Whereas a large number of governmental agencies are increasingly requesting time on the stations of the nation to broadcast programs and announcements; and

Whereas so many requests in fact have been made that many stations are finding it impossible to grant all of said requests and at the same time maintain balanced program service to the listening public; and

Whereas the NAB National Defense Committee recognizes that each station desires to carry as many programs and announcements from governmental agencies as possible, consistent with the imperative obligation of each station to maintain well balanced program service that will continue to attract and hold large listening audiences, without which governmental programs and announcements would lose much of their listener attention and effect;

Therefore it appears to be desirable to recommend to the stations a general classification indicating which government programs and announcements should be given priority.

Now Therefore Be It Resolved, that the NAB National Defense Committee recommends to the various stations throughout the country that programs submitted by governmental agencies be given priority substantially in the following order, to wit:

A—Man power:
(1) Enlistment in armed forces—Army, Navy, Marine Corps
(2) Civilian employment in National Defense Agencies
(3) Civilian training for national defense jobs in private industry
(4) Employment or enlistment in government agencies such as Maritime Service

B—Defense Financing

C—Morale

D—Activities of government agencies not primarily connected with National Defense.

It is recognized that broadcast discussions of public questions are essential to the proper functioning of the democratic process.

(Continued on page 610)
DEFENSE RESOLUTION
(Continued from page 609)

Nothing in this recommendation should be construed as modifying in any manner the industry policy as set out in the Code of the NAB to fairly present both sides of controversial subject.

Resolved further, that this resolution be brought to the attention of all governmental agencies which publicize governmental activities and that the NAB Defense Committee cooperate with the various governmental agencies to accomplish the most effective use of radio for National Defense;

Resolved further, that this committee recognizes that authority to accept or reject programs is properly vested in each station licensee and that good judgment will be exercised in the interest of the broadcast and most effective cooperation for the public welfare.

On July 15, the Executive Committee adopted the following resolution:

The executive committee of the NAB, meeting in Washington Monday, issued the following statement in order to clarify the industry's current position on the promotion of defense activities:

"In view of current trade publicity being given to a proposed advertising campaign in behalf of the Navy Department to be placed thru one of the large advertising agencies, the Executive Committee feels that the purchase of time by defense agencies might tend to restrict rather than enhance the most effective utilization of broadcasting during the present emergency.

"Therefore we wish at this time to reaffirm the industry's desire to continue its present practice of making its facilities available without cost to Government agencies engaged in promoting the national defense program.

"To inform the public of the industry's position, it is suggested that an announcement that all Government defense programs being carried without charge be used once each day by all cooperating stations."

MEMBERS OF THE EXECUTIVE COMMITTEE

James D. Shouse, WLW; Paul W. Morencj, WTIC; Don S. Ellis, WWNC; John J. Gillin, Jr., WOW; John Elmer, WCBM; William H. West, WTMV.

BMI NOTES

NEW ARRIVALS

It may be interesting to broadcasters to know that the BMI family has had thirty-two new arrivals since the end of the first BMI year (April 1, 1941) and now totals 663, exclusive of non-commercial stations. They are:

KVSO, Ardmore, Okla.
KLUF, Galveston, Texas
KBIZ, Ottumwa, Iowa

WHOP, Hopkinsville, Ky.
WPAT, Paterson, N. J.
WWDC, Washington, D. C.

WKWK, Wheeling, W. Va.
WSMB, New Orleans, La.
WRLC, Tococa, Ga.
WMUR, Manchester, N. H.
W-55-M, Milwaukee, Wis.
WJMA, Covington, Va.
WHIP—Hammond, Ind.
WABI, Bangor, Maine
KGBS, Harlingen, Texas
WDEC, Chicago, III
KFBB, Great Falls, Mont.
KXNO, Logan, Utah
WAGE, Syracuse, N. Y.

Within a week of the release of ratifications forms for the current blanket license, more than 80 per cent had been signed and returned.

Invitation

Broadcasters and program directors seeking ideas and variety for their new musical programs are cordially invited to write to M. E. Tompkins, BMI's Vice President and General Manager. Mr. Tompkins regards the BMI catalogues as veritable treasure chests of beautiful music and is always interested in solving difficult program problems.

Band and Orchestra Catalogue

New BMI Band and Orchestra Catalogue has been issued, listing the music and arrangements of approximately 2500 compositions copyrighted since the formation of Broadcast Music, Inc. The catalogue is divided into three sections, (1) band music, (2) orchestra music, (3) string orchestra music.

Foreword to the 48-page booklet calls attention to BMI's Sweet Swing Series of familiar classics, arranged in modern manner by Jerry Sears. Fifty-three of these arrangements are offered. BMI cross-cueing is carefully explained and, it is pointed out, BMI is supplying material which can be played by any combination of instruments.

"Instrumentation for the BMI Orchestral Library is uniform", the catalogue explains, "The fundamental sketch for each selection has been prepared with a view to retaining the style of the original work. With the system of cross-cueing, any combination of instruments ranging from string trio to full symphony orchestra will find the selections in the BMI Orchestral Library easy to read and effective in performance."

Listed is the first of the BMI Modern American Classics, Arthur Gutman's "First Suite for String Orchestra". Mr. Gutman, head of BMI's Arranging Department, is known as a writer of modern music and many of his compositions have been performed by leading symphonic groups throughout the country.

ASCAP Attacks

ASCAP has made several vicious and totally uncalled for attacks on BMI recently and has presented a list of questions for BMI to answer. These questions are of the "have you stopped beating your wife" variety and BMI has no intention of answering them. We have read the ASCAP releases and checked on the figures offered in regard to BMI's financial life and find that without exception the figures are inaccurate.

BMI's Gift to Vocalists

By making available new lyrics to familiar tunes, which either have no lyrics or have stilted lyrics, BMI is enriching the repertoires of vocalists. Some 275 such lyrics are wedded to beautiful melodies and provide a useful reservoir for program directors in search of new material. Among the masterpieces which now have words as a result of this phase of BMI's activity are: False Blute, Under the Leaves, Pendant Le Bal, Scarf Dance, Au Printemps, Skater's Waltz, and Le Secret.

Traditional American favorites which have thereby received verses include Turkey In the Straw, and Home On the Range.
which no longer consists of the one lonely public domain verse containing the line, "Where seldom is heard a discouraging word."

The following lyric by Gertrude Forster for Rimsky-Korsakov's Song Of India is attracting attention:

"Within the caverns diamonds lie unnumbered,
Uncounted are the pearls the seas have cover'd,
In that far land, rich India,
Where the sea's ruby ledges show,
Through the sapphire waters' glow,
There 'tis said the sacred bird
O'er the waters oft is heard
Melodies of paradise,
Sweetly from her throat arise,
Wide her plumes outstretched.
On the ocean resting, all remembrance leaving,
Those who hear her singing,
Far India, mystic land of richest treasure.
Uncounted are the gems that lie unmeasured
Within thy realm in earth and sea."

Copyright 1941 by Broadcast Music, Inc.

The chorus of Turkey In the Straw:

"Swing out your partner, don't let 'em go,
Tune up the fiddle, get out the bow,
Don't let up to hit the hay' till tomorrow morning
At the breakin' of the day."

Copyright 1941 by Broadcast Music, Inc.

---

**BMI FEATURE TUNES**

**July 21 - July 28**

1. **I WENT OUT OF MY WAY**
2. **WASN'T IT YOU**
3. **ALL ALONE AND LONELY**
4. **MY SISTER AND I**
5. **BECAUSE OF YOU**
6. **G'BYE NOW**
7. **WITH A TWIST OF THE WRIST**
8. **THE RELUCTANT DRAGON**

In preparation, two great rhythm numbers—Yo Te Amo, an unusual novelty, and Hi, Neighbor.

---

A triumvirate of BMI songs leads the three classifications of Billboard's music popularity chart. The Hat Sat Song tops national sheet music best sellers, Sammy Kaye's Daddy is the country's best selling retail record, My Sister and I is Number One on the automatic phonographs. Just a Little Bit South of North Carolina shows in the first division of every field. Heading those "coming up" in the Record Buying Guide are Things I Love, Green Eyes and Good Bye, Dear, I'll Be Back in a Year. 'Til Revelle, the attractive tune by Bobby Worth and Stanley Cowan, writers of Do I Worry, is rated as Number One possibility.

---

**Rum-Trot**

Writers of a new BMI hit, Yo Te Amo, Oh Baby, introduced by Guy Lombardo on July 14th, had planned a vacation in Mexico to find inspiration for a new rhumba. They became inspired in talking about their proposed trip and decided to write the song first and make the trip later. The result—a combination rhumba and fox trot—and it's headed straight for the Hit Parade.

---

**Question**

Will Have You Changed, new BMI tune, become the song to be played for draftees home on furloughs? First question the song asks is, "Do you still like to walk in the rain?"
Per-Inquiry and Free Time

Shapiro & Schoenbrad Agency, Chicago, is seeking per-inquiry deals for Monarch Cameras. A sticker attached to their letter gives call-letters of leading stations "among the many now successfully merchandising" the product, the implication being that these stations handle the business on a per-inquiry basis, when such is not the case.

Lester A. Loeb Agency, New York, is asking for "a special low rate" on behalf of an unnamed client.

Louise Shane, New York, is seeking free time for Texolite paint.

National vs. Local Rates

As a suggested solution to the problem of when "national" or "local" rates should apply, Charles Caley, WMBD, Peoria, gives his method:

"We refer to our rates as 'general' and 'retail.' We absolutely do not permit anyone to call our rates 'national' and 'local.' Then we use a 'retail' rate definition as follows:

"Retail rates apply to the advertising of any strictly bonafide goods or services direct to the customer at outlets owned by themselves.

"This has enabled us to put dairies, bakeries and all sorts of advertising such as that on the 'general' rate without any trouble at all. Our ruling is that if one retail store wants to advertise such as that on the 'general' rate without any trouble themselves.'

The need for standards (NAB Reports, p. 522) was explained as a suggested solution to the problem of when "national" or "local" rates should apply. Charles Caley, WMBD, Peoria, gives his method:

"We refer to our rates as 'general' and 'retail.' We absolutely do not permit anyone to call our rates 'national' and 'local.' Then we use a 'retail' rate definition as follows:

"Retail rates apply to the advertising of any strictly bonafide retailers with permanent business or office located in Peoria, selling at retail exclusively, paid entirely by themselves, and offering goods or services direct to the consumer at outlets owned by themselves.

"This has enabled us to put dairies, bakeries and all sorts of advertising such as that on the 'general' rate without any trouble at all. Our ruling is that if one retail store wants to advertise such as that on the 'general' rate without any trouble themselves.'

The place of NAB in formulating standards was discussed and it was pointed out that NAB desired to function as a co-ordinating body in carrying out the work. It was felt by NAB that the best results could be obtained by having the broadcasters tell the committee what they wanted and then leave it up to the committee as to how the desired result could be accomplished.

A five point plan for proceeding was then suggested and adopted.

1. Appoint a permanent chairman.
2. Discuss the suggested "Purposes and Rules of Procedure."
3. Appoint an executive committee to act as a co-ordinating body in carrying out the work.
4. Collect data on present recording and reproducing systems characteristics.
5. Instruct the executive committee to analyze the data and make a recommendation to the main committee as to how the work should be carried on from there.

Following this outline, the Director of Engineering was appointed permanent Chairman of the Committee. After discussion and revision, the following "Purposes and Rules of Procedure" were adopted by the committee:

1. The task of the committee is to formulate "Recording and Reproducing Standards" that will tend to bring about uniform quality of reproduction of transcriptions with a minimum number of equipment adjustments on the reproducing system.
2. All companies interested in the manufacturing of disc recordings, the manufacture of disc recording equipment, the manufacture of disc reproducing equipment, the use of disc recordings, and others properly interested in the subject are entitled to membership on the committee.
3. No company shall have more than one vote in any of the proceedings of the committee and this shall be cast by the regularly designated representative of that company. In the absence of the regularly designated member, a duly authorized alternate may participate and vote for the regular member.
4. Technical advisors to members of the committee may participate fully in meeting discussions; however, they will have no vote in the proceedings.
5. No individual broadcasters will be entitled to a vote in the proceedings of the committee. The broadcasters as a whole will be entitled to representation through three members duly appointed by Neville Miller, President of the National Association of Broadcasters.
6. The chairman of the committee is not entitled to vote except in case of a tie.
7. It is clearly understood that participation in the work of the committee does not bind any individual or company to the formulated recommended standards.

The committee decided that a sub-committee should be appointed for the purpose of formulating and analyzing a questionnaire to be sent to manufacturers in order to obtain data on present recording practices. The following were appointed to the sub-committee: Howard A. Chinn, CBS; C. Lauda, Jr., World; Robert Morris, NBC, Chairman; E. T. Mottram, Bell Telephone Labs; I. P. Rodman, Columbia Recording.

A list of twenty-four items to be covered in the questionnaire was then formulated by the committee.

It was decided to hold the next meeting of the main committee coincidental with the Fall meeting of the Acoustical Society of America in New York City, October 24, 25.

Attendance list:

APPENDIX

NAB RECORDING QUESTIONNAIRE

TABULATION OF RESULTS

<table>
<thead>
<tr>
<th>Number of stations reporting</th>
<th>182</th>
</tr>
</thead>
</table>

(Number is total for all stations)

REPRODUCERS

How many hours per week are lateral transcriptions used? 4096.99
How many hours per week are vertical transcriptions used? 1512.16
How many hours per week are phonograph records used? 1478.16
Assuming an average of 18 hours of broadcasting per day the 182 stations broadcast 22,932 hours per week. The total number of hours per week transcriptions or records are used is 7087.37, therefore 30.9% of broadcasting is from records or transcriptions. Of this time 57.8% is by lateral transcriptions, 21.3% by vertical transcription and 20.9% by phonograph records.

Indicate your preference for vertical or lateral recording?

<table>
<thead>
<tr>
<th>In favor of</th>
<th>Number</th>
<th>Per cent</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vertical</td>
<td>76</td>
<td>41.7</td>
</tr>
<tr>
<td>Lateral</td>
<td>67</td>
<td>36.8</td>
</tr>
<tr>
<td>No Preference</td>
<td>23</td>
<td>12.6</td>
</tr>
<tr>
<td>No Answer</td>
<td>16</td>
<td>8.9</td>
</tr>
</tbody>
</table>

Total 182 100.0%
The reason given for preferring lateral recording in some cases was that the station had only lateral equipment. Some answered that a wider selection of records is available on laterals.

**RECORDING**

How many hours per week are recorded? 695.25

This is an average per station per week of 3.82 hours.

146 or 80.2% of the stations indicated that they have recording equipment.

What is your attitude or pre-emphasis?

<table>
<thead>
<tr>
<th>In favor</th>
<th>Number</th>
<th>Per Cent</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
<td>106</td>
<td>58.35%</td>
</tr>
<tr>
<td>No</td>
<td>8</td>
<td>4.4</td>
</tr>
<tr>
<td>Undecided</td>
<td>10</td>
<td>5.5</td>
</tr>
<tr>
<td>No Answer</td>
<td>58</td>
<td>31.8</td>
</tr>
</tbody>
</table>

Total 182 100.0%

Many of the “yes” answers were qualified by the statement that the person was in favor of pre-emphasis if it was standardized.

The recording questionnaire was formulated by a sub-committee of the NAB Engineering Committee composed of Paul Loyet WHO, Morris Pierce WGAR and Robert Morris NBC.

---

**National Defense**

**"ARMS FOR THE LOVE OF AMERICA"**

In answer to inquiry, the Radio Branch of the War Department Bureau of Public Relations says:

“The Irving Berlin song, Arms for the Love of America, official song for the Ordnance Department of the United States Army, may be broadcast by any radio station in the country without special permission.

“All rights to the song were given by Mr. Berlin to the Army Ordnance Association, which not only grants blanket permission for its radio rendition, but hopes to have it broadcast frequently.”

**ARMY MANEUVERS**

One of the big news events of the year will be the Army Maneuvers in Louisiana, September 1-30, involving the Second and Third Armies, comprising some 500,000 troops. These will be the biggest maneuvers, not only in American peacetime, but in all military history.

The Radio Branch of the War Department Bureau of Public Relations (Ed Kirley, chief), is charged with accrediting any individual stations which may desire to cover the maneuvers, or any part thereof, with their own crews and equipment. Last date for making application is August 7.

Because of the limited facilities for correspondents of all media, the War Department is attempting to learn in advance just what will be the requirements for radio coverage.

These limited facilities include not only the available telephone circuits in the maneuver area, but also the housing and personnel facilities of the two Armies. The correspondents, press as well as radio, will be accredited to either the Second or Third Army, not both. They can cover from only one side of the war, just as in the case of actual wars. And just as in the case of real wars, there will be much detail involved in handling correspondence for press and radio, details which must be worked out in advance.

Stations are advised that August 7 is deadline for contacting the Special Events Division, Radio Branch, Bureau of Public Relations, War Department, as to intent of covering the Louisiana maneuvers with individual crews and equipment.

“Who gets the money for the scrap aluminum donated by the citizenry?” is one question many stations have asked. The answer is the United States Treasury.

In order to bring the President’s Fourth of July speech to Muncie and eastern Indiana, D. A. Burton, owner of WLBC, paid for a wire from Indianapolis. Mr. Burton made arrangements to halt the local baseball game promptly at four o’clock and the speech was fed over the PA system in the ball park and to a second location where a huge Fourth of July program was in progress.

Arden X. Pangborn, managing director, KGW-KEX, released the President’s Fourth of July address to eight movies in Portland and two in Vancouver, Washington. These theaters are a part of the Harriwick-Evergreen chain.

Because Cleveland has been turned into a city with a twenty-four hour work day, WGAR is asking listeners to avoid making unnecessary noises. Carl George, program director, said that part of the campaign also relates to keeping radio volume down at all times. Twenty-four hour working days, he explained, means that people are sleeping at all times of the day and night.

“Keep ’em Flying” is now incorporated in the nightly sign-off at WGAR, Cleveland.

The same practice is also followed at WJSV, Washington.

Jersey Central Power & Light Company, which maintains a daily broadcast schedule over WCAP, Asbury Park, N. J. devotes a part of each program to the various recruiting and manpower announcements distributed through NAB. B. A. Sciple, vice president in charge of sales, ordered the inclusion of the announcements because of the Company’s desire to participate additionally in the National Defense effort.

**Paul B. Klugh**

Paul B. Klugh, who served as Executive Chairman of the National Association of Broadcasters from May 21, 1923 to the September, 1927 Convention, died suddenly this week during a visit to Yellowstone Park.

His years in the active direction of the Association covered the administration of the first president, Comdr. Eugene F. McDonald, Jr., president, Zenith Radio Corp., 1923-1925; Frank W. Elliott, WHO, 1925-1926, and most of the term of Earle C. Anthony, KFL, 1926-1928.

After Mr. Klugh’s retirement as Vice President and General Manager of the Zenith Radio Corp., some years ago, he moved to Summit, N. J., where he resided up to the time of his death.

**WKRC STRIKE SETTLED**

The AFRA strike at Station WKRC, Cincinnati, was settled this week. The four strikers were reinstated; a qualified union shop agreed to; coverage of the contract and wage scales still in dispute were submitted to mediation. William H. Davis, chairman of the Defense Mediation Board, appointed Lillian Poses of New York as mediator. At the same time, MBS announced it had made an agreement with AFRA that the union would strike no network shows because of a dispute with an affiliate if the affiliate would agree to submit all issues to arbitration. AFRA announced it would propose the same agreement to NBC and CBS. AFRA had threatened to strike the agency-built commercials led by MBS to WKRC.

**PEABODY AWARDS**

From far away Bangkok, Thailand, an entry has been received for the 1941 George Foster Peabody Radio Awards, administered by the Henry W. Grady School of Journalism, The University of Georgia, and National Association of Broadcasters.

Dean John E. Drewry is just in receipt of a letter mailed last May 16—almost two months in transit—from one who heard the
1940 winners announced in a CBS broadcast last March. Signing himself “an appreciative listener,” Allen Bassett suggests a possible 1941 winner.

The letter had been opened and re-sealed by censors en route from Thailand (Siam) to this country.

FEDERAL COMMUNICATIONS COMMISSION

NEW NETWORK RULES

James Lawrence Fly, FCC chairman, told newspapermen this week that he was holding a series of conferences with network officials about the new network rules.

Mr. Fly told the newspapermen that he had now had at least preliminary conferences with the head of all of the networks. He reported that progress was being made. Agreeable and constructive talks had resulted from the conversations, he said, and he stated he liked to think that progress was being made in this direction. He said that it was too early to make any further comment at this time. The talks will be continued.

Asked if the question of the postponement of the sale of the Blue network had come up the chairman said he had heard of no formal move in that regard. However, he stated, Blue network was an important subject in the conversations with NBC.

Chairman Fly stressed at the conference what he had already said that whatever time was needed to properly and reasonably permit such sale would be allowed by the Commission and he stated that he never assumed that the network would be disposed of under pressure. If good faith was shown, he said, an orderly procedure would be allowed.

The chairman told the newspapermen that everything was moving toward compliance and adjustment with the new rules and he expressed the opinion that the particular date was not of controlling importance. He denied that the Commission might reconsider its regulations. He stated that no application had been received by the Commission for a time extension for the new regulations becoming effective. The date is August 2 and that deadline still holds up to this time. However he stated that the Commission on its own motion would not postpone the effective date of the regulations.

Mr. Fly further stated that he expected compliance with the principle of the rules and there would be no abandonment of the principles and no indefinite postponement of the effective date. There might be some modification of the new regulations, he said, but the major principles were to be preserved. He said that he was very optimistic that things will work out to the satisfaction of all concerned.

Mr. Fly said at the conference that he knows of no application asking for a postponement of the newspaper conference now set for July 23. He said that he thought the conference would last “a number of days.”

Educational Station

The University of Illinois was granted a construction permit for a new noncommercial educational broadcast station which will supplement the educational services of that nonprofit State institution. The proposed station will operate with FM (frequency modulation) on 42900 kilocycles, using power of 200 watts.

The university, which is at Urbana, Ill., intends to utilize the antenna of its present standard broadcast station, WILL, located south of Champaign, Ill., for the new service. Its noncommercial educational service will provide supervisory and administrative instruction as well as supplementary educational programs for the Champaign and Urbana elementary and secondary public schools, supplement teaching in the rural schools of Champaign County, and augment the educational services of the University High School in the College of Education. Programs will be determined by the Dean of the College of Education in cooperation with the supervising head of the unit to which the particular program is directed but, in general, will embrace history, civics, economics, literature, music, and speech.

Commercial FM for California

Construction permits for commercial FM (frequency modulation) stations in California areas were authorized by the FCC. Metro-Goldwyn-Mayer Studios, Inc., proposes to locate a station in the Santa Monica Mountains to cover the Los Angeles metropolitan district and adjacent basic trading areas of Los Angeles, Orange, and Ventura counties, as well as the western portion of Riverside County. More than 2,500,000 persons reside in this 7,000-mile service area. Pending approval of the antenna site by the Civil Aeronautics Administration, the applicant can arrange to use the frequency 46100 kilocycles.

Columbia Broadcasting System, Inc., of Hollywood, was granted a Class C station construction permit, for extended urban and rural service from an antenna planned atop Mount Wilson, Pasadena, subject to certain engineering and legal requirements. It is authorized to use the frequency 43100 kilocycles for this purpose.

Commercial Television Grant

The Albany-Schenectady-Troy area was brought a step nearer commercial television service when the FCC granted a construction permit to the General Electric Company for such a station to operate on Television Channel No. 3 (66000-72000 kilocycles) to serve 3,320 square miles with some 572,000 residents.

The applicant proposes to remodel its present experimental television station, W2XB, in the Helderberg Hills, New Scotland, N. Y., for commercial purposes by September 1. Incidental experimentation with color television is contemplated.

From the FCC Mail Bag

A New York radio listener has written the FCC on several occasions objecting to the use of the term “and thirty” at the conclusion of broadcasts by a certain news commentator.

The Commission does not have authority to order discontinuance of the use of the term. However, it might be explained that “thirty” is a term traditionally used by telegraphers. It means “that is all,” “the end,” or, in this particular case, “goodnight.” It is said to have originated in the following manner: In the early days of news reporting, Washington correspondents wrote by long hand, and their copy was transmitted by telegraph. Operators at the receiving end had to make as many as a dozen copies of each dispatch. To mark the end of an item they adopted the symbols “XXX.” Since three X’s constitute the Roman numerals for “30,” this practice was not only popularized by telegraphers but by copy desk men as well. By the same token, the following numerals have special significance to old-time telegraphers: “4” (where?); “8” (wait); “13” (understand); “19” (railroad order); “31” (other order); “73” (best regards), and “22” (kisses).

Because the Commission is without power to censor radio programs, it cannot compel a Long Island man’s request that all radio stations be “instructed” to broadcast the National Anthem at local sunset.

A New York firm that war commentators are referred to a Government committee prior to transmission by radio.

Satisfy a Niagara Falls speech-stickler that radio announcers be compelled to use correct pronunciation.

Please a Ypsilanti woman by obligating all broadcast stations to rebroadcast her favorite newscomment.

A Pennsylvania lawyer is told that the Commission is not empowered to settle contractual differences between station licensees and other persons and, therefore, it cannot undertake to press an individual claim against a station.

The Commission has to frequently inform inquirers that it is not in a position to recommend the services of a particular attorney or an engineer in connection with prospective applications for broadcast facilities.

Or to recommend radio schools or courses.

614 — July 18, 1941
FEDERAL COMMUNICATIONS
COMMISSION DOCKET

Following broadcast hearings are scheduled to be held before the Commission during the week beginning Monday, July 21. They are subject to change.

Wednesday, July 23
Hearing Before the Commission
To Be Held in the Auditorium of the National Archives Building, 7th Street and Pennsylvania Avenue, N. W.

Investigation to determine what policy or rules, if any, should be promulgated in connection with operation of new high frequency (FM) broadcast stations and for future acquisition of standard broadcast stations by newspapers, Pursuant to Order No. 79.

Wednesday, July 23
NEW—West Allis Broadcasting Company, West Allis, Wis.—C. P., 1450 kc., (1480 NARBA), 250 watts, daytime.

Thursday, July 24

Friday, July 25
Consolidated Hearing
WMC—City of Camden, Camden, N. J.—Renewal of license, 1310 kc., 500 watts, S-WTNJ and WCAP.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Renewal of license, 1310 kc., 500 watts, S-WTNJ and WCAP.

WTNJ—WOAX, Incorporated, Trenton, N. J.—Renewal of license, 1310 kc., 500 watts, S-WCAM and WCAP.

WTNJ—WOAX, Incorporated, Trenton N. J.—Modification of license, 1230 kc., 1 KW, unlimited, DA-day and night. Present assignment: 1310 kc., 500 watts, S-WCAP. WCAP and WCAP.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—C. P., 1300 kc., 1 KW, unlimited, DA-night, unlimited time (1480 kc. under NARBZ 8). Present Assignment: 1330 kc., 250 watts, unlimited, under C. P.

WBEZ—Chicago Educational Radio, Inc., Chicago, Ill.—Modification of license, 940 kc., 250 watts, unlimited, under C. P.

债权

KORN—Clark Standiford (Transferee) and C. J. Malmsten, A. C. Sidner, S. S. Sidner & Arthur Baldwin (Transferees), Fremont, Neb.—Transfer of control. 1400 kc., 250 watts, unlimited.

NEW—Texas Star Broadcasting Company, Houston, Tex.—C. P., 1230 kc., 250 watts, unlimited.

NEW—Greater Houston Broadcasting Co., Inc., Houston, Tex.—C. P., 1230 kc., 250 watts, unlimited.

September 19

FEDERAL COMMUNICATIONS
COMMISSION ACTION

APPLICATIONS GRANTED

Southwest Broadcasters, Inc., Las Vegas, New Mexico.—Granted construction permit for new station to operate on 1230 kc., 250 watts, unlimited time (B5-P-3147).

J. Q. Floyd, John Thomas Franklin, & Sam Wesley Anderson, d/b a as The Helena Broadcasting Co., Helena, Ark.—Grant of construction permit for new station to operate on 1330 kc., 250 watts, unlimited time (B3-P-3164).

General Electric Co., Schenectady, N. Y.—Grant of construction permit for new commercial television station to operate on Television Channel No. 4 (6950-72900 kc) to serve 3,320 square miles, with 572,000 residents (B1-PCT-5).

University of Illinois, Urbana, III.—Grant of construction permit for new non-commercial educational station to serve 3,320 square miles, with 572,000 residents.
operate on 132900 kc., 250 watts, unlimited time, special emission for frequency modulation (B4-PED-21).

Metro-Goldwyn-Mayer Studios, Inc., Los Angeles, Calif.—Granted construction permit for new high frequency (FM) broadcast station to operate on 16110 kc. with a coverage of 7.000 square miles (B5-PH-90).

Columbia Broadcasting System, Inc., Hollywood, Calif.—Granted construction permit for new high frequency (FM) broadcast station to operate on 131100 kc; granted subject to certain engineering and legal requirements. (For Class C operation (B5-PH-94).

WCKY—L. B. Wilson, Inc., Cincinnati, Ohio.—Granted construction permit to change frequency from 1490 kc. to 610 kc., increase day and night power from 250 watts to 1 kw, and install directional antenna for night use, and move transmitter to Front St. and 63rd Ave., West Duluth, Minn. (B4-P-3139).

KDAL—Red River Broadcasting Co., Inc., Duluth, Minn.—Granted construction permit to change frequency from 132900 kc. to 610 kc., increase day and night power from 250 watts to 1 kw, and install directional antenna for night use, and move transmitter to Front St. and 63rd Ave., West Duluth, Minn. (B4-P-3139).

KDA—Arkansas Broadcasting Co., Little Rock, Ark.—Granted construction permit to change frequency from 1120 kc. to 1010 kc., install new transmitter, to operate with 5 kw power subject to directional antenna in compliance with NARB (B5-P-3049).

KFGC—Cherokee Broadcasting Co., Greeneville, Tenn.—Granted construction permit to install new transmitter, erect a vertical antenna, increase power and hours of operation from 100 watts daytime only, to 250 watts day and night; change frequency from 1150 kc. to 1250 kc.; unlimited time (B5-P-3144).

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Granted construction permit to increase power from 500 watts night, 1 kw day, to 1 kw night and day, and install directional antenna for day and night use, granted with condition with respect to blanket area and without prejudice to any action by the Commission regarding duplicate ownership (B5-P-3100).

WFB—Greenville News-Piedmont Co., Greenville, S. C.—Granted modification of construction permit to make changes in directional antenna system and extend commencement and completion dates to 30 days after grant and 120 days thereafter, respectively (B3-MP-1129).

WGTM—WGTM, Inc., Wilson, N. C.—Granted construction permit to move studio and transmitter to U. S. Highway 301, 1.3 miles north of Courthouse, Wilson, N. C.; 1330 kc., 250 watts; unlimited time (B3-P-3160).

KBKR—Louis P. Thornton (assignor) Baker Broadcasting Co., (assignee) Baker, Ore.—Granted consent to voluntary assignment of license of Station KBKR to Louise P. Thornton to Baker Broadcasting Co., for a total consideration of $12,000 (B5-AL-313).

WSDX—Don Lee Broadcasting System, San Francisco, Calif.—Granted construction permit for television broadcast station to operate on Television Channel No. 1 (36000 kc.) on an experimental basis only, conditionally, with completion date October 30, 1941 (B5-MPV-48).

WXBT—National Broadcasting Co., Inc., New York City (Television station)—Granted special authorization to reduce hours of program operation from 15 to 10 hours a week from July 16 to August 31, 1941, to enable licensee to overcome equipment for improved service when regular schedule is resumed, Commission stressed that this is a particular instance and should not be regarded as a precedent.

WRCA-WNBI—National Broadcasting Co., Inc., New York City.—Granted authority to transmit program from international broadcast stations WRCA and WNBI for rebroadcast by Station CMO, Havana, Cuba (B1-FP-88).

DESIGNATED FOR HEARING

George Johnston, Jr., Birmingham, Ala.—Application for construction permit for new standard broadcast station to operate on 1330 kc., 250 watts, unlimited time (requests facilities of WSGN) (B3-P-3179). To be heard jointly with applications of WBAM, Inc. (B3-P-3182), and Jefferson Broadcasting Corp. (B3-P-3162), which request identical assignment.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Application for modification of license to change hours of operation to share with WCAM (requests facilities of WNSY) (B3-ML-1074).

WCAM—The City of Camden, N. J., Camden, N. J.—Application for modification of license to change hours of operation to shares WCAP (requests facilities of WTNJ) (B1-ML-1069).

Roy S. Lewis, Norfolk, Va.—Application for construction permit for new standard broadcast station to operate on 1230 kc., 250 watts, unlimited time (B2-P-3101). To be heard with application of Colonial Broadcasting Corp, requesting the same facilities (B2-P-3039).

SPECIAL SERVICE AUTHORIZATIONS

The Commission authorized issuance of special service authorizations, each such authority to expire simultaneously with the regular license of the station affected, subject to the express condition that it may be terminated by the Commission at any time without advance notice or hearing, if in its discretion the need for such action arises. The Commission directed that, upon the issuance of such special service authorizations, the outstanding special experimental authorizations of said station licenses be cancelled:

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—To operate on 1290 kc., 10 kw, unlimited; operate synchronously with KBBM from local sunset to midnight.

KTHS—Hot Springs Chamber of Commerce, Hot Springs National Park, Ark.—To operate on 1090 kc., 1 kw night, 10 kw local sunset, simultaneously with WBAL.

KVOO—Southwestern Sales Corp., Tulsa, Okla.—To operate on 1170 kc., 5 kw night, 25 kw LS, unlimited, using directional antenna.

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—To operate on 1170 kc., 1 kw night, 5 kw LS, unlimited time, using directional antenna after sunset at Tulsa.

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—To operate on 1090 kc. and 1270 kc., 10 kw, operate simultaneously with KTHS on 1090 kc., sunrise at Baltimore to local sunset at Hot Springs; operate alone local sunset Hot Springs to 9 p.m. EST, and synchronously with WJZ on 1770 kc. from 9 p.m. EST, using 25 kw and directional antenna.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—To operate on 780 kc., 50 kw, synchronously with KFBF from local sunset at Lincoln, Nebr., to 12 midnight CST.

WAFM—Minnesota Broadcasting Corp., Minneapolis, Minn.—Granted special temporary authority to operate a composite 150 watt transmitter, formerly licensed at W9XTC, as relay broadcast station on 1606, 2071, 2102, and 2578 kc. for the purpose of the transmission of orders pertaining to the relay-broadcasting of programs concerning the Minneapolis Aquatennial for a period not later than July 20, 1941.

KTRH—KTRH Broadcasting Co., Houston, Tex.—Granted modification of construction permit for approval of directional antenna system, and install new transmitter.

WSGN—The Birmingham News Co., Birmingham, Ala.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1115).

KTEM—Bell Broadcasting Co., Temple, Tex.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1145).

KNET—Bonner Frizzell.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-906).

KFJ—University of North Dakota, Grand Forks, N. D.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-928).

KSAM—Sam Houston Broadcasting Assn., Huntsville, Tex.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1104).

KXNO—Sweetwater Radio, Inc., Sweetwater, Tex.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1144).

MISCELLANEOUS
APPLICATIONS FILED AT FCC

580 Kilocycles

WCHS—Charleston Broadcasting Co., Charleston, W. Va.—Authority to install automatic frequency control equipment.

650 Kilocycles

640 Kilocycles

WOKO—WOKO, Inc., Albany, N. Y.—Construction permit for new transmitter and directional antenna for day and night use, change in frequency from 1160 to 640 kc., increase in power from 500 watts and 1 KW to 5 KW, and move transmitter from Albany to Couse Corners, New York.

580 Kilocycles

WLAW—Hildreth & Rogers Co., Lawrence, Mass.—Construction permit to increase power from 5 to 50 kw, install new transmitter, make changes in directional antenna for day and night use, and move transmitter from Andover to Burlington, Massachusetts. Amended re directional antenna and height of towers.

700 Kilocycles

WLW—The Crosley Corporation, Cincinnati, Ohio.—Authority to determine operating power by direct method.
760 Kilocycles

KGU—Marion A. Mulroney & Advertiser Publishing Co., Ltd., Honolulu, Hawaii.—Authority to determine operating power by direct method.

790 Kilocycles

KVOS—KVOS, Incorporated, Bellingham, Wash.—Construction permit to install new transmitter (KIRO's old transmitter), install directional antenna for night use, change frequency from 1230 to 790 kc., increase power from 250 watts to 1 KW, and move transmitter.

850 Kilocycles

WRUF—University of Florida, Gainesville, Fla.—Construction permit for increase in hours of operation from limited to unlimited and installation of directional antenna for night use.

1050 Kilocycles

WHN—Marcus Loew Booking Agency, New York, N. Y.—Construction permit to make changes in auxiliary transmitter and move same to site of new main transmitter.

1190 Kilocycles

KEX—Oregonian Publishing Co., Portland, Oregon.—Construction permit to install new transmitter, install directional antenna for day and night use, change frequency from 1380 to 1190 kilocycles under NARBA, increase power from 0 to 50 kilowatts, change hours of operation from Simultaneous-KOB day and Shares-KOB night, to unlimited, and move transmitter from North Portland to near Clackamas, Oregon. Amended: re directional antenna system.

1220 Kilocycles

WGNY—WGNY Broadcasting Co., Inc., Newburgh, N. Y.—Modification of construction permit (B1-P-2948) to install new transmitter, increase power, and change frequency, requesting authority to install automatic frequency control equipment and modulation monitor.

1230 Kilocycles

NEW—Southwest Broadcasting Corp., Pulaski, Va.—Construction permit for a new broadcast station to be operated on 1230 kc., 250 watts, unlimited time.

1240 Kilocycles

WFTM—Fort Myers Broadcasting Co., Fort Myers, Fla.—Construction permit to install new transmitter and move transmitter and studio.

1280 Kilocycles

KDON—Monterey Peninsula Broadcasting Co., Monterey, Calif.—Construction permit for increase in power to 250 watts and installation of new transmitter.

1310 Kilocycles

KFXJ—R. G. Howell & Charles Howell, d/b as Western Slope Broadcasting Co., Grand Junction, Colo.—Construction permit to increase power from 250 watts to 500 watts night, and 1 KW day, change frequency from 1230 kc. to 1290 kc., make changes in antenna, and install new equipment.

1320 Kilocycles

WIBA—Badger Broadcasting Co., Madison, Wisc.—Modification of construction permit (14-P-2689) as modified, for new transmitter, change in directional antenna for night use, increase in power from 1 KW night, 3 KW day, to 5 KW, and change transmitter and studio site, requesting change in frequency from 1290 kc. to 1310 kc. under NARBA, and changes in directional antenna accordingly.

1340 Kilocycles

KPDN—R. C. Holles, Pampa, Texas.—Authority to determine operating power by direct method.

1400 Kilocycles

WINC—Richard Field Lewis, Jr., Winchester, Va.—License to cover construction permit (B2-P-3005) for a new broadcast station.

WINC—Richard Field Lewis, Jr., Winchester, Va.—Authority to determine operating power by direct method.

WNBC—State Broadcasting Corp., New Britain, Conn.—Modification of construction permit (B1-P-2723) as modified, requesting changes in directional antenna. H10 kc., under NARBA, increase in power from 1 KW night and 5 KW day to 5 KW (directional antenna day and night), and extension of commencement and completion dates to 30 days after date of grant and 180 days thereafter respectively. Amended: To change directional antenna.

1430 Kilocycles

KTRN—Michael J. Minco, Tacoma, Wash.—Modification of construction permit (B5-P-1979) for a new broadcast station, requesting 1 KW power on 1380 kc., unlimited time, approval of new transmitter, and approval of directional antenna system for day and night use.

1450 Kilocycles

KNET—Bonner Frizzell, Palestine, Texas.—Voluntary assignment of license from Bonner Frizzell to Palestine Broadcasting Corp.

1460 Kilocycles

KIXY—Edwin A. Kraft, Juneau, Alaska.—Authority to determine operating power by direct method.

1470 Kilocycles

WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C.—License to cover construction permit (B3-MP-918) as modified, for increase in power and installation of directional antenna for night use.

WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C.—Authority to determine operating power by direct method.

1480 Kilocycles

KGCX—E. E. Kreisbach, Wolf Point, Mont.—Modification of license to move studio.

1490 Kilocycles

WMOG—Coastal Broadcasting Co., Brunswick, Ga.—Authority to determine operating power by direct method.

1520 Kilocycles

WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Modification of construction permit (B1-P-2962) for new transmitter, installation of directional antenna, increase in power, and move of transmitter, requesting extension of completion date from 8-17-41 to 10-17-41.

WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Modification of construction permit (B1-P-2902) for new transmitter, installation of directional antenna, increase in power, and move of transmitter, requesting changes in directional antenna and change in frequency from 1480 kc. to 1520 kc. under NARBA.

FM APPLICATIONS

NEW—The Radio Voice of New Hampshire, Inc., Manchester, N. H.—Construction voice for a new high frequency broadcast station to be operated on 43500 kc.; coverage, 19,622 square miles; population, 4,099,385. Amended: To increase coverage to 20,290 square miles, change population to 4,260,280, and make change in antenna system.

NEW—The Pulitzer Publishing Co., St. Louis, Mo.—Construction for a new high frequency broadcast station to be operated on 43500 kc.; coverage, 6,564 square miles; population, 1,531,182. Amended: To change frequency to 45300 kc.; coverage, 11,301 square miles; population, 1,797,700; make changes in antenna system and change type of transmitter.
NEW—Frontier Broadcasting Co., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 30820, 33740, 35820, and 37980 kc., power of 2 watts, A3 emission.

NEW—Mutual Broadcasting System, Inc., Chicago, Ill.—Extension of construction permit (B1-PVB-31) as modified, for a new television station, requesting change of transmitter location, change in type of visual and aural transmitters, and extension of commencement and completion dates from 7-1-41 to 1-1-42, respectively.

NEW—World Wide Broadcasting Corp., Boston, Mass.—Modification of construction permit (Bl-PVB-31) as modified, for a new television station, requesting change of transmitter location, change in type of visual and aural transmitters, and extension of commencement and completion dates from 7-1-41 to 1-1-42 to 30 days after grant and 180 days thereafter, respectively.

MISCELLANEOUS APPLICATIONS

NEW—Frontier Broadcasting Co., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 30820, 33740, 35820, and 37980 kc., power of 2 watts, A3 emission.

NEW—Frontier Broadcasting Co., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 30820, 33740, 35820, and 37980 kc., power of 2 watts, A3 emission.

KRMG—Merced Broadcasting Co., Portable-Mobile.—License to cover construction permit (B3-PRY-245) for a new relay broadcast station.

NEW—Portland Broadcasting System, Inc., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 1622, 2058, 2150, and 2750 kc., power of 100 watts, A3 emission.

NEW—Portland Broadcasting System, Inc., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 1622, 2058, 2150, and 2750 kc., power of 100 watts, A3 emission.

NEW—Cardiff Broadcasting Co., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 30820, 33740, 35820, and 37980 kc., power of 2 watts, A3 emission.

KGKB—East Texas Broadcasting Co., Tyler, Tex.—Authority to determine operating power by direct method.

NEW—The Birmingham News Co., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 30820, 33740, 35820, and 37980 kc., power of 2 watts, A3 emission.

NEW—Baltimore Broadcasting Corp., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 1622, 2058, 2150, and 2750 kc., power of 75 watts, A3 emission.

WRUM—World Wide Broadcasting Corp., Boston Mass.—Modification of construction permit (B1-PIB-30) for increase in power, requesting extension of completion date from 7-15-41 to 11-15-41.

NEW—World Wide Broadcasting Corp., Boston, Mass.—Construction permit for a new international broadcast station to be operated on 9040, 11720, 11730, 13130, 13530, and 17730 kc., power of 100,000 watts, A3 emission. Share time on all frequencies with WRUL and WRUW.

NEW—Mutual Broadcasting System, Inc., Chicago, Ill.—Extension of authority to transmit programs to Station CKLW, stations owned and operated by Canadian Broadcasting Corporation, and stations licensed by Canadian Minister of Transport.

WGHB—The Tribune Co., Portable-Mobile.—License to cover construction permit (B3-PRY-240) for a new relay broadcast station.

FEDERAL TRADE COMMISSION ACTION

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Blue Ribbon Hatcheries Corp.—Alleging misrepresentation in connection with the business of hatching, breeding and selling chickens, especially baby chicks, a complaint has been issued against the Blue Ribbon Hatcheries Corporation, also trading as Bockenstette's Blue Ribbon Farms, Sabatho, Kans.

The complaint alleges that through advertisements in newspapers and trade journals and by other means, the respondent represents directly or by implication that it is a "United States Record of Performance" poultry breeder, when such is not a fact. A United States Record of Performance breeder, according to the complaint, is understood by the poultry industry to be one operating a poultry breeding plant under an official state agency cooperating with the United States Department of Agriculture, Bureau of Animal Industry. (4537)

Capital Paint and Varnish Works, Inc., 1346 West Concord St., Chicago, is charged with misrepresentation in the sale of paints in a complaint.

The complaint alleges that in advertising matter and on labels the respondent uses the words "Pure Lead—Pure Zinc—Pure Oil" in designating the ingredients of its paints, these words being employed in a conspicuous place in type larger than and distinctive from the type and lettering which purport to give the actual composition of the paints. (4536)

Chumanie Medicine Company.—A complaint has been issued charging Charles Rohm, trading as Chumanie Medicine Co., New Richmond, Ohio, with misrepresentation in the sale of medicinal preparations.

The complaint alleges that the respondent advertises "Chumanie's Triple XXX Tablets," "Chumanie's Iron Tonic Pills," "Chumanie's Yellow Jacket Pills," "Chumanie's Double RR Tablets," and "Chumanie's Plantation C.M.Q. Capsules" as effective treatments, respectively, for irregular and delayed menstruation, anemia, kidney and bladder trouble, rheumatism and inflamed joints, and common colds, when they are not in fact effective treatments for these ailments. (4530)

Eureka Fibre Company.—Alleging misleading representation in the sale of an insulating material, a complaint has been issued against L. D. Brown and Barry A. Brown, trading as Eureka Fibre Co., Eureka, Calif., and Charles H. Brown, Nebraska, Wis., their agent and salesman and an active participant in the business. (4534)

Dr. A. M. Loughney.—Charging misrepresentation in the sale of a regimen for the treatment of asthma, hay fever, constipation, and other diseases, a complaint has been issued against Judd Loughney, trading as Dr. A. M. Loughney, and his employee, Roger G. Loughney, all of 318 Henshaw Building, Oakland, Calif. (4531)

Pacific Undergarment Company.—Abraham Radin, doing business as Pacific Undergarment Company, 135 Madison Avenue, New York City, is charged in a complaint with misrepresentation in the sale of certain women's garments. (4533)

Specialty Accounting Supply Manufacturers Association, Chicago, and O. L. Moore, its secretary, and 29 of its members who manufacture and sell sales books and sales records stationery, are charged, in a complaint, with a combination to restrain and eliminate competition.

Taylor School of Bio-Psychology—Misrepresentation in the sale of correspondence courses in psychology, philosophy, religion and allied subjects, is alleged in a complaint issued against The Taylor School of Bio-Psychology, Inc., the Taylor University of Bio-Psycho-Dynamic Sciences, and William Marcus Taylor and Ruby Shearer Taylor, officers of the two corporations, all of Chattanooga, Tenn. (4529)

Tennessee Products Corp.—Three hardwood charcoal producers occupying a dominant position in the sale and distribution of that commodity in the Southern and Southwestern States, and their exclusive sales agents, are charged in a complaint with a combination and conspiracy to restrain trade through price fixing and other practices.

The respondents are: Tennessee Products Corporation, Nashville; Forest Products Chemical Co., Memphis; and Crossett Chemical Co., Crossett, Ark., hardwood charcoal producers, and Hardwood Charcoal Co., Memphis, exclusive sales agent for the producers, which maintains distribution warehouses in Atlanta, Birmingham and Chattanooga. (4535)

Utilities Engineering Institute—A complaint alleging misrepresentation in the sale of correspondence courses in air conditioning, electric refrigeration, welding, and automobile body repairs, has been issued against Utilities Engineering Institute, 1314 Holden Ave., Chicago.

According to the complaint, the respondent, through the use of the words “Engineering Institute” in its corporate name, represents or implies that it is a group or organization of engineers, when in fact it is a business organization operating for profit. (4532)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Reuben Barkow, 45 West 45th St., New York, who conducts an advertising agency, has entered into a stipulation to cease certain representations concerning the preparation “Vitye Perles” in behalf of its distributor, H. Pierce Weller, trading as Weller Co., Atascadero, Calif.

The respondent Barkow agrees to cease disseminating advertisements which represent that Vitye Perles will increase energy, and to cease representing that the product has any effect whatever, without expressly limiting such claims to cases where there is a deficiency of Vitamin E. The respondent further stipulates that he will desist from representing that Vitye Perles stimulates sexual desire or ability. (02826)

Bati Brothers Tobacco Products, Inc., 21 West 30th St., New York, entered into a stipulation to cease using words or phrases denoting that it maintains a factory in London, England, and that from such factory certain imported tobaccos are employed in the manufacture of its cigarettes. The respondent corporation further stipulates that it will desist from representing, directly or indirectly, that its cigarettes are made from Russian or French tobaccos. According to the stipulation, the respondent does not now and has not for many years maintained a London factory and its cigarettes are made neither of Russian nor French tobaccos nor in Russia or France, but in the United States. (3168)

Benson & Hedges, New York, entered into a stipulation to discontinue certain representations in the sale of cigarettes. The respondent corporation agrees to cease using the term “non-nicotine” as descriptive of the mouthpieces of cigarettes in a manner tending to convey the impression that the mouthpieces have the effect of either denicotinizing the cigarette tobacco or appreciably removing the nicotine from the tobacco smoke which passes through them. (3163)

David Custage, Inc.—Two New York distributors of textile fabrics have entered into stipulations to cease certain representations in the sale of their products. The respondents are Dressmaker Fabrics-David Custage, Inc., 666 Fifth Ave., and Jerome V. Detmer, trading as J. H. Henrikson & Co., 300 Fourth Ave., New York. (3165-3166)

Johnson Furniture Co., and Johnson-Handley-Johnson Co., both of 1101 Godfrey St., Grand Rapids, Mich., have entered into a stipulation to cease disseminating certain representations in connection with the sale of furniture. According to the stipulation, the two companies have jointly distributed the advertising in question. They agree to cease and desist from the use of the letters or initials “F H A” to describe their business or merchandising plan; or representing directly or inferentially, by use of the letters “F H A” or otherwise, that the Federal Housing Administration has approved or endorsed their products or that the products may be purchased or financed through, or on terms similar to those offered by, the Federal Housing Administration. (3164)

Medical Products Institute, Inc., 809 Walnut St., Cincinnati, entered into a stipulation to cease representing by use of the word “Institute” in its trade name, that it conducts an institute devoted to scientific study of ailments and conditions of the body.

The respondent further agrees to cease representing that its device “Hayrin Nasal Filters” will prevent or cure, or constitutes a medical treatment for, hay fever, rose fever or seasonal asthma; that this device, when used in combination with a filter pad impregnated with “Hayrin Nasal Filter Pad Fluid,” will overcome the symptoms due to pollens and molds which might enter the body; and that Hayrin Nasal Filters purify or completely filter the air breathed, or prevent pollens or molds from reaching the sensitive membranes. The respondent further stipulates that it will cease representing that Hayrin Nasal Filters will be of aid in the treatment or prevention of colds. (02827)

Vit-O-Net, Inc., 1652 West Ogden Ave., Chicago, stipulated that it will cease certain representations in the sale of electric blankets. The respondent agrees to cease employing representations which imply that its electric blanket is a cure for nephritis, an effective treatment for infections, droopical conditions, Addison’s diseases, chronic or inflammatory rheumatism, and high blood pressure; that the product is a cure for or will correct obesity, and that it is of value for treating sluggish liver. (3167)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders during the past week:

Berland Supply Company, Inc.—A group of glassware manufacturers and their representatives and an association of wholesale dealers have been ordered to cease and desist from combinations and agreements to suppress competition in the glassware trade in Milwaukee and the surrounding trade area.

Respondents are: Berland Supply Co., Inc., S. J. Casper Company, Incorporated, I. Shapiro, Inc., and National Beverage Distributing Co., wholesalers of glassware and other products, Milwaukee; Louis M. Mintz, trading as Mintz Supply Co., and W. A. Reinemann, trading as Hotel and Restaurant Supply Co., dealers in hotel and restaurant supplies, including glassware, Milwaukee; Anchor Hocking Glass Corporation, Lancaster, Ohio; West Virginia Glass Specialty Co., Inc., Weston, W. Va.; Indiana Glass Co., Dunkirk, Ind.; Roseware, Inc., factory agent of the West Virginia Glass Specialty Co., Inc., and the Indiana Glass Co.,
Burley Company—I. Burman, trading as Burley Co., 245 Fifth Ave., New York, has been ordered to cease and desist from misrepresentations in the sale of "Marbills," a drug or cosmetic preparation advertised as a weight reducer. (3665)

Columbia Pencil Company—Bertram A. Strauss, trading as Columbia Pencil Company, 29 West 17th St., New York City, engaged in the sale and distribution of mechanical and ordinary lead and crayon pencils, has been ordered to cease and desist from misrepresentation in connection with the sale of pencils. (4083)

Deision Company. 4856 South Western Ave., Chicago, engaged in the manufacture and sale of lead head roofing nails of various kinds, has been ordered to cease and desist from misrepresentations in the sale of lead head roofing nails designated as "drive screw" and as "ring shank." (4219)

Farmers Vaccine & Supply Company—John H. Oesterhaus, trading as Farmers Vaccine & Supply Co., Kansas City, Mo., has been ordered to cease and desist from misleading representations in the sale of a drug preparation designated "Abortion Vaccine," intended for use as a means of rendering cattle immune to "Bang's Disease." (4137)

Irvin Novelty Company—Two Illinois concerns have been served with orders to cease and desist from the use of lottery methods in connection with the sale of merchandise to consumers. The respondents are Irving Cohn, trading as Irvin Novelty Co., 125½ East Main St., Danville, Ill., distributor of candy and novelty merchandise, and Sisco-Hamilton Co., 514 South Loomis St., Chicago, candy manufacturer. (4464-4471)

Merk & Company, Inc.—A complaint has been dismissed which had charged Merck & Co., Inc., manufacturer of laboratory, medicinal and other chemicals, with violation of the Robinson-Patman Act. The company operates plants in Rahway, N. J., and Philadelphia, and maintains offices in those cities and in New York and St. Louis. (3373)

Motor Tire Retread Company, Inc., trading as National Wide Tire Company, Central Tire and Retreading Exchange, Standard Brand Retread Tire Company, and Zephyr Tire Company, and Benjamin Duchen, president of the corporation, having their principal place of business at 2451 South Indiana Avenue, Chicago, and engaged in selling and distributing retreaded or recapped used tires, have been ordered to cease and desist from certain misrepresentations.

The Commission finds that the respondents, by means of letters, order blanks, and other printed and written material, represented, among other things, that tires purchased from the respondents will be free from boots and patches; that the carcasses used in their retreaded or recapped tires are less than one year old; that the tires ordered will be shipped from points in the vicinity in which the purchaser is located, thereby effecting substantial savings in freight; that the tires will give many miles of service in the normal course of usage at a fraction of the cost of a like amount of service from new tires; and that the tires are sold under a warranty that the respondents will replace them within certain periods at one-half the prevailing price, should they prove defective. (4325)

National Institute, Inc., a corporation trading as Diesel Engines Training, and its officers, Clayton R. Hastings and John C. Smith, Muncie, Ind., have been ordered to cease and desist from certain representations in connection with the sale or distribution of a course of study and instruction on the subject of Diesel engines. (3417)

Philip R. Park, Inc., San Pedro, Calif., has been ordered to cease and desist from certain representations in the sale of its dehydrated kelp product known as "Granular Parkelp" and "Parkelp Tablets." (3815)

Pioneer Mattress Company—William E. Evans, trading as Pioneer Mattress Company, Spartanburg, S. C., has been ordered to cease and desist from certain misrepresentations in the sale and distribution of mattresses. (4483)

P limb Tool Company—Orders directing the cessation of lottery methods in connection with the sale of merchandise to consumers were issued against Samuel Nitke, 345 West 86th St., New York, dealer in novelty merchandise, and Plomb Tool Co., 2209 Santa Fe Ave., Los Angeles, tool distributor. (3567-3384)

Smoke Conditioner Company—Henry M. Salisbury and Frank R. Johnson, trading as Smoke Conditioner Company, 254 West 31st St., New York City, have been ordered to cease and desist from misrepresentation in the sale of a cigarette holder. (4166)

Watch-My-Turn-Signal Company—A complaint has been dismissed which had charged L. B. Patterson, trading as Watch-My-Turn Signal Co., Des Moines, Iowa, with violation of the Federal Trade Commission Act in the sale of an electric signalling device for automobiles. The Commission order recites that it appears the evidence is not sufficient to sustain the allegations of the complaint. (4331)

Weaver Real Estate Appraisal Training Service—Howard S. Weaver, trading as Weaver Real Estate Appraisal Training Service, Kansas City, Mo., has been ordered to cease and desist from misrepresentations in connection with the sale and distribution of home study courses in rural and city real estate appraisal training.

The Commission finds that in advertising published in newspapers and magazines and broadcast by radio, and through his agents, the respondent represented that the demand for land appraisers greatly exceeded the supply; that land appraising was an uncrowded field, lacking qualified men; that various loan agencies greatly exceeded the supply; that land appraising was an uncrowded field, lacking qualified men; that various loan agencies greatly exceeded the supply; and that choice money-making positions were available to them. (4355)

FEDERAL TIME SALES TAX

The House Ways and Means Committee late Wednesday wrote into the new revenue bill an unjust and discriminatory provision to tax radio time sales.

According to best estimates, the tax would cost the industry about $4,500,000 a year, net.

The bill, as approved by the committee, provides for the following taxes on net time sales of stations or networks:

<table>
<thead>
<tr>
<th>Rate</th>
<th>Bracket</th>
</tr>
</thead>
<tbody>
<tr>
<td>5%</td>
<td>$100,000—$500,000</td>
</tr>
<tr>
<td>10%</td>
<td>$500,000—$1,000,000</td>
</tr>
<tr>
<td>15%</td>
<td>$1,000,000 or more</td>
</tr>
</tbody>
</table>

Affiliates would have to pay the tax on their payments from networks, as well as their own sales.

Earlier in the week, the NAB was assured by committee members that this discriminatory tax, first proposed by a small group of men purporting to represent printing trades unions, had been abandoned.

It was revived shortly before the bill was completed, however, when the committee was searching for items to replace some that had been discarded.

Although the NAB on Thursday made every effort to get the committee to reconsider its action, it appeared probable that the tax would be reported favorably to the House on Friday or Saturday. It probably will be approved by the House sometime next week under a rule which forbids amendment.

The bill then will go to the Senate Finance Committee, made up of the following:

- Walter F. George, of Georgia
- David I. Walsh, of Massachusetts
- Alben W. Barkley, of Kentucky
- Tom Connally, of Texas
- Josiah W. Bailey, of North Carolina
- Bennett Champ Clark, of Missouri
- Harry Floyd Byrd, of Virginia
- Peter G. Gerry, of Rhode Island
- Joseph F. Guffey, of Pennsylvania
- Prentiss M. Brown, of Michigan
- Clyde L. Herring, of Iowa
- Edwin C. Johnson, of Colorado
- George L. Radcliffe, of Maryland
- Robert M. La Follette, Jr., of Wisconsin
- Arthur Capper, of Kansas
- Arthur H. Vandenberg, of Michigan
- J. J. Davis, of Pennsylvania
- John A. Danaher, of Connecticut
- Henry Cabot Lodge, Jr., of Massachusetts
- Robert A. Taft, of Ohio

The NAB is certain that the broadcasting industry is glad to pay its just share of the cost of the Defense Program. But the NAB will present to the Senate Committee the industry’s case against such a rankly discriminatory tax that will, in the long run, militate against every station in the country, large or small.

Neville Miller addressed the following letter to Chairman Doughton (D-NC) and all other members of the House committee:

The broadcasting industry today was greatly disturbed by published reports that the Ways and Means Committee of the House of Representatives has (Continued on page 624)
FEDERAL TIME SALES TAX
(Continued from page 623)

decided to submit to Congress a recommendation to levy a special and discriminatory tax upon radio advertising.

Doubtless every industry whose tax payments are to be increased by the pending proposal will urge reasons against the action taken affecting their particular field. I wish to emphasize, therefore, that the broadcasting industry does not and will not seek to evade its just and proportionate share of the tax burdens which of necessity must be increased because of the present emergency. What we do object to most strenuously is the discrimination which is involved in imposing this special burden upon radio which places the industry at a disadvantage in competing for business with newspapers and magazines. I have received numerous telegrams and other communications from broadcasters throughout the country urging that I submit to you the views of the industry and request reconsideration of the action that has been taken.

I, therefore, respectfully submit for your consideration certain factors which I believe should convince you that this penalty on radio advertising is unwarranted and that the committee should reconsider its action. These factors include:

(1) This special penalty on radio advertising will undoubtedly drive many advertisers to newspapers and magazines or other forms of advertising. This loss of revenue would result in lessening the ability of stations to serve the public. The inequity of a special tax on only certain forms of advertising seems obvious.

(2) Although the tax appears to be in the nature of an excise, it is in reality a tax upon the gross income of radio stations. It is standard practice for the industry to enter into yearly contracts with advertisers at a fixed rate. Many of these contracts contain provisions protecting the rate to the advertiser for periods even in excess of a year. Even if the advertiser would pay an increased rate, many stations will be prohibited by contract from attempting to pass the increase along to the advertiser. Thus the certain result would be decreased profits and in many instances no profits. This would create a pressure to divert revenues which are now used in the development of a better radio service.

(3) Under the proposals as suggested by the committee, many broadcast stations would suffer a reduction of 50 per cent or more in their net income. This is true even after allowing for any saving that would result from a reduction in the amount to be paid under the excess profit tax provisions.

(4) Radio broadcasting, under general corporate levies, is paying its share of federal taxes, and would of course continue to do so, under any general increase in these schedules which Congress might adopt.

(5) Earlier proposals for a special, punitive tax upon radio broadcasting originated with a small group purporting to represent certain unions in the printing trades field. Radio employs many thousands of persons who are members of labor organizations. I have been advised by the American Federation of Labor that it does not favor a special tax on broadcasting which would have the effect of penalizing certain of their members for the dubious advantage of other members employed by competing industries.

I know it is obvious to you that radio has a most important function to perform in this crisis. Unnecessary obstacles which will impair our ability to do a real job must be avoided. We are willing, as all American industry must be, to make whatever sacrifices may be necessary. All we ask is equality of treatment and, I am confident, that upon reflection you will agree we are entitled to no less. We are advised that Treasury estimates indicate that less than $5,000,000 in additional revenue will be collected from this source. Therefore the fiscal program of the government could not be seriously affected by eliminating this discriminatory levy. We are convinced that the harm that will be done to broadcasting because of the penalty upon radio advertising greatly outweighs any advantage to the government because of the revenues deriving from this source.

I am transmitting these views on behalf of the National Association of Broadcasters, to the chairman and each member of the Ways and Means Committee of the House of Representatives.

Newspaper Hearings

Hearings by the FCC on the question of whether newspapers should be permitted to acquire either FM or standard band stations in the future started Wednesday, July 23, in the auditorium of the Archives Building.

Just before the start of the hearings, the FCC announced that it had denied the petition of the American Newspaper Publishers Association to terminate the proceedings. This action was taken in the form of the following order:

Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington, D. C.
Docket No. 6051
In re Orders No. 79 and 79-A

Decision and Order on Motion to Vacate Order

This is a petition by American Newspaper Publishers Association to vacate Commission Order No. 79 and Order No. 79-A and to terminate the proceedings instituted thereunder.

Order No. 79, issued on March 20, 1941, directed that an investigation be undertaken to determine what statement of policy or rules, if any, should be made concerning applications for high-frequency broadcast stations (FM) by persons also associated with the publication of one or more newspapers, and concerning the future acquisition of standard broadcast stations by such persons. This order was supplemented by Order No. 79-A, issued July 1, 1941, setting forth the issues on which testimony would be taken. The hearing was originally scheduled for June 25, 1941, but was continued to July 23, 1941, on the petition of a committee representing certain newspaper publishers.
The instant petition, filed July 15, 1941—eight days before the date set for the hearing—requests the Commission to vacate its Orders No. 79 and 79-A on the ground that the Commission lacks authority to conduct proceedings of the type contemplated by the Order.

Our jurisdiction to issue Order No. 79 and Order No. 79-A was carefully considered prior to the promulgation of those orders. It seems inconceivable to us that an argument could be seriously advanced in the face of these orders to the effect that any administrative agency endowed by statute with power to hold hearings, issue subpoenas, etc., to conduct general hearings of the type involved here. One of the principal reasons for the establishment of administrative agencies is the expertise which such agencies are expected to develop in the administration of difficult and complicated matters. If problems involved in the regulation of an agency are complex enough to induce Congress to establish an administrative agency to administer them, it would seem unlikely that Congress would limit its usefulness by denying to it the power to hold general hearings for the purpose of acquainting itself with the problems of the industry and the best solution therefor. Such an intention is not to be imputed to Congress unless the statute creating the agency explicitly so provides.

But our jurisdiction does not rest alone on this inherent power of administrative agencies. The Communications Act explicitly confers on us the power to conduct such proceedings as that involved in Orders 79 and 79-A.

Section 403 of the Act provides:

"The Commission shall have full authority and power at any time to institute an inquiry, in any case and as to any matter or thing concerning which complaint is authorized to be made, to or before the Commission by any provision of this Act, or concerning which any question may arise under any of the provisions of this Act, or relating to the enforcement of any of the provisions of this Act." (Italics supplied.)

In the administration of Section 309 of the Act, authorizing the Commission to grant or deny applications for station licenses, the question whether the public interest, convenience, and necessity is served by the granting of a license to newspaper interests has arisen from time to time. (e.g. Port Huron Broadcasting Co., 5 F.C.C. 177; Dorrance D. Roderick, 3 F.C.C. 616, 5 F.C.C. 563; The South Bend Tribune, 6 F.C.C. 785; Barnes & Weiland et al. F.C.C. — (Decided April 15, 1940.)

With the recent advent of frequency modulation (FM) broadcasting, this question has taken on an increased importance. Out of 116 applications for FM licenses 45, filed by newspaper interests, were not granted. In considering these applications, we have considered the question separately as to each of the 43 applicants. We have considered the question as to whether the public interest, convenience, or necessity is served by the granting of FM licenses to newspaper interests. The case and as to any matter or thing concerning which complaint is authorized to be made, to or before the Commission by any provision of this Act, or concerning which any question may arise under any of the provisions of this Act, or relating to the enforcement of any of the provisions of this Act. (Italics supplied.)

The Commission's duty to act upon these applications for licenses carries with it the duty to determine the qualifications of the applicants. Under Section 309 of the Act we are authorized to determine whether or not the granting of FM licenses to such interests will serve the public interest, convenience or necessity. The Commission's duty to act upon these applications for licenses carries with it the duty to determine the qualifications of the applicants. Under Section 309 of the Act we are authorized to determine whether or not the granting of FM licenses to such interests will serve the public interest, convenience or necessity. The Commission's duty to act upon these applications for licenses carries with it the duty to determine the qualifications of the applicants. Under Section 309 of the Act we are authorized to determine whether or not the granting of FM licenses to such interests will serve the public interest, convenience or necessity.

In opening the hearings, Mr. Fly said he "should like to comment briefly on two or three matters." He said:

"The general question of joint control over newspapers and broadcasting stations has been a topic of interest, both in Congress and elsewhere, for a long time. When the Radio Act of 1927 was being debated, for example, Senator Dill, the Senate sponsor of the bill, pointed out the need for deciding such questions as whether one newspaper in a city should have a radio station when other newspapers do not, and urged that such questions indicated the need for a federal commission to regulate broadcasting. (67 Cong. Rec. 12353, June 30, 1926.) There was discussion of newspaper ownership of broadcasting stations before the Senate Committee on Interstate Commerce in January, 1930, at which time Senators Wheeler, Dill, and Brookhart indicated an awareness of the problem. (Hearings before the Senate Committee on Interstate Commerce on S. 6, 71st Cong., 2nd sess., pp. 1643, 1718, 1744, 2077.) Senator Neeley expressed opinions on the subject in January, 1935, during the consideration of the Confirmation of the Members of the Federal Communications Commission (74th Cong. 1st sess., p. 195). Representative Monachang expressed outspoken opposition to newspaper ownership of broadcasting stations in August, 1935. (79 Cong. Rec. 14310-14316.) On January 28, 1937, Representative Wearin introduced H.R. 3892, entitled "A Bill to amend the Communications Act of 1934 by adding thereto provisions designed to prohibit unified and monopolistic control of broadcasting facilities and printed publications, and for other purposes." (Italics supplied.)

"On March 15, 1937, Senator White commented at some length on newspaper ownership of radio stations, in the course of which he summarized the views that have been expressed on the subject. He said in part: 'If the Commission senses the situation, and if it has views as to what our policy should be, it has skillfully concealed the fact from Congress.' (81 Cong. Rec. 2334-2335.)"

The importance which has thus been continuously attached to the problem and the further fact that the Commission is now faced with a group of newspaper applications for FM facilities, have caused us to conclude that a general inquiry is advisable. Out of 99 applicants for FM licenses as of June 30th, 43 are newspaper interests. These newspaper applications raise the common question of the extent to which and the circumstances in which grants to newspapers will serve the public interest. We could, of course, have considered the question separately as to each of the 43 applicants. The proper dispatch of business, however, as well as the need for a uniform policy as to what public interest is served, and if so to what degree, clearly indicates the advisability of this general hearing.

"I would like particularly to emphasize that the purpose of these hearings is to inform the Commission. No conclusions or opinions have been formulated by the Commission. The facts and circumstances which will be developed in these hearings may lead us to the conclusion that no rules or policies whatsoever need to be developed. Or they may lead us to the conclusion that recommendations to Congress should be made, and the problem handled by way of legislation. We have concluded that certain policies or regulations can and should be developed within the jurisdiction already committed to us by Congress.

"The Commission believes that discussion of its jurisdiction under existing law to take action with respect to joint control of newspapers and radio stations would be premature at this time. The limited character of the legislation should be kept in mind, in the light of the facts and circumstances which the hearings develop, and argument should be based on concrete rather than supposi-
sitious proposals. The Commission will afford ample opportunity for the expression of views on the jurisdictional question if and when it contemplates the issuance of any rules.

I have emphasized the fact that the sole purpose of these hearings is to inform the Commission of the actual situation. Also the Commission will call some expert witnesses—

... especially cognizant of local situations in communities of various sizes and kinds, a record will be developed which will aid us in the performance of our duties hereafter, and will enable us to reach a sounder solution of the problem than would be possible if we proceeded without this general inquiry to the determination of particular cases. It is in this spirit of fact-finding that the Commission desires to proceed.

Elisha Hanson, counsel for the ANPA, arose to argue his motion to dismiss, but was informed at that time that it already had been overruled. He started to discuss the matter, but was summarily refused the opportunity. Mr. Fly advised him that he and his clients would be permitted to continue the Commission's jurisdiction if and when the Commission proposed any rules and regulations affecting the clients' interests. Judge Thatcher, representing the Newspaper Radio Committee, likewise was refused opportunity to contest the legality of the hearings.

The Commission, however, granted Mr. Hanson permission to file the following statement:

Mr. Chairman and Gentlemen of the Commission:

I appear specially as Counsel for the American Newspaper Publishers Association to address myself to the motion filed on behalf of that Association on July 15, 1941, to vacate Orders Nos. 79 and 79A and terminate this proceeding.

Because of the sentiment expressed in the body of that motion, I also request that pending your decision thereon all further proceedings herein be stayed until the issue as to your authority to proceed at all is determined.

We are all familiar with the fact that on March 20 last, the Federal Communications Commission entered its Order No. 79, wherein it ordered that an immediate investigation be undertaken "to determine what statement of policy, or rules, if any, should be issued concerning applications for high frequency broadcast stations (FM) with which are associated persons also associated the publication of one or more newspapers" and also what "statements of policy or rules, if any, should be issued concerning future acquisition of standard broadcast stations by newspapers." I think it will be conceded at the outset that if the Commission has the power to prohibit persons engaged in the newspaper business because of that fact and only that fact, from receiving approval of applications for licenses for the operation of radio broadcast stations, either in the high frequency or the standard broadcast band, there can be no question as to your authority to conduct a proper inquiry for the purpose of determining a policy in respect of such applicants and promulgating rules barring them from receiving licenses if, in your judgment, they should be barred.

Also, I think, under our settled jurisprudence, it will be conceded that if you do not have the power to prohibit persons engaged in the newspaper business from receiving approval of applications for broadcast licenses, you have no power to prohibit them from engaging in that business, then you do not have any power to make an investigation for the purpose of adopting any statement of policy or rules on the subject.

It has been judicially determined that you do not have such authority.

The United States Court of Appeals for the District of Columbia in a controversy between a licensee and this Commission arising over the granting of an application for a proposed station filed by the owner of a newspaper stated that it knew of no provision of statute or rule of law which forbids broadcasting by the owner of a newspaper. Tri-State Broadcasting Company v. FCC, 96 F. (2d) 564.

At this point it is pertinent to inquire as to who may or may not hold radio broadcast licenses.

The limitations on the holding and transfer of licenses are specifically and precisely set forth in Section 310 and 311 of the Act. Under Sec. 310 (a) a station license cannot be granted to or held by

(1) Any alien or the representative of any alien;

(2) Any foreign government or the representative thereof;

(3) Any corporation organized under the laws of any foreign government;

(4) Any corporation of which any officer or director is an alien in which more than one-fifth of the capital stock is owned of record or voted by aliens or their representatives or by a foreign government or its representative, or by any corporation organized under the laws of a foreign government;

(5) Any corporation directly or indirectly controlled by any of those precluded from a license in the preceding paragraph, if
Sec. 310 (b) provides that a license shall not be transferred, assigned or disposed of, voluntarily or involuntarily, directly or indirectly, to any person unless the Commission shall, after securing full information, decide that the transfer is in the public interest and give its consent in writing.

Sec. 310 (b) provides that the refusal of licenses and permits in certain cases, cases being those of persons "finally adjudged guilty by a Federal Court" of certain violations of the Anti-Trust laws.

Such gentlemen, are the limitations of the statute under which your body functions on the holding or transfer of licenses. Solely by reason of being engaged in the newspaper publishing business, a newspaper publisher, whether an individual or a corporation, does not ipso facto become either an alien, a representative of an alien, a foreign government or the representative thereof. Neither does such an individual or corporation become a criminal solely by reason of being engaged in the newspaper publishing business.

Insofar as the application of the Anti-Trust Laws to licensees or applicants for licenses is concerned, this Commission does not have any original jurisdiction whatsoever. Proceedings under those laws must originate elsewhere and this Commission is without power to act until there has been a final judgment of guilt. Then its authority is limited to the person or persons finally adjudged guilty. It cannot be extended to others. As I have pointed out, the limitations on the holding and transfer of licenses by persons on the refusal of licenses and permits are specifically set forth in the statute. So are the limitations on the revocation of licenses and on the application of the Anti-Trust Acts.

This Commission has no power either to exceed or to extend the Act. It must operate within the confines of its authority. It cannot trespass beyond its proper bounds.

Being without authority to extend or increase the limitations of the statute, it is without authority to conduct an inquiry to determine whether or not it shall adopt any policy or rules to that end. Therefore it should vacate its Order No. 79 and terminate this proceeding without further ado.

It may be argued on behalf of that order that the Commission has general powers of inquiry (a) for the purpose of determining if the public interest will be served in the granting of licenses and (b) for the purpose of making reports to the Congress.

An analysis of the statute and a consideration of the controlling decisions of our courts, however, cannot be otherwise than convincing that the Commission in its consideration of the public interest must give due consideration to that interest, insofar as applicable to the case at hand. The limitation of licenses, as the fact is developed in connection with a particular application. There is no statutory authority empowering the Commission on its own motion to make general classifications of persons, otherwise qualified under the statute, of the purpose of laying down a policy or adopting rules either of holding licenses or of permits, are specified only to a certain class from holding licenses or limiting the number of persons within a certain class who may hold licenses. Insofar as its reports to Congress are concerned, again the Commission's authority is limited.

One is a general power to be found in Section 4 (k) of the statute. This section requires the Commission to make an annual report to the Congress, just as similar sections in other statutes require such reports from all other legislative agencies. There is nothing in this section that either by inference or implication can be interpreted as authorizing an inquiry such as that initiated by the Commission's Order No. 79.

Two other sections of the statute namely 215 (a) and 307 (c) provide for reports to Congress. The provisions of Section 215 (a) are limited to common carriers engaged in wire and radio communication and subject to the Act. It does not extend to broadcast stations of any kind or description.

The provisions of Section 307 (c) are limited to non-profit programs and activities, on which the Commission was required to report not later than February 1, 1935.

The foregoing discussion should satisfy that the Commission does not have any authority under the Communications Act of 1934, as amended, to make the inquiry provided for in its Order No. 79. Consideration of the Commission's Order No. 79-A outlining the matters concerning which the Commission proposes to take testimony and request other evidence shows that order exceed its power under the statute. When the Commission's Order No. 79-A runs into headlong conflict with an adjudication of the powers of the Commission by the Supreme Court of the United States, it is not the purpose of this Court to review in order to construe your own powers, when you were not content with a decision in the controversy as rendered by the United States Court of Appeals for the District of Columbia.

I quote a few excerpts from that decision:

"The Act does not essay to regulate the business of the licensee. The Commission is given no supervisory control of the programs, of business management or of policy. In short, the broadcasting field is open to anyone, provided there be an available frequency over which he can broadcast without interference to others, if he shows his competency, the adequacy of his equipment, and financial ability to make good use of the assigned channel."

Again, as the Court said:

"The Act recognizes that broadcasters are not common carriers and are not to be dealt with as such. Thus the Act recognizes that the field of broadcasting is one of free competition. The sections dealing with broadcasting demonstrate that Congress had in mind the undisturbed development of the principle of free competition, as it has done in the case of railroads, in respect of which regulation involves the suppression of wasteful practices due to competition, the regulation of rates and charges, and other measures which are unnecessary if free competition is to be permitted."

Finally the Court said:

"An important element of public interest and convenience affecting the issue of a license is the ability of the licensee to render the best practicable service to the community reached by his broadcasts." F. C. C. v. Sanders Bros., Radio Station, 309 U. S. 470.

Gentlemen, that case arose when the licensee of a radio station appealed from an order of this Commission granting approval to the application of a newspaper for the construction of another station in the area that the first station served and in the same city where the newspaper was published or policy, what we do we and what you rule in respect of your Order No. 79-A? In that order you set forth 10 specific subjects on which you say that you desire information in order to determine what policy you shall lay down or what rules you shall adopt concerning applications for high frequency broadcast stations or the future acquisition of standard broadcast stations by newspapers.

In the order of their presence in Order No. 79-A your questions are as follows:

1. To what extent broadcast stations are at present associated with persons also associated with publication of one or more newspapers, the classification (in terms of power, location, network affiliation, etc.) of broadcast stations so associated, the circumstances surrounding such associations, and the tendency toward such association in the future.
2. Whether joint association of newspapers and broadcast stations tends or may tend to prejudice the free and fair presentation of public issues and information over the air, or causes editorial bias or distortion, or to inject editorial policy or attitude into the public service rendered by broadcast stations as a medium of public communication.
3. Whether joint association of newspapers and broadcast stations tends or may tend to restrict or distort the broadcasting of news, or to limit the sources of news to the public, or to affect adversely the relation between news-gathering services and broadcast stations.
4. Whether the joint association of newspapers and broadcast stations has or may have any effect upon freedom of access to the radio stations by the owners of public issues.
5. Whether the joint association of newspapers and broadcast stations tends or may tend to lessen or increase competition
among broadcast stations or to result in the monopolization of local broadcast facilities.
6. Whether the joint association of newspapers and broadcast stations tends or may tend to increase or decrease concentration of control over broadcast facilities or the use thereof.
7. Whether the joint association of newspapers and broadcast stations constitutes or may constitute an undue concentration of control over the principal media for public communication.
8. Whether joint association of newspapers and broadcast stations tends or may tend to improve general economic stability for broadcast stations and to encourage the maximum technological development of radio.
9. Whether the joint association of newspapers and broadcast stations tends or may tend to improve general economic stability for broadcast stations and to encourage the maximum technological development of radio.
10. What considerations influence newspaper interests to acquire broadcast stations.

I submit that in the light of the decision of the Supreme Court of the United States in the Sanders Bros. case you have no power to inquire into any one of those matters.

Furthermore, I also submit that the questionnaire which the Commission sent out on June 28 to present licensees deals with subject matter over which the Commission has no authority either under the statute or as construed by the courts. That questionnaire is nothing more nor less than an impatient effort on your part to inquire into the newspaper publishing business, the business policies of newspapers, the editorial policies of newspapers, the advertising practices of newspapers, the promotional activities of newspapers, the news policies of newspapers, the nature of the work performed by newspaper employees, and the business connections of newspapers, newspapers over none of which does this Commission have any authority whatsoever. If it be argued that the questionnaire is designed to obtain information for use in connection with the administration of the broadcast provisions of the Communications Act of 1934, as amended, then again I submit that the questionnaire shows its face that it is an effort to inquire into matters which the Supreme Court says this Commission has no business with. You do not have supervisory control over the programs, the business management, or the policies of radio stations and you are not empowered to make any general inquiry into the nature of programs, business management or policies of radio stations such as a free press in the sense of the first amendment means free press to the public interest for newspapers to operate stations. Your own General Counsel as of that time told you you had no such authority. Since then the United States Court of Appeals for the District of Columbia has given you the same word and also the Supreme Court of the United States has told you just what your powers are.

Your powers do not embrace authority to adopt any policy or rules the purpose of which is to prohibit persons engaged in the newspaper publishing business from operating radio stations. Being without power to adopt any such policy or rules you are without power to conduct an inquiry for the purpose of determining whether or not you should adopt such a policy or rules.

Therefore, I respectfully submit that my motion to vacate Orders Nos. 79 and 79-A should be granted and this proceeding terminated.

I further submit that if the Commission is not at this time prepared to rule upon that motion it should stay all further proceedings in this inquiry until it determines this question. In the event the Commission decides to stay the inquiry then I should be ready to have my rule in evidence in due time within which to file a brief in support of my statement this morning.

Insertion in the record of a vast number of Commission exhibits dealing with the relationship of newspapers and radio stations consumed the rest of the Wednesday morning session and a part of the afternoon session. The other Wednesday witness was Elmo Roper, public opinion expert, who discussed at length the survey he made for Fortune magazine dealing with the public’s opinion about news on the radio and newspapers. He was questioned at length by members of the Commission as to whether these figures represented the facts. He insisted, in all instances, that he represented only the public’s opinion.

The first witness Thursday morning was Professor Mitchell V. Charnley of the Minnesota School of Journalism who testified to the different techniques in processing news for newspapers and radio broadcasting. He stated it was his belief that separate staffs to select news for the two media are desirable. On cross examination by Judge Thomas, it was brought out that the witness had not made or supervised any study as to the facts of whether it is usual or unusual for radio stations and newspapers to operate with the same staffs, and that the witness had not made or supervised any study as to the relative merits of service to the public by stations under newspaper management and stations under other management. He stated that he was, therefore, unable to express an opinion on the relative merits of such service.

The next witness was Mr. Marco Morrow who stated he was associated with the Capper newspaper interests and titular head of Senator Capper’s radio stations. He testified that in his opinion radio is just another means of reaching the people, as necessary for newspapers as fast presses and cable service, and “inherently a part of journalism.” When questioned by Chairman Fly as to whether or not in the case of a single newspaper and a single radio station in a community better service to the public would not be rendered if the two were under separate ownership, he stated that he believed that the better service would be rendered by the radio station owned by the newspaper as the advantages more or less offset any danger of abuse by virtue of joint ownership. Commissioner Craven inquired if there was any reason why newspapers as a class should not own radio stations and the witness answered “no.”

The next witness, Dr. Albert McClung Lee, assistant professor of marketing at New York University, stated that in his opinion the political and economic views of newspapers affect the enthusiasm of the response to their advertisements; that the long-term trend has been towards elimination of competition in the daily newspaper field and also towards fewer daily newspapers, due to economic restriction. In the course of a lengthy statement on the meaning of freedom of the press, he stated his belief that the present concentration of newspaper ownership prohibits a free press in the sense that that was understood at the time of the adoption of the Constitution.

When pressed under cross examination by Louis G. Caldwell, counsel for the Chicago Tribune, the witness stated that a free press under the first amendment of the Constitution means freedom from interference by Congress, as does freedom of speech.

The final witness was de Quincy Sutton of the Commission staff who discussed at length numerous summaries of various financial reports by licensees to the Commission.

The hearing was recessed until 10 a.m., Wednesday, July 30, in the Auditorium of the Archives Building.

Sales

Per-Inquiry and Free Time

Shapiro & Schoenbrod Agency of Chicago, reported here last week, continue to seek per-inquiry deals on behalf of Monark Cameras. Investigation shows that FTC complaint No. 4169, still pending, involves Arnold F. Shapiro, Robert D. Schoenbrod and the Monarch Manufacturing Co. along with others in a “group of Chicago manufacturing corporations which have operated at different times in cooperation with Henry T. Schiff in the sale of radios, cameras, talking machines, electric sunlamps, clocks, razors and lighters, and electric and other novelties.”

The Shapiro & Schoenbrod address, 711 West Lake St., Chicago, is one of the addresses listed in the complaint, which was published in NAB Reports for June 28, 1940, page 4387, titled “Egin Razor Corporation.” Copies may also be secured from
the FTC. Stations are advised to check Monarch copy against the terms of this complaint. Attached to their letters soliciting per-inquiry deals is a sticker reading "The stations listed below are among the many now successfully merchandising the nationally famous Monarch Camera," and the list includes some of the country's leading broadcasters. The NAB has written each of these advising that many stations have misinterpreted the sticker and believe the stations mentioned are doing business on a per-inquiry basis. Of the replies received to date, every one states that the Monarch business it received was placed by the Henry J. Handlesman Agency of Chicago, at full published rates.

Pitlik Advertising Co. of San Antonio, Tex., on behalf of the Patriotic Plaque Co., is seeking guaranteed returns from stations in a variation of an attempt at per-inquiry buying.

### National Defense

#### Radio Appeal Gets Auto

During the "Aluminum Man On The Street Broadcast," over WFMJ, Daytona Beach, Fla., last Wednesday, Ray Clancy, program director, received a telephone call from the Halifax Motors, automobile dealers. The call announced that the company was donating a 1926 all aluminum body Franklin sedan to the cause. The aluminum weighed two hundred pounds.

#### Hold "Aluminum Maneuvers"

On Friday, July 25, WRAL, Raleigh, will hold "Aluminum Maneuvers" for a full hour during the evening. Solicitation of scrap aluminum will be built around red and blue armies, according to Fred Fletcher, program manager.

Two locally prominent citizens were named Generals of the Red and Blue Armies, respectively. These "Maneuver" Generals will make frequent appeals to the audience to join and give "weapons" to their respective armies. A Priorities Administrator and a Military Strategist will work hand-in-hand in recording contributions (by phone) of aluminum (weapons) and listeners (recruits).

Aluminum articles will be designated by these two in terms of weapon equivalents, such as a turkey roaster equals a 50-ton tank, a Jello mould equals a hand grenade, and a coffee pot equals a machine gun, etc.

"Weapons" given to the Red or Blue Armies will be called for by "Army Supplies Transports" (cars) driven by local members of the Junior Chamber of Commerce and Young Business Men's Club, and will be deposited at a central collecting point where the two Generals are "maneuvering" their "aluminum" armies.

The officers of the local Military Recruiting Stations will be the final judges and choose the winner at the completion of the broadcast. Their decision will be based on the superiority of "recruits" (listeners calling in) and "military weapons" (aluminum) contributed to their selected favorite Army by the listener.

#### Strong Hoosier Campaign

In Indianapolis, Lester W. Lindow, manager, WFMB, is head over heels in the promotion of aluminum collection. He began broadcasting announcements last week. During the current week 5-minute programs are being aired.

#### Big Cast in N. D. Show

At KQV, Pittsburgh, Manager G. S. Wasser is broadcasting "We're in the Army Now," Mondays, Wednesdays and Fridays, 2:00-2:30 p.m. Talent consists of a cast of five and a twelve-piece orchestra. The program plugs the various services of the Army and Navy as well as giving interesting national defense information. "The program has a splendid following," said Mr. Wasser. He also plugs the "Keep 'em Flying" announcements and others.

"Be assured," he said in a recent letter, "that KQV will continue to cooperate with NAB and the United States Government in this great emergency."

#### "Keep 'em Flying" Sign-Offs

WAGE, Syracuse, N. Y., WTAW, College Station, Texas, and KVNU, Logan, Utah, are all signing off with "Keep 'em Flying." At KVNU, Manager Reed Bullen, follows "Let's Go U. S. A. . . . Keep 'em Flying" with the playing of the Star Spangled Banner. "It has met with enthusiastic approval."

John Rosser, program director, WTAW, also asserted that the slogan sign off is well received by listeners.

Jack Kern of WAGE is also building a program around the slogan "Keep 'em Flying" for presentation at Loew's theater in Syracuse. This is to be a weekly feature.

#### Junior Chamber Thanks Radio

A note from Walter A. Bass, Grand Rapids, Mich., president, Michigan Junior Chamber of Commerce, said:

"Throughout the State the Junior Chambers have had splendid support of local broadcasting stations. All radio stations have given generously to the promotion of Flying Cadet courses which the Junior Chambers have helped to create.

"I want to express sincere appreciation and gratitude to the broadcasting industry for the support you advocate in your bulletin as well as the generous support the Junior Chambers receive from all radio stations for the varied and many activities throughout the year."

Mr. Bass paid special compliment to Stanley Barnett, manager, WOOD-WASH, Grand Rapids, for his support of the Grand Rapids Junior Chamber of Commerce in its campaign to recruit Flying Cadets.

10,000 Repeat Pledge

The Association and the city now has its third group of Air Corps students in training.

Chet Wheeler, manager, KWIL, Albany, Ore., fed the Fourth of July celebration program to the state owned station, KOAC, at Corvallis. The program was also released over a PA system at the local Fourth of July celebration and heard by more than ten thousand people watching the Timber Carnival events. The ten thousand stood at attention and repeated the pledge in unison with the Chiet Justice.

### BMI NOTES

#### Song Birthdays

Many songs people have been singing all their lives would seem to be old enough to be in the public domain, but research into copyright records reveals that some of them have to wait a few years before their fifty-sixth birthday.

Under terms of the Copyright Law of 1909 an initial copyright protects a musical composition for a period of twenty-eight years. A renewal of this copyright can then be secured for an additional twenty-eight years, after expiration of which the song enters the public domain.

Still under the second copyright are Rock-A-Bye Baby, which becomes public property next year, and Oh, Promise Me, originally copyrighted in 1890.

Other American favorites that have been sung since grandfather's
day and will become available in the next few years are Be Home When The Clock Strikes Ten, Boy's Best Friend Is His Mother, Brown October Ale, from Reginald De Koven's Opera Robin Hood, Down Went McGinty, I Believe It For My Mother Told Me So, In the Evening By the Moonlight, and Her Golden Hair Was Hanging Down Her Neck.

Tin Pan Alley Into Main Street

Just as radio has widened the horizons of music, so has BMI taken songwriters out of that narrow little square in New York known as Tin Pan Alley into the broad highways of the nation.

A glance over the addresses of the writers who have produced BMI originals shows that it is no longer necessary to live in New York to make a living at songwriting. A glance over the BMI songs which are broadcast most frequently outside of New York shows that the big city does not necessarily determine what the nation whistles and sings. Many tunes which never reach the Hit Parade are played over and over again for the home town folks and return their writers some worthwhile checks for performance rights. Every state in the union is represented by a BMI writer. Many outstanding hits have come from west of the Hudson.

California is the new Mecca with many of its writers clustered around Hollywood, but a few from San Francisco and two from Sierra Madre. Denver is represented by the writers of Shy Ann From Old Chervine and X Marks the Spot; Iowa by When the Night Was New and Years From Now; Oklahoma by Stars Went To Sleep; Texas by Walking On Air and Elvira; Canada by Too Late and Coast-To-Coast; Illinois comes through with too many tunes to mention, but among the better known are You're A Double Lonely, There's An Old Easy Chair By The Fireplace and Rip Stompie.

When we come east, Baltimore does the honors for Maryland. The best known tunes from the city of the little white stoops being Stompin' Room Only, I Do Mean You and Business In Baltimore. New Jersey has so much talent that we suspect that some of it is only sleeping there. One of the best of the Jersey tunes is Let's Dream This One Out by Eddie Lane, while Johnny Messner, the rhythm king of Ridgefield Park didn’t do so badly with Clarinet In A Haunted House, not to speak of Toy Piano Minuet and Toy Piano Jump. Northern Ohio will be remembered by the home of Helen Bliss, writer of I Went Out Of My Way, who lives in Cleveland and shares honors with the two New York writers who collaborated with Roy Herbeck on Time Stood Still. Southern Ohio reports George Dunning, writer of To Be Continued and I Can't Remember To Forget. Pennsylvania is the home of one of BMI's two blind songwriters, Mabel Helen Toole, who wrote Why Am I Still Dreaming, while the City of Brotherly Love contributed A Penny For Your Thoughts.

Coast-to-Coast

The parade is on for Hi, Neighbor and the song is winning acceptance as a "welcomer" the country over. Virtually every beach resort in Southern California is featuring a cordial "Hi" to visitors, and Jones Beach, New York's own, is offering the song as a greeter from Guy Lombardo's band playing there. Ted Lewis, headliner at Loew's State, New York, is billing it right close to his Is Everybody Happy?

Thanks

Letter to BMI:

"We received our first royalty check from BMI for the months of Jan., Feb., and March, which showed that they had played our tunes 5600 times. If I had to buy the station time to play these tunes 5600 times it would take a great deal of money—but BMI did this gratis."

"In addition, BMI paid me three cents for each inlaying instead of two as my contract called for."

"What more fair treatment could anyone ask?"

"We also wish to thank you personally for your splendid cooperation."

(signed) O. B. Clow.

U.S.O. Tune

Melody Moderne, Inc., a BMI affiliate, is releasing for public performance a new patriotic tune, Land of the Free, with lyrics by Lee Ryer and music by Noel Marchant, dedicated to the United Service Organizations. The U. S. O. has accepted the dedication and has stated its willingness to promote the tune.

New Subscribers

Four new stations bring the BMI list to a total of 668; KBUR, Burlington, Iowa; WTNJ, Trenton, N. J.; W-39-B, Mt. Washington, New Hampshire; W-43-B, Boston, Mass.

Page Boy to Publisher

Versatile Ted Steele, who three years ago was a page boy at NBC and who now plays the Novachord, sings, announces, and is the young man in "Young Man With A Band", an NBC program, has added the formation of a publishing house to his many accomplishments. Ted, frequently referred to as 'a one-man program department', wrote the music of the first offering, Home Town Blues. His wife, Doris Brooks, has written the words and added a little touch of something which she thinks will make it a hit.

Say It With a Song

Not the least of the profitable adventures with which BMI has been identified is Greeting Card Hit Parade, Inc. Tying a friendly greeting to a hit tune, the card offers both music and lyric of the song. For example:

"There's nothing like a song of cheer
To clear a dismal atmosphere.
A lively tune will do the trick
(And, incidentally, do it quick).
So, when you find that things are wrong,
Just hum yourself a little song,
And presto! In the shortest while
Your face once more will wear a smile!"

Then you turn the page and find a song.

More than 200,000 of the cards have been sold through both chain stores and independents. The idea was tried a few years ago and flopped. Apparently, blending of the entertaining lines of the BMI lyrics with the verses did the trick the second time around or perhaps the country is just enjoying a wave of friendliness.

The cards are circulated after the songs have run the gamut of popularity. BMI receives a percentage of the gross revenue which it divides equally with the writers. So, when you think of greetings, think of BMI and pick a card carrying one of the following tunes: Practice Makes Perfect, So You're the One, Accidentally On Purpose, There I Go, I Give You My Word or Keep An Eye On Your Heart.

BMI FEATURE TUNES

July 28 - August 4

1. I WENT OUT OF MY WAY
2. WASN'T IT YOU
3. ALL ALONE AND LONELY
4. MY SISTER AND I
5. BECAUSE OF YOU
6. G'BYE NOW
7. WITH A TWIST OF THE WRIST
8. THE RELUCTANT DRAGON

Two great numbers—"Yo Te Amo," an unusual novelty, and "Hi, Neighbor!" will be ready next week.
Bright Idea

Laurette Carroll, 14 year old writer of BMI's Phantom In the Dark, will be interviewed on the NBC program, Bright Idea, some Saturday afternoon soon. Laurette won a beauty prize at the age of three. To disprove the notion that brains can't live with beauty, she has made the record of a brilliant student and is so dependable and so popular that she is a monitor in her school. She draws so well that she will probably become a commercial artist; she is a good swimmer; and she loves best of all to teach tricks to her wirehaired terrier, Mr. Smith.

Daddy and Sister

Sammy Kaye, the pride of Ohio, leads all of the national and regional retail record sales this week with his Daddy which takes first place with every member of the geographic family except the west coast where the record buyers place it second to Maria Elena. In sheet music best sellers, the Maria Elena continues to lead the national parade, with Intermezzo in second place and Maria Elena third. My Sister And I is the biggest money maker in the automatic phonographs.

INSURANCE COVERAGE

Additional copies of "Insurance Coverages" are now available to members by request from headquarters. This pamphlet describes the various coverages available from insurance companies. It was prepared by the Insurance Committee under the direction of Roger Clipp, chairman.

FEDERAL LEGISLATION

HOUSE

H. R. 5343 (Lea, D.—Calif.) DAYLIGHT SAVING TIME—To promote the national defense and the conservation of electrical energy by permitting the establishment of daylight-saving time. Referred to Committee on Interstate and Foreign Commerce.

FEDERAL COMMUNICATIONS COMMISSION

Network Rules Postponed

Following a conference held on Monday of this week between Chairman James Lawrence Fly of the FCC and network heads the following joint statement was made public:

"On petition from National and Columbia, without opposition by Mutual, the Commission is being requested to postpone the effective date of its Order of May 2, 1941, from July 30 to September 16, 1941. This postponement is being requested by National and Columbia in order to permit more time for the discussions that have been going on during the past ten days in which the various problems that confront the Commission and the networks are being explored.

"The officials of the networks are hopeful that the additional time will permit of a satisfactory solution of the various problems involved."

The FCC at its meeting on Tuesday took favorable action on the petition and issued the following announcement:

At a meeting of the Federal Communications Commission held at its office in Washington, D. C., on the 22nd day of July, 1941, the Commission having under consideration the petitions of the National Broadcasting Company and of the Columbia Broadcasting System requesting that the Commission postpone the effective date of its order entered in Docket No. 5060 promulgating regulations applicable to radio stations engaged in chain broadcasting:

It is Ordered, That the last paragraph of the said order of May 2, 1941, entered in Docket No. 5060, BE, AND THE SAME IS HEREBY, AMENDED to read as follows:

"IT IS FURTHER ORDERED, That these regulations shall become effective immediately: Provided, That, with respect to existing contracts, arrangements, or understandings, or network organization station licenses, or the maintenance of more than one network by a single network organization, the effective date shall be deferred until September 16, 1941: Provided further, That the effective date of Regulation 3.106 with respect to any station and of Regulation 3.107 may be extended from time to time in order to permit the orderly disposition of properties."

FM Station for Lansing; Hollywood Grant

Construction permit for a new FM (frequency modulation) broadcast station, to serve the Lansing, Mich., basic trade area, was granted by the FCC to WJIM, Inc., of that city. The proposed station is authorized to use 47,700 kilocycles to cover an area of 3,600 square miles with more than 250,000 population. The proposed antenna location is the Olds Tower. The applicant now operates standard broadcast station WJIM, affiliated with the Michigan Radio Network.

In connection with grant to Columbia Broadcasting System, Inc., for a Class C FM station at Hollywood, Calif. (announced July 16), to use 43,100 kilocycles for a service area of 38,000 square miles embracing San Diego and Bakersfield, the Commission stipulates that prior to issuance of construction permit the applicant shall obtain approval by the Commission of the exact coverage pattern and shall submit proof satisfactory to the Commission that the applicant’s lease agreement of December 3, 1940, with Mount Wilson Hotel Company is so modified as to eliminate the provisions therein pertaining to exclusivity of use for broadcasting purposes of property on Mount Wilson controlled by the lessor.

Broadcast Measurements

During June experts of the FCC measured 689 broadcast stations, leaving 201 not measured that month.

Of the 689 stations, 636 showed a maximum deviation within 0-10 cycles; 48 stations maximum deviation within 11-25 cycles; 5 stations within a maximum deviation of 26-50 cycles. No stations showed a maximum deviation over either 20 or 50 cycles.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, July 28. They are subject to change.

Monday, July 28

KMA—May Broadcasting Company, Shenandoah, Iowa.—Renewal of license, 930 ke., 1 KV night, 5 KW day, unlimited.
WRDO—WRDO, Incorporated, Augusta, Maine.—Renewal of license, 1100 ke., 100 watts, unlimited.

Friday, August 1

NEW—Symons Broadcasting Company, Ellensburg, Wash.—C. P., 1110 ke. (1140 ke. NARBA), 1 KW, unlimited time.

To Be Held in Atlanta, Georgia

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license (main and auxiliary), 890 ke., 1 KV night, 5 KW LS, unlimited time.

July 25, 1941 — 631
FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

August 22

August 28

NEW—West Allis Broadcasting Company, West Allis, Wis.—C. P., 1180 kc., 250 watts, daytime.

September 12

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Pa.—Granted construction permit for new station requesting same facilities as above; exact site and antenna system to be determined subject to Commission's approval (B3-P-3203).

September 17

KFRO—Voice of Longview, Longview, Texas.—Modification of C. P., 1570 kc., 5 KW, unlimited time, DA-night. Present assignment: 1570 kc., 100 watts, S-WHAT.

RENEWAL OF LICENSES

The Commission granted the following applications for renewal of broadcast station licenses:

The Commission granted extension of the following station licenses, upon a temporary basis only, pending determination upon application for renewal of license, to not later than September 1, 1941:

KCMO, Kansas City, Mo.; KGB, San Diego, Calif.; KTRS and auxiliary, Shreveport, La.; KTUL, Tulsa, Okla.; WBCM, Bay City, Mich.; WBNS, Bay City, Mich.; WBNX, New York City; WCBF, Allentown, Pa.; WCSS, Charleston, S. C.; WFBC, Green-ville, S. C.; WFBL, Syracuse, N. Y.; WGR and auxiliary, Cleveland, Ohio; WHEC, Rochester, N. Y.; WHK, Cleveland, Ohio; WHP, Harrisburg, Pa.; WING, Dayton, Ohio; WKTU, Miami Beach, Fla.; WPAB, Ponce, P. R.; WSAI, Cincinnati, Ohio; WTSN, St. Petersburg, Fla.

The Commission granted extension of the following station licenses, upon a temporary basis only, pending determination upon application for renewal of license, to not later than September 1, 1941, of the following high frequency broadcast station licenses:

W3XE, Philadelphia, Pa.; W3XP, portable (area of Philadel-phia).

The Commission granted further extension upon a temporary basis only, pending determination upon applications for renewal of licenses, to not later than September 1, 1941, of the following television station licenses:

W2XVP, New York, N. Y.; W9XLA, Denver, Colo.; W4XA, Nashville, Tenn.; W5XAU, Oklahoma City, Okla.

DESIGNATED FOR HEARING

WOWO—Westinghouse Radio Stations, Inc., Ft. Wayne, Ind.—Application for construction permit to make changes in equipment, install directional antenna for day and night use, increase hours of operation from simultaneous day and night hours to night hours with WWVA to unlimited time, and increase power from 10 KW night and day to 50 KW night and day; 1190 kc. (B4-P-2635).

Designated for joint hearing the following four applications:

Air Waves, Inc., Baton Rouge, La.—Application for construction permit for new station to operate on 1400 kc., 250 watts night and day, unlimited time, exact site to be determined subject to Commission's approval (B3-P-3203).

Henry Norman Saurage, Baton Rouge, La.—Application for construction permit for new station requesting same facilities as above; exact site and antenna system to be determined subject to Commission approval (B3-P-3192).

Louisiana Communications, Inc., Baton Rouge, La.—Application for construction permit for new station requesting same facilities as above (B3-P-3242).

William J. Bray, James L. Ewing, T. B. Lanford and John C. McCormack, d/b as The Capitol Broadcasting Co., Port Allen, La.—Application for construction permit for new station requesting same facilities as above (B3-P-3191).

South Florida Broadcasting, Inc., Miami, Fla.—Application for construction permit for new station to operate on 1500 kc., 250 watts, unlimited time (B3-P-2942). To be heard jointly with:

Pan American Broadcasting System, Inc., Hollywood, Fla.—Application for new station requesting same facilities as above (B3-P-2768).

FEDERAL COMMUNICATIONS
COMMISSION ACTION

APPLICATIONS GRANTED

WJIM, Inc., Lansing, Mich.—Granted construction permit for new high frequency (FM) broadcast station to operate on 47700 kc. with a service area of 3800 square miles (B2-PH-86).

KTUC—Tucson Broadcasting Co., Tucson, Ariz.—Granted consent to transfer of control of Tucson Broadcasting Co. (Station KTUC), from John Merino and Carleton W. Morris to Glenn Snyder, George R. Cook, Burridge D. Butler and Ralph W. Bilby; Carleton Morris is to sell his entire holdings (30 shares or 10%) to Butler for a cash consideration of $1,333, and the assumption by Butler of the obligation of Morris to the corporation in the amount of $2,000; Merino is to sell one share to Butler and 49 shares to Bilby. Butler and Bilby are to assume stock subscription obligations of Morris and Merino to the license corporation aggregating $7,000; station operates on 1400 kc., 250 watts, limited time (B5-TC-269).

KMAC—W. W. McAllister & Howard W. Davis, d/b as Walmac Co., San Antonio, Tex.—Granted modification of license to change frequency from 1100 kc. to 1210 kc. and increase hours of operation from 8,000 to unlimited; 250 watts night and day (B3-ML-1072).

KLCN—Fred C. Grimwood, Blytheville, Ark.—Granted construction permit to install new transmitter and antenna, increase power from 100 watts daytime to 1 KW daytime and move transmitter locally; 1320 kc. (B3-P-3037).

RENEWAL OF LICENSES

The Commission granted the following applications for renewal of broadcast station licenses:

KABR, Aberdeen, S. D.; KDFN, Casper, Wyo.; KERN, Bakersfield, Calif.; KFAC, Los Angeles, Calif.; KFI, Bakersfield, Calif.; KFIR, Butte, Mont.; KGNC, Amarillo, Tex.; KGNF, North Platte, Nebr.; KGNQ, Dodge City, Kan.; KIDO, Boise, Idaho; KINR, Juneau, Alaska; KLO, Ogden, Utah; WABA and auxiliary, Boston, Mass.; KGHH, Pueblo, Colo.; KIEM, Eureka, Calif.; KOV, Pittsburgh, Pa.; KOMS, Corpus Christi, Tex.; KNRT, Des Moines, Iowa; WMBD, Peoria, Ill.; KSCJ and auxiliary, Sioux City, Iowa; KSLM, Salem, Ore.; KWK, St. Louis, Mo.; WBYN, Brooklyn, N. **DENIAL**

WBVN—WBVN, Brooklyn, Inc., Brooklyn, N. Y.—Denied request for special temporary authority to operate with main studios located at 152 West 43rd St., New York City, pending grant of application for same.

**MISCELLANEOUS**

WBRY—American-Republican, Inc., Waterbury, Conn.—Application for modification of construction permit to change frequency from 1539 kec. to 560 kec., decrease power from 5 kW night and day to 1 kW night and day, move transmitter to East Waterbury Road, New Haven County, Naugatuck, Conn., make changes in directional antenna, and extend commencement and completion dates to 60 days after grant and 180 days thereafter, respectively (B1-MP-1195).

KLCN—Fred O. Grinwood, Blytheville, Ark.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1134).

WGOV—E. D. Rivers, Valdosta, Ga.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1017).

KSUB—Southern Utah Broadcasting Co., Cedar City, Utah.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1085).

WSVA—Shenandoah Valley Broadcasting Corp., Harrisonburg, Va.—Granted license to cover construction permit as modified to install new transmitter, new antenna, increase in power from 350 watts to 1 kW (B2-L-1423).

WBBB—Alamance Broadcasting Co., Inc., Burlington, N. C.—Granted modification of construction permit for approval of antenna system, approval of transmitter site; 920 kec.; 1 kW; daytime (B3-MP-1321).

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1138).

W71NY—Bamberger Broadcasting Service, Inc., New York, N. Y.—Under authority of Paragraph 6 of Administrative Order No. 2, granted extension of special temporary authority to operate from 6 a. m. to 10 p. m. daily except Sunday, for July 23, 1941, only.

KWLC—Luther College, Decorah, Iowa—Granted special temporary authority to operate a specially constructed 1 KW peak tower, special emission for frequency modulation, using the transmitter and make changes in directional antenna system (B5-L-1394). Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1138).

WFKC—Frontier Broadcasting Co., Cheyenne, Wyo.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1108).

KSTR—KSTP, Inc., St. Paul, Minn.—Granted special temporary authority to operate already licensed ship station WOWB aboard the Yacht Standick, owned by Stanley E. Hubbard of St. Paul, Minn., as a relay broadcast station on 2038 kec. with power of 25 watts in order to relay broadcast program in connection with the Minneapolis Aquatennial to station KSTP on July 15, 1941, only.

W7NY—Bamberger Broadcasting Service, Inc., New York, N. Y.—Granted extension of special temporary authority to operate frequency modulation station commercially on 43990 kec., 1000 watts, special emission for frequency modulation, using the transmitter of high frequency experimental station WIXER at summit of Mt. Washington, Sargent's Purchase, N. H., for a period July 17 to not later than September 14, 1941, pending completion of construction permit.

KXFM—J. C. Lee and E. W. Lee; Lee Bros. Broadcasting Co., San Bernadino, Calif.—Granted special temporary authority to operate simultaneously with Station KPPC from 7 p. m. to 11 p. m. PST to the close of the boxing matches presented by Mike Jacobs in Madison Square Gardens, New York City, on July 23, 1941, only.

KXFM—J. C. Lee and E. W. Lee; Lee Bros. Broadcasting Co., San Bernadino, Calif.—Granted special temporary authority to operate simultaneously with Station KPPC from 7 p. m. to 11 p. m. PST to the close of the boxing matches presented by Mike Jacobs in Madison Square Gardens, New York City, on July 23, 1941, only.

W9B—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to broadcast sustaining musical programs from 8 a. m. to 10 a. m. Monday through Friday from July 16 to August 15, 1941, provided WSVS remains silent.

W9XE—Earle C. Anthony, Inc., Los Angeles, Calif.—Granted modification of construction permit for new television broadcast station for extension of commencement and completion dates from January 15, 1941, and July 15, 1941, to July 15, 1941, and January 15, 1942, respectively (B3-MP-1310).

W9XR—Bubban & Katz Corp., Chicago, Ill.—Granted extension of special temporary authority to operate two transmitter units to be installed and operated from the State Lake Bldg., Chicago, Link Transmitter Type No. 50-UTX with 100 watts power for visual and Link Transmitter Type No. 25-UX with 25 watts power for arra, temporary steel tower to be used on roof of said building, in order to conduct tests for the period July 18 to not later than August 17, 1941, in accordance with construction permit.

W9VR—National Broadcasting Co., Inc., New York City—Granted extension of special temporary authority to operate a specially constructed 1 KW peak tower, special emission laboratory model FM visual transmitter in conjunction with the main picture transmitter power amplifier of WNBV on Channel No. 1 in order to make comparisons on FM and A3 emission at a time and make changes in directional antenna and extend completion date from September 14, 1941, to 180 days after grant; 1320 kec. (B3-MP-1324).

WKBV—Knox Radio Corp., Richmond, Ind.—Granted special temporary authority to operate from 8 a. m. to 12 noon and from 5 p. m. to 9 p. m. CST, daily except Sunday, for a period not to exceed 10 days, instead of unlimited time, due to shortage of licensed radio operators.

WKL—Luther College, Decorah, Iowa—Granted special temporary authority to operate from 10:45 to 11:30 a. m. CST, July 16, 1941, in order to broadcast Luther College summer session convictions only (B4-S-320).

Thomas J. Watson, Endicott, N. Y.—Granted petition to intervene in proceeding to determine time for Triple-Cities Broadcasting Co., Inc., Binghamton, N. Y., for 90 days temporary authority for new station to operate on 1140 kec., 250 watts, unlimited time.

The following action was taken by Wakefield, Commissioner, under authority of Paragraph 6 of Administrative Order No. 2, on July 17:
Mid-American Broadcasting Corp., Louisville, Ky.—Granted petition for leave to amend application and remove from hearing docket; amendment to be filed within seven days; application is for a new station.

WGRC—Northside Broadcasting Co., New Albany, Ind.—Granted petition for leave to amend application and remove from hearing docket; amendment to be filed within 15 days; application is for change in facilities.

WTIC—The Travelers Broadcasting Service Corp., Hartford, Conn.—Withdraw petition to intervene amend above two cases (Mid-American Broadcasting Corp. and WGRC).

James F. Hopkins, Inc., Ann Arbor, Mich.—Granted motion to dismiss without prejudice application for new station to operate on 1600 kc., 1 KW, unlimited, using directional antenna.

WTEL—Foulkrotd Radio Engineering Co., Philadelphia, Pa.—Granted petition to continue hearing on application for construction permit to operate on 1500 kc., 250 watts, unlimited time, now set for July 24, to September 12, 1941.

Frontier Broadcasting Co., Cheyenne, Wyo.—Granted petition for order to take depositions in re hearing on application for new station to operate on 1550 kc., 1 KW, unlimited time, directional antenna day and night (Docket No. 5951).

KORN—Nebraska Broadcasting Corp., Fremont, Nebr.; Clark S. Seiber (transferee) and C. R. Malmsten, A. C. Sidner, S. S. Sidner, & Arthur Baldwin (transferees).—Granted request for order to take depositions in Fremont, Nebr., and Phoenix, Ariz., in re hearings on applications for renewal of license of Station KORN and for transfer of control of same.

WTNJ—WOAX, Inc., Trenton, N. J.—Granted motion to dismiss without prejudice application for construction permit to operate on 1230 kc., 1 KW, unlimited time, directional antenna day and night (Docket No. 5951).

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—Granted motion to sever Dockets 5951 (above mentioned) and 6049 (application for construction permit to operate on 1250 kc., 1 KW night, 5 KW day, directional antenna night, unlimited time) and granted continuation of hearing now scheduled for July 25 on applications of WCAM, Camden, N. J., for renewal of license, WCAP, Asbury Park, N. J., for renewal of license, WTNJ, Trenton, N. J., for renewal of license and WDAS, Philadelphia, Pa., for construction permit to operate on 1260 kc., 1 KW night, 5 KW day, unlimited time, directional antenna night, until August 22, 1941.

KFRO—Voice of Longview, Longview, Tex.—Granted petition for continuance of hearing on application for modification of construction permit to operate on 3200 kc., 250 watts, unlimited time, directional antenna night, now scheduled for August 4, to September 17, 1941 (Docket No. 5954).

Frontier Broadcasting Co., Cheyenne, Wyo.—Granted special temporary authority to operate two 2-watt pack transmitters on 30820, 35730, 35820 and 37280 kc. from July 22 to July 27, 1941, in order to relay broadcast to station KFBC programs in connection with the “Frontiers Days” celebration at Cheyenne, Wyoming, only.

WRCA—National Broadcasting Co., Inc., New York City.—Granted extension of special temporary authority to operate on 9670 kc., with effective power of 100 KW, using separate power amplifier feeding separate directional antennas for the period July 20 to not later than August 18, 1941.

WABP—Troy Broadcasting Co., Inc., Troy, N. Y.—Granted special temporary authority to operate already licensed relay broadcast station WABP on 2748 kc., 12 watts, from July 23 to July 26, 1941, in order to relay to station WTRV programs in connection with the New York State Amateur Open Golf Tournament, only.

W51C—Zenith Radio Corp., Chicago, Ill.—Granted extension of special temporary authority to operate frequency modulation station commercially on 45.1 mc., 5000 watts, special emission for frequency modulation with transmitter at 135 South LaSalle St., Chicago, from July 17 to not later than September 14, 1941.

WABA—Agricultural Broadcasting Co., Chicago, Ill. (WLS).—Granted special temporary authority to operate a special laboratory transmitter as a relay broadcast station on 37280 kc., with power of 1/2 watt in order to record on the ground and to rebroadcast over WLS the human voice and the rate of the heart beat, and other scientific data during a tree fall in the air prior to the opening of a parachute, from July 17 to not later than August 15, 1941.

KBJA—Golden Empire Broadcasting Co., Redding, Calif.—Granted special temporary authority to operate relay transmitter on 1616, 2580, and 2590 kc. with power of 15 watts, from July 19 to July 21, 1941, in order to relay to station KVOV program in connection with the Lake Redding Regatta, only.

W1XTG—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Granted extension of special temporary authority to operate high frequency broadcast station W1XTG on 34100 kc., 1000 watts, special emission for frequency modulation, maximum band width not over 200 kc., for period August 1, 1941, to not later than October 30, 1941, at Shrewsbury St., Worcester, Mass., pending action on application for new FM station.

W55M—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Granted extension of special temporary authority to operate frequency modulation station commercially on 45800 kc., 1 KW, special emission for frequency modulation, with transmitter located at 606 West Wisconsin Ave., Milwaukee, Wis., from July 30 to not later than October 27, 1941, and subject to any rules and regulations that may be adopted by the Commission.

WHAL—Harold F. Gluck, Wausau, Wis., and Saginaw, Mich.—Granted modification of construction permit for new station, for additional time for commencement and completion of construction from January 14, 1941, and July 14, 1941, to October 14, 1941, and 160 days thereafter, respectively (Dockets No. MP-135).

West Allis Broadcasting Co., West Allis, Wis.—Continued hearing now scheduled for July 23, until August 28, 1941, in re application for construction permit for new station to operate on 1480 kc., 250 watts, daytime (Docket No. 5989).

WHRK—United Broadcasting Co., Columbus, Ohio.—Granted special temporary authority to remain on the air from regular sign-off time (10 p. m. EST, July, 9:45 p. m. EST, August) to the conclusion of the Fritzie Zivic-Freddy Currie bout on July 14, 1941, the Billy Soose-George Abrams bout on July 30, 1941, and the Abe Simon-Budley Baer bout on August 14, 1941, in the event these bouts run later than the regular sign-off time.

WKBX—WKBX Broadcasting Corp., Youngstown, Ohio.—Granted special temporary authority to operate from 6:30 p. m. EST, to 12 midnight EST, on August 2, 9, 16, 23 and 30, 1941, only, in order to broadcast both local and network programs (provided WOSU remains silent).

WPIC—WICB Broadcasting Co., Sharon, Pa.—Granted special temporary authority to operate from sign-off (August 7:15 p.m. EST), until 11 p.m. EST, on the nights of August 24, 25 and 26, 1941, in order to participate in the Sharon Centennial Week, using 250 watts, only.

WNYN—City of New York, Municipal Broadcasting System, New York, N. Y.—Granted special temporary authority to operate from sign-off time (July, 9 p. m., August, 8:15 p.m. EST), to conclusion of the broadcast of the New York Philharmonic Lewisohn Stadium Concerts, approximately 9:30 p.m. EST, on July 18, 20, 25, 26 and 27, and August 1, 8, and 10, 1941, only.

KBZA-KBZB—Telegraph-Herald, Dubuque, Iowa.—Granted special temporary authority to operate already licensed relay transmitters on 1672, 2658, 2750 and 2790 kc., with power of 125 watts for KDJB and 2 watts for KQHS from July 23, 1941, to not later than August 15, 1941, in order to relay to Station KDTH special events, particularly the Darlington, Wisconsin, Fair.

WWNY—The Brooklyn Co., Watertown, N. Y.—Denied request for special temporary authority to operate from sign-off time (July, 8:45 p. m. EST) to 9:30 p.m. EST, July 19, 1941, only, in order to broadcast the NBC Spin and Win program from 9 to 9:30 p.m. EST.

KGET—Elmer G. Beecher, Sterling, Colo.—Denied special temporary authority to operate from 8 p.m. to 9:30 p.m. MST, on Thursday, August 1 and 8, and August 14, 1941, in order to broadcast musical programs of the Sterling High School Band.

WBA—Purdue University, West Lafayette, Ind.—Granted special temporary authority to operate from 7 to 9 p.m. CST July 19, 1941, in order to broadcast the Purdue University Music Festival, only.
E. Anthony & Sons, Inc., New Bedford, Mass.—Placed in pending files pursuant to Order No. 79, application for new high frequency (FM) broadcast station (B1-PH-98).

APPLICATIONS FILED AT FCC

570 Kilocycles

WSYR—Central New York Broadcasting Corp., Syracuse, N. Y.—Modification of construction permit (B1-P-2706) for installation of new transmitter, changes in directional antenna for day and night use, and increase in power from 1 to 5 KW, requesting changes in directional antenna and extension of completion date from 180 days after grant. Amended: to change type of transmitter.

580 Kilocycles

WTAG—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Modification of construction permit (B1-P-3019), for increase in power from 1 KW and 5 KW to 5 KW, and changes in directional antenna for day and night use, requesting changes in directional antenna.

590 Kilocycles

WKZO—WKZO, Incorporated, Kalamazoo, Mich.—Modification of construction permit (B2-P-2898), for increase in daytime power from 1 to 5 KW and installation of new transmitter, requesting change in type of transmitter.

590 Kilocycles

WKZO—WKZO, Incorporated, Kalamazoo, Mich.—License to cover construction permit (B2-P-2898) as modified, for increase in daytime power from 1 to 5 KW and change in type of transmitter.

590 Kilocycles

WKZO—WKZO, Incorporated, Kalamazoo, Mich.—Authority to determine operating power by direct method.

600 Kilocycles

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Modification of construction permit (B3-P-2841) to install new equipment, install directional antenna for night use, increase power from 250 watts to 1 KW, change frequency from 1310 to 600 kc., requesting new transmitter, increase in power from 1 to 5 KW, change in directional antenna, change of transmitter site, and extension of commencement and completion dates from 1-26-41 and 7-26-41 to 60 days after grant and 180 days thereafter, respectively. Amended: to make changes in directional antenna and change transmitter site.

620 Kilocycles

NEW—Newark Broadcasting Corp., Newk, N. J.—Construction permit for a new broadcast station to be operated on 620 kc., 5 KW, directional antenna for day and night use, unlimited time.

660 Kilocycles

KS sky—Chilton Radio Corp., Dallas, Texas.—Modification of construction permit (B3-P-2887) for a new broadcast station, requesting approval of antenna system and approval of studio and transmitter sites.

KVNU—Cache Valley Broadcasting Co., Logan, Utah.—Construction permit to change frequency from 1250 to 660 kc., increase power from 250 watts to 1 KW, and install new transmitting equipment an dentak towd, permitting equipment and antenna.

680 Kilocycles

KFEQ—KFEQ, Incorporated, St. Joseph, Mo.—Construction permit to install new transmitter, directional antenna for day and night use, increase power from 250 watts night, 25 KW day, to 5 KW day and night, change hours of operation from daytime (local sunset at San Francisco, Calif.), to unlimited time, and move transmitter. Amended: to make changes in directional antenna (day pattern).

KPO—National Broadcasting Co., Inc., San Francisco, Calif.—Construction permit for changes in equipment.

770 Kilocycles

990 Kilocycles

WEAN—The Yankee Network, Inc., Providence, R. I.—Construction permit to reinstate construction permit (B1-P-2037), as modified, for changes in directional antenna and increase in power, which expired 6-8-41.

850 Kilocycles

WSIX—WSIX, Incorporated, Nashville, Tenn.—Modification of construction permit (B3-P-3053) for a new transmitter, directional antenna for night use, increase in power from 250 watts to 1 KW night and 5 KW day, change in frequency, and move of transmitter, requesting approval of transmitter site, increase in power from 1 KW night and 5 KW day to 5 KW day and night, changes in directional antenna, and installation of new transmitter.

860 Kilocycles

WFDF—Flint Broadcasting Co., Flint, Mich.—License to cover construction permit (B2-P-2451) as modified, for a new transmitter, directional antenna for day and night use, increase in power, change in frequency, and move of transmitter.

WFDF—Flint Broadcasting Co., Flint, Mich.—Authority to determine operating power by direct method.

930 Kilocycles

WSIX—WSIX, Incorporated, Nashville, Tenn.—Modification of construction permit (B3-P-3053) for a new transmitter, directional antenna for night use, increase in power from 250 watts day and night to 1 KW night and 5 KW day, change in frequency, and move of transmitter, requesting approval of transmitter site, increase in power from 1 KW night and 5 KW day to 5 KW day and night, changes in directional antenna, and installation of new transmitter.

990 Kilocycles

WNOX— Scripps-Howard Radio, Inc., Knoxville, Tenn.—Modification of construction permit (B3-P-2839) for installation of directional antenna for night use, increase in power to 10 KW, and installation of new transmitter, requesting changes in transmitter and approval of directional antenna.

1030 Kilocycles

KOB—Albuquerque Broadcasting Co., Albuquerque, N. M.—Modification of construction permit (B5-P-2783) for changes in equipment and increase in power, requesting extension of completion date from 8-5-41 to 10-3-41.

1090 Kilocycles

KTHS—Southland Radio Corp., Hot Springs, Ark.—Construction permit to increase power from 5 to 50 KW, with 250-watt synchronous amplifier, change hours of operation from shares KRLD equally to unlimited time, install new transmitter and directional antenna for night use, and change location of transmitter from Hot Springs National Park to near Wrightsville, Ark.

July 25, 1941 — 635
NEW—Paul Forman Godley, Newark, N. J.—Construction permit to make changes in equipment.

1200 Kilocycles

NEW—H. Ross Perkins & J. Eric Williams, d/b as New Haven Broadcasters, New Haven, Conn.—Construction permit for a new broadcast station to be operated on 1290 kc., 1 KW, limited time.

1230 Kilocycles

WREN—The WREN Broadcasting Co., Inc., Topeka, Kans.—License to cover construction permit (B3-P-2981) as modified, for increase in power, new antenna, changes in equipment, move of transmitter, and change in frequency.

1240 Kilocycles

WEBQ—Harrisburg Broadcasting Co., Harrisburg, Ill.—License to cover construction permit (B4-P-3133) for change in type of transmitter, changes in antenna, and move of transmitter. Amended: Re number of tubes.

NEW—John R. Crowder, tr. as Dimple Broadcasting Co., Jonesboro, Ark.—Authority to determine operating power by direct method.

1250 Kilocycles

WEBQ—Harrisburg Broadcasting Co., Harrisburg, Ill.—License to cover construction permit (B4-P-3133) for change in type of transmitter, changes in antenna, and move of transmitter. Amended: Re number of tubes.

NEW—John R. Crowder, tr. as Dimple Broadcasting Co., Jonesboro, Ark.—Authority to determine operating power by direct method.

1260 Kilocycles

WOL—American Broadcasting Co., Washington, D. C.—License to cover construction permit (B1-P-3044) for move of old W.E. Type 301-B transmitter from Washington, D. C., to near Chillum, Maryland, and use as auxiliary transmitter with 100 watts power for emergency purposes only.

1310 Kilocycles

WRR—City of Dallas, Texas, Dallas, Texas.—Modification of construction permit (B1-P-2229) as modified, for new equipment, installation of directional antenna for night use, increase in power, and move of transmitter, requesting change in frequency from 1320 to 1340 kc., under NARBA, changes in directional antenna system, change type of transmitter, and extension of completion date to 180 days after grant.

1330 Kilocycles

WON—Radio Industries Broadcast Co., Asbury Park, N. J.—Authority to determine operating power by direct method.

1350 Kilocycles

1380 Kilocycles

WBNX—WBNX, Broadcasting Co., Inc., New York, N. Y.—Modification of license to change hours of operation from shares with WAWZ to unlimited, requesting facilities of WAWZ.

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Modification of license for increase in hours of operation from shares with WSBT to unlimited time.

1400 Kilocycles

KENO—George Penn Foster, Maxwell Kelch, and Calvert Charles Applegate, d/b as Nevada Broadcasting Co., Las Vegas, Nev.—Voluntary assignment of construction permit (B5-P-3135) for move of transmitter and studio, from George Penn Foster, Maxwell Kelch, and Calvert Charles Applegate, d/b as Nevada Broadcasting Company, to Nevada Broadcasting Company.

WINC—Richard Field Lewis, Jr., Winchester, Va.—License to cover construction permit (B2-P-3005) for a new broadcast station.

WINC—Richard Field Lewis, Jr., Winchester, Va.—Authority to determine operating power by direct method.

1410 Kilocycles

WKBH—WKBH, Inc., LaCrosse, Wis.—Modification of construction permit (B4-P-2733), as modified, for move of transmitter, installation of new transmitter, directional antenna for night use, increase in power, and change of frequency to 1110 kc. under NARBA, requesting change of transmitter location from Shelby Township to Campbell Township, and extension of commencement and completion dates from 6-23-41 and 12-20-41 to 30 days after grant and 180 days thereafter, respectively.

WKBH—WKBH, Incorporated, La Crosse, Wis.—Modification of construction permit (B4-P-2733) as modified, for changes in directional antenna and change of transmitter site, requesting extension of commencement and completion dates to 30 days after grant and 180 days thereafter, respectively.

1420 Kilocycles

WMDF—Genco, Inc., Greenwood, S. C.—Modification of construction permit (B3-P-2930) for a new broadcast station, requesting installation of new transmitter, changes in antenna move of studio, and frequency of 1450 kc. under antenna system, move of studio, and frequency of 1450 kc. under NARBA.

1430 Kilocycles

WBNY—WBNY, Brooklyn, Inc., Brooklyn, N. Y.—Construction permit to install new transmitter, increase power from 500
NEW—WHEC, Inc., Rochester, N. Y.—Construction permit for W75C—The Moody Bible Institute of Chicago, Chicago, Ill.—Construction permit for a new broadcast station to be operated on 1150 ke., 250 watts power, unlimited time.

NEW—Coastal Broadcasting Co., Inc., New Bern, N. C.—Construction permit for a new broadcast station to be operated on 1105 ke., 500 watts power, unlimited time.

KWAL—Chester Howarth & Clarence Berger, Wallace Idaho.—Authority to determine operating power by direct method.

1460 Kilocycles

WBNS—WBNs, Inc., Columbus, Ohio.—Authority to install automatic frequency control equipment for auxiliary transmitter.

KSO—Iowa Broadcasting Co., Des Moines, Iowa.—Modification of construction permit (B4-P-2727) as modified, for installation of new transmitter and new directional antenna for night use, move of transmitter, and increase in power, requesting use of old transmitter at new site.

NEW—The Gazette Co., Cedar Rapids, Iowa.—Construction permit for a new broadcast station to be operated on 1600 ke., 5 KW, directional antenna for night use, unlimited time. Amended: to make changes in directional antenna.

FM APPLICATIONS

W75C—The Moody Bible Institute of Chicago, Chicago, Ill.—Modification of construction permit (B4-PH-5) for a new high frequency broadcast station, requesting change in coverage from 10,800 to 10,950 square miles and changes in antenna system. Amended: to change population from 4,645,500 to 4,751,756.

NEW—WHEC, Inc., Rochester, N. Y.—Construction permit for a new high frequency broadcast station to be operated on 11700 ke.; Coverage: 2,318 square miles; Population: 551,374. Amended: to change coverage to 3,200 square miles and population to 599,256. Amended: to change frequency to 11900 ke.

NEW—News Syndicate Co., Inc., New York, N. Y.—Construction permit for a new frequency broadcast station to be operated on 14700 ke.; Coverage: 8,500 square miles; Population: 11,212,416. Amended: to change frequency to 14790 ke.

TELEVISION APPLICATIONS

W9XBT—Balaban & Katz Corp., Portable-Mobile, Area of Chicago, Ill.—Reinstatement of construction permit (B5-PHD-2) for a new television relay station to be operated on 310000-316000 kc., 204000-310000 kc., power of 15 watts, A3 emission. Reinstatement of construction permit (B5-P-2730) for new television broadcast station, changing equipment and power from 50 to 100 watts.

NEW—Golden Empire Broadcasting Co., Portable-Mobile, area of Cheyenne, Wyo.—Modification of construction permit (B1-PED-18) for changes in frequency, equipment, and power, requesting change in type of transmitter and extension of commencement and completion dates from 5-25-41 and 11-25-41 to 90 days after grant and 180 days thereafter, respectively.

W47A—Capital Broadcasting Co., Inc., Schenectady, N. Y.—License to cover construction permit (B1-PH-23) as modified, for a new high frequency broadcast station.

NEW—Pinellas Broadcasting Co., Portable-Mobile, area of St. Petersburg, Fla.—Construction permit for a new relay broadcast station to be operated on 20520, 35210, 35820, and 37980 ke., power of 25 watts. A3 emission.

NEW—The Moody Bible Institute of Chicago, Chicago, Ill.—Construction permit for a new studio transmitter broadcast station to be operated on 353100 ke., power of 25 watts, special emission for frequency modulation.

KEIY—Oregonian Publishing Co., Portable-Mobile, area of Portland, Ore.—Construction permit to make changes in equipment and decrease power from 4.5 to 3.5 watts.

KEIZ—Oregonian Publishing Co., Portable-Mobile, area of Portland, Ore.—Construction permit to make changes in equipment and decrease power from 4.5 to 3.5 watts.

WTHB—The Tribune Company, Portable-Mobile, area of Tampa, Florida.—License to cover construction permit (B3-PRV-241) for new relay broadcast station.

KEMA—May Broadcasting Co., Portable-Mobile, area of Shenandoah, Iowa.—License to cover construction permit (B5-PRV-243) for a new relay broadcast station.

WFEA—New Hampshire Broadcasting Co., Manchester, N. H.—Modification of construction permit (B1-P-2730) as modified, for a new transmitter, increase in power, and changes in directional antenna, requesting extension of completion date from 8-4-41 to 10-3-41 (1370 kc).

NEW—Frontier Broadcasting Co., Portable-Mobile, area of Cheyenne, Wyo.—License to cover construction permit (B5-PRE-393) for a new relay broadcast station.

NEW—Frontier Broadcasting Co., Portable-Mobile, area of Cheyenne, Wyo.—License to cover construction permit (B5-PRE-394) for a new relay broadcast station.

NEW—Evansville on the Air, Inc., Portable-Mobile, area of Evansville, Ind.—Construction permit for a new relay broadcast station to be operated on 156750, 158100, 159300, and 161100 ke., power of 30 watts, special emission for frequency modulation.

NEW—Radio Service Corporation of Utah, Salt Lake City, Utah.—Construction permit for a new studio transmitter broadcast station to be operated on 331000 ke., power of 25 watts, special emission for frequency modulation.

Federal Trade Commission Action

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Middlebrook Hospital & Clinic—James R. Middlebrook, M. D., individually and doing business under the name of Middlebrook Hospital and Clinic, Del Rio, Tex., is charged, in a complaint with false advertising and misrepresentation. The complaint charges that the respondent allegedly specializes in the surgical and medical treatment of diseases and disorders of the prostate gland and has caused to be disseminated through the United States mails various letters, circulars and other advertising literature purportedly descriptive of the conditions giving rise to the need for such operations or treatments and further designed to induce prospective patients to travel to the respondent’s places of business for treatment. (4539)

Spangler Candy Company—Arthur G. Spangler, Ernest D. Spangler and Mrs. Faye Spangler, trading as Spangler Candy Co., Bryan, Ohio, are charged in a complaint with the use of lottery methods in the sale and distribution of candy manufactured by them. (4540)

STIPULATIONS

During the past week the Commission has announced the following cease and desist orders:

American Poultry Journal—Henry G. Eiseert, B. M. Eiseert, and Henry F. Eiseert, doing business under the trade name of American Poultry Journal, 536 South Clark St., Chicago, has entered into a stipulation to cease certain representations in the sale of their periodical the “American Poultry Journal.” The respondents agree to cease representing that one must subscribe to the American Poultry Journal to become eligible to participate in a chick raising contest sponsored by them, and to desist from the representation that a person, by subscribing to the American Poultry Journal, will become eligible to participate in a chick raising contest or any other contest or in contest prizes when there are not disclosed in connection with such representation conditions which must be met before eligibility is established. (2028)

Associated Writers—Howard N. Rose, trading under the name of Associated Writers, 816 Oakwood Ave., Columbus, Ohio, which he terms an unincorporated association of free lance writers, and engaged in the sale and distribution of membership certificates, press cards and press car signs to persons allegedly engaged in the business of writing, has stipulated to cease and desist from making use of the word “Associated” in any way so as to import or imply that the business conducted by him is that of an association, and from representing that “Associated Writers” has authority to issue press cards, press car signs for automobile windshields, or any other documents which permit the holder thereof to go within police or fire lines during fires, accidents or other situations where the public is excluded. (3169)

Borin Art Products Corporation, 1325 South Cicero Ave., Chicago, a corporation engaged in the production of framed pictures and mirrors, has entered into a stipulation in which it agrees to cease and desist from use of the term “Sheet” or “Sheet Glass” or any other words of similar import as descriptive of mirrors made of window glass without clearly disclosing that the glass in such mirrors is in fact window glass; from describing, branding, labeling or otherwise directly or indirectly representing any mirror as being made of or containing crystal glass or as being crystal when in fact such glass is not crystal glass; and from use of the term “Copper Colored Backs” or other words of similar implication as descriptive of its mirrors so as to imply that the coloring of the backs is the result of the application thereto by the electrolytic process of a paint which contains metallic copper. (3170)

Columbium-Werke, Inc., 58 West Fortieth St., New York, textile fabrics distributor, has entered into a stipulation to cease advertising, branding, labeling, invoicing or selling products composed in part of rayon and in part of silk without disclosing in immediate connection and in equally conspicuous type such constituent fiber in the order of its predominance by weight, beginning with the largest single constituent. If, according to the stipulation, the rayon content predominates, the word “Rayon” should precede the word “Silk,” and if the silk content predominates, the word “Silk” should precede the word “Rayon.” (3172)

Lampson’s, Inc., 115 Chauncy St., Boston, operator of a chain of men’s haberdashery stores, has entered into a stipulation to cease and desist from the use on labels or in printed or advertising matter of any fictitious or exaggerated sales price which is in excess of the price for which its products are customarily sold. According to the stipulation, the respondent corporation advertised certain shirts and hosiery at prices in excess of the regular prices and offered them at purported reductions. (3176)

Luetien Leblon, Inc., 55 East Washington St., Chicago, a corporation engaged in the sale of cosmetic and toilet preparations, has stipulated to cease and desist from representing through the use of the words “Paris” or “London” or other terms or picturizations indicative of French or other foreign origin of such products, that the perfumes, colognes or other cosmetic preparations are compounded or made in France or in any other foreign country; provided, however, that the country of origin of the various ingredients may be stated when immediately accompanied by a statement that such products are compounded or made in the United States. (3174)

Martius Stringer, Inc., 665 Fifth Ave., New York, textile fabrics distributor, stipulated that in the sale of its products it will cease employing the words “Pure Dye” or other silk-containing words to describe a product not composed of silk. If, according to the stipulation, the product consists partly of silk and partly of other fibers or materials, the word “Silk” or “Silk-Satin” or “Silk-Linen,” as connecting word, used properly to describe the silk content, shall be accompanied by other words in equally conspicuous type to accurately designate each constituent fiber or material in the order of its predominance by weight. (3175)

Steve Stuart, Elkhart, Ind., trading under his own name and engaged in selling perfume oils in interstate commerce, has entered into a stipulation in which he agrees to cease and desist from the further use of the word “Imported” or other words of similar implication or meaning on labels affixed to his products or in any other way as descriptive of such products which are not of foreign origin; from use, in the labeling of the products, of trade names used by materially or widely known perfumers, if and when such is not the fact; and from labeling or otherwise referring to the products as “Flower Oils” or by a statement that such products are compounded or made in the United States. (3179)

J. & R. Wilson, Inc., 133 Steuart St., San Francisco, a corporation engaged in the sale and distribution, both individually and as agent for The Beldam Packing & Rubber Co., Ltd., an English firm, of packing material for steam engines, designated “V-Pack,” has stipulated in connection with the sale or offering for sale of the product, to cease and desist from the use of the words or
phrases “Imitations have Limitations but Beldam’s ‘V’ Pilot Packing for Steam and Water is Genuine,” “Only Genuine when Bearing this Seal” or “Sole Patentees & Manufacturers” or other words or phrases of similar meaning. (3173)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

Golf Products Company—Ben Gordon (also known as Benjamin Gordon) and Louis Gordon trading as Bengor Products Company and as Golf Products Company, 878 Broadway, New York City, have been ordered to cease and desist from false advertising and misrepresentation in the sale and distribution of two medicinal preparations, one being designated as “Dupree Pills” and as “Dr. Gordon’s Single Strength Pills,” and the other as “Dupree Pills Double Strength” and as “Dr. Gordon’s Double Strength Pills.” (4479)

Wilbert W. Haase Co., Inc., Forest Park, Ill., which licenses the manufacture and sale of the “Wilbert” burial vault, and two of its officers and three licensee manufacturing companies has been ordered to cease and desist from making misleading representations in the sale of concrete burial vaults.

The other respondents are Wilbert W. Haase, president and majority stockholder of the Haase and American Vault corporations; Sidney L. Schultz, secretary-treasurer of the Haase corporation; American Vault Works, Inc., Forest Park, Ill; Lee A. Wolfkill, trading as Washington Vault Works, Rockville, Md.; and Baltimore Concrete Products Co., trading as Baltimore Wilbert Vault Co., Baltimore. (3808)

Hollywood Racket Manufacturing Company, Inc., 7462 Melrose Avenue, Hollywood, Calif., sellers and distributors of tennis, badminton and squash rackets, has been ordered to cease and desist from misrepresentation in the sale of rackets. (3931)

National Grain Yeast Corporation, Belleville, N. J., and Republic Yeast Corporation, Newark, N. J., have been ordered to cease and desist from price discriminations in violation of the Robinson-Patman Act, in the sale of bakers’ yeast.

The order against National Grain Yeast Corporation also prohibits violation of the brokerage provision of the Robinson-Patman Act and the giving of secret gratuities to employees of prospective buyers without the knowledge of such buyers in contravention of the Federal Trade Commission Act. (3903-4367)

Refrigeration & Air Conditioning Institute, Inc., Chicago, has been ordered to cease and desist from making misleading representations in the sale of courses in refrigeration and air conditioning which consist mainly of home study instruction and include also several weeks of shop training in Chicago. (3811)

Rex Drug Company, a corporation, and Louis Podrofski, individually and trading as Rex Drug Company, and as an officer of Rex Drug Company, 201 East 35th St., Chicago, have been ordered to cease and desist from false advertising in connection with the sale of a medicinal preparation. (4342)

Helena Rubinstein, Inc., 715 Fifth Ave., New York City, has been ordered to cease and desist from the dissemination of certain misleading representations in the sale of cosmetic preparations. (4254)

Stetson China Co., Inc., 1801 West 74th St., Chicago, distributor of dinnerware, has been ordered to cease and desist from misrepresentation concerning its products. (4477)

July 25, 1941 — 639
RADIO TIME SALES TAX

Possibility that the House Ways and Means Committee, on its own motion, would remove the radio time sales tax from the new revenue bill developed Thursday.

The committee was scheduled to meet Saturday, and again Monday. At one of these meetings, the committee was to vote on a proposal to offer an amendment on the House floor to remove the radio tax. Only committee amendments can be considered under the rule governing debate and amendment on the floor.

The NAB legislative committee has been at work in Washington throughout the week, explaining the effect this discriminatory bill would have on the industry.

The NAB board of directors will meet next Wednesday and Thursday to review the situation and to map plans for carrying the fight to the Senate if the tax is not removed in the House.

The House Ways and Means Committee is made up of the following:

- Robert L. Doughton, of North Carolina
- Thomas H. Cullen, of New York
- Jere Cooper, of Tennessee
- John W. Boehne, Jr., of Indiana
- Wesley E. Disney, of Oklahoma
- Frank H. Buck, of California
- Richard M. Duncan, of Missouri
- John D. Dingell, of Michigan
- A. Willis Robertson, of Virginia
- Patrick J. Boland, of Pennsylvania
- Milton H. West, of Texas
- Raymond S. McKeough, of Illinois
- Knute Hill, of Washington
- Arthur D. Healey, of Massachusetts
- Aaron Lane Ford, of Mississippi
- Allen T. Treadway, of Massachusetts
- Frank Crowther, of New York
- Harold Knutson, of Minnesota
- Daniel A. Reed, of New York
- Roy O. Woodruff, of Michigan
- Thomas A. Jenkins, of Ohio
- Donald H. McLean, of New Jersey
- Bertrand W. Gearhart, of California
- Frank Carlson, of Kansas
- Benjamin Jarrett, of Pennsylvania

Some members of the House were under the impression that the tax carried the approval of the American Federation of Labor because several

Industry Total             | 765             | $133,964,769            | ***$11,518,151 |

* Assumes all 3 National Networks have retained time sales of over $1,000,000.
** Assumes all 5 Regional Networks have retained time sales of over $100,000 but less than $500,000.
*** It now appears that 1941 sales will run about 15 per cent above 1940. If 1942 sales increase 5 per cent above 1941, the tax for 1942 will be approximately $13,900,000.
RADIO TIME SALES TAX
(Continued from page 641)

small printing trades unions affiliated with the A. F. of L. had proposed a similar levy. William Green, A. F. of L. president, notified both the Ways and Means and Senate Finance committees that the A. F. of L. had not endorsed the tax. Unions in the radio field have taken an active role in fighting the tax.

Using as a basis the FCC releases of 1940 operating data, it is found that the proposed tax on radio time sales will affect 238 stations with time sales of $100,000 or over. The affected stations constitute 31% of the total of 765 reporting stations for the year 1940. The retained time sales of the 238 stations taxed in the three brackets of 5%, 10% and 15% amount to $78,508,938 or 79% of the retained time sales of $99,916,993 of the total of 765 stations.

The amount of tax payable by the 238 stations is calculated to be $6,488,168 on the 1940 basis. This represents an additional expense deductible from income to the extent of 28% of the net income (before Federal income taxes) of $23,533,440 reported in 1940. This percentage naturally varies between the three tax brackets. For the 8 stations in the 15% bracket (time sales of $1,000,000 or more) the tax payable is $1,845,220 or 40% of the net income of $4,587,798. For the 42 stations in the 10% bracket (time sales of $500,000 to $1,000,000) the tax payable is $2,665,148 or 29% of the net income of $9,335,703. For the 188 stations in the 5% bracket to the next highest one. This constitutes a possible error of a very minor nature. If there are any stations whose net time sales are just over the lower limit of any of the three brackets, they will not have to pay, in effect, the full percentage of tax called for within that bracket. Not having individual figures, it is not possible to determine whether there are any stations within the narrow limits where this cushioning provision operates.

Revenue Bill of 1941

TITLE VI—RADIO BROADCASTING AND NETWORK TAX

SECTION 601

Tax on Radio Broadcasting Stations and Networks

Subtitle B of the Internal Revenue Code is amended by inserting after Chapter 6 the following new chapter:

"CHAPTER 6A"

"SEC. 1220. TAX ON RADIO BROADCASTING STATIONS AND NETWORKS.

(a) RATE.—For each calendar year beginning after December 31, 1941, there shall be imposed upon every person with respect to operating a radio broadcasting station or engaging in network broadcasting for any part of such year, an excise tax computed as follows:

(1) If the net time sales exceed $100,000 and do not exceed $500,000, an amount equal to 5 per centum of the net time sales, or an amount equal to the net time sales in excess of $100,000, whichever is the lesser.

(2) If the net time sales exceed $500,000 and do not exceed $1,000,000, an amount equal to 15 per centum of the net time sales, or an amount equal to $25,000 plus the amount of the net time sales in excess of $500,000, whichever is the lesser.

(3) If the net time sales exceed $1,000,000, an amount equal to 15 per centum of the net time sales, or an amount equal to $100,000 plus the amount of the net time sales in excess of $1,000,000, whichever is the lesser.

(b) DEFINITIONS.—For the purposes of this section—

(1) 'Network broadcasting' means the making of arrangements with persons operating radio broadcasting stations for the simultaneous broadcast of an identical program by two or more connected stations and the distribution of programs by wire or radio to such persons.

(2) 'Time sales' means the gross amount received or accrued from the sale of broadcast time. Where the sale is for a consideration other than money the gross amount considered to be received or accrued shall be the seller's published card rate for broadcast time. Where the sale is for a consideration, less a commission to an advertising agency (whether such sale is made to such agency or its principal) the amount of such commission (not in excess of 15 per centum of such consideration) shall be excluded in determining the gross amount received or accrued with respect to such sale.

reduce the amounts of such taxes payable to the Federal Government in proportion to the reduction of net income in individual cases. The net tax yield to the Federal Government or net Federal taxes payable by the industry, cannot be calculated in the absence of detailed information by individual stations. The Treasury Department apparently has estimated the reduction in income and excess profits taxes to be in the neighborhood of $7,000,000, which accounts for the estimate of the net yield of $5,000,000 from the time sales tax.

In these calculations it has not been possible to take into account the provision which acts as a cushion when a station's net time sales are just over the lower limit of a bracket or move from one bracket to the next highest one. This constitutes a possible error of a very minor nature. If there are any stations whose net time sales are just over the lower limit of any of the three brackets, they will not have to pay, in effect, the full percentage of tax called for within that bracket. Not having individual figures, it is not possible to determine whether there are any stations within the narrow limits where this cushioning provision operates.
“(3) ‘Net time sales’ means time sales minus the amounts paid or incurred for broadcast time to other persons operating radio stations or engaged in network broadcasting.

SEC. 1221. RETURNS.

“(a) REQUIREMENT.—Every person liable for tax under section 1220 shall make a return under oath. Such return shall contain such information and be made in such manner as the Commissioner with the approval of the Secretary may by regulations prescribe.

“(b) TIME FOR FILING.—

“(1) GENERAL RULE.—Such return shall be made within two months after the close of the year with respect to which such tax is imposed.

“(2) EXTENSION OF TIME.—The Commissioner may extend the time for making the returns, under such rules and regulations as he may prescribe with the approval of the Secretary, but no such extension shall be for more than sixty days.

“(c) PLACE FOR FILING.—The return shall be made to the collector for the district in which is located the principal place of business of the taxpayer, or, if it has no principal place of business in the United States, then to the collector at Baltimore, Maryland.

SEC. 1222. OTHER LAWS APPLICABLE.

“All provisions of law (including penalties) applicable in respect of the taxes imposed by chapter 6 shall, insofar as not inconsistent with this chapter, be applicable in respect of the tax imposed by this chapter.”

## Committee Report

### TITLE VI—RADIO BROADCASTING STATIONS AND NETWORKS

Section 601

Radio Broadcasting Stations and Networks

This section imposes an excise tax for the calendar year 1942 and each succeeding calendar year upon every person who during the year operates a radio broadcasting station or engages in network broadcasting at any time during such calendar year. The tax is equal to a given percentage of net time sales during the year. A net time sale is the gross amount received or accrued from a sale of radio time, not including the amount of any commission paid or incurred for broadcast time to other persons operating radio stations or engaged in network broadcasting. Such other persons are in turn liable with respect to the persons operating radio stations or engaged in network broadcasting at any time during such calendar year. The and each succeeding calendar year upon every person who during this chapter.”

### Taxes on Advertising

#### EXTENSION OF REMARKS

OF HON. FRANK E. HOOK

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, July 30, 1941

TELEGRAMS FROM MICHIGAN CITIZENS

Mr. HOOK. Mr. Speaker, under leave to extend my remarks in the Record, I include the following telegrams:

IRONWOOD, MICH., July 29, 1941.

HON. FRANK E. HOOK,

House of Representatives,

Washington, D. C.:

In behalf of our two radio stations, WATW, Ashland, Wis., and WJMS, Ironwood, Mich., we protest as unfair, confiscatory, and discriminatory, the proposed taxing of radio and outdoor advertising revenue in occupational tax provision of general tax bill. Urgently request you consider carefully all points brought to your attention by National Association of Broadcasters and proceed to drastic modification or elimination of advertising taxation feature of the bill. Certainly due consideration should be given to great demands made by Government Department and defense program for free radio and billboard publicity. We have always complied with each request and propose to continue to do so, but such discriminating taxes, omitting newspapers, magazines, direct mail, etc., will make our costs much higher. Though applying to large stations now, the step will affect small stations as well.

UPPER MICHIGAN-WISCONSIN

BROADCASTING CO., INC.,

N. C. RUBBELL,

Vice President and General Manager.

### White Introduces Sweeping FCC Law Amendments

Senator White (R-Maine) on Thursday introduced a bill to make sweeping changes in the Communications Act of 1934, and urged Congress to act upon it immediately.

The senator made the following detailed explanation of the measure:

The bill today introduced by Senator White has its source in S. 1268, a bill introduced by Senator Wheeler in the last Congress; in S. 1520 introduced in the last Congress by Senator White; in recommendations recently made to the Federal Communications Bar Association by a committee thereof; in court decisions; and in recommendations found in the Report of the Attorney General’s Committee on Administrative Procedure. This measure should not be regarded as a general revision of our Communications Act of 1934, but the changes in the organization of the Federal Communications Commission, in procedure, in the sections of present law with respect to appeals to the courts, in the efforts made to assure equality of right and opportunity among those who utilize radio for public discussion and finally the attempt to further provide against censorship, make this bill of supreme importance and justify, indeed demand, its study and approval in substantially its present form by the present Congress.

There follows an explanation of the Sections of the bill.
Section 1

This section defines the terms "license," "station license" or "radio station license," appearing throughout the Act, as that instrument of authorization required by the Act or the Commission's Rules and Regulations for the use or operation of radio apparatus. This definition is made necessary because of a recent tendency upon the part of the Commission to treat what are in fact base sins as regulatory acts and thereby making possible avoidance of compliance with procedural and appellate provisions of the Act intended as safeguards against arbitrary administrative action, provisions necessary to be respected if orderly procedure is to be had. This broad definition of the term license tends to insure that result.

Sections 2 and 3

Sections 2 and 3 basically change the administrative setup and functions of the Commission. They can be summarized as the separation of the Commission of seven members into two statutory divisions of three members each and a clarification of the status and functions of the Chairman or seventh man of the Commission.

Under this plan, the whole Commission would have power and authority to hear and decide any rule or regulation of general application required or authorized by the Act, including procedural rules and regulations for the whole Commission and each division.

The whole Commission would have plenary authority over amateur services, emergency services, the qualification and licensing of operators, the selection and control of personnel, the assignment of call letters, and the various radio services, those and other subjects and services as at present. But the present judicial and quasi-judicial functions of the Commission would be vested in the proposed divisions insofar as those functions relate to the most important and controversial subjects within the jurisdiction of the Commission. Jurisdiction to hear and determine all cases arising under the Act or regulations, relating to broadcast, television, facsimile and kindred communications intended for public reception is vested in the Division of Public Communications. Similar jurisdiction with respect to communications and communications intended for a designated addressee is vested in the Division of Private Communications. This plan not only recognizes the basic and fundamental differences between the two types of communications involved and the nature of the questions presented by each but it also provides a method for obtaining proper consideration of those cases by persons who will be able to devote their time and attention to the questions committed to them without undue interruption or interference occasioned by the demands of basically different problems.

Under the plan proposed, the status of the Chairman would be that of an executive officer and coordinator participating fully in all matters of a general nature in the jurisdiction of the Commission except such functions as are comprehended under the divisions and terms of the present Act (Sections 308 and 309). These amendments to the Act which leave no doubt that such right is secured are absolutely imperative. The amendments proposed would assure this result.

Section 6

This section proposes a redraft of the transfer section of the present Act (Section 310 (b)). As now drafted, this section in terms relates only to station licenses and does not apply to construction permits or other instruments of authorization which the Commission may issue under its rules and regulations. The redraft would remedy this deficiency. The present transfer section is also silent concerning the procedure to be employed by the Commission in passing upon such applications and the proposed amendment would remedy this defect by providing that transfer applications be handled in the same manner and in accordance with the same statutory procedures employed in the handling of applications for original instruments of authorization.

Aside from these questions of procedure, the decisions of the Commission relating to transfer applications have given rise to the theory that the proposed transference of a station license may be subjected to conditions not required of an applicant for an original license. This is believed to be unsound and has been due, at least in part, to the fact that the statutory standard employed in the present transfer section differs slightly in phraseology from that used elsewhere in the Act. By providing attention to one of the same statutory standard in the proposed amendment and by the use of other clarifying language, it is believed that this cause for controversy will be eliminated.

Section 7

This section proposes amendments to Section 315 of the present Act relating to the use of broadcast facilities by candidates for public office. The amendments proposed are the deletion of the proviso clause now appearing in that section which provides that the licensee shall have no power of censorship over the material broadcast under the provisions of this section and the substitution thereof of clearer language to the same purpose found in a proposed new Section 332. This present proviso has been the source of much uncertainty and controversy. I believe the change urged clarifies and enforces the Congressional intent.
Section 8

This section of the bill proposes the addition of an entirely new section to the Act (Sec. 330) which will require the identification of the speaker in the case of broadcasts dealing with public or political questions either local, State or national in their scope and application. Ever since the enactment of the Radio Act of 1927, the law has carried a provision requiring that in the case of the commercial use of a station the person or organization sponsoring such broadcast be identified in connection with the broadcast. Such a provision is found in Section 317 of the present Act. The proposed new Section would merely carry the principle of identification further and make it obligatory in the discussion of political or public questions to make clear not only who the speaker is but whose views he expresses. It is unfortunately a fact that most propaganda by radio is found in sustaining programs or programs which have no commercial sponsor. The adoption of this new section would carry the salutory principle of identification into a field where it is much needed.

Section 9

Section 9 of the bill proposes the inclusion of a new section (Sec. 331), the effect of which would be to require the licensee of any station to afford a right of reply where public officers, other than the President of the United States, use his station for the discussion of public or political questions. This right to reply is to be exercised by the accredited representatives of the opposition political party or parties, and is to be afforded upon the same terms and conditions as the initial discussion. This substantially enlarges the scope of Section 315 of the 1934 Act. The subject matter of this proposed section merits immediate consideration.

Section 10

Section 10 of the bill proposes the addition of another new section (Sec. 332), the effect of which would be to clarify the duties and responsibilities of a licensee where his station was used by a candidate for public office or by public officers or others for the discussion of public or political questions. The "no censorship" clause of Section 315 of the present Act does not adequately define the duties of a licensee under such circumstances. The proposed new section (Section 332) affords the licensee an opportunity to examine the material to be broadcast before its intended use and to delete therefrom any material which is slanderous or libelous or which the licensee may have reason to believe would subject him or his station to any action for damages or to a penalty or forfeiture under any local, State or Federal law or regulation. This section specifically provides that no licensee of any station shall have the power to censor, alter, or in any way affect or control the political or partisan trend of any material submitted by a candidate for public office or by public officers or others discussing public and political questions. With the exception of material which might subject the licensee to damages or penalties or material which is submitted for broadcast by or upon behalf of any person or organization which advocates the overthrow of government by force or violence, the licensee has no discretion.

Section 11

Section 11 of the bill proposes a new sentence as an amendment to Section 326 of the present Act which codifies an interpretation placed upon the Act by the Supreme Court of the United States in the case of the Federal Communications Commission versus Sanders Brothers Radio Station decided March 25, 1940. In this case the Supreme Court said:

"But the Act does not essay to regulate the business of the licensee. The Commission is given no supervisory control of the programs, of business management or of policy. In short, the broadcasting field is open to anyone, provided there be an available frequency over which he can broadcast without interference to others, if he shows his competency, the adequacy of his equipment, and financial ability to make good use of the assigned channel."

Notwithstanding this pronouncement of the Supreme Court, notwithstanding the fact that no language can be found in the Act which confers any right upon the Commission to concern itself with the business phases of the operation of radio broadcast stations and notwithstanding the further fact that Section 3(h) of the Act provides that a person engaged in radio broadcasting should not be regarded as a common carrier, the Commission has nevertheless concerned itself more and more with such matters. The clear intention of Congress was that the Commission is to control both the character and source of material and the contractual or other arrangements made by the licensee for the acquisition of such material.

The amendment proposed spells out in black and white what it is believed was not only the original intention of Congress but the present tenet of the Commission, that in the hope that conclusion and controversy can be eliminated. The amendment preserves the prohibition now contained in the Act against interference with the right of free speech and that against the utterance of obscene, indecent or profane language by means of radio communication.

Section 12

Section 12 is designed to clarify provisions of existing law relative to proceedings to enforce or set aside orders of the Commission and in appeals from decisions of the Commission. The present law upon this subject is now found in Section 402 of the Act.

Paragraph (a) of Section 402 deals with action to enforce or set aside orders of the Commission except those appealable under paragraph (b) of that section. More specifically, paragraph (a) of this section relates to those orders of the Commission entered in matters involving common carriers and certain other orders relating to radio broadcast stations not now appealable to the United States Court of Appeals for the District of Columbia under paragraph (b) of Section 402. Under the proposed amendment, all orders entered by the Commission in the performance of its licensing functions would be appealable under paragraph (b) and would not be brought before a statutory three judge district court. Moreover, suits brought before a statutory three judge court to enjoin the enforcement of an order of the Commission could be brought in the District of Columbia as well as in other judicial districts.

The principal changes proposed in paragraph (b) of Section 402 can be summarized as follows: (1) persons desiring to appeal from orders of the Commission entered in cases where the Commission exercises its licensing functions would be permitted to appeal either to the United States Court of Appeals for the District of Columbia, as at present, or to the United States Circuit Court of Appeals for the district in which they reside or have their principal place of business; (2) language is adopted which will remove doubt as to which cases are appealable and which will extend the right of appeal to persons which should have such right but which have been excluded due to imperfections in the present Act; (3) the time within which an appeal is to be taken is made thirty rather than twenty days, as at present, and the common carrier and other orders of the Commission under Section 402 are specified with certain particularity along the lines now provided by the rules of the United States Court of Appeals for the District of Columbia; (4) jurisdiction is expressly conferred upon the Court to which an appeal is taken to grant temporary relief either affirmative or negative in character; (5) the Court is given authority to specify by rule what the record upon appeal shall contain; (6) the questions which can be raised upon appeal and which the Court must consider in determining an appeal are specifically enumerated; and (7) the Commission will be required to comply with the mandate or decision of the Court upon the basis of the record upon which an appeal is taken unless the Court upon petition shall otherwise determine. Other provisions of the present Act relating to the right of persons to intervene in an appeal and the right to review by writ of certiorari the judgment rendered by the courts upon such appeal are retained.

All of these changes are, in my opinion, not only desirable but necessary if adequate judicial review of the Commission's exercise of its licensing function is to be made effective. Present language of Section 402 and particularly paragraph (b) thereof is so vague as to cast further doubt upon the meaning and application of these provisions. It is hoped that the changes made by a recent decision of the United States Court of Appeals for the District of Columbia which finds that court to be without jurisdiction to grant interim or temporary relief to any licensee where an order of the Commission is appealed from notwithstanding the fact that it has been the uniform practice of that court to grant such relief in meritorious
cases since the first appeal taken to that court under the Radio Act of 1927.

Generally speaking, the same considerations which controlled the Attorney General's Committee on Administrative Procedure in the making of its recommendations concerning judicial review of the decisions and orders of other administrative tribunals have prompted the amendments to Section 402 here proposed. But I have gone further in certain respects than the Attorney General's Committee and have attempted to adapt the theory of that report to the peculiar problems incident to the licensing of radio stations and the review of decisions and orders of the Commission in licensing such stations.

Section 13

Section 13 of the bill provides for such changes in Section 405 of the present law relating to the subject of rehearings as are necessary to conform to the changes in the administrative organization of the Commission proposed in sections 2 and 3 of the bill. Further provision is made for delaying the effective date of any decision, order or requirement made in any case which is the subject of petition for rehearing until after final decision upon such petition. An attempt has also been made to eliminate doubt now prevalent concerning when his petition for rehearing must be filed before judicial review of the Commission's order can be had.

Further, the provisions of the amendment proposed, the petition for rehearing will not be a condition precedent to judicial review except where the party seeking such review was not a party to the proceeding before the Commission resulting in such order or where the party seeking such review relies upon questions of law or fact upon which the Commission has been afforded no opportunity to pass.

Section 14

Section 14 of the bill proposes an amendment to paragraph (a) of Section 409 of the present Act which deals with the cases heard by less than a quorum of the Commission or either division thereof. The procedure employed by the Commission in cases of this character has led to a great deal of complaint and has been condemnatory of the lack of uniformity both in the handling of such matters and the character of reports submitted by the hearing officer. The proposed amendment requires not only the submission of a uniform type of report setting out in detail and with particularity all basic or evidentiary facts developed as a result of the evidence taken but also conclusions of fact and law upon each issue submitted for hearing. It further makes mandatory the hearing of oral argument by the Commission or the division having jurisdiction of any case upon request of any party before the entry of a final order. The Commission or the division is also required to accompany any final order with a full statement in writing of all the relevant facts as well as conclusions of law upon those facts.

Section 15

Section 15 of the bill proposes the addition of an entirely new section. This section is designed to curb an alleged tendency upon the part of the Commission to discriminate in a manner not authorized by the statute between applicants for broadcast and other radio licenses, and to require the exercise of those powers which are necessarily incident to the exercise by it of those powers expressly enumerated. In addition, it must exercise those powers which are necessarily incidental to the exercise by it of those powers expressly enumerated. It is not, however, authorized or permitted to set itself up as a general legislative body making broad rules of conduct and decision wholly apart from and beyond the language of the statute. The tendency to do this, prevalent among virtually all administrative tribunals, has recently become very aggravated at the Commission. This, in my opinion, must be arrested by the enactment of specific legislation along the lines here suggested.
and legislative reports, to represent the Commission or any division thereof in all matters requiring conferences or communications with representatives of the public or other governmental officers, departments, or agencies and generally to accound for the organization and operation of each division thereof in such manner as to promote prompt and efficient handling of all matters within the jurisdiction of the Commission. The Chairman of the Commission shall not be a member of or serve upon either of said divisions, except that in the event of a vacancy or the absence or inability of any Commissioner appointed to serve thereon, the Chairman may temporarily serve on either of said divisions with full power as a member thereof until the cause or circumstances requiring said service shall have been eliminated or corrected.

"(c) Each division of the Commission shall choose its own chairman, and, in conformity with and subject to the foregoing provisions of this section, shall organize its membership and the personnel assigned to it in such manner as will best serve the prompt and orderly conduct of its business. Each division shall have power and authority by a majority thereof to hear and determine, order, certify, report, or otherwise act as to any said work, business, or functions over which it has jurisdiction. Any order, decision, report made or other action taken by either of said divisions with respect to any matter within its jurisdiction, shall be final and conclusive, except as otherwise provided by this section and the Communications Act of 1934 as hereby amended. The decision after hearing unless the authorization involved in such grant is necessary to the maintenance or conduct of an existing service, in which event the Commission shall authorize the applicant to utilize the facilities or authorization in question pending the Commission's decision after hearing on said protest.

"(d) Such station licenses as the Commission may grant shall be in such general form as it may prescribe, but each license shall contain, in addition to other provisions, a statement of the following: (1) the name or names of the person or persons, or the corporation holding such instrument of authorization, by whom the license is directed shall be postponed to the date of the Commission's decision after hearing unless the authorization involved in said section and inserting in lieu thereof the following:

"The Commission may grant the instruments of authorization required by this Act entitling the holder thereof to construct or operate radio apparatus for the transmission of energy, or communications, or signals by radio only upon written application therefor received by it."

"(f) Any person, who would be entitled to challenge the legality of any grant hereof, such grant shall remain subject to protest as hereinafter provided, for a period of thirty days. During such thirty-day period, any person, who would be entitled to challenge the legality or propriety of such grant under the provisions of Section 402 of the Act, may file a protest directed to such grant, and request a hearing on said application so granted. Any protest so filed shall contain such allegations of fact as will show the protestant to be a proper party in interest and shall specify with particularity the matters and things in issue but shall not include issues or allegations of law. Such hearing shall be in such general form as it may prescribe, but each license shall contain, in addition to other provisions, a statement of the following: (1) the name or names of the person or persons or corporation holding such instrument of authorization, by whom the license is directed shall be postponed to the date of the Commission's decision after hearing unless the authorization involved in such grant is necessary to the maintenance or conduct of an existing service, in which event the Commission shall authorize the applicant to utilize the facilities or authorization in question pending the Commission's decision after hearing on said protest.

"(d) Such station licenses as the Commission may grant shall be in such general form as it may prescribe, but each license shall contain, in addition to other provisions, a statement of the following: (1) the name or names of the person or persons, or the corporation holding such instrument of authorization, by whom the license is directed shall be postponed to the date of the Commission's decision after hearing unless the authorization involved in such grant is necessary to the maintenance or conduct of an existing service, in which event the Commission shall authorize the applicant to utilize the facilities or authorization in question pending the Commission's decision after hearing on said protest.

"(e) The term “Commission” as used in this Act shall be taken to mean the whole Commission or a division thereof as required by the circumstances or the nature of the case, except that a number of cases phrased generally or in the words of the statute. Upon the making of any such broadcast the name of the speaker, the office held by him, whether such office is elective or appointive, and the Commission shall make rules and regulations to carry this provision into effect. No obligation is hereby imposed upon any licensee to allow the use of its station for the discussion of any public question whether local, State, or national in its scope or character, to which it would be in any manner, voluntarily or involuntarily, directly or indirectly, or by transfer of control of any corporation holding such instrument of authorization, to any person except upon application to the Commission and upon a finding by the Commission that the proposed transferee or assignee possesses the qualifications required of an original licensee or licensee and is capable of constructing or operating under such instrument of authorization in the public interest, convenience and necessity. The procedure to be employed in the handling of such applications shall be that provided in Section 309 of this Act, as amended,"
or appointment is exercised. Whereas more than one broadcasting station or a network of such stations is used as herein provided, the requirements of this section will be met by compliance therewith at the station which originates such broadcast."

Sec. 9. Add to said Title III the following new section:

"Sec. 331. In all cases where public officers other than the President of the United States use a radio broadcast station for the discussion of public or political questions, the licensee of any station so used shall afford a right of reply to any person designated by the accredited representatives of the opposition political party or parties. In all cases, the right of reply herein provided shall be afforded upon the same terms and conditions as the initial discussion and the Commission shall make such rules and regulations as are necessary to carry this provision into effect."
gress, upon the whole record, by substantial evidence; and (5) administrative action otherwise arbitrary or capricious.

"(f) If at the event of a decision and enter an order reversing the order of the Commission, it shall remand the case to the Commission to carry out the order. The court and shall be the duty of the Commission, in the absence of preceding to review such judgment, to forthwith give effect thereto and unless otherwise ordered by the court to do so upon the basis of the proceeding already had and the record upon which said appeal was heard and determined. The court's judgment shall be final, subject, however, to review by the Supreme Court of the United States upon writ of certiorari on petition therefor under Section 246 of the Judicial Code, as amended, by appelant, by the Commission, or by any interested party intervening in the appeal.

"(g) The Court may, in its discretion, enter judgment for costs in favor of or against an appellant, or other interested parties intervening in the appeal, but not against the Commission, depending upon the nature of the issues involved upon said appeal and the outcome thereof."

Sec. 13. Amend section 405 of said Title IV by striking out the whole thereof and by inserting in lieu thereof the following:

"Sec. 405. After a decision, order, or requirement has been made by the Commission or any division thereof in any proceeding, any party thereto or any other person aggrieved or whose interests are adversely affected thereby may petition for rehearing. When the decision, order, or requirement has been made by the whole Commission, the petition for rehearing shall be directed to the whole Commission; when a decision, order, or requirement is made by a division of the Commission, the petition for rehearing shall be directed to that division; petitions directed to the whole Commission requesting a rehearing in any matter determined by a division thereof shall not be permitted or considered. Petitions for rehearing must be filed within thirty days from the entry of any decision, order or requirement complained of and except for those cases in which the decision, order or requirement challenged is necessary for the maintenance or conduct of an existing service, the filing of such a petition shall automatically stay the effective date thereof until after decision on said petition. The filing of a petition for rehearing shall not be a condition precedent to judicial review of any such decision, order or requirement, except where the party seeking such review was not a party to the proceedings before the Commission resulting in such decision, order or requirement, or where the party seeking such review relies on questions of fact or law upon which the Commission has been afforded no opportunity to pass. Rehearings shall be governed by such general rules as the Commission may establish. The time within which an appeal must be taken under Section 402 (b) hereof shall be computed from the date upon which the Commission issues its order disposing of all petitions for rehearing filed within which an appeal must be taken under Section 402 (b) hereof."

Sec. 14. Amend paragraph (a) of section 409 of said Title IV by striking out the whole of said paragraph and by inserting in lieu thereof the following:

"(a) In all cases where a hearing is required by the provisions of this Act, or by other applicable provisions of law, such hearing shall be a full and fair hearing. Hearings may be conducted by the Commission or a division thereof having jurisdiction of the subject matter or by any member or any qualified employee of the Commission when duly designated for such purpose. The person or persons conducting any such hearing may sign and issue subpoenas, administer oaths, examine witnesses, and receive evidence at any place in the United States designated by the Commission when duly designated for such purpose. In all cases, whether heard by a quorum of the Commission or a division thereof, or by any member or qualified employee of the Commission, the person or persons conducting such hearing shall prepare and file an intermediate report setting out facts developed by the evidence as well as conclusions of fact and of law upon each issue submitted for hearing. In all cases the Commission, or the division having jurisdiction thereof, shall, upon request of any party to the proceeding, hear oral argument on said intermediate report or upon such other and further issues as may be specified by the Commission or the division and such oral argument shall precede the entry of any final decision, order or requirement. Any final decision, order or requirement shall be accompanied by a full statement in writing of all the relevant facts as well as conclusions of law upon those facts."

Sec. 15. Add to said Title IV the following new section:

"Section 417. Penalties, denials, prohibitions and conditions other than those expressly authorized by statute shall not be exacted, enforced or demanded by the Commission in the exercise of its licensing function or otherwise and no sanctions not authorized by statute shall be imposed by the Commission upon any person. Rights, privileges, benefits or licenses authorized by law shall not be denied or withheld in whole or in part where adequate right or entitlement thereto is shown. The effective date of the imposition of sanctions or withdrawal of benefits or licenses shall, so far as deemed practicable, be deferred for such reasonable time as will permit the persons affected to adjust their affairs to accord with such action or to seek administrative reconsideration or judicial review."

---

Newspaper Hearings

FCC hearings on Order No. 79, concerning newspaper ownership of radio stations, were resumed Wednesday, when de Quincy V. Sutton of the Commission staff concluded his testimony covering numerous tribunals prepared by the Commission. He was followed on the stand by Dr. Leon H. Weld, Director of Research for McCann-Erickson, New York, who explained his Radio Advertising Index and other advertising indices, and the sources of his material.

On Thursday, the morning session was taken up by the testimony of State Senator Means of South Carolina, and John M. Rivers, President of WCSC, Charleston, S. C., concerning the effect on WCSC of the ownership of WLMA by the Evening Post Publishing Co., publishers of the Evening Post and the Courier of Charleston. Hall T. McGee and Arthur E. Bradford, of the Evening Post Publishing Co., testified as to the joint operation of the newspapers and the radio station, stating that the newspapers are seeking to publicize the station in the community. On the point of failure to publish the program log of WCSC, Mr. McGee stated that it has been decided to publish the log as news when Senator Means made a speech in Columbia, S. C., that caused deferment of the action decided upon.

John Shepard, III, President of F-M Broadcasters, Inc., read a statement he had prepared, and which had the approval of the FMBI board, urging the Commission to give a prompt decision on pending F-M applications as the development of frequency modulation has without question, he said, been retarded by the issuance of Order No. 79.

John R. Latham, Executive Vice-President of The American Network, Inc., organized to provide F-M network program service, closed the Thursday session. He urged the elimination of F-M stations from Order No. 79, and that the Commission make a definite announcement that it will not attempt to make rules and regulations which would have the effect of preventing newspapers or newspaper interests from owning and operating F-M stations, thereby enabling The American Network to complete its organization and make high quality programs available to the F-M station associated with the network.

The hearings will continue today, when it is expected they will be recessed until mid-September.

Mr. Shepard's statement follows:

My name is John Shepard, 3rd. I reside at Brookline, Massachusetts. I am the President of F-M Broadcasters, Inc. at present comprised of 51 memberships held by 44 different persons or corporations. At the time the resolution, which has been introduced, was passed there were 42 members of the Association. The objects of the Association are set forth in the Certificate of Incorporation.

Among the 44 members of the Association at present there are 14 that have a newspaper connection or affiliation. Of the approximately 110 applications for commercial operation in the F-M field which have been filed and either acted upon or are pending action...
by the Commission, 38 are to the best of my knowledge con-
ected or affiliated with newspapers.

Since the Association is devoted to the cause of development in the field of frequency modulation, it was directed that I appear before the Commission and present the views of our Association with respect to the Commission's Order 79 and the effect which we deemed it would have on the development of frequency modulation and the effect which would result from a determination that newspapers could not properly own FM radio stations.

We are all agreed, I believe, that FM should be encouraged. This Association is bending its every effort toward the development of FM. The Commission has expressed its desire that FM develop rapidly and firmly and it is indeed the sense of Congress, as expressed in the Communications Act of 1934, that new uses of radio in the public interest be encouraged.

For any new industry to develop, there are three primarily essential elements: the necessity for it, the method of doing it, and the means to do it with. Necessity has brought about the invention by Major Armstrong of frequency modulation and the efforts and expenditures of money by him and others have developed the method by which the necessity can be met so that now we have entered the time when the means for developing frequency modulation in the public interest is the only remaining essential element to be met.

Every entry into the FM field today contributes to its development and is a pioneer in the sense that immediate profits cannot be looked for and every source of capital is needed to help this development. Every source of nourishment withheld from a new industry is as bad as spending that much capital to halt its growth. In addition the withholding of any capital fails to encourage other capital to enter the field.

Idle frequencies cannot render a service to the public, nor can they help a new industry to develop. There will be fewer idle frequencies if all people who are qualified under the Communications Act and who are willing to develop these frequencies are allowed to do so. By the term, "qualified" we mean American citizens with the technical and financial ability to develop these frequencies and render a real service to the potential listening public. I say, "potential listening public" because it is only in those areas where service is being rendered that people are buying sets. Anything more than this in the way of profits is a reward to those who have an established business to provide the necessary capital.

It should be borne in mind, because of the short license period of one year, it is necessary that this new development be financed by those who have an established business to provide the necessary capital.

May I at this time urge the Commission to give a prompt decision on this matter as the development of frequency modulation has without question been retarded by the issuance of Order Number 79.

**BMI FEATURE TUNES**

**August 4—August 11**

1. I WENT OUT OF MY WAY
2. WASN'T IT YOU
3. ALL ALONE AND LONELY
4. HI, NEIGHBOR
5. YO TE AMO, OH BABY
6. MY SISTER AND I
7. BECAUSE OF YOU
8. THE RELUCTANT DRAGON

In preparation: A rhythm novelty, Delilah.

---

**BMI NOTES**

**Sing America First**

Organization during the past week of ACES (American Composers, Entertainers and Songwriters) is keeping with the growing trend to democratize music. There is no doubt that hillbilly ballads have come into greater favor with the public as a result of BMI's open door to music. They form one of the few classifications of music which our country can claim as its own, and as such, every effort should be made to popularize them and see that their writers are properly compensated.

Many of these writers are entertainers, but a steady income from the royalties on performances of their music helps to bridge the gap between engagements, and if they produce songs of lasting appeal, a system of performance payments provides lasting income. Hillbilly tunes are associated with the happiest times in American life—barbecues, scenes around the campfires, maple syrup parties—hayrides. Most of them are sad and cling to themes that are born of loneliness. Now and then a bright one emerges. Of such is You Are My Sunshine, which, we predict, will be the first hillbilly tune to make the Hit Parade. It ranks number ten this week in national sheet music best sellers and in the mid-west has climbed to number eight.

**Bonds and Music**

Phil Kornheiser, now at BMI after twenty years experience as General Manager of Leo Feist, played a prominent part in the recruiting drives and in the sale of Liberty Bonds during the first World War. He was the first to mount pianos on army trucks and persuade songwriters to entertain street crowds with the performance of their new tunes. His most enthusiastic assistant was the late Will Rogers, who could sell more bonds than any ten security salesmen. When there was a lull in the purchases, Will would pick someone in the crowd and match him to see who bought the next bond. Others who participated in the Kornheiser song parade were Eddy Cantor, Earl Carrol and Arthur Fields. Songs popularized in this way included, Good Bye, Broadway, Hello, France, and Where Do We Go From Here, Boys.

**War Tunes**

The war clouds have yet to produce an outstanding song. The best so far is Till Revelle by Bobby Worth and Stanley Cowan, and Good Bye, Dear, I'll Be Back in a Year, by Bobby Worth and Stanley Cowan, and Good Bye, Dear, I'll Be Back in a Year, by Bobby Worth and Stanley Cowan, and Good Bye, Dear, I'll Be Back in a Year, by Bobby Worth and Stanley Cowan, and Good Bye, Dear, I'll Be Back in a Year, by Bobby Worth and Stanley Cowan, and Good Bye, Dear, I'll Be Back in a Year, by Bobby Worth and Stanley Cowan, and Good Bye, Dear, I'll Be Back in a Year, by Bobby Worth and Stanley Cowan. Songs popularized in this way included, Good Bye, Broadway, Hello, France, and Where Do We Go From Here, Boys.

Verse: “Three dots and a dash spell ‘V’
A dash and three dots spell ‘B’,
The ‘B’ for the bonds that means defense.
The ‘V’ is for victory, so let’s commence.

Chorus: Sing V FOR VICTORY.
For democracy will win.
So let everyone begin singing
V FOR VICTORY.
Use your dollars and your sense,
Buying for our defense.
In the lowlands, in the highlands,
In the valiant British islands,
In the U. S. A. from day to day,
We can see that where love of freedom rings,
V stands for Victory.
In Poland’s plains, in ancient Greece,
In Norway’s hills, there is no peace.
But they’ve all showing the hostile horde
That ‘V’ is mightier than the sword.

New BMI Publishers

Signing of contracts with publishers continues to be an almost daily occurrence at BMI as the music of new houses, large and small, is made available to subscribers. Following the completion this week of contracts, performance, broadcasting and television rights to BMI licensees are granted in the music of L. H. Buckele; Jim Cornelius; Hollywood Hit Publishers; Musico; and Charles Rinker Music Publishing Company.

Forty-five new BMI Arrangements of public domain music have been added to the ever-growing BMI catalogue and include Ken Sisson's arrangement of Charles B. Ward's The Band Played On. Also made available is the BMI Choral Edition featuring male quartet arrangements of thirty-nine BMI popular tunes.

Mother Writes—Father Publishes

One of BMI's latest offerings, A Mother's Lullaby, with lyrics by Ann Garrett Penn of Danville, Virginia, and music by Arthur Norris, will be featured at the National Tobacco Festival in South Boston, Virginia, and broadcast from there on September 5th. The song has been published by Richard T. Penn, husband of the lyricist, and dedicated to their son, George Rucker Penn, II. It was written during a visit to the Penn home in Danville by Mr. and Mrs. Arthur Norris. Mrs. Norris sings under the name of Lola Galli, and is the sister of Marie Gambarelli.

The words follow:

"An angel's lips from the blue above, Brushed your blue eyes to sleep with her love; What tender dreams did God unfold. Brushed your blue eyes to sleep with her love; What tender dreams did God unfold. Rest sweet, my baby, in heavenly peace, And pray God, my dear, that your dreams shall not cease, For your tiny eyes reveal from within, His love for mankind and should n'er grow dim. The world should stop where you've begun, With love and hate the same, dear, as one; Your dreams are sunshine out of the sky, So sleep well, my little one, where you lie."

—Copyright, 1941, Richard T. Penn.

Mr. Penn has addressed a card to the Program Directors of 647 radio stations carrying the picture of their little son. On it he writes:

"Just a word about the song that has been acclaimed so lovely—"A Mother's Lullaby" was written by a mother, the mother of the baby whose picture you see on the card (our baby boy). Its beautiful melody was composed and dedicated to him by Arthur Norris, our friend. And though, neither his mother nor myself are in the music business, it is with pleasure that we cooperate with BMI in sending you a copy of our song and we hope that you and your radio audience will enjoy 'A Mother's Lullaby'."

"I Guess I'll Have to Dream the Rest"

The increasing popularity of I Guess I'll Have To Dream The Rest reveals another talent of Martin Block, nationally famous as the producer of Make Believe Ballroom. Although the song does not mark Block's first venture into Tin Pan Alley, it is his first hit. It was written by Block in collaboration with Mickey Stoner and Harold Green.

Originally introduced by Glenn Miller, I Guess I'll Have To Dream The Rest has been recorded by Miller, by Tommy Dorsey and Bobby Byrne. It is a favorite in the music machines throughout the country.

Block started off in the business world as office boy to Owen D. Young and remained with Mr. Young for almost three years. Thereafter he began a roving career and his jobs, never lasting more than three months, included that of clothing salesman, drug store clerk, cloak and suiter and magazine solicitor. In the 1920's, Block decided to become a radio announcer. New York stations weren't receptive and he went to California where he worked as announcer for a group of some twenty stations. In 1935, he returned to New York and persuaded WNEW to schedule the

Make Believe Ballroom program. Today his show, broadcast twice a day, is one of the Metropolitan area's most popular attractions.

Intriguing

Delilah, a new bounce tune by Henry Manners and Jimmy Shirl, which has everybody bouncing at BMI, will be introduced next Monday night, August 4th, by Guy Lombardo. Strangely enough, it is the first tune carrying the name of an American girl since the craze set in for Latin-American music. We have had Maria Elena, now it's Delilah.

Cole Carries On

Maury Cole, head of M. M. Cole Company, is in New York to supervise his company's exhibit at the Annual Convention of the National Association of Music Merchants at the Hotel New Yorker. To satisfy current demand for new music, Mr. Cole has acquired the catalogues of P. C. Brockman, containing many familiar tunes, most of which are on records. He is now engaged in clearing this music for broadcasting.

"Popularity of radio singers with the public", Mr. Cole said, "is creating a demand for albums of their best known numbers".

Two biggest Cole songs remain Mexicali Rose and I Only Want A Buddy Not A Sweetheart, with the new tune, Foolish, winning favor rapidly.

Weddings

Following a long period of inactivity, romance has reared its roguish head at BMI. It may not be necessary to be in love to write love songs and to write about love songs, but apparently it helps. And apparently all of the contact with radio talent has not been left to the Contact Men's Union.

Alex Kramer, composer of So You're the One, It All Comes Back To Me Now, High On A Windy Hill and My Sister And I, is about to be married to Sally Jo Nelson. The exact date of the wedding has not been set, but according to Miss Nelson, "it will be sometime this year". A native of McKeesport, Pennsylvania, Sally Jo Nelson has won fame as a contralto singer of rhythm and ballad numbers on major network programs. She plans to continue her career after marriage.

Alan M. Fishburn, Editor of Continuity for BMI since September, 1940, will be married in October, according to present plans, to Geraldine Kay, stage and radio actress, now playing a leading part in "Orphans of Divorce" on the NBC Blue Network, and recently heard in "Second Husband" and "Manhattan at Midnight". Prior to her radio appearances, Miss Kay played with Leslie Howard in "Escape" and with Nazimova in "The Good Earth".

Mr. Fishburn is leaving BMI to become associated with NBC in Chicago as a program director and producer. He directed "Your Family and Mine" for Seiltest, Inc., over NBC and CBS networks in 1938 and 1939. In the legitimate field, he staged the American premier of T. S. Eliot's "Murder in the Cathedral", and Auden & Isherwood's "The Ascent of F-6" in 1936 and 1937 respectively. He wrote "Let's Go To Work" for WOR in 1940.

Alexander the Swoose

Alexander Swoose, that strange little animal of aquatic parentage, is finally available to all BMI subscribers. The song, popularized by Kay Kyser and others, has been licensed directly up to the present time, but now comes to BMI through the Mann Music Company.

Master Swoose is the most likeable comic character invented since Mickey Mouse and there have been reports that his adventures will be recorded in celluloid.

KROC Comments

From Cal Smith, Music Director of KROC, Rochester, Minnesota:

"You might be interested in this reaction to BMI music that I received last week when I attended a stage performance by Paul
Whiteman and his orchestra at the Orpheum Theatre in Minneapolis.

“Naturally, the Whiteman theme, Rhapsody In Blue, received some applause, but as the show progressed and current BMI tunes were played, the audience showed their appreciation by applauding loudly. ASCAP favorites received little and sometimes no applause. It was interesting to me to have this audience reaction to BMI, because we’re 100% BMI here at KROC. Have noticed, too, that local bands broadcasting over this station more and more are getting requests to play and play again BMI owned or controlled tunes. Out hats are off to BMI and all it stands for!”

Sales

Shapiro & Schoenbrod Explain

The Shapiro & Schoenbrod Agency of Chicago solicited per-inquiry deals on behalf of Monarch Cameras and listed 18 stations as “among the many now successfully merchandising” the product. As previously reported here, investigation showed that these stations received the Monarch business from a different agency, and at full rates. Because of the widespread misunderstanding created, we publish the Shapiro & Schoenbrod reply to the NAB:

“... As to any false impressions I sincerely wish to say that there was no ulterior motive in listing 18 radio stations. In doing so we made no representations that Shapiro & Schoenbrod had bought time with all these stations nor had we inferred or wished to infer that these stations were on a per inquiry basis. Persons active in radio know that most of these stations listed would not accept an account under these terms... “Please believe us when we say that we are in complete accord with the policies of the NAB. However, it was the opinion of our client that there were certain types of stations during the summer whose listening audience did not merit any consistent expenditures and who nevertheless possessed markets worth consideration. It was the desire of our client to test these markets in a conservative fashion as possible. Consequently we took the action of which you have knowledge, offering a per inquiry deal to several stations expecting that those who were interested would so advise us and the rest would merely ignore our solicitation. Any letters that we sent out were forwarded as of July 14, 1941. No more have been sent out and we do not intend to forward any more.

"It is indeed regrettable that misunderstandings have arisen, and in the future we shall endeavor to avoid any such occurrences. In closing may I say that any cooperation that you desire from Shapiro & Schoenbrod will be gladly extended.”

Labor

Cost of Living

The Labor Department reports that the cost of living for wage earners and lower salaried workers increased 3.4 per cent during the three months ended June 15. The cost of living June 15 was 6 per cent higher than it was when the European war broke out.

The department’s index on June 15 stood at 104.6. In this index, 100 represents the average cost of living in 1935-39.

New A. F. of M. Agreements

The networks have made new contracts with the American Federation of Musicians, covering musicians employed in New York City. They provide for employment of 130 staff musicians by NBC and half that number by CBS. The regular weekly rate is $150.

Wage and Hour Act

Traveling time. There have been a great many questions about how to calculate hours worked in the case of announcers and engineers traveling for remotes. Here is the way it works:

If an employee is sent out for a single day, returning the same day, his working time is calculated from the time he leaves the studio until he returns to the studio, lunch hour excepted.

If an employee is sent out for more than one day, he is each day to be paid for his usual working day, provided he does not actually work longer than his usual time in any of his days out of town.

The Wage and Hour Division now holds that there is nothing in the Act to prevent an employer from paying an employee a lesser hourly rate for traveling time than he pays for regular time. For instance, an announcer who regularly receives $80 for a 40 hour week ($2 an hour) could be paid 30 cents an hour for time spent in traveling. His rate for overtime purposes then would be determined by dividing his total compensation by his total hours worked. Whether the institution of such a plan would be good personnel policy, however, is another question.

Any broadcaster having any questions about this matter should address the NAB Labor Relations Director.

New Union

A new union entered the broadcasting picture recently when NBC and CBS signed contracts with the I.A.T.S.E. (stage hands, movie operators, movie cameramen, etc.) covering certain television employees.

National Defense

First Reports Arrive

First two July National Defense Broadcast Reports to be received by NAB came from: George E. Joy, manager, WRAC, Williamsport, Pa., and Gerald J. Money, manager, WNLC, New London, Conn. They arrived in the same mail Thursday morning. Next mail two hours later brought reports from Lester Spencer, program manager, WHIO, Dayton, Ohio; Simon Goldman, manager, WJTN, Jamestown, N. Y.; WBRK, Pittsfield, Mass., and W. A. Wilson, manager, WOPI, Bristol, Tenn.

As soon as other station executives have had sufficient time to forward reports the industry will have an outstanding story to tell. It is hoped to receive reports from all U. S. stations.

Keep 'em Flying

Seven hundred and fifty (750) stations have signaled their longtime cooperation in the "Keep 'em Flying" campaign in behalf of the Army. Previously unreported cooperating stations are:

KDTH—Dubuque, Iowa
KJW—Lamar, Colo.
KODL—The Dalles, Ore.
KGRM—Greenwood, Miss.
WHAZ—Troy, N. Y.
WILM—Wilmington, Del.

Kay Pyle, general manager, KFBI, Wichita, has a new station break announcement given at least once each hour. It is:

"KFBI, the Air Capital of the United States, Wichita, Kansas. Keep 'em Flying."

Aluminum Campaign

WSUN, St. Petersburg, Fla., did its part in the aluminum recovery drive. Besides carrying a heavy schedule of announce-
ments, the station offered the use of its mobile unit to aid in the house-to-house campaign. WSUN announcements who volunteered their services collected a variety of articles which ranged from permanent waving machines to stoves.

To launch the aluminum campaign in Los Angeles, station KRKD arranged a broadcast from the steps of the Los Angeles City Hall. After Mayor Fletcher Bowron officially declared the aluminum drive open a group of Girl Scouts each deposited a piece of scrap aluminum in a huge bin, thereby making natural sound effects for KRKD’s microphone. Other speakers on the show were Lucille Ball, Ann Shirley, Helen Gahagan, Sol Lesser and various civic leaders. George Hjelte, director of the Los Angeles City Playground and Recreation Department, was chairman of the Los Angeles Aluminum Drive.

New ND Sustainers

WRVA, Richmond, is presenting a weekly series of national defense dramatizations from the studio. This, wrote Walter R. Bishop, director of public relations, is in addition to your spot announcements.

KROD, El Paso, Texas, has a new show, “Calling All Men,” each Monday, Wednesday and Friday for the exclusive purpose of publicizing various ND releases. Shows are each a quarter hour long, wrote William Jolesch, director of publicity, “and we believe that much benefit will result in the El Paso-Southwest listening area.”

Muzak License

In connection with Neville Miller’s statement (NAB Reports, p. 595) about the license granted by the FCC to the Muzak Corporation, Muzak says:

“Muzak will not use radio as a means of transmitting its musical program to restaurants and hotels. This is a special service and will be continued as such over telephone lines. The air will be used solely for transmitting programs to the general public. Such a service is not possible over telephone lines at costs low enough to enable the public to obtain the service.

“It has never been our thought that the program service which we will give the public will serve as a substitute for the fine programs furnished the public by advertising sponsors. Our program will be so to speak a standby service always available to those who are not interested in the sponsored programs available from time to time. In fact we shall probably remind our subscribers from time to time or call their attention to radio programs of special interest. Likewise our news service will be supplemental to other news broadcasts, merely keeping our subscribers informed of the most recent news.”

Federal Communications Commission

Noncommercial FM for Chicago

The Chicago Board of Education was granted a construction permit for a new noncommercial educational broadcast station to serve the elementary, high school, junior college, and adult educational classes in that city’s public school system. The station, which will use FM (frequency modulation) emission, is authorized to operate on 42,500 kilocycles with power of 1000 watts.

The Board of Education which now broadcasts approximately 25 programs each week over local standard broadcast stations, proposes to use the noncommercial service to transmit scholastic programs during school hours, and for perhaps one hour in the evening on five days a week. Subjects will embrace music, art, science, literature, news, social studies, safety, national defense, and Pan Americanism. The board has appropriated $10,750 for this purpose. The transmitter will be at 228 North LaSalle Street.

This is the seventh station of its kind which the Commission has authorized to date.

FM Towers

The FCC made the following statement concerning the location of antennas for high frequency (FM) broadcast stations on tower radiators of standard broadcast stations:

The purpose of the following is to clarify the Commission’s requirements regarding the common location of antennas for high frequency (FM) broadcast stations with those of standard broadcast station.

The Commission will consider an application for authority to install the high frequency antenna in accordance with the principles set forth in the rules and standards for high frequency broadcast stations independently of the operating and economic advantages which obtain through common location of two stations. If the site and antenna system comply with the Commission’s rules certain additional requirements must be met in order to insure that the operation of the standard broadcast station is not adversely affected.

In the instance where the standard broadcast station involved employs a non-directional antenna the licensee will be required to file FCC Form No. 306 giving new resistance measurements after the installation and testing of the high frequency broadcast antenna. During the installation of the antenna and until the new resistance determination is approved, the licensee should apply for authority to operate the station by the indirect method of authorization (Form 306). Authorization will be for a new high frequency broadcast license for the associated high frequency broadcast station will not be considered until Form 306 is filed for the standard broadcast station.

When it is proposed to install a high frequency antenna on one element of a standard broadcast directional antenna system, it will be necessary to file application for modification of construction permit for the standard broadcast station with the application for construction permit for the high frequency broadcast station. The granting of the modification for the standard station will, of course, contingent upon the granting of the construction permit for the high frequency broadcast station. FCC Form No. 304 should include a complete engineering study setting forth fully the effect of the high frequency antenna upon the operation of the standard broadcast antenna system. Depending on the individual case the Commission may require certain field measurements on the standard broadcast station following the installation of the high frequency (FM) antenna system. The application for license to cover the construction permit for the FM station will not be considered until the license has made a satisfactory showing with Form 302 that the installation of the FM antenna has not adversely affected the operation of the standard broadcast station.

The installation of the high frequency antennas on towers of standard broadcast stations may require certain additional lighting. The applicant should supply complete information showing the mechanical details thereof so that the additional hazard to air navigation may be evaluated together with the additional lighting which may be required.

From the FCC Mail Bag

A certain West Coast amateur sent the Federal Communications Commission a routine application for modification of license to permit change of address. Not realizing that the Commission’s routine functioning has to be subordinated to more important duties in connection with the national defense, this amateur became impatient that he did not receive instant action and sent a follow-up “letter” transcribed on a phonograph record. After the necessity of playing it to see what it was all about, the Commission attached the disk to the “ham’s” application papers.

A certain broadcast station asks whether its customary use of the Morse Code “V” before and after news broadcasts is complicated by the fact that this symbol has become a victory signal by Great Britain in her war efforts. The Commission has no reason to believe that continued use of this symbol by the station in question violates any law or is contrary to the public interest.

Has a person who has been convicted of a felony and has served the prison sentence imposed the right to make application to the FCC for a new license to operate a broadcasting station? See Section 3.3(e) of the Rules Governing Standard and High Frequency Broadcast Stations and Section 19 of the Standards of Good Engineering Practice Concerning Standard Broadcast Stations.
for a radio operator’s license?” a Californian asks. The Commission replies:

“Section 303(1) of the Communications Act of 1934, as amended, provides that the Commission shall ‘have authority to prescribe the qualifications of station operators, to classify them according to the duties to be performed, to fix the forms of such licenses, and to issue them to such citizens of the United States as the Commission finds qualified.’ The Act does not specifically prohibit the issuance of a radio operator’s license to one convicted of a felony, unless, of course, loss of the individual’s United States citizenship resulted from such conviction. The duty of determining the qualifications of any applicant for an operator’s license is, however, imposed upon the Commission, and in the fulfillment of that duty all of the facts concerning any particular application must be weighed. In any event, there is no statutory bar to the filing of an application for license by such person.”

Add radio program suggestions which the Commission itself cannot consider, though advising the parties to write to stations or networks direct:

Suggestion by a Salisbury, Md., resident that newspapers and radio stations be restricted in the publishing of vivid accounts of airplane disasters.

Suggestion by an Atlanta listener than an announcement be made before and after each newscast originating abroad that such broadcast has been censored.

A representative of a certain labor union writes the Commission:

“I wish to congratulate the Federal Communications Commission on the statement made in the last paragraph of your notice dated July 15, 1941, and addressed to Shipowners, Ship Masters, Radio stations or matters in cases designated for hearing before the Commission during the week beginning Monday, August 4. They are subject to change.

FCC Assignments

The FCC announces that the work, business and functions of the Commission for the month of August have been assigned as follows:

Commissioner Walker: Designated to determine, order, report or otherwise act upon all applications or requests for special temporary standard broadcast authorizations.

Same: Designated to hear and determine, order, certify, report or otherwise act upon: (a) except as otherwise ordered by the Commission, all motions, petitions or matters in cases designated for formal hearings, including all motions for further hearing, excepting motions and petitions requesting final disposition of a case on its merits, those having the nature of an appeal to the Commission and those requesting change or modification of a final order made by the Commission; provided, however, that such matters shall be handled in accordance with the provisions of Sections 1.251 and 1.256, inclusive, of the Commission’s Rules of Practice and Procedure; (b) the designation pursuant to the provisions of Sections 1.231 to 1.232 of the Commission’s Rules of Practice and Procedure of officers, other than Commissioners, to preside at hearings.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings are scheduled to be held before the Commission during the week beginning Monday, August 4. They are subject to change.

Tuesday, August 5

KFNF—KFNF, Incorporated, Shenandoah, Iowa.—Renewal of license, 920 kc., 500 watts night, 1 KW day, S-KUSD.

Wednesday, August 6

KGLU—Gila Broadcasting Co., Safford, Ariz.—Renewal of license, 1150 kc., 250 watts, unlimited time.

Thursday, August 7

WJAG—The Norfolk Daily News, Norfolk, Nebr.—C. P., 770 kc., 1 KW, daytime. Present assignment: 1000 kc., 1 KW, limited to WRAL and WTIC.

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

August 27

WBGB—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Renewal of license, 990 kc., 1 KW, daytime.

WRDO—WRDO, Incorporated, Augusta, Maine.—Renewal of license, 1100 kc., 100 watts, unlimited time.

August 28

NEW—West Allis Broadcasting Co., West Allis, Wis.—C. P., 1180 kc., 250 watts, daytime.

KMA—May Broadcasting Co., Shenandoah, Iowa.—Renewal of license, 960 kc., 1 KW night, 5 KW day, unlimited time.

September 3

To Be Held in Atlanta, Georgia

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license (main and auxiliary), 920 kc., 1 KW night, 5 KW LS, unlimited time.

September 18

September 22

WJPR—John R. Pepper, Greenville, Miss.—C. P., 1600 kc., 1 KW, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WFAM, Inc., LaFayette, Ind.—Granted construction permit for a new station to operate on 1230 kc., 100 watts, unlimited time. Exact transmitter site and antenna system to be determined subject to Commission’s approval. To use old WFAM call letters (B4-P-3146).
Howard H. Wilson, Osblish, Wisc.—Granted construction permit for new station to operate on 1490 kc., 250 watts, unlimited time (B4-P-3110).

Trent Broadcast Corp., Trenton, N. J.—Granted construction permit conditioned upon certain interference precautions, for a new station to operate on 920 kc., 1 kw power, unlimited time, using directional antenna day and night (B1-P-2861).

Board of Education, City of Chicago, Chicago, Ill.—Granted construction permit for new noncommercial educational broadcast station to operate on 45500 kc.; emission: special for frequency modulation, 1 kw power, unlimited time (B4-PED-22).

KUTA—Utah Broadcasting Co., Salt Lake City, Utah—Granted modification of construction permit (B5-P-2342) to increase day power to 5 kw, make changes in equipment, changes in directional antenna and move transmitter to North Lake St. and Midland Ave. (9 miles north of main business district of Salt Lake City), extend commencement date to 60 days after grant and completion date to 180 days thereafter (Station operates on 15700 kc., 250 watts, unlimited time, with C. P., for 1 kw, unlimited time, DA night and day) (B5-MP-1248).

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Granted construction permit to change frequency from 1180 to 590 kc.; increase power from 500 watts night, 1 kw day, to 5 kw day and night; install new equipment and directional antenna for night use, and move transmitter to 4 miles northeast of Atlanta between Gun Club Road and Sweat Drive (B3-P-2938).

KVOH—Colorado Radio Corp., Denver, Colo.—Granted construction permit to install a new transmitter, increase power from 1 to 5 kw, and make changes in directional antenna for day and night use, same pattern day and night; 630 kc. (B5-P-2663).

KMYR—F. W. Meyer, Denver, Colo.—Granted modification of license to increase night power from 100 to 250 watts; 1340 kc., 250 watts day, unlimited time (B5-MI-1074).

WGEM—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Granted modification of license to increase time of operation to unlimited; 1390 kc., 500 watt per day, unlimited time, C. P. for 5 kw unlimited time, (DA) (B4-MI-1082).

KTKE—Tulare-Kings Counties Radio Associates, Visalia, Calif.—Granted construction permit to change frequency from 920 to 910 kc., increase power from 1 to 5 kw day and night, make changes in directional antenna system for day and night use and install new transmitter, upon condition that applicant takes care of all blanketing complaints (B5-P-3159).

KITE—First National Television, Inc., Kansas City, Mo.—Granted renewal of license on a temporary basis for a period of 60 days, 1290 kc., 1 kw, unlimited time (B4-R-1019).

KWAL—Chester Howarth and Clarence Berger (Assignors), Silver Broadcasting Company (Assignees), Wallace, Idaho—Granted consent to assignment of license to KWAL, from Chester Howarth and Clarence Berger, to Silver Broadcasting Co.; station operates on 1150 kc., 250 watts, unlimited time, (B4-J-308).

WHIP—Hammond-Calumet Broadcasting Co., Hammond, Ind.—Granted renewal of license for station WHIP and construction permit, subject to certain engineering requirements, to change hours of operation from specified to unlimited, and install directional antenna for both daytime and nighttime use; 1529 kc., 5 kw power (B4-P-2399—Docket 5863).

KGFI—Eagle Broadcasting Co., Inc., Brownsville, Texas—Granted renewal of license for station KGFI upon a regular basis for the period ending December 1, 1941, in lieu of the temporary license under which station is now operating. Station has now furnished the Commission satisfactory evidence of the fact that James G. Ulmer has been completely eliminated from any connection whatsoever with the station and will not in the future be associated or connected therewith.

WCAM—WCAM Broadcasting Co., Newton Square, Pa.—Granted request to extend effective date of Sec. 4.45 of the Commission’s Rules as it applies to WCAM to October 25, 1941 (This section requires all international stations to operate with power of not less than 50 kw; station WCAM now uses 10 kw).

RENEWAL OF LICENSES

The following stations were granted renewal of licenses on a regular basis: KALE, Portland, Ore.; KGX, Wolf Point, Mont.; KGER, Long Beach, Cal.; WBBR, Brooklyn, N. Y.; WHAZ, Troy, N. Y.; WHOM and auxiliary, Jersey City, N. J.; WLOL, Minneapolis, Minn.

WORK—York Broadcasting Co., York, Pa.—Present license extended upon a temporary basis only for the period August 1 to September 30, 1941, pending determination upon application for renewal (B2-S-803).

WIRE—Indianapolis Broadcasting, Inc., Indianapolis, Ind.—Present license extended upon a temporary basis only for the period August 1 to September 1, pending determination upon application for renewal (B4-S-944).

WIRE—Indianapolis Broadcasting, Inc., Indianapolis, Ind.—Present license extended upon a temporary basis only for the period August 1 to September 1, pending determination upon application for renewal (B4-S-944).

KELA—Central Broadcasting Corp., Chehalis, Wash.—Present license extended upon a temporary basis only, pending determination upon application for renewal of license, for the period August 1 to October 1, 1941 (B5-S-949).

KCRC—Enid Radiophone Co., Enid, Okla.—Present license extended upon a temporary basis only, pending determination upon application for renewal of license, for the period August 1 to October 1, 1941 (B3-S-465).

KSO—Ernest L. Finley, Santa Rosa, Cal.—Present license extended upon a temporary basis only, pending determination upon application for renewal of license, for the period August 1 to September 1, 1941, pending receipt of and determination upon application for renewal of license (B1-S-346).

WCNW—Arthur Fiske, Brooklyn, N. Y.—Present license extended upon a temporary basis only, for the period August 1 to September 1, 1941, pending receipt and determination upon application for renewal of license (B1-S-346).

WKAT (Aux.)—Frank Katzentine, Miami Beach, Fla.—Present license extended upon a temporary basis only, for the period August 1 to September 1, 1941, pending receipt and determination upon application for renewal of license (B3-S-947).

WWW—Long Island Broadcasting Corp., Woodside (L. I.), New York—Present license extended upon a temporary basis only, for the period August 1 to September 1, 1941, pending receipt and determination upon application for renewal of license (B1-S-721).

DESIGNATED FOR HEARING

Cuyahoga Valley Broadcasting Co., Cleveland, Ohio—Application for new station to operate on 1300 kc., 1 kw, daytime only (B2-P-1897).

Tidewater Broadcasting Co., Norfolk, Va.—Application for new station to operate on frequency 1190 kc., 250 watts power, unlimited time (B2-P-3127).

R. M. Wallace and G. E. Schnihelen, d/b as Norfolk County Broadcasting Co., Norfolk, Va.—Application for new station to operate on 1190 kc., 250 watts, unlimited time, Exact site to be determined subject to Commission’s approval (B2-P-3209).

Portsmouth Radio Corp., Portsmouth, Va.—Application for new station to operate on 1190 kc., 250 watts, unlimited time, Exact site to be determined subject to Commission’s approval (B2-P-3209).

Seaboard Broadcasting Corp., Tampa, Fla.—Application for construction permit for new station to operate on 1390 kc., 1 kw, unlimited time (B3-P-2813).

WTNJ—WOAX, Inc., Trenton, N. J.—Application for modification of license (Docket 1019), for unlimited time (facilities of WCAM and WCAP, with which it shares time on 1310 kc.), to be heard in consolidation with application of WDDA, Philadelphia, to use 1260 kc. (Docket 6049); WCAM, Camden, N. J., for renewal and modification of license (Dockets 5778 and 6145), now uses 10 kw; WCAP, Ashbury Park, N. J., for renewal of license (Dockets 5778 and 6145).

August 1, 1941—655
WING—Great Trails Broadcasting Corp., Dayton, Ohio.—Granted special temporary authority to conduct point to point communication service over station WING for five-minute periods on the hour, beginning at 8 a. m. EST, and ending at 2 p. m. EST, July 24, 1941, only, in order to allow Mayor Brennan and his committee to issue instructions to the 1600 women and 1600 girl and boy scouts, each equipped with a portable radio, who are participating in the Dayton Armistice Day National Observation and Speaking Day activities.

City of New York, Municipal Broadcasting System, N. Y.—Granted special temporary authority to operate regularly licensed relay broadcast station at the Statue of Liberty National Monument, Bedloe's Island, for the purpose of transmitting program material to station WNYC in connection with ceremonies from the Ninety-second Anniversary of Emma Lazarus, arranged by the National Park Service and American Committee for the Foreign Born, on July 22, 1941, only, waiving Section 4.21 as it precludes use of relay broadcast station where wire facilities are available.

WCAM-WCAP—City of Camden, N. J., Radio Industries Broadcast—Granted petition for leave to amend application for FM station to change frequency from 4310 (1 kc.) to 4610 kc., and mileage from 20.417 to 10.240 miles, and application removed from hearing docket.

WYNO—WRDO, Inc., Augusta, Maine.—Motion for 60-day postponement of hearing on application for renewal of license, now scheduled for July 25, 1941, until date to be hereafter fixed by further order of the Commission.

Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Continued hearing in re application of site and transmitter site (B3-MP-1313).

W2XBB—Bamberger Broadcasting Service, Inc., New York, N. Y.—Granted license to cover construction permit (B2-L-1443), for extension of completion date to August 22, 1941, and January 22, 1942, respectively (B1-MPVB-51).

KECA (Aux.)—Earle C. Anthony, Inc., Los Angeles, Cal.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1112).

KFI (Aux.)—Earle C. Anthony, Inc., Los Angeles, Cal.—Granted authority to determine operating power by direct measurement of antenna input (B5-Z-1143).

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Granted license to cover construction permit (B2-P-2251, for new station), 1120 kc., 100 watts night, 250 watts, unlimited time (B2-L-1441). Also granted authority to determine operating power by direct measurement of antenna input (B5-Z-1143).

WDBJ—Times-World Corp., Roanoke, Va.—Granted license to cover construction permit (B2-P-2522), for installation of DA for night use, increase in hours of operation and power, change in frequency under NARBA, 1290 kc., 1 KW, unlimited time, DA (B2-L-1449). Also granted authority to determine operating power by direct measurement of antenna input (B2-Z-1157).

WPEC—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Granted license to cover construction permit (B2-P-2658, for installation of new transmitter, changes in DA system, and increase in power to 5 KW (B2-L-1446). Also granted authority to determine operating power by direct measurement of antenna input (B2-Z-1146).

WJBK—WJBK, Inc., New Castle, Pa.—Granted license to cover construction permit (B1-P-243, which authorized increase in power and installation of DA for night use, 980 kc., 5 KW, unlimited time, DA-X) (B1-L-1450). Also granted authority to determine operating power by direct measurement of antenna input (B1-Z-1151).

WGBK—Buffalo Broadcasting Corp., Buffalo, N. Y.—Granted license to cover construction permit (B1-P-2902 for new transmitter, installation of DA for day and night use, increase in power and move of transmitter) for extension of completion date to October 17, 1941 (B1-MP-1342).

WGNY—WGNY Broadcasting Co., Inc., Newburgh, N. Y.—Granted modification of construction permit (B1-P-2948, for new transmitter, increase in power, change in frequency) for authority to install modulation monitor and automatic frequency control equipment (B1-MP-1343).

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio—Granted modification of construction permit (B2-P-2547, to install new transmitter and DA for night use, increase power, change in hours of operation) for authority to install new transmitter and transmitter site (B2-MP-1344).

KTBI—Tacoma Broadcasters, Inc., Tacoma, Wash.—Granted modification of construction permit (B5-P-2028, for a new station) for approval of antenna, of transmitter site at 204 S. 11th St., Tacoma; change in type of transmitting equipment to 840 kc., 100 watts, unlimited time (B5-MP-1341).

KRKO—The Everett Broadcasting Co., Inc., Everett, Wash.—Granted license to cover construction permit (B5-AF-33, for new transmitter, vertical antenna, increase in power, change in hours of operation, change in antenna input) for 1100 kc., 100 watts night, 250 watts, limited time (B5-L-1444). Also granted authority to determine operating power by direct measurement of antenna input (B5-Z-1147).
Southern California Broadcasting Co., Pasadena, Cal.—Granted
WBNX—WBNX Broadcasting Co., Inc., New York City—Petition
KFEQ—KFEQ, Inc., St. Joseph, Mo.—Granted petition to inter¬
KGMB—Hawaiian Broadcasting System, Ltd., Honolulu, T. H.—
KOMO—Fisher's Blend Station, Inc., Seattle, Wash.—Granted
WBNS—WBNS, Inc., Columbus, Ohio—Granted authority to de¬
WQAM—Miami Broadcasting Co., Miami, Fla.—Granted au¬
WSPA—Spartanburg Advertising Co., Spartanburg, S. C.—
WJBW—Charles C. Carlson, New Orleans, La.—Granted au¬
WEVD—Dels Memorial Radio Fund, Inc., New York City.—
WMFD—Richard Austin Dunle, Wilmington, N. C.—Granted
KKE—First National Television, Inc., Kansas City, Mo.—Granted
WMSD—Muscle Shoals Broadcasting Corp., Muscle Shoals City,
KVIC—Radio Enterprises, Inc., Victoria, Texas.—Granted au¬
KEX—Oregonian Publishing Co., North Portland, Ore.—Granted
WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted
WCCO—Columbia Broadcasting System, Inc., Minneapolis, Minn.
KPDN—R. C. Hoiles, Pampa, Texas.—Granted authority to de¬

NEW—Peter Q. Nyce, Alexandria, Va.—Construction permit for a new broadcast station to be operated on 710 kc., 1 KW, daytime. Amended: to request 1660 kc., 1 KW, unlimited time, 250 watts day and night for booster amplifier.

MISCELLANEOUS APPLICATIONS

WBLR—Columbus Broadcasting Co., Inc., Portable-Mobile, area of Columbus, Ga.—License to cover construction permit (B3-PRY-237) for a new relay broadcast station.

NEW—Telegraph-Herald, Portable-Mobile, area of Dubuque, Iowa.—License for a relay broadcast station (formerly licensed to Mason City, Globe-Gazette Co., under call KQHS), to be operated on 1622, 2058, 2150, and 2790 kc., power of 2 watts, A3 emission.

NEW—Telegraph-Herald, Portable-Mobile, area of Dubuque, Iowa.—License for a new relay broadcast station (formerly licensed to Mason City, Globe-Gazette Co., under call KDJB), to be operated on 1622, 2058, 2150, and 2790 kc., power of 125 watts, A3 emission.

KGEI—General Electric Co., near Belmont, Calif.—License to cover construction permit (B3-PB-324) as modified, for move of transmitter and increase in power.

WHER—Westinghouse Radio Stations, Inc., Portable-Mobile, area of Boston, Mass.—License to cover construction permit (B2-P-31) for installation of new transmitter and increase in power.

WGEA—General Electric Co., Schenectady, N. Y.—License to cover construction permit (B1-PB-25) as modified, for increase in power, installation of new transmitter, and change in frequencies.

NEW—James Broadcasting Co., Inc., WJRL, Portable-Mobile, area of Jamestown, N. Y.—License to cover construction permit (B1-PRE-391) for a new relay broadcast station.

FEDERAL TRADE COMMISSION ACTION

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Battle Creek Drugs, Inc., a corporation, and Consolidated Royal Chemical Corp., doing business as Consolidated Drug Trade Products and as BonKora Co., are charged, in a complaint, with false advertising and misrepresentation. Battle Creek Drugs, Inc., maintains its principal office and place of business in Battle Creek, Mich., and Consolidated Royal Chemical Corp., is located at 544 South Wells St., Chicago. (4541)

Fort Worth Peanut Company—William Parrish Bennett, trading under the names of Fort Worth Peanut Company and Bill's Peanut Company, 1001 Bryan St., Fort Worth, Texas, is charged, in a complaint, with the use of lottery methods in the sale and distribution of its products. The complaint alleges that the respondent sells to dealers certain assortments of peanuts so packed and assembled as to involve a game of chance, gift enterprise or lottery when sold and distributed to ultimate consumers. (4544)

Granite Railway Co., 1245 Hancock St., Quincy, Mass., and J. S. Swingle, Inc., 327 Willard St., Quincy, Mass., are charged in complaints with misrepresentation in the distribution and sale of granite. Both respondents are engaged in the quarrying, distribution and sale of granite blocks to be manufactured into monuments. (4545-4546)

J. T. Jarrell Company—A complaint has been issued charging J. T. Jarrell Co., Little Rock, Ark., broker in the sale of food products, particularly canned fruit and vegetables, with violation of the brokerage provision of the Robinson-Patman Act through receiving and accepting from numerous sellers brokerage fees, or allowances or discounts in lieu thereof, on purchases of food products made for its own account in commerce. (4547)

Sterling Appliance Co.—Complaints have been issued against two Los Angeles firms, charging misrepresentation and false advertising in the sale of short wave diathermy devices for treating diseases. The respondents are Nolan E. Stadley, trading as Sterling Appliance Co., distributor of the "Sterling Short Wave Diathermy," and George S. Mogliano and James Walker, trading as Merit Health Appliance Co., selling the "Merit Short Wave Diathermy." (4542-4543)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders:

American Institute of Business Administration, Inc., and Paul Kline, its president, 126 Liberty St., New York City, have been ordered to cease and desist from the dissemination of misleading representations in the sale of correspondence courses in accountancy and business law. (4195)

Lake Shore Seed Company—David S. Wright, doing business as Lake Shore Seed Company, Dunkirk, N. Y., has been ordered to cease and desist from certain misrepresentations in the sale of seeds. The respondent is engaged in the business of selling and distributing vegetable and garden seeds purchased by him from various growers and packing such seeds for transportation to buyers in various States. (5994)

Lincoln Chair & Novelty Company—A. M. Druckman, doing business as Lincoln Chair & Novelty Co., 142 East 32nd St., New York City, has been ordered to cease and desist from misrepresentation in the sale of furniture. (4445)

Metal Paper Fastener Institute—A cease and desist order has been issued against five companies manufacturing pins, paper clips and fasteners used as office supplies, the order applying to them separately and as members of the Metal Paper Fastener Institute and the Pin Manufacturers' Institute, of the Organization Service Corporation, New York. Prohibiting a combination or agreement which results in price fixing and other practices, the order also directs against Organization Service Corporation and two of its officers.

Respondents in the case are: Organization Service Corporation, 74 Trinity Place, New York; Herbert S. Blake, its president, and Thomas B. Jordan, its vice president and the secretary of the Metal Paper Fastener Institute and the Pin Manufacturers' Institutes of Organization Service Corporation; Scovill Manufacturing Co., Waterbury, Conn., operating as one of its divisions; The Oakville Co., Oakville, Conn.; Noesting Pin Ticket Co., Inc., New...

The Commission order directs the respondent manufacturing companies, through Organization Service Corporation or through the respondents Blake or Jordan, and the respondent Organization Service Corporation and these two officers of Organization Service Corporation, to cease and desist, by agreement, combination or understanding, (1) from fixing, establishing, maintaining or advertising in the newspapers to be charged for any or all of their products; (2) from changing simultaneously the prices to be charged for such products; (3) from sponsoring, calling or holding any formal or informal meeting or conference for fixing, establishing, maintaining or adhering to such prices; (4) from reporting, compiling or exchanging statistical information concerning prices charged on consummated sales where the purpose is to establish, maintain or adhere to prices to be charged for their products; (5) from adopting, contributing to, or participating in, the dissemination of any information relating to prices charged or to be charged for their products when the purpose or effect is to establish, maintain or adhere to prices to be charged for such products; (6) from employing, adopting, contributing to, or participating in, any inquiries pertaining to prices, conditions, or terms of completed sales where the purpose, intent or effect is to cause, or tend to cause, adherence to, or maintenance of, uniform prices to be charged by the respondent members for any or all of their products. (4351)

Nassif Candy Co., Wheeling, W. Va., has been ordered to cease and desist from the use of lottery methods in the sale and distribution of candy. (4025)

D. Wroblewski & Company—A Brooklyn, N. Y., dealer and three corporations selling medicinal and cosmetic preparations have been ordered to cease and desist from misrepresentations in the sale of their products. The respondents are D. Stefan Wroblewski, trading under the names D. Wroblewski & Co., D. S. Wroblewski, Inc., Daferu Drug Co., Inc., Wroblewski Drug Co., Inc., Kalwaryjskie Laboratories, Inc., and D. Wroblewski & Co., Ltd., and the corporations D. S. Wroblewski, Inc., Daferu Drug Co., Inc. and D. Wroblewski & Co., Ltd., all of 55 Keap St., Brooklyn. (4196)

**STIPULATIONS**

During the past week the Commission has announced the following stipulations:

Amogen Company—J. R. Hodges, trading as Amogen Company, 147 North St., San Antonio, Texas, engaged in selling a laxative designated "Amogen Tablets," has stipulated to discontinue representing that Amogen Tablets get the poison out of the system; cause the bile to flow; are effective in the treatment of biliousness, jaundice, common colds and fever, poor digestion, acid or gas on the stomach, the results of eating and drinking too much, headaches, neuralgia, rheumatism and other pains and fever, sallow complexion, pimples, sores, boils, skin irritations, coated tongue, bad breath or taste in the mouth, or that Amogen Tablets will enable one to maintain good health and to avoid sickness. (02831)

Bi-Tone Corporation, Inc., Bluefield, W. Va., seller of medicinal preparations, has entered into a stipulation to cease representing in advertisements that the medicinal preparation "Dis-R-Tabs," when used in the treatment of dogs, will prevent or remedy run-down condition, permanent disability, distemper and other ailments, or be of benefit in the treatment of kennels and breeding animals. The respondent further stipulates that it will discontinue representing that this product is an antiseptic or destroys germs in a dog's respiratory tract, or protects it against infection, and that the preparation is of benefit when administered to humans for the prevention or treatment of colds, bronchitis, sinusitis, cough, rhinitis or similar ailments. (02836)

Marvel Company—J. Clayton Criddlebaugh, trading as The Marvel Company, Arcadia, Calif., engaged in selling an antipick device designated "Marvel Hen Specs" advertised and sold mainly for the purpose of controlling cannibalism in poultry, has entered into a stipulation in which he agrees to cease and desist from representing that Marvel Hen Specs will materially reduce tape-worm infestations or infestations other than those caused by fly eating; that any function which can be accomplished by a competitive antipick device can be accomplished only by Marvel Hen Specs, or that Marvel Hen Specs are the only antipick device that has no mechanical action. (02832)

Dr. H. A. Pietri Co., Eladio Santini and Sylvia Pietri, of 83 Hamilton Place, New York, entered into a stipulation in which they agree to cease representing that their hair dye preparation "Zenaida" will bleach gray hair, restore hair to its original color and that it does not stain the clothing, hands or scalp. The respondents also agree to cease representing, by use of the prefix "Dr." in their trade name, that Zenaida is a preparation manufactured or offered for sale by a doctor of medicine. (02835)

Pilot Full Fashion Mills, Inc., Valdese, N. C., and Ira M. Schey and B. A. Jacob, Jr., have entered into a stipulation to cease and desist from representing that Pilot Full Fashion Mills, Inc., and he and the respondent Jacob have conducted a jobbing and selling agency under the name of Jacob & Schey in New York City. (02837)

Copeland Products, Inc., 244 Wolf St., Syracuse, N. Y., entered into a stipulation to cease representing in advertisements that the medicinal preparation "Dis-R-Tabs," when used in the treatment of dogs, will prevent or remedy run-down condition, permanent disability, distemper and other ailments, or be of benefit in the treatment of kennels and breeding animals. The respondent further stipulates that it will discontinue representing that this product is an antiseptic or destroys germs in a dog's respiratory tract, or protects it against infection, and that the preparation is of benefit when administered to humans for the prevention or treatment of colds, bronchitis, sinusitis, cough, rhinitis or similar ailments. (02836)

R. B. Davis Company, Hoboken, N. J., engaged in selling a food product designated "Cocomalt," has stipulated in connection with the dissemination of advertising of the product to discontinue representing that Cocomalt substantially aids the digestion of starchy foods or that Cocomalt stimulates the appetite for other foods except to the extent that it may stimulate the appetite where lack of appetite is caused by Vitamin B deficiency. The stipulation is supplemental to a stipulation (Stipulation 978) previously accepted by the Commission from the respondent. (02830)

Bristol-Myers Company, Rockefeller Center, New York City, engaged in selling a medicinal cream used as a counter-irritant and analgesic for certain aches and pains of the body, designated "Minit-Rub," has entered into an amended and substitute stipulation in which it agrees to cease and desist from representing that Minit-Rub relieves chest colds other than to relieve the symptoms associated with, or resulting from, chest colds; that it penetrates to any muscle, other than superficial muscles or such muscles as may be reached by reflex action; that it affords long-lasting relief; that it is a special analgesic, or contains drugs other than those commonly used in analgesics; that it contains pain-soothing ingredients that act at once in affording relief; that it stimulates the circulation at the seat of the trouble, in any case other than where the seat of the trouble is superficial or muscular; that it relieves the discomfort of improper breathing due to colds better than any other preparation; that it overcomes insomnia, or is efficacious for this condition other than where the condition is due to excited nerves; that it relieves throbbing or nervous headaches other than those due to temporary fatigue, overstrain, nervous tension or nasal congestion; that it affords relief from nervousness by its analgesic properties or by any other terminology, that it is of benefit in affording relief from any aches, pains or discomforts in muscles other than superficial muscles or such muscles as may be reached by reflex action, or that it affords effective relief from sprains. (01864)

Bi-Tone Corporation, Inc., Bluefield, W. Va., seller of medicinal preparations, has entered into a stipulation to cease certain representation in the sale of hosiery. According to the stipulation, the respondent Schey is president of Pilot Full Fashion Mills, Inc., and he and the respondent Jacob have conducted a jobbing and selling agency under the name of Jacob & Schey in New York City. (02837)
The respondents agree to cease and desist from the use of the term “Two-Fifty-One” or the figures “2-51” as descriptive of hosiery which is not 51 gauge, 2 thread construction, and from the use of such term or figures or of any other term, words or figures as a mark or stamp upon or otherwise to describe the hosiery, the effect of which causes or may cause purchasers or prospective purchasers to believe that the hosiery referred to is 51 gauge or any designated gauge other than is actually the fact. (3177)

C. Tischhauser, Inc., 66 Worth St., New York City, manufacturer and distributor of handkerchiefs, has stipulated to desist from labeling or otherwise referring to certain handkerchiefs as having been woven or embroidered in whole or in part on a hand loom, or from in any way using the words “hand loom” as descriptive of such handkerchiefs or any part of them, or from the use of the words “hand loom” as referring to any handkerchief or portion thereof which has not in fact been woven on a hand loom. (02833)

Daniel Wiener, textile fabrics distributor, 47 West 57th St., New York, has entered into a stipulation to cease certain representations in the sale of his products. The respondent agrees to cease employing the words “Taffetas” or “Faille Taffetas” or other words connoting silk to describe a product not composed of silk. The stipulation provides that if the product is composed in part of silk and in part of other fibers or material, the silk-connoting words, used properly to describe the silk content, shall be accompanied by other words in equally conspicuous type to accurately designate each constituent fiber or material in the order of its predominance by weight. (3178)

FTC CASE CLOSED

The Federal Trade Commission has closed its case against Golding Brothers Co., Inc., 310 Broadway, New York City, engaged in the manufacture and sale of cloth fabrics. The respondent was charged, in a complaint issued by the Commission, with falsely representing certain dyed fabrics as being perspiration proof. According to the Commission's order closing the case, the fabrics in question were dyed and labeled as perspiration proof by a third party pursuant to a contract with the respondent which called for the use of perspiration proof dyes. In tests made by the respondent one of several colors used by the dyer proved to be unstable and the respondent promptly and voluntarily discontinued the false representations within approximately two months from the date on which the fabrics were first offered for sale and before the issuance of the Commission's complaint in the proceeding. The Commission ordered that the case growing out of the complaint be closed without prejudice to the Commission's right, should future facts so warrant, to reopen it and resume proceedings.
Federal Time Sales Tax

Under a strict rule against amendment, the House approved and sent to the Senate the new general revenue bill including the radio time sales tax.

The fight has now moved to the Senate.

Hearings before the Senate Finance Committee were scheduled to start Friday, August 8. The NAB and other opponents of the radio tax were tentatively slated to appear Monday, August 18.

Here are the members of that committee:

- Walter F. George, of Georgia.
- David I. Walsh, of Massachusetts.
- Alben W. Barkley, of Kentucky.
- Tom Connally, of Texas.
- Josiah W. Bailey, of North Carolina.
- Bennett Champ Clark, of Missouri.
- Harry Flood Byrd, of Virginia.
- Peter G. Gerry, of Rhode Island.
- Joseph F. Guffey, of Pennsylvania.
- Prentiss M. Brown, of Michigan.
- Clyde L. Herring, of Iowa.
- Edwin C. Johnson, of Colorado.
- George L. Radcliffe, of Maryland.
- Robert M. LaFollette, Jr., of Wisconsin.
- Arthur Capper, of Kansas.
- Arthur H. Vandenberg, of Michigan.
- James J. Davis, of Pennsylvania.
- Henry Cabot Lodge, Jr., of Massachusetts.
- Robert A. Taft, of Ohio.

The NAB Board, at its meeting this week, considered at length the best means of combating the tax proposal, and the Legislative Committee will continue its daily work.

Numerous representatives spoke against the radio time sales tax when it was considered later in the House debate on the new Revenue Bill.

Representative Leavy (D.-Wash.) said that the tax seemed to be "extremely discriminatory" and that "if you do tax anyone, they ought all to be taxed."

Representative Gearhart (R.-Calif.) pointed out that "newspapers and national magazines, with which radio competes for advertising revenue with which to maintain its service to the public, gets off scot-free."

"This special penalty on radio advertising will unquestionably drive many advertisers from radio to other competing media," he said. "The resulting loss of revenue would undoubtedly impair the ability of radio stations to serve the public."

Mr. Gearhart also pointed out that the International Allied Printing Trades Council was the first to agitate for a special punitive tax on radio broadcasting.

"To show that all labor unions do not share the ideas of the printers," he added, "it is only fair to point out that three large A. F. of L. unions, the International Brotherhood of Electrical Workers, the American Federation of Musicians and the American Federation of Radio Artists, have registered their opposition to this discriminatory tax."

Representative Voorhis (D.-Calif.) urged the Ways and Means Committee to consider an amendment to remove the radio tax.

Representative Izac (D.-Ala.) said he had "tried to view this from every angle but for the life of me I cannot see the fairness of such a tax on one medium and not on another."

Representative Patrick (D.-Ala.) said he was "sure the inequality and consequences will give the radio stations a harder job than they ought to have to undertake to overcome and absorb."

"There is not in the United States an organization or a band of people who has come forward with more full-hearted support of the nation and who has given more time than the radio stations," he said. "Radio is a fine art that as a matter of public good should be encouraged and supported."

Representative Brooks (D.-La.) urged the Ways and Means Committee to reconsider the tax.

ASCAP Accepts NBC Proposal

Niles Trammell, president of NBC, announced August 2 that he had been advised by the Board of Directors of ASCAP that it had approved a proposal under which ASCAP music would be returned to the Red and Blue networks and the managed and operated stations of NBC.

Following approval of the proposal by ASCAP, attorneys for both NBC and ASCAP immediately began drafting a contract covering the terms of the agreement. Mr. Trammell expressed the hope that the contract would be drawn up and ready for signature as quickly as possible.

The network contract between NBC and ASCAP will not be signed by NBC, however, Mr. Trammell explained, until NBC affiliates have agreed to refund to ASCAP 23½% of the stations' compensation on network business, except in those states where such refunds are prohibited by law.

"Wires have been sent to all NBC stations and we hope to have telegraphic approvals from them so as to enable us shortly to sign the contracts which are now being prepared," Mr. Trammell said. "When these contracts are signed, arrangements will be made to return ASCAP music to our networks for both commercial and sustaining programs."

The action of the ASCAP Board approved a proposal made to NBC by the ASCAP negotiating committee which was based upon a proposal made by NBC in June. In wiring NBC affiliated stations, advising them of ASCAP's action, Mr. Trammell emphasized that the terms applied to the network licenses on the Red and Blue networks and the managed and operated stations of the National Broadcasting Company and that the affiliated stations of NBC were entirely free to make their own contracts with ASCAP for local broadcasting. It is understood that ASCAP is making the same per program and blanket license proposals for settlement to all individual stations that it made to NBC covering local programs on its managed and operated stations.

The essential points of the new agreement between ASCAP and NBC as outlined by Trammell are:

1. NBC agrees to pay to ASCAP at the source 23½% on network commercial business while NBC's managed and (Continued on page 664)
ASCAP ACCEPTS NBC PROPOSAL
(Continued from page 663)

operated stations will pay 2 1/4% on local and national spot business.

2. NBC agrees to pay at the source $200 per year for each managed and operated and affiliated station on the NBC networks for the use of ASCAP music on all network sustaining and public service programs.

3. NBC's managed and operated stations will pay ASCAP the following fees on local sustaining programs: if the net receipts of the station, from local business, are over $150,000, twelve times the station's half-hour rate; if between $50,000 and $150,000, twelve times the quarter-hour rate. A nominal local sustaining license fee of $12 per year would be applied to any stations earning less than $50,000 per year.

4. NBC's new services of Frequency Modulation and International Shortwave Broadcasting will pay for the ASCAP music on the same basis.

The new contracts will run to December 31, 1949. On that date the contracts will be automatically extended for any period not in excess of nine years, for which ASCAP has the right to contract for its members, with the understanding that if, for the extended term, ASCAP demands an increase in fees to which NBC is then unwilling to agree, the question of such increase only would be determined by arbitration.

Mark Woods, vice president and treasurer of NBC, appeared before the NAB Board of Directors on Thursday to explain in great detail the proposed contract. He emphasized that there were several questions still to be resolved by further negotiation.

After Mr. Woods' talk, and after numerous questions had been asked and answered, the Board adopted the following resolution:

The Board of Directors of the National Association of Broadcasters at its meeting in Washington today, authorized its Executive Committee to offer within its discretion to meet with any negotiators on music contracts and to cooperate with them in devising terms for the use of music which will be as widely acceptable as possible.

The purpose of the resolution is to assure the inclusion in any contract which may be negotiated with respect to the use of music, of terms and conditions which will safeguard the interests of all of the segments of the radio industry, independent and affiliate stations, as well as networks.

BAN ON MULTIPLE OPERATION

Ban on more than one standard broadcast station under the same ownership serving a substantial portion of the same area is proposed by the Federal Communications Commission, which has drafted a proposed rule to that effect and has scheduled oral argument on the same for October 6 next.

In an order issued August 5, which was drafted upon instructions of the Commission en banc at its previous meeting, the Commission expresses the opinion that public interest, convenience and necessity may be served by prohibiting such multiple operation. Accordingly, it proposes a new section (Section 3.35) to the Rules Governing Standard Broadcast Stations to become effective immediately upon adoption. However, with respect to existing stations the effective date would be 90 days from the date on which the rule might be adopted, with provision for extension of time where orderly disposition of properties may be necessary.

The ban would apply to persons under common control, as well as to individuals. The word "control" in this connection would not be limited to majority stock ownership but would include "actual working control in whatever manner exercised."

The contemplated rule has a basis in certain restrictions now applicable to multiple operation of FM (frequency modulation) and television stations. However, it differs in that it imposes no limitation on the total number of standard broadcast stations which may be owned or controlled by the same person so long as they serve different areas.

All interested persons are afforded opportunity to file briefs and to appear before the Commission en banc on the October date and argue orally for or against adoption of the proposed rule. The briefs may be filed up to within two weeks of the oral argument.

Order No. 84

WHEREAS, The Commission is of the opinion that public interest, convenience and necessity may be served by adoption of the following proposed rule:

"Section 3.35—Multiple ownership. (a) No person (including all persons under common control) shall, directly or indirectly, own, operate or control a standard broadcast station that would serve a substantial portion of the area served by another standard broadcast station owned, operated or controlled by such person.

(b) This rule is to take effect immediately. Provided, however, that with respect to persons (including all persons under common control) who now directly or indirectly own, operate or control a standard broadcast station serving a substantial portion of the area served by another standard broadcast station owned, operated or controlled by such persons, the effective date of this rule shall be six months from date; provided, further, that with respect to such persons the Commission may extend the effective date of this rule from time to time in order to permit the orderly disposition of properties."

WHEREAS, the Commission is of the opinion that it will best conduce to the proper dispatch of business and to the ends of justice that all interested persons be given an opportunity to file briefs and to appear before the Commission and argue orally why the above proposal should not be adopted or why it should not be adopted in the form proposed by this order.

NOW, THEREFORE, IT IS HEREBY ORDERED, That oral argument be held before the Commission en banc on October 6, 1941, at 10:00 a.m., at which time all interested persons will be given an opportunity to appear and present argument as to why the above proposed rule should not be adopted or why it should not be adopted in the form proposed by this Order, and that briefs may be filed at any time up to two weeks prior to such argument.

FEDERAL COMMUNICATIONS COMMISSION,
T. J. SLOWIE,
Secretary.

INVESTIGATION ASKED

Senator Clark (D.-Mo.) on August 1, introduced a resolution calling for a Senate investigation of "any propaganda disseminated by motion pictures and radio or any other activity of the motion picture industry to influence public sentiment in the direction of participation by the United States in the present European war." The resolution (S.R. 152) was referred to the Interstate Commerce Committee which ordered a hearing Wednesday, September 3.

Newspaper Hearing

Chairman James L. Fly on August 1 ordered the legal staff of the Federal Communications Commission to take steps to force two newspaper executives to testify at the inquiry into newspaper ownership of radio stations.

The order came after Elisha Hanson, counsel for the American Newspaper Publishers Association, had told the Commission for the second time that it was conducting an unlawful and illegal inquiry and that he had advised the executives not to appear.

Those facing action are Edwin S. Friendly, business manager of the New York Sun, and James G. Stahlman, publisher of the Nashville Banner, former president of the publishers association. Mr. Stahlman now is on active duty with the Navy as a lieutenant commander.

The names of the two executives were called as the Commission began its hearing and Mr. Hanson stepped forward to announce that they had been advised to ignore several subpoenas served on them.

Copies of subpoenas and letters to the men were placed formally in the hearing record over objections by Mr. Hanson.

Thomas E. Harris, assistant FCC counsel, told reporters that the Federal district court would be asked for an order forcing the appearance of the witnesses. He added that of such an order were issued and the men ignored it they could be cited for contempt of court.

Estimate of NBC-ASCAP Plan Applied to Entire Industry

1940 Basis

(NAB Research Department)

---

August 8, 1941 — 665
He declared that the FCC could seek an immediate Federal court action for criminal contempt, but that this method probably would not be used because it would involve grand jury action and long procedure and possible jailing of the executives.

"We don't want to put them in jail," he stated.

Last week similar subpoenas were ignored on advice of counsel by Arthur Robb, editor of Editor and Publisher, and William A. Thomson, director of the advertising bureau of the publishers association, but no action has been taken to force their appearance.

"The material will not be forthcoming," Mr. Hanson interposed.

Chairman Fly asked Mr. Lloyd whether there was any question concerning accuracy of the exhibits.

"None whatever," the attorney replied.

"Just a minute," Mr. Hanson interrupted. He stated that the exhibits might be inaccurate or unverified proofs, that proceedings of the publishers' convention were not public and that only part of convention proceedings were published, for the benefit of members and trade publications.

Mr. Fly accepted the first exhibit, which was a purported recommendation by the association's radio committee to a 1932 convention that radio and newspaper advertising be placed on the same basis through a Federal law banning lotteries on the radio.

Paul W. White of the Columbia Broadcasting System testified that the "dark ages" when newspapers and radio battled over the right to broadcast news had passed and that the public had become accustomed to "all the news and it will not tolerate restrictions."

He declared that the United States was the "best-informed country in the world" as a result of the present relationship between newspapers, press associations and the radio broadcasting industry.

Officials of two news gathering organizations, Lloyd Stratton, assistant general manager of the Associated Press, and Joseph V. Connolly, president of King Features Syndicate, of which International News Service is a department, testified that there was now no restriction on the availability of news for use on the radio.

James W. Barrett, who served as editor of the Press-Radio Bureau, testified that the bureau received news reports from the three major news-gathering organizations without cost, processed it for broadcasting and supplied it to radio stations for $12.50 a month. He said that the National Broadcasting Company and the Columbia Broadcasting System paid expenses of the bureau from 1934 to 1938.

He stated that at first the news broadcasts were restricted as to time to enable newspapers to publish news ahead of the radio, but that these restrictions were modified gradually until major news-gathering organizations were selling a special radio report directly.

"What did the press get out of this, simply a restriction on competition, from broadcasting?" Mr. Fly asked.

Mr. Barrett said that newspaper publishers had been bothered with outlaw competition in which radio stations "pirated news" before it reached newspaper readers and that this was a factor in formation of the bureaus.

The hearing was recessed until September 17.

---

**Sanders Introduces Amendments to FCC Law in House**

Representative Sanders (D.-La.) introduced a bill August 5 to make broad changes in the Federal Communications Act of 1934. Introduction of the Sanders Bill followed by only a few days the introduction of the White Bill in the Senate (NAB Reports, p. 643). Mr. Sanders made the following statement:

A bill entitled "To Amend the Communications Act of 1934, and For Other Purposes" was introduced today by Mr. Sanders. In general, it provides for (1) a reorganization of the Federal Com-
IN THE HOUSE OF REPRESENTATIVES

Mr. Sanders introduced the following bill; which was referred to the Committee on Interstate & Foreign Commerce.

A BILL TO AMEND THE COMMUNICATIONS ACT OF 1934, AND FOR OTHER PURPOSES

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of Title I of the Communications Act of 1934 be amended by adding after paragraph (aa) of said section the following:

“(bb) The term “construction permit” or “permit for construction” means that instrument of authorization required by this Act for the construction of apparatus for the transmission of energy, or communications, or signals by radio, by whatever name designated by the Commission.

“(cc) The term “license”, “station license”, or “radio station license” means that instrument of authorization required by this Act, or the Rules and Regulations of the Commission enacted pursuant to this Act, for the use or operation of apparatus for the transmission of energy, or communications, or signals by radio, by whatever name designated by the Commission.

SEC. 2. Amend paragraph (b) of section 4 of said Title I by striking out the last sentence of said paragraph and by inserting in lieu thereof the following:

“Not more than four members of the Commission and not more than two members of either division thereof shall be members of the same political party.”

SEC. 3. Amend section 5 of said Title I by striking out the whole of said section and by inserting in lieu thereof the following:

“(a) The members of the Commission other than the Chairman shall be appointed to serve on one division of three members each, said divisions to be known and designated as the Division of Public Communications and the Division of Private Communications and no member designated or appointed to serve on one division shall have or exercise any duty or authority with respect to the work or functions of the other division, except as hereinafter provided. The President shall designate the Commissioners now in office who shall serve upon a particular division but all Commissioners other than the Chairman subsequently appointed shall be appointed to serve upon a particular division and the Chairman subsequently appointed shall be appointed to serve in that capacity.

“(b) The Division of Public Communications shall have jurisdiction over all cases and controversies arising under the provisions of this Act and the rules and regulations of the Commission enacted pursuant to this Act relating to wire and radio communications intended to be received by the public directly, and shall make all adjudications involving the interpretation and application of those provisions of the Act and of the Commission’s regulations.

(c) The Division of Private Communications shall have jurisdiction over all cases and controversies arising under the provisions of this Act and the rules and regulations of the Commission enacted pursuant to this Act relating to wire and radio communications by a common carrier or carriers, or which are intended to be received by a designated addressee or addressees, and shall make all adjudications involving the interpretation and application of those provisions of the Act and of the Commission’s regulations.

“(d) The Chairman of the Commission shall be the chief executive officer of the Commission. It shall be his duty to preside at all meetings and sessions of the whole Commission, to represent the Commission in all matters relating to legislation and legislative reports, to represent the Commission or any division thereof in all matters requiring conferences or communications with representatives of the public, governmental officers, departments, or agencies, and generally to coordinate, and organize the work of the Commission and each division thereof in such manner as to promote prompt and efficient handling of all matters within the jurisdiction of the Commission. The Chairman of the Commission shall not be a member of or serve upon either of said divisions, except that in the case of a vacancy the absence or inability of any Commissioner appointed to serve thereon, the Chairman may temporarily serve on either of said divisions with full power as a member thereof until the cause or circumstance requiring said service shall have been eliminated or corrected.

“(f) Each division of the Commission shall choose its own chairman, and, in conformity with and subject to the foregoing provisions of this section, shall organize its membership and the personnel assigned to it in such manner as will best serve the purposes and orderly conduct of its business. Each division shall have power and authority by a majority thereof to hear and determine, order, certify, report, or otherwise act as to any of said work, business, or functions over which it has jurisdiction. Any order, decision, report made, or other action taken by either of said divisions with respect to any matter within its jurisdiction, shall be final and conclusive. Except as otherwise provided by said Communications Act of 1934 as hereby amended. The secretary and seal of the Commission shall be the secretary and seal of each division thereof.

“(g) In the case of a vacancy in the office of the Chairman of the Commission or the absence or inability of the Chairman to serve, the Commission may temporarily designate and appoint one of its members to act as Chairman of the Commission on its own motion or otherwise, and the term "Chairman" as used in this Act shall be taken to mean the whole Commission or a division thereof as required by the context and the subject matter dealt with. The term "cases and controversies", as used herein, shall be taken to include all adversary proceedings whether judicial or quasi-judicial in nature, and whether instituted by the Commission on its own motion or otherwise, and the term "adjudications" means the final disposition of particular cases, controversies, applications, complaints, or proceedings involving named persons or named res.”

SEC. 4. Amend paragraph (a) of section 308 of Title III by striking out all appearing before the first proviso clause in said paragraph and inserting in lieu thereof the following:

“The Commission may grant instruments of authorization to the holders thereof to construct or operate apparatus for the transmission of energy, or communications, or signals by radio only upon written application therefor received by it.”

SEC. 5. Amend section 309 of said Title III by striking out the whole of said section and inserting in lieu thereof the following:

“(a) If upon examination of any application provided for in Section 308 hereof, the Commission shall determine (1) that public interest, convenience or necessity would be served by the granting thereof, and (2) that such action would not aggrieve or adversely affect the interest of any person, it shall authorize the
issuance of the instrument of authorization for which application is made in accordance with said findings.

(2) If upon examination of any such application the Commission is unable to make either or both of the findings specified in paragraph (a) hereof, it shall file the application for hearing and forthwith notify the applicant and other parties in interest of such action and the grounds or reasons therefor. Any hearing subsequently held upon such application shall be a full hearing in which the applicant and all other parties in interest, whether originally notified by the Commission or subsequently admitted as interveners, shall be permitted to participate. Such hearing shall be preceded by a notice to all such parties in interest specifying with particularity the matters and things in issue and not including issues or requirements phrased generally or in the words of the statute.

(c) When any instrument of authorization is granted by the Commission without a hearing, as provided in paragraph (a) hereof, such grant shall remain subject to protest as hereinafter provided, for a period of thirty days. During such thirty-day period, any person who would be entitled to challenge the legality or propriety of such grant under the provisions of Section 402 of this Act may file a protest directed to such grant, and request a hearing on said application so granted. Any protest so filed shall contain such allegation of fact as to show the protestant to be a proper party in interest and shall specify with particularity the matters and things in issue but shall not include issues or allegations phrased generally or in the words of the statute. Upon the filing of such protest, the application involved shall be set for hearing upon the issues set forth in said protest and heard in the same manner in which applications are heard under paragraph (b) hereof. Pending hearing and decision upon said protest, the effective date of the Commission's action to which said protest is directed shall be postponed to the date of the Commission's decision after hearing unless the authorization involved in such grant is necessary to the maintenance or conduct of an existing service, in which event the Commission shall authorize the applicant to utilize the facilities or authorization in question pending the Commission's decision after hearing on said protest.

(d) Such station licenses as the Commission may grant shall be in such general form as it may prescribe, but each license shall contain, in addition to other provisions, a statement of the following conditions to which such license shall be subject: (1) the station license shall not vest in the licensee any right to operate the station nor any right in the use of the frequencies designated in the license beyond the term thereof nor in any other manner than authorized therein; (2) neither the license nor the right granted thereunder shall be assigned or otherwise transferred in violation of this Act; (3) every license issued under this Act shall be subject in terms to the right or use or control conferred by Section 606 hereof.

SEC. 6. Amend paragraph (b) of section 310 of said Title III by striking out the whole of said paragraph and by inserting in lieu thereof the following:

"No instrument of authorization granted by the Commission entitling the holder thereof to construct or operate radio apparatus shall be transferred, assigned, or disposed of in any manner, voluntarily or involuntarily, directly or indirectly, or by transfer of control of any corporation owning or operating such instrument of authorization, to any person except upon application to the Commission and upon a finding by the Commission that the proposed transferee or assignee is capable of constructing or operating under such instrument of authorization in the public interest, convenience and necessity. The procedure to be employed in the handling of such applications shall be that provided in Section 309 of this Act, as amended."

SEC. 7. Add to said Title III the following new section:

Sec. 310. (a) The Commission shall study the following proposals and shall report to Congress not later than July 1, 1942 its recommendations thereon together with the reasons for the same:

1. Whether and upon what terms and conditions Congress shall by statute confer upon the Commission the power to regulate the contractual or other relations between the licensees of radio broadcast stations and networks or other organizations which supply program material to such licensees.
2. Whether and upon what terms and conditions the Congress shall provide by statute for the licensing of networks.
3. Whether and in what terms the Congress shall by statute redefine and fix the qualifications of the licensee of any radio station which is intended to and does communicate with the public.
4. Whether and upon what terms and conditions the Congress shall by statute limit the number of services which may be conducted by any network organization and the number of stations of any class which may be licensed to any network organization.

(b) The Commission shall report to Congress not later than January 1, 1942, the standards and principles adopted by it to effectuate the mandate contained in Section 307 (b) of the Communications Act of 1934, as amended, which requires the Commission to make and maintain a fair, efficient and equitable distribution of radio facilities among the several states and communities together with its recommendations, if any, for further legislation on this subject.

(c) The Commission shall report to Congress not later than January 1, 1942, the steps taken and the policies adopted by it to effectuate the purposes of Section 303 (g) of the Communications Act of 1934, as amended, insofar as those purposes have reference to the larger and more effective use of radio by stations which are intended to and do communicate with the public.

SEC. 8. Amend Section 402 of Title IV by striking out the whole of said section and by inserting in lieu thereof the following:

"(a) The provisions of the Act of October 22, 1913 (38 Stat. 219), as amended, relating to the enforcing or setting aside of orders of the Interstate Commerce Commission are hereby made applicable to suits to enforce, enjoin, set aside, annul or suspend any order of the Commission under this Act (except those appealable under the provisions of paragraph (b) hereof), and such suits are hereby authorized to be brought as provided in said Act. In addition to the venue specified in that Act, suits to enjoin, set aside, annul or suspend, but not to enforce, any such order of the Commission may also be brought in the District Court for the District of Columbia.

(b) Appeals may be taken from decisions and orders of the Commission to the Circuit Court of Appeals of the United States within any circuit wherein the appellant resides or has his principal place of business, or to the United States Court of Appeals for the District of Columbia in any of the following cases:

(1) By an applicant for any instrument of authorization required by this Act, or the regulations of the Commission enacted pursuant to this Act, for the construction or operation of apparatus for the transmission of energy, or communications, or signals by radio whose application is denied by the Commission.

(2) By any party to an application for authority to assign any such instrument of authorization or to transfer control of any corporation holding such instrument of authorization whose application is denied by the Commission.

(3) By any applicant for the permit required by Section 325 of this Act or any permittee under said section whose permit has been modified, revoked or suspended by the Commission.

(4) By any person who is aggrieved or whose interests are adversely affected by any order of the Commission granting or denying any application described in subparagraphs (1), (2) and (3) hereof.

(5) By the holder of any instrument of authorization required by this Act, or the regulations of the Commission enacted pursuant to this Act, for the construction or operation of apparatus for the transmission of energy, or communications, or signals by radio, which instrument has been modified, revoked, or suspended by the Commission.

(6) By any radio operator whose license has been revoked or suspended by the Commission.

(c) Such an appeal shall be taken by filing a Notice of Appeal with the appropriate court within thirty days after the
entry of the order complained of. Such Notice of Appeal shall contain a concise statement of the nature of the proceedings as to which appeal is taken; a concise statement of the reasons on which the appellant intends to rely, separately stated and numbered; and proof of service of a true copy of said notice and statement upon the Commission. Upon the filing of such notice, the Court shall have exclusive jurisdiction of the proceeding and of the questions determined therein and shall have power, by order directed to the Commission, or any other party to the appeal, to grant such temporary relief as it may deem just and proper. Orders granting temporary relief may be either affirmative or negative in their scope, and application and may be such as to permit either the maintenance of the status quo in the matter in which the appeal is taken or the restoration of the original status terminated or adversely affected by the order appealed from and shall, unless otherwise ordered by the court, be effective pending hearing and determination of said appeal and compliance by the Commission with the final judgment of the court rendered in said appeal.

"(d) Upon the filing of any such Notice of Appeal, the Commission shall, not later than five days after date of service upon it, notify each person shown by the records of the Commission to be interested in said appeal of the filing and pendency of the same and shall thereupon permit any such person to inspect and make copies of said notice and statement upon the Commission. Any party shown by the records of the Commission to be interested in said appeal of the filing and pendency of the same shall have power, by order directed to the Commission, or any other party to the appeal, to grant such temporary relief as it may deem just and proper. Orders granting temporary relief may be either affirmative or negative in their scope, and application and may be such as to permit either the maintenance of the status quo in the matter in which the appeal is taken or the restoration of the original status terminated or adversely affected by the order appealed from and shall, unless otherwise ordered by the court, be effective pending hearing and determination of said appeal and compliance by the Commission with the final judgment of the court rendered in said appeal.

"(e) Within thirty days after the filing of an appeal any interested person may intervene and participate in the proceedings had upon said appeal by filing with the Court a Notice of Intention to Intervene and a verified statement showing the nature of the interest of such party, together with proof of service of true copies of said Notice and statement, both upon appellant and upon the Commission. Any party shown by the records of the Commission to be interested in said appeal of the filing and pendency of the same shall have power, by order directed to the Commission, or any other party to the appeal, to grant such temporary relief as it may deem just and proper. Orders granting temporary relief may be either affirmative or negative in their scope, and application and may be such as to permit either the maintenance of the status quo in the matter in which the appeal is taken or the restoration of the original status terminated or adversely affected by the order appealed from and shall, unless otherwise ordered by the court, be effective pending hearing and determination of said appeal and compliance by the Commission with the final judgment of the court rendered in said appeal.

"(f) The record upon which any such appeal shall be heard and determined by the court shall contain such information and material as shall be prepared within such time and in such manner as the court may by rule prescribe.

"(g) At the earliest convenient time the court shall hear and determine the appeal upon the record before it and shall have power upon such record to enter judgment affirming or reversing the order of the Commission. As to the findings, conclusions and decisions of the Commission, the court shall consider and decide only so far as necessary to the final disposition of the appeal, and for that purpose, all relevant questions of (1) constitutional right, power, privilege, or immunity; (2) the statutory authority or jurisdiction of the Commission; (3) the lawfulness and adequacy of Commission procedure; (4) findings, inferences, or conclusions of fact unsupported, upon the whole record, by substantial evidence; and (5) administrative action otherwise arbitrary or capricious.

"(h) In the event that the court shall render a decision and enter an order reversing the order of the Commission, it shall remand the case to the Commission to carry out the judgment of the court and it shall be the duty of the Commission, in the absence of proceedings to review such judgment, to forthwith give effect thereto, and unless otherwise ordered by the court, to do so upon the basis of the proceedings already had and the record upon which said appeal was heard and determined. The court's judgment shall be final, subject, however, to review by the Supreme Court of the United States upon writ of certiorari on petition therefor under Section 240 of the Judicial Code, as amended, by appointee, by the Commission, or by any interested party intervening in the appeal.

"(i) The court may, in its discretion, enter judgment for costs in favor of or against an appellant, or other interested parties intervening in said appeal, but not against the Commission, depending upon the nature of the issues involved upon said appeal and the outcome thereof.

SEC. 9. Amend section 405 of said Title IV by striking out the whole thereof and by inserting in lieu thereof the following:

"Sec. 405. After a decision, order, or requirement has been made by the Commission or any division thereof in any proceeding, any party thereto or any other person aggrieved or whose interests are adversely affected thereby may petition for rehearing. Where the decision, order, or requirement has been made by the whole Commission, the petition for re-hearing shall be directed to the whole Commission; when the decision, order, or requirement is made by a division of the Commission, the petition for rehearing shall be directed to that division; petitions directed to the whole Commission requesting a rehearing in any matter determined by a division thereof shall not be permitted or considered. Petitions for rehearing must be filed within thirty days from the entry of any decision, order or requirement complained of and except for those cases in which the decision, order or requirement challenged is necessary for the maintenance or conduct of an existing service, the filing of such a petition shall automatically stay the effective date thereof until after decision on said petition. The filing of a petition for rehearing shall not be a condition precedent to judicial review of any such decision, order or requirement, except where the party seeking such review was not a party to the proceedings before the Commission resulting in such decision, order or requirement, or where the party seeking such review relies on questions of fact or law upon which the Commission has been afforded no opportunity to pass. Such hearing, if held, shall be governed by such general rules as the Commission may establish but any decision, order, or requirement made after such rehearing reversing, changing, or modifying the original determination shall be subject to the same provisions as an original order."

SEC. 10. Amend paragraph (a) of section 409 of said Title IV by striking out the whole of said paragraph and by inserting in lieu thereof the following:

"(a) In all cases where a hearing is required by the provisions of this Act, or by any applicable provisions of law, such hearing shall be a full and fair hearing. Hearings may be conducted by the Commission or a division thereof having jurisdiction of the proceeding or by any member or any qualified employee of the Commission when duly designated for such purpose. The person or persons conducting any such hearing may sign and issue subpoenas, administer oaths, examine witnesses, and receive evidence at any place in the United States designated by the Commission. In all cases, whether heard by a quorum of the Commission or a division thereof, or by any member or qualified employee of the Commission, the person or persons conducting such hearing shall prepare and file an intermediate report setting out in detail and with particularity all basic or evidentiary facts developed by the evidence as well as conclusions of fact and of law upon each issue submitted for hearing. In all cases the Commission, or the division having jurisdiction thereof, shall, upon request of any party to the proceeding, hear oral argument on said intermediate report or upon such other and further issues as may be specified by the Commission or the division and such oral argument shall precede the entry of any final decision, order or requirement. Any final decision, order or requirement shall be accompanied by a full statement in writing of all the relevant facts as well as conclusions of law upon those facts."

CONVENTION IN CLEVELAND

In conformity with the advisory ballot taken at the St. Louis convention, the NAB Board on Wednesday fixed the 1942 convention for May 11-14 at Cleveland. Contracts for a convention hotel are being negotiated.

DAYLIGHT SAVING

Hearings were held before the House Committee on Interstate and Foreign Commerce August 5, 6 and 7, H. R. 5143, a bill to authorize the President to establish daylight saving time in such areas and for such periods of time as he deems necessary to conserve electrical energy or otherwise to promote the national defense. Maximum daylight saving time under this bill would not be more than two hours in advance of standard time.
The NAB, represented at the hearings by Robert Myers, Assistant Director of Research, urged enactment of legislation which will provide for nation-wide daylight saving time, in conformity with the Convention resolution adopted in St. Louis. The resolution itself was read into the record. NAB support of the Kceough and McLean bills which would provide for uniform observance of daylight saving time throughout the nation was mentioned. The problems of the industry incident to the switches to and from daylight saving time were reviewed.

**BMI NOTES**

A Song from the Heart

J. Russell Robinson, composer of Margie, Mary-Lou, and many of the great hits of American song history, has written a new BMI tune with Andy Razaf entitled I'll Be A Good Soldier, Too. In answer to the question "How did you come to write it," Mr. Robinson has given us the following story:

A majority of tunersmiths are ever on the alert for new melodic ideas. For many years I have had the habit of seeking first the title or lyrical idea for a new song, and then have always been able to construct a chorus melody with which to wed a lyric, either one written alone or in collaboration.

I have been wanting to produce something of a patriotic nature for the last several years. In fact, two of my unpublished songs of such flavor have been sung over the networks—THANK OUR YANKIE STARS and HOORAY FOR OUR SIDE OF THE OCEAN. Tho' both songs were stirring to the emotions and well liked by the singers they didn't seem to get a good public reaction. Nothing daunted, I still kept my ear attuned, feeling that somewhere, somehow I would get the right kind of an idea for a patriotic song which would have real heart appeal to everyone.

While visiting with a sister-in-law, her husband and two sons, several months ago it came. The eldest son, just twenty-two years of age had been called by his local board only two days before my visit. The mother was taking it very hard and could hardly keep her tears back when telling me of it. The son walked in while we were conversing and started telling me how he looked forward to camp life in the service of his country. She burst into tears, then suddenly her son said, "Aw, Mom, why don't you be a good soldier about it, it's probably the best thing that ever happened to me."

With that remark she seemed to gain control of her emotion and at the same moment I said, "Boy, what a song idea you just handed your Uncle Russell! I've got the title and thought that should appeal to every woman, mother, wife, sister, aunt, grandmother or even a MOTHER-IN-LAW, right out of your answer to your mother.—I'LL BE A GOOD SOLDIER, TOO."

An Artistic Success

Despite ASCAP's conviction that BMI would not be able to develop new songwriters who could satisfactorily entertain the radio audience, BMI has been able to produce a group of current song hits which compare favorably with any group of hits at any given time in the past twenty years. In addition to its obligation to provide good music to its subscribers, BMI feels that it has an obligation to the writers of these tunes and plans to promote their work.

As the music situation now stands, talented songwriters have two alternatives:

1. Ready cash from BMI which pays on a performance basis regardless of seniority and leaves its writers completely free to do anything which they wish to do in their own interest.
2. ASCAP, which ties its writers to ten year contracts calling for their entire output, bases its payments to writers on contribution to the Society as well as on seniority, and promises a pension based on a continuous flow of creative genius.

Chief complaint of the young writer under the ASCAP system has been that he has not been compensated for the radio performance of his best work. Many writers produce their best songs in their early youth. These songs have a fresh note, are eagerly accepted by the public—they climb to the Hit Parade. The publishers are liberally compensated for them, but the writers do not receive a penny from performances until they have become established creators and assure ASCAP that they can produce hits year after year. This is one reason the legend of the "starving songwriter" has persisted. We will probably hear less of it from now on as BMI has demonstrated that anyone with talent can earn substantial sums from air performance regardless of age.

Foremost of the many hundred songwriters who have found opportunity with BMI follow:

Alex Kramer, Hy Zaret, Joan Whitney—So You're the One, It All Comes Back To Me Now, My Sister and I.
Alex Kramer, Joan Whitney—High On A Windy Hill.

I'll Be A Good Soldier, Too.

Lyricists, Robert Sour, Ernest Gold, Don McCray—Practice Makes Perfect, Come Down To Earth, My Angel, You're A Mystery To Me.

Robert Sour, Una Mae Carlisle—Walkin' By the River, I See A Million People.

Ernest Gold—The Shining Hour, Blue Grass Regions.

Michael Field, Newt Oliphant—The Same Old Story.

Joe Ricardel—The Wise Old Owl.

Norman Weisler, Louis Urban—Here's My Heart.

Jean Barry, Leah Worth—The Old Joke, I've Got A Date With A Gate.

Betty Barton, Buddy Arnold, Jack Gould—What D'Y'a Hear From Your Heart.

Henry Manners, Robert Sour—We Could Make Such Beautiful Music.

Henry Manners, Jimmie Shirl—Braggin', Good Evening', Good Lookin', Delilah, That Lingering Longing,

Laurette Carroll—Phantom In the Dark.

Santo Marco, Jack Erickson—May I Never Love Again.

Sylvia Dee—Talking To the Wind, So Ends Our Night.

Bill Hampton, George Duning—I Can't Remember To Forget.

Jerry Bowen, Frank de Vol—Friendly Tavern Polka.

The Independent Publisher Comments

Al Debin, of Porige, Debin and Friedman, BMI affiliated publisher which produced the outstanding hit Just A Little Bit South of North Carolina, has the following comment to make regarding the negotiations looking to the return of ASCAP music to the NBC networks: "We believe that the song business is primarily a matter of discovering and promoting good songs. Our opportunity to do this will be just as great as ever with ASCAP music on the air and I feel that regardless of the greater prestige and financial strength of the ASCAP publishing houses both broadcasters and bandleaders will see that the 'little fellow' is protected."

Radio Tunes, Inc.

New songs to be promoted by Radio Tunes, Inc., BMI subsidiary, will be, I See A Million People by Una Mae Carlisle and Bob Sour: A Little Bit of Dark by Roy Jacobs, writer of Boogily Woogily Piggy and Johnny Murphy; and I Want To Be A Good Soldier, Too by J. Russell Robinson and Andy Razaf.

A Little Bit of Dark will have a solid week of introduction from Johnny Long at the Hotel New Yorker beginning Friday, August 9th.

Radio Tunes, Inc., will open offices in principal cities and operate as a national organization. Phil Kornheiser will be the General Manager.

Elmo White will be Professional Manager. Mr. White was first known as a member of the vaudeville team of Murphy and White, famous for their song and dance routines. When he entered the music business, he was as a member of the professional department of Shapiro, Bernstein. His work attracted attention and he was offered the Professional Managership of De Sylva, Brown

670 — August 8, 1941
Choose 'Friendly Tavern'

The tavern industry has chosen BMI’s Friendly Tavern Polka as their national theme song and plan to feature is prominently in the promotion of nation-wide good-will for taverns. A series of advertisements are being planned for the joint signature of tavern groups and the song will form the theme of whatever advertising the taverns plan to do on the air.

The Patriotic Rhythm

The Rhythm Is Red An White An’ Blue, a BMI tune by David Gregory and Al Moss is featured in the RKO Dr. Christian picture We Meet Again which has just been released. The lyric rejoices in the manifold blessings of life in America pointing out that “There’s no other place on earth where they use up two Thanksgivings.”

BMI FEATURE TUNES
August 11 - August 18

1. I WENT OUT OF MY WAY
2. WASN’T IT YOU
3. ALL ALONE AND LONELY
4. HI, NEIGHBOR
5. YO TE AMO, OH BABY
6. MY SISTER AND I
7. BECAUSE OF YOU
8. THE RELUCTANT DRAGON

In preparation: A rhythm novelty, Delilah.

Lament to Love

Lament To Love the new torch song which has already been recorded by four leading orchestras—Harry James, Sonny Dunham, Les Brown, and Lanny Ross—looks like a real hit. Its writer is no sophisticated oldster bored with little Dan Cupid, but a 15-year-old Chicago schoolboy named Mel Towne. It's Mel's first published song, and he didn’t know a thing about the publication of his opus until his uncle came back from the offices of the publisher, Roe-Krippene, and announced its acceptance.

Sales

Cash Discount Tabled

Fred Gamble, AAAA Managing director, presented the agency case for the cash discount principle before the NAB Board August 7. The matter was tabled without action.

Carnival Buys Time

Industry efforts to persuade circuses, carnivals, and other entertainment ventures to purchase radio time are having some effect, as shown by this letter from S. A. Cisler, WGRG, Louisville:

“I wish you would put a good word in the Bulletin for Mr. Naylor, advance man for the Bockman & Gerety Shows, a traveling carnival, one of the largest in the world. Mr. Naylor bought his spots at card rate, did not ask for any free time or try to chisel the rate. He wrote good, clean, punchy copy; we gave him extra good positions, and he got results. He bought more while still here, and left very happy with business and with radio. Such people ought to be encouraged. I hope other stations will watch out for this show that buys time, and give Mr. Naylor 100% cooperation.”

Per-Inquiry and Free Time

J. M. Matthes Agency, New York, is seeking free time on home economics programs for STA-WAY, an insect repellant of the National Carbon Co.

The Barbizon Studio, New York, a modeling school, is seeking per-inquiry deals, although it is understood to be paying regular rates to magazines and other media.

Chicago, Rock Island & Pacific Ry. Co., Chicago, is seeking free time for a transcribed program under the guise of “national defense” by telling listeners what railroads are doing in defense preparations.

All the above have been invited to use radio on the proper basis.

Radio Needs Dealer Support

The necessity for constantly seeking recommendations for radio advertising from local dealers should frequently be impressed upon radio salesmen.

National spot business and local dealer-cooperative business as well as added network business can effectively be increased only with this sort of cooperation from local distributors and dealers.

Numerous national manufacturers can be persuaded to use radio only if the sales efforts of those in the national field are supported by an ever-increasing weight of local recommendations. An excellent example of the effectiveness of this approach is contained in a Radio Daily story August 5, telling how the Trimount Clothing Co. used radio for the first time in 1940 with spot announcements on five stations, later expanding to additional outlets, and now has signed for a fall campaign on 125 stations. The Emil Mogul Co., agency in charge, reports:

“Response from the stores covered by these initial radio spots was so enthusiastic and the demand from other Clipper Craft dealers for radio mention in their own territories so insistently that Trimount undertook a considerably expanded campaign for the spring of 1941.”

The fall campaign will include network, national spot and local dealer-cooperative services.

Similar demand from other dealers would no doubt have a similar effect upon other manufacturers.

That the newspaper industry also recognizes the power of dealer recommendations is shown by a statement by Pierre Martineau, advertising promotion manager of the Memphis Commercial Appeal and Press-Simuliter:

“National advertisers have frequently stated that newspapers ought to do a basic selling job on the retailer. One of their favorite reasons in explaining why they use radio is that, when queried about media, their retailers and dealers vote for radio.”

National Defense

Duplication Not Desired

The Naval Recruiting Office in Richmond, Va., sent out several announcements which partially duplicated those the Navy released through NAB. This matter was called to our attention by several stations in the area involved and we, in turn, called it to the attention of the Navy.

The Navy suggested that we notify stations immediately advising them to disregard the second request.

August 8, 1941 — 671
Send July Reports

Please send your July National Defense Broadcast Report. There is a nice steady stream of reports coming in now, but editing will be delayed until all of the reports have been received.

More Cooperation

Five more stations have inserted “Keep 'em Flying” in nightly sign-off. They are:

- KELA—Sioux Falls, S. D.
- KSAC—Manhattan, Kan.
- KSOO—Sioux Falls, S. D.
- WJTN—Jamestown, N. Y.
- WSAZ—Huntington, W. Va.
- KIEM, Eureka, Cal., says; “Keep 'em Flying and Keep Tuned to KIEM, Eureka, California,” at least ten times every afternoon.
- WCMI, Ashland, Ky., is one of the stations cooperating in the U. S. Army campaign whose call letters have for some reason or other escaped the published list. There are approximately eight hundred stations now cooperating. They also assist the U. S. Navy in its quest for Naval Flyers, Reserves and general enlistments. Same stations also back Manpower announcements for U. S. Civil Service and carry the Treasury schedule for the sale of bonds and stamps.

PUDNEY, BLAKE

The NAB has been asked for information as to the whereabouts of Earl J. Pudney, an announcer, and Joe Blake, a salesman.

FEDERAL LEGISLATION

HOUSE

H. R. 5497 (Sanders, D-La.) COMMUNICATIONS ACT—To amend the Communications Act of 1934, and for other purposes. Referred to Committee on Interstate and Foreign Commerce.

SENATE

S. 1806 (White, R-Maine) COMMUNICATIONS ACT—To amend the Communications Act of 1934, and for other purposes. Referred to Committee on Interstate Commerce.

SENATE RESOLUTION

S. Res. 152 (Clark, D-Mo. & Nye, R-N.D.) PROPAGANDA—Authorizing an investigation of propaganda disseminated by the motion picture and radio industries tending to influence participation of the United States in the present European war. Referred to Committee on Interstate Commerce.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings are scheduled to be held before the Commission during the week beginning Monday, August 11. They are subject to change.

Monday, August 11

Consolidated Hearing

NEW—Nashville Radio Corporation, Nashville, Tenn.—C. P., 1110 kc., 1 KW night, unlimited time, DA-night.

NEW—A. M. Burton, Nashville, Tenn.—C. P., 1110 kc., 1 KW, unlimited time, DA-day and night.

Tuesday, August 12

Consolidated Hearing

KONB—MSB Broadcast Co., Omaha, Nebr.—C. P., 1500 kc., 250 watts, unlimited time under C. P.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—C. P., 680 kc., 50 KW, unlimited time, DA-day and night.

Friday, August 15

KORN—Nebraska Broadcasting Corp., Fremont, Nebr.—Renewal of license, 1100 kc., 250 watts, unlimited time.

KORN—Clark Standiford (transferor), and C. J. Malmsten, A. C. Sidner, S. S. Sidner & Arthur Baldwin (transferees), Fremont, Nebr.—Transfer of control, 1100 kc., 250 watts, unlimited time.

FUTURE HEARINGS

During the past week the Commission has announced the following future broadcast hearing dates. They are subject to change.

September 5

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—C. P., 860 kc., 1 KW night, 5 KW day, unlimited time, DA-night.

KFNP—KFNP, Incorporated, Shenandoah, Iowa.—Renewal of license, 920 kc., 500 watts night, 1 KW day, share KUSD.

September 16

KGLU—Gila Broadcasting Co., Safford, Ariz.—Renewal of license, 1450 kc., 250 watts, unlimited time.

September 17

KFRO—Voice of Longview, Longview, Texas.—Modification of C. P., 1570 kc., 5 KW, unlimited time, DA-night.

Further Hearing

Investigation to determine what policy or rules, if any, should be promulgated in connection with operation of new high frequency (FM) broadcast stations and for future acquisition of standard broadcast stations by newspapers, pursuant to Order No. 79.

September 23

WTMV—Mississippi Valley Broadcasting Co., Inc., E. St. Louis, Ill.—C. P., 1310 kc., 500 watts night, 1 KW day, unlimited time.

September 29

Further Hearing

October 7

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.—C. P., 1110 kc., 50 KW, unlimited time, DA-night.

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Modification of license, 770 kc., 50 KW, unlimited time.

October 8

KIDW—The Lamar Broadcasting Co., Lamar, Colo.—Renewal of license, 1150 kc., 100 watts, specified hours.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

Greensboro Broadcasting Co., Inc., Greensboro, N. C.—Granted, subject to such rules or action as the Commission may here-
Designated for Hearing

Hugh McClung, Fresno, Calif.—Application for construction permit for a new station to operate on 980 kc., 1 KW, daytime only (B5-P-2472).

Findlay Radio Company, Findlay, Ohio.—Granted construction permit for a new station to operate on 1330 kc., 1 KW, daytime only. Exact site and antenna system to be determined subject to Commission's approval (B2-P-2846).

Frank T. Nied & Perry H. Stevens, d/b as Neid and Stevens, Warren, Ohio.—Granted construction permit for a new station to operate on 1440 kc., 250 watts, unlimited time (B2-P-3181).

WMC—Memphis Publishing Company, Memphis, Tenn.—Granted, subject to such rules as may be adopted by the Commission as might affect licensee's ownership of said station, construction permit to increase night power from 1 to 5 KW, and install a new directional antenna for night use; 1790 kc., 5 KW day, unlimited time (B3-P-2743).

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Granted, subject to such rules or action as the Commission may hereafter adopt or take with regard to multiple ownership, construction permit to increase power from 5 to 50 KW night and day; increase hours of operation from simul-d, s-WONO-night, to unlimited; move transmitter to R.F.D. St. Clairsville, Ohio, about 7 miles west of Wheeling; install new transmitter and directional antenna for day and night use; 1170 kc. (B2-P-2540).

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Granted construction permit to increase power from 25 to 50 KW days and night; increase hours of operation from simul-d, s-WAPO-night, to unlimited; install new equipment and new directional antenna for night use; 1170 kc. (B3-P-2539).

WORK—York Broadcasting Co., York, Pa.—Granted construction permit to install a new directional antenna system for night use only (B2-P-3205).

KWSO—Tribune Printing Company, Jefferson City, Mo.—Granted modification of license to change frequency from 1340 to 1330 kc., 1 KW, daytime (B1-M-1075).

KSO—Kentucky Broadcasting Co., Bowling Green, Ky.—Granted construction permit for new station to operate on 1330 kc., 250 watts, unlimited time (B3-P-2392).

FWRD—Frontier Broadcasting Co., Portable-Mobile Area of Cheyenne, Wyo.—Granted construction permit for new station to operate on 1520 kc., 15 watts power (B3-PRE-390).

KWB—Warren, Ohio.—Granted construction permit for new station to operate on 1330 kc., 5 KW, unlimited time (B5-P-3143).

Renewal of Licenses

The following stations were granted renewal of licenses for the period ending August 1, 1942:

KCMO, Kansas City, Mo. — KGB, San Diego, Cal.; KTBS and auxiliary, Shreveport, La.; KFUL, Tulsa, Okla.; KTLJ, Bay City, Mich.; WNBS and auxiliary, Columbus, Ohio; WCBX, Albany, N. Y.; WCSC, Charleston, S. C.; WFBC, Greenville, S. C.; WGBS and auxiliary, Cleveland, Ohio; WHBC, Rochester, N. Y.; WHP, Harrisburg, Pa.; WING, Dayton, Ohio; WAKT, Miami Beach, Fla.; WPAB, Ponce, Puerto Rico; WSAS, Cincinnati, Ohio, and WTSF, St. Petersburg, Fla.

Miscellaneous

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted modification of construction permit (B5-P-2783), for changes in equipment, and increase in power to 50 KW, for extension of completion date to Oct. 3/41 (B5-MP-1367).

WIBA—Badger Broadcasting Co., Inc., Madison, Wisc.—Granted modification of construction permit (B4-P-2698), for new transmitter, changes in directional antenna system for night use, increase in power to 5 KW and move of transmitter and studio), for change in frequency from 1250 to 110 kc., under NARBA and changes in directional antenna system accordingly (B4-MP-1352).

WRR—City of Dallas, Dallas, Tex.—Granted modification of construction permit (B3-P-3229, as modified, for new equipment, installation of directional antenna for night use, increase in power and move of transmitter) for changes in frequency from 1200 to 1310 kc, under NARBA, and changes in directional antenna system accordingly; change in type number of transmitter, and extend completion date to 180 days after grant (B3-MP-1361).

KSGO—Iowa Broadcasting Co., Des Moines, Iowa.—Granted modification of construction permit (B4-P-2727, which authorized installation of new transmitter and new directional antenna for night use; move of transmitter to new location and increase power to 5 KW unlimited time), for use of old transmitter at new site (B4-MP-1360).

KRLH—Clarence Scharbauer, Midland, Texas.—Granted license to cover construction permit (B4-P-2767) for change in frequency to 1230 kc., increase in power to 250 watts, new antenna and changes in equipment and move of transmitter (B3-L-1439).

WJBO—Baton Rouge Broadcasting Co., Baton Rouge, La.—Granted license to cover construction permit (B1-PB-28), which authorized change in frequency from 1340 to 1350 kc., 250 watts, unlimited time (B3-ML-1075).

American Broadcasting Corp. of Kentucky, Portable-Mobile Area of Lexington.—Granted construction permit for a new relay radio station, for use of applicant’s station WLAP, 1030, 2600, 2150, 2750 kc.; 75 watts (B2-PRY-252).

WNBI—National Broadcasting Co., Inc., Bound Brook, N. J.—Granted license to cover construction permit (B4-P-2766), which increased power in frequency to 5 KW, and installation of new equipment and directional antenna for day and night use; 1150 kc., unlimited time (B3-L-1400).

The Birmingham News, Portable-Mobile Area of Birmingham, Ala.—Granted construction permit for new relay station to be used with applicant's standard broadcast station WSGN; 30820, 35740, 35820, 37590 kc.; 2 watts (B2-PRE-395).

Frontier Broadcasting Co., Portable-Mobile Area of Cheyenne, Wyo.—Same except to be used with applicant's standard broadcast station WJBO (B5-P-2766) and WING (B4-MP-1367), for new relay; 30820, 35740, 35820, 37590 kc.; 2 watts (B2-PRE-395).

KFWF—Merced Broadcasting Co., Portable-Mobile Area of Merced, Cal.—Granted license to cover construction permit (B4-MP-245) for new relay station; frequencies 1646, 2058, 2150, 2790 kc.; 75 watts power (B3-PRE-390).

KFWF—Merced Broadcasting Co., Portable-Mobile Area of Merced, Cal.—Granted license to cover construction permit (B5-P-2766), for new relay station; frequencies 1646, 2058, 2150, 2790 kc.; 75 watts power (B3-PRE-390).

Golden Empire Broadcasting Co., Portable-Mobile Area of Redding, Cal.—Granted construction permit for new relay

August 8, 1941 — 673
broadcast station to be used with applicant's standard broadcast station KVCV; frequencies 1616, 2900, 2190, 2830 kc.; 15 watts (B3-PRY-250).

Goldere Empire Broadcasting Co., Portable-Mobile Area of Chico, Cal.—Same except to be used with applicant's standard station KHSI (B3-PRY-251).

Portland Broadcasting System, Inc., Portable-Mobile Area of Portland, Me.—Same except to be used with applicant's standard station WGAX; frequencies 1622, 2908, 2150, 2720 kc., 150 watts (B1-PRY-253).

KEIY, KEIZ—Oregonian Publishing Co., Portable-Mobile Area of Portland, Ore.—Granted construction permits to make changes in equipment and decrease power from 4.5 to 3.5 watts in relay station (B3-PRY-398) (B5-PRY-399).

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Granted license to cover construction permit (B3-P-2721), for increase in power to 5 kw and installation of directional antenna (B5-L-1458).

WFTM—Fort Myers Broadcasting Co., Fort Myers, Fla.—Granted construction permit to move transmitter and studio sites from 51 to 54 E. First Street, Ft. Myers, and install new transmitting equipment; 1210 kc., 250 watts, unlimited time, for new station to operate on 1250 kc, 250 watts, unlimited time.

WFEA—New Hampshire Broadcasting Co., Manchester, N. H.—Granted modification of construction permit (B1-P-2750, for new transmitter, increase in power, changes in directional antenna), for extension of completion date to Oct. 3/4 (B1-MP-1465).

WGRB—Grand Rapids Broadcasting Corp., Grand Rapids, Mich.—Granted modification of construction permit (B2-P-2582, covering new station to operate on 1250 kc, 250 watts, unlimited time), for extension of completion date to Jan. 12, 1942 (B2-MP-1454).

WMOF—Genco, Inc., Greenwood, S. C.—Granted modification of construction permit (B3-P-2930 for new station to operate on 1150 kc, 250 watts, unlimited time), for move of studio to Greenville Road, (Wilson St.), Greenwood, S. C., install new transmitter, change in antenna system, and 1150 kc., 50 kw, unlimited time, for new station to operate on 1150 kc, 250 watts, unlimited time (B3-MP-1435).

WEBQ—Harrisburg Broadcasting Co., Harrisburg, Ill.—Granted license to cover construction permit (B4-P-3133) which authorized change in type of transmitter, change in antenna, and change of location of transmitter to lower floor level, same address (B4-L-1457).

WJOB—O. E. Richardson and Fred L. Adair, Hammond, Ind.—Granted construction permit to move transmitter and studio locations to 449 State Street, Hammond, Ind., and install new antenna (B4-P-3223).

WHAE—Courier-Journal and Louisville Times Co., Louisville, Ky.—Granted reinstatement of construction permit (B2-PRE-361), which authorized construction of a new relay broadcast station, changing equipment and increase power from 50 to 100 watts; frequencies 156750, 158400, 159300 161199 kc.; to be used with applicant's standard broadcast station WHAS (B2-MP-1297).

KEMA—May Broadcasting Co., Portable-Mobile Area of Shendoah, Va.—Granted license to cover construction permit (B4-PRY-243) for new relay broadcast station frequencies 1616, 2900, 2190, 2830 kc.; 25 watts, to be used with applicant's standard station KMA. The license is granted upon condition that said grant is not to be construed as a finding upon KMA's application for renewal of license or upon any of the issues involved in that case (B4-L-1457).

WEPA—Edwin H. Armstrong, Portable-Mobile, Area of New York City.—Granted license to cover construction permit (B1-PRE-277) which authorized a new portable-mobile special relay broadcast station to be used with applicant's FM station W2XMN, north of Alpine, N. J., frequencies 158750, 158390, 159300, 161199 kc., 50 watts (B1-LRE-347).

Triple-Cities Broadcasting Co., Inc., Binghamton, N. Y.—Letter from counsel stating applicant does not desire to prosecute application for new station to operate on 1129 kc, 250 watts, unlimited time, accepted as motion for dismissal and granted.

KGLU—Gila Broadcasting Co., Safford, Ariz.—Petition for continuance for 60 days of hearing now scheduled for August 6 on application for renewal of license, granted, and hearing continued to September 16.

KENV—KENV, Inc., Shendoah, Iowa.—Motion for 60 day postponement of hearing on application for renewal of license now set for August 3, granted for period of 30 days, extended to September 1.

Edward E. Reeder, Seattle, Wash.—Motion for leave to amend application to specify 1560 instead of 1540 kc., 250 watts unlimited time, granted; amendment to be filed within 15 days.

WMA—National Broadcasting Co., Inc., Chicago, Ill.—Granted petition to intervene in the hearing on application of KWK, St. Louis, Mo., for construction permit to operate on 650 kc., 50 kw, unlimited time, using directional antenna day and night.

WAPL—Voice of Alabama, Inc., Birmingham, Ala.— Granted petition for leave to amend application for construction permit to change frequency from 1170 to 1070 kc.; increase power to 50 kw, and time of operation to unlimited, with respect to transmitter and antenna site, amendment to be filed within 15 days; denied as to removal from docket. Hearing now scheduled for September 10.

American Legion, Dept. of Hawaii, Honolulu, T. H.—Petition for extension of time in which to present evidence granted for 60 days, in re application of Hawaiian Broadcasting System, Ltd., for new station in Honolulu, to operate on 1340 kc., 500 watts, unlimited time.

WBBM—Columbia Broadcasting System, Inc., Charlotte, N. C.; KBAB—KBAB Broadcasting Co., Lincoln, Neb.; WNOF—The Norfolk Daily News, Norfolk, Neb.—Motion to postpone hearing now set for August 7, for period of 60 days, granted and hearing on applications of WBBM and KFSB to operate on 1100 kc., 50 kw; WBBM and WJAG to operate on 770 kc., WBBM to use 50 kw, unlimited, WJAG 1 kw daytime, continued to October 7.

WTMY—Mississippi Valley Broadcasting Co., Inc., E. St. Louis, Mo.—Granted petition to accept applicant's late appearance in re application for construction permit to operate on 1340 kc., 500 watts night, 1 kw day, unlimited time.

WBBF—Butterly Broadcast, Inc., Great Falls, Mont.—Granted modification of construction permit for increase in power and installation of directional antenna for night use, for new station to operate on 1340 kc., 50 kw, unlimited time, directional antenna night (B3-MP-1372).

WSDS—The Evening News Assn., Detroit, Mich.—Granted extension of time to file proposed findings, granted, and time extended to August 12, in re application for construction permit to erect a synchronous station to operate on 1310 kc., 100 watts, unlimited time.

KIDW—The Lamar Broadcasting Co., Lamar, Colo.—Granted petition to reopen proceedings in re application for renewal of license of KIDW; hearing to be held August 8.

KFB—Butterly Broadcast, Inc., Great Falls, Mont.—Granted modification of construction permit for increase in power and installation of directional antenna for night use, for new station to operate on 1310 kc., 5 kw, unlimited time, directional antenna night (B3-MP-1372).

Glens Falls Broadcasting Corp., Glens Falls, N. Y.—Placed in pending files pursuant to Order No. 79 application for construction permit for new standard broadcast station to operate on 1230 kc., 250 watts, unlimited time (B1-F-3167).

Homo.—Rodeheaver Lake, Ind.—Granted petition to reopen and amended petition (filed June 10 and July 3, 1941) for reconsideration and grant without hearing application for construction permit for new broadcast station at Winoma Lake, Ind., to operate on 1180 kc, 1 kw daytime (Docket No. 6118).

KONY—KMST Broadcast Co., Omaha, Neb.—Granted petition for reconsideration and grant (1) application for construction permit for new station to operate on 1190 kc, 250
920 Kilocycles
NEW—General Broadcasting, Inc., Miami, Fla.—Construction permit for a new broadcast station to be operated on 920 kc., 5 kW, unlimited, directional antenna for day and night use. Amended: To change frequency from 920 ke. to 1110 ke., make changes in directional antenna, and move transmitter from near Ojus to near Miami, Florida.

930 Kilocycles
NEW—Paducah Newspapers, Inc., Paducah, Ky.—Construction permit for a new broadcast station to be operated on 930 kc., 1 kW, unlimited time, using directional antenna day and night. Amended: Re directional antenna system.

950 Kilocycles
WPEN—Wm. Penn Broadcasting Co., Philadelphia, Pa.—License to use old RCA 1-B transmitter as an auxiliary transmitter with power of 1 kW.

1030 Kilocycles
NEW—S. Brad Hunt, Alton, Ill.—Construction permit for a new broadcast station to be operated on 1030 kc., 1 KW, daytime.

1080 Kilocycles
NEW—Mid-America Broadcasting Corp., Louisville, Ky.—Construction permit for a new broadcast station to be operated on 1080 kc., 1 KW night, 5 KW day, unlimited time, using directional antenna day and night. Amended: Re directional antenna.

WNEL—Juan Piza, San Juan, Puerto Rico.—Authority to determine operating power by direct method.

1330 Kilocycles

KFH—Radio Station KFH Co., Wichita, Kans.—License to cover construction permit (B4-P-2462) as modified, for installation of new transmitter and directional antenna for night use, increase in power from 1 KW night and 5 KW day to 5 KW day and night, and move of transmitter.

KFH—Radio Station KFH Co., Wichita, Kans.—Authority to determine operating power by direct method.

1350 Kilocycles

KSRO—Ernest L. Finley, Santa Rosa, Calif.—Authority to determine operating power by direct method.

1360 Kilocycles

KSCJ—Perkins Brothers Co. (The Sioux City Journal), Sioux City, Iowa.—Modification of construction permit (B4-P-2290) as modified, for installation of directional antenna for night use and increase in power from 1 KW night and 5 KW day to 5 KW day and night, and move of transmitter.

1400 Kilocycles

KRMC—Jamestown Broadcasting Co., Inc., Jamestown, N. D.—Construction permit to install new transmitter and directional antenna for night use and increase in power to 10 KW, and move of studio and transmitter, requesting change in type of transmitter and changes in directional antenna system.

1440 Kilocycles

WSFA—Montgomery Broadcasting Co., Inc., Montgomery, Ala.—Construction permit to install new transmitter, increase power from 500 watts night and 1 KW day to 5 KW, install directional antenna for night use, and change transmitter location.

1450 Kilocycles

During the past week the Commission has announced the following cease and desist orders:

Hudson Fur Dyeing Company—Louis Estrin, Charles Estrin, Sidney Estrin, Esther Estrin and Belle Estrin, trading as Hudson Fur Dyeing Company, Newark, N. J., have been ordered to cease and desist from certain misrepresentations in connection with the business of dyeing rabbit pelttries for fur dealers and garment manufacturers. (3951)

Inter-State Cigarette Merchandisers Association, Newark, N. J., and five member associations composed of persons or companies operating automatic cigarette vending machines in various states and their officers, directors and members, have been ordered to cease and desist from certain agreements and combinations in restraint of competition in the sale of their products. (4388)

National Distillers Products Corporation, with executive offices at 120 Broadway, New York City, has been ordered to cease and desist from certain misrepresentations in connection with the advertising, sale and distribution of a semi-solid poultry feed supplement variously designated as "Produlac Brand Semi-Solid Distillers Grains Mash," "Semi-Solid Produlac," and "Produlac." (4425)

Rosse Products Company—Edward C. Rose, trading as Rosse Products Co., 2708 West Farwell Ave., Chicago, has been ordered to cease and desist from certain misrepresentations in connection with the sale of their products and from making disparaging statements concerning competitors and their products. (3748)

Beney Novelty Company—Harry Richter and Benjamin Mogilensky, trading as Beney Novelty Co., 11 West Third St., New York City, engaged in the manufacture and sale of hats and caps, have entered into a stipulation in which they agree to cease representing that hats or caps, composed in whole or in part of used or second-hand materials, are new or composed of new materials, by failure to stamp on the exposed surface of the sweat bands thereof, in conspicuous and legible terms which cannot be removed or obliterated without mutilating the sweat bands, a statement that the products are composed of second-hand or used materials. The stipulation provides that if sweat bands are not affixed to the hats or caps then the stamping must appear on the bodies of the hats or caps in conspicuous and legible terms which cannot be removed or obliterated without mutilating the bodies. The respondents further agree to cease representing in any manner that hats or caps made in whole or in part of used or second-hand materials are new or composed of new materials. (3179)

Bloomfield Manufacturing Co., Inc., trading as Kant-Slam Door Check Co., Bloomfield, Ind., engaged in selling a device to prevent doors slamming designated "Kant-Slam Door Check," has during the past week the Commission has announced the following cease and desist orders:

Inland Empire Bakers’ Association, Inc., Spokane, Wash., three of its officers, and three member companies manufacturing and distributing bread and bakery products in eastern Washington and western Idaho are charged, in a complaint, with fixing agreement and combination in restraint of trade.

The respondent officers are: L. L. Franch, president; Mel Jacobsen, vice president; and V. B. Pringle, secretary and executive manager; and the respondent companies: Silver Leaf Baking Co.; E. A. Boge, operator of Boge Brothers Bakery, and Olaf Jacobsen, operator of Jacobsen’s Bakery, all of Spokane. The respondent members, according to the complaint, are representative of the association’s entire membership, including those not specifically named in the complaint.

The complaint alleges that the respondent officers and association members have united in a concerted action, through the association, to restrain competition by agreeing to fix and observe, among themselves, uniform and non-competitive prices and by agreeing to act collectively to impose on all bakers selling bread and bakery products in the respondents’ area the non-competitive prices so fixed. (4550)

CEASE AND DESIST ORDERS

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

STIPULATIONS

Commission has made public the following stipulations:

Stipulations

FEDERAL TRADE COMMISSION ACTION

KW transmitter specified under construction permit (B2-P-3038).
WELB—WAVE, Incorporated, Mobile (Louisville, Ky.).—License to cover construction permit (B2-PRE-389) for installation of new transmitter and increase in power.
NEW—Harmon LeRoy Stevens & Herman LeRoy Stevens, d/b as Port Huron Broadcasting Co., Portable-Mobile, Area of Port Huron, Mich.—Construction permit for a new relay broadcast station to be operated on 1622, 2058, 2150, and 2790 Ke., power of 35 watts, A3 emission.
WAPO—W. A. Patterson, Chattanooga, Tenn.—Construction permit to use old Collins transmitter as an auxiliary transmitter and move same to site of main transmitter, and make changes in antenna system, using 250 watts power.
W9XLA—The KLBZ Broadcasting Co., Denver, Colo.—License to cover construction permit (B5-PHB-285) for move of transmitter.
stipulated that it will cease and desist from representing that the device operates in oil; closes all doors; will do the work of the most expensive door checks, or that there is nothing about it to get out of order, and that it is built, or operates, on a new principle. It is further stipulated and agreed by Bloomfield Manufacturing Co., Inc., that it will cease and desist from representing that sample demonstrators will be given to producers when such offer is conditioned upon a deposit being made before delivery. (02849)

Colonial Baking Co., 4410 Gravois Ave., St. Louis, Mo., engaged in selling “Colonial Bread,” has entered into a stipulation in which it agrees to discontinue representing that Colonial Bread is not fattening, is necessary in a reducing diet, helps burn up body fat, or helps one reduce safely, or that six slices of Colonial Bread in a reducing diet will give one pep, energy and prevent one from becoming tired, fatigued, irritable, or experiencing nervous strain, or that Colonial Bread will protect one from the harmful residues that cause fatigue or that it protects one’s health while reducing. (02845)

Harry A. Fischel, Inc., 415 North Third St., Philadelphia, engaged in selling certain medicinal preparations designated “Faunulin Tobacco Flakes” and Faunalex Worm & Laxative Compound,” has stipulated that it will discontinue representing that either product is effective in the prevention or treatment of worms in animals or that either of these products is of any benefit in the prevention or treatment of tapeworms or spiral stomach worms in poultry. (02848)

Fox Studio, Cheyenne, Wyo., has entered into a stipulation to cease certain representations in the sale of photographic enlargements. The respondent agrees to cease representing in any way that his regular method of sale is either a “special” or an “introductory” offer, and to cease representing that his products are “oil colored photographs,” or to cease using any other designation for such products in a manner implying that his products are photographs in the ordinarily accepted meaning of a picture of a person drawn from life, particularly in oil. The respondent also agrees to cease use of the word “guaranteed” or any word of similar meaning in connection with the sale of his products, unless clear disclosure is made of exactly what is offered by way of security as, for example, refund of purchase price. (3184)

Garcia Grande Cigars Incorporated, 141 Fifth Ave., New York, stipulated to cease and desist from certain representations in the sale of its cigars designated “Garcia Grande Crowns.” According to the stipulation, the respondent, in advertising these cigars, employed among other representations, the statement: “Guaranteed 100% Havana and other imported long filler tobaccos,” when in fact not more than 25 per cent of the tobacco constituting the filler of the Garcia Grande Crowns is imported from Cuba.

The respondent agrees to cease representing that these cigars contain “100% Havana and other imported long filler tobaccos,” or making other representations designating the geographical origin of the filler tobacco of these cigars unless in every such representation to the country of origin of each of the filler tobaccos used in the cigars is set forth in the order of their respective predominance by weight and in letters of equal size and conspicuousness. (02837)

Giezendanner Company—Charles J. Giezendanner, Jr., operating under the trade name of The Giezendanner Co., Houston, Texas, engaged in conducting an advertising agency which disseminated advertisements for a drug preparation designated “Locao Belem” on behalf of the Belen Products Co., Houston, Texas, has stipulated that in connection with the dissemination of future advertising, he will cease and desist from representing that the preparation is a remedy or cure for baldness, falling hair, aggravating conditions of the scalp; dandruff, itching or irritated scalp, or oily hair or scalp; that it will grow hair or rejuvenate the scalp, stimulate or revitalize the hair cells, add new life to hair, correct soft or fine hair which is difficult to wave or set, promote activity in the oil glands, or that it is prescribed by physicians for hair or scalp. The respondent has also agreed to discontinue representing that Locao Belem has been subjected to laboratory tests by the Food and Drug Administration or that, upon analysis by the Food and Drug Administration, it was found to comply with the “Pure Food and Drugs law.” (02843)

Globe Fur Company—A group of Middle Western fur products dealers have entered into stipulations to cease certain representations in the sale of their products. The respondents are Globe Fur Co., also trading as Marilyn Fur Studios and as Marilyn Furs, having places of business in Detroit, Fort Wayne and Toledo; and David B. Silverman and Harry Shulak, who were co-partners trading as Marilyn Fur Studios with places of business in Fort Wayne and Toledo, and are now officers of the Globe Fur Co. (3182)

Herb Farm Shop, Ltd., 347 Fifth Ave., New York City, engaged in selling a number and variety of soaps, cosmetics, perfumes, toilet articles and culinary products, including the cosmetic products designated “Country Garden Cleansing Cream,” “Country Garden Smoothing Cream,” “Country Garden Under Powder Cream,” “Country Garden Refreshner,” “Fragrant Meadow Cleansing Cream,” “Fragrant Meadow Astringent,” “Fragrant Meadow Under Powder Cream,” “Fragrant Meadow Smoothing Cream,” “Under Powder Mist,” “Bath Essences,” and perfumes, toilet water and bath talcum, has stipulated that in the dissemination of advertising, he will cease and desist from using the phrase, “Herf Farm Shop of London,” or the name “The Herb Farm Shop Ltd.,” or by any other words or phrases or in any other manner indicating, contrary to fact, that any of its products has an English or other foreign origin, unless in direct connection therewith it is clearly and conspicuously stated that such product is made, compounded or produced (as the case may be) in the United States, and that it will cease representing that any of its products is infused with or contains herbal oils unless, where such product does not contain a substantial amount of herbal oil, the percentage of herbal oil present is given in immediate connection therewith; and will cease representing that the herbal oil contained in any of its products is present as an emulsion when such is not the fact. (02844)

Lacto-Cal Laboratories—Olive M. Goulet, trading as The Lacto-Cal Laboratories, 1121 Ingraham St., Los Angeles, Calif., engaged in selling a drug preparation designated “Lacto-Cal,” has stipulated that she will cease and desist from representing that the preparation will exert or have a beneficial influence on the nerves, speed up or aid digestion or increase the flow of the gastric juices; that it possesses tonic or stimulant effects or powers or that it is a general gland builder; that it will feed the brain, nerves, tissues, testicles, or ovaries; that the preparation is a scientific compound of lactic acid and calcium or contains calcium in sufficient quantities to be of therapeutic value, or that its use will reduce acidity or be of value in the relief or treatment of hyperacidity; that the preparation has any beneficial effect on the circulatory system or on metabolism, will prolong life or enable one to live to be 100 years old, or any other definitely stated number of years; that it contains Vitamin B, Vitamin D, or phosphorus or contains elements essential to the building of hemoglobin, or that the general dietary condition of the American people is such as to make the purchase and consumption of the product necessary or advisable. (02841)

Maurice Larsen, trading as Fox Studio, Cheyenne, Wyo., has entered into a stipulation to cease certain representations in the sale of photographic enlargements. The respondent agrees to cease representing in any way that his regular method of sale is either a “special” or an “introductory” offer, and to cease representing that his products are photographs in the ordinarily accepted meaning of a picture of a person drawn from life, particularly in oil. The respondent also agrees to cease use of the word “guaranteed” or any word of similar meaning in connection with the sale of his products, unless clear disclosure is made of exactly what is offered by way of security as, for example, refund of purchase price. (3184)

Medford Laboratory—Edward Howell, trading as Medford Laboratory, 210 South Kedzie Ave., Chicago, engaged in selling drug products designated “Nurtrase” and “Kleen,” has entered into
a stipulation in which he agrees to discontinue representing that either of the products is a cure or remedy for or that either of them will overcome food discomfort, indigestion, gas, heartburn, gastrointestinal symptoms, cancer, diabetes, liver trouble, or other ailments; that Nutrase is free from drugs or will impart new life or energy, or that it affects the appetite, the weight, or the ability to sleep, builds up resistance to colds or headaches, or wards off colds. (02846)

Michigan Magnetic Mineral Water Co. and Natural Ray Mineral Water Co., the latter trading as such and as Michigan Magnetic Water Co., St. Louis, Mich., engaged in bottling and selling mineral water under the brand name “Natural Ray Mineral Water,” have stipulated to discontinue representing that the product is a remedy or cure for stomach, bladder or kidney troubles, chronic constipation, paralysis, high blood pressure, anemia, glandular difficulties, arthritis, rheumatism, or the aches or ailments arising from any of the diseases or conditions mentioned; is a safeguard, a body builder, a way to gain, retain or maintain health, a preventative of infantile paralysis or other illness, or an aid to muscle or bone development, or that it affects the appetite, the weight, or the ability to sleep, builds up resistance to colds or headaches, or wards off colds. (02846)

Nu-Tone Products Corp., 151 West 28th St., New York City, engaged in selling certain hair dye preparations designated “Tuch-Up,” has stipulated to discontinue representations that the hair dye products which it sells are manufactured by it or by any other organization affiliated with or owned or controlled by Nu-Tone Products Corp., unless and until the hair dye products which it sells are manufactured by it or by any organization owned, operated or controlled by Nu-Tone Products Corp.; that the use of its hair dye products will cause hair to look natural or cause hair to have a soft texture or have any beneficial effect on hair texture; that their use will banish, eliminate, end, or rid one of gray hair or cause one to remain young; that its hair dye products are vegetable compounds; that their use will cover hair roots or have any effect upon the color of hair roots; that hundreds of thousands or any other number of women have specified their requirements for a hair dye, or that the respondent’s hair dye products are new or made of ingredients of recent origin or development. (02840)

Physicians’ Supply Co., Inc., 1127 Fourth Ave., San Diego, Calif., engaged in selling girdles designated “Air-Way Girdles,” has stipulated that it will discontinue representing by the use of the designation “Air-Way Reducing Girdle,” or by any other means, that wearing an Air-Way Girdle will cause one to reduce, or will effect a definite reduction in weight or measurement, or result in any other beneficial effect, or any other number of women have specified their requirements for a girdle, or that the possibility of skin infection from excreted waste matter absorbed by a girdle is eliminated by wearing an Air-Way Girdle. (02842)

Polar Co., a corporation trading under the name Masterlite Lamp Co., Hoboken, N. J., engaged in the manufacture and sale of electric bulbs or lamps of various types, including one such device called “Double-Life,” has entered into a stipulation in which it agrees to cease and desist from stating or representing in any manner that the use of its commodities will effect or result in a saving of 20% or up to 40% on lighting costs, that is to say, reduce electric light bills by 20% or more, or any other amount which is exaggerated or in excess of what is actually the fact, or that its commodities will last from two to four times longer than standard bulbs, or that the commodities have an average burning life of 2000 hours, or that they meet Bureau of Standards specifications in all respects. (3185)

David B. Silverman—David B. Silverman and Harry Shulak, in connection with the sale of fur coats, agree to desist from the use in advertisements or on labels, tags, brands, or otherwise of any designation or description of a fur garment which deceptively conceals the true name or nature of the fur, with the effect of misleading purchasers; from disseminating advertisements, invoices or other descriptive literature pertaining to coats or garments manufactured from dyed furs which fail clearly to disclose that they are made from dyed furs, peltries of skins; and from representing the sales price of their products as a “mere fraction of their actual worth” or as less than the worth or cost price thereof when such worth or cost price is in excess of or equal to such sales price; or from representing that so-called “values” offered are due to quantity purchases, unless the number of articles purchased is as represented and unless such quantity purchases do in fact result in special values or reduced prices to purchasers. (3183)

Supreme Hosiery Company—Samuel K. Kreenberg, trading as Supreme Hosiery Co., 607 Roosevelt Road, Chicago has made a stipulation to cease certain representations in the sale of lingerie and hosiery. Under his stipulation, the respondent agrees to cease using the terms “Fashioned,” “Full Fashioned” or “New Fashioned” to describe hosiery not made by the process used in producing “fashioned” hosiery, and to desist from various other representations concerning the quality of his products or the materials of which they are made. (02838)

Radio Time Sales Tax

AFL OPPOSES TAX

The Executive Council of the A. F. of L. adopted the following resolution:

"While labor is firm in its belief that the U. S. Government should levy extra taxes on the people to pay for defense work, we do not believe in punitive or discriminatory taxes such as that levied on advertising in radio. Broadcast employees, men and women, when out of work cannot fit themselves into defense work."

H.R. 5417, the tax bill, which among other provisions imposes a 5-10-15 per cent tax on the gross receipts of the time sales of broadcasters, is now before the Senate Finance Committee. Hearings which are being held in the Senate Finance Committee Room, third floor of the Senate Office Building, opened on Friday, August 8.

After hearing from its own tax experts and treasury officials, it yesterday called to the stand several who made statements bearing directly upon the proposed tax on radio broadcast receipts.

Among others who were heard were John Benson, President of the American Association of Advertising Agencies. Mr. Benson's statement follows:

"On behalf of the American Association of Advertising Agencies, a professional body whose members handle two-thirds of the national advertising of this country, I desire to protest against imposing a special tax on advertising and advertising media, as provided in Section 3269 of Part II, in the tax measure now before the Finance Committee, H.R. 5417.

"Advertising agencies have no direct financial interest in this tax, as it is not imposed upon them; nor do they have any bias in favor of any one advertising medium or group of media, using them all impartially when and as required to solve a given advertising or marketing problem for a client. Having any ownership interest in a medium of advertising would be a breach of our ethical code.

"Hence we hold no brief for either the outdoor or radio broadcasting media as such. What we deplore about the proposed tax on them is the burden it imposes upon advertising itself and the cost of distributing goods. Advertising is but one of several forms of selling and is often used to facilitate or economize sales effort. If such a tax were imposed, manufacturers would either do less advertising and hence sell less goods, or they would continue to do the same amount of advertising at increased cost, which would tend to raise prices to consumers.

"If advertisers sell less goods, they employ fewer people to make them, and the tax would contribute to unemployment. If the manufacturer raises his prices, it would contribute towards inflation.

"In addition to the above, a tax on advertising would be discriminatory between manufacturers which use advertising as a means of selling and those which use other forms of selling but do not use advertising.

"One of the most important services that advertising renders to distribution is to save time, effort and money in moving goods from producer to consumer. Cost of the media is a big factor, of course, in this economy of the advertising operation. It does not matter how effective the advertising appeal may be, to increase the cost of the channel used to reach a market will lower the efficiency just that much, with one or more of the following results:

1. Slow down civilian production and non-defense employment of labor. Printers and pressmen are not benefited by an offensive tax of this sort. Their employment depends on successful advertising, as a whole, which breeds more advertising and more printing whatever the media used. One medium feeds into another.

2. Lessen volume of business done and reduce available net profit, from which more taxes could be derived.

3. Reduce the margin between selling price and cost of distribution, which might be used in raising wages or in improving product.

4. By raising the cost of selling, add to the upward spiral of prices, with its trend towards inflation.

The plea has been made that this special radio tax is not imposed upon advertising, but on entertainment. In our opinion, this is not true. Only the commercial revenues are to be taxed. Commercial radio advertising is not entertainment; it merely uses entertainment as an aid in selling. Therefore, the tax is on a method of selling, not on the entertainment appeal.

"May I say a word about the timely public service which can be rendered by advertising during the defense emergency and why it should not be handicapped or burdened in rendering that service.

"Advertising is a definite brake on inflation and high prices. It does not stimulate desire for more civilian goods than can be produced. It does not encourage indiscriminate demand by the public. It promotes good will for a specific product or service and does not stimulate immediate sale unless the product is available or can be adequately produced. Arousing desire for goods which conflict with defense production would not result in sufficient sales to pay for the advertising, and would also cause ill will instead of good will among customers.

"Advertising thus renders an indispensable service by diverting public attention and desire away from such goods and towards those which can be made in abundance. This satisfies popular demand and builds up volume to absorb the expanded purchasing power of the masses employed in national defense. There is no better hedge against inflation.

"As the President has pointed out, the nation needs all the economic activity it is possible to produce, for the welfare of its people and for financing the war effort. Advertising is the effective spur. How much better to tax wealth and net income than the means of producing them. To do the latter is like consuming seed corn instead of planting it and producing abundant crops for consumption. It would be killing the goose that lays the golden egg.

"And the spur must be vigorous and effective to move an adequate volume of unrestricted production into consumers' hands, with so many lines being restricted by defense.

"In times like these, we should operate our processes of making and selling goods as efficiently and inexpensively as possible. The proposed tax would impair that efficiency, and thus produce, we believe, less total taxes."

(Continued on page 682)
The Association of National Advertisers, Inc., is a non-profit membership corporation incorporated under the laws of New York State. It is composed of some three hundred manufacturers in whose behalf I appear, respectfully protests the imposition of the taxes on advertising proposed in H. R. 5417.

"The Association of National Advertisers, Inc., is a non-profit membership corporation incorporated under the laws of New York State. It is composed of some three hundred manufacturers of all of whom use advertising as an aid to selling. Its membership is nation wide and includes companies (from almost every industry—steel, shoes, grocery products, drug products, textiles, etc.) represented are both large and small companies with advertising appropriations ranging from the largest to well under $50,000 a year, a true cross section of American business.

"Membership in the Association is open only to corporations selling goods or services other than advertising. Publishers, advertising agencies, outdoor plant owners, radio station operators and others engaged in selling advertising are not eligible for membership.

"As an association composed solely of manufacturers who are all buyers of advertising, with no financial or controlling interest in any advertising medium, we hold no brief for radio, outdoor, newspapers, or other advertising medium per se. An essential part of the business of such media is the sale of advertising; the principal business of the members of the Association of National Advertisers is manufacturing.

"But while we have no particular interest in any one medium, we are vitally concerned with the preservation of the American advertising system and hence in the welfare of all media. We are concerned in the maintenance of free and open competition between media.

"We believe the taxes proposed in Title V, Sec. 557 and Title VI, Sec. 601 of H. R. 5417 are unsound, unfair and discriminatory and that therefore they should be eliminated.

"We have seen no argument whatever in favor of the tax on outdoor advertising. We have seen no argument in favor of the tax on radio advertising except one which proposed such a tax principally as a punitive matter designed to correct alleged unfair competition. If there has been unfair competition—which we do not admit—there are adequate laws dealing with that subject and existing government agencies whom Congress has designated to administer them. We do not believe a revenue measure should be used to confer police power. Further, we believe it is significant that there has been, to our knowledge, no proposal of such taxes on outdoor and radio advertising by publishers of magazines or newspapers nor any testimony favoring the taxes from them.

"It has also been argued that the proposed tax on radio advertising is an amusement tax. This hardly seems plausible. Amusement taxes in the United States are imposed and paid by those enjoying the amusement. Taxes on admissions to theatres, athletic games and the like are paid by those who purchase tickets, not by the motion picture companies or the promoters of the amusement. Such is not the case with the proposed tax on radio advertising. Again, the tax would be imposed on radio time sales. That means on sponsored programs only, in other words on advertising. No tax is proposed on sustaining programs, on the broadcasting of special events, speeches, etc., which are just as surely entertainment as is sponsored material.

"No tax is proposed on magazines—and magazines are designed and purchased for entertainment. No tax is proposed on newspapers—and yet sponsored news broadcasts are to be taxed.
ANOTHER NAB PUBLICATION

BROADCASTING TO THE YOUTH OF AMERICA

A report on present day activities in the field of children's radio programs

By DOROTHY LEWIS

Here are a few comments:

Adah F. Whitcomb, Supervisor of Schools Department, Chicago Public Library—"'Broadcasting to the Youth of America' is exactly what is needed and is presented in such practical form. It seems as if nothing had been omitted. It will undoubtedly have the desired effect of raising the standards of children's programs, as sponsors and program makers will surely be impressed by the scope of this study."

Niles Trammell, President, National Broadcasting Company—"In 'Broadcasting to the Youth of America', Mrs. Lewis has done a splendid job, and I am certain her efforts will be most helpful to the entire broadcasting industry."

Dr. James R. Angell, Education Director, National Broadcasting Company—"I have had the pleasure of looking over your 'Broadcasting to the Youth of America' and congratulate you upon this accomplishment. The recommendations which you make seem to me almost without exception, sound and in every case interesting."

William S. Paley, President, Columbia Broadcasting System—"'Broadcasting to the Youth of America' is a very valuable contribution to broadcasters. Dorothy Lewis has compressed into its pages a fair and impartial report which bestows praise and blame intelligently and realistically. Many of her recommendations are in line with the most farsighted planning of broadcasters in their constant effort to provide wholesome, stimulating and worthwhile programs for children."

These are but a few:

Every broadcaster should read this book from cover to cover. We are sending you your copy early next week.

You will want to place this book in the hands of educators, librarians, women's groups, and others. With your copy there will be enclosed an order blank for your use in ordering additional copies.
stabilizing effect, not only on business but on our economy generally. Aside from its benefits to consumers, it has enabled business to expand and grow. That expansion and growth has made for stability for the future not only for business but also for all of those engaged in business. The effect of that stability has been to contribute to a feeling of security for the future on the part of all employees of business and to enable business to operate on a sound basis. When business is conducted along lines that are sound and stable, it can be depended upon to make a reasonable profit. Unless it does make a reasonable profit it cannot continue, and if it cannot continue it not only makes for unemployment but dries up the principal source of revenue for the government and its agencies.

"It is to the profits of business that government must look for a large part of the revenue that is to be raised through taxation. To discourage advertising through taxation or to make it impossible for business to advertise will be to strike at the very source of the income the government now needs so badly."

"A tax on advertising would not only seriously cripple one of the most vital tools of business but it would also cripple the media concerned, all of which are substantial taxpayers and employers of labor. Incidentally, we see no way in which the proposed taxes could possibly benefit labor. The effect would be quite the contrary."

"The proposed taxes would also have a bad effect upon the hundreds of thousands of retailers in all lines of business. Advertising by the manufacturer creates demand for products, moves goods and makes them available to the retailer. The retailer himself, through advertising, would have to slow down that demand, to make for slow turnover and hence lower the profits of the retailer."

"The function of advertising, now of all times, is to strengthen the national economy to meet its burden. As President Roosevelt has said recently, this country has been forced to develop to a point available to our citizens the products of American skill and ingenuity. That force needs now to be applied toward the maintenance of our accustomed standards of living and further progress."

"It is from the nation's non-defense business that the sinews of war must finally come. To hamper that business is to weaken those sinews."

"Advertising is needed now as never before. Let us take a hypothetical example. There has been a wave of hysterical buying on the part of the public of silk stockings. The United States Department of Agriculture has been working for some time, we understand, on the development of stockings made from other fibers. If, as, and when it becomes necessary to tell the women of America of these new fibers and of the stockings made therefrom, what force can be substituted for advertising to do that job? What other means will there be to spread the knowledge of the new discovery to consumers?"

"Advertising will divert public demand to merchandise that is sound and stable, it can be depended upon to make a greater price for the tax and its collection than any benefits that would not seem to be vital to the success of the tax measure. Further, we believe that the American public would pay a far greater price for the tax and its collection than any benefits that might be derived theretrom."

"In view of the above, the Association of National Advertisers respectfully urges that the Committee eliminate the taxes proposed in Sections 557 and 601."

He was followed by Charles E. Murphy, General Counsel for the Advertising Federation of America, who said:

"The ADVERTISING FEDERATION OF AMERICA is the only national organization representing both sellers and buyers of advertising. Among its members are 61 advertising clubs located in key cities in every section of the nation. It, therefore, reaches horizontally across the entire advertising industry and presents here today the cross-sectional viewpoint of the advertising fraternity regarding the proposed taxes on outdoor and radio advertising."

"We consider any tax on advertising, regardless of the media affected, as harmful to the economy of our nation and detrimental to our well-established system of distributing consumer goods."

"The power of advertising as the selling force of industry and as the stimulator and stabilizer of commodity distribution must be protected. This is necessary in supporting the base for emergency taxes, for any impairment in the use of advertising by taxation will in turn affect distribution and the revenues derived therefrom. In addition, a tax on advertising will defeat its own purpose."

"We are mindful that vast sums of money must be raised by our Government for national defense. This involves the greatest merchandising effort in the history of our country. Hence it is that our merchandising machinery must be keyed up to the highest notch of efficiency."

"Business uses advertising to maintain and increase its outlets for goods. Unless such outlets are maintained and increased during the coming years, the expanded income on which taxes are based will not be forthcoming. Nothing should be done, therefore, to cripple the merchandising machine that produces income, and a tax on advertising will bring that very result. Income must be taxed, but to tax the process which creates income is an economic fallacy."
grew. It was the American system of mass distribution working in its perfect cycle.

"Whether it was in the smaller city or the metropolis, I never saw a dollar spent for advertising except with the greatest care and consideration. Always the question asked was: 'What sales is this advertising dollar going to produce?' A tax on advertising is no different than Congress saying to a merchant or manufacturer: 'We're going to collect from you a tax on the wages you pay your salesmen.' For advertising, gentlemen, is mass selling and nothing else. It is the best, cheapest and only system through which the products of our mass production may reach the consuming public."

On Monday, August 18, the broadcasting industry will present its arguments against the tax. Broadcasters who are in the vicinity of Washington on Monday are urged to sit in at the hearings.

On page 663 of the "Protest" (August 8, 1941) excerpts from the remarks of several members of the House of Representatives who spoke on the bill were given.

Following are some additional quotations:

Representative Milton H. West (D.-Texas) (member of the House Ways and Means Committee)—"There are several items in this bill imposing taxes * * *, on which no hearings were held. We (The Ways and Means Committee of the House) set out to raise a certain amount of money, and when, after the hearings were completed, it was discovered that the items discussed would produce the estimated needed revenue, the Committee, without hearings * * * reached up into thin air, pulled down and placed in the bill items of taxation * * *. I refer specifically to the proposed tax on outdoor advertising, gross sales of net time by broadcasters * * *.

After referring to the fact that many of the interests adversely affected by the bill had been given an opportunity for hearing, Representative West continued:

"The radio broadcasters did not receive such reasonable consideration. The Committee proposes and recommends what in effect is a gross sales tax on this industry. If the proposal becomes a law, a broadcaster may operate at a heavy loss and yet be compelled to pay an enormous tax. Not only that, while we seek to collect this unfair and discriminatory tax from broadcasters, some of their competitors are not taxed, and are in fact subsidized by the Government in the amount of nearly $80,000,000 per year."

Representative Joseph A. McArdle (D.-Pa.)—"H. R. 5417 proposes to tax only a portion of outdoor advertising and radio advertising and levies no tax whatever on the other national advertising mediums, such as newspapers, magazines, and direct-mail advertising.

"If one national medium of advertising is to be taxed by the Federal Government then certainly all should be taxed, but I do not believe in excise taxes upon any of them, because they all produce sales and profits and we should tax profits instead of the source of profit. Organized labor would be most injuriously affected by the proposed tax on outdoor advertising companies."

**BMI NOTES**

Since our last announcement on July 21st BMI has welcomed 15 new stations bringing the total, excluding non-commercial stations, to 678. The new subscribers follow:

WTNJ, Trenton, N. J. WISR, Butler, Pa.
KBUR, Burlington, Ia. KXHO, Hannibal, Mo.
KFJ B, Marshalltown, Ia. KBBW, Hutchinson, Kan.
WISH, Indianapolis, Ind. KFPY, Spokane, Wash.
KAVE, Carlsbad, N. Mex. KBWD, Brownwood, Texas

**More Money for Composers**

Checks covering sheet music and mechanical royalties for BMI's second quarter are being mailed out this week. Everyone is being paid even if the song only sold one copy. Biggest money makers for the quarter in the order listed were: My Sister and I, Walking By the River, Wise Old Owl, High On a Windy Hill, It All Comes Back To Me Now, You Walk By, G'Bye Now, Friendly Tavern Polka, So You're the One, Because of You, I Give You My Word. Dark horses in the field were You Might Have Belonged To An­other, Good Little God, Little Sleepy Head, and Let's Dream This One Out. Remember, this payment covers only sheet music and record royalties. The checks for the second quarter for air performances will come later.

**BMI Bliss**

Just about two years ago Helen Bliss was the raven-haired girl back of the lingerie counter in Halle's Department Store in Cleveland. Today she is the "White-haired girl" of BMI, rapidly gaining recognition as a top-flight writer of words and music.

Last week Miss Bliss' latest tune I Went Out Of My Way joined the Hit Parade just as My Sister and I stepped off. Thus BMI published tunes retains an unbroken record for Hit Parade performance since early Fall of 1940.

George Marlo, professional manager of BMI, who has been contacting orchestras for a score of years, and Leonard Joy, in charge of popular records for Victor Records, have placed their stamp of approval on Miss Bliss' work.

"Her ability," says Marlo, "to take a frequently used phrase such as I Went Out Of My Way, use it as a song title and weave a clever lyric around it, proves that the Cleveland girl is well on her way to making a place for herself in music."

Miss Bliss' first song The Moon Won't Talk, written in collaboration with Charles Hathaway, was published by Regent Music, Benny Goodman's publishing firm. She gives Benny full credit for discovering her latent talent and launching her on a song-writing career. She met the band leader while he was playing a week's engagement at the Palace Theater in Cleveland.

Upon coming to New York a year and a half ago Miss Bliss found employment in Macy's Department Store at the hosery counter where she continued to hum her impromptu tunes during working hours and spent her evenings fashioning words and music. BMI accepted two of her songs It's Nothing New and I Could Have Told You So. Both of these, as well as The Moon Won't Talk, are frequently played over the networks and in the coin operated phonograph machines.

A daughter of Mr. and Mrs. Clayton Albert Bliss, 10-510 Wilbur Avenue, Cleveland, Miss Bliss says she would like to write a song about her home town but the word has a most surprising way of eluding a lyric.

**Ballads Last Longer**

Under Mark Warnow's signature the Buffalo Courier-Express of July 26th has the following to say regarding the nation's taste in popular songs:

"The favorite tune in the country this year so far has been I Hear A Rhapsody, which made first place for ten weeks. Second is Amapola, which made first place seven times. My Sister and I or Intermezzo may eventually surpass Rhapsody, but that still remains to be seen.

"It is difficult for rhythm or novelty tunes to retain their popularity long. So You're the One, a liltting rhythm tune, started out like a house afire, but it didn't retain its popularity for long. There'll Be Some Changes Made, a revival, gave evidence of sweeping the nation, but its swing wasn't very extensive. Wise Old Owl, Oh, Look At Me Now, Walking By The River, Goodbye Now are other rhythms or novelty tunes that have tried hard to get out in front. The Hut Sat Song, a current favorite, is an exception."

**Eighteen New Publishers Signed**

Eighteen newly-formed publishing houses have signed contracts for the transfer of performance, broadcasting and television rights in their music to BMI. Among the new songs are five written by Sonny Skyler, author of Just A Little Bit South of North Carolina, My Foolish Heart and I by Harold Varlow, who wrote The Things I Love, a national leader. The houses are Barbe Music Publishers; Barres Publications; S. Brainard & Sons Co.; Ecca Music Co.
DR. WELD DEFENDS ADVERTISING

Continued attacks upon advertising, direct and indirect, constitute a serious problem for radio which depends for existence upon advertising revenue.

In the final analysis the weight of public opinion is often the deciding factor, and broadcasters therefore should continually do everything within their power to preach the gospel of advertising to their communities. Talks before business groups, civic clubs, students, women’s organizations, etc., all contribute toward this end, and considerable material is already available, such as the “Public Relations and Sales Manual” issued by the NAB Department of Broadcast Advertising, the talks by Colonel Willard Chevalier, Richard Deupree and others, printed and distributed by the NAB.

Additional material has been contributed by Dr. L. D. H. Weld, economist and research expert, former professor of business administration at Yale, and former president of the American Marketing Ass’n. Dr. Weld has furnished answers to the questions raised by Thurman Arnold, who recently sent a questionnaire to leading oil companies, inquiring into their advertising activities. A digest of Dr. Weld’s remarks, made recently in Washington, follow:

1. Advertising is a fundamental feature of our competitive system.

Our free economy involves the right of a company to influence people to buy its products. This means it can use competitive selling methods, including advertising, or not, as it sees fit. Advertising is part of the selling process. There is no more reason to curtail advertising than there is to curtail competitive selling.

2. Competition exists in the oil business.

It must be remembered that real progress in the industry is due to those companies who undertake scientific research and who establish markets for their products (by advertising).

3. Competition results in product differentiation and improvement.

One result of competitive advertising is that each company constantly seeks methods to make its products different from and better than those of its competitors. It is looking for “talking points” to play up in its advertising. Over a period of years great improvements have resulted, the same as in other industries: automatic, electric refrigeration, radio sets, etc.

4. Different brands of gasoline vary in quality.

Tests show that different brands of gasoline vary materially in their performance characteristics; volatility varies, so does vapor pressure, and there is a considerable octane difference between the best and poorest “regular” gasolines among nationally advertised brands. These differences would be greater if local brands were included. Oil companies are continually analyzing their own and competing brands (and making improvements) and oil men know of the differences that exist.

5. Improvements in gasoline over a period of years have been astonishing.

The gradual improvement that has taken place has resulted in a product that is vastly better than gasoline of 15 or 20 years ago. Typical octane ratings have increased from 52 to 75 between 1920 and 1940, or 44½ per cent; besides this and many other improvements the average retail price of gasoline has been reduced from 29½¢ to 12½¢ per gallon (not including taxes). Most improvements have resulted from a succession of pain-taking small changes, along with technical developments in the automobile industry, permitting the adoption of high compression motors and increased operating efficiency. The oil companies continually analyzing their own and competing brands (and making improvements) and oil men know of the differences that exist.

6. Advertising is of practical value in the marketing of petroleum products.

Advertising helps to move petroleum products into the hands of consumers; supplants the more expensive method of personal salesmanship; results in increased sales; reduces the amount of switching from one brand to others; means more customers per dealer; furnishes valuable information to salesmen; builds loyal dealers; increases turn-over through bulk plants and dealers. In short, it has helped in creating and maintaining a distributing system that is more efficient and less costly than it could have been without advertising.

The tendency to belittle the small differences in competing products at any one time completely disregards the longer-time changes that result in such definite improvement. It is obvious that any restrictions on our economic system that decrease the opportunity to profit from product differentiation are important the differences appear at any one time, would remove one of the greatest incentives in our economic system toward improvement of products.

7. The cost of advertising per unit of product is extremely low.

It is to be measured in tenths of a cent per gallon, and has no appreciable effect on prices.

8. Government restriction of advertising would be a definite step toward the destruction of our competitive economy.

If one believes that we make progress through our system of free enterprise and competition, he can’t help believing in advertising. Without advertising there would be little incentive to strive for product differences, which mean product improvement, and the right to influence the public to buy. Advertising is at the very root of our competitive system; anything that hampers it would break down individual incentive and free competition.
Advertising has contributed to the development of mass demand, without which large-scale production, with low operating costs, would have been impossible. It has made people want things so that they are willing to work in order to get them. It has been a factor in making business men willing to invest in new production facilities, resulting in production of more goods, giving more people employment and earning power. It has been a factor in raising the standard of living and increasing national income from $100 per capita in 1850 to $600 per capita today.

Advertising has been a basic stimulus to lower costs, increased investment, greater production, improved products, increased earning power and rising standards of living.

PER-INQUIRY AND FREE TIME

The Hayo Co., of Omaha, Neb., makers of HAYO, a hay-fever remedy, are seeking per-inquiry deals. Previously reported here where the business was placed through an advertising agency, the company now seeks to place orders direct.

Ellen Rose Dickey, "Beauty News Editor," Ogilvie Sisters, New York, seeks free time for scripts called "Hair Care in Summer" to promote hair and scalp preparations.

Travel Radio Service, New York, seeks free time for travel scripts on behalf of American Express Travel Service.

Legislation

FEDERAL LEGISLATION

HOUSE RESOLUTION

H. Res. 292 (BARRY, D-N.Y.) PROPAGANDA—Authorizing an investigation of propaganda disseminated by the motion picture and radio industries tending to influence participation of the United States in the present European war. Referred to the Committee on Rules.

National Defense

NEW HIGH IN NAC ENLISTMENTS

The last two or three months have been the best period for enlistments of Naval Aviation Cadets in the entire history of the U.S. Navy. This information was given NAB today and is reliable and official. "Don't let them tell you differently".

NAC recruiting announcements are carried in quantity by nearly every radio station in the country. Other announcements urge general Navy enlistments and enlistment in the Naval Reserve.

THE ANSWER IS "YES"

With reports of Radio Station National Defense Activity for the month of July have come inquiries from a number of executives as to whether a report for August was also desired. The answer is "yes"; the NAB National Defense Committee will appreciate receiving such a report. Toward the last of the month the request will be repeated in a letter to stations.

Many station managers have also written that they have started to keep a national defense log which they believe will be of benefit to themselves as well as helpful in making out the reports.

NEW STATION ASSISTS ND

KBUR, went on the air in Burlington, Iowa, July 20. "Since the very beginning," writes Clark G. Kuney, program director, "we have been cooperating in the national defense program.

WHO'S "DRESS REHEARSAL"

WHO, Des Moines, sponsoring "Dress Rehearsal", a half hour variety show in behalf of defense bonds and stamps 8:30 to 9:00 p.m., Fridays. It is written and produced by Dick Anderson of the WHO staff. Cast includes an orchestra conducted by Don Hovey, WHO musical director, the Songfellows, the Three Little Girls Who Love to Sing, The Foursome, The Sunset Corners Choir, Swackley & Tuttle and guest artists.

AD SECTION FOR KFAR

The July 15 issue of the Fairbanks (Alaska) "Daily News" contains a special "KFA National Advertisers' Section". The editorial copy contained a nice balance of stories between the station, station features and product publicity. Half of the space was devoted to consumer advertisements of products advertised over the station.

Just in case you are interested, the high temperature in Fairbanks on July 14 was 76 degrees. The low on the 15th was 52 degrees but by 2:00 p.m. the temperature had risen to 69.

FCC FORM 303 CLARIFIED

Numerous stations having found difficulty in answering question 15(a) in FCC Form No. 303 ("Application for Renewal of Standard Broadcast License"), NAB requested the Commission to clarify the meaning of the question. On August 5 the Commission replied as follows:

"Gentlemen:

Receipt is acknowledged of your letter of July 22, 1941, in which you request a clarification of question 15(a) in our Form 303.

The contracts covering program service called for in that question include management contracts, affiliation contracts with networks providing for the broadcasting of five talent programs, contracts with transcription companies providing for transcription service, and any other contracts covering general program service as distinguished from contracts covering specific programs or contracts with individual artists.

Very truly yours,

(Signed) T. J. Slowe
Secretary.

DCB DRAFTS PLANS FOR AIR RAID AND EMERGENCY USE OF BROADCASTING

Nation-wide plans to use standard broadcasting stations for air raid warnings and other messages, communiques and announcements in the event of military emergency were outlined August 8 by the Defense Communications Board through James Lawrence Fly, Chairman of the DCB and of the FCC.

The Chairman emphasized that broadcasting would remain in private hands and that all utilization of broadcast facilities will be on a cooperative basis except for possible areas of actual combat. The defense studies have been made in considerable part by the industry itself.

Also announced were protective safeguards designed to ensure continuous operation of broadcasting stations under emergency conditions. The DCB finds the broadcasting structure well adapted to air raid warning and similar uses, but notes certain remediable shortcomings still to be overcome.

Present plans, now under joint consideration by the DCB and the Office of Civilian Defense, are concerned with ways of linking of broadcast stations to local civilian defense centers for instantaneous receipt of local and regional warnings, announcements, etc. In addition, a potential nation-wide supernetwork is available for messages of national scope.

Current reports to the DCB indicate that of approximately 880 standard broadcast stations in operation, nearly 500 are already connected to the potential supernetwork carried on telephone lines. An additional 132 have studios in cities now served by the supernetwork, so that only local links need be secured; and 740 are
located along the lines of the supernetwork and so can be tapped in. Only 12 stations in the country are located away from the regular program lines, and these can be hooked in for emergency announcements, etc., by means of ordinary telephone interconnections. Thus substantially every broadcasting station in the country can be promptly utilized for military or civilian defense message broadcasts. The program transmission network is also available for instantaneous warnings to a particular station that it is in danger of becoming a beacon for enemy aircraft.

DCB surveys indicate that even with every station in the country tied in for emergency broadcasts, certain rural areas would be without reliable reception, especially during daylight hours and during summer months in the Southern States. Various plans for providing reliable broadcast service to such areas are now under consideration. The DCB notes that all urban areas are adequately covered for emergency defense communications, and that few towns with a population of more than 25,000 are without local broadcasting stations.

Forestalling Program Interruptions

Successful use of broadcasting for military or civilian defense under private ownership and operation, the DCB notes, depends upon the reliability of transmission and its freedom from accidental or deliberate interruptions. Preliminary reports to the Board indicate that reliability varies from station to station, but that a high degree of freedom from program interruptions can be attained. Thus 20 selected stations were found to be losing an average of less than a minute and a half per week from program interruptions of all kinds. Reliability of these stations was calculated at 99.982%.

Electric power failure, it was found, is the most frequent cause of interruptions, accounting for about 50% of all program breaks. Since continuous operation of broadcast stations during power failures is essential, the Board has in progress means of continuing service while public power is cut off. At present an estimated 10% of all broadcast stations are equipped with emergency gasoline or steam-driven power generators which will enable them to continue operations under any conditions except actual demolition of the transmitters. A few other stations are served by two or more independent sources of public power. Studies are now under way to decrease the likelihood of broadcast failures from power shut-offs.

Other protective measures fostered by the DCB include procurement of replacement parts, especially tubes, duplicate pumping and tube-cooling facilities, reduction in the vulnerability of antenna installations, standby transmitters, and alternative links between studios and transmitters if the two are geographically separated.

Supernetwork Protection

In addition to steps designed to protect particular stations which may be designated for special defense functions, the DCB has instituted reliability studies of the potential supernetwork which wields the stations into a nation-wide unit. Reports to the Board indicate that the 45,000 miles of program transmission circuits now in existence provide alternate routes to all but two of the 310 cities now served. Thus in the event that all network stations were mobilized for a nation-wide defense broadcast, any particular circuit interruption could be compensated by rerouting over alternative transmission lines. Alternative power supplies for these program transmissions are provided by adequate storage battery reserves in 4,000 relay centers, by two or more independent public power supplies in 800 centers, and by stationary engine-driven generators at 50 centers now, with 350 more on order. To provide for emergencies, 200 small and 25 large portable engine-driven generators are available at key points throughout the country.

The Board states that while certain problems remain, the broadcasting system of the country is cooperating fully, and is in most substantial respects ready for public service in connection with air raid warnings, civilian defense announcements, and other emergency communications, under private ownership and operation.

**DEFENSE PROMPTS AIRCRAFT FREQUENCY CHANGES**

On recommendation of the Defense Communications Board, through its Aviation Communications Committee, the FCC has withdrawn the frequency 3105 kilocycles from use by scheduled aircraft and substituted the frequency 3117.5 for such use. This action, prompted by congestion on 3105 kilocycles and communications needs for off route flights of aircraft in connection with defense, necessitates the withdrawal of the frequency 3120 kilocycles from availability for assignment to aircraft. However, the latter is little used at the present time and the private flyer will benefit materially by now having exclusive use of 3105 kilocycles.

Section 9.72 of the Commission’s Aviation Rules and Appendix B of Part 2 of the General Rules are amended accordingly. The change does not involve modification of existing aircraft licenses.

**903 STATIONS**

During the month of July, 1941, the Federal Communications Commission issued operating licenses to five stations and granted six permits for the construction of new stations. A comparative table by months follows:

**FCC SUBPOENA TESTED**

There was an argument early this week before Justice James W. Morris of the U. S. District Court for the District of Columbia as to how far the FCC can go in requiring witnesses to appear at its hearings.

Although the case argued before the justice involved only one subpoena, directed to James G. Stahlman, Nashville publisher, counsel for both Stahlman and the FCC drew the basic issue of powers of the commission.

Accordingly the decision will have broad effects on the FCC’s future policy. The case is the first in which the FCC power to require testimony has been questioned in the courts.

FCC Commissioner Ray C. Wakefield subpoenaed Stahlman on July 29 to appear August 1 at a hearing on the FCC’s future policy toward applications of newspaper owners for licenses for frequency modulations (FM) or standard broadcasting stations. Thomas E. Harris, FCC assistant general counsel, told Justice Morris that the contempt rules were drafted for a nation-wide defense broadcast, any particular circuit interruption would be invalid because of the discrimination, and if the policy being considered was invalid, he continued, hearings on the subject would be without authority and witnesses could not be compelled to appear at them.

**FCC AND NETS STILL DISCUSSING RULES**

At a press conference early this week speaking of network conferences which have been going on here for weeks, FCC Chairman James Lawrence Fly said that points have been drafted but not written into the rules.

He told the newspapermen that things have been on paper for some time and he expressed the opinion that the conferences...
are about over. Right now, he stated, there are some major questions outstanding in wording of the points, particularly on option time. There is not a lot of discussion on other points.

Right now, the Chairman said, the broadcasters are busy getting up a list of the number of cities served by a given number of stations. The subject, he said, is the grounds for some differences of opinion among the broadcasters. He expressed the hope that the results of the network conferences may be clarified before the next press conference (on next Monday).

TELEVISION GRANTS TO CHICAGO AND HOLLYWOOD

FCC has granted construction permits for two new commercial television broadcast stations, one for Chicago and the other for Hollywood, Calif.

The Zenith Radio Corporation, in the first named city, is authorized to operate unlimited time on Channel No. 1 (50,000-56,000 kilocycles), using special emission for FM (frequency modulation). The applicant proposes to use the facilities of its present experimental station W9XZV for the purpose.

Don Lee Broadcasting System, Hollywood, will use the same channel. It, too, contemplates utilizing the equipment of its experimental television station, W6XAO.

TELEVISION STATIONS

FCC has announced the following commercial television broadcast stations as of July 25.

FEDERAL COMMUNICATIONS COMMISSION ACTION

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, August 17. They are subject to change.

Monday, August 18
Broadcast
Consolidated Hearing
Further Hearing
WPAY—Chester A. Thompson (Transferor) and The Brush-Moore Newspapers, Inc. (Transferee), Portsmouth, Ohio.—Transfer of control, 1100 kc., 100 watts, unlimited time.

WPAY—Vee Bee Corporation, Portsmouth, Ohio.—Renewal of license, 1100 kc., 100 watts, unlimited time.

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

September 16
KGLU—Gila Broadcasting Company, Safford, Arizona.—Renewal of license, 1150 kc., 250 watts, unlimited time.

Consolidated Hearing
WARM—Union Broadcasting Company, Scranton, Pa.—License to cover C. P., has C. P. for 1400 kc., 250 watts, unlimited time.

NEW—George Grant Brooks, Jr., Scranton, Pa.—C. P., 1400 kc., 250 watts, unlimited time.

September 29

Consolidated Hearing

NEW—Texas Star Broadcasting Company, Houston, Texas.—C. P., 1230 kc., 250 watts, unlimited time.

NEW—Greater Houston Broadcasting Co., Inc., Houston, Texas.—C. P., 1230 kc., 250 watts, unlimited time.

October 10
WSAM—Saginaw Broadcasting Company, Saginaw, Mich.—Modification of license, 1100 kc., 250 watts, unlimited time.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

Western Radio Corporation, Pendleton, Oregon.—Granted construction permit for a new station to operate on 1240 kc., 250 watts, unlimited time (B5-P-3183).

Don Lee Broadcasting System, Hollywood, Calif.—Granted construction permit for a commercial television broadcast station to operate on frequencies 50,000-56,000 kc.; Emission A5 and Special for frequency modulation. Unlimited time (B5-PCT-7).

Zenith Radio Corporation, Chicago, Ill.—Granted construction permit for a new commercial television station to operate on frequencies Channel No. 1, 50,000-56,000 kc.; Emission A5 and Special for frequency modulation (B4-PCT-9).

W3XE, W3XP—Philo Radio & Television Corp. (Transferor), Philco Corporation (Transferee), Philadelphia, Pa.—Present assignment: (W3XE) 60,000-74,000 kc.; A5, A5 emission; 10000 watts night and day, visual and aural. (W3XP) 220,000-212,000 kc.; emission: A5; 15 watts night and day. Granted consent to transfer control of experimental television stations W3XE and W3XP, Philadelphia, from stockholders of Philco Radio and Television Corp. to Philco Corporation. The transferees agree to exchange all the issued and outstanding capital stock of the licensee (13,826 shares, common, par value $100 per share) for an equal number of shares of
the common voting stock of the transferee (par value $100 per share) (B2-TCVB-1).

WKNE—Twin State Broadcasting Corp. (Assignor), WKNK Corp. (Assignee), Keene, N. H.—Present assignment: 1250 kc.; 5 KW unlimited time; DA night and day. Granted consent to the assignment of license of station WKNE, from Twin State Broadcasting Corp. to WKNE Corp. (B1-AL-309).

W9XBT—Balaban & Katz Corp., Portable-Mobile Area of Chicago, Ill.—Present assignment: (Under construction permit which expired 5-17-41), Channel No. 11, 291000-210000, Channel No. 12, 210000-216000 kc. Emission A5, 250 watts. Granted reinstatement of construction permit (B4-PVB-72) for a new relay television station to operate on frequencies: Channel No. 11, 291000-210000 and Channel No. 12, 210000-216000 kc. Emission A5, 40 watts night and day and for construction in equipment (B4-PVB-74).

Mutual Broadcasting System, Inc., Chicago, Ill.—Granted extension of authority to transmit programs to Station CKLW, Windsor, Ontario, Canada. To stations owned and operated by the Canadian Broadcasting Corp. and to stations licensed by the Canadian Minister of Transport, through the facilities of the American Telephone and Telegraph Co. (B4-FP-89).

WMBG—Havens & Martin, Inc., Richmond, Va.—Present assignment: 1380 kc.; 1 KW night, 5 KW, unlimited time, DA night and day (Under ML granted subject to installation of DA for night use only, 100 watts night and day). Granted construction permit to make changes in directional antenna system for night use only (B2-P-3197).

**DESIGNED FOR HEARING**

KRBC—Reporter Broadcasting Co., Abilene, Texas.—Present assignment: 1450 kc, 250 watts, unlimited time. Application for construction permit to change frequency to 1170 kc.; increase power to 1 KW night and day, nondirectional antenna night and day; install new transmitter, make changes in antenna and move transmitter to North 12th, 1.4 miles West of Abilene (B3-P-2553).

WQB—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Present assignment: 1390 kc., 1 KW, daytime only. Modification of license to change frequency to 1170 kc., change hours to unlimited time using 500 watts night and 1 KW day (B3-ML-706).

H. C. Cockburn, tr/as San Jacinto Broadcasting Co., Houston, Texas.—Construction permit for a new station to operate on 1170 kc., 1 KW, unlimited time, contingent on channel being vacated by KXYZ. This application will be heard jointly with that of KRBC and WQBC listed above (B3-P-3214).

**MISCELLANEOUS**

KFJZ—Tarrant Broadcasting Co., Ft. Worth, Tex.— Granted modification of construction permit for new transmitter, increase in power from 1 to 5 KW, install directional antenna and move transmitter, for change in frequency from 1210 kc. to 1270 kc. and make changes in directional antenna system. Accordingly, and extend commencement date to one day after grant and completion date 180 days thereafter (B3-MF-1349).

KJG—Eagle Broadcasting Co., Inc., area of Brownsville, Texas.—Granted renewal of relay broadcast station license for the period ending October 1, 1941 (B3-RRY-10).

WNYC—City of New York, Municipal Broadcasting Co.—Granted special temporary authority to operate additional time from sign-off time (August, 8:15 p. m., EST) to 9 p. m., EST, on the following dates: August 2, 4, 5, 6, 17, 18, 19, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31; September 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31; October 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31; in order to broadcast musical programs only.

WKRC—the Cincinnati Times-Star Co., Cincinnati, Ohio.—Granted special temporary authority to operate with power of 5 KW from 2 p. m. to 3 p. m., EST, August 9, 1941, in order to carry a special DX broadcast.

Nashville Radio Corp., Nashville, Tenn.—Denied motion for continuance until Commission has reached decision on Order No. 79, consolidated hearing scheduled for August 11, 1941, on petitioner’s application for construction permit for new station to operate on 1110 kc., 1 KW, unlimited time directional antenna day and night and the application of A. M. Burton for the same facilities. Exception to ruling noted by counsel for Nashville Radio Corp.

WBU—Wm. C. Forrest, Foysnet, Wisc.—Granted authority to make changes in automatic frequency control equipment (B4-F-233).

KSKY—Chilton Radio Corp., Dallas, Tex.—Granted modification of construction permit for new station, for approval of antenna system, approval of studio and transmitter site (B3-MP-1349).

WFD—Flint Broadcasting Co., Flint, Mich.—Granted license to cover construction permit for new transmitter, directional antenna for day and night use, increase in power, change in frequency and move of transmitter to new site (B2-L-186).

WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C.—Granted license to cover construction permit for increase in power and installation of directional antenna for night use (B3-L-1456).

Scraps—Howard Radio, Inc.—Denied motion for postponement of hearing indefinitely, now scheduled for September 15, 1941, in re applications of Scraps—Howard Radio, Inc., Texas Star Broadcasting Co., and Greater Houston Broadcasting Co., Inc., for new stations at Houston, Tex., with leave to present to the Commission within 5 days a petition to delete issue No. 6 in the notice of hearing. On Commissioner’s own motion, continued hearing to September 29, 1941.

KONB—MBSE Broadcasting Company, Omaha, Nebr.—Denied motion for conditional continuance of hearing in re applications for construction permit for new station to operate on 1190 kc., 2500 watts, unlimited time, and application for modification of construction permit.

KORN—Nebraska Broadcasting Corp., Fremont, Nebr.—Denied motion for conditional continuance of hearing in re applications for renewal of license of KORN and application for transfer of control.

WLAW—Hildreth and Rogers Co., Lawrence, Mass.—Withdraw petition to intervene in re hearing on application of Thomas Patrick, Inc. (KWK). St. Louis, Mo., for construction permit to operate on 680 kc., 50 KW, unlimited time, directional antenna day and night.

George Grant Brooks, Jr., Scranton, Pa.—Granted in part motion for continuance of hearing now set for August 20 in re applications of George Grant Brooks, Jr., and Anthracite Broadcasting Co., Inc., for new stations at Scranton, Pa., and application of Union Broadcasting Co. (WARM). Scranton, Pa., for license to cover construction permit; said hearing continued to September 16, 1941, only.

WBMY—Roy L. Albertson, Buffalo, N. Y.—Granted extension of special temporary authority to broadcast sustaining musical programs from 8:30 to 10 a. m., EST, Monday, through Friday, from August 16 to September 8, 1941, provided WSVS remains silent.

WEAU—Central Broadcasting Co., Eau Claire, Wis.—Granted special temporary authority to operate on frequency 790 kc., with power 5 KW, daytime, using the transmitter and one of the antenna towers at the transmitter site authorized in construction permit for a period not to exceed 30 days, pending completion of the second antenna tower and proof of performance measurements.

Evansville on the Air, Inc., Portable-Mobile, area of Evansville, Ind.—Granted construction permit for new relay broadcast station; 156750, 158100, 159300, 161100 kc., 30 watts, special emission for frequency modulation (B4-PRE-402).

Pinellas Broadcasting Co., Portable-Mobile, area of St. Petersburg, Fla.—Granted construction permit for new relay broadcast station; 30820, 33710, 35820, 37980 kc., 2 watts (B5-PRE-400).

Redwood Broadcasting Co., Inc., Portable-Mobile, area of Eureka, Calif.—Granted construction permit for new relay broadcast station; 30820, 33710, 35820, 37980 kc., 2 watts (B5-PRE-400).

Frontier Broadcasting Co., Portable-Mobile, area of Cheyenne, Wyo.—Granted license to cover construction permit for new relay broadcast station; 30820, 33710, 35820, 37980 kc., 2 watts (B5-LRE-353). Same (B5-LRE-354).

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Bentley Company—Melvin V. Eisenberg, Irvin Goldberg, Harry Krohner and Seymour Eisenberg, individuals trading as Bentley Company, Mail Order Division, located at 900 North Francisco Ave., Chicago, engaged in the sale and distribution of a medicinal preparation designated as “Fat-O-No.,” are charged in a complaint with misrepresentation and false advertising. (4552)

Curtiss Candy Company—A complaint has been issued charging The Curtiss Candy Co., Chicago, large candy manufacturer, with knowingly inducing some manufacturers of corn syrup to discriminate in price in favor of itself and with knowingly receiving the benefits of price discrimination from some of such manufacturers contrary to the Robinson-Patman Act. (4556)

Electrical Alloy Section of the National Electrical Manufacturers’ Association, 155 East 44th St., New York City; George B. Cumming and William J. Donald, its executive secretary and managing director, respectively; Alloy Metal Wire Co., Inc., Prospect Park, Pa.; Hoskins Manufacturing Co., Detroit; Wilbur B. Driver Co., Newark, N. J.; C. O. Jelliff Manufacturing Corp., Southport, Conn.; and Driver-Harris Co., Harrison, N. J., are charged in a complaint with entering into and carrying out an agreement having the effect of restricting and hindering price competition. (4558)

Felder Brothers, Inc., 583-587 Broadway, New York City, and Abraham Felder, David Felder and Louis Felder, individually and as officers of the corporation, are charged in a complaint with misrepresentation. (4555)

General Surveys, Inc., and John H. Thies as president and G. J. Doucette as a director, respectively, of the corporation, are charged in a complaint, with misrepresentation.

The complaint alleges that the respondents, whose place of business is at 203 North Wabash Ave., Chicago, are engaged in the sale and distribution of sets of reference books known as “The American Educator Encyclopedia” and other books and encyclopedias, and certain so-called research services. The encyclopedia is guaranteed, the terms and conditions of the guarantee will be agreed to by the respondent, and it will be returned to the corporation, at the expense of the corporation, at any time within the guarantee period. (4554)

Grant Company—Grant T. Whiteside, trading as Grant Company, Sabina, Ohio, engaged in the preparation and sale of medicinal preparations designated as “Ton Jon No. 1,” “Ton Jon No. 2” and “Ton Jon No. 3,” is charged in a complaint, with misrepresentation and false advertising. (4553)

Milk & Ice Cream Can Institute—Alleging unfair practices in restraint of trade in the sale and distribution of milk and ice cream cans, a complaint has been issued against The Milk and Ice Cream Can Institute, the industry’s trade association, and against a promoting and organizing group, and nine manufacturing corporations which sell approximately 1,000,000 milk and ice cream cans a year. (4551)

Stay Die Cutters Assn., Inc.—A complaint has been issued charging a manufacturer and three distributors of “bogus” paper; seven operators of stay die cutting businesses; the Stay Die Cutters Association, Inc., a trade association, and Sidney Haberman, its executive secretary, all of New York, with a combination and conspiracy to restrain competition and trade in the sale of “bogus” paper. (4559)

J. E. Todd, Inc., Kenmore, N. Y., engaged in the sale and distribution of a medicinal preparation designated “Todd’s Capsules,” is charged in a complaint, with misrepresentation. (4549)

STIPULATIONS

During the past week the Commission has made public the following stipulations:

Plough, Inc., Memphis, Tenn., engaged in selling “Mufti Shoe White,” has stipulated that it will discontinue representing that Mufti Shoe White will not rub off; that it provides twice the ordinary coverage or is more economical than other shoe whites, and that it does not build up on leather. The respondent further agrees, in connection with the offering for sale and distribution of Mufti Shoe White, that whenever it represents that its product is guaranteed, the terms and conditions of the guarantee will be clearly set forth within the representation making such guarantee. (02851)

Frederic W. Ziv, Incorporated, 2436 Reading Road, Cincinnati, an advertising agency, has stipulated to cease disseminating advertisements on behalf of Rubel Baking Co., Cincinnati, which contain certain representations concerning “Rubel’s High Vitamin B, Wheat Bread,” also designated as “Rubel’s High Vitamin Wheat Bread.” (02850)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders during the past week:

Atlas Wall Paper Mills, Inc., Coal City, Ill., engaged in the manufacture and sale of wall paper, has been ordered to cease and desist from misrepresentation in connection with the sale of its products. (4288)

Bengor Products Company—Benjamin Gordon and Louis Gordon, trading as Bengor Products Co. and Magnet Merchandise Co., 575 Broadway, New York City, engaged in the sale and distribution of drug sundries, notions, and other novelty merchandise, have been ordered to cease and desist from the use of lottery methods in the sale and distribution of their merchandise. (4474)

Lee Boyer’s Candy, 103 Southwest Front Ave., Portland, Ore., and George G. Blaisdell, Walter G. Blaisdell and Homer G. Barcroft, trading as Zippo Manufacturing Co., Bradford, Pa., have been ordered to cease and desist from lottery methods in the distribution of their products. (4265-4497)
**Giant Tiger Corporation**—An order has been issued directing Giant Tiger Corporation, 41st and Chestnut Sts., Philadelphia, to cease and desist from violation of the brokerage section of the Robinson-Patman Act. (4276)

**Thermalaid Method, Inc.** and Charles H. McFarland, its president, Steubenville, Ohio, have been ordered to cease and desist from certain misrepresentations in the sale of “Thermalaid,” an electrical device for the treatment of prostate gland and associated ailments by application of heat. (4078)

**F. Saner Co.**, with headquarters in Richmond, Va., and operating plants in Richmond and in Greenville, S. C., has been ordered to discontinue price discriminations and discriminatory advertising allowances in the sale of food products and insecticides in violation of the Robinson-Patman Act. (3646)

**FTC CLOSES CASE**

The Federal Trade Commission closed without prejudice a case growing out of a complaint which had charged six individuals trading as National Optical Stores Company and Dr. Ritholz Optical Company, 1148-1160 West Chicago Ave., Chicago, with violation of Section 5 of the Federal Trade Commission Act in the sale of eye glasses. The individual respondents are Benjamin D., Morris T., Samuel J., Sylvia, Fannie and Sophie Ritholz.

The case was closed without prejudice to the Commission's right to resume proceedings, should future facts so warrant. (3143)
TIME SALES TAX FIGHT PUSHED

Necessity for redoubled efforts to lick the radio time sales tax developed Thursday when the International Allied Printing Trades Council asked the Senate Finance Committee to double the graduated tax approved by the House.

The committee appeared to be favorably impressed by arguments against the tax presented Monday by the NAB and others.

But the battle is far from won. The bill has a long way to go. Until Congress sends it to the President without the time sales tax included, no one can be sure it’s beaten.

Help from back home is essential. Let your Senators and your Representative in Congress know how you feel about this unfair, discriminatory, super-tax on radio.

James Lawrence Fly, FCC chairman, was the first to go to bat for the industry at Monday’s hearing before the Senate Finance Committee. He told the Senators “now much time, effort and money the industry was devoting to public service, especially that public service devoted to national defense. In the event of war, he indicated, the demands upon radio for service producing no revenue would be even greater, while income might drop. He also pointed out that competing advertising media were not taxed by the new revenue bill.

When asked by Senator Davis (R-Pa.), “If you put a tax on advertising in radio, will that not set a precedent for taxing advertising in newspapers?” Mr. Fly replied that he thought “it might very well do so.” Mr. Fly said the Commission had been considering for some time the possibility of a bill “which would access broadly upon the communications industry, roughly the cost of regulation.” He indicated, however, that a great deal of study should be made of a proper base for such a tax before it was originated.

Maurice Lynch, financial secretary of the Chicago Federation of Labor, operator of station WCFL, was the second witness, and said their objections were, first, that the tax placed an unequal and discriminatory burden on broadcasting and second, that it departed from the well-established precedent of not taxing income of non-profit organizations and labor unions. He pointed out that station WCFL donated much valuable time to the Government and that “it would not be just that radio stations which donate so much time to Government agencies be discriminated against.”

Harold A. Lafount, president of the National Independent Broadcasters, said that the stations he spoke for did not object to increased taxes but wanted the burden of financing national defense to be distributed equally. As the bill stood, he said, it discriminated against the broadcasting industry. Although the lower income stations were exempt, he

(Continued on page 696)
said, many independent stations whose incomes were in excess of $100,000 had little or no profit. These, he pointed out, certainly were in no position to pay the tax.

Ellsworth C. Alvord, nationally known tax expert, appeared for the NAB. He opposed the tax on four grounds:

(1) It was the first tax, with one minor exception, ever imposed upon gross receipts. "It has nothing to do at all with ability to pay, or any principle that I know of, or which I have read, or have heard of, which could underlie the taxing policy of this Government."

(2) The tax was discriminatory, but even if it were not, it would be unjust. A tax on advertising "is nothing more than a tax upon the dissemination of information, upon the dissemination of news."

(3) Radio is rendering an important public service. "I cannot believe that the Congress would so desire to hamper, even jeopardize, the service which the radio industry is now performing in the interest of the public."

(4) The tax would hit "the winners and losers" in the radio business and might throw those now making a slight profit into the red. This was against any just tax principle.

Mr. Alvord said that the industry could not object to a non-discriminatory general franchise tax but that the radio industry should not be the first industry for that experiment. Other industries were Government regulated without having to pay for the regulation, he said.

Mr. Alvord submitted a lengthy memorandum, giving detailed arguments against the tax.

Mrs. Emily Holt, executive secretary of the American Federation of Radio Artists, and Lawson Wimberly, international representative of the International Brotherhood of Electrical Workers, both appeared in opposition to the tax. Mrs. Holt pointed out that the AFRA convention in Detroit last week adopted a resolution against the tax because the union felt it would restrict the opportunities of actors, singers and announcers. Mr. Wimberly pointed out that the tax originally was the idea of a group of printing trades workmen who thought it would shift advertising from radio to the printing media. He said he thought they were mistaken, and pointed out that the American Federation of Labor was on record in opposition to the tax.

James C. Petrillo, president of the American Federation of Musicians, addressed the following telegram to the Committee:

"The American Federation of Musicians has gone on record by a unanimous vote of its international executive board protesting a 15% tax on the gross radio receipts on the grounds that the more tax paid by radio stations the more unemployment of all crafts will be the ultimate outcome of the entire matter."

The following analysis of the NBC-ASCAP deal, prepared by the chairman and vice-chairman of IRNA, will be of interest not only to NBC affiliates but also to all broadcasters. It should be studied carefully:

INDEPENDENT RADIO NETWORK
AFFILIATES, INC.
Chairman's Office
August 19, 1941.

The NBC-ASCAP Formula

To All N. B. C. Affiliates:

On many occasions in the past few years we have all complained about the short-sightedness, the bull-headedness and the narrow-mindedness of network executives from our point of view, in failing to comply with requests from IRNA which we believed to be for the good of the industry. We believe much of the present mess the networks are in could have been averted.

This makes it all the more imperative that we should speak up when we have obtained from a network a deal for Affiliates which we regard as a major accomplishment. The advantages obtained for Affiliates in the copyright deal tentatively arrived at between N. B. C. and ASCAP are a victory for Affiliates. They are the direct result of demands made by IRNA. They also reflect the better understanding of Affiliates which Trammell, as president, has brought into the direction of NBC.

In recent months the broadcasting industry has had a crisis every morning before breakfast. Broadcasters have faced so many emergencies they are shell-shocked.

Many of you have not followed the details of the copyright situation. The telegram you got from Trammell was too short and needs to be amplified. We therefore believe it is in order to review and explain the proposed new formula and state our views. The decision is up to you. You are free to act. We have obtained a proposition which, when it is satisfactorily embodied in contract form, is an offer to you. We have made no commitment for you. We have made no representations that we have authority or power to bind you.

It is, of course, not possible to make final recommendations on the copyright deal tentatively set up between NBC and ASCAP until affiliates have had a chance to examine not only final NBC-ASCAP contract but also the single station blanket contract, the single station per program contract, and the contract for clearance at the source of commercial transcriptions. However, it is our considered judgment that this is a very fair deal and that now is the time to settle copyright differences between networks and affiliates so that ASCAP music can go back on the air and so that the major problems which confront the industry can have our undivided attention.

First of all, let us spot the high-lights of what we shall call the ASCAP Formula of August 1, 1941 (the year of the Big Wind). This is how we see them as Affiliates.

The Advantages

1. No affiliate is compelled to take a local ASCAP license. Even if you don't take one, you will get the benefit of ASCAP music on network service and the network will pay the cost of sustaining programs. On commercial programs you will be asked to reimburse the network for the same amount which the network pays ASCAP on the net dollars you get from the network. You used to pay ASCAP 5% on these dollars. You are now asked to pay 23 1/2%.

2. Any affiliate who wants ASCAP music locally can get it on a per program basis or a blanket basis. An affiliate must also be able to get the music on commercial transcriptions cleared at the source, and this contract must be satisfactorily negotiated. On
Any investment broadcasters may make in aiding schools to more effectively use radio is money well spent.

No better investment can be made than the distribution to every superintendent, principal, supervisor and teacher in every community of a copy of the revised and improved

How to Use Radio in the Classroom

Your copy is being sent you next week.

How about ordering a quantity of these or joining with other broadcasters in your community to see that one is placed in the hands of all of the school people?

With your copy is a blank for your convenience in placing your order.
IRNA ANALYZES DEAL
(Continued from page 696)

either the per program or blanket license basis, you are allowed to
deduct, as before, advertising agency commissions, quantity
discounts, and income from political broadcasts. In addition, IRNA has obtained for you a flat discount of 15% on top of all
that, representing cost of sales to the station itself and not
contingent upon anything.

On the final balance you pay ASCAP 2½% if you take a blanket
license on your stations, such as the newspaper contract, is obtained
comparable with 1 9/10 on the previous basis by reason of this new 15% deduction we have obtained for
you.

Add to that your local sustaining fee. Instead of an arbitrary
figure as before, this will be, for a blanket sustaining license, 12
times $1,000, at your highest 1½ hour rate if you gross $50,000 to $150,000; and 12 times your highest ½ hour rate if you gross over $150,000.

On blanket licenses, adding your commercial and sustaining fees,
your total cost of ASCAP will average well under 5%, as compared
with total of between 6% and 7% for both commercial and sustaining licenses before 1941.

This basic differential in favor of Affiliates, that is, 2½% as against the network 2½%, is also an IRNA contribution
to the terms of the deal.

If you want to try a per-program commercial plan you still get
the benefit of the extra 15% deduction we have obtained for you,
so that the 8% on full programs of ASCAP music and 2½% on inci-
dental use of ASCAP music such as bridge, background, theme
signature, are really 6½% and 1 7/10 respectively for comparison
with previous experience.

You can even take a per-program sustaining license if you wish
and pay 1% of the card value of local sustainers using ASCAP
music.

If you wish, you can start with a program license and switch
from program to blanket if you think it will be cheaper, or vice
ger-
er. Or you can combine a per-program commercial license with
a blanket sustaining, or vice versa.

There is no minimum guarantee if you take a per program license
so as to make yourself eligible to play ASCAP numbers for
any local advertisers who wish it. There is a fixed obligation,
however, to log all of your numbers for ASCAP, and this will be
erooner.

You can refrain at present from taking any kind of ASCAP
license and change your mind any time you like and take one, and
you will get the benefit of this deal for the full length of the
term without being penalized because you want to wait and see.
This deal is for a full nine (9) years with provision for re-
newal for nine (9) more years if ASCAP gets rights from its
members. The terms for the second nine (9) years will be un-
changed unless ASCAP demands an increase which we refuse, in
which event the question of an increase would be determined by
arbitration.

The terms for every affiliate are identical with the terms for
every other one, including network M & O stations. The stations
previously signed up, including the Mutual affiliates, share in these
improved terms. The previous discriminations in favor of certain
stations, such as the newspaper contract, are abolished.

The deal, when made, will provide for releases up to the date
of signing for the network, the stations that signed, BMI and NAB,
from the various threats for anti-trust and infringement violations
that have been in the air. The local station deal should include
a complete release for the threat of infringement violation at least
up to the date that NBC signs the network deal, including
not only infringement violations and anti-trust claims, but also
claims for past years.

Although it is not, of course, part of the deal with ASCAP, NBC
has given assurance that it intends to do its part to maintain
BMI and continue to support BMI and encourage it to grow,
and we feel that BMI will be maintained by the broadcasters.

The aggregate cost of both BMI and ASCAP music on
blanket licenses will be less than 4% for most Affiliates as compared
with between 6% and 7% on the old basic before 1941 (when you
add your sustaining fees).

In the event of a reduction in the ASCAP catalogue so
material as to justify a remedy, we will have a right to cancel.
If it is impractical to take ASCAP music off the air after having
restored it, we always have the remedy of switching to the per
program method of payment.

The deal imposes a considerable added financial cost on
NBC which pays ASCAP on its network revenue which, as you
know, was previously exempt. If the new formula were applied
to 1940 business the annual sum payable by NBC to ASCAP on
network programs, commercial and sustaining, would be in round
figures, $680,000. Against this, the network asks the Affiliates to
reimburse, in round figures, $250,000. This leaves a network net
cost of $430,000. In addition, NBC would have paid for its
M & O stations, commercial and sustaining fees on blanket licenses,
in round figures, $100,000. This makes a total cost for ASCAP
music to NBC $850,000 if the new formula were applied to 1940
business. In addition, NBC payments to BMI for the same period,
on the reduced rate plan, are $160,000.

In other words, NBC is taking on an additional cost, in round
figures, of $250,000 per annum based on 1940 business (and this
will increase with growing volume and with changes in the
score on BMI music when it begins in order to make this deal possible).

Most Affiliates, on the other hand, will find, as above explained,
that combined cost of ASCAP and BMI will run under 4½% as compared with between 6% and 7% before 1941. This should
effectively dispose of any hangover of resentment against the net-
work from past dealings where people felt the network had made a better deal for itself at the expense of Affiliates.

12. Proof that ASCAP is taking with good grace the licking it
has received is self-evident when you figure that if all networks
and stations take the blanket license basis, ASCAP stands to receive approximately $3,200,000 per annum based on
1940 business, as compared with over $5,000,000 it actually received on 1940 business under the old formula. As further evidence of ASCAP's willingness to bury the past and live in friend-
ship with the network, ASCAP has further agreed that if any special Fed-
cial broadcast tax is imposed, it will be deductible before applying the percentages.

13. At the present time all we are asked to do is to inform NBC
of our agreement to reimburse the network to the extent of 2½% of our compensation from it, subject to approval by us of
the final detailed form of all the contracts which are to be sub-
mitted as soon as the ASCAP and NBC regiment of lawyers have
agreed upon them, namely, the network contract, and the single
station contracts, both blanket and per program. In addition the
deal for clearance at the source of commercial transcription pro-
grams must be completed.

The Objections

Now we intend to review the objections which have been ex-
pressed by some affiliates and our comments on them. The time
has come for bringing this matter to a conclusion. Full and free
debate is healthy and democratic, but let's not be just a debating
society that paralyses action.

Undoubled are all criticism of the deal and the formula are these
fundamental and basic questions in the minds of many affiliates:

Why should we make any deal with ASCAP at all? Who
says we need any ASCAP music whatever? We have made
out satisfactorily for eight months without ASCAP music,
so why bring it back? Admitting the deal is good enough in
itself, don't we need it? Is this money not just another luxury for something the network may need but we don't? If the network wants ASCAP music, why
doesn't the network pay for it and leave it alone?

Let us first dispose of this subject: We all know what a
voracious appetite for music radio has and it is up to us, as a
matter of public service, to supply our program builders with
every bit of material available, providing only that we can obtain
that material at a reasonable cost. We have the right, but the
duty to refuse to pay ASCAP the exorbitant demands made on the industry last year. But no matter how unreasonable
ASCAP was with us we must not overlook our public obligation
and be unreasonable with them. We must continuously improve
our programs and the ASCAP repertoire will be a help in doing
that.

Some of the large national advertisers who have cooperated
with us for the past eight months because they knew that any
great increase in copyright fees would result in increased rates,
are now becoming restless. They are saying to the network
executives: "We have cooperated with you when the demands
upon you were unreasonable but now that you can make a fair
deal we expect you to make it and not hold out simply because you
seem to be getting along fairly well with the music now

698 — August 22, 1941

...
available. We want to use everything that has ever been written and expect you to obtain the right for us to do so.

This is no reflection on BMI. BMI, in the few months of its existence, has done a wonderful job. The fact that it has enabled us to keep music on the air at all is in itself a miracle of accomplishment. It is not reasonable to expect that in one year of experience, half of which was taken up with preparation, BMI could accumulate for us a catalogue sufficient to supplant entirely the ASCAP library of copyrighted material. The ASCAP library is made up of not only all the songs written by the composers, but also those written by many other composers.

It may be that many stations are not fully aware of the difficulties that have faced program builders. Many stations depend mostly on phonograph records or transcriptions foremost of their musical output, and BMI has done a wonderful job in making available lists of numbers free of ASCAP obligations.

The networks have developed whatever position they have, because in the last analysis they have furnished the public with programs of such high quality that audiences have been educated to expect nothing but the best. They cannot afford to lose this hallmark. We cannot afford to let them lose it.

However, stations which take the view that it is up to the networks and not a matter of interest to the stations, are only trying to hitch-hike a free ride without realizing the facts. With ASCAP music on the networks, many stations will eventually find that listener interest will require them to add ASCAP music to their local program service. Furthermore, the problem of avoiding ASCAP-controlled phonograph records will increase because there will be an increase in ASCAP tunes recorded.

Another consideration that should be present in the minds of all broadcasters is the possibility that ASCAP music may be curtailed at any time to avoid the damage that would be caused by any other course to our public and governmental relations at a time when we are being attacked from several quarters.

Any broadcaster who thinks that the object we had in view was to destroy and disintegrate ASCAP is equally mistaken. We all recognize the established fact that composers and publishers of individual songs or numbers own the copyrights and have a right to be paid for their use. If we use the music someone has a right to be paid. If we don't pay through ASCAP as a central collecting agency, if ASCAP is completely disintegrated, the probable result might be that there will be publishers and producers who will deal with us for themselves or would form smaller groups in larger numbers and we would then be faced with the problem of dealing not with one single collecting agency but with many.

The confusion, correspondence, bookkeeping and detail involved in dealing with all these people separately, and the flood of infringement charges and suits that might descend upon us would far counter-balance any sentimental satisfaction that last-ditch fighters would enjoy in the dissolution of ASCAP. As far as emotions is concerned, such broadcasters should derive all the comfort from the fact that ASCAP is not, and may not be, the only position IRNA can take on this is that if any individual

Admitting that the network pays ASCAP much more than it ever did before, nevertheless the network is getting the benefit of two deductions which it does not pass along to the stations: These are the deductions of 15% for general sales cost and approximately 23% for wire line disbursement. On a Program basis these two items will exempt approximately $8,000,000 of network revenue from the ASCAP tax, or at 23 1/2 % approximately $220,000. These stations argue that part of this saving ought to be credited to the stations against the amounts of station compensation on which they are asked to reimburse to the network 23 1/2 %.

This argument is based on the view that part of the network sales cost and cost of wire lines is already borne by the stations in the formula for station compensation set forth in the affiliation contracts, so that these costs, to a large extent, already come out of the pockets of the stations. However, there is a certain inconsistency in this particular complaint. Suppose it will be agreed, for instance, that the money paid by the network for wire lines is really the money of the stations, and suppose the plan of payment is amended so that the network distributes more money to the stations, and the stations then contribute directly to the telephone company and pay the cost of the wire lines. In such event the stations would merely demand from ASCAP an exemption of the wire line cost from ASCAP tax and cheerfully pay to ASCAP the same 23 1/2 % on the remaining dollars which would be the same as the net compensation now received from this network. For this reason we cannot urge that Affiliates should band together to enforce this particular demand against the network. Is there any flaw in this reasoning? So much for the deduction for wire lines. As for the deduction allowed the network of 15% for sales and promotion, it seems to us that this deduction as a general network and affiliation network should get a credit for the sales and promotion work done by it at its expense, which contributes to the sale of the affiliate's time. The network says its actual sales and promotion expense exceeds 15%. Most of us are satisfied to pay 15% to a national representative. In principle, it seems as fair that the network should be exempt from tax on this disbursement as on the wire-line disbursement. In fact we obtained the 15% deduction for sales costs for affiliates who take a local license, on the ground that if the network is entitled to it the affiliates are. We think both are and could get tax deductions.

Fundamentally this goes to the whole basic question of the proper rate of ultimate compensation the stations should receive from the network out of the advertiser's dollar. We prefer not to express any view in this connection regarding the fairness of the present basis of station compensation. Naturally we would like to get more. It is human nature that the network would like to make more profit off the stations, and the stations would like to get more profit off the networks. IRNA has never set out to be a bargaining agency for station compensation. Therefore the only position IRNA can take on this is that if any individual station thinks it is a good enough argument with which to improve its general basis of station compensation, go ahead and get it.

The Reimbursement Feature

The next objection relates solely to the matter of the amount of the compensation or reimbursement between Affiliate and network. Several stations have argued that they are satisfied with every aspect of the deal except this one.

Transcriptions Cleared at the Source—National Spot Transcriptions

For stations signing the per program or blanket contract with ASCAP, either plan will apply to transcriptions, and for these August 22, 1941 — 699
people clearance at the source of transcriptions is unnecessary. For those desiring to have no contract with ASCAP, we are insisting that ASCAP live up to the consent decree, and provide for clearance of such transcriptions at the source, that is, by the transcription companies or advertisers. It is obvious that the deal must be made now before stations commit themselves to carrying and paying for the music on network programs. The cost of clearing transcriptions at the source would have to be related to the companies which make the payment by the stations which get the business, so that there can be no increase in the cost of transcriptions to the advertisers. This is necessary so that there will be no tendency toward the use of network as against spot transcriptions due to any increase in cost.

The Rest of the Industry

Another view expressed has been that it is a breach of faith for N.B.C. and the N.B.C. affiliates to make a deal with ASCAP before there is assurance that the rest of the industry is willing to do likewise. Under the consent decree every other network and every affiliate will be entitled to the benefit of whatever deal can be made by N.B.C. and its affiliates, and there can be no higher charge under the consent decree to non-affiliated stations than to affiliates. We have sat in as advisers with the N.B.C. executives at a number of the discussions with ASCAP. We are prepared to express the view on our own responsibility that no better deal can be made with ASCAP without a strong likelihood of breaking up ASCAP. This might result in our having to deal with scattering groups of composers and publishers.

The last question of which we have knowledge is the problem of what to do about States where local legislation forbids dealing with ASCAP. This is a local problem in those States and cannot be treated nationally.

Our Recommendation

The above observations are made by us in our capacity as members of the Negotiating Committee of N.B.C. Affiliates constituted by IRNA. Morency is in Hartford and Rosenbaum in Philadelphia. This accident of geography is solely responsible for the fact that we were frequently called in, whereas the other three members of our Committee are at some distance. Craig in Nashville, Norton in Louisville, and Campbell in Dallas. We are aware that some of them may have views which differ from ours on some of these points, but we take the responsibility for expressing our views to you because of the contact we have had with this situation as it has developed.

We have not endeavored to cover in detail all the points the contracts should include. Some of these are satisfactory provisions regarding delayed broadcasts and origination of network programs without a local license; full indemnity provisions to protect affiliates, their artists and clients and their agents; satisfactory definition of time sales; and there are others of equal importance. Every affiliate will have to study and analyze the contracts for themselves, because, as you know, IRNA has no funds with which to engage attorneys and no staff available to act in that capacity.

For the reasons given we recommend the approval of the formula in principle and the agreement to reimburse to N.B.C. subject to final examination of the detailed contracts when they come.

Very truly yours,

Paul W. Morency,
Vice-Chairman.

Samuel R. Rosenbaum,
Chairman.

EXECUTIVE COMMITTEE

The NAB Executive Committee will meet next Wednesday, August 27, at 10:30 a.m. in the Roosevelt Hotel, New York, to consider copyright and other matters.

B M I

Try Smilin'

We have just received a letter from Ray Seeley of Folsom Prison, Represa, California, to which he has been sentenced for life. Seeley entered prison with the knowledge that the court had adjudged him an habitual criminal and that he must serve twelve years before he could be considered for parole. "Some¬where," he writes, "I found the courage to look at myself as I really was, and it wasn't long before I knew there had to be some changes made. I determined to make every year of this sentence count for something worthy and to make good, not after a future release from prison when the going got easy, but behind the walls themselves."

Seeley then relates how he started writing songs and wrote fifty of them which were rejected as fast as he submitted them to publishers. Then he had one accepted and within the next year fifteen more were accepted. But little or no royalties were received. "After much discouraging correspondence with the publishers," Seeley writes, "I began to realize that I was right back where I started and I didn't have much heart to start from scratch again, but something happened which gave me another spurt of courage. I read Elsie Robinson's column in the paper about two prisoners who wrote the Stars Went to Sleep. It was the inspiration for Try Smilin'. I went to work on the story that very night and didn't stop until the song was finished.

"Two days later I mailed the song to the Bell Music Company, a BMI affiliate, and it was accepted by them. "Professional copies have already been released. Last week the song was given a plug by Stuart Hamblen over KFWB, Holly¬wood, and I wish you could see the friendly fan mail I've re¬ceived from that one local plug—they are worth every single hour I've spent writing songs."

Standard Numbers

In response to many requests the editors of Big Song Magazine have picked some BMI tunes which they believe have become standard numbers and will be heard from year to year on the air. They are: High on a Windy Hill, Practice Makes Perfect, The Wise Old Owl, I Hear a Rhapsody, So You're the One, I Can't Remember to Forget, I Give You My Word, It All Comes Back to Me Now, You Walk By, Accidentally on Purpose, May I Never Love Again.

New Song Contest

Encouraged by the spectacular success of Daddy, Sammy Kaye is announcing a contest open to all amateur song writers. The contest is for lyrics only. The winning words will be set to music by Sammy and his arrangers and published by the Republic Music Corporation, a BMI affiliate. Prize—a hundred dollars in cash as an advance against royalties of the song.

Which all goes to show that you never can tell where you'll find a good song. Ten thousand can be submitted and not worth the paper they are written on and then suddenly one will pop up like Daddy, which has what it takes to win and hold the favor of the music public.

The Friendly Tavern Polka

In connection with the observance of Friendly Tavern Week, September 15th to September 21st, we are reprinting, for the benefit of broadcasters who wish to cooperate with the National Tavern Association in observance of the week, the numbers of the transcriptions and records carrying the Friendly Tavern Polka:

—Transcriptions—

| Associated | 280 |
| Mc Gregor  | 2312 |
| Standard   | 2152 |

—Records—

| Horace Heidt ... CO | 36006 | Frankie Masters. OK | 6142 |
| Milt Herth Trio ... DE | 3757 | Teddy Powell ... BL | B-11113 |
| Sammy Kaye ... VI | 27381 | Lawrence Welk ... DE | 3725 |

Virtually all of the name bands have arrangements of Friendly Tavern in their books.
New Song Research Service

BMI has just signed a contract for one year with the Bureau of Radio Research, directed by Dr. John G. Peatman of the Department of Psychology of the College of the City of New York. This is the organization which has been issuing a daily radio log and program analysis of popular music since the middle of June.

In addition to these reports the Bureau plans to issue graphs of trends showing the proportion of popular music to other types of music played on the air on both day and night programs. Trends of the proportion of titles to total performances and trends of those songs having ten or more performances in a week. Periodic releases will survey the public taste for popular music showing who listens, what they like, and the breakdown of age, sex, educational, and purchasing power differences. There may also be a psychological analysis of the characteristic developments between the outstanding hit tunes and those that didn't quite make the grade.

Chicago Lions Adopt Hi, Neighbor

The Central Lions Club of Chicago, which meets every Thursday at 12:15 p.m. at the Hotel Sherman, has adopted Hi, Neighbor, BMI's new glee, as one of the club songs. Writes Ray S. Klein, Executive Secretary: 

"It is indeed a very effective way of starting off our meetings and 'breaking the ice.'

"When you are in Chicago drop in at our luncheons and meetings and hear us sing your song."

Melodies That Linger

We have given you many a story on the origin of BMI popular numbers. Here is one from the Progressive Farmer on how The Old Oaken Bucket came to be written:

On a hot day in 1817 Samuel Woodworth left the office in New York City where he was employed as a printer and entered a saloon nearby. While at the bar drinking brandy, he called to an acquaintance:

"There is no better drink than this in the world."

"What is it?" asked Woodworth.

"A draught from the old oaken bucket that hung in the well at home," was the answer.

Woodworth made no reply, but finishing his drink he hurried back to his office. For two hours he worked steadily and then called in the man with whom he had talked in the saloon. He read aloud the lines, later set to music by George Kailmark.

Thus a chance remark over a bumper of brandy and a strange sort of genius brought into being The Old Oaken Bucket. The song was Woodworth's only worthwhile accomplishment. Various attempts to found newspapers and magazines failed, and he remained a "tramp printer" until his death in 1842.

New Subscribers

The following stations were added to our list of subscribers during the past week, bringing the total to 683, excluding non-commercials:

- KPRO—Riverside, Calif.
- WCBD—Chicago, Ill.
- WALB—Albany, Ga.
- WCRS—Greenwood, S. C.
- KGFJ—Los Angeles, Calif.

"Sleeper" Into Natural

Written over a year ago You Mean So Much to Me has been sleeping peacefully in the music departments of the broadcasting stations for so many months. Then something happened, no one seems to know just what, and orders have been pouring into BMI for the sheet music. The record companies also began to prick up their mechanical ears and are talking about adding to the recordings which now include waxes by Freddy Martin and Una Mae Carlisle. That's why you see it as number 3 of the BMI features tunes.

National Defense

TO SPONSOR COAL CAMPAIGN

Plans for a "Buy Coal Now" Campaign to be sponsored by the coal industry were mailed to station executives by NAB on Wednesday, August 20. The mailing piece, entitled "It's a Radio Sales Job," contained on page 2 a copy of the message sent by Luther Harr, Bituminous Coal Consumers' Counsel, Washington, D. C., to wholesale and retail bituminous coal associations and dealers, to coal producers and district boards.

He suggested that as a patriotic duty the industry at its own expense should utilize every means of buying and storing (selling) coal now so as to release shipping space for increasing defense needs in the months ahead.

Page 3 explained why demand for coal is up—away up, why the coal tie-up must be prevented and why preventing this tie-up is a sales job. The back page contained a number of 50, 75 and 100 word spots.

In a covering letter Arthur Stringer suggested that it would give the campaign a great lift if it were launched with suitable local ceremonies much in the same fashion as stations launched the scrap aluminum collection in July. Under the caption "Other Ways to Help the Campaign" he suggested that local firms sponsor insulation programs and that building supply merchants sponsor storm window campaigns.

SURVEYING CP NEEDS

The NAB National Defense Committee has begun a survey to ascertain the material and equipment needs, expressed in terms of tons of metal, required to satisfy outstanding construction permits. This was done after conferences with government officials who have the responsibility for releasing metal. At the same time with information assembled in our spot, it might be possible to secure a "Civilian Allocation Program for the Broadcasting Industry." If granted this would be a directive which would speed the filling of orders for material and equipment needed to satisfy construction needs.

STATION ND SHORTS

Edith R. Garrett, traffic manager, KXXO, Aberdeen, Wash., writes of a new use for the "Keep 'em Flying" slogan. It is written into the station's local talent show, "Doodlebug Revue." The slogan is also used on the sign-off.
KMBC’s Mark N. Smith, director of merchandising and research, has drawn up special forms for the station to use in keeping track of defense broadcasts. At the end of the month data from the sheets quickly enables the preparation of the station’s monthly national defense report.

WCPO, Cincinnati, has set aside 9:15 to 10:00 p.m. week days for “Songs of America.” This includes transcription music and Army, Navy, defense, Air Corps, etc., spots. A similar Sunday evening show, “Land of Liberty,” is scheduled from 9:15 to 9:45 p.m. Personal appearances of recruiting officers in the local area are included in the Sunday show.

Daily, 2:10 to 2:30 p.m., is “Patriotic Parade,” similar in format to the other two broadcasts.

N. C. Rudder, vice president and general manager, WJMS, Ironwood, and WATW, Ashland, Wis., has evolved tri-daily broadcasts which he finds effective. The three shows are called “Defense for America” and are aired daily at 10:15 a.m., 1:45 p.m. and 9:05 p.m.

PROMOTION

Radio talent will feature the National Tobacco Festival to be held in South Boston, N. C., September 4 and 5. Major Edney Ridge’s WBIG Ensemble, Greensboro, will play at the distinguished guest banquet on September 5.

Sales

EXECUTIVE COMMITTEE MEETS

The Sales Managers Executive Committee will meet at the Roosevelt Hotel, New York City, August 25-26.

Studies Available

Two reports will be issued this week by the Department of Broadcast Advertising. One is “The Effect of Priorities on Radio Advertising”; the other is a record of department store advertising compiled from station reports to the “Broadcast Advertising Record.” Limited extra copies of each will be available free upon request.

Notice

Any one planning to do business with Ed. M. Palmer, Supplemental Time Sales Operation, 428 Grand Ave., Akron, O., is asked to communicate with Benedict Gimbel, Jr., WIP, Philadelphia, Penn.

Free Time Request

“The Cranberry Kitchen” of South Hanson, Mass., is seeking free time for the promotion of cranberries, by sending scripts to stations conducting home economics programs.

DISTRICT 15

Broadcasters of the fifteenth NAB district held a meeting August 15, in San Francisco to discuss the status of the time sales tax and ASCAP negotiations. Howard Lane, KFBK, district director, just returned from Washington, gave a full report on the situation in the Capitol. Members present included:

Philip Lasky, KROW; Riley H. Allen, KGMB; David H. Sandberg, Paul H. Raymer Co., San Francisco; Charles P. Scott, KTTC; Horace E. Thomas, KMVC; C. L. McCarthy, KOW; William B. Smullin, KIEM; Ralph Brunton, KJFS; Art Westlund, KRE; Clyde Coombs, KARM; S. H. Patterson, KSAN; Lincoln Dellar, KSF; Harold Meyer, KVA; Charles Lloyd, KLX; Wilt Gunzen-

dorfer, KSRO; S. W. Warner, KLS; Howard Walters, KDON; Howard Lane, KFBK, and Eddie Calder KHUB.

CIO UNION CERTIFIED

Upon the basis of a stipulation for certification on consent comparison of records, the National Labor Relations Board announced certification of American Communications Association, Broadcast District No. 1, Eastern Branch as the sole collective bargaining agency designated and selected by a majority of all broadcast technicians of Westinghouse Radio Stations, Inc., in the broadcast engineering department of Station KYW, Philadelphia, Pennsylvania.

FEDERAL COMMUNICATIONS COMMISSION

IMPROVE INTERNATIONAL BROADCAST

With a view to improving reception abroad of short-wave broadcasts emanating from this country, the FCC modified Section 4,44 of its rules governing international broadcast stations to permit greater flexibility in the choice of operating frequencies and thereby bring about more efficient use of the limited number of frequencies available for this purpose.

International broadcasting has passed through its experimental stage and has developed into a service of the utmost importance. Existing world conditions demonstrate the necessity of the United States being well represented in the international broadcast band, and of maintaining an adequate service to the people of foreign nations. At the present time the expansion of international broadcast facilities in other countries has resulted in considerable and increased interference to the transmissions of United States stations engaged in international broadcasting.

The changes made in rule 4,44 will make it possible to assign more than one frequency in the international broadcast band to a single domestic licensee. This will enable the licensee, should interference be experienced on one frequency, to shift operations to another frequency not subject to the same degree of interference. In addition, due to the time differential in foreign lands served by our international broadcast stations, it is possible to assign the same frequency to two or more stations broadcasting to different portions of the world without confusion.

There are now a dozen international broadcast stations in operation or under construction in the United States. The Commission’s requirement of a minimum power of 50 kilowatts insures transmissions of reasonable strength reaching the countries for which they are intended.

NEW FM STATION

The Columbia Broadcasting System, Inc., has been granted a construction permit by the FCC for a new high frequency (FM) station at St. Louis, Mo., to serve 13,000 square miles with more than 1,800,000 population. The proposed site of the transmitter is the Mart Building, 12th and Spruce Streets. The station will operate on 45,900 kilocycles.

To enable the Philadelphia area to have scheduled television program broadcasts as soon as possible, the Commission has given the Philco Radio and Television Corporation special authorization to so operate its present experimental television station W3XE for a period of 60 days on television Channel No. 3 (66,000-72,000 kilocycles) pending the furnishing of additional engineering data required by the Commission to pass on that company’s pending application for a construction permit for a full-fledged commercial television station in Philadelphia.

702 — August 22, 1941
NATHAN H. DAVID TO ASSIST INFORMATION COORDINATOR DONOVAN

Nathan H. David has resigned from the Law Department of the FCC to join the staff of Coordinator of Information William J. Donovan.

Mr. David, who is 28 years old and a native of Massachusetts, joined the Commission in 1939 as Assistant to the Chairman. Subsequently transferring to the legal staff, his most recent assignment has been as Chief of the Litigation Section.

FROM THE FCC MAIL BAG

A Boston broadcast listener has written the Commission suggesting that an arrangement be made whereby dramas be transmitted over one network, symphonic music over another, and that varied programs be carried over a third network. But the Commission has no authority to direct this or other programming.

An Asheville resident requests copies of Commission “regulations” requiring written scripts of programs to be submitted to broadcast stations 24 hours in advance of their presentation. The Commission has adopted no such regulations; it is within the discretion of the individual broadcast station whether or not to require submission of written scripts in advance so long as the licensee retains full control over programs.

A music company complains of alleged inability to obtain information from broadcast stations as to the extent to which they have broadcast its songs. This, too, is outside of Commission jurisdiction.

A Texas inquirer is informed that it is impossible for the Commission to determine in advance of the filing of an application for broadcast facilities, and in absence of such record of engineering and other facts on which to base consideration, that establishment of a new station would be practicable and in the public interest.

A list of radio stations operating in the emergency service, as requested by a Pennsylvanian, is not available for distribution, and, in view of pressure of other business, it cannot be stated at this time when a revision will be possible.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, August 25. They are subject to change.

Monday, August 25
Kdro—Albert S. and Robert A. Drohlich, d/b/a Drohlich Bros., Sedalia, Mo.—C. P., 800 kc., 1 KW day, daytime. Present assignment: 1140 kc., 250 watts, unlimited time.
Consolidated Hearing
Kfjm—University of North Dakota, Grand Forks, N. D.—Renewal of license, 1140 kc., 500 watts night, 1 KW day, unlimited time.
Kfjm—University of North Dakota, Grand Forks, N. D.—Modification of license, 1140 kc., 500 watts night, 1 KW day, share 3 to 5 p.m. daily. Present assignment: 1140 kc., 500 watts night, 1 KW day, unlimited time.
NEW—Dalton LeMasurier, Grand Forks, N. Dak.—C. P., 1140 kc., 500 watts night, 1 KW day, specified hours.

Wednesday, August 27

Thursday, August 28
NEW—West Allis Broadcasting Co., West Allis, Wis.—C. P., 1180 kc., 250 watts, daytime.

Friday, August 29
NEW—Knoe, Incorporated, Monroe, La.—C. P., 1420 kc., 250 watts, unlimited time.

FUTURE HEARINGS

During the week the Commission has announced the following future broadcast hearing dates. They are subject to change.

September 24
NEW—Park Cities Broadcasting Corp., Dallas, Texas.—C. P., 710 kc., 5 KW, unlimited time, DA-night.

September 25
Consolidated Hearing
Wica—WICA, Incorporated, Ashtabula, Ohio.—C. P., 970 kc., 1 KW night, 5 KW day, unlimited time, DA-night.
Wwsw—Walker & Downing Radio Corp., Pittsburgh, Pa.—C. P., 970 kc., 1 KW night, 5 KW day, unlimited time. DA-night and day.

September 26
Kgko—Kgko Broadcasting Co., Ft. Worth, Texas.—Modification of license, 570 kc., 1 KW night, 5 KW day, unlimited time, DA-night.

September 29
Further Hearing

Consolidated Hearing
NEW—Texas Star Broadcasting Co., Houston, Texas.—C. P., 1230 kc., 250 watts, unlimited time.
NEW—Greater Houston Broadcasting Co., Inc., Houston, Texas.—C. P., 1230 kc., 250 watts, unlimited time.

Further Hearing
Kwk—Thomas Patrick, Inc., St. Louis, Mo.—C. P., 680 kc., 50 KW, unlimited time, DA-day and night.

October 14
Consolidated Hearing
Kvfd—Northwest Broadcasting Co., Fort Dodge, Iowa.—Modification of license, 1100 kc., 250 watts, unlimited time.
Kfgq—Boone Biblical College, Boone, Iowa.—Renewal of license, 1100 kc., 100 watts day, specified hours.

October 16
NEW—Hennessy Broadcasting Co., Butte, Montana.—C. P., 1190 kc., 250 watts, unlimited time.
NEW—Barclay Craighead, Butte, Montana.—C. P., 1190 kc., 250 watts, unlimited time.

October 20
Wibg—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Modification of license, 990 kc., 1 KW, limited to Knoxville, Tenn.

October 22
Wbry—American Republican, Inc., Waterbury, Conn.—Modification of C. P., 560 kc., 1 KW, unlimited time, DA-night and day.

October 27
Consolidated Hearing
NEW—Jefferson Broadcasting Corp., Birmingham, Ala.—C. P., 1310 kc., 250 watts, unlimited time, request facilities of Wsgn when vacated.
NEW—George Johnston, Jr., Birmingham, Ala.—C. P., 1310 kc., 250 watts, unlimited time, request facilities of Wsgn.
FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

Columbia Broadcasting System, Inc., St. Louis, Mo.— Granted construction permit (B4-PH-102) for a new (FM) broadcast station to operate on frequency 45200 kc., in order to serve 13,000 square miles.

Westinghouse Radio Stations, Inc., Pittsburgh, Pa.— Granted reinstatement of construction permit for a new developmental broadcast station to operate on frequency 9570 kc., with power of 200 watts, for the purpose of furnishing a signal for the National Bureau of Standards in Washington, in connection with radio wave propagation studies made by that agency.

West Virginia Broadcasting Corporation, Wheeling, W. Va.— Granted special service authorization (B2-SSA-7) to operate on 1170 kc., 5 kw, unlimited time, for the period ending February 1, 1942. (Now operates on 1170 kc., 5 kw, simulated-WOWO, shares night-WOWO, and has construction permit for 50 kw unlimited time, DA night.)

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio.— Granted extension of construction permit (B2-P-3357) to install a new transmitter, move transmitter to about 7 miles south southeast of center of Dayton; install directional antenna for night use, and increase night power to 5 kw. (Now authorized under construction permit which has expired, to use 1290 kc., 5 kw day, 1 kw night, DA at night, unlimited time.)

WTOC—Savannah Broadcasting Co., Savannah, Ga.— Granted special service authorization (B3-MP-1250) to increase night power to 5 kw, in order to test changes in directional antennas and extend commencement and completion dates to 60 and 180 days after grant, respectively. (Now has construction permit (B3-P-2944) for 1290 kc., 1 kw night, 5 kw day, DA night, unlimited time.)

WCBL—Miami Beach Broadcasting System, Brentwood, N. Y.— Granted extension of special temporary authority to operate a peak power of 1 Kw, on frequency 6060, 21520 kc., sharing time on both frequencies with WCRC and WCBX, for period of 30 days, beginning August 1, 1941, to not later than October 12, 1941.

WCRC—Columbia Broadcasting System, Inc., New York, N. Y.— Granted special temporary authority to use already licensed Mackay Radio and Telegraph Co. point to point transmitter, Type 34-C, on 6960, 6120, 6170 kc., 3600, 11830, 17830, 15270 kc., 50 kw day and night, 5 kw night, 10 kw对人体, unlimited time.

WCRC—Columbia Broadcasting System, Inc., Brentwood, N. Y.— Granted modification of construction permit (B1-MIP-27) for international broadcast station to add frequencies 6060 and 21520 kc., sharing time on both frequencies with WCRC and WCAB and to share time with WCRC on 6120, 6170 and 21570 kc. (Now has construction permit to operate on frequencies 6130, 6170, 6930, 11830, 15270, 17830, 21570 kc., 50 kw day and night; 5 kw night, 10 kw对人体; unlimited time with WCRC; share on 9630, 11830, 15270 kc, with WCAB and WCRC; unlimited time on 6120, 6170, 21570 kc.)

WCRC—Columbia Broadcasting System, Inc., Brentwood, N. Y.— Granted modification of construction permit (B1-MIP-28) for international broadcast station to add frequencies 6130, 6170, 21570 kc., sharing time with WCBX and to share time on frequencies 6060 and 21520 kc., with WCBX and WCAB. (Now has construction permit to operate on frequencies 6060, 6930, 11830, 12370, 12830, 21570 kc., 50 kw对人体; shares on 9630, 21570 kc, with WCAB; shares with WCBX on 17830 kc.; shares on 9630, 11830, 15270 kc, with WCAB and WCBX.)

W3XE—Philco Radio and Television Corporation, Philadelphia, Pa.— Granted special authorization (B2-PCT-4) to operate television station W3XE, on a commercial basis for a period of 60 days from September 1, 1941, using Channel No. 3 (65060-7260 kc.).

MISCELLANEOUS

WPIC—Sharon Herald Publishing Co., Sharon, Pa.— Denied request for special temporary authority to operate additional time from 8 p. m. EST to conclusion of program in connection with the Mercer County Holy Name Society Rally on September 7, 1941.

WMRO—Martin R. O'Brien, Aurora, Ill.— Denied request for special temporary authority to operate from sign-off time (August 17 p. m. EST, of WCSI) to 10 p. m. EST, in order to broadcast the baseball game between Aurora and Sycamore.

WCCE—United Broadcasting Co., Columbus, Ohio.— Denied request for special temporary authority to operate from sign-off time (September 4, 1941) to 7 p. m. EST, in order to broadcast the ball game between WCSI and WCCE.

WHKO—United Broadcasting Co., Columbus, Ohio.— Granted special temporary authority to operate from regular sign-off time (9:45 p. m. EST, August) to the conclusion of the Simon-Baer boxing bout on September 5, 1941, only, in the event this bout runs later than regular sign-off time.

WHKO—United Broadcasting Co., Columbus, Ohio.— Granted special temporary authority to operate from regular sign-off time (9:45 p. m. EST, August) to the conclusion of the Losnevech-Mauriello light heavyweight championship boxing bout on August 26, 1941, only, in the event this bout runs later than regular sign-off time.

W7NNS—Hamberger Broadcasting Service, Inc., New York, N. Y.— Granted extension of special temporary authority to operate frequency modulation station commercially on 47100 kc., power 1000 watts, special emission for frequency modulation, at 441 Madison Ave., New York City, using Western Electric Type No. D151182, Serial No. 101, one kilowatt transmitter for a period ending August 20 and ending not later than October 18, 1941.

KGGS—Herbenito Broadcasting Co., Harlington, Texas.— Granted modification of construction permit for authority to move studio to approximately 3½ miles from Harlington, Texas.

WCRC-WCBX—Columbia Broadcasting System, Inc., New York, N. Y.— Granted special temporary authority to use already licensed Mackay Radio and Telegraph Co. point to point transmitter, Type 34-C, on 6060, 6120, 6170, 6930, 11830, 12370, 12830, 15270, 17830, 19600 kc., for the period ending no later than September 8, 1941, to conduct antenna tests for International Broadcast stations WCRC and WCBX, for period of 30 days, beginning August 12 to not later than September 10, 1941.

WBNT—National Broadcasting Co., Inc., New York, N. Y.— Granted extension of special temporary authority to operate a specially constructed 1 Kw peak power, special emission laboratory model FM visual transmitter in conjunction with the main picture transmitter power amplifier of WNB (formerly W2XBS) on Channel No. 1 in order to make new comparisons of FM and AM emissions and to obtain engineering data for period August 13 to not later than September 16, 1941.

KFVO—Evangelical Lutheran Synod of Mo., etc., Clayton, Mo.— Granted modification of construction permit (B4-P-2882) for extension of date to September 15, 1941 (B4-MP-1102).

W2XNX—Edwin H. Armstrong, Alpine, N. J.—Granted special temporary authority to operate an additional transmitter on 43 mc., with power not in excess of 40 kw, using FM for a period ending no later than September 8, 1941, in order to conduct experiments on adjacent channel operation of FM broadcast stations and demonstrate such operation to certain engineering committees of the RMA.

W2XYY—Columbia Broadcasting System, Inc., New York City.— Granted extension of special temporary authority for the period August 17 p. m. to September 17, 1941, to use a 25-watt test transmitter on 330.1 and 330.1, 330.1, 330.1, 330.1, 330.1, in order to conduct tests.

WRCA—National Broadcasting Co., Inc., New York City.— Granted extension of special temporary authority to operate on 9610 kc., with effective power of 100 kw, using separate
rate power amplifiers feeding separate directional antennas, for the period August 19 to September 17, 1941.

WKRC—The Cincinnati Times Star Co., Cincinnati, Ohio.—Granted special temporary authority to operate with power of 5 kW from 2 to 3 a.m., EST, August 16 only, to carry a new DX program on (B2-S.260).

WI0XF—National Broadcasting Co., Inc., Portable.—Granted modification of license for developmental broadcast station to change type designation of transmitter (B1-MLEX-13).

Tri-State Broadcasting Co., Inc., Portable-Mobile, area of El Paso, Texas.—Granted construction permit for new relay broadcast station to be used with applicant's standard broadcast station KTSM; frequencies 1622, 2058, 2150, 2790 kc., 50 watts (B3-PRY-248).

WBLR—Columbus Broadcasting Co., Inc. Portable-Mobile, area of Columbus, Ga.—Granted temporary authority to continue construction permit (B3-PRY-237) for new relay broadcast station to be used with applicant's standard broadcast station WRBL; frequencies 1622, 2058, 2150, 2790 kc., 50 watts (B3-LRY-234).

WJRL—James broadcasting Co., Inc., Portable-Mobile, area of Jamestown, N. Y.—Granted license to cover construction permit (B1-PRE-391) for new relay broadcast station to be used with applicant's standard broadcast station WJTN; frequencies 30820, 33570, 33580 and 37980 kc., 25 watts (B1-LRE-355).

KFUO—Pacific Lutheran University, Portland, Ore.—Granted modification of construction permit (B4-P-2882), for new transmitter, antenna and increase in power from 1 to 5 kW) for change in frequency from 830 to 850 kc., under NARBA.

WBEL—Communications Co., Inc., Buffalo, N. Y.—Granted license to cover construction permit (B1-P-2757), for increase in power to 5 kW day and night, installation of new transmitter, directional antenna for night use and move of transmitter (B1-L-1465).

WGAE—General Electric Company, Schenectady, N. Y.—Granted license to cover construction permit (B1-PIB-25), which authorized increase in power, new equipment and additional frequencies in international broadcast station; frequencies 6190, 95359, 15330, 21500, and 2150 kc., 50 kw. (Subject to special conditions contained in construction permit.)

KONO—Eugene J. Roth, tr/ as Mission Broadcasting Co., San Antonio, Tex.—Granted special temporary authority to operate on an unlimited time basis, using those day and night hours vacated by KMAC for a period not to exceed 30 days.

KGKE—Elmer G. Becher, Sterling, Colo.—Denied request for special temporary authority to operate from 1:30 p.m. to 2 p.m. MST on August 18, 19 and 20, 1941, in order to broadcast programs in connection with the Logan County Fair, Brainerd, Minn.

Jewel Lee Noble, E. Francis Egleston, M.D., and James W. Bonner, d/b/a as Physicians and Surgeons Emergency Radio Call Service, San Francisco, Calif.—Granted special temporary authority to operate with power of 42699 kc., 1000 watts, unlimited time.

Jewel Lee Noble and Harry Bell, d/b/a as Physicians and Surgeons Radio Page Service, Los Angeles, Calif.—Granted motion to continue hearing now set for August 18 on application for construction permit to operate on frequency 2598 kc., 100 watts, A3 emission, unlimited time. Hearing continued to December 9, 1941.

Edward Tom O'Brien, David Shepard, Howard S. Johnson and John J. W. Boler, a partnership, d/b/a as Brainerd-Bemidji Broadcasting Co., Brainerd, Minn.—Granted petition for leave to file amendment late in re application for construction permit for new station to operate on 1550 kc., 1 kw., unlimited time.

KFJJ—KFJJ Broadcasters, Inc., Portable-Mobile, area of Klamath Falls, Ore.—Denied petition to intervene in the hearing on the application of Herald Publishing Co. for a new station in Klamath Falls to operate on 1300 kc., 250 watts, unlimited time.

KFJF—KFJJ Broadcasters, Inc., Klamath Falls, Ore.—Petition to intervene, and opposition thereto filed by D. Scheaffer, in re application of Dorman Scheaffer for a new station at Klamath Falls, Ore., to operate on 1100 kc., 250 watts, unlimited time—denied; Scheaffer's petition for investigation and to strike KFJJ's petition as false and sham, also denied; exception noted by counsel for Scheaffer.

WFMJ—William F. Maaz, Jr., Youngstown, Ohio.—Granted petition to intervene in the hearing on application of Washington Broadcasting Company for a new station in Washington, Pa., to operate on 1150 kc., 250 watts, unlimited time.

WPRF—Julio M. Conesa, Ponce, Puerto Rico.—Granted motion for continuance of new authority to rebroadcast high frequency experimental station, DA night, granted, amendment to be filed within 15 days; motion to remove application from docket, without prejudice to filing another petition to remove, dismissed.

W2XMN—Edwin H. Armstrong, Alpine, N. J.—Granted extension of special temporary authority to retransmit the transmissions of experimental high frequency broadcast stations W2XAG, W6SN and W1X0J (W4-JB) for the period August 28 to October 27, in order to continue rebroadcasting experiments.

W2XAG—Carmon R. Runyon, Jr., York, N. Y.—Granted extension of special temporary authority to operate a high frequency experimental station on 117199 kc., 5000 watts, special emission for FM, for the period August 29 to October 21, 1941.

W51R—Symphony League Tel. Mfg. Co., Rochester, N. Y.—Granted extension of special temporary authority to operate frequency modulation station commercially on 14500 kc., special emission for FM, with transmitter located at 89 East Ave., Rochester, for the period September 2 to November 1, pending completion of construction pursuant to construction permit (B1-PH-75). W51R.

WOKO—WOKO, Inc., Albany, N. Y.—Granted special temporary authority to operate a 2 watt pack transmitter as a relay broadcast station on 33280, 35020, 37629 and 39820 kc., in order to relay to station WOKO program in connection with the Alliance County Fair, from August 18 to August 24, only.

W71NY—Bamberger Broadcasting Service, Inc., New York City.—Granted extension of special temporary authority to operate frequency modulation station commercially on 14100 kc., 10000 watts power, at 444 Madison Ave., New York, for the period August 23 to September 21, pending completion of antenna construction in accordance with construction permit (B1-PH-46; B1-MPH-8).

WPRF—Julio M. Conesa, Ponce, Puerto Rico.—Granted extension of authority to rebroadcast on a sustaining basis the Raymonde Gram Swing programs to be received from International Broadcast station WECA over station WPRF, for the period August 23 to October 21, conditionally.

W6SH—WDRC, Inc., Hartford, Conn.—Granted extension of special temporary authority to operate FM broadcast station W2XMN and W1X0J emissions for a period beginning August 29 and ending no later than October 27, only.

Courier-Journal & Louisville Times Co., Louisville, Ky.—Granted special temporary authority to operate portable transmitter licensed to amateur station W5AVH on 9135 kc. and 757.5 kc., A1, A2 and A3 emission, for day and night use, as a cue circuit between station WHAS and a transcription crew following Army maneuvers in Arkansas and Louisiana, for a period ending no later than September 30.

KB2A-KB2B—Telegraph-Herald, Dubuque, Iowa.—Granted extension of special temporary authority to operate 4 pre-licensed relay transmitters on 1629, 2058, 2150 and 2790 kc., with power of 125 watts for KD1B and 2 watts for KQHS from August 16 to September 14, in order to relay to station KDTH special events, particularly the Darlington Fair, Wis. Fair.

W1NX—Westinghouse Radio Stations, Inc., Hull, Mass.—Granted extension of special temporary authority to operate an FM experimental b/c station on 12600 kc., 1000 watts, special emission for FM, with transmitter located at Newport Road, Hull, for the period August 29 to October 28, pending completion of new FM station W67B.

W1XSN—Westinghouse Radio Stations, Inc., Springfield, Mass.—Granted extension of special temporary authority to operate an FM experimental b/c station on 12600 kc., 1000 watts, special emission for FM, with transmitter located at 625 Page Blvd., E. Springfield, Mass., for the period August 29 to October 28, pending completion of new FM station W67B.
W2XOV—General Electric Co., New Scotland, N. Y.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 43200 kc., 250 watts, special emission for FM, with transmitter located at New Scotland, N. Y., for the period August 25 to September 27.

W2XMN—Edwin H. Armstrong, Alpine, N. J.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 117430 kc., 40 kW power, using special emission for FM, for the period September 9 to November 7, in order to conduct tests, pending completion of new FM station W31NY.

W2X0Y—General Electric Co., New Scotland, N. Y.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 128000 kc., 40 kW watts, special emission for FM, with transmitter located north of Alpine, N. J., for the period August 28 to October 27, pending completion of new FM station W31NY.

Adirondack Broadcasting Co., Inc., Albany, N. Y.—Granted special temporary authority to operate a 2-watt pack transmitter as a relay broadcast station on 31620, 36260, 37340 and 39620 kc., with A3 emission in order to relay to station WABY program in connection with the Altonam Park from August 18 to 24, only.

Robert V. Lee, Bradenton, Fla.—Denied petition to reconsider and grant without a hearing application for a new station to operate on 1490 kc., 250 watts, unlimited time.

KFPW—Southwestern Hotel Co., Fort Smith, Ark.—Denied petition to reconsider and grant without hearing the application for renewal of license; cancelled hearing heretofore scheduled, and granted renewal on a regular basis to operate on 1100 kc., 250 watts, unlimited time.

WRDW—Augusta Broadcasting Co., Augusta, Maine.—Granted petition to reconsider and grant without hearing the application for construction permit to change frequency from 1180 kc. to increase power, install new transmitter and change antenna system, subject to filing with and obtaining approval of the Commission of an application for modification of construction permit requesting operating power of 5 KW, unlimited time, employing directional antenna at night, and specifying location, transmitting equipment, and antenna system to be used.

Utica Broadcasting Co., Inc., Utica, N. Y.—Denied petition requesting reconsideration and grant without hearing of application for new station to operate on 1150 kc., 250 watts, unlimited time.

APPLICATIONS FILED AT FCC

550 Kilocycles

NEW—Eastern Broadcasting Co., Patchouge, N. Y.—Construction permit for a new broadcast station to be operated on 550 kc., 1 KW, unlimited time.

KFYR—Meyer Broadcasting Co., Bismarck, N. D.—License to cover construction permit (B4-P-2576) to install directional antenna for night use and increase power to 5 KW.

KFYR—Meyer Broadcasting Co., Bismarck, N. D.—Authority to determine operating power by direct method.

560 Kilocycles

WIND—Johnson-Kennedy Radio Corporation, Gary, Indiana.—Authority to determine operating power by direct measurement of antenna power.

570 Kilocycles

KGKO—KGKO Broadcasting Co., Fort Worth, Texas.—Modification of construction permit (B3-P-2571) for changes in directional antenna system and increase in power from 1 KW night and 5 KW day to 5 KW day and night, requesting extension of completion date from 9-14-41 to 3-14-42.

600 Kilocycles

KROD—Dorance D. Roderick, El Paso, Texas.—Construction permit to install new transmitter.

610 Kilocycles

NEW—The Continental Broadcasting Co., Salt Lake City, Utah.—Construction permit for a new broadcast station to be operated on 610 kc., 1 KW, directional antenna, unlimited time.

630 Kilocycles

WMIN—WMIN Broadcasting Co., St. Paul, Minn.—Construction permit to change frequency from 1100 to 650 kc., increase power from 250 watts to 5 KW, install new transmitter, install directional antenna for day and night use, and move transmitter. Amended: to reduce proposed night power to 1 KW and change transmitter site to Richfield, Minn., and make changes in directional antenna.

770 Kilocycles

850 Kilocycles

KFUO—Evangelical Lutheran Synod of Missouri, Ohio, and other States, Clayton, Mo.—Modification of construction permit (B4-P-2882) as modified, for new transmitter, antenna, and increase in power, requesting extension of completion date from 8-13-41 to 9-13-41.

860 Kilocycles

NEW—Etowah Broadcasting Co., Gadsden, Ala.—Construction permit for a new station to be operated on 860 kc., 250 watts power, unlimited time.

910 Kilocycles

WFDF—Flint Broadcasting Co., Flint, Mich.—Authority to determine operating power by direct method for auxiliary transmitter.

940 Kilocycles

WTBO—Associated Broadcasting Corp., Cumberland, Md.—Construction permit to install new transmitter and directional antenna for night use, change frequency from 830 to 940 kc., increase power from 250 watts to 250 watts night and 1 KW day, and change hours of operation from limited to unlimited.

960 Kilocycles

WELI—City Broadcasting Corp., New Haven, Conn.—License to cover construction permit (B1-ML-868) as modified, for increase in power from 250 watts night and 500 watts day to 500 watts night and 1 KW day, and for changes in directional antenna.

WELI—City Broadcasting Corp., New Haven, Conn.—Authority to determine operating power by direct method.

990 Kilocycles

1040 Kilocycles

WGRN—North Side Broadcasting Corp., New Albany, Ind.—C. P. to change frequency from 1370 (1100 kc., NARBA) to 10410 kc., (1000 kc., NARBA), increase power from 250 watts to 5 KW, directional antenna for night use, change type of transmitter, move studio, also move transmitter to point between Pete Amperes and St. Mary's Rd., and Freiberg Rd., New Albany, Ind. Amended: to change requested frequency from 10410 (1000 NARBA) to 780 kc., decrease proposed power from 5 KW day and night to 1 KW; 5 KW day, install new directional antenna for night use only, and change requested transmitter site from a point between Pete Amperes and St. Mary's Road and...
Friedberger Road, New Albany, Ind., to Highway 31W, near New Albany, Ind., omit requested change in studio site.

1050 Kilocycles

NEW—James F. Hopkins, Inc., Ann Arbor, Mich.—Construction permit for a new station to be operated on 1050 kc., 1 KW power, daytime hours of operation.

1060 Kilocycles

KVW—Westinghouse Radio Stations, Inc., Philadelphia, Penna.—Authority to determine operating power by direct measurement.

1070 Kilocycles

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—Construction permit to change frequency from 1140 to 1070 kc. (under NARBA), install a new transmitter, increase power from 5 to 50 KW, change hours of operation from simultaneous day and night share with KVOO to unlimited time, install directional antenna for night use, and move transmitter from near Pratt City to 9 miles north of Birmingham, Ala. Amended: to change proposed transmitter site from 9 to 7 miles north of Birmingham, Ala.

1080 Kilocycles

NEW—WKAL, Incorporated, Kalamazoo, Mich.—Construction permit for a new station to be operated on 1080 kc., 1 KW, daytime hours of operation.

1130 Kilocycles

WDGY—Dr. George W. Young, Minneapolis, Minn.—Special service authorization to operate with power of 1 KW night and 5 KW day, unlimited time.

1160 Kilocycles

WHAT—Independence Broadcasting Co., Inc., Philadelphia, Pa.—Construction permit to install new transmitter and directional antenna for day and night use, change frequency from 1310 kc. to 1160 kc. under NARBA, increase power from 100 watts to 5 KW, change hours of operation from shares with WTEL to unlimited time, and move transmitter. Amended: To request daytime hours of operation.

1190 Kilocycles

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Special Service Authorization to operate unlimited time for a period ending 2-1-42.

1220 Kilocycles

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Construction permit to make changes in equipment and changes in directional antenna for day and night use, change frequency from 1480 kc. to 1220 kc. under NARBA, and change power from 1 KW night and 5 KW day to 50 KW day and night. Amended: Re directional antenna and move of transmitter from Cuyahoga Heights to Broadview Heights Village, Ohio.

1240 Kilocycles

WCOU—Twin City Broadcasting Co., Inc., Lewiston, Maine.—Authority to determine operating power by direct method.

1270 Kilocycles

WXYZ—King-Trendle Broadcasting Corporation, Detroit, Michigan.—Construction permit to make changes in directional antenna system.

1300 Kilocycles

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Michigan.—Construction permit to increase power from 500 watts to 5 KW, install new transmitter, directional antenna for night use, move studio from 16th Floor Grand Rapids National Bank Bldg., Grand Rapids, Mich., and move transmitter from Walker Twp., Grand Rapids, Michigan, to RDF, South of Grand Rapids, Mich.. Amended: To make changes in proposed directional antenna system.

1340 Kilocycles

NEW—B. S. Sadler, New Bern, N. C.—Construction permit for a new broadcast station to be operated on 1340 kc., 250 watts, unlimited time.

1400 Kilocycles

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Special service authorization to operate under terms of B5-P-2023, on 1090 kc., 250 watts, unlimited time, using equipment specified under this construction permit.

NEW—Kennebec Broadcasting Co., Augusta, Maine.—Construction permit for a new broadcast station to be operated on 1400 kc., 250 watts, unlimited time, requesting facilities of WDRO.

WEOA—Evansville On The Air, Inc., Evansville, Ind.—Authority to determine operating power by direct method.

WORD—Spartanburg Advertising Co., Spartanburg, S. C.—Authority to determine operating power by direct method.

1430 Kilocycles

WBYN—WBYN Brooklyn, Inc., Brooklyn, N. Y.—Modification of license to change location from #1 Nevis Street, Brooklyn, New York, to 132 West 43rd Street, New York, New York.

1450 Kilocycles

KLBM—Harold M. Finlay, LaGrande, Ore.—Voluntary assignment of license from Harold M. Finlay to Ben E. Stone.

WMPF—W. Wright Esch, Daytona Beach, Fla.—Authority to determine operating power by direct method. Amended: Re engineering data.

KMYC—Marysville-Yuba City Broadcasters, Inc., Marysville, Calif.—Modification of license to increase power from 100 to 250 watts.

WSLI—Standard Life Broadcasting Co., Jackson, Miss.—Authority to determine operating power by direct method.

1480 Kilocycles

NEW—Southern California Broadcasting Co., Pasadena, Calif.—Construction permit for a new broadcast station to be operated on 1430 kc., 1 KW, daytime. Amended: Re transmitter site to be determined.

1490 Kilocycles

WHBB—Selma Broadcasting Co., Inc., Selma, Ala.—Authority to determine operating power by direct method.

1600 Kilocycles

WCNW—Arthur Faske, Brooklyn, N. Y.—License to cover construction permit (B1-P-2233) for changes in equipment, installation of new antenna, and move of transmitter.

FM Applications

NEW—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Construction permit for a new high frequency broadcast station on 43100 kc., coverage 20,437 square miles; population 6,606,882; studio located 18 Franklin St., Worcester, Mass., and transmitter at Paxton, Mass. (G. E. type GF 150-B, Max. 50 KW). Amended: To change frequency from 43100 to 46100 kc., coverage from 20,437 to 10,000 square miles, population from 6,606,882 to 2,705,202, change transmitter location from Paxton, Mass., to Shrewsbury St., Holden, Mass., make change in antenna system and change type of transmitter. (G. E. type GF 103D Amplifier with G. E. type 4GF 101 Exciter, Max. 5 KW.)

W67C—Columbia Broadcasting System, Inc., Chicago, Ill.—Modification of construction permit (B4-PH-57, which authorized new HFB Station) for extension of completion date from 9-14-41 to 3-14-42, only.

W51C—Zenith Radio Corporation, Chicago, Ill.—Modification of construction permit (B4-PH-16, which authorized new HFB, Station) to make changes in antenna system, only.

W67NY—Columbia Broadcasting System, Inc., New York, N. Y.—Modification of C.P. (B4-PH-55, which authorized new

August 22, 1941 — 707
H.F.B. Station for extension of completion date from 9-28-41 to 3-28-42, only.

K51L—St. Louis University, St. Louis, Mo.—Modification of construction permit (B4-PH-37) for a new high frequency broadcast station, requesting change in type of transmitter and approval of antenna system.

NEW—WOKO, Inc., Albany, N. Y.—Construction permit for a new studio to mobile broadcast station to be operated on 337000 kc., 50 watts, special emission for frequency modulation. Amended: To change requested power from 50 to 25 watts.

Television Application

NEW—Earle C. Anthony, Inc., Los Angeles, Calif.—Construction permit for a new commercial television broadcast station (formerly W6XEA) to be operated on Channel No. 6—960000-102000 kc., A5 and special emission for frequency modulation; ESR 3243; unlimited time; coverage 2215 square miles, population 2,645,521.

Miscellaneous Applications

WOEF—The National Life & Accident Insurance Co., Inc., Nashville, Tenn. (Mobile)—Construction permit to change type of transmitter, only.

WOEF—The National Life & Accident Insurance Co., Inc., Nashville, Tenn. (Mobile)—License to cover construction permit (B3-PRE-406) for change in type of transmitter, only.

KEIZ—Oregonian Publishing Co., Portable-Mobile, Area of Portland, Ore.—License to cover construction permit (BS-PRE-398) for change in equipment and decrease in power.

KEIZ—Oregonian Publishing Co., Portable-Mobile, Area of Portland, Ore.—License to cover construction permit (BS-PRE-398) for changes in equipment and decrease in power.

WOA—Southland Industries, Inc., San Antonio, Texas—Authority to install automatic frequency control equipment for auxiliary transmitter.

WEIN—The Journal Company (The Milwaukee Journal), Portable-Mobile, area Milwaukee, Wisc.—Construction permit to make changes in equipment and increase power from 25 to 50 watts.

FEDERAL TRADE COMMISSION ACTION

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

James Bell Company, Inc., 36 Green St., Newark, N. J., engaged in the sale and distribution of aluminum ware, enamel ware, radios and other articles of merchandise, is charged in a complaint with using lottery methods in the sale and distribution of its products. (4566)

Houston's Mineral Well—W. A. Houston, trading as Houston's Mineral Well, New Market, Tenn., engaged in the sale of a so-called mineral water intended for use in the treatment of certain ailments of the human body, is charged, in a complaint with misrepresentation and false advertising. (4567)

Malone & Moles—E. B. Moles, trading as Malone & Moles, Sioux City, Iowa, engaged in the sale and distribution of a mechanical device for use on automobiles and trucks, designated as "Gas-Miser," is charged, in a complaint issued with misrepresentation. (4557)

National Association of Sanitary Milk Bottle Closure Manufacturers—A complaint has been issued charging the National Association of Sanitary Milk Bottle Closure Manufacturers, Philadelphia, five of its members and executive committee members, and 10 manufacturers of closure milk bottle caps, with carrying out combinations and agreements for fixing and maintaining prices, and other practices in restraint of trade.

The other respondents in the case are: Stanley Dennis, chairman, and George J. Lincoln, Jr., manager of the trade association, both of Philadelphia; Daniel A. Mackin, Long Island City, N. Y.; Harvey M. Smith, Oneida, N. Y.; and Jarvis Williams, Jr., Chicago, members of its executive committee, and the following member manufacturers: Aluminum Seal Corporation, New Kensington Pa.; American Seal-Kap Corporation, Long Island City, N. Y.; Cowdrey Products Co., Inc., Fitchburg, Mass.; Crown Cork & Seal Co., Inc., Baltimore; Mid-West Bottle Cap Co., Belvidere, Ill.; Sanitary Metal Cap Corporation, Syracuse, N. Y.; Sealright Co., Inc., Fulton, N. Y.; Smith-Lee Co., Inc., Oneida, N. Y.; Standard Cap and Seal Corporation, Chicago; and Universal Seal Cap Corporation, Brooklyn.

The complaint charges that the respondent association members, pursuant to their combinations and agreements, have filed with the respondent association their price lists for closure milk bottle caps; agreed that they would not deviate from the filed prices until new and different prices were so filed; permitted the respondent association to disseminate prices so filed to all other members of the association; fixed and maintained uniform discounts and other conditions for the sale of their closure caps; and fixed and maintained, with dairies, uniform contract terms which provided for the sale of the dairies' actual yearly requirements of closure milk bottle caps at prices dependent on the quantity contracted for. (4565)

National Rivet & Mfg. Company—Five manufacturers of tubular and bifurcated rivets are charged, in complaints, with violation of the "tying clause" section of the Clayton Antitrust Act.

The respondent companies, who also lease and license, and in a number of instances manufacture, rivet-setting machines, are: Edwin B. Simpson Co., Brooklyn; National Revet & Manufacturing Co., Waupun, Wis.; Chicago Rivet and Machine Co., Cicero, Ill.; Penn Rivet Corporation, Philadelphia; and Shelton Tack Co., trading as Shelton Tubular Rivet Co., Shelton, Conn.

The complaints allege that the respondents leased, licensed and sold their rivet-setting machines, or fixed a price charged therefor or discount from, or rebate upon such price, on the condition, agreement, or understanding that the lessees, licensees or vendees thereof would not use the respondents' machines for setting any other tubular or bifurcated rivets than those manufactured by the respondents or sold under their authority. (4560-61-62-65-66)

Parfums Ronni, Inc., 16 West 20th St., New York City, engaged in selling and distributing a cosmetic preparation variously designated as "Ronni Mascara," "Ronni Cream Mascara," "Mascara by Ronni" and "Mascara," is charged, in a complaint, with misrepresentation. (4568)

CEASE AND DESIST ORDERS

During the past week the Commission has issued the following cease and desist orders:

Ajax Tire & Rubber Corporation, 601 West 26th St., New York City, engaged in the sale and distribution of automobile tires and tubes, has been ordered to cease and desist from misrepresentation in the sale of its products. (3943)
Alvi Company—Casimiro Muojo, trading as Alvi Co. and as Alvi, Inc., 158 Grand St., New York City, has been ordered to cease and desist from certain misrepresentations and false advertisements in the sale and distribution of a hair dye cosmetic designated as "Vitale Instantaneous Hair Dye," "Vitale Rapid Hair Coloring," "Vitale Rapid," "Vitale Hair Coloring," "Vitale Hair Dye," and as "Vitale." (4844)

Gates Medicine Co., Inc., Charleston, W. Va., has been ordered to cease and desist from false and misleading advertising in the sale of drugs represented as cures for the liquor habit. (4301)

Illinois Nut Products Co., Chicago candy manufacturer, has been ordered to cease using lottery methods in the sale of its products. (3807)

Jacks Chemical Company—Lambert Agin, trading as Jacks Chemical Company and as Jacque Chemical Company, Pleasant Ridge Station, Cincinnati, has been ordered to cease and desist from misrepresentation in the sale of a medicinal preparation called "Jacks" and "Jacque." (4247)

Kemico—F. W. Johnson, trading as Kemico, Park Ridge, III., has been ordered to cease and desist from making misleading representations in the sale of 14 formulas for medicinal and cosmetic preparations. (4505)

G. Krueger Brewing Co., Newark, N. J., has been ordered to cease and desist from misrepresentation in the sale of beer. (4434)

Rockford Furniture Factories, Inc., Newark, N. J., seller at retail and distributor of furniture, has been ordered to cease and desist from using the word "Rockford," or any simulation of it, in the firm's corporate name or in any way to refer to its business or display rooms, when the furniture sold is not in substantial proportion manufactured in Rockford, Ill., known as a furniture center. (4503)

Uco Food Corporation—An order has been issued directing Uco Food Corporation, Newark, N. J., food wholesaler, to cease and desist from violation of the brokerage section of the Robinson-Patman Act. (4277)

STIPULATIONS

Commission has made public the following stipulations:

Associate British Manufacturers—Miles Llewellyn Finch, Miles L. Finch, Jr., Guy Giordanelli and Cora S. Sontag, trading as Associate British Manufacturers, 200 Fifth Ave., New York City, engaged in the sale and distribution of textile fabrics, have entered into a stipulation with the Federal Trade Commission in which they agree to discontinue representing, through the use of any word, terms, symbols or depictions indicative of British or other foreign origin, or in any other manner, that products which are manufactured in the United States of America are made in or imported from the British Isles or any other foreign country, provided, however, that the country of origin of the various constituent fibers thereof may be stated when immediately accompanied in equal conspicuous type with an explanation that such products are manufactured in the United States. (3187)

Barton Chemical Company—Vincent B. Bartos and Clara J. Bartos, trading as Barton Chemical Company, 3907-11 South Langley Ave., Chicago, engaged in the sale and distribution of chemical preparations, such as bleaches, cleaners, whiteners, and insecticides have stipulated that they will cease and desist from representing to customers or prospective customers through the use of advertisements, printed matter, or otherwise, that the goods or merchandise offered as a premium for the return of coupons issued by them have a retail price or value greater than the price at which such products are currently sold in the usual course of business, or representing that the product given for the return of such coupons is of a certain quality or composition, when in fact the product is not of the quality and composition represented. (3186)

Paul F. Beich Co., Bloomington, III., candy manufacturer and distributor of enlarged tinted photographs for use as so-called premium merchandise, has entered into a stipulation in which it agrees to cease employing the words "Painted," "Hand Painted," "Portrait," "Oil Portrait" or other words of similar meaning, alone or in conjunction with other expressions, to describe or refer to colored or tinted photographs or photographic enlargements or other pictures produced from a photographic base or impression. (3197)

Cassell Products, Inc., also trading as Jaland Parfums, 131 West 33rd St., New York, entered into a stipulation to cease use of the word "Swiss" on tags, labels, invoices or other advertising matter as descriptive of bath oil not produced in Switzerland. The stipulation recites that the respondent designated as "Cassell Swiss Pine Needle Bath Oil Concentrated" a product which neither was imported from Switzerland nor contained oil of pine needles which were grown in Switzerland. (3196)

Certain-Gro Hair Preparations—Louise G. Ramsey, trading as Certain-Gro Hair Preparations, Gary, Ind., has stipulated to cease and desist from representing that "Certain-Gro Hair Preparation" is a remedy or cure for baldness, falling hair, dandruff and itching scalp, or that it will thicken or improve the health or color of hair, prevent early baldness or revitalize lifeless hair; that "Certain-Gro Liquid' Hot Oil Treatment' will condition, stimulate and promote the growth of hair, and further agrees to cease representing that they will grow hair. (02859)

Elene of Vienna, Inc., and Ella M. Schnuck, 525 Fifth Ave., New York City, engaged in selling a cosmetic designated "Dervita," has stipulated that they will discontinue representing that Dervita corrects sagging facial contours or removes other evidence of age, clears away lines of fatigue, restores youthful color or facial contours, keeps the skin youthful looking or free from blemishes, drives out all dirt in the pores, or contains healing herbs. (02858)

Elmo Sales Corporation, Philadelphia, in connection with the sale of its products "Elmo Special Formula Cream," stipulated to cease the use in advertising matter of representations which tend to convey the impression that use of the product will retard or otherwise influence or prevent changes giving rise to wrinkles, crow's feet or lines characteristic of advancing age, or that it would do more than temporarily soften or mask and thereby lessen the prominence of such lines or age signals or temporarily correct dryness and redness of the skin. (3194)

Fanny Farmer Candy Shops, Inc., Rochester, N. Y., stipulated that in connection with the sale of its factory made candies it will cease using in advertising matter or on containers of its products the words "Home Made" or other words of similar implication as descriptive of such products, and will cease employing the words "Home Made" in any way implying that the products are home made or cooked in the home. According to the stipulation, the respondent corporation advertised factory made candies as "Old Time—Home Made Fanny Farmer Candies." (3195)

Food Balance Corporation, 519 North Central Ave., Chicago, has stipulated to cease certain representations in connection with the sale of unfermented berry juices sold under the name "Hercules." (02857)
C. J. Gordon Co., 309 West Adams St., Chicago, has entered into a stipulation to cease certain representations in the sale of fur products. (3200)

Hammond Paint & Chemical Co., Beacon, N. Y., engaged in selling an insecticide and fungicide spray for roses designated “Kix,” formerly known as “Triad,” has stipulated that it will cease and desist from representing that its product will kill or control all forms of insect life or all types of beetles or all types of sucking or chewing insects, and that its product contains insecticides that are new. (02855)

Olbas Company—R. Keller, trading as Olbas Co., 500 Fifth Ave., New York, has entered into a stipulation to cease representing that his medicinal preparation “Olbas Herb Oil” will ease the spasms of coughing, asthma, or irritation of the respiratory channels, and will relieve flatulence or digestive disturbances; that the essential oil from which Olbas is distilled is scarcely known in the Western world; and that every detail of Olbas’s varied application is supported by clinical evidence from European physicians. (02855)

Parker Industries—A Chicago dealer and a Chicago manufacturer have agreed in stipulations to cease certain representations in the sale of flashlights described as having self-generating mechanisms producing their own lighting power and eliminating the necessity of battery or cord.

Respondents in these cases are Milton M. Tigerman, trading as Parker Industries, 100 West North Ave., who sells a type of flashlight called “Magic-Lite,” “Parker-Lite,” and “Flashmaster,” and Match King, Inc., trading as Monarch Manufacturing Co., 711 West Lake St., manufacturer of a type of flashlight designated “The Flashmaster.”

Each respondent agrees to cease using representations which tend to convey the impression that its product is of such unlimited span of usefulness that it will assure light forever or provide service for a lifetime, without necessity of replacing parts and at no cost beyond the first cost. (3198-3199)

Perspir-ator Manufacturing Company—Irene G. Fenton, trading as Perspir-ator Manufacturing Company, Toledo, Ohio, engaged in selling a Turkish bath cabinet designated “Perspir-ator,” has stipulated that she will cease and desist from representing that use of the device will rejuvenate the entire system; that it is a cure or remedy in the treatment of excess weight; that it will keep the pores open or produce proper elimination of body poisons; that it will afford relief to the nervous manifestations of a woman during menopause; that it will cure, break up or be beneficial in the treatment of colds; that it will help to replace sallow, sluggish skin with a healthy youthful glow, or help to eliminate blackheads or the cause of acne and other skin blemishes; that it is a cure or remedy for symptoms of over-indulgence; or that the device is a cure or remedy in the treatment of rheumatism, lumbago, arthritis and muscular aches and pains. (02852)

A. Rhodes Company, Inc., Lowell, Mass., manufacturer of a hair dye designated “Rejuvena” and “Reju-Vena,” has stipulated that in connection with the sale and distribution of its product it will discontinue the use of any representations implying to purchasers that the product has healing properties. (3192)

Chester H. Roth Co., Inc., 389 Fifth Avenue, New York City, and Century Hosiery Corporation, Burlington, N. C., engaged in the sale and distribution of men’s hosiery, have stipulated in connection with the sale and distribution of their products to cease and desist from the use of the words “Linen” or “Irish Linen” as descriptive of the fiber content of hosiery not composed of linen. (3188)

Shanmoock Narrow Fabric Company, Pawtucket, R. I., a corporation engaged in the manufacture of narrow fabrics or ribbon, has entered into a stipulation in which it agrees in connection with the sale and distribution of its products to cease and desist from the use of the marking “50 Yards” on bolts or containers thereof when, in fact, less than fifty yards of material are contained therein, or otherwise mis-marking or misbranding such products with respect to the yardage thereof or in any other way, with a tendency and capacity or effect of misleading or deceiving purchasers or the consuming public. (3189)

Spiegel, Inc., 1061 West 35th St., Chicago, engaged in selling coal tar hair dyes designated “Lakro” and “Instant Clairor,” has stipulated that it will discontinue disseminating any advertisements which fail conspicuously to reveal therein the following: “Caution: This product contains ingredients which may cause skin irritation on certain individuals and a preliminary test according to accompanying directions should first be made. This product must not be used for dyeing the eyelashes or eyebrows; to do so may cause blindness.”

Provided, however, that such advertisement need contain only the statement: “Caution: Use only as directed on label,” if and when such label bears the first described caution conspicuously displayed thereon, and the accompanying labeling bears adequate directions for such preliminary testing before each application. (02854)

Standard Ribbon Corporation, a New York corporation, with a place of business in Stroudsburg, Pa., engaged in the manufacture of various types of ribbons, including seam binding, has stipulated in connection with the sale of its products to cease and desist from the use of the marking “100 Yards” on bolts or containers thereof when, in fact, less than 100 yards of material are contained therein, or otherwise mis-marking or misbranding such products with respect to the yardage thereof or in any other way, with the tendency and capacity or effect of misleading or deceiving purchasers or the consuming public. (3190)

Sunshine Broadcasting Co., San Antonio, Texas, engaged in interstate commerce in communication by radio and dissemination of such communications, including commercial and other programs, by and through its broadcasting station designated by the call letters “KTSA,” has entered into a stipulation in which it agrees that in selling the facilities and services of its station, it agrees that in selling the facilities and services of its station, it will cease and desist from using the slogan or words “KTSA San Antonio, Texas, 5,000 Watts, Doing a 50,000 Watt Job.” According to the stipulation, Station KTSA operates on 5,000 watts in the daytime and on 1,000 watts at night. (3191)

Zendel Laboratories—A. M. Zendel, trading as Zendel Laboratories, 924 Kelly St., Bronx, New York City, entered into a stipulation in which he agrees to cease certain representations in the sale of his products designated generally as “Natural Cosmetics.” (02856)
SENATE COMMITTEE DROPS RADIO TAX

The industry's all-out fight to lick the time sales tax bore first fruit Wednesday when Chairman Walter George (D-Ga.) announced that the Senate Finance Committee had eliminated the tax from the new federal revenue bill.

Now is the worst possible time to stop fighting. The committee can change its mind. The boys behind the tax can get some friendly senator to introduce it as an amendment when the bill reaches the senate floor. Or the House conference committee can insist that the tax be put back into the bill when it goes to conference to compromise differences between the House and Senate versions.

Let your senators and representatives know how you feel about it!

At the same time that Senator George informed newspapermen that the tax had been removed, he told them that the committee had instructed the Treasury and a sub-committee [Senators Brown (D-Mich.) and Danaher (R-Conn.)] to study a possible franchise tax. Whether this study would be completed in time for inclusion of a franchise tax in the current bill was conjectural, the chairman said.

The NAB is opposed to a franchise tax, unless the federal government reverses long-standing policy and makes all federally regulated industries stand the cost of their regulation.

The American Federation of Labor and labor unions dealing with the industry have continued to express their unqualified opposition to the tax. William Green, A. F. of L. president, urged all state federations and city central bodies to advise their senators and representatives of the federation's position.

After the Allied Printing Trades Council suggested last week that the Senate double the House tax, the NAB, through its special tax counsel, Ellsworth C. Alvord, sent the following letter to the Senate committee:

On August 21 there was submitted to your Committee, on behalf of Mr. John B. Haggerty (Chairman, Board of Governors, International Allied Printing Trades Association, and President, International Brotherhood of Bookbinders), a statement in support of Title VI of the pending bill (H. R. 5417), and recommending a 100 per cent increase in the radio broadcasting tax provided for by that title. While my oral testimony before the Committee (Hearings, pp. 676-681), together with the written memorandum which I submitted for the record (Hearings, pp. 681-689), constitutes an adequate reply to the arguments presented by Mr. Haggerty, his statement contains certain erroneous statements which require correction.

(1) Need for Revenue.—Mr. Haggerty's first argument is that the revenue needs justify the imposition of a special tax on radio broadcasting, at double the rates proposed by the House. The simple answer to this argument is that the revenue needs can never be great enough to excuse an unjust, discriminatory tax.

(2) Return on Investment.—Mr. Haggerty next revives the specious argument that the tax is justified because radio broadcasters earn large profits on the investment in, or "value" of, their physical property. He speaks as though the only outlay required were the cost of a moderate amount of technical equipment. He completely neglects the need for operating capital, the certainty of early losses, the constant hazards of the business, and the necessity for plowing back earnings in order to maintain efficient service. In any event, capital is only one of many income-producing factors. As this Committee has repeatedly recognized, such (Continued on page 712)
more are employed on a part-time basis. Perhaps 250,000 more are employed in the manufacturing and distributing fields. Mr. Haggerty is not specific in his claims of a loss of job opportunities in the printing trades. In view of the increase in recent years in the aggregate circulation of both newspapers and magazines, it is at least doubtful whether he could be specific.

Mr. Haggerty fails to present a single valid argument in favor of the proposed tax. The fact of the matter is that the tax is being urged not because it will produce revenue, not because it is a sound tax measure, but solely in the hope that it will hamper the normal operation of competition between various advertising media. The use of the taxing power for this purpose cannot conceivably be justified. For labor as a whole and even for the printing trades alone, it would be a short-sighted policy. The stimulation of competition by the development of new industries does not destroy job opportunities, it creates them. In this connection, Mr. W. C. Hushing, Chairman of the Legislative Committee of the American Federation of Labor, had this to say to this Committee:

"This is not a new question to us by any means. In the middle 1890's there was another new industry coming into existence and in one of the Central Labor Unions on the West Coast, which was located in the largest West Coast city, there was an organization which came in with a proposal that no member of the organization, of organized labor, ride in an automobile, even to a funeral, and the motion was adopted. This proposal here is on all-fours with and is made for the same reason that that motion was passed through that central body over forty-five years ago; and in the future you will probably look back on this proposal in the same manner that you do on the one which I have just mentioned."

I shall appreciate it if this letter can be incorporated in the record of the hearings.

William C. Hushing, A. F. of L. legislative representative of the American Federation of Labor, told the Senate Finance Committee that the federation was opposed to the radio tax.

Speaking August 23 at the final day's hearing, Mr. Hushing read the resolution against the tax adopted by the A. F. of L. Executive Council at its Chicago meeting. Speaking August 23 at the final day's hearing, Mr. Hushing read the resolution against the tax adopted by the A. F. of L. Executive Council at its Chicago meeting. He pointed out that the tax was the idea of several printing trade unions and was "simply an attempt to deprive the radio industry, a new industry, of some of the work or some of their income and to transfer it to an older industry."

Unions dealing with radio, he added, were opposed to the tax on the ground that it would deprive them of employment opportunities.

Mr. Hushing informed the committee that all the unions asking for the tax had increased their membership since the advent of radio, intimating that they had not suffered because of radio. He then told a story about a West Coast labor group which once adopted a resolution against union men riding in automobiles, and said that the tax proposal someday would seem just as silly.

The proposal to tax radio, he said, might just as well have been made against electric lights because they put the manufacturers of oil lamps out of business, or could have been made by the candlemakers with the same force when the oil lamp came into use." (Hearings, Aug. 23)

Statement by Lawson Wimberly on behalf of the INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS

(Attached A. F. of L.)

In re: H. R. 5417, Title VI—Radio Broadcasting and Network Tax

This statement is presented to the Senate Finance Committee on behalf of the International Brotherhood of Electrical Workers, an American Federation of Labor affiliate, in opposition to the
proposed tax on radio advertising sales contained in Title VI of H. R. 517. Time allotted for our appearance before the Committee did not permit detailed discussion of the various phases of this matter. We therefore wish to present some additional facts with respect to our objections to a tax being imposed on radio advertising.

Undoubtedly, every one realizes that a radio station, like a newspaper, magazine or any other business must compensate its employees with income from some source. A radio station, like a newspaper or a magazine, derives its principal income, with which employees are paid, from advertising sales. While in the advertising field, the radio utilizes an entirely different type or form of sales appeal—it still must compete with all the other advertising mediums. For Congress to tax one medium of advertising without taxing all would certainly be discriminatory.

It is interesting to look into the background of the proposal to tax radio advertising and not tax newspaper, magazine or periodical advertising—which really constitutes the large volume of advertising sales. This proposal originated in the Ways and Means Committee of the House of Representatives when an agent of the International Allied Printing Trades Association, an organization of five unions in the printing industry, complained to the House committee that radio advertising was reducing the earning opportunities of members of the unions comprising the Association.

The records available do not support this allegation. If we can take the record of the number of members on which these unions have paid per capita tax to the American Federation of Labor as a standard of comparison, their membership has actually increased in the period of radio's greatest expansion. The following tabulation shows the number of members reported, is taken from the records of the International Allied Printing Trades Association, an organization of five unions in the printing industry, complained to the House committee that radio advertising was reducing the earning opportunities of members of the unions comprising the Association.

It should be interesting to note the number of broadcasting stations which were licensed for operation during the above period. From reports of the Federal Communications Commission we find that the number of standard commercial broadcast stations were as follows:

- 1925: 571 stations licensed
- 1930: 612
- 1935: 605
- 1940: 814

Figures could be given to show how the number of radio receiving sets in use in the United States has risen from a few hundred thousands to over 50,000,000 at the present time. We could also list authentic figures to show the tremendous increase in circulation of newspapers and magazines during the past 20 years; we could quote statistics to show that hundreds of thousands have been provided employment as a result of the development of radio, but we do not feel that is necessary, especially when this information is general knowledge.

The printing industry workers in attempting to have Congress enact a punitive tax on radio advertising, have selfishly disregarded these obvious facts. They have also apparently ignored the fact that the radio broadcasting industry each year spends several millions of dollars for printed promotional activities. The radio manufacturing industry spends considerably more for its sales and promotional work.

When the proposed tax was first broached, it was termed "an amusement tax" by its sponsors. The fact that it was so designated emphasizes the existence of inherent deficiencies which render such a tax unfair. A properly formulated tax on amusement would impose the tax burden upon those who are the beneficiaries of the particular entertainment or amusement. The proposed tax would be imposed upon the broadcasting stations and networks—upon the producer, not upon the consumer, and would have a detrimental effect directly upon employees in the broadcasting industry. The only measure of the amount of the tax would be the amount of revenue, irrespective of the quantity or quality of amusement afforded to any listener. While perhaps radio offers more entertainment with the advertising it carries than do newspapers with their advertising, there is no substantial basis upon which an amusement tax levy could be made upon radio.

Another fact regarding radio advertising that is generally overlooked is the type of advertising carried by the radio which requires the services of many vocations, including not only technicians and engineers, but musicians, actors, script writers, announcers and others. The annual wage bill of radio broadcasting amounts to several millions annually.

In view of these facts, we submit that there can be no justifiable reasons for taxing radio time sales unless there is an equal rate of taxation on all other forms of advertising. A radio advertising tax alone would have a very serious effect upon the earning opportunities of the members of this organization employed in the broadcasting industry, as well as thousands of others in broadcasting and other allied industries. This situation would not prevail to such a degree if the tax is made applicable to all forms of advertising.

We would like to reiterate our statement before the Committee to the effect that we are not opposing any tax that may be necessary—so long as that tax is equitable and applies to all alike. We submit that the tax proposed on radio broadcasting in this bill is a punitive tax, unreasonable, discriminatory, and partaking of the character of class legislation, violative of the fundamental democratic principle of equality under law. It should be stricken from the bill.

**FCC Calls New Hearing on “Monopoly” Rules**

On August 14, 1941, Mutual Broadcasting System, Inc. filed with the FCC a petition requesting it to amend its regulations dealing with network option time and the term of affiliation contracts. This petition has been set for oral argument before the Commission on Monday, September 12, 1941 at 10 A.M. at a place hereafter to be announced. At that time the Commission will hear oral argument by Mutual Broadcasting System, Inc., and by any other licensees and network organizations who desire to be heard with respect to the chain broadcasting regulations as promulgated, the Mutual petition, or any other modification of any of the chain broadcasting regulations which those appearing desire to propose. All persons wishing to be heard are requested to file appearances with the Secretary of the Commission on or before September 10th. Written briefs may be filed on or before September 12th.

The chain broadcasting regulations will not be placed in effect with respect to existing affiliation contracts, or network organization station licenses, or the maintenance of more than one network by a single network organization, until after the disposition of the Mutual petition and of any other which may be filed.

Broadcast licensees will be afforded opportunity to adjust their operations to accord with rules with respect to chain broadcasting following the Commission's September 12 oral argument on petition of the Mutual Broadcasting System to amend same, the Commission said in a statement late Thursday.

Reasonable time will elapse after disposal of this and any other petition offered on that occasion before making such rules effective. This supplementary statement is issued in response to inquiries from the industry concerning possible Commission action in connection with this oral argument.
Priorities

As of Wednesday, August 27, this is the procedure to be followed by broadcasters possessing construction permits:

If a broadcaster needs every item of material and equipment to satisfy the construction permit, he should apply to Mr. Ward Freeman, Project Rating Section, Priorities Division, Office of Production Management, 462 Indiana Avenue, Washington, D. C., for a Project Rating. When, as and if granted this covers the entire bill of material.

In your letter, after advising Mr. Freeman that you are applying for a Project Rating, supply the answers to the following questions:

1—Owner or owners of the station.
2—Principal office of the broadcasting station.
3—Indicate the plant site.
4—Material produced. [Broadcaster can not fill this out.]
5—Justification of the project.
6—General description of the project.
7—Types and quantities of material and equipment required.
8—Number of certificate of necessity. [Disregard this as a broadcaster would not have such a certificate.]
9—Date of completion.
10—Cost.
11—Per cent completed now.

Now suppose the applicant has physical possession of part of the equipment, say transmitter plus some wire, etc. Under this circumstance the station is advised to fill out form PD-1. Attached to properly filled out PD-1s should be photostat copies of supporting data which would serve to indicate the necessity for the desired material.

A photostat copy of the CP should be attached to it, for example. If the station will be serving a substantial number of additional radio families, now denied regular service, this should be brought out in a letter. These and other things which demonstrate the need for station construction or improvements should be appended.

Full directions for returning the priorities form appear on the form itself. If not available in your city forms may be obtained by writing NAB or Information Division, Division of Priorities, Office of Production Management, 4th and Independence Avenue, Washington, D. C.

(Leon Henderson, OPACS director, announced that material would be allocated to keep in repair the nation's 50,000,000 receiving sets).

Engineering

RECORDING STANDARDS

A meeting of the Executive Committee of the Recording and Reproducing Standards Committee was held in New York City on August 20. Those present were R. M. Morris, NBC, Chairman; H. A. Chinn, CBS; C. Lauda, Jr., World; R. A. Lynn, NBC (guest); E. T. Mottram, Bell Labs; I. P. Rodman, Columbia Records; and L. C. Smeby, NAB, ex officio.

The Committee made a more detailed study of the answers to the NAB Recording Questionnaire (see Reports, p. 612, July 18). In order to proceed with the work of standardization, it is necessary to know what the present practice of the manufacturers is. The Committee, therefore, formulated a comprehensive questionnaire to be sent to all manufacturers for the purpose of obtaining this information. A time table was set up for the purpose of insuring that the results of the questionnaire will be tabulated for use at the next meeting of the main committee on October 23.

It was suggested that the adoption of standards might be expedited by dividing the items into three categories, (1) those already standardized by custom, (2) those upon which standardization is important, (3) those which fall into the class of "good engineering practice."

The Recording and Reproducing Standards Committee now has a membership of 58 including practically all the leaders in the field. The membership is as follows: Alliance Mfg. Co., P. M. Turner, Chief Engineer; Altec Service Corp., J. H. Littenberg; Associated Music Publishers, K. R. Smith, Chief Engineer; The Astatic Corp., J. R. Bird, Chief Engineer; Audio Devices, Inc., C. J. LeBel, Chief Engineer; Bell Telephone Laboratories, Inc., E. T. Mottram; Blackett-Sample-Hummert, Inc., Henry Rahmel, Studio Manager; David Bogen Co., Inc., Joseph B. Hersh, General Manager; Broadcast Productions, John Stamford, Owner; The Brush Development Co., Dr. S. J. Begun; C. K. Recorders, I. O. Clark, Manager; Central Broadcasting Co., WHO, P. A. Loyet, Technical Director (Representing NAB); Christensen Recording Studios, Carl A. Christensen, Owner; Columbia Broadcasting System, Inc., Howard A. Chinn (Representing NAB); Columbia Recording Corporation, I. P. Rodman, Director of Engineering; Electrical Research Products, F. C. Schmid, Licensing Engineer; FM Broadcasters, Inc., Samuel Waite; Federal Recorder Co., Inc., Jack Seidel, Head, Recorder Division; Federal Transcribed Programs, Inc., A. Ralph Steinberg, President; Film Associates, Ray Arn, Owner; General Communication Products Company, R. J. Thompson, Chief Engineer; General Sound Corporation, Edgar P. Kampi, President; Gray Manufacturing Co., H. T. Stenhammer, Director of Research; Lillian Gurdoni Radio Productions, Stan Gurdoni, Recording Engineer; Harvard University, Frederic V. Hunt; Hollywood Recording Co., John Hirsch, Owner; Illinois Educational Sound Service, R. W. Danron, Owner; John D. Keating, John D. Keating, Owner; Kermit-Raymond Corporation, Raymond R. Green, General Manager; Mirror Record Company, Paul K. Trautwein; C. P. MacGregor Transcription Company, Arthur Q. Felthenausen, Chief Engineer; Memovox, Inc., Sigurd A. Sollic, Sales Manager; Miller Bros. Recording Studio, Ross J. Miller, Partner; Musicraft Records, Inc., Earl Carter, Engineer; National Association of Broadcasters, Lynne C. Smeby, Director of Engineering; National Recording Company, Inc., Robert M. Morris, Business Manager Radio Recording; Pacific Sound Equipment Co., Inc., Robert G. Metzer, President; Permo Products Corporation, F. M. Hummel, Sales Engineer; Photo & Sound, Inc.; Poinsettia, Inc., Earl P. Carter; Presto Recording Corporation, George J. Saliba, President; B. A. Proctor Company, Inc., B. A. Proctor, President; Radiad Service; RCA Manufacturing Co., Inc.; E. T. Dickey, (Representing RMA); Radio Features of America, Oliver W. Nicoll, Director Program and Production; Reeves Sound Studios, Inc., Hazard E. Reeves, President; Rck-O-Kut Corporation, George Silber; Robinson Recording Laboratories; J. P. Seeburg Corporation, Hugh Davis, Engineering Department; Shure Brothers, Benjamin B. Bauer, Chief Engineer; Star Record Company; Technasonic Recording Lab., James M. Althouse, Chief Engineer; United Artists Bureau, R. B. Eaton, General Manager; Universal Microphone Co., Ltd., Ralph L. Power, Ph.D., Promotion Manager; Thomas J. Valentino, Inc., T. J. Valentino, Sales Manager; Western Sound & Electric Lab., Inc., Edward M. Dieringer, President; WGAR, Morris Pierce, Chief Engineer, (Representing NAB); World Broadcasting System, Charles Lauda, Jr., Plant Manager.

Chairman—Lynne C. Smeby.

Executive Committee—Howard A. Chinn; C. Lauda, Jr.; Robert M. Morris, chairman; E. T. Mottram; I. P. Rodman.

Interference from Trucks

The automobile or motor truck in ordinary operation is a rough-and-ready broadcasting station and interferes seriously with short-wave radio communications, according to radio experts of the Department of Commerce.

Most motorists are unaware of the annoyance they cause as they drive along city streets. However, radio broadcasting companies, radio manufacturers, government experts in the communications field and automotive engineers are fully alive to the problem.

One leading broadcasting company has conducted a series of tests and made a large number of measurements to determine the
extent of interference from different types of ignition systems installed in motor vehicles.

A special committee set up by the American Standards Association is giving the problem close attention. A committee of engineers appointed by the Radio Manufacturers Association also is actively at work and a committee of automotive engineers is cooperating.

One way to eliminate interference of this kind is to place a shield over the spark plugs and other exposed parts of motor vehicle ignition systems. Experiments along this line are understood to have eliminated the interference at least to a large extent. Other means have been devised.

This type of interference is understood to be especially serious in television operations. Even frequency modulation, designed to eliminate much of the interference normally encountered in radio communications, is said to be affected under certain conditions.

Technical experts of the Federal Communications Commission, the National Bureau of Standards and other interested government agencies are keeping in touch with developments.

Sales Managers Executive Committee Meets

The Sales Managers Executive Committee met in New York Monday and Tuesday to discuss industry sales problems and plan a coast-to-coast series of district sales meetings.

Presiding was Chairman Gene Carr, WAGAR, Cleveland, and committee members present were John Butler, WSB, Atlanta, representing large stations; E. Y. Flanigan, WSPD, Toledo, medium stations; Robert Mackenzie, WCMF, Ashland, Ky., small stations; George Frey, NBC; Arthur Hayes, CBS, and Linus Travers, WAAB, Boston, representing Mutual-affiliated stations; C. E. Arney, Jr., and Frank E. Pellegren attended from NAB headquarters.

Problems discussed included station affidavits, local and national rates, surveys and coverage maps, dealer-cooperative advertisers, visual presentations, per-inquiry and free time requests, handling of commercial mail, merchandising and station promotion, program schedules and similar matters. As a result of the meeting closer cooperation was pledged by the Time Buyers association in helping to solve mutual problems, in line with the theme set by the sales managers committee "to make it easier for more clients to buy more time on more stations."

Full details on specific action and recommendations will be sent each sales managers' district chairman, to be presented to the NAB membership at the forthcoming district meetings.

BMI

Joining the Parade

The Kiwanis Club of Rockland, Massachusetts; the Chamber of Commerce of Alma, Michigan; the Lions Club of Ridgewood, Brooklyn, New York; and the Chamber of Commerce of Lancaster, Pennsylvania, have all notified BMI that they plan to adopt Hi, Neighbor as a "break the ice" song to open their luncheons and meetings.

Dr. Benjamin Lelyveld, Secretary of the Kiwanis Club of Rockland, Massachusetts writes:

"At our meeting this week our club adopted the song Hi, Neighbor for our club song."

"As a former professional dance pianist I can say that the work you seem to be doing both in this direction and in the way of backing unknown composers is of distinct advantage to the musicians of the country."

Hi, Neighbor is climbing rapidly up the list of most-played numbers. It ranks 19th in network performances for the week ended August 24.

BMI's Lusty Infant

Radio Tunes, BMI's brain baby, is off to a good start with its first tune I See A Million People showing up on the list of network favorites. The tune is by the same team that wrote the highly successful Walking By the River. The theme, a romantic natural for these times, or for any times, is based on the idea that there are millions of people in fancy, but in reality only two.

Bob Sour, who wrote the lyric, has proven his ability time after time to touch the heartstrings. Una Mae Carlisle, the composer, who is rapidly gaining popularity as a singer and orchestra leader, has a rare gift for melody.

Recordings have been made by Miss Carlisle, Teddy Powell, Cab Callaway, Jan Savitt, and Benny Goodman. Billboard has the following comment to make on the tune: "I See A Million People shows possibilities and should definitely be stocked."

Swell Place

The United States War Department has selected BMI's It's A Swell Place To Be as the official song of the Ravenna Arsenal of Ravenna, Ohio. Plans call for the use of the song at other locations where defense projects are under way. The writers are Marsh Crosley of Akron, Ohio, and Bill Wirges of New York.

Britain is Catching Up

Indication that the British know a good song when they hear one is offered in their acceptance of I Hear A Rhapsody. Rhapsody has just arrived on the British list of best sellers and is climbing rapidly to the top.

Alexander in the Movies

Alexander the Swoose, hero of the song of the same name, has joined the cast of Hedda Hopper's Hollywood, a Paramount picture featuring Kay Kyser and his band, to be released on September 16th. World premier of the picture will be held at the Milwaukee American Legion Convention.

Inside Stuff

Illustrative of the opportunity BMI has brought to those in the music business who did not share in the ASCAP distribution is a story in the current Variety about a song plugger who has become the publisher of "what looks like a smash hit."

"He was without a job for over a year prior to the ASCAP-radio split," says Variety, "and had been living on relief money obtained from the industry's benevolent organization. Professional Music Men, Inc. His break came when an ASCAP firm agreed to return the song in question to the writers because of the firm's inability to exploit the number on the networks. The unemployed plugger soon fell heir to the song and licensed it for radio through Broadcast Music, Inc. A band leader recorded the tune and included it consistently in his remote broadcasts. In quick time three other bands put the song on wax. Recently an ASCAP publisher offered the plugger $5,000 for outright transfer of the number, but the ex-reliefer turned the proposition down."

There is no way of estimating how many publishers and employees of publishers have found opportunities through BMI. But if we made a rough guess of an average of ten employees per club one could quickly arrive at the number.

Co-eds, Touchdowns, and Siss Boom Bah!

Broadcasters are all set to play BMI football this year with You Made a Touchdown in My Heart, Georgette the Majorette,
and Siss Bouw Barbara Brown in the backfield and a new top tune by a prominent writer, A Pretty Co-ed Has Gone to My Head as Center. The writer of the words and music is Captain Paul Fogarty, a producer at WGN. Captain Fogarty crashed through to the big time a few years ago with his Betty Co-ed. Asked about his own football experience the Captain contributes the following verse which he wrote and the Chicago Tribune published:

Substitute '93
(Friday Night)

I'm a ninth string sub on the varsity club.
My number is old '93.
And I realize that just ninety-two guys
Are quite a bit better than me.
But my gal thinks I'm the best back of all time.
Another Red Grange more or less.
And if she's her way, she'll be there Saturday,
So, brother, I'm sure in a mess.
The first thing she'll miss is my name on the list,
Of players who MIGHT get to play.
Guess I went too far, when I said I would star,
That's why I'm unhappy today.
The head coach don't know if I'm Tom, Dick or Joe.
He spoke to me once—saying "Hi."
Tho I did infer in my letter to her,
That I kinda apple'd his eye.
Well, alack-alas, I'll be there on the grass,
At gametime—with chin on my knee.
Well, if she's her way, she'll be there Saturday,
And I realize that just ninety-two guys
My number is old '93.
For substitute—old '93.

(Saturday Night)

Well, I guess my name made the gallery of fame,
That drop kick of mine saved the day.
I'm the fair haired lad—just a kid Galahad,
No one can take your place, the years will not erase
The longing and the pain,
It wakes anew, my longing and my pain.
I hear the melody, that once you sang to me,
Remember dear, my love for you w'ill always be the same.
If you keep it mum, I will tell you how come,
Indicative of the manner in which stations are able to serve their local citizenry, WSTV, Steubenville, Ohio, has just begun the broadcast of a series of programs on Americanism. Wednesdays at 8:00 p.m. Featured on the program are persons from real life who tell their story. Cooperating is the Ohio office of WPA.

Stars and Stripes Forever

"Stars and Stripes Forever" is the name of a new strip program just started over KGDF, Coffeyville, Kan. Melvin Drake, manager, has planned to incorporate several of the national defense spots in each show along with transcribed band music.

"Send 'em — We'll Air 'em"

Says Robert Bentley, patriotic director, WCPO, Cincinnati, Ohio: "Thanks for the new Keep 'em Flying spots. 'Keep 'em Flying' to us, please, and we'll keep 'em on the air."
**WGAR’s “War” Coverage**

John Patt, vice president and general manager, WGAR, Cleveland, is firmly convinced that the production of the station’s series of transcriptions from Army camps is a definite public service to listeners and he is sparing no effort or expense to back up his contention. Since last spring a staff of engineers and representatives of Carl George’s program department have covered Camp Claiborne, Camp Shelby, Fort Knox, Selfridge Field, Chanute Field and the Naval Stations at Grosse Isle, Michigan and the Great Lakes Base at Great Lakes, Illinois.

At the present time the men are at Wright and Patterson Field. Early in September David Baylor, who has been in charge of these broadcasts, will leave for the Louisiana war games to setup coverage for WGAR’s listeners. A few days later he will be followed by three engineers and Program Director George. They plan not only to take their recording equipment but also the short wave mobile unit so as to be able to pick up broadcasts on the run. Transcriptions will be air expressed back to Cleveland. With proper plane connections broadcasts will be on the air within eighteen hours.

**Coal Campaign**

From as far west as KUTA, Salt Lake City, Utah, letters favorable to the coal campaign, details of which were released to stations on August 20, have been received.

Says Jack A. Burnett, account executive, KUTA: “Your folder ‘Coal Dealers Can Prevent a Coal Tie-Up This Winter by Acting Now’ has been very well received here.”

Federal officials concerned with the coal campaign assured us, this week, that there is an ample supply of coal in every section of the country for dealers to work on. Because of the flood of publicity about shortages in most materials it is fortunate that no shortage of coal exists now. The shortage will show up some two or three months in the future. By storing coal in the bins of the ultimate consumers, coal dealers will be doing a service to their customers and to the country.

**ANY SCRIPTS!**

The U. S. Office of Education has requests from several broadcast stations for scripts on the subject of vocational defense training. That office would like to send scripts that have already been tested on the air. It will be appreciated by William D. Boutwell, director, information service, U. S. Office of Education, Washington, D. C., if broadcasters having such scripts will forward them to him with a note giving him permission to supply them to these other stations.

**PROMOTION**

At WCBS, Springfield, Ill., there is a utility program that is now in its fourth year and which, according to Jack Heintz, manager, “is practically an institution as we have almost forgotten it is a commercial show.”

At our request Mr. Heintz has written several paragraphs concerning this program in the belief that they may prove helpful to other broadcasters with or without utility sponsorship.

The program is known as “Homemakers Institute.” Frequent guest speakers are local persons of interest and representatives of various food companies. It is scheduled each Wednesday afternoon, 2:30-3:00 p.m., CST, and always broadcast before a capacity audience. Always, people from a dozen to several hundred, are turned away. Seats are provided for two hundred.

The homemakers program has always been informal and conducted in a “homey” sort of way. It even permits an open forum discussion for thirty minutes after the broadcast is off the air.

“From our point of view and that of the utility, the Central Illinois Light Company,” he said, “it is most gratifying that there is a constant and large turnover of audience, despite the fact that there is always a portion of the audience that come back each week.”

**RESTRICTS VISITORS**

Chairman James Lawrence Fly of the Defense Communications Board has addressed notices to all persons engaged in the wire or radio communications industry, including manufacturing, directing attention to the following resolution adopted by the Defense Communications Board restricting access to communication plants and stations:

“WHEREAS on account of the importance to national defense of the plants and facilities of the communications industry it appears desirable to restrict free access thereto;

“BE IT THEREFORE RESOLVED that all persons engaged in the wire or radio communications industry, including manufacturing, be requested to take all measures necessary to ensure that access to premises containing communications equipment or facilities (other than the premises necessarily open to the general public) be restricted to employees, federal, state, or local government officers, acting in their official capacity, and other persons considered necessary by the management in the conduct of its business;

“BE IT FURTHER RESOLVED that all persons engaged in the wire or radio communications industry, including manufacturing, be requested to exclude representatives of any foreign government, persons, associations, or corporations, from access to the premises containing communications equipment or facilities (other than premises necessarily open to the general public) except only upon express permission granted at the direction of the Defense Communications Board.”

**COST OF LIVING**

Another rise in living costs for wage earners and lower salaried workers in the larger cities was reported for the month ended July 15 by the Labor Department. The increase was 0.6 per cent, making the total increase almost 7 per cent since the outbreak of the war. The department’s index July 15 stood at 105.2 per cent of its 1935-39 average.

**FEDERAL COMMUNICATIONS COMMISSION DOCKET**

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, September 1. They are subject to change.

**Wednesday, September 3**

WGST—Georgia School of Technology, Atlanta, Ga.—Renewal of license (main and auxiliary), 920 kc., 1 KW night, 5 KW LS, unlimited time.

**Friday, September 5**

KFNF—KFN, Incorporated, Shenandoah, Iowa.—Renewal of license, 920 kc., 500 watts night, 1 KW day, share KUSD.

**FUTURE HEARINGS**

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

**September 15**

KPAC—Port Arthur Collee, Port Arthur, Texas.—Modification of license, 1250 kc., 1 KW, unlimited time, DA-night.

**Consolidated Hearing**

NEW—Dorman Schaeffer, Klamath Falls, Oregon.—C. P., 1100 kc., 250 watts, unlimited time.

**October 3**

Southern Calif. Broadcasting Co., Pasadena, Calif.—Granted construction permit (B5-P-3108) for a new station to operate on 1150 kc., 1 KW, daytime only. Exact site to be determined, subject to Commission's approval.

Washington Broadcasting Co., Washington, D.C.—Granted petition for reconsideration and grant without hearing the application for a new station; cancelled hearing heretofore scheduled, and granted construction permit to operate on 1450 kc., 250 watts, unlimited time.

Seaboard Radio Broadcasting Corp., Philadelphia, Pa.—Granted construction permit for a new (FM) station to operate on frequency 15100 kc., for commercial FM broadcasts; covers 9300 square miles; population 3,000,000.

KONO—Mission Broadcasting Co., San Antonio, Texas.—Granted modification of license (B3-ML-1085) to increase hours of operation to unlimited time. Facilities of KMAC when that station goes on new frequency. (Station KONO now operates on 1470 kc., 250 watts day and night; shares with KMAC).

KPQ—Westcoast Broadcasting Co., Wenatchee, Wash.—Granted construction permit (B3-P-3150) to install a new transmitter and antenna, increase power to 500 watts night, 1 KW day, and change frequency to 360 kc. (now operates on 1450 kc., 250 watts unlimited time).

WCNX—Central Broadcasting Co., Mitchellville, Iowa.—Granted modification of construction permit (B4-MPEX-5) to change frequency to 1040 kc. (under NARBA), make changes in antenna system and extend completion date to 150 days after grant (now has construction permit for new development). broadcast station to use 1000 kc., A1 emission; 150 KW night and day; hours of operation, 12 midnight to 6 a.m., CST).

WRN—Richmond Radio Corp., Richmond, Va.—Granted construction permit (B2-P-2995) to install a new transmitter, erect directional antenna for night use only, and increase power to 5 KW. (Now operates on 910 kc., 1 KW unlimited time, DA).

WIBG—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Granted construction permit (B1-P-3207), subject to reconsideration and grant without hearing the application for renewal of license, and for authority to transfer control; employ directional antenna both day and night, increase power to 10 KW, day and night, unlimited time, move transmitter to Waverly & Church Roads, Cheltenham Twp., Penna., and move studio to site to be determined in Philadelphia area. (Now operates on 990 kc., day time, and 1050 kc., night time).

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Granted special service authorization (B5-SSA-5), to operate on 1240 kc., 250 watts unlimited time. (Now operates on 1100 kc., 100 watts night and day; shares with KQKO; and construction permit for 1240 kc., 250 watts unlimited).

WBAX—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Granted petition to reconsider and grant without hearing the application for renewal of license and for authority to transfer control; cancelled hearing heretofore scheduled on renewal application; and granted renewal of license to operate on 980 kc., 1 KW, daytime only; and consent to transfer control of Seaboard Radio Broadcasting Corp. from Joseph M. Nassau, James A. Nassau, John Morgan Davis, Theo. H. Elsner, Edward D. Clery, Jack Compier, Margaret R. Collins, and Lula Vere K. Shiftz to Paul F. Harron, Joseph Lane, John B. Kelly, and Anthony J. Drexel Biddle, Jr.

WNOX—Scripps-Howard Radio, Inc., Knoxville, Tenn.—Granted modification of construction permit (B3-MP-1368) subject to proof of performance, to make changes in equipment and for approval of directional antenna. (Has construction permit for 990 kc., 10 KW, unlimited time, DA-N).

RENEWAL OF LICENSES

WBNX—WBNX Broadcasting Co., Inc., New York City.—Granted renewal of license for the period ending August 1, 1942.

WFR—Onondaga Radio Broadcasting Corp., Syracuse, N. Y.—Granted renewal of license for the period ending August 1, 1942.

The following stations were granted further extensions of licenses on a temporary basis only, for the period ending October 1, 1941, pending determination upon applications for renewal:

WCNW, Brooklyn, N. Y.; WHK, Cleveland, Ohio; WIRE and auxiliary, Indianapolis, Ind.; WAKAT (Aux.) Miami Beach, Fla.; WORK, York, Pa., and WWR, Woodside, L. I., New York.

WZXP—City of New York, Municipal Broadcasting System, New York City.—Present high frequency broadcast station license was further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1941.

WXL—KLZ Broadcasting Co., Denver, Colo.—Present high frequency broadcast station license was further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1941.

WZAX—WKY Radio Broadcasting Corp., Okloma City, Okla.—Present high frequency broadcast station license was further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1941.

DETERMINED FOR HEARING

Northeastern Penna. Broadcasters, Inc., Wilkes-Barre, Pa.—Construction permit (B2-P-3221), for new station to operate on 1210 kc., 250 watts, unlimited time. Requests facilities of WBAX.

Key Broadcasters, Inc., Wilkes-Barre, Pa.—Construction permit (B2-P-3222), for new station to operate on 1210 kc., 250 watts, unlimited time. Facilities of WBAX.

Central Broadcasting Co., Wilkes-Barre, Pa.—Construction permit (B2-P-3218), for new station to operate on 1230 kc., 250 watts, unlimited time. Requests facilities of WBAX. Exact site and antenna system to be determined subject to Commission's approval. (All three of foregoing applications for the 1210 channel to be heard jointly.)

MISCELLANEOUS

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Granted petition for extension of termination date of petitioner's temporary license for operation of station WBAX, and extended license from September 1 to November 1, 1941.

Peter O. Nye, Alexandria, Va.—Dismissed petition for rehearing directed against the action of the Commission on June 24, 1941, granting without hearing the application of Long Island Broadcasting Corp., Brooklyn, N. Y., for construction permit to increase power of station WWRL from 250 watts to 5 KW, install new transmitter and vertical antenna, and use frequency 1690 kc, unlimited time.

KFJM—University of North Dakota, Grand Forks, N. Dak.; Dalton LeMasurier, Grand Forks, N. Dak.—Granted petition to reconsider and grant without hearing the application of KFJMJ for renewal of license and for modification of license to change operating time from unlimited to 2 hours a day, 3 to 5 p.m.; together with application for construction permit for LeMasurier to operate station all but the two hours used by the University. (Station operates on 1410 kc., 500 watts, Unlimited Time, DA-N.)

Western Mass. Broadcasting Co., Pittsfield, Mass.—Adopted order removing application for a new station from the hearing docket and placing same in pending file pursuant to Order No. 70.
APPLICATIONS FILED AT FCC

570 Kilocycles

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—Construction permit for reinstatement of construction permit (B4-P-2579) as modified for installation of directional antenna for night use, and increase in power from 1 and 5 KW to 5 KW day and night.

WCHS—Charleston Broadcasting Co., Charleston, W. Va.—Construction permit to install new transmitter and increase power from 5 KW to 5 KW night, 10 KW day.

August 29, 1941 — 719
590 Kilocycles
WKZO—WKZO, Incorporated, Kalamazoo, Mich.—Construction
permit for increase in nighttime power from 1 to 5 kW
and make changes in directional antenna for night use.

680 Kilocycles
WPTF—WPTF Broadcasting Co., Raleigh, N. C.—Construction
permit to make changes in equipment (tubes in last radio stage).

810 Kilocycles
NEW—Fred C. Morgan, Harrison Eiteljorg, Roger A. Beane, d/b
as Hooier Broadcasting Co., Indianapolis, Ind.—Construction
permit for a new broadcast station to be operated on
810 kc., 250 watts and daytime hours of operation.

850 Kilocycles
WHDH—Matheson Radio Co., Inc., Boston, Mass.—Modification
of construction permit (B1-P-2201) for new transmitter,
directional antenna for night use, increase in power and
hours of operation, requesting changes in transmitting equipment.

860 Kilocycles
KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Modification
of construction permit (B5-P-2631) for 860 kc.,
1 kW, daytime or unlimited time provided directional
antenna installed and transmitter site approved, requesting
new transmitter, directional antenna for night use, 1 kW,
limited time and approval of transmitter site.

1150 Kilocycles
WISN—Hearst Radio, Inc., Milwaukee, Wisc.—License to cover
construction permit (B4-P-2608) as modified, for transmi-
mitter, installation of directional antenna for day and night
use, increase in power and move of transmitter.

1180 Kilocycles
WLDS—Hobart Stephenson, Milton Edge, Edgar J. Korsmeyer,
d/b as Stephenson, Edge and Korsmeyer, Jacksonville, Ill.—Modification
of construction permit (B4-P-2465) for a new broadcast
station, requesting change in type of transmitter, approval
of transmitter and studio sites and approval of antenna.

1240 Kilocycles
NEW—Charles P. Blackley, Staunton, Va.—Construction permit
for a new broadcast station to be operated on 1240 kc.,
250 watts, unlimited hours.

1250 Kilocycles
WTMA—Atlantic Coast Broadcasting Co., Charleston, S. C.—
Modification of construction permit (B3-P-2985) as modified
for installation of directional antenna for night use, new
transmitter, change frequency, increase in power and
move of transmitter, requesting changes in directional
antenna system.

WTMA—Atlantic Coast Broadcasting Co., Charleston, S. C.—
Modification of construction permit (B3-P-2985) as modified
for new transmitter, installation of directional antenna
for night use, change in frequency, increase in power and
move of transmitter, requesting an extension of completion
date from 9-21-41 to 1-21-42.

WGNY—WGNY Broadcasting Co., Inc., Newburgh, N. Y.—
License to cover construction permit (B1-P-2948) as modified,
for change in frequency, power and new transmitter.

WGNY—WGNY Broadcasting Co., Inc., Newburgh, N. Y.—
Authority to determine operating power by direct method.

1290 Kilocycles
KUOA—KUOA, Inc., Siloan Springs, Ark.—Authority to install
automatic frequency control equipment.

KOIL—Central States Broadcasting Co., Omaha, Nebr.—Modification
of construction permit (B4-P-2609) for installation
of directional antenna for night use, increase night power,
requesting extension of completion date from 8-29-41 to
10-28-41.

1320 Kilocycles
WJHP—The Metropolis Co., Jacksonville, Fla.—Construction permit
for change frequency from 1320 to 640 kc., increase power from 250 watts to 50 kW, install new transmitter and directional antenna for day and night use and move transmitter from Jacksonville to Marietta, Fla.

KLCN—Fred O. Grimwood, Blytheville, Ark.—Modification of
construction permit (B3-P-3037) for installation new trans-
mitter and antenna, increase in power and move transmitter,
requesting change in frequency from 1320 to 950 kc.,
and make changes in transmitter.

1340 Kilocycles
NEW—J. E. Rodman, Fresno, Calif.—Construction permit for
a new broadcast station to be operated on 1340 kc.,
250 watts and unlimited hours. (Requests facilities KARM.)

1350 Kilocycles
KSRO—Ernest L. Finley, Santa Rosa, Calif.—License to cover construction permit (B5-P-2916) as modified, for new transmitter and directional antenna for day and night use and change in frequency.

KSRO—Ernest L. Finley, Santa Rosa, Calif.—Authority to determine operating power by direct method.

1380 Kilocycles

and J. S. McBeath, d/b as Brown County Broadcasting
Co., Brownwood, Texas.—License to cover construction permit (B3-P-2672) as modified for a new station.

KBWV—Wendell Mayes, Joe N. Weatherby, B. P. Bludworth
and J. S. McBeath, d/b as Brown County Broadcasting
Co., Brownwood, Texas.—Authority to determine operating power by direct method.

1400 Kilocycles
NEW—Bartlesville Broadcasting Co., Bartlesville, Okla.—Construction permit for a new broadcast station to be operated on 1400 kc., 250 watts, unlimited hours.

KELD—Radio Enterprises, Inc., El Dorado, Ark.—License to cover construction permit (B3-P-3123) for changes in transmitter and directional antenna for day and night use.

KTUC—Tucson Broadcasting Co., Tucson, Ariz.—Construction permit to install new transmitter and antenna and move studio and transmitter.

1410 Kilocycles
WNBC—State Broadcasting Corp., New Britain, Conn.—License to cover construction permit (B1-P-2723) as modified for changes in equipment, increase in power and changes in directional antenna for day and night use.

WNBC—State Broadcasting Corp., New Britain, Conn.—Authority to determine operating power by direct method.

1440 Kilocycles
NEW—Edward Tom O'Brien, David Shepard, Howard S. Johnson,
and John W. Boler, a partnership, d/b as Brainerd-Bemidji
Broadcasting Co., Brainerd, Minn.—Construction permit for a new broadcast station to be operated on 1550 kc., 1 kW, unlimited time. Amended: to change frequency from 1550 (1600 NARBA) kc. to 1400 kc., reduce power to 250 watts, change type of transmitter and make changes in vertical antenna.

1490 Kilocycles
KVCA—Southwest Broadcasting Co., Prescott, Ariz.—Acquisition of control of licensee corporation by K TAR Broadcasting Co., through purchase of 65 shares common stock from Albert Stetson.

FM APPLICATIONS
NEW—Globe-Democrat Publishing Co., St. Louis, Mo.—Construction permit for a new high frequency broadcast station to

720 — August 29, 1941
be operated on 41700 kc.; coverage: 15,850 square miles; population: 1,858,665. Amended: to change coverage to 13,083 square miles and population to 1,766,560.

NEW—Portland Broadcasting System, Inc., Portland, Me.—Construction permit for a new high frequency broadcast station to be operated on 41100 kc.; coverage: 5,050 square miles; population: 256,466. Amended: to change coverage to 3,980 square miles.

K53LA—Standard Broadcasting Co., Los Angeles, Calif.—Modification of construction permit (BS-PH-32) for a new high frequency broadcast station for changes in antenna system and change in studio location.

MISCELLANEOUS APPLICATIONS

NEW—Commercial Radio-Sound Corp., Portable-Mobile.—Construction permit for a new Class II Experimental Public Address Relay Station to be operated on 162800 kc., 1/10 watt, special emission for frequency modulation.

W8XO—The Crosley Corp., nr. Mason, Ohio.—Construction permit to make changes in equipment and increase power from 100000 and 500000 watts to 100000 and 750000 watts.

NEW—Wichita Broadcasting Co., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 50820, 53740, 55820, 57890 kc., 2 watts, A3 emission.

WNBT—National Broadcasting Co., Inc., New York, N. Y.—Modification of license to increase power of the aural transmitter from 2200 watts to 2800 watts.

FEDERAL TRADE COMMISSION ACTION

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Life Savers Corporation, Port Chester, N. Y., is charged with violation of the Robinson-Patman Act through price discrimination and through allowances made to some of its retailer customers for services and facilities furnished by them in the sale of the respondent's confection product "Life Savers." (4571)

Par-A-Pac Company—Arnold Thompson and Joyce Kittinger, trading as Par-A-Pac Company, 521 Fifth Ave., New York City, engaged in the sale and distribution of a non-medicated pad or device designated as "Par-A-Pac" and "Par-A-Pac Natural Heating Pad," are charged, in a complaint, with misrepresentation. (4568)

Queen Chemical Company—A complaint has been issued charging Charles Shrader, trading as Queen Chemical Co., 126 Arden Road, Mount Lebanon, Pittsburgh, with misrepresentation in the sale of a drug preparation known as "Shrader's Queen Brand Capsules" and as "Queen Brand Capsules." (4570)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders during the past week.

Chincho Products Institute, Inc., 10 Rockefeller Plaza, New York City, a New York Corporation, has been ordered to cease and desist from misrepresentation in advertising the drug quinine. (4398)

Disabled American Veterans of the World War Rehabilitation Dept.—Use of the corporate name "Disabled American Veterans of the World War Rehabilitation Department" by a Chicago corporation selling historical books, or representing in any manner that such corporation is identical to, identified with, or is a constituent part of the Disabled American Veterans of the World War, a national patriotic organization, is prohibited under a cease and desist order issued against the Chicago corporation and four of its officers, Frank J. Mackey, L. C. Maier, Daniel C. Moore and Robert T. Mackey. (4492)

William Clarence Ohlendorf, trading under the names W. C. Ohlendorf, Clarence Ohlendorf, C. Ohlendorf and Dr. Ohlendorf, 1924 Blue Island Ave., Chicago, has been ordered to cease and desist from misrepresentation in the sale and distribution of a medicinal preparation. (4079)

Peoples Hardware Stores—Domenico Del Vecchio, trading as Peoples Hardware Stores, 1434 Florida Ave., N. E., Washington, dealer in paints and other commodities, has been ordered to cease and desist from misrepresentation that he manufactures the paint products he sells and that he offers them at savings of 20 per cent to 35 per cent or at any other savings in excess of the actual savings available from the prices charged by competitors for similar products. (4495)

Reed-Harlin Grocer Company—Prohibiting violation of the brokerage provision of the Robinson-Patman Act, a cease and desist order has been issued against the Reed-Harlin Grocer Co., West Plains, Mo., which operates branch warehouses in Missouri and Arkansas; against John R. Reed and Orr M. Reed, trading as West Plains Brokerage Co., West Plains, Mo., and against six companies found to have sold merchandise to Reed-Harlin Grocer Co. through the brokerage firm. (4486)

STIPULATIONS

During the past week the Commission has made public the following stipulations:

Continental Diamond Company—W. K. Quinn and C. E. Quinn, trading as Continental Diamond Company, Beloit, Wisc., engaged in selling various articles of jewelry, the jewelry being for the most part simulated diamond rings, have stipulated to cease and desist from using the terms "free," "gift" or "free of extra cost" or other terms of similar meaning to describe a wrist watch or other article of jewelry included in a combination offer with simulated diamond rings or similar articles of merchandise; from representing by use of the word "diamond" or any abbreviation thereof, as part of their trade name, that they sell diamonds; from representing that a man's wrist watch advertised and sold by them is shock proof, or from the advertising or sale of finger rings marked in any manner so as to exaggerate or otherwise misrepresent the total or relative amount or fineness of gold therein contained. (02867)

Dr. Deederer Products—Dr. Carlton Deederer, trading as Dr. Deederer Products, Miami, Fla., stipulated to cease certain representations in the sale of "Vitamina," an oil extracted from sharks' livers, and in the sale of the "Vitamina [sic], a device for determining Vitamin A deficiency. (02861)

August 29, 1941 — 721
Reclaimo Manufacturing Company—William Schwalge, trading as Reclaimo Manufacturing Company, 2306 North Western Ave., Chicago, engaged in selling an oil filter designated “Reclaimo,” has stipulated to discontinue representing that no other device than Reclaimo removes kerosene and distillate from motor oil, or that no other such device applies heat from the exhaust manifold, or that Reclaimo is the only oil filter refiner available for use on automobiles, trucks, tractors or diesel engines, or that the National Bureau of Standards recommends oil reclaiming. (02866)

Saliis Laboratory, Inc., trading as Italian Imperial Company, 644 Pacific St., Brooklyn, engaged in selling a medicinal preparation designated “Tonico Del Cappuccino,” has stipulated to cease and desist from representing that the preparation has been approved by legal authorities; that it is a general tonic or possesses other than bitter tonic properties, or will cause one to gain weight or possesses any value as a weight builder in excess of that of a stomachic or stimulant to the appetite; that the preparation is indispensable for children or helps their growth; or that it possesses any therapeutic value in excess of that of a stomachic or stimulant to the appetite. (02868)

Stop-Lite Products, Incorporated, 849 South 6th East St., Salt Lake City, engaged in selling three drugs designated “Stop-Lites,” “Haps,” and “Anti-Acid Tablets,” has stipulated to discontinue representing that the tablet preparation designated Stop-Lites relieves a cold or is a remedy or cure for a cold, or that it is of any benefit in the treatment of a cold or rheumatism beyond inducing laxation and affording temporary relief from the physical discomfort symptoms incident to or associated therewith; or that Stop-Lites are different from any other product intended for the same purpose and use; or that they constitute an effective internal antiseptic; or that Anti-Acid Tablets aid digestion. (02862)

Supreme Publications—Morris N. Beitman, trading as Supreme Publications, 3727 West 13th St., Chicago, has entered into a stipulation to cease certain representations in the sale of a book entitled “Complete Authorized Radio Servicing Course.” (02860)

Vita Health Food Company—Walter Camp and Werner Orbach, trading as The Vita Health Food Co., American Health Products Company, and Eastern Health Food Stores Assn., 3040 14th St., N. W., Washington, D. C., have stipulated to cease certain representations in the sale of food products and medicinal preparations designated “Almano,” “Bro-Sik,” “Cali-Kelp Tablets,” “C-Veg-Salt,” “Dalmatian Sage Leaves,” “Nutrolac,” “O-Pep-O-Mint,” “Pomona Grape Juice” and “Seven Herbs Laxative.” (02863)
The new federal tax bill—minus the radio time sales tax adopted by the House—was on the Senate floor for debate this week. After the Senate completes its version, the bill will be referred to a conference committee made up of members of the Senate Finance and House Ways and Means committees. This conference committee will iron out the differences between the Senate and House versions. The House conference might insist that the radio tax be retained.

These House conference probably will be chosen from among the senior members of the Ways and Means committee. The senior Democrats are Doughton, Cullen, Cooper of Tennessee, Boehne, Disney and Buck. The Senior Republicans are Treadway, Crowther and Knutson.

Remember that our fight on this discriminatory super tax on broadcasting is not yet won. The tax still remains in the measure as it was passed by the House—and the House could get it back into the Senate bill and into the final law.

The NAB is continuing its all-out opposition to the tax, but help back home is needed now, just as much as ever.

Let your Senators and Representatives know how you feel about this tax on their radio stations—and get others to do so as well.

There is a possibility of a round-table conference in connection with a franchise radio tax, James Lawrence Fly, FCC Chairman, told a press conference on Tuesday. In answer to questions Mr. Fly said that he had not prepared any such tax and that the Commission did not have plans in a concrete form. He said, however, that he thought such a tax would be worked out eventually and that broadcasters had indicated a sympathetic interest. (The NAB is opposed to a franchise tax unless and until all federally regulated industries are similarly taxed.)

Mr. Fly told the newsmen that he hadn't yet talked with representatives of other portions of the communications industry but he didn't think there will be any great difficulty. Any such plan, he stated, would have to be worked out with the Treasury Department.

Mr. Fly stated that it might be rather difficult to work out such a plan in order to arrive at any formula as the basis for such a tax. In answer to a question, the Chairman declared that such proposals would include the entire communications industry with the probable exception of amateurs and like services. In this way he stated the tax would be spread throughout communications industry as a whole.

Mr. Fly expressed the idea that there might be a round-table discussion of this situation.

Chairman Fly told the correspondents again that the broadcasters will be given a reasonable time to do what is necessary in connection with the possible date of network regulations. He stated that the Commission must first dispose of the matter now pending and give due notice to the industry. This, he said, may run into weeks. It is not the Commission's intention, the Chairman stated, to have any unnecessary extension of time in putting the new network regulations into effect.

DAILIGHT SAVING

The daylight-saving time situation is much confused at the moment, and appears likely to remain so for several weeks to come. It was reported here that the Federal Power Commission is re-examining the power supply in the Southeastern States resulting from recent rains. The result may be a recommendation that such of those Southeastern states now on daylight time return to standard time September 28.

The President on July 15 requested the passage of legislation authorizing him to provide daylight-saving time upon a regional or national basis, and for such part or all of the year, as he might deem necessary in the interest of national defense. This took the form of H. R. 5343, introduced by Rep. Clarence Lea (Dem.-Calif.). Hearings were held on this bill during which NAB appeared and urged that Daylight Saving be observed on a nation-wide basis. This bill has not been reported out of committee as yet and there is little possibility that it will be enacted before September 28.

There has been no indication that any of the Eastern metropolitan centers, such as New York, now on daylight time, intend to remain on daylight time after September 28.

Two Reports Issued

In the mails last week went a summary table on department store advertising, taken from "The Broadcast Advertising Record", showing the extensive use made of radio by American department stores. In New York last week arrangements were made for radio to be represented at the annual January convention of the National Retail Dry Goods Association, attended by several thousand department store executives.

Also mailed was a study on "The Effect of Priorities on Radio Advertising," intended to assist stations in directing their sales efforts most productively.

Limited extra copies of both studies are available while they last at no charge.

To Speak on Radio

Frank E. Pellegrin, director of the Department of Broadcast Advertising, will discuss commercial radio Sept. 17 at a civic meeting sponsored by the Columbus, Ga., Rotary Club, and Sept. 18 at a meeting of the Atlanta, Ga., Advertising Club.

Information Requested

A member station, wishing to sponsor a cooking school, asks for the names of reliable organizations experienced in that type of project.

(Continued on page 724)
SALES (Continued from page 723)

motion. If you have had a satisfactory experience with any such organization, please send its name and address to the NAB.

Per-Inquiry Offers

The Benjamin Ansell Co., St. Louis, is seeking per-inquiry deals on behalf of its toilet preparations. M. E. Sherman, Dallas, is doing likewise for his pecan products. Both have been invited to use radio on the proper card-rate basis.

Courses for Radio Technicians

Executives of leading American colleges and universities currently are being contacted by District Representatives of the NAB National Defense Committee regarding the establishment of radio technician courses this fall.

These intensive courses are planned to provide a needed supply of competent technicians, not only valuable to the military forces and industry, but to broadcasting. They will be open to both young men and women.

Dean Van Leer, of the Engineering School of North Carolina State, is first to announce a full-time twelve weeks campus course. His plans were transmitted to A. J. Fletcher, president of WRAL, Raleigh, and a member of the National Defense Committee.

The Dean also has in prospect off-campus courses in the larger cities of North Carolina, wherever the minimum number of students can be recruited. A third course, also resident, would be open to graduates of Electrical Engineering Schools.

The details of the courses worked out in North Carolina, together with suggestions resulting from contacts with the Army, the Naval Academy, George Washington University, Chief Engineer Jett, of FCC, and others, were mailed to District Representatives of the Defense Committee last Saturday.

They were accompanied by a covering letter by NAB President Neville Miller which said in part:

"We are sending you all of this information because we believe you may want to talk the subject over with the broadcasters in your district. If you come to the conclusion that such courses will need trained radio technicians, to industry and to broadcasting.

"It is our belief, supported by fact, that the question of trained technical personnel will become more serious as time passes and that if the courses are to be given, they should be started this fall.

"We shall be glad to answer any questions and hope you will keep us advised of any plans you make for your district."

These responsible for the inauguration of the training courses within their respective districts are:

Harry Wilder—WSYR, Syracuse.
George D. Coleman—WGBI, Scranton.
Howard Chernoff—WCHS, Charleston.
Red Cross—WMAZ, Macon.
Howard Summerville—WWL, New Orleans.
Franklin Schurz—WSBT, South Bend.
Leslie C. Johnson—WHBF, Rock Island.
George Burbach—KSD, St. Louis.
Morgan Murphy—WEAU, Eau Claire; WMFB, Hibbing.
W. C. Gillespie—KTUL, Tulsa.
George Cranston—KGKO, Forth Worth.
Ed Yocum—KGHL, Billings.
Thomas E. Sharp—KFSD, San Diego.
Paul Connet—KGW-KEX, Portland.

Directors Howard Lane (15) and J. Harold Ryan (7) are soon to announce the National Defense Committee's representative for their Districts.

Coal Spots Zoom

Stations are now broadcasting sponsored announcements in all sections of the country in behalf of the "Buy Coal Now" campaign. Round lot orders of 100 spots are not uncommon; and one letter showed 130 spots from a single coal dealer. Many dealers are buying 20 and 25. Dr. George W. Young, WDGY, Minneapolis, Minn., has scheduled sponsored "Buy Coal Now" copy for the first received in September.

Supports ND from Start

KHMO, Hannibal, Mo., which went on the air August 22, began cooperation with national defense agencies from the beginning. KHMO's report for the eleven days of its existence was among the first received in September.

WMRN's Sign-Off

Stanley A. Miller, assistant general manager, WMRN, Marion, Ohio, has devised a unique sign-off. It is "Buy a Defense Bond and Keep 'em Flying." This is followed by taps. The station's sign-on includes Reveille.

WJPA Has Special Significance

Call letters assigned to the new station, to be erected in Washington, Pa., are WJPA. First two letters, W and J, will serve to remind listeners that Washington is the home of "W & J", Washington & Jefferson College. Last two letters are the abbreviation for Pennsylvania, in which state the city of Washington is located.

Play Ball

The most complete collection of college music available in the United States will be presented to its subscribers by BMI as a result of a contract just signed with Allen Intercollegiate Music, Inc., headed by Thornton W. Allen. Mr. Allen will also make available to broadcasters the twenty-five best numbers of the Thornton W. Allen Company, an ASCAP member, under the terms of the ASCAP Consent Decree.
BMI has secured exclusive performing rights in the library of Allen Intercollegiate Music, Inc., which has gathered together the most representative songs of the leading universities and colleges and will supplement them during the next few weeks by other important college songs.

The following songs are included:

</tbody>
</table>

In reference to the licensing of the twenty-five numbers from the Thornton W. Allen Company, Mr. Allen has sent out a letter informing broadcasters that they are available on the following basis: $3.00 for stations having a 1940 revenue of $50,000 or less; $5.00 for stations having a 1940 revenue of between $50,000 and $150,000; and $7.00 for stations having a 1940 revenue in excess of $150,000.

A copy of the Thornton W. Allen Company proposed license agreement under the ASCAP Consent Decree has also been sent to broadcasting stations. BMI urges the acceptance of the terms of the proposal made by the Thornton W. Allen Company inasmuch as the twenty-five songs from its catalogue together with those of the Allen Intercollegiate Music will give the broadcasters an ideal football repertory for all places and occasions. In the event that any BMI subscriber desires to broadcast the music of any college not included in either the catalogue of Allen Intercollegiate Music, or among the twenty-five songs, we suggest that he communicate directly with BMI and best efforts will be made to secure such rights for him.

**Be Neighborly**

The Kiwanis Clubs of Wilkes-Barre, Penn., and Scranton, Penn., report the adoption of "Hi, Neighbor" and its use at club meetings. George Sutherland, President of the Scranton club, had words screened so that all the members could join in the singing.

The Santa Clara County Fair in Northern California has made the song its theme for the annual fair which will be staged in San Jose during the early part of October. Permission has been granted to change the second and fourth lines of the chorus so that the chorus used at the fair reads:

"Hi, Neighbor! Hi, Neighbor! Come to the Fair—let’s make it a day! Hi, Neighbor! Hi, Neighbor! Meet your friends in San Jose! Come on and shake my hand—and let a grin do the rest. It makes ya feel so grand to get your chin off your chest. I’m shoutin’, Hi, Neighbor! My Neighbor! Time to play and say “Hi!”

Designed to “break the ice,” "Hi, Neighbor" seems to be just what the doctor ordered. It is already the second ranking BMI published song and will soon be heard wherever men are gathered together for a good time. The National Tavern Association which chose BMI’s Friendly Tavern Polka for the theme of National Tavern Week, September 15-September 21, is using the slogan "Hi, Neighbor, let’s get acquainted" on some 200,000 window streamers which will be displayed in taverns during the week.

**Local Hit Parades**

In several cities of the country, and in some states, compilations are being made up week by week of the ten top ranking songs in the territory covered. While in certain instances, these songs conform well to the national favorites, in others preferences expressed for tunes not well known nationally. BMI would like to have copies of as many of these lists as it can obtain and if broadcasters know of any of them, we would appreciate receiving them. Send them in care of the Public Relations Department.
They are all men of long experience in popular music.

Evidence of the wide spread popularity of this music in the coin phonographs of the country is contained in the following editorial from the New York Herald Tribune of August 22nd. Every song mentioned is a BMI tune:

"From ocean to ocean, from the Gulf to the Great Lakes, countless juke boxes bright with glamour lights, stirring the hearts and the feet of youth in roadside dance halls, seaside casinos, short order restaurants, excursion boats, small-town bars—where not among the places of entertainment of the folk—pour in a Niagara stream of the popular music of the American people. Last spring it was Amagoda that charmed a fortune of nickels out of the pockets of lumberjacks and cowmen on payday night; of defense workers having a late snack at the Greek's after overtime; of pockets of defense workers spending a little overtime money. What is going strong? What songs blared today on the radio and the jukes, like his no doubt, a song that speaks the language of the heart with the accent of genuine folk song?"

**BMI FEATURE TUNES**

**September 8 - September 15**

1. WASN'T IT YOU
2. I WENT OUT OF MY WAY
3. YOU MEAN SO MUCH TO ME
4. DELILAH
5. HI, NEIGHBOR
6. YO TE AMO, OH BABY
7. HAVE YOU CHANGED
8. A PRETTY CO-ED HAS GONE TO MY HEAD

---

**Monitor Station on Gulf Coast**

A radio receiving station for defense operations of the Federal Communications Commission in checking air messages in the Gulf of Mexico is under construction with WPA aid at Kingsville (Texas) near the southern border, on the upper reaches of Baffins Bay which empties into Laguna Madre. WPA crews will be on the job eight months to erect most of the station except the antenna. This monitor station is located on a 69-acre site, WPA workers have started to clear the land and will build roads, erect a heavy-duty fence, and remodel a farm house on the property. In addition, 75 poles will be erected for antenna and transmission lines.

In response to a request, Stanley Cowan (the son of Ruby Cowan of NBC) who wrote *Til Reveille*, with Bobby Worth, has written us the following letter:

"As for me . . . I happen to be a married man, but up until a short time ago, my partner, Bobby Worth, was a real target for the draft. A couple of days after Bobby received his papers, I walked into a room and found him sitting there in deep meditation. The only thought on his mind at the time was that, if he was accepted for the army, he would be separated from his sweetheart. Bobby figured that from the time they sounded taps in the evenings until reveille the next morning would be the only time he would have to himself—time in which to dream of his sweetheart. About three hours later, I returned to the room again to find Bobby seated at the piano, playing the melody and with part of the lyrics of what he called 'Til Reveille.' The fact that we had just been speaking of his predicament but a few short hours before served to inspire Bobby to write a song, which he felt depicted, not only his own particular situation, but that of many another young man who was being separated from his loved one by the army. I can honestly say that this song was rightfully Bobby's, as it was one of those things that come to a person only when he is truly inspired. As for myself, there was very, very little work remaining to be done on the song, as it was almost perfect all 'round as Bobby had it, but I was glad to help out in the few little changes that were made.

"To make a long story short, as someone once said, 'Most of us spend a lot of time worrying about things that never happen,' and in this particular case the same thing held true, as when Bobby went up for his physical examination he was deferred because of a physical disability resulting from an accident that happened to him years before. Anyway, the whole thing resulted in a break for us in the form of 'Til Reveille.'"
FUTURE HEARINGS

During the past week the Commission has announced the following future broadcast hearings. They are subject to change.

October 2

KFNF—KFNF, Incorporated, Shenandoah, Iowa.—Renewal of license, 920 kc., 500 watts night, 1 KW day, S-KUSD.

October 13

WJAX—City of Jacksonville, Jacksonville Fla.—C. P., 930 kc., 5 KW, DA-night, unlimited time.

Consolidated Hearing

NEW—Texas Star Broadcasting Co., Houston, Texas.—C. P., 1230 kc., 250 watts, unlimited time.

NEW—Greater Houston Broadcasting Co., Inc., Houston, Texas—C. P., 1230 kc., 250 watts, unlimited time.

October 21

Consolidated Hearing

KVOA—Arizona Broadcasting Co., Inc., Tucson, Arizona.—C. P., 590 kc., 1 KW, unlimited time, DA-day and night.

KGGM—New Mexico Broadcasting Co., Albuquerque, N. M.—C. P., 590 kc., 5 KW, unlimited time, DA-night.

KVSF—New Mexico Broadcasting Co., Santa Fe, N. M.—C. P., 1290 kc., 1 KW, unlimited time.

APPLICATIONS GRANTED

WIAC—Enrique Abarca Sanfeliz, San Juan, Puerto Rico.—Granted modification of construction permit (B-MP-1337), subject to condition that applicant install a directional antenna if it is shown by actual measurement that objectionable interference is caused to WDWO, Orlando, Fla., for approval of antenna and approval of transmitter location, 3 miles east of San Juan, change in type of transmitter and increase of nighttime power to 5 KW, unlimited time. Now operates on 590 kc., 1 KW night, 5 KW day.

KMPC—KMPC, The Station of the Stars, Beverly Hills, Calif.—Granted modification of construction permit (B5-MP-1274) to install new transmitter, increase power to 10 KW, for approval of directional antenna for day and night use, and for approval of transmitter site between Whissett and Coldwater Canyon, Van Nuys, Calif. Now operates on 710 kc., 1 KW night, 5 KW day, unlimited time, and construction permit for 5 KW night.

WWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Granted special service authority to operate on 1190 kc., 10 KW, unlimited time, for the period ending February 1, 1942 (B4-SS-6).

WNBF—Wylie B. Jones Advertising Agency, Binghamton, N. Y.—Granted construction permit (B1-P-3185) to increase day and night power to 5 KW, change frequency to 1290 kc., install new transmitter and change transmitter site to approximately 3.4 miles SW of center of Binghamton, and to employ a directional antenna system for use during nighttime only. Now operates on 1190 kc., 250 watts, unlimited time.

WSAU—M. F. Chapin (Transferor), W. E. Walker (Transferee), Wausau, Wis.—Granted consent to transfer 5 shares of common stock of the Northern Broadcasting Company, licensee of Station WSAU, from M. F. Chapin to W. E. Walker, for a consideration of $1,500 (B4-TC-273).

WWJ—Capital Broadcasting Co., Washington, D. C.—Granted application for license (B1-L-1418) to cover construction permit to operate on 1450 kc., 250 watts, unlimited time, and for license to operate booster amplifier (B1-L-1419) using 100 watts power in connection therewith; also granted authority to determine operating power by direct measurement (B1-Z-957 & B1-Z-959).

W7SC—The Moody Bible Institute of Chicago, Chicago, Ill.—Granted modification of construction permit (B4-MPH-29) for FM station for approval of transmitter, antenna system and antenna site at R. F. D. No. 1, Addison, Ill., and for a change of coverage from 10,300 square miles to 10,950 square miles.

DESIGNATED FOR HEARING

Lake Shore Broadcasting Corp., Cleveland, Ohio—Application for construction permit (B2-P-3267) for new station to operate on 1300 kc., 5 KW, unlimited time, using directional antenna day and night; to be heard in consolidation with the application of Cuyahoga Valley Broadcasting Company.

MISCELLANEOUS

WHJ—Westinghouse Radio Stations, Inc., Portable-Mobile, (Area of Boston, Mass.)—Granted license to cover construction permit (B2-PRY-244) which authorized installation of new transmitter, increase in power to 25 watts; 1606, 2074 kc., conditionally, 2102, 2578 kc.; to be used with applicant's standard broadcast stations WBZ and WBZA (B1-LRY-236).

WRTV—World Wide Broadcasting Corp., Hatherly Beach, Scituate, (Boston) Mass.—Granted modification of construction permit (B1-PIB-30, which authorized increase in power and changes in equipment of international broadcast station) for extension of completion date to 11/15/41 (B1-PIB-30).

KGEI—General Electric Co., Na. Belmont, Cal.—Granted license to cover construction permit (B5-PIB-24, which authorized installation of new transmitter, move of transmitter and increase in power to 50 KW for international broadcast station (B5LIB-16).

W3XW—Allen B. DuMont Labs., Inc., Washington, D. C.—Granted modification of construction permit (B1-PV4-B5, for new television station), for change in transmitter location from 14th and F Sts., N. W., to 726 11th St., N. W., Washington; change type of visual and aural transmitters and extend commencement and completion dates to 30 and 180 days after grant, respectively (B3-PV4-B5).

W9BKB—Balaban & Katz Corp., Chicago, Ill.—Granted modification of construction permit (B4-PV4-B5, which authorized a new television station) for extension of completion date 9/1/41 to 2/1/42 (B1-PIB-35).

W3XNB—National Broadcasting Co., Inc., Washington, D. C.—Granted modification of construction permit (B1-PV4-B5, which authorized a new television station) for extension of completion date from 7/28/41 to 3/1/42 (B1-PV4-B5).

WCHB—The Tribune Co., Portable-Mobile, Area of Tampa, Fla.—Granted license to cover construction permit (B5-PRY-240) for new relay broadcast station; frequencies 1622, 2058, 2150, 2790 kc., 40 watts; to be used with applicant's standard broadcast station WFLA (B3-LRY-229).

WEOF—The National Life and Accident Ins. Co., Portable-Mobile, (Area of Nashville, Tenn.)—Granted license to cover construction permit (B1-PRE-406) which authorized change in type of transmitter only, of relay broadcast station (B3-LRE-557). Also granted construction permit for change in type of transmitter, only (B1-PRE-406).

WGST—Georgia Semiconductor Labs., Ga.—Granted motion for continuance of hearing now scheduled for September 3 on application for renewal of license, for an indefinite period.

WKBH—WKBH, Inc., LaCrosse, Wis.—Granted modification of construction permit (B4-P-2738, to move transmitter, install DA for night use, and increase power to 5 KW, day and night, change frequency to 1410 kc. under NARBA) for move of transmitter from proposed site to Junction of County Highways. Area of Campbell Twp., Wisc., extend commencement date to 30 days after grant and completion date to 180 days thereafter (B1-MPB-52).

WOL—American Broadcasting Co., Washington, D. C.—Granted license to cover construction permit (B1-P-3033, which authorized move of old Western Electric Type 301-B transmitter from 1111 11 St., NW, Washington, D.C., to Ager Road near Chillum, Md., and to use as auxiliary transmitter using 100 KW, for emergency purposes only) (B1-L-1461).

September 5, 1941 — 727
WPAR—Ohio Valley Broadcasting Corp., Parkersburg, W. Va.—Granted license (B2-P-2760, for new transmitter, new antenna, increase in power and move of transmitter). Also granted authority to determine operating power by direct measurement. (B2-Z-1181)

WENY—Elmira Star-Gazette, Inc., Elmira, N. Y.—Granted motion to withdraw without prejudice application for new station to operate on 390 kc., 1 KW, unlimited time; D}| E| 6:00 P.M. and 1:00 A.M., E.S.T., Thursdays, Sept. 4, 11, 18 and 25. (B2-S-896)

Westinghouse Broadcasting Co., Nashville, Tenn.—Passed for a week motion for order to take depositions in re application for new station.

KFN—KFN Broadcasting Inc., Shenandoah, Ia.—Granted motion for postponement and hearing on application for renewal of license now scheduled for Sept. 5 to Oct. 7, 1941.

Greater Houston Broadcasting Co., Inc., Houston, Texas—Granted petition and order to take depositions in re applications for a new station in Houston by Scripps-Howard Radio, Inc., Texas Star Broadcasting Co., and Greater Houston Broadcasting Co., Inc. to use 1290 kc., 250 watts, unlimited time; and the Commission on its own motion continued the hearing until October 13.

Trent Broadcast Corp., Trenton, N. J.—Granted petition for extension of time to Sept. 20, in which to file an opposition to consideration for revalidation in re application for new station to operate on 292 kc., 1 KW, unlimited time, using directional antenna day and night.

WAPO—W. A. Patterson, Chattanooga, Tenn.—Granted license to cover construction permit (B3-P-1599) for installation of new transmitter for night use, increase in power, change in frequency and move of transmitter (B3-L-1167). Also granted authority to determine operating power by direct measurement of antenna input (B3-S-1184).

WREC—WREC Broadcasting Service, Memphis, Tenn.—Granted license (B3-L-1145) to cover construction permit (B3-P-2979 for increase in power and changes in DA system). Also granted authority to determine operating power by direct measurement of antenna power (B3-Z-1192).

WMGO—Coastal Broadcasting Co., Brunswick, Ga.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1119).

KJF—Fisher's Blend Station, Inc., Seattle, Wash.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1179).

WLOL—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Granted authorization to determine operating power by direct measurement of antenna power (B4-Z-1180).

KBTM—Regional Broadcasting Co., Jonesboro, Ark.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1176). 

Wis.—Authorized extension of special temporary authority to operate a high frequency experimental broadcast station on 43,200 kc., 1000 watts, for the period August 28 to October 26, with transmitter located at 1719 Wesc. Ave., N. W. (Action taken 8/27).

W55M—The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—Granted modification of construction permit (B4-MPH-35) which authorized a new FM broadcast station, for extension of completion date to 11/30/41.

W3SH—The Travelers Broadcasting Service Corp., Hartford, Conn.—Granted modification of construction permit (B1-MPH-9) which authorized a new FM station, for approval of transmitter and antenna system, and change in population from 4,893,459 to 10,366,600; 45,380 kc.; 6,600 square miles.

W67C—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted modification of construction permit (B4-MPH-36) which authorized a new FM station, for change in type of transmitter and to make changes in antenna system.

W39B—The Yankee Network, Inc., Boston, Mass.—Granted modification of construction permit (B1-MPH-27) which authorized a new FM station, to make changes in antenna system and extend commencement and completion dates to 60 and 180 days after grant, respectively.

W51C—Zenith Radio Corp., Chicago, Ill.—Granted modification of construction permit (B4-MPH-38) for changes in antenna system only, in authorization for new FM station.

WXOL—KLZ Broadcasting Company, Denver, Colo.—Granted license (B5-LHB-70) to cover construction permit authorizing change in transmitter location of experimental high frequency station. The license is granted on an experimental basis only, conditionally.

WEB—WAVE, Inc., Portable-Mobile (Area of Louisville, Ky.)—Granted license to cover construction permit which authorized installation of new transmitter and increase in power of relay broadcast station to 50 watts (B2-LRE-356).

WEB—The Monticello Journal, Portable-Mobile (Area of Milwaukee, Wis.)—Granted construction permit for change in equipment and increase in power of relay broadcast station from 25 to 50 watts (B1-PRE-403).

Port Huron Broadcasting Co., Portable-Mobile (Area of Port Huron, Mich.)—Granted construction permit for new relay broadcast station to use frequencies 1622, 2058, 2570 kc., 15 watts, to be used with applicant's standard broadcast station WHTL. (B2-PHY-255).

WTNE—The Tribune Co., Portable-Mobile, (Area of Tampa, Fla.)—Granted license to cover construction permit (B3-PHY-241) for new relay broadcast station; frequencies 1602, 2048, 2570 kc., 40 watts; to be used with applicant's standard broadcast station WFLA. (B3-LRY-230).

KSCJ—Perkins Brothers Company, (The Sioux City Journal) Sioux City, Ia.—Granted modification of construction permit (B2-MPH-290) for new FM broadcast station; frequencies 831, 1622, 2058, 2150, 2700 kc.; 40 watts; to be used with applicant's standard broadcast station WHBY.

KVOQ—Mercer Broadcasting Co., Mercer, Calif.—Granted special temporary authority to operate from local sunset (Sept. 6) to 10 P. M., P. S. T. until 10 P. M., P. S. T., on Sept. 7, in order to broadcast a program in connection with the Governor's Day Celebration to be held in Vancouver, Wash. (B5-S-1027).

WIBQ—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Denied special temporary authority to operate simultaneously with KXJ from 8 to 10 P. M., P. S. T., on Sept. 9, in order to transmit program in connection with the Mercer County Holy Name Society rally on Sept. 7, using 250 watts only. (B2-S-339).

WPC—Sharon Herald Broadcasting Co., Sharon, Pa.—Considered motion of Aug. 11, and granted special temporary authority to operate additional time from 8 P. M., E. S. T., to 11 A. M., E. S. T., Thursdays, Sept. 4, 11, 18 and 25, to 1 A. M., E. S. T., Thursdays, Sept. 4, 11, 18 and 25, for local broadcasting only, in afternoon and evening burials, and in afternoon and evening burials.

KW—WKQW, Inc., Portable-Mobile (Area of Louisville, Ky.)—Granted motion to strike items 7 and 8 from the hearing notice. Counsel for applicant to furnish opposing counsel with addresses and names of business connections of proposed deponents. Also granted motion for order to take depositions.

WHK—Whit Broadcasting Company, Kansas City, Mo.—Granted petition for leave to intervene in hearing on above application of Park Cities Broadcasting Corp.

KVSQ—Mercer Broadcasting Co., Mercer, Calif.—Granted special temporary authority to operate from local sunset (Sept. 6) to 10 P. M., P. S. T. until 10 P. M., P. S. T., on Sept. 7, in order to broadcast a program in connection with the Governor's Day Celebration to be held in Vancouver, Wash. (B5-S-1027).

WIBQ—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Denied special temporary authority to operate from local sunset (Sept. 6) to 10 P. M., P. S. T. until 10 P. M., P. S. T., on Sept. 7, in order to broadcast a program in connection with the Governor's Day Celebration to be held in Vancouver, Wash. (B5-S-1027).

WIBQ—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Denied special temporary authority to operate from local sunset (Sept. 6) to 10 P. M., P. S. T. until 10 P. M., P. S. T., on Sept. 7, in order to broadcast a program in connection with the Governor's Day Celebration to be held in Vancouver, Wash. (B5-S-1027).

WIBQ—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Denied special temporary authority to operate from local sunset (Sept. 6) to 10 P. M., P. S. T. until 10 P. M., P. S. T., on Sept. 7, in order to broadcast a program in connection with the Governor's Day Celebration to be held in Vancouver, Wash. (B5-S-1027).

WIBQ—Seaboard Radio Broadcasting Corp., Glenside, Pa.—Denied special temporary authority to operate from local sunset (Sept. 6) to 10 P. M., P. S. T. until 10 P. M., P. S. T., on Sept. 7, in order to broadcast a program in connection with the Governor's Day Celebration to be held in Vancouver, Wash. (B5-S-1027).
Capital City Broadcasting Co., Inc., Topeka, Kans.—Placed in pending files pursuant to Order No. 79, application for construction permit (B4-P-3059) for new standard broadcast station to use 1210 kc., 5 KW, daytime only.

Indianapolis Broadcasting, Inc., Indianapolis, Ind.—Placed in pending files pursuant to Order No. 79, application for construction permit (B4-PH-103) for new FM broadcast station.

Federated Publications, Inc., Battle Creek, Mich.—Dismissed petition for rehearing directed against the Commission's action of July 22 granting without hearing the application of WJIM, Inc., Lansing, Mich., for a new FM broadcast station at that place.

E. Anthony & Sons, Inc., New Bedford, Mass.—Denied petition to remove from pending file, reconsider and grant without hearing, the application (B1-PH-98) for a new FM broadcast station.

APPLICATIONS FILED AT FCC

570 Kilocycles

WNAX—WNAX Broadcasting Co., Yankton, S. D.—Authority to install automatic frequency control equipment.

580 Kilocycles

WIBW—Topeka Broadcasting Assn., Inc., Topeka, Kans.—Construction permit to make changes in transmitting equipment and increase power from 5 KW to 5 KW night, 10 KW day, using directional antenna day and night.

WIBW—Topeka Broadcasting Assn., Inc., Topeka, Kans.—Construction permit to make changes in transmitter and increase power from 5 KW to 5 KW night, 10 KW day, using directional antenna day and night.

620 Kilocycles

KGB—Oregonian Publishing Co., Portland, Ore.—Modification of construction permit (B5-P-2954) for installation of directional antenna for day and night use, increase in power, requesting extension of completion date from 9-21-41 to 11-21-41.

640 Kilocycles

WALB—The Herald Publishing Co., Inc., Albany, Ga.—Modification of construction permit (B3-MP-1327) for changes in directional antenna for night use, requesting change in frequency from 1350 kc. to 1350 kc., increase in power from 1 to 10 KW, using directional antenna night, install new transmitter. Contingent on WCKY's change to 640 kc. or other frequency.

690 Kilocycles

KGFF—Hugh J. Powell, Coffeyville, Kans.—Construction permit to increase power from 500 watts night, 1 KW day to 1 KW day and night, change type of transmitter, directional antenna for night use, hours of operation from specified to unlimited and move transmitter. Amended: To use directional antenna for day and night.

810 Kilocycles

NEW—Fred C. Morgan, Harrison Eiteljorg, Roger A. Beene, d/b as Hoosier Broadcasting Co., Indianapolis, Ind.—Construction permit for a new broadcast station to be operated on 810 kc., 250 watts and daytime hours.

820 Kilocycles

WOSU—Ohio State University, Columbus, Ohio.—License to cover construction permit (B2-P-3138) as modified, for new transmitter, change in frequency, increase in power and change in hours of operation.

WOSU—Ohio State University, Columbus, Ohio.—Authority to determine operating power by direct method.

860 Kilocycles

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Modification of construction permit (B3-P-2631) for 860 kc., 1 KW, daytime or unlimited, provided directional antenna installed, which meets with approval of Commission and approval of transmitter site and new transmitter, requesting new transmitter, directional antenna for night use, 1 KW, unlimited hours and approval of transmitter site.

950 Kilocycles

KPRC—Houston Printing Corp., Houston, Texas.—Modification of construction permit (B3-P-2791) as modified, for installation of directional antenna for night use, increase in power, change in frequency under NARBA, requesting extension of completion date from 9-19-41 to 11-18-41.

1080 Kilocycles

KWJJ—KWJJ Broadcast Co., Inc., Portland, Ore.—License to cover construction permit (B5-P-2881) as modified, for change in frequency, increase in power, change in hours of operation and installation of directional antenna for day and night use.

1180 Kilocycles

KFGQ—Boone Biblical College, Boone, Iowa.—Construction permit to change frequency from 1100 kc. to 1100 kc., increase in power and hours of operation from 100 watts, specified hours to 250 watts daytime, make changes in transmitter and install new vertical antenna.

1190 Kilocycles

WCNW—Arthur Fiske, Brooklyn, N. Y.—Construction permit to install new transmitter and increase power from 100 watts night, 250 watts day to 1 KW day and night. Amended: To request change in frequency from 1600 kc. to 1190 kc., and limited hours.

WIRE—Indianapolis Broadcasting, Inc., Indianapolis, Ind.—Construction permit to change frequency from 1130 kc. to 1190 kc., increase power from 5 to 50 KW, install new transmitter, changes in directional antenna for night use and move transmitter (facilities of WOWO requested).

1230 Kilocycles

WESX—North Shore Broadcasting Co., Salem, Mass.—Authority to install automatic frequency control equipment.

WKWB—Buffalo Broadcasting Corp., Buffalo, N. Y.—Modification of construction permit (B1-P-2902) for new transmitter installation of directional antenna for day and night use, increase in power and move, requesting changes in direction.

1530 Kilocycles
NEW—Edward E. Reeder, Seattle, Wash.—Construction permit for a new broadcast station to be operated on 1530 kc., 250 watts and unlimited hours. Amended: To request 1560 kc.

1600 Kilocycles
WCNW—Arthur Fiske, Brooklyn, N. Y.—Authority to determine operating power by direct method.

FM APPLICATIONS
NEW—The La Crosse Tribune Co., La Crosse, Wisc.—Construction permit for a new high frequency broadcast station to be operated on 1600 kc., 230 watts night and 250 watts day and unlimited hours (Sections 18, 19, 23, 27, 28, 35, 37 and additional copy). Amended: To change tubes in last radio stage.

NEW—Oak Park Realty and Amusement Co., Chicago, Ill.—Construction permit for a new high frequency broadcast station to be operated on 16200 kc.; population, 166,600. Amended: To change antenna system, coverage to 7,040 square miles and population to 244,750.

NEW—W&F Farms Realty and Amusement Co., Chicago, Ill.—Construction permit for a new high frequency broadcast station to be operated on 16200 kc.; population, 5,030,510; coverage, 10,800 square miles.

MISCELLANEOUS APPLICATIONS
WDXB—Balaban and Katz Corp., Relay.—License to cover construction permit (B4-PVR-54) for reinstatement of construction permit for decrease in power and equipment changes for new relay broadcast television station.
WRCA—National Broadcasting Co., Inc, Bound Brook, N. J.—Modification of license requesting additional frequencies 6100, 11800 and 21530 kc., and addition of transmitting equipment now licensed to WNBR (Submitted in Duplicate).
WERB—Pinellas Broadcasting Co., Portable-Mobile.—License to cover construction permit (B3-PRE-401) for a new relay broadcast station.
NEW—Board of Education of the Memphis City Schools, Memphis, Tenn.—Construction permit for a new noncommercial educational broadcast station to be operated on 42100 kc., 250 watts, A3 emission.
NEW—Hampden-Hampshire Corp., Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 30820, 33710, 36320, 37580 kc., 25 watts, A3 emission.

FEDERAL TRADE COMMISSION ACTION
Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS
Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Aspironal Company—J. D. Jacobs and P. W. Smith, trading as Aspironal Company, Atlanta, Ga., engaged in the sale and distribution of a medical preparation designated as "Aspironal," and as "Aspironal," are charged in a complaint with misrepresentation and false advertising. (4574)

Caroline Products Company, Litchfield, Ill., engaged in manufacturing and distributing skimmed milk products designated as "Caroline" and as "Milnut," is charged in a complaint with misrepresentation. (4575)
Imperial Knife Company, Inc.—A complaint has been issued charging Imperial Knife Co., Inc., 14 Blount St., Providence, R. I., with the use of lottery methods in the sale of knives.

A complaint has also been issued charging Marion Allen, trading as Triangle Sales Co., Phoenix, Ariz., and Alfred J. Landay, of Chicago, with the use of lottery methods in the sale of radios, cameras and other merchandise. The complaint alleges that the respondent Landay is engaged in the mailing of push cards and literature for the respondent Marion Allen. (4573-4576)

Lux-Visel, Inc., trading as The Lux Company, and Superlux, Elkhart, Ind., engaged in the manufacture and sale of an electric water heater designated variously as the "Magic Disc," the "Super-Lux Heater" and the "Lux," is charged in a complaint with misrepresentation. (4577)

Manhattan Brewing Company—A complaint has been issued charging Manhattan Brewing Co., 3901 Emerald Ave., Chicago, with representing that certain of its beer and ale is imported with the use of lottery methods in the sale of "Eureka Springs Ozarka Water." (3202)

Jose G. Gonzalez and Mrs. Henry (Felicia G.) Myers, 817 Hidalgo St., Laredo, Texas, stipulated to cease certain representations in the sale of "Malintzin," a hair dye product. (3202)

Northam Warren Corporation and its subsidiary, Peggy Sage, Inc., of New York and Stamford, Conn., have stipulated to discontinue certain representations in the sale of "Eureka Springs Ozarka Water." (3201)

William Smith & Sons, Inc., 51 Madison St., Paterson, N. J., manufacturer and distributor of seam binding, has entered into a stipulation to cease using the marking "100 yards" on bolts or containers of its product, when in fact less than that number of yards of material are included therein, and to cease otherwise mismarking its products with respect to their yardage. (3201)

CEASE AND DESIST ORDERS

During the past week the Commission has issued the following cease and desist orders:

Detroit Candy & Tobacco Jobbers Association, Inc., Detroit, and its officers, directors and representatives, have been ordered to cease and desist from practices deemed to be in restraint of trade in the sale of candies, tobaccos and groceries. (4321)

Inlaid Optical Corporation, 1058 Broad St., Providence, R. I., has been ordered to cease and desist from misrepresentation in the sale of lenses and eyeglasses. (4178)

Rockdale Monument Company—James J. Collins, Charles J. Hepp and Catherine Hepp, trading as Rockdale Monument Company, Joliet, Ill., have been ordered to cease and desist from misrepresentation in the sale of imitation granite monuments and markers. (4404)

Schmeck-Wayne Company—Orders prohibiting the use of lottery methods in the sale of commodities in commerce have been issued against a New York and a Chicago firm each selling miscellaneous merchandise, and a Bryan, Ohio, candy manufacturer. The Commission also ordered an Adrian, Mich., firm to cease selling sales promotion cards or other articles so designed that their use by retail merchants constitutes the operation of a gift enterprise or lottery scheme.

The following stipulations have been made public by the Commission:

Eureka Springs Water Company—Richard R. Thompson, trading as Eureka Springs Water Co., and as Ozarka Water Co., Eureka Springs, Ark., has entered into a stipulation to cease certain representations in the sale of "Eureka Springs Ozarka Water." (4571)

Soap Lake Products Corp.—Two Washington State distributors of packaged mineral salts have been ordered to cease and desist from misrepresentations of the therapeutic value of their preparations. The respondents are Soap Lake Products Corporation, Seattle, and Roxie Thorsen, trading as Thorson's Soap Lake Products Co., Soap Lake, Wash. (2823-2832)

J. H. Weil & Co., et al.—Eleven producers or distributors of tracing cloths, blueprint papers and various other supplies and equipment used by the engineering, drafting and building professions, and their trade association, and several of its executive committee members, have been ordered to cease and desist from a combination and conspiracy to fix and maintain prices for their products.

The Commission order directs the eleven members of the Surveying-Drafting-Coaters Section of Scientific Apparatus Makers of America, and all other present and future members, of which those named are representative, to cease and desist from carrying out any understanding, agreement, arrangement, combination or conspiracy to restrain or monopolize competition in the sale of their products, and, in pursuance of such understandings or agreements, from fixing and maintaining or agreeing to fix and maintain the prices at which their products will be sold by them and the terms and conditions, including the classification of customers, freight allowances and duration of and optional clauses in contracts, in connection with any sales by them of their products. (3909)

R. C. Williams & Company, Inc., 265 Tenth Ave., New York City, engaged in importing and exporting food products, has been ordered to cease and desist from violation of the brokerage provision of the Robinson-Patman Act. (4279)

FTC CLOSES CASE

The Federal Trade Commission closed without prejudice a case against Morris Orenstein, 625 Broadway, New York, trading as Fair Deal Novelty Co., and as Fair Deal Novelty House, charged with violation of the Federal Trade Commission Act in the interstate sale of merchandise, including pen and pencil sets, cigarette lighters and electric lamps.

The case growing out of the complaint against the respondent was closed without prejudice to the Commission's right to resume proceedings, should future facts so warrant.

The closing order recites that in an order to cease and desist issued last June against Morris Orenstein and Isidore Halperin, trading as Wellworth Sales Co., New York, (Docket 3470), the respondent Orenstein was ordered individually to cease practices similar to those charged in the current case now closed. The order against the respondents Orenstein and Halperin prohibited the use of lottery methods in the sale of merchandise, use of the word "free" to describe premiums or gifts given as compensation for services, and use of the word "silver" to designate plated ware.

732 — September 5, 1941
Executive Committee Approves
New ASCAP Deal

The Executive Committee met in New York City on Tuesday, September 9. The ASCAP proposals in their revised form were considered in detail and after full discussion the following resolution was adopted:

"The Executive Committee of the NAB has had ample opportunity to study, through a series of meetings, the terms and conditions of the proposed ASCAP contracts. It is the consensus of the Executive Committee that these contracts in their present form are highly satisfactory and offer broadcasters who desire to use ASCAP music an eminently fair and equitable basis for such use, provision having been made for the various operating problems which confront the industry.

"The NAB, therefore, recommends favorable consideration of that form of contract which best suits the station's individual operating needs."

Elias, Elmer, Morency and Shouse voted in the affirmative, and Gillin voted in the negative. West was absent.

The forms of contracts which are to be tendered to stations were not available in final form when this issue of the Reports went to press so no analysis could be made. However, a complete analysis will be contained in next week's NAB Reports.

After the meeting, Neville Miller issued the following statement:

"The contract in its present form achieves principles for which broadcasters have been contending for many years. It enables them to take their choice of a blanket contract for all ASCAP music, or to purchase this music for the programs on which it is played. Moreover, the contract reduces substantially the fees which our industry has hitherto been compelled to pay."

It was pointed out by Mr. Miller that the contract with ASCAP would not affect the operations of BMI, to which both NBC and CBS had pledged their continued support on a long term basis.

"The proposed contracts with ASCAP in their final form will be mailed to all stations within the next few days, and will be subject to the scrutiny and approval of the individual broadcaster," Mr. Miller said. He further stated that the terms and conditions of the proposed contracts were acceptable, he had been informed, to the National Broadcasting Company and to the Columbia Broadcasting System. Signature by the networks, it is understood, is contingent upon the agreement of affiliated stations to bear their proportion of the cost of the license.

Radio Priorities Conference

Manufacturers and suppliers of materials and equipment for commercial broadcast stations, representing every branch of the industry, came to Washington, last Wednesday, at the invitation of NAB President Neville Miller for an all day conference to ascertain the exact nature of the critical problem facing the industry.

The meeting was called in the face of the anticipated order P-22 which was actually issued September 9, the day before the meeting. This order places commercial broadcasting in the National Defense category.

The consensus of manufacturers attending the meeting was to the effect that A-10 would soon prove thoroughly inadequate to procure a large variety of critical repair parts. Most factories are filled with equipment orders bearing substantially higher priorities, they said.

On the day prior to the NAB meeting the Radio Apparatus & Electronic Tube Section of the National Electrical Manufacturers Association met in New York City to discuss the problem of supplying broadcasters. The findings of these manufacturers were transmitted to the NAB meeting by S. Norris, chairman, Tube Line Committee, Radio Apparatus & Electronic Tubes Section and C. J. Burnside, chairman, Radio Apparatus & Electronic Tubes Section. Frank Martin of the NEMA staff and S. Norris were in attendance. The latter read the report which he said would be anything but cheerful news. It reads in part:

"It is the considered opinion of the Radio Apparatus & Electronic Tubes Section of NEMA that manufacturers are approaching the point where they can no longer give assurance that they can supply to the broadcasting industry replacement tubes that may be needed to maintain services. "As of today, the situation on certain transmitting tubes is extremely critical and certain types must soon be unavailable except on the highest priority ratings, because of the present and immediate future demand for manufacturing facilities, skilled labor and materials.

"Discussion with various Government departments regarding 1942 tube requirements would indicate the possibility that National Defense needs for TRANSMITTING TUBES will exceed the productive capacity of the industry."

"Sometime ago, it seemed that a priority rating in the nature of A-10 would be sufficient to render the broadcasters adequate service. The present quantity of transmitting tubes being produced or contemplated to which high priority ratings have been or will be assigned indicates that an A-10 rating on these products would not be adequate."

"Everything that has been said above with regard to transmitting tubes applies with equal force to transmitting apparatus and replacement parts.

"The members of this Committee individually and collectively through the Association have for some time been cognizant of the tube and parts replacement problem of the broadcasting industry and have expended considerable effort to obtain relief."

"The situation has now come to a point where it is very evident that a high priority rating would be, in our opinion, the best solution to the problem, since this would permit the manufacturers to ship broadcaster requirements in conjunction with defense schedules."

"This Committee is anxious to be of assistance in the preparation of statistics or further information which might be of help to the broadcasters in their effort to obtain such Industry rating."

After an hour and a half discussion of the entire problem the manufacturers divided themselves into four groups for the purpose of accurately estimating the amounts of various critical

(Continued on page 734)
RADIO PRIORITIES CONFERENCE
(Continued from page 733)

materials required for keeping the present broadcast system in operation on a 1940 basis.

They also made estimates of materials required in new construction. By remaining late the compilations were practically completed. These will be used in making a case before the proper Government agencies.

It is realized that in applying an A-10 rating to the broadcasting industry that it is the belief of the Government that such a rating is satisfactory. The condition of the individual factories making up the industry does not support this contention. The information which NAB gathered with the cooperation of the manufacturers is naturally the latest information available. Conversations will be continued with the Government.

NAB sets forth below suggestions which bear on the problem of getting the necessary parts and equipment for repairs and emergency inventory.

Present at Meeting
S. Norris, Amperex Electronic Products, Inc., New York City.
E. J. Staubitz, Blaw-Knox Company, Pittsburgh.
H. H. Darbo, Burgess Battery Company, Freeport, Ill.
P. M. Deelely, Cornell-Dubilier Elec. Corp., South Plainfield, N. J.
Ernest F. Ling, Corning Glass Works, Corning, N. Y.
C. E. Brigham, Federal Telegraph Co., Newark, N. J.
S. G. Jones, Gates Companies, Quincy, Ill.
G. W. Henyan, General Electric Company, Schenectady.
L. H. Whitten, Graybar Electric Co., Inc., Washington, D. C.
J. F. Neary, Lehigh Structural Steel Co., New York City.
Wesley Thompson, John E. Linzio & Son, Inc., Camden, N. J.
G. M. Ruoff, Locke Insulator Corporation, Baltimore.
Siguel Sollie, Memovox, Incorporated, Beverly Hills, Calif.
Joseph Tait, Presto Recording Corporation, New York City.
I. R. Baker, RCA Manufacturing Company, Camden, N. J.
G. Reimier and Miss Marion Wade, Radio Engineering Laboratories, Inc., Long Island City, N. Y.
E. O. Onstead, Thordarson Electric Mig. Co., Chicago.
George F. Bateson, Truson Steel Company, Youngstown, Ohio.
Frank Martin, NEMA, New York City.
Lawrence C. F. Horle, RMA, Washington, D. C.

Members of the NAB staff present were: Neville Miller, C. E. Arney, Jr., Russell Place, Lynne Smey and Arthur Stringer.

New Priority Procedure

As of September 9 the following is the procedure which commercial broadcast stations are to follow in order to procure tubes, parts and apparatus necessary to the station's continued operation, i.e., for repairs and emergency inventory. This procedure was set forth in OPM's Preference Rating Order P-22.

That order has assigned to the commercial broadcasting industry an A-10 rating for repairs and emergency inventory. Because A-10 is a national defense rating, all repair work in broadcasting automatically becomes national defense so far as the Supplier is concerned.

How Commercial Broadcasters Are to Get Material for Repairs and Emergency Inventory:

Fill out a purchase order as usual—you don't need a form—and endorse on the order and all copies as follows (this exact wording must be used and it must be signed by a responsible station official duly designated):

"Purchase Order for Repair or Emergency Inventory—Preference Rating A-10 under Preference Rating Order P-22."

A station is privileged to use A-10 for orders covering breakdown orders in the face of an imminent breakdown; and, to build up an emergency inventory. Emergency inventory is held to be as small an inventory as is needed to safeguard continued operation. It corresponds to the individual station's inventory practice. It is advised that your emergency inventory be maintained 100 per cent.

If your Supplier tells you an A-10 rating will not enable him to make delivery, ask him what rating is necessary and then communicate with the Repair Section of the Office of Production Management, 462 Indiana Avenue, N. W., Washington, D. C. (REpublic 7500, Extension 2897. Until further notice talk with Colonel J. F. Conveybear. This work may be assigned to another man in the near future). Explain to him the emergency, that you cannot wait for material under the A-10, reciting the facts your Supplier has given you. With this explanation it is likely that you may be assigned a higher defense rating which will enable you to get the material delivered almost immediately. This procedure should be followed to build up your emergency inventory, if that is necessary, as well as in case of breakdown. It is not necessary to wait until you go off the air before using it. The same procedure should be used in case your tower collapses.

IMPORTANT. Do not use the A-10 rating under the following circumstances:

(1) To obtain material IN EXCESS of your requirements for repairs or emergency inventory;
(2) Unless the material to be delivered cannot be obtained when requested without such rating;

(Severe penalties including criminal prosecution are provided for willful violations of the terms and provisions of Order P-22).

What to Do for New Construction:

At the present time new construction means everything that is not a repair job or emergency inventory. The erection of one tower, for example, by an existing station, in order to protect against another station, is new construction. (This week one such project was given a B-1 rating, which was too low for the Supplier to secure steel for fabrication). A new transmitter for increased power is new construction exactly as an entire layout to satisfy a brand new construction permit.

In these cases the station owner is to apply for a "Project Rating". When granted, this provides for all of the material necessary to complete the job. You do not fill out a form for a "Project Rating". You write a letter to Mr. Ward Freeman, Project Rating Section, Priorities Division, Office of Production Management, 462 Indiana Avenue, Washington, D. C. After
telling him that you are applying for a "Project Rating", supply
the following information:
1. Owner or owners of the station.
2. Principle office of the broadcasting station.
3. Indicate the plant site.
4. Material produced. In the case of the broadcasting station
this is not filled out as it would be ether waves.
5. Justification of the project.
6. General description of the project.
7. Types and quantities of material required. This means list
of materials.
8. Number of certificate of necessity. Disregard this as a
broadcaster would not have such a certificate.
9. Date of completion.
11. Per cent completed now.

**M.I.T. SCHEDULES RADIO COURSE**

Massachusetts Institute of Technology, Worcester Polytechnic
Institute and five or six other important New England schools
have agreed with the suggestion made by NAB that it is in the
country’s interest to institute radio technician courses.

This information was telephoned on Thursday by E. E. Hill,
director, WTAG, who is District No. 1 lision for the NAB
National Defense Committee. Mr. Hill was morally certain that
Harvard and Yale would be among five or six other important
New England schools participating in the plan.

At M.I.T. Professor E. L. Moreland is carrying the ball for the
courses. With Mr. Hill’s aggressive support and that of the New
England radio station MIT, Worcester and the other participating
schools should have their full quota of students. It is expected
that a large number of course graduates capable of passing the
FCC examination for operator’s license will result.

At Ohio State, Columbus, Professor Harry E. Nold, director,
Engineering, Science and Management Defense Training, has ar¬
ranged for a "Defense Training Program in Applied Electronics"
beginning September 29. This intensive course of twelve weeks
duration is open only to college graduates who have majored in
engineering or physics and advanced undergraduates who have
completed three years of college work with a strong major in
engineering or physics.

Seventy-one prospective students have been recruited for the
Radio Training courses at North Carolina State by Manager J.
Frank Jarman, Jr., of WDNC, Durham. In accordance with the
plan suggested by A. J. Fletcher, WRAL, Raleigh, the North
Carolina stations are “taking to the air” and forwarding the
prospect names to the college officials.

**SPEED NECESSARY DELAYED**

In an effort to facilitate delayed broadcasting of speeches by
public officials and programs in the interest of national defense,
when facilities are not available for live broadcasts, John Shepard,
III, NAB’s National Defense Committee chairman, has contacted
the three national networks. He has authorized the following
statement:

CBS affiliates have blanket authority, as transmitted by H. V.
Akerberg, to transcribe and repeat above types of programs
without securing special permission.

MBs affiliates, according to notice from Fred Weber, can also
record and repeat programs without securing permission.

William S. Hedges of NBC states that they do not desire to
give blanket permission; but that they will bend every effort to
give prompt answers when their affiliates request permission on
any specific program of the above type.

**NEW MILITARY SERIES**

A series of outstanding defense programs originated by WSUN,
St. Petersburg, Fla., are picked up from nearby military es-
tablishments. First broadcast was from the new U. S. Mar¬
time Training School; second, from the school’s full-rigged train¬
ing ship, the Joseph Conrad. In subsequent weeks broadcasts
will originate in the Training Station’s auditorium. Later on
broadcasts will be presented from MacDill Field and Drew Field,
Tampa, headquarters of the Third Interceptor Command. Tran¬
scriptions will be sent to the various stations in the eleven southern
states embraced by the Command.

---

**Movie-Radio Hearing**

Hearings began Tuesday before a subcommittee of the Senate
Interstate Commerce Committee headed by Senator D. Worth
Clark of Idaho on Senate Resolution 152 proposing an investiga¬
tion into alleged pro-war propaganda in motion pictures and
radio. When the hearings adjourned today after two and a
half days of testimony, only three witnesses had appeared: Sena¬
tor Gerald P. Nye (R—N. Dak) Senator Bennett Champ Clark
(R—Mo), the senators who proposed the investigation, and
publicist John T. Flynn of New York. Testimony of these wit¬
esses was devoted almost entirely to a discussion of alleged
motion picture propaganda, although Senator Clark’s prepared
statement read to the committee, contained a strongly-worded
indictment of radio broadcasters.

In his statement Senator Clark charged that the “man who
owns the radio machine . . . a business man who, by virtue
of his acquisitive talents, has gotten possession of this little micro¬
phone” now exercises a power even greater than that of the
Government itself over freedom of speech and discussion in the
United States. He pictured a “few men” as having complete con¬
trol over what the American people shall or shall not hear on
the radio, and said that radio broadcasters are “fighting for the
freedom to say what they want, and the freedom to prevent those
who disagree with them from uttering a syllable in opposition.”

NAB President Neville Miller immediately addressed an open
letter to the Chairman of the committee vigorously objecting to
the charges which he characterized as an “unwarranted public
indictment” of the radio broadcasting industry.

“It is difficult to believe that charges such as these are made in
all sincerity,” Mr. Miller said. “There are more than 800 broad¬
casting stations in this country. These stations are operated by
men and women of all creeds and political beliefs— Republicans
and Democrats, farmers, lawyers, newspaper people—plain busi¬
ness people of all kinds. Some are members of the Senate and
the House of Representatives. After full examination into their
fitness and responsibility, the Federal Government has granted
them the license to broadcast. They have invested substantial
sums of money in the necessary physical facilities to carry on
broadcasting operations, and have devoted their intelligence and
energy to the building of a radio broadcasting service which is
conceded to be the best in the world.

“These men and women are charged by their Government with
the duty of conducting their broadcasting operations at all times
in the public interest, convenience, and necessity, and whenever
they fail to measure up to their responsibilities, they are subject
to loss of their right to broadcast.

“Of course it is absurd on its face to say that any man or
group of men control what is broadcast in this country. The
American people and they alone exercise a day-to-day control of
broadcasting far too powerful for anyone, even Government
itself, to interfere with. But beyond this, these men and women
have voluntarily accepted as part of their public responsibility the
duty to see to it that radio shall promote and enlarge free public
discussion and debate, that it shall serve as a instrument of en-
lightenment as well as of entertainment for all the people. This
assumption of responsibility is given expression in the industry
Code by which radio broadcasters declare that they shall conduct
radio as an instrument of public expression, and that in the dis-
cussion of public questions, the people shall be given an opportu-
nity to hear all sides of controversial issues, and that the news of
the day shall be reported factually and analyzed objectively.

September 12, 1941 — 735
"Senator Bennett Clark has charged radio with keeping the air "hot with propaganda for war." In all critical periods there is a tendency on the part of those who harbor differing beliefs and conceptions to regard their opponents as "propagandists." Ever since this country embarked upon a program of strengthening its national defenses, radio has given wholeheartedly of its time and energies and resources to the furtherance of our preparedness program. Radio is "all-out" for national defense. If that is what the Senator means, radio admits it. And any malicious attempt to smear a great industry at a time when it is playing so important a part in the interest of the public welfare—any attempt to produce confusion, disbelief and disunity among our people—will fail, as all such efforts have failed in the history of the Union."

Sales

Dealer-Cooperative List

All NAB stations this week will receive a brief questionnaire asking for a list of dealer-cooperative advertisers. Please give this as prompt attention as possible.

When all returns are in, duplicates will be eliminated, the final compilation made, and copies will be sent to all those participating. This study, authorized by the Sales Managers Division, will be of real value to radio in two ways:

1. Working from this list, stations can direct their sales efforts most effectively in securing more dealer-cooperative advertising than in the past;

2. The list will also be used in national solicitation to obtain a dealer-cooperative advertising policy, more favorable to radio, from those manufacturers who now discriminate against this medium.

Thus by both methods, total radio revenue can be increased, but to make the study truly effective, your cooperation is essential.

The Hoover Co. Policy

Dealer advertising in radio, while not encouraged, is permitted by the Hoover Co. of North Canton, O.

D. K. Colvin, advertising manager of the company, has advised the NAB that his company confines its local advertising to six-week periods in the spring and fall when it conducts a special dealer campaign, and the company pays the entire cost of such local advertising.

"Because of the shortness of the period and the relatively small appropriation available to individual dealers, we have not been able to offer dealers a wrapped-up radio campaign. Since we pay the entire cost, we generally insist that it be spent in the same manner as the dealer spends the majority of his own advertising money," Mr. Colvin said.

"In certain instances, however, upon the request of individual dealers who were carrying on a consistent radio advertising effort, we have approved the expenditure of our funds in this medium.

"You asked whether we have any index of our dealers' attitude toward radio, and I can only say that we get practically no requests for such cooperation. We are confident that radio can be used very effectively by retail merchants, and we would be very happy if our local advertising setup permitted us to provide adequate funds for dealer participation in radio advertising. Under present circumstances it does not seem to fit in very well with our program, other than in those isolated instances which I have mentioned," Mr. Colvin declared.

Obviously, therefore, if more Hoover money is to be spent on radio, stations should endeavor to sell local campaigns to Hoover dealers for their own advertising, and then persuade them to request radio when the Hoover appropriation becomes available. Here is a good case of a company, open-minded towards radio, that declares it gets "practically no requests for such cooperation."

The NAB Department of Broadcast Advertising will continue to work with Mr. Colvin, stressing the success of other manu-

facturers with radio in dealer-cooperative advertising. When the survey mentioned in the previous item is completed, it will be a potent sales point to use with this and similar companies.

FAA Convention Held

Members of the Sales Managers Executive Committee are cooperating with the NAB Department of Broadcast Advertising by seeing to it that radio is represented at various national conventions which the Director cannot attend. Eugene Carr, WGAR, committee chairman, represented the NAB at the annual convention of the Financial Advertisers Association held in Cleveland September 8. Reports Mr. Carr:

"Practically every banking institution represented is now using radio and apparently most of them are using radio successfully. I was greatly impressed with the intelligent approach of these men to the use of the medium with various types of program and announcement campaigns. Not once did anyone so much as indicate that radio is an uncertain medium for banking institutions and, all in all, I would say that any salesman for a radio station should find banks and savings and loan associations very susceptible to our selling arguments."

National Dairy Council

The National Dairy Council, 111 North Canal St., Chicago, has appointed McCann-Erickson, Chicago, to handle its advertising campaign. Neal D. Kelly, assistant to the president of the National Dairy Council, represents the Council on advertising matters. Also, Carl F. Deyenroth was named by the Council to devise some plan, possibly radio, whereby syndicated advertising material could be furnished to independent dairy groups for local advertising. Earl Thomas is radio director of McCann-Erickson. Recommendations for radio by local members of the Council will be helpful.

Miscellaneous

Radio Time for Defense

With permanent government departments continuing their customary requests and national defense agencies asking more and more time on the stations of the country, it is impossible to make an entirely accurate estimate of the total time which radio has been and is contributing to the government. In an attempt to take some broad general measurements, the NAB recently made a test survey of representative radio broadcasting stations throughout the country. An analysis of the replies to a questionnaire discloses that during the month of July, 1941, the "average" station made the following contribution to the agencies directly involved in the national defense effort:

<table>
<thead>
<tr>
<th>Number of Announcements</th>
<th>Program Minutes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Man power ..................</td>
<td>116</td>
</tr>
<tr>
<td>Financing ..................</td>
<td>114</td>
</tr>
<tr>
<td>Morale ..................</td>
<td>47</td>
</tr>
</tbody>
</table>

| Totals .................. | 277 | 760 |

Since more than 800 radio stations are actively cooperating in this effort, it may be conservatively estimated that the broadcasting stations of the country are giving some 200,000 announcements and approximately 600,000 program minutes monthly directly to the cause of national defense.

In addition, the average station presented in behalf of government agencies other than those primarily engaged in defense work, ten announcements and 90 program minutes for the month of July. For the industry this means a total of 8,000 announcements and 7,200 program minutes.

In addition to this contribution by the individual stations, the network companies have devoted a considerable amount of time
to national defense. The National Broadcasting Company reports that during the first seven months of 1941 it presented 627 programs dealing with every phase of the defense effort, 473 of these programs having been carried by the Blue network of NBC and 154 by the Red network. During the month of August, Columbia Broadcasting System presented 112 programs in the interest of national defense, representing a contribution of 41½ hours of network time. Mutual Broadcasting System reports that during July alone it presented 41 network programs, totaling 16½ hours of network time, devoted to national defense.

Many of these broadcasts have been produced and presented by the network companies themselves; others have been broadcast in cooperation with various departments of the government, the military establishments and a large number of civil organizations engaged in defense activities. Carried over nationwide networks, and reaching people simultaneously throughout the country, these programs have been of inestimable aid to furtherance of our preparedness program and to maintenance of national morale.

**DAYLIGHT SAVING**

Last Saturday Neville Miller wrote Chairman Lea of the House Interstate and Foreign Commerce Committee, urging his support for daylight-saving time legislation that will provide uniformity and certainty of operation. We print the letter below.

Uncertainty still prevails as to the entire daylight-saving time situation. In the absence of Federal legislation meanwhile, it appears that New York will return to standard time with the coming of Sunday, September 28, and there is virtually no chance of Congress acting before then. Of the southeastern states which went on daylight-saving time in the middle of the summer at the President's request in order to conserve power, North Carolina and Virginia will also return to standard time on September 28, unless a request from the President should intervene to alter present plans. Alabama, Mississippi, and South Carolina will stay right on daylight-saving time until the President indicates the emergency is over, or Congress enacts a daylight-saving law. It is reliably reported here that the Federal Power Commission desires the southeastern states to stay on D.S.T. the year round.

September 6, 1941

Honorable Clarence F. Lea

House Office Building

Washington, D. C.

My dear Mr. Lea:

The situation in respect of the subject matter of your bill, H.R. 3343 (daylight-saving time), is a matter of grave concern to the radio broadcasting industry. As September 28 draws near when states on daylight-saving time return to standard time, radio stations in other states are faced with the necessity of changing over their broadcast schedules to meet the change in time observed by the network-originating stations in New York City. These change-overs are exceedingly difficult and expensive operations. It now appears that states in the southeastern area, just recently changed to daylight-saving time, may remain on daylight-saving time throughout the year as a result of the President's request; this involves another change-over for stations in those states. Furthermore, should your bill or a similar bill be enacted after September 28—and enactment before then appears to be unlikely—stations might again be forced to rearrange their program schedules. I think you can picture the confusion in which broadcasters now find themselves as a result of these uncertainties as well as the burden and expense involved.

We appeared at the hearing on H.R. 5343 and testified that the broadcasting industry is chiefly concerned with certainty and uniformity in the matter of daylight-saving time. Will you permit me again to urge in behalf of the broadcasting industry that you lend your support to a measure that will make daylight-saving time nationwide and for definite periods of time.

In ordinary times, partial observance of daylight-saving time is a heavy burden to the industry and creates confusion in the minds of the public. Any bill which does not provide for uniform observance of daylight-saving time for definite periods of time would only make the situation worse, rather than better, for all communication and transportation industries and the public served by them.

Sincerely yours,

Neville Miller

**A GOLDEN OPPORTUNITY**

Scarcely a day goes by that does not bring from one to a dozen requests from school teachers, clubs and other organized groups for copies of NAB publications. Most recently the requests have been for the second edition of HOW TO USE RADIO IN THE CLASSROOM. The ABC OF RADIO seems quite popular as does HOW TO USE RADIO and Dorothy Lewis’ report, BROADCASTING TO THE YOUTH OF AMERICA, has brought a veritable flood of requests.

As we have announced in previous editions of the REPORTS these books are available to stations at cost, the prices being as follows:

**HOW TO USE RADIO IN THE CLASSROOM**—

- 1 to 1,000—6each each
- 1,001 to 3,000—5 each
- 3,001 and over—4 each

**ABC OF RADIO**—

- 1 to 3,000—6 each
- 3,001 to 6,000—5¾ each
- 6,001 and over—5 each

**HOW TO USE RADIO**—

- 1 to 6,000—6 each
- 6,001 and over—5¾ each

**BROADCASTING TO THE YOUTH OF AMERICA**—

- 1 to 1,000—15 each
- 1,001 and over—12½ each

The primary purpose of issuing these booklets was to make them available to stations to distribute in their communities as a public relations activity. A lot of advantage can accrue to a station or to the combined NAB stations of a community by buying a quantity of these and having imprinted upon them the call letters of the station or stations participating in the distribution.

When these publications are sent out from headquarters to a local group in any quantity, two results follow: First, the local stations get no credit; and second, an undue burden of expense is placed upon the Association which in reality should be carried by the local stations.

It may be that stations are missing a splendid opportunity by not securing a quantity of each of the publications and wisely distributing them. It is a matter that is entitled to some careful thought.

**CHILDREN’S PROGRAM SURVEY**

Mrs. Dorothy Lewis, Vice President of the Radio Council on Children’s Programs, last year under RCCP and NAB auspices made a nation-wide tour primarily to study children’s radio programs. The results of her survey are set forth in an interesting report entitled, BROADCASTING TO THE YOUTH OF AMERICA, published by NAB.

So widespread has been the commendation of Mrs. Lewis’ splendid work on children’s programs and in the field of educational and cultural programs generally, that a second tour and survey has been scheduled. The general purpose will be to follow up the survey on children’s programs; to encourage local radio councils already established, and to assist in organizing and founding others; to hold conferences with radio station executives on the subject of children’s programs, to visit colleges and radio educational councils, to promote good will and enlist
cooperation between public and industry and to hold conferences with unorganized groups.

Mrs. Lewis plans to leave her New York office on September 21. Her itinerary follows:

September 22—Albany, New York
September 23—Syracuse and Rochester, New York
September 24—Erie, Pennsylvania
September 25—26—Cleveland, Ohio
September 27—Toledo, Ohio
September 28—29—Indianapolis, Indiana
September 30—Peoria, Illinois
October 1—Rockford, Illinois
October 2—3—Chicago, Illinois
October 4—Davenport, Iowa
October 5—Iowa City, Iowa
October 6—Cedar Rapids, Iowa
October 7—Des Moines, Iowa
October 8—9—Kansas City, Missouri
October 10—Omaha, Nebraska
October 11—Omaha and Lincoln, Nebraska
October 12—13—McCook, Nebraska (Nebraska Federation of Women's Clubs)
October 14—Travel
October 15—Denver, Colorado
October 16—Boulder, Colorado, and Cheyenne, Wyoming
October 17—Rock Springs, Wyoming
October 18—Ogden, Utah
October 19—20—Salt Lake City, Utah
October 21—Provo, Utah
October 22—Boise, Idaho
October 23—Portland, Oregon
October 24—Seattle, Washington
October 25—26—Spokane, Washington
October 27—Medford, Oregon
October 28—Sacramento, California
October 29—Berkeley, California
October 30—31—San Francisco, California
November 1—Fresno, California
November 2 to 11—Los Angeles, San Diego and other Southern California points
November 15—Phoenix, Arizona
November 16—Travel
November 17—Albuquerque, New Mexico
November 18—Amarillo, Texas
November 19—Oklahoma City, Oklahoma
November 20—21—Fort Worth, Texas
November 22—San Antonio and Austin, Texas
November 23—Travel
November 24—Dallas, Texas
November 25—Shreveport, Louisiana
November 26—Jackson, Mississippi
November 27—Tuscaloosa, Alabama
November 28—Birmingham, Alabama
November 29—30—Nashville, Tennessee
December 1—Louisville, Kentucky
December 2—3—St. Louis, Missouri
December 3—4—5—Chicago, Illinois.

The schedule for return trip will be arranged and notices sent later.

This project is one of outstanding importance to the industry. It is to be hoped, therefore, that broadcasters in the various areas through which Mrs. Lewis will pass and where she will hold meetings will actively cooperate with her. From time to time during the course of the tour, communication will be had in advance with station managers to advise them of the details of Mrs. Lewis' plans.

BAR COMMITTEE REPORT

The American Bar Association's standing committee on communications finds that public opinion strongly favors the American System of Broadcasting. The committee, in its annual report printed below, also suggested a fresh start in consideration of network regulations.

This committee's activities throughout the year have in general followed the objectives set out in its last year's report. The committee has kept in touch with the Section of International and Comparative Law, and with the Federal Communications Bar Association, and has observed public opinion as it reacted to the various matters which have been under active discussion.

On May 23, the committee sponsored a luncheon in honor of the editorial staff of the Communications Bar Journal. Addresses were made by Chairman James Lawrence Fly of the Federal Communications Commission and General Counsel John E. Lockwood of the Office for Coordination of Commercial and Cultural Relations Between the American Republics. Eighty-eight persons attended, including Honorable Clarence F. Lea, Chairman of the Committee on Interstate and Foreign Commerce of the House of Representatives, and several members of the Communications Commission.

Inquiries by this committee among members of the Association developed the following as topics which are at present regarded as most important for the committee to concern itself with: maintaining a "free radio" and seeing to it that radio programs give to the public the opportunity of hearing a full variety of points of view regarding controversial topics; the problem of keeping government out of proprietorship of radio stations; extent of governmental regulation of operations and programs; current legislative proposals; important court decisions; developments as to procedure before the Federal Communications Commission.

"Free Radio"

1. Public opinion appears to remain, as reported in last year's committee report, strongly in favor of non-government ownership and management of stations, but in favor of their operating under reasonable government regulation.

2. It is vitally important that radio programs shall present to the public opposing points of view on controversial subjects in a reasonably well-balanced way. The committee believes that the proper situation with regard to this is reasonable balance.

Plainly, such a result could not be accomplished by the haphazard method of seeing to it that anyone who desires to broadcast may do so, if that were possible; the balance between conflicting points of view can be attained only by intelligent and affirmative executive effort. Any agency which undertakes this task of maintaining a proper balance should be and will be subject to searching criticism. It is our view that whatever the difficulties of attaining this balance when programs are privately managed, the difficulties would be immensely more serious if programs were under government control, because in this country government control means party control and is closely tied in with politics.

3. What is the proper construction of that part of Section 326 of the Communications Act which provides that the Commission shall not "interfere with the right of free speech by means of radio communication"? The Commission has recently held that it is misconduct for a licensee to broadcast editorials urging the election of various candidates or supporting one side or another of questions affecting the public, saying: "The broadcaster cannot be an advocate." This is consistent with what has just been said about the necessity of preserving a balance of viewpoints in present views on non-controversial subjects.

The Constitution, providing that Congress shall make no law "abridging freedom of speech or of the press," has been immemorially construed as protecting a newspaper publisher in the right to favor one candidate and attack opposing candidates; no one has ever suggested that a newspaper publisher has to make his paper judicial. It seems, then, that our conclusion as expressed in the preceding paragraph can be supported only if a new and special meaning is given to the words "right of free speech by means of radio communication."

Report and Regulations Concerning Chain Broadcasting

On May 2, 1941, the Commission issued regulations concerning radio networks and their affiliates, undertaking for the first time to deal with these relationships. At the same time, the Commission, two members dissenting, made a detailed report entitled "Report on Chain Broadcasting," covering this matter, based on the hearings held in 1938 and 1939. The regulations provide, in brief, that no license shall be granted to a standard broadcast network, meaning an agreement where two or more stations are "owned and controlled" by the same station, or where there is "affiliation". The Commission also made useful recommendations regarding networks, including the following:

1. That networks cease "affiliation;" that is, tie their stations in a "chain" so that one station is "owned and controlled" by another, and that the stations cooperate in a reasonably well-balanced way. The committee believes that the public interest is best served by the development of a system of radio broadcasting which will provide for the fullest variety of points of view, and that the public's interest will be served by the non-government ownership and management of stations.

2. It is vitally important that radio programs shall present to the public opposing points of view on controversial subjects in a reasonably well-balanced way. The committee believes that the proper situation with regard to this is reasonable balance.

3. What is the proper construction of that part of Section 326 of the Communications Act which provides that the Commission shall not "interfere with the right of free speech by means of radio communication"? The Commission has recently held that it is misconduct for a licensee to broadcast editorials urging the election of various candidates or supporting one side or another of questions affecting the public, saying: "The broadcaster cannot be an advocate." This is consistent with what has just been said about the necessity of preserving a balance of viewpoints in present views on non-controversial subjects.

The Constitution, providing that Congress shall make no law "abridging freedom of speech or of the press," has been immemorially construed as protecting a newspaper publisher in the right to favor one candidate and attack opposing candidates; no one has ever suggested that a newspaper publisher has to make his paper judicial. It seems, then, that our conclusion as expressed in the preceding paragraph can be supported only if a new and special meaning is given to the words "right of free speech by means of radio communication."

738—September 12, 1941
satisfactory or unsuitable or contrary to the public interest, or from substituting a program of outstanding local or national importance. No license is to be granted to a network, or to any person united in control with a network, for more than one standard broadcast station where one or more of the three larger networks have a station in any locality where the existing standard broadcast stations are so few or of such unequal desirability that competition would be substantially restrained by such licensing. No license is to be issued for the disestablishment of a network organization which simultaneously operates more than one network in such manner that the networks overlap. No license is to be granted to a station having a contract with a network preventing it from fixing or altering its rates or time to be used for other programs than those of the network. Some maintain and others deny that the Commission's power, under the terms of the Communications Act, to regulate the business relations between stations and networks. Aside from this question of authority, the wisdom and usefulness of the new regulations is being vigorously disputed in some quarters, while upheld in others. Of the three larger networks, National and Columbia attack them, and Mutual, having contended that regulation of this sort is intended to be adopted to correct monopolistic practices in the industry, approves of the new regulations in principle though not in entire detail.

It seems reasonable to believe that if for any cause our present advertising-supported, privately operated system should break down, then clearly our radio system would have to be supported by taxation, and this means ownership by the government, and government domination of program and of the entire field of broadcasting. It is only fair that the government who controls the radio to avoid government proprietorship of the broadcasting stations will want to be reasonably sure that any proposed regulations can be put into effect without upsetting our present privately operated system. On the other hand, officials who do not believe that serious cases have occurred or if the government assumed proprietorship of the radio system, and, further, those who believe that continuing success of large corporations is contrary to the public interest, will feel rather free in trying experiments with new forms of regulation designed to stop monopolistic practices or to prevent the assumption of proprietorship by the majority and of the minority of the Commission, both since, are very far apart, is emphasized by the minority's statement that "...some of the corrective processes suggested by the majority may easily result in faults which are far more basic than the known defects which exist today..." The minority believe, further, that the decision of the majority, instead of resulting in "free competition," would "more likely create 'anarchy' or a kind of business chaos in which the service of the public would suffer." The great differences in fundamental approach not only account for the difference between the conclusions reached, but for the extreme manner that each side shows for the other's views, and the somewhat extreme attitudes noticeable in the majority and in the minority reports. A similar situation is observable in comparing the arguments submitted by the major networks with the views of the majority of the Commission.

Thus the discussions about these problems proceed to be in a relatively primitive state—a state not very apt, at the moment, for arriving at a sound solution. Since no immediate action is being forced by circumstances, it is the feeling of this Committee that further consideration, from many angles, is advisable before the government takes action. Our minds are open as to whether or not the measures favored by the majority of the Commission are wise. Hearings have been held before the Senate Committee on Interstate Commerce, but at the time of this report no action has been taken by the committee.

In the important task of trying to get a workable solution, we feel that the following should be taken into account. There are undoubtedly other considerations which have to be dealt with in seeking to arrive at the right answer in this complicated matter. These statements are not set out here in behalf of one side or the other of the existing controversy, but are stated as a starting point for a fresh consideration as to what solution is really in the public interest. We are conscious that perhaps neither the majority nor the minority of the Commission would subscribe to them all. (a) As between the special disadvantages of government ownership and the special advantages of private ownership in the radio field, the latter are relatively slight, under proper government regulations, as compared with the serious dangers of public ownership. (b) Technical and economic problems of radio alike point to the conclusion that, if private proprietorship of the radio is retained, we must endure a considerable extent of monopoly and a considerable degree of "bigness" in the network units involved. The problem is a vast one, and there cannot be such a thing here as free and uncontrolled competition. (c) Private interests need to be controlled by government regulation in the broadcasting field. Smaller competitive businesses should be encouraged, and monopoly discouraged, as far as possible without upsetting the private-proprietorship system. How far such regulation can safely go is a complicated question of fact. (d) In deciding how far it is safe to go in regulating the business of broadcasting, it is necessary to bear in mind that if regulation proceeds to the point where the public becomes dissatisfied with the service it gets, the public, which now favors private ownership, might become inclined to favor public ownership against its long-term interest, as we believe. (e) While there is and should be no "vested interest" in licenses, it is necessary for the proper development and maintenance of a successful non-governmental radio system that private capital be offered reasonable chances of safety and of profit. The field being a technical and a rapidly developing one, it is necessary that large amounts be spent for equipment, for programs, for experiments looking to improvement, and for maintaining lucrative relationships with advertisers. Private capital cannot be expected to risk the money necessary for these unless governmental regulation is such as to afford reasonable incentives to the private enterprise to perform important and nationwide services without the aid of government money, it is essential to the public interest to give some substantial assurance of profit and of safety to money that private capital shall so invest.

In judging whether any particular form of proposed regulation involves danger of upsetting the existing private-proprietorship status, the fact must be taken into account that practically the whole of the very large expense of maintaining our present radio service to the public is being borne by advertisers. The only reason they are willing to spend this immense sum is that, because of a large listening audience, they are able to make enough sales through radio advertising to justify the expenditure. Thus if regulation went to the point of altering program content so as to diminish the number of listeners, the business advantage which makes it possible for advertising sponsors to assume this financial burden would be immediately impaired. The same is true of any type of regulation which prevents advertisers from securing the coverage needed to maintain the selling effect of their radio programs.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

The Federal Communications Commission granted nine permits for the construction of new stations during the month of August. A comparative table by months follows:

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, September 15. They are subject to change.

Monday, September 15
KPAC—Fort Arthur College, Fort Arthur, Texas.—Modification of license, 1220 kc, 1 kw, unlimited, DA-night.
Consolidated Hearing

September 12, 1941 — 739
NEW—Dorman Schaeffer, Klamath Falls, Ore.—C. P., 1100 kc., 250 watts, unlimited.

Tuesday, September 16

KGLU—Gila Broadcasting Company, Safford, Ariz.—Renewal of license, 1150 kc., 250 watts, unlimited.

Consolidated Hearing

WARM—Union Broadcasting Company, Scranton, Pa.—License to cover C. P., has C. P., for 1100 kc., 250 watts, unlimited.

NEW—George Brooks, Jr., Scranton, Pa.—C. P., 1100 kc., 250 watts, unlimited.

Wednesday, September 17

Broadcast

Further hearing before the Commission to be held in Hearing Room 6121, New Post Office Building, 12th Street and Pennsylvania Avenue, N. W.

Investigation to determine what policy or rules, if any, should be promulgated in connection with operation of new high frequency (FM) broadcast stations and for future acquisition of standard broadcast stations by newspapers, pursuant to Order No. 70.

Friday, September 19

FUTURE HEARINGS

During the past week the Commission has announced the following future hearings in broadcast cases. They are subject to change.

September 29

Further Hearing

Further Hearing

KWK—Thomas Patrick, Inc., St. Louis, Mo.—C. P., 680 kc., 50 KW, unlimited, DA-day and night.

Consolidated Hearing

WCAM—City of Camden, Camden, N. J.—Renewal of license, 1310 kc., 500 watts, S-WTNJ and WCAP.

WCAM—City of Camden, Camden, N. J.—Modification of license, 1310 kc., 500 watts, S-WCAM, require facilities WTNJ.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Renewal of license, 1310 kc., 500 watts, S-WTNJ and WCAM.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Modification of license, 1310 kc., 500 watts, S-WCAM, require facilities WTNJ.

WTNJ—WOAX, Incorporated, Trenton, N. J.—Renewal of license, 1310 kc., 500 watts, S-WCAM and WCAP.

WTNJ—WOAX, Incorporated, Trenton, N. J.—Modification of license, 1310 kc., 500 watts, unlimited, require facilities of WCAM and WCAP.

WDAS—WDAS Broadcasting Station, Inc., Philadelphia, Pa.—C. P., 1260 kc., 1 KW night, 5 KW day, DA-night, unlimited.

October 24

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

Independent Broadcasting Co., Springfield, Mo.—Granted construction permit (B-4-P-5616) for new standard broadcast station to operate on 1140 kc., 250 watts, unlimited time.

Pacific Coast Broadcasting Co., Pasadena, Calif.—Granted construction permit (B-5-P-3261) for new standard broadcast station to operate on 1110 kc., 10 KW power, unlimited time, using directional antenna day and night, subject to whatever action the Commission may finally adopt with respect to Order No. 84 (multiple ownership), and approval of antenna site.

WAKR—Summit Radio Corp., Akron, Ohio.—Granted special service authorization to operate with 5 KW power daytime, with a conventional antenna system during daytime, for the remainder of the regular license period. (B2-SSA-3.) Now operates on 1390 kc., 1 KW, unlimited time, DA-day and night (under C. P., 5 KW).

KENO—George Penn Foster, Maxwell Kelch, and Calvert Charles Applegate, d/b/a Nevada Broadcasting Co. (Assignees), Nevada Broadcasting Co. (Assignee), Las Vegas, Nev.—Granted consent to assignment of construction permit of existing station—George Penn Foster, Maxwell Kelch, and Calvert Charles Applegate, d/b/a as Nevada Broadcasting Co. to George Penn Foster, Maxwell Kelch, and Calvert Charles Applegate, d/b/a Nevada Broadcasting Co. to Nevada Broadcasting Co. (B5-AP-34).

KBIZ—J. D. Flavey, Ottumwa, Iowa.—Granted modification of license (B4-ML-1077) to increase power to 250 watts, unlimited time. (Now operates on 1210 kc., 100 watts, unlimited time.)

KOW—Pacific Agricultural Foundation, Inc., San Jose, Calif.—Granted construction permit (B-5-P-3021) to increase power to 50 KW night and day; install new transmitter and make changes in directional antenna for day and night use, conditioned upon submission within 6 months for approval of plan of independent financing; and subject to whatever action the Commission may finally adopt with respect to Order No. 84 (Multiple Ownership). Now operates on 710 kc., 5 KW, unlimited time, DA-day and night.

WEAN—Yankee Network, Inc., East Providence, R. I.—Granted construction permit (B1-P-1244) authorizing changes in directional antenna for nighttime use and increase in night power to 5 KW. (Now operates on 790 kc., 1 KW night, 5 KW day, unlimited time.)

National Broadcasting Co., Inc., New York, N. Y.—Granted extension of authority to transmit recorded programs to all broadcast stations in Canada licensed to operate by the Canadian Government, which may be heard consistently in the United States, thereby continuing the exchange of good-will programs (B1-FP-94).

DESIGNATED FOR HEARING

KSFO—The Associated Broadcasters, Inc., San Francisco, Calif.—Construction permit (B-5-P-2776, Docket 6005) amended so as to request change in frequency to 730 kc., increase in power to 50 KW, install new transmitting equipment and directional antenna for day and night use. (Now operates on 360 kc., 1 KW night, 5 KW-LS, unlimited time.)

News Syndicate Co., Inc.; FM Radio Broadcasting Co., Inc.; WBCA, Knickerbocker Broadcasting Co.; WBNX Broadcasting Co., Inc.; WEDV, Debs Memorial Radio Fund, Inc.; WVOG, Greater New York Broadcasting Corp.; WNEW, Wodhaum Corp.; Mercer Broadcasting Co.—Designated for consolidated hearing to determine whether, if any, FM applications should be granted on applied-for frequency or on any of three remaining unassigned Class B frequency channels in that area. (The FM situation in the New York area was the subject of a press release June 17 last.)
MISCELLANEOUS

W49D—John Lord Booth, Detroit, Mich.—Granted extension of special temporary authority to operate an RCA 1 KW transmitter on 14900 kc., using a temporary antenna for the period September 5 to November 4 pending completion of construction in accordance with construction permit (B2-PH-20), conditionally.

W45D—Evening News, Detroit, Mich.—Granted extension of special temporary authority to operate a transmitter experimentally under current license for the period September 1 to September 25, for the purpose of relaying Army maneuvers in Louisiana to radio station WSM.

WEAU—Ceritral Broadcasting Co., Eau Claire, Wis.—Granted permit to operate on 1060 kc., 10 KW, DA-day and night, unlimited time.

Utica Broadcasting Co., Inc., Utica, N. Y.—Granted motion for order to take depositions in re application for new station.

W55B—KG6, 1705 First Ave., Miami, Fla.—Denied petition for postponement of the taking of depositions by intervenor in re application for new station.

WAAQ—WGAR Broadcasting Co., Cleveland, Ohio.—Granted special temporary authority to operate a composite transmitter on 1620 kc., using 5 KW power, of approximately 5 watts, using the call letters of Relay Station WAAQ, for the period beginning October 10, 1941, and ending upon conclusion of the Louisiana War Games.

W75C—The Moody Bible Institute of Chicago, Chicago, Ill.—Granted special temporary authority to operate frequency modulation station commercially on 47500 kc., special emission for frequency modulation with transmitter located at R. D. #1, Addison, Ill., as described as W. E., Type 50A-1, Serial No. 103, maximum rated carrier power 1 KW for a period not to exceed 90 days.

W38B—The Yankee Network, Inc., Boston, Mass.—Granted extension of special temporary authority to operate frequency modulation station commercially on 43900 kc., 1000 watts, power, special emission for frequency modulation, using the transmitter of high frequency experimental station WIXER at summit of Mount Washington, Sargent's Purchase, N. H., for a period beginning September 15, 1941, to not later than November 13, 1941, pending completion of construction permit.

WCRC—Columbia Broadcasting System, Inc., New York, N. Y.—Granted extension of special temporary authority to use already licensed Mackay Radio and Telegraph Company point-to-point transmitter, Type 34-C, Serial No. 3615, on 6080, 6120, 6170, 9630, 11830, 18270, 17830, 21520, and 21570 kc. At emission, in order to conduct antenna tests for International Broadcast Stations WCRC and WCBN, for a period of 30 days beginning September 11, 1941, to not later than October 10, 1941.

WNAT—University of Oklahoma, Norman, Okla.—Granted extension of special temporary authority to remain silent for the period beginning September 15, 1941, and ending not later than September 22, 1941.

WCLE—United Broadcasting Co., Cleveland, Ohio.—Denied request for special temporary authority to operate from sign-off time (September 6:45 p. m. EST), to 7 p.m. EST, for a period beginning September 4, 1941 and ending not later than September 30, 1941, only, in order to carry baseball games and half-hour network programs (B2-S-282).

W5XFM—The Crosley Corp., Cincinnati, Ohio.—Granted extension of special temporary authority to operate a high frequency experimental FM broadcast station on 3210 kc., 1000 watts power, special emission for frequency modulation, with the transmitter located at corner Vine and Fifth Streets, Cincinnati, Ohio, and described as Crosley, Type EDS-213-M, maximum rated carrier power output 1000 watts, for the period beginning September 29, 1941, and ending not later than December 27, 1941.

The Sun Company of San Bernardino, Calif.—Placed in pending file pursuant to Order No. 79, application for construction permit (B5-PH-114) for new FM broadcast station.

W频—Burlington Broadcast Stations, Inc., Burlington, Vt.—Adopted order setting aside Commission's action taken October 31, 1940, February 13, 1941, and June 17, 1941, with respect to application of Frequency Broadcasting Corp. (B1-PH-47), and modification of construction permit (B1-MP-6) for new FM broadcast station; designated said applications for hearing; and denied petition for rehearing filed by Frequency Broadcasting Corp.

KPAC—Port Arthur College, Port Arthur, Tex.—Denied petition to reconsider and grant the application for modification of license to increase power to 1 KW day and night and make changes in the directional antenna system employed during nighttime; hearing now scheduled for September 15, 1941, on petition for rehearing filed by licensee.

WBT—Columbia Broadcasting System, Inc., Charlotte, N. C.; KFAB, KFAB Broadcasting Co., Lincoln, N. B.; and WBBM, Columbia Broadcasting System, Inc., Chicago, Ill.; WJAG, The Norfolk Daily News, Norfolk, Nebr.—Postponed until such time as the Commission may consider applications to be filed looking toward improving service with a minimum of interference, the joint hearing tentatively scheduled for September 12, 1941 — 741
October 7, 1941, on applications of WBT for construction permit, KFAB for construction permit, WBMM for modification of license, and WJAG for construction permit (Docket Nos. 5260, 5270, 5271, 5864.)

WBYN—Roy L. Albertson, Buffalo, N. Y.—Granted special temporary authority to operate from 8:30 a. m. to 10 a. m. EST, Monday through Friday, beginning September 8, 1941, and ending not later than September 16, 1941, provided WSVS remains silent.

WSVS—Board of Education, City of Buffalo, N. Y.—Granted special temporary authority to remain silent for the period beginning September 9, 1941, and ending not later than September 16, 1941, in order to reorganize school Defense Classes.

WTNJ—WOAX, Inc., Trenton, N. J.—Denied request for special temporary authority to operate simultaneously with WCAP during the hours from 2 to 4 p. m. EST, on October 4, 11, 18 and 25, and November 1 and 8, 1941, only, in order to broadcast play by play description of the football games of Princeton University.

APPLICATIONS FILED AT FCC

660 Kilocycles

KGIR—KGIR, Incorporated, Butte, Mont.—Construction permit to install new transmitter, antenna, increase in power from 5 to 50 KW, change in frequency from 1370 to 600 kc.

KOIN—KOIN, Inc., Portland, Oregon.—Construction permit to make changes in equipment, changes in directional antenna system for use day and night, change frequency from 970 to 660 kc., and increase power from 5 to 25 KW.

850 Kilocycles

WEEU—Herks Broadcasting Co., Reading, Pa.—Construction permit to install directional antenna for night use, change hours from daytime to unlimited time, using power of 1 KW day and night. Amended: To request 5 KW power, install new transmitter and make changes in proposed directional antenna.

860 Kilocycles

WSON—Paducah Broadcasting Co., Inc., Henderson, Ky.—Modification of construction permit (B2-P-3149) as modified, requesting increase in power from 250 watts daytime to 500 watts daytime and changes in transmitting equipment and extension of commencement and completion dates to 60 days after date of grant and 180 days, respectively.

880 Kilocycles

KDLR—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Construction permit to make changes in transmitter, changes in directional antenna for day and night use, change in frequency from 1320 to 850 kc., increase in power from 5 to 10 KW.

WHE—WHER Broadcasting Co., Kansas City, Mo.—Authority to determine operating power by direct method.

950 Kilocycles

KPRC—Houston Printing Corp., Houston, Texas.—Modification of construction permit (B3-P-2791) as modified, for installation of directional antenna. Increase in power, requested new transmitter, increase in power from 5 KW to 5 KW night, 10 KW day, using directional antenna night.

WWJ—The Evening News Assn., Detroit, Mich.—Authority to determine operating power by direct method.

WWJ—The Evening News Assn., Detroit, Mich.—License to cover construction permit (B2-P-2880) as modified, for increase in power, directional antenna for night use, and changes in transmitting equipment.

980 Kilocycles

WGBG—Greensboro Broadcasting Co., Inc., Greensboro, N. C.—Modification of construction permit (B3-P-2472) for a new broadcast station, requesting move of transmitter and extension of commencement and completion dates from 10-5-41 and 4-5-42 to 30 days after grant and 180 days thereafter respectively.

1150 Kilocycles

WSIN—Hearst Radio, Inc., Milwaukee, Wis.—Construction permit to move old RCA 1-D-A transmitter to site of new transmitter and use as auxiliary transmitter, for emergency purposes.

1170 Kilocycles

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Modification of special service authorization for unlimited time, power of 25 KW day and night, 50 KW day, using directional antenna at night, period ending 2-14-42.

1240 Kilocycles

WSNJ—Eastern States Broadcasting Corp., Bridgeton, N. J.—Modification of license to move studio from Upper Deerfield Twp., N. E. of Bridgeton to Bridgeton, N. J.

1260 Kilocycles

WFBM—WBFM, Inc., Indianapolis, Ind.—Authority to determine operating power by direct method.

1310 Kilocycles

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Modification of construction permit (B3-P-2641) as modified, for move of transmitter, increase in night power and installation of directional antenna for night use, and change in frequency, requesting extension of completion date from 9-23-41 to 1-23-42.

1320 Kilocycles

WATR—The WATR Co., Inc., Waterbury, Conn.—License to cover construction permit (B1-P-3032) as modified for increase in power, install new transmitter and changes in directional antenna for day and night use.

WATR—The WATR Co., Inc., Waterbury, Conn.—Authority to determine operating power by direct method.

1340 Kilocycles

WGAA—Northwest Georgia Broadcasting Co., Cedartown, Ga.—Authority to determine operating power by direct method.

WGAA—Northwest Georgia Broadcasting Co., Cedartown, Ga.—License to cover construction permit (B3-P-3029) as modified for a new broadcast station.

KIMO—The Courier-Post Publishing Co., Hannibal, Mo.—License to cover construction permit (B4-P-1011) as modified, for a new broadcast station.

1360 Kilocycles

KMO—Carl E. Haymond, Tacoma, Wash.—License to cover construction permit (B5-P-2707) as modified, for new equipment, changes in antenna system, and increase in power.

1400 Kilocycles

KRKO—Everett Broadcasting Co. Inc., Everett, Wash.—Special service organization to operate unlimited time, period ending 12-1-41.

1420 Kilocycles

KUJ—KUJ, Inc., Walla Walla, Wash.—Authority to determine operating power by direct method.

1440 Kilocycles

KPRO—Broadcasting Corporation of America, Riverside, Calif.—Modification of construction permit (B5-P-2296) for a new broadcast station, requesting change in type transmitter, approval of antenna and approval of transmitter and studio sites.

1450 Kilocycles

WMSD—Muscle Shoals Broadcasting Corp., Muscle Shoals City, Ala.—Transfer of control from Estelle P. Chapman, Transferor to Joseph Wiggs Hart, Joseph Carl Russell and Frank Mitchell Farris, Jr., transferees, through sale of 999 shares of stock.
FEDERAL TRADE COMMISSION ACTION

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Champion Battery Company—William B. Bartlett, trading as Champion Battery Co., 549 West Washington St., Chicago, engaged in the sale and distribution to retail dealers of a so-called sales stimulator plan including certificates and merchandise to be used in connection with the plan, is charged, in a complaint with unfair and deceptive acts and practices in commerce. (4578)

Eastern Herb Company—Robert T. K. Hec, trading as The Eastern Herb Company, 1156 Seventh St., San Diego, Calif., is charged in a complaint with misrepresentation. (4582)

Gulf Oil Corporation, Pittsburgh, engaged in manufacturing and distributing two insecticide products designated “Gulf Live-stock Spray” and “Gulfspay,” is charged in a complaint with misrepresentation. (4581)

Normis Corporation—Charging the use of a deceptive sales plan in the sale of prefabricated and ready-cut houses advertised as “Normis Ready-Cut Homes,” a complaint has been issued against Normis Corporation, formerly of Lafayette, Ind., and now being operated from a so-called branch office in Jacksonville, Fla.; Simon Levy, its principal stockholder, Jacksonville, Fla.; Stoker Corporation of America, Indianapolis; and Charles B. Levy, its principal stockholder. (4580)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders during the past week:

G & F Sales Company—Orders prohibiting the use of lottery methods in the sale of commodities in commerce have been issued against a Chicago and an Indianapolis firm each selling miscellaneous merchandise, and a Brooklyn manufacturer of smoking pipes and other articles. The respondents are Clara Feitler, Lillian M. Granger and L. H. Murray, trading as G & F Sales Co., Chicago; Hamilton, Harris & Co., Indianapolis; and Continental Briar Pipe Co., Inc., Brooklyn.

In the case against the three Chicago dealers, trading as G & F Sales Co., the proceeding was dismissed as to the former respondent, Adolf Feitler, now deceased. (4155-4253-4293)

Woodfinishing Products Company, 208 West Washington St., Chicago, which operates a factory in Grand Rapids, Mich., and which manufactures and distributes serving trays, including certain trays designated as “Hasko DeLuxe Buffet Trays” and “Hasko Trays,” has been ordered to cease and desist from misrepresentation in the sale of its products. (4442)

Ozon Chemical Company, Inc., trading as Duncan Chemical Co., 607 Delmonte Way, St. Louis, has been ordered to cease and desist from misrepresentation in the sale and distribution of a medicinal preparation designated “Duncan’s Ozon.” (4472)

W. Hillyer Ragsdale, Inc., W. Hillyer Ragsdale, Annie M. Ragsdale, Marshall D. Ragsdale and Ida J. Ragsdale, doing business under the names and styles of W. Hillyer Ragsdale, W. Hillyer Ragsdale, Inc., and Ragsdale Candies, 307 North Walnut Street, East Orange, N. J., have been ordered to cease and desist from misleading representations in the sale of instruction courses, outfits and supplies represented as offering opportunities for persons to establish candy businesses in their homes. (4472)

Sanford Mills, of Sanford, Maine, and its subsidiary and exclusive sales agency, L. C. Chase & Co., Inc., 295 Fifth Ave., New York City, have been ordered to cease and desist from representing as “moth-proof” upholstery fabrics which are not permanently moth-proof. (4084)

September 12, 1941 — 743
Schuler Chocolates, Inc.—Orders prohibiting the use of lottery methods in the sale of commodities in commerce have been issued against a Winona, Minn., corporation selling candy, and a Milwaukee firm selling miscellaneous merchandise. The respondents are Schuler Chocolates, Inc., also doing business as Schuler Candy Co., Winona, Minn., and Continental Premium Mart, Milwaukee. (4385-4462)

Stomar Manufacturing Company—Joseph H. Kevorkian, Joseph D. Kevorkian and Louis Stone, trading as Stomar Manufacturing Company, 1027 Ridge Ave., Philadelphia, engaged in the manufacture and sale of steel kitchen utensils known as graters and shredders, have been ordered to cease and desist from misrepresentation in the sale of their products. (4722)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Elizabeth Arden Sales Corporation—681 Fifth Ave., New York, has stipulated to discontinue certain representations in the sale of cosmetics designated "Ardena Sensation Cream," "Joie de Vivre" and "Ardena Skin Lotion." (02873)

Biofoods Corporation, 16 West 22nd St., New York City, engaged in selling certain health food products, has stipulated to cease and desist from representing that "Fortified Palm-Co." is "the modern calcium phosphorus Vitamin D aid," or has a beneficial effect on symptoms of nervousness, low resistance, soft nails, brittle nails and poor endurance, unless these conditions are due to a lack of calcium and phosphorus in the diet, associated with a deficiency of Vitamin D; that "Vimm's Wheat Germ Oil Vitamin E Capsules" are a concentrated source of Vitamin E; that "Vimm's Powdered Wheat Germ" or "Vimm's Whole Wheat Germ" are excellent sources of iron, copper, phosphorus, potassium, manganese, magnesium and other valuable minerals; or that "Vimm's Powdered Wheat Germ" is "ideal" for infant feeding and those on a bland diet. (02868)

Cole and Company, an advertising agency, Sterick Building, Memphis, Tenn., which disseminated advertisements for cosmetics on behalf of Newbro Manufacturing Company, Atlanta, Ga., has stipulated that it will cease and desist from disseminating advertisements which represent that the Atlanta Company's product "Tuxedo Club Pomade" invigorates the scalp or helps the hair as nothing else will. (02872)

Ever-Dry Laboratories, Inc., also trading as Trans-Pacific Importers, with principal office and place of business in Los Angeles, Calif., and Robert W. Miller, trading as Hula-Leaf Products, with place of business at Honolulu, Hawaii, engaged in the sale and distribution of perfumes, have stipulated in connection with the sale of their products to cease and desist from representing that the following named perfumes: "Ginger," "Sandalwood," "Pikaki," "Poni Moi," or "Pomerini" are made in Hawaii from the tropical flowers of Hawaii, and from use of any representation or statement which may convey the belief that the products are made in or are products of Hawaii; or from representing that the perfumes represent the exotic fragrance of tropical flowers from Hawaii. (3209)

Laboratory Products Company—Harry J. Knorr, trading as Laboratory Products Company, Glendale, Calif., formerly engaged in selling and distributing a preparation called "Van-Tox," consisting of two kinds of tablets containing the same active ingredients but in different quantities, and which were described as "Special Formula Single Stg. No. 1" and "Special Formula Double Stg. No. 2," the tablets comprising a treatment for alcoholism and the liquor habit, has stipulated that in connection with the sale or distribution of the preparation designated "Van-Tox" or any other preparation composed of substantially similar ingredients, he will cease and desist from representing that the preparation is a cure or remedy or a significant treatment for chronic alcoholism or the liquor habit; that use of the preparation will overcome the craving or desire for or indulgence in alcohol; that the preparation is in all cases safe or harmless; or that it contains no harmful drugs. (3207)

Lindstrom Hatchery & Poultry Farm, Clinton, Mo., engaged in the sale and distribution of chicks in commerce, has stipulated to cease and desist from certain representations. (3208)

Parks-Phillips Health Foods Company—Stanley N. Phillips and Walter M. Grome, doing business as Parks-Phillips Health Foods Company, formerly Parks Health Food Company, 1542 Knowlton St., Cincinnati, engaged in selling medicinal preparations, have stipulated to discontinue representing that "Phillips Alfalfa and Mint Tea" is of any benefit in the treatment of prostate gland trouble, overactivity, arthritis and rheumatism; that "Phillips Wheat Germ Meal" is rich in four vitamins, revitalizes, and restores needed elements to the diet; that "Phillips Wheat Germ Meal" produces any beneficial results in cases of nervous conditions and faulty digestion except those caused by a deficiency of Vitamin B; that "Phillips Vegetable Mucineer" is of any appreciable benefit in the treatment of stomach ulcers or irritations, hyperacidity or colon irritation; that "Vigo Garlic Tablets" are rich in Vitamins A, B and C or are rich in potassium, calcium, phosphorus, iodine or food chemicals or that they possess any nutritional value or produce any appreciable therapeutic effect in excess of a slight temporary decrease in blood pressure; that "Vigo Vitamin Tablets" help to combat germs or eradicate colds or furnish an abundance of protection against every possible winter sickness; or that "Vigo Laxative No. 2" is effective for increasing intestinal or liver activity. (02870)

Thomas Patrick, Inc., St. Louis, engaged in the radio broadcasting business and in preparing and disseminating advertisements for various commodities, disseminated advertisements over its radio Station KWK for a food designated "Colonial Bread" on behalf of Colonial Baking Company, St. Louis. The respondent stipulated that in disseminating such advertising it will cease representing that Colonial Bread is not fattening or is necessary in a reducing diet; that it helps burn up body fat or helps to reduce safely, and that six slices of Colonial Bread in a reducing diet will give one pep and energy and prevent one from becoming tired, fatigued, irritable or experiencing nervous strain. (02871)

Perfect Manufacturing Company, also trading as Safe Electric Company, 3221 Madison Road, Cincinnati, engaged in the sale and distribution of an electrical heating unit or device designated "Otto-Matik Darning Machine," has stipulated in connection with the sale and distribution of its product, that it will cease and desist from the use of the words "Otto-Matik Darning Machine" or "Automatic Darning Machine" as a designation for or as descriptive of its product; or the use of a coined word "Otto-Matik" or the words "automatic," "darning" or "machine" or other words of similar implication to cause the belief that the device is conducted by or under the supervision of an astrologer, (3205)

Robina Studios—Samuel Schaap, trading as Robina Studios, 150 Nassau St., New York City, engaged in the sale and distribution of mimeographed material purporting to be horoscope or astrological readings and of so-called "Talismans" and "Lucky Stones," has stipulated that he will cease and desist from statements which imply that he is an astrologer or that his business is conducted by or under the supervision of an astrologer. (3205)

744 — September 12, 1941
Movie-Radio Hearings

Movie-Radio hearings were held only one day this week (Monday) with Jimmie Fidler, radio columnist, and George Fisher, commentator, the only two witnesses to appear before the Senate sub-committee investigating alleged pro-war propaganda.

Fidler repeated before the Committee his often-made public charges that his copy had been subject to censorship by radio networks due to pressure from the movie industry to which Senator McFarland (D. Ariz.), remarked that "it is a great thing to know that despite this pressure from the movie people you are still on the air."

Hearings will be resumed on Tuesday of next week, and it is expected that only movie witnesses will be called.

Radio Tax Defeated

Thanks to the wholehearted cooperation which we received from all concerned, the NAB's efforts to remove the radio time sales tax from the new Federal revenue bill have met with success, and the bill has finally gone to the President without this discriminatory tax provision.

The NAB wants to express its appreciation to both the entire industry and to representatives of advertising, labor and others who helped to present the industry's position and to convince Congress that the proposed tax should not be imposed upon radio.

The result achieved is an excellent demonstration of what can be accomplished with a united industry front.

While Congress has eliminated the radio time sales tax from the current revenue bill, our fight against a discriminatory tax of this kind is not yet won. It will be proposed again, unless its sponsors, certain printing trades unions, are convinced that it would hurt them as well as radio broadcasters.

To that end, the NAB has sent a questionnaire to every broadcaster in the industry, inquiring as to each station's expenditure in union printing establishments during the first half of 1941. The need for this information is urgent; send it in promptly to NAB headquarters.

Early District Meetings Planned

Preparations are under way for a series of district meetings, to be held in all 17 NAB districts beginning at an early date. President Miller will attend all of these regional conventions, each of which will be a two-day session, held in conjunction with the Sales Managers' meetings. These gatherings take on a particular significance in view of the many problems confronting the industry, and in the light of important developments in radio during the past six months. Agenda are being prepared, and further announcements will be made as soon as possible regarding dates and other information.

ASCAP Contracts

Copies of the proposed ASCAP contracts in final form are not yet available as we go to press. It is expected that they will be received within a few days, at which time copies, together with an analysis of their provisions, will be sent to all members.

Press-Radio Hearings

FCC hearings on the question of newspaper ownership of radio broadcasting stations were resumed Wednesday of this week, when representatives of Hearst Radio, Inc., were called to testify before the Commission. Among the witnesses who appeared during the two-day session were Emile J. Gough, former general manager, E. M. Stoer, present general manager, and Charles B. McCabe, president, of Hearst Radio, Inc., and Harold C. Burke, manager of radio station WBAL, Baltimore.

James G. Stahlman, publisher of the Nashville Banner, subpoenaed by the Commission, has not yet appeared, having been granted a stay pending decision of the court on his appeal from a show cause order.

Roy A. Roberts, managing editor of the Kansas City Star, and H. Dean Fitzer, manager of radio station WDAF, the Star's station, appeared as witnesses today (Thursday) as did D. D. Davis, president of WHB, Kansas City, Mo.

The questioning of Commission Counsel has been devoted for the most part to the practice of newspaper owned radio stations during the early stages of development of radio.

Hearings were adjourned today until Wednesday of next week.

New Priority Procedure

Under this same heading station managers needing Emergency Repair and Emergency Inventory material were advised in last week's bulletin (page 735) to communicate with Colonel J. F. Coneybear until further notice.

Colonel Coneybear has advised NAB that he is no longer handling these emergency matters.

Instead, telephone to Mr. Jim Peters, Miscellaneous Supplies Section, Office of Production Management, 462 Indiana Avenue, N. W. Telephone number: REPUBLIC 7500; Ext. 2331.

So far as we know there are no other changes.
ASK HIGHER PRIORITY

A letter-brief pointing out the need, in the interest of national defense, for priority ratings higher than A-10 for materials being used in commercial broadcasting, was delivered, September 16, by the National Association of Broadcasters, to Donald M. Nelson, director of priorities, Office of Production Management.

Supporting this brief was a factual study of total commercial broadcasting requirements on a 1940 basis. The six pages contained basic information covering all components.

The figures showed that 561 tons of material were required to manufacture broadcast transmitter apparatus, exclusive of vacuum tubes and installation, used by broadcasters during 1940. Twenty-five principal materials entered into this production.

Vacuum tubes required 25 tons of material covering 28 principal items, ranging all the way from 4 of a pound of gold to 13 tons of copper.

These amounts added to the requirements for towers, transmission lines, ground systems and installation material amounted to a total of 4,787,572 tons. Approximately 300 tons were required for repairs and 4,500 tons for new construction.

RADIO TECHNICIAN COURSES

A. J. Fletcher, member NAB National Defense Committee and director of WRAL, Raleigh, has made a sound suggestion for the teaching job of the radio technician courses.

He suggests that it would be helpful if stations located in cities offering these courses would contribute the services of their chief engineer. In a letter to Dean Van Leer, North Carolina State College, he said: “I think we can furnish a practical, graduate, licensed engineer to assist you locally.”

It is recognized that the men who do the teaching in these courses exert a powerful influence on the graduates and that a practical graduate engineer would be especially helpful, along with the other instructors.

George D. Coleman, general manager, WGBI, Scranton, District 3 liaison for NAB National Defense Committee, wrote for twelve more copies of the original radio training course mailing. These copies on top of the fifteen already sent would seem to indicate that Mr. Coleman is really doing a job of promotion throughout Pennsylvania.

Major Edney Ridge, manager, WBIG, apparently anticipates an off-campus radio course in Greensboro. This is in accordance with a front page story in a recent copy of “The Democrat.”

George M. Burbach, general manager, KSD, St. Louis, National Defense Committee liaison for Iowa, Missouri and Nebraska, has almost completed a survey of colleges and universities regarding radio courses.

Note from Elmer S. Pierce, principal, Seneca Vocational High School, Buffalo, reads as follows:

“Station WSVS is undergoing a reorganization of personnel and programs and it is preparing to give all the time possible to you in connection with our National Defense work. This is one way in which we feel we can help our government.

“This school, where Station WSVS is located, is training some 1,500 men in National Defense classes, and has been engaged in this work since July, 1940. We run National Defense classes 20 hours a day.”

DEFENSE PROMOTION

Down in Cincinnati Robert Bentley, patriotic director, WCPO, has evolved a sound promotional idea to stimulate recruiting for the defense forces. Each day, Navy and Marine recruiting officers send him a list of new recruits. After the regular spot announcements which NAB sends, congratulations are given the men themselves. At another time Mr. Bentley congratulates the parents of the men who have signed up that day.

Congratulations to the fathers and mothers whose sons have passed the examination for enlistment in the United States Navy and the United States Marine Corps is well received both by the new recruits, the parents and on recruiting material. This treatment is accorded in three regular programs, “Songs of America,” “Patriotic Parade” and “Land of Liberty.” They are scheduled at peak listening periods.

WROK, Rockford, close to Camp Grant, is producing two shows well received by military and non-military listeners. “Camp Grant Comments” is at 7:00 p.m., Mondays, Wednesdays and Fridays. “Camp Grant in Review” goes Mutual network, 4:30 p.m. each Tuesday.

ATTENTION STATION MANAGERS

Attention station managers in Des Moines, Iowa; Willmar, Minn.; Providence, R. I.; Cheyenne, Wyo., and Salt Lake City, Utah.

Mrs. John L. Whitehurst, president, General Federation of Women’s Clubs, leaves Washington Sunday, September 21, to attend meetings of club women.

In expanded fashion she will discuss “The 6th Column in America.” This is an outstanding talk and we heard it over WRC and WMAL locally.

When, as and if she reaches your city we suggest that you make an effort to book Mrs. Whitehurst for 15-minutes on this subject. You won’t go wrong.

Following is her itinerary:

Willmar, Minn., September 23.
Des Moines, Iowa, September 25-26.
Providence, R. I., September 30.
State meeting Mitchell, S. D., October 5-7.
State meeting Cheyenne, Wyo., October 8-10.
Salt Lake City, Utah, October 11.
State meeting McCook, Nebr., October 13-14.
Club Institute, Colorado Federation, at University of Colorado, Boulder, October 16-17.

In McCook, Nebr., October 13 and 14, and at the Club Institute, Boulder, Colo., October 16 and 17, Mrs. Whitehurst’s itinerary crosses that of Mrs. Dorothy Lewis, vice president of the Radio Council on Children’s Programs. Mrs. Lewis begins her trip on September 22 with first stop in Albany, N. Y. The purpose of her trip is to follow up the surveys on children’s programs made last year under RCCP and NAB auspices. (See NAB Reports pp. 137-738)
Network Rules

At a one-day hearing before the FCC, Mutual renewed its plea that the Commission put into effect immediately the network rules, modified in accordance with its petition. NBC and CBS filed briefs urging that the rules be suspended for the period of the national emergency and that the Commission and the industry should cooperate with Congress in framing legislation to modernize radio law. The only other appearance was made on behalf of the Yankee and Colonial networks, which urged relaxation of the time option regulation.

The Commission subsequently announced that decision on the briefs and argument would be handed down in the near future and that a reasonable time would be given before the rules finally became effective.

Radio Council News

Emphasis on the necessity for maintaining a sense of security and a wholesome atmosphere for the American child during these chaotic times was the keynote of the fall meeting of the Radio Council on Children's Programs, held at the Council's offices on September 15th. At this meeting, the following officers were elected for a three-year term: Mrs. Nathaniel Singer, president; Mrs. Dorothy Lewis, vice-president; Miss Rita Hochheimer, secretary, and Mr. Wilson Parkhill, treasurer.

The work of the Council, which has collaborated actively with the NAB in the study of children's radio programs, continues to attract increasing attention. Among the items of interest which have appeared recently is an article by Mrs. Lewis in the September issue of "The Family Dollar," a periodical of nationwide circulation published by the Consumer Credit Institute of America, describing the survey undertaken by the Council in cooperation with NAB and set forth in the report, "Broadcasting to the Youth of America," published by NAB.

As announced in last week's Reports, Mrs. Lewis will leave shortly on a nationwide tour in which she plans to visit many of the country's leading broadcasters. Details of her plans will be communicated to station managers from time to time during her tour, in order that they may take advantage of the opportunity for further cooperation in this useful industry effort.

FEDERAL COMMUNICATIONS COMMISSION

PRESS CONFERENCE NEWS

Chairman James Lawrence Fly of the FCC said at a press conference early this week that the FCC staff report on a proposed radio franchise tax is now before the Commission but that the Commission has not had time to make a study of the report. Mr. Fly said that he assumed that the Commission will take some action shortly, but said he had no specific plans for taking it up.

* * * * *  

Questioned as to when the Commission would take action as the result of the oral argument of last Friday on the Mutual Broadcasting petition in the chain situation, he said that he thought the Commission would do something on that "pretty soon." He was asked if any action could be expected by next week. Mr. Fly explained that the case is not one to be handled at a regular meeting, hence he was reluctant to make any guess on a date for action.

* * * * *  

Mr. Fly told the newspapermen that the press radio inquiry of the Commission might go along for weeks. He said that the Commission would probably hold hearings two or three days each week and that they might run along for a long period of time. In an off-the-record talk, Chairman Fly said that the FCC experts knew all about and were in on the recent FBI radio station case in and near New York.

TERRELL EXEMPTED

President Roosevelt this week issued an Executive Order exempting from retirement William D. Terrell, chief of the Field Division of FCC. Mr. Terrell has been with the Commission since it came into existence; prior to which he was chief of the Radio Division of the Department of Commerce which preceded the Commission. Terrell used to be referred to as the "Czar of Radio." The order is as follows:

WHEREAS, in my judgment, the public interest requires that William D. Terrell, Chief, Field Division, Engineering Department, Federal Communications Commission, who, during the month of August, 1941, will reach the retirement age prescribed for automatic separation from the service, applicable to him, be exempted from compulsory retirement for age for a period of one year:

NOW, THEREFORE, by virtue of and pursuant to the authority vested in me by section 204 of the act of June 30, 1932, 47 Stat. 382, 404 (U. S. C., title 5, sec. 715a), I hereby exempt the said William D. Terrell from compulsory retirement for age for a period of one year ending August 31, 1942.

FM AUTHORIZED FOR OTHER SERVICES

FM (Frequency Modulation) has received a new impetus when the FCC authorized its use on a regular service basis in certain services other than broadcast effective October 1. Last spring FM was made available for commercial broadcasting.

In amending its rules and regulations today so as to permit use of FM by ship, coastal and emergency services on the ultra-high frequencies, the Commission declared that the successful operation of approximately 1600 frequency modulated transmitters in various radio services since January 25, 1940, has demonstrated the practicability of this new type of modulation for these services.

On the basis of the data obtained through this experimental use, it is anticipated that no material difficulties will arise from the concurrent operation of frequency and amplitude modulated stations on the frequencies now allocated to these services. Operation reports indicate that FM offers a number of advantages over the conventional amplitude modulation among these being a reduction in interference resulting from static and a material reduction in the required geographical separation between stations operating on the same frequency.

It was also pointed out by the Commission that frequency modulated equipment can now be obtained from a number of manufacturers at prices comparable to those of the conventional amplitude modulated equipment.

FM RULE REGULATION

FCC took the following action on rules and regulations to provide for the use of frequency modulation on a regular service basis in services other than broadcast and amateur to be effective October 1, 1941:

Designated existing Section 7.30 as subsection (a) of Section 7.30 and added subsections (b) and (c), modified the "Tolerance Table" of Section 7.60 with respect to frequencies above 30,000 kilocycles (Rules Governing Coastal Radio Service); designated existing Section 8.68 as subsection (a) of Section 8.68 and added subsections (b) and (c), and modified the "Tolerance Table" of Section 8.96 with respect to frequencies above 30,000 kilocycles (Rules Governing Ship Service); deleted Sections 10.61 and 10.62 and
substituted new sections in lieu thereof (Emergency Radio Services); deleted Section 11.51 and substituted new section in lieu thereof and added Section 11.52 (Miscellaneous Radio Services—Part 11).

Sales

Newspaper Special Editions
Occasionally NAB member stations have complained of the newspaper practice, prevalent in some markets, of issuing frequent "special editions" or special sections for the sole purpose of selling additional advertising, regardless of its value to the advertiser. Such sections or editions are issued to commemorate anniversaries, special events, the opening of a new business establishment, etc.

The Association of National Advertisers has issued three statements deploring this practice, pointing out that such advertising is generally valueless and wasteful to the advertiser. It has also reprinted an editorial on the same subject by William Allen White, editor of the Emporia, Kans., Gazette.

Copies of these statements and editorial are available, by writing to the NAB Department of Broadcast Advertising.

Radio Films Available
Ten-minute sound films, either 16 or 35 mm, on "Television" and "Airwaves" are available through William J. Ganz Co., 19 E. 47th St., New York. There is no charge except for the shipping costs. Both films are suitable for club meetings, etc.

Sponsors Civic Campaign
Increased revenue through a radio campaign boosting Coffeyville, Kans., was secured by KGFG, as reported by Melvin Drake, general manager. Working through committees appointed under Chamber of Commerce sponsorship, a $2,000 fund was raised for a six-month campaign, 70% to radio and 30% to newspaper, "to build good will and public relations among our trade territory and neighboring cities, to encourage those people, coming to this section of the state, to establish their homes and families here as well as to trade and shop in Coffeyville." Spot announcements and programs are used.

"This idea is particularly adapted to communities which do not have defense projects in their own limits but which are located in areas with several projects in the radius of their radio stations," Mr. Drake said.

Free Time Request
Radio Camera Clubs, 343 State St., Rochester, N. Y., is furnishing radio scripts for gratis broadcasts, promoting the use of cameras and film. The address of this organization is the same as that of the Eastman Kodak Co.

Labor

Wage-Hour Act
New regulations regarding record keeping under the Wage and Hour law, effective September 15, were issued this week by the Wage and Hour Administration.

Records are to be preserved four years. The principal change is in the records required for exempt employees. No special form is required.

Again, the NAB suggests it would be well for station managers to require employees to certify the accuracy of records, by special pay-check endorsements or otherwise.

Here are the new regulations:

II. EMPLOYEE INFORMATION AND DATA TO BE CONTAINED IN EMPLOYERS' RECORDS

Section 516.2

Employees Subject to Minimum Wage and 40-Hour Week Overtime Provisions—Sections 6 and 7(a)

(a) Items Required. Every employer shall maintain and preserve 1 payroll or other records containing the following information and data on each and every employee to whom both Sections 6 and 7 (a) of the Fair Labor Standards Act apply. 2

(1) Name in full. 3 (And on the same record, the employee's identifying symbol or number if such is used in place of name on any time-and-wage, or payroll records)

(2) Home address.

(3) Date of birth if under 19.

(4) Occupation in which employed.

(5) Time of day and name of the day on which the employee's workweek begins.

(6) (i) Regular rate of pay; and (ii) Basis on which wages are paid.

(7) Hours worked each workday and total hours worked each workweek.

(8) Total weekly or daily straight-time earnings or wages.

(9) Total weekly or daily overtime excess compensation.

(10) Total additions to or deductions from wages paid each pay period.

(11) Total wages paid each pay period.

(12) Date of payment and the pay period covered by payment.

1 For the period records must be preserved, see sections 516.14 and 516.15, p. 23.

2 For additional requirements on certain types of employees covered by more than one minimum hourly wage set by one or more wage orders, see section 516.8, p. 20.

3 For additional requirements on Employers dependent upon tips or gratuities as a part of wages, see section 516.10, p. 23.

For requirements on Industrial Homeworkers, see section 516.11, p. 24.

4 This shall be the same name as that used for Social Security record purposes.

5 If the employee is a part of a workforce or employed in or by an establishment all of whose workers have a workweek beginning at the same time on the same day, a single notation of the time of the day and beginning day of the work week for the whole workforce or establishment will suffice. If, however, any employee or group of employees has a workweek beginning and ending at a different time, a separate notation shall then be kept for that employee or group of employees.

6 This may be shown as "50 hr."

7 This shall be the same name as that used for Social Security record purposes.

8 "A workday" with respect to any employee shall be any consecutive 24 hours.

That is: The total earnings or wages due for hours worked during the workday or workweek, including all earnings or wages due during any overtime worked, but exclusive of overtime excess compensation.

This is: The excess compensation for overtime worked which amount is over and above all straight-time earnings or wages earned during overtime worked. For the basis to be used in determining overtime payments under the Fair Labor Standards Act, see Interpretative Bulletin No. 4.

As to the effect of additions or deductions upon the regular hourly rate of pay, see Interpretative Bulletin No. 3. For the basis on which deductions or additions for board, lodging, or other facilities may be made and their cost to the employer, as determined under Section 5 (a), see Regulation Fair Labor Standards Act, Part 21, attention is called to Interpretative Bulletin No. 1, "Deductions Determining the Reasonable Cost of Board, Lodging, and Other Facilities."

If the additions to or deductions from wages paid (1) so affect the total cash wages due in any workweek (even though the employee actually is paid semimonthly) as to result in the employee receiving less in cash than the minimum hourly wage provided in Section 6 or in an applicable wage order, or (2) if the employee works in excess of 40 hours a week and (a) any additions to the wages paid are a part of that employee's wages, or (b) any deductions made are claimed as allowable deductions under Section 3 (m) of the Act, the employer shall then maintain records showing those additions or deductions to or from wages paid on a workweek basis. (For legal deductions under Section 3 (m) and which need not be maintained on a workweek basis, see Paragraphs 15 through 17 of Interpretative Bulletin No. 3, Rev. October 1940.)

Every employer making additions or deductions shall also maintain in individual employee accounts a record of those types of items, and their separate credited or debited amounts, which compose the additions to or deductions from wages paid as well as specifying dates involved. For example:

<table>
<thead>
<tr>
<th>Item</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>6/5—coal, 1/2 ton</td>
<td>$4.00</td>
</tr>
<tr>
<td>6/9—groceries</td>
<td>4.85</td>
</tr>
<tr>
<td>6/12—meat</td>
<td>3.60</td>
</tr>
<tr>
<td>6/16-6/22—board and lodging (wk.)</td>
<td>6.00</td>
</tr>
</tbody>
</table>

For the period these and other records pertaining to debits and credits shall be preserved, see section 516.15 (c), p. 29.
its privileges of "free speech" guaranteed by the First Amendment, may serve to enlighten a hearer, though it also betrays the speaker's feelings and desires; but the light it sheds will be in some degree clouded, if the hearer is in his power. Arguments by an employer to discuss with employees the advisability of joining a labor union. The privilege of free speech protects them; but, so far as they also disclose his wishes, perhaps the most important part. What to an outsider will be no more than the vigorous presentation of a conviction, to an employee may be the manifestation of a determination which it is not safe to thwart. The Board must decide how far the second aspect obliterates the first.

REMOTE BANDS OFF

Remote dance bands were off NBC Red and Mutual the first part of this week because of local difficulties with the A. F. of M. at WMBS, New Orleans, and WGRC, Louisville. In both cases, the musicians sought additional employment.

BMI

BMI Membership Now Includes 700 Commercial Stations

Commercial radio stations subscribing to Broadcast Music, Inc., reached 701 today with the addition of:

WKNY—Kingston, N. Y. WSNR—Stamford, Conn.
WBBB—Burlington, N. C. KROS—Clinton, Iowa

Test Case in Performing Rights

Counsel for BMI and ASCAP met before Justice Aaron Steuer of the Supreme Court of the State of New York on Tuesday, September 16, in response to a motion by ASCAP that BMI be stricken out as a plaintiff in the suit brought by BMI and Edward B. Marks against ASCAP to clarify the ownership of the performing rights in musical compositions.

Counsel for BMI contended that the assignment to BMI by Marks of performing rights in the Marks compositions made BMI a proper plaintiff. John Schulman, counsel for the Songwriters Protective Association, appeared in court on behalf of the individual songwriter defendants involved in the suit. This suit viewed as a test case is one of the most important in the history of copyright music. Its final disposition by the court will largely determine the future of ASCAP. Such disposition will also determine whether BMI can license a substantial percentage of the Marks compositions which it has not licensed up to now. This percentage consists of compositions published by Marks and written by ASCAP members subsequent to their joining ASCAP.

Publishers and Composers Share BMI Payments

Broadcast Music, Inc., is sending out checks to composers and publishers in payment for performances on BMI stations during the three months ended June 30th, the second quarter of 1941. Both composers and publishers are receiving twice the amount originally agreed upon. The BMI affiliated publishers, who compensate their own composers, receive 4c a performance. The

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, September 22. It is subject to change.

Wednesday, September 24

NEW—Park Cities Broadcasting Corp., Dallas, Texas.—C. P., 710 kc., 5 kW, unlimited, DA-night.

APPLICATIONS GRANTED

WJR, The Goodwill Station, Detroit, Mich.—Granted construction permit for a new high frequency (FM) broadcast station to operate on 14500 kc., with a service area of 6,800 square miles; applicant to assume responsibility for the management of construction permit (B5-PH-106) for new high frequency (FM) broadcast station to operate on 14500 kc., with a service area of 10,800 square miles.

Earle C. Anthony, Inc., Los Angeles, Calif.—Granted construction permit (B5-PH-45) for new high frequency (FM) broadcast station to operate on 13000 kc., with a service area of 33,000 square miles, embracing San Diego and Bakersfield, Calif., within not less than 350 uv/m contour.

Philco Radio & Television Corp., Philadelphia, Pa.—Granted construction permit (B3-PCT-4) for new commercial television broadcast station to operate on Channel No. 3, 68000-72000 kc., subject to certain engineering requirements.

Earle C. Anthony, Inc., Los Angeles, Calif.—Granted construction permit (B5-PCT-10) for new high frequency (FM) broadcast station to operate on Channel No. 6, 96000-102000 kc., providing applicant file for modification of construction permit to meet certain engineering requirements, with completion date January 15, 1942.

The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—Granted construction permit (B1-PCT-8) for new commercial television broadcast station to operate on Channel No. 3, 66000-70000 kc., subject to certain engineering requirements, with completion date October 27, 1941.

World Wide Broadcasting Corp., Scituate (Boston), Mass.—Granted construction permit (B1-PCT-3) for new international broadcast station to operate on 6010, 11730, 11720, 15130, 15350, 15750 kc., A3 emission, 50 to 100 KW, share time with WRUL and WRRUW, subject to certain engineering and frequency conditions, and WRUL and WRUR licenses to be modified accordingly.

The Moody Bible Institute of Chicago, Ill.—Granted construction permit (B-8-44) for new studio transmitter (ST) broadcast station to operate on 335000 kc., with a power not in excess of 25 watts.

KTRN—Michael J. Minga, Tacoma, Wash.—Granted modification (B5-MP-1556) of construction permit (B5-P-1979) granted May 28, 1941, for new station conditionally to specify frequency 1130 kc., 1 KW night and day, using directional antenna day and night.

Composers of BMI published songs receive 2%. Accounting is made in direct ratio to performance and the checks range from as low as $1 to as high as $4,000. More than 1,000 composers and nearly 300 publishers are receiving payments.

"My Sister and I" and "Do I Worry"—the first, a product of BMI as a publisher, and the second from Melody Lane. BMI affiliate, led the list in number of performances. One of the surprises of this quarter was the popularity of "Because of You" by Arthur Hammerstein and Dudley Wilkinson. Several songs, notably the "Hut Sut Song", were just gathering momentum in the second quarter and their performances continued at a high rate subsequent to June 30th.

Among the publishers with a high volume of performances were Embassy Music with "Everything Happens To Me", "Let's Get Away From It All" and "Oh, Look At Me Now"; Regent Music with a catalogue of recorded swing tunes which registered heavily on local stations; Melody Lane with "Don Do You" and "Tell Me"; New Era with "Whatcha Know, Joe"; Beacon Music with "Nighty Night" and others; Mutual Music Society which did well on individual station performances; Campbell with "Things I Love"; London Music with "Nice Dreamin', Baby" and "Time And Time Again"; Porgie, Debin & Friedman with "Just A Little Bit South Of North Carolina"; Warren Publications with "No. Ten, Lullaby Lane"; Republic Music Corporation with "Daddy", (which was just beginning its phenomenal run) and "Until Tomorrow"; Schumann with the "Hut Sut Song"; Nationwide with "A Romantic Guy, I"; Reis & Taylor with "Afraid To Say Hello" and "Slow Down"; and Stevens with "I Do, Do You".

100,000,000 Record Year

Sydney M. Kaye, executive vice president of Broadcast Music, Inc., issued the following statement in connection with the flourishing business done by record manufacturers: "May be some broadcasters have been worrying because they had a fear that in giving their patrons BMI music they were giving them a substitute product. Broadcasters can discard that fear if any of them ever had it. Nobody has to buy phonograph records. They do not come free of charge. They take both effort and money to buy. The phonograph record business this year, based almost entirely on BMI hits, is not only double the business in 1940, when it was based entirely on ASCAP hits, but is the highest business in the record of that industry. If the public likes the music enough to go out and buy it in greater quantity than ever before, it is not annoyed at having to listen to it."
KTSM—Tri State Broadcasting Co., Inc., El Paso, Tex.—Granted modification of license (B3-ML-1038) to increase power from 500 watts unlimited time to 500 watts night, 1 KW day, station operates on 1350 kc.

**RENEWAL OF LICENSES**

The following stations were granted renewal of licenses for the period ending August 1, 1942:

KCRC, Enid, Okla.; KELA, between Centrailia and Chachalas, Wash.; KFOR, Longview, Texas; KLPM, Mabot, N. Dak.; KSSO, Santa Rosa, Cal.; WROK, Rockford, Ill., and WSMB, New Orleans, La.

The following stations were granted renewal of licenses for the period ending October 1, 1942:

**DELEGATED FOR HEARING**

Mid-American Broadcasting Corp., Louisville, Ky.—Application for construction permit for new station amended so as to request 1090 kc., 5 KW day, 1 KW night, unlimited time, DA-day and night (B2-P-2766).

**MISCELLANEOUS**

WPAY—Chester A. Thompson (Transferee) and The Brush-Moore Newspapers, Inc. (Transeree), Portsmouth, Ohio; WPAY, Vee Bee Corp., Portsmouth, Ohio.—Granted petition for extension of time, a period of 30 days, for the filing of Proposed Findings of Fact and Conclusions in re application for transfer of control of Vee Bee Corp., and for application for renewal of license of WPAY.

WICA—WICA, Inc., Ashtabula, Ohio; WWSW, Walker & Downing Radio Corp., Pittsburgh, Pa.—Granted motion for continuance of hearing now set for September 25 to October 28, on application of WICA for construction permit to operate on 970 kc., 1 KW night, 5 KW day, unlimited time, DA-night, and for WWSW for the same facilities.

WNEX—Wodaam Corp., New York City.—Granted petition for leave to intervene, denied as to enlargement of issues, in re applications of WTNJ, WCAM and WCAP for renewal of licenses; WTNJ for modification of license, and WTIAS for construction permit.

KPAC—Port Arthur Collece, Port Arthur, Tex.—Motion to postpone hearing date on application for modification of license, withdrawn. Hearing continued indefinitely by Commission on September 9.

KGLU—Gila Broadcasting Co., Safford, Ariz.—Granted petition for continuance of hearing now set for September 16 to October 16, on application for renewal of license of KGLU.

KGBX—Springfield Broadcasting Co., Springfield, Mo.—Granted petition to intervene in the hearing on the applications of KVOA, Tucson, KGGM, Albuquerque and KVSF, Santa Fe for construction permits to change facilities.

KGO & Aux.—National Broadcasting Co., Inc., San Francisco, Cal.—Granted petition for postponement of hearing now set for: September 19 to November 18, on applications for renewal of licenses.

KOA—National Broadcasting Co., Inc., Denver, Colo.—Granted petition for postponement of hearing now set for September 19 to November 18, on applications for renewal of licenses.

Dorman Schaefer, Klamath Falls, Ore.—Granted motion for continuance from September 15 to September 17 of hearing on application for construction permit for new station in Klamath Falls, by applicant Schaefer and the Herald Publishing Co.

KFIO—Spokane Broadcasting Corp., Spokane, Wash.—Granted special temporary authority (B5-S-73) to broadcast on sustaining basis local High School and Gonzaga Univ. football games from 7:15 PST to close of games on September 11, 19 and 26.

KVOS—Merced Broadcasting Co., Merced, Cal.—Granted special authority to determine operating power by direct measurement of antenna input (B3-Z-1118).

WANEL—Juan Piza, San Juan, P. R.—Granted authority to determine operating power by direct measurement of antenna input (B-Z-1187).

WSLI—Standard Life Broadcasting Co., Jackson, Miss.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1205).

WEOA—Evansville on the Air, Inc., Evansville, Ind.—Granted authority to determine operating power by direct measurement of antenna input (B-Z-1201).

WBHH—Selma Broadcasting Co., Inc., Selma, Ala.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1190).

KABC—Alamo Broadcasting Co., Inc., San Antonio, Tex.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1186).

WFDF (aux.)—Flint Broadcasting Co., Flint, Mich.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1190).

WHBB—Selma Broadcasting Co., Inc., Selma, Ala.—Granted authority to determine operating power by direct measurement of antenna input (B-Z-1190).

WCOI—Southland Industries, Inc., San Antonio, Tex.—Granted authority to install automatic frequency control equipment for auxiliary transmitter (B3-F-235).

KUAO—KUAO, Inc., Siletz Springs, Ark.—Granted authority to install automatic frequency control equipment (B3-F-235).

WCAL—St. Olaf College, Northfield, Minn.—Granted authority to install automatic frequency control equipment (B4-F-231).

KOA—National Broadcasting Co., Inc., Denver, Colo.—Granted authority to determine operating power by direct measurement of antenna input (B3-Z-1186).

WPTF—WPTF Radio Co., Raleigh, N. C.—Granted construction permit to make changes in equipment (change tubes in last receiver). (B3-P-3250).

KTEM—Bell Broadcasting Co., Temple, Tex.—Granted construction permit (B3-P-3248) to make changes in equipment (changes in tubes only).

WJZ—National Broadcasting Co., Inc., New York City.—Granted construction permit for changes in equipment (B1-P-3253).

WTAM—National Broadcasting Co., Inc., Cleveland, Ohio.— Granted construction permit for changes in equipment (B4-P-3235).

WMAO—National Broadcasting Co., Inc., Chicago, Ill.—Granted construction permit for changes in equipment (B4-P-3256).

KPO—National Broadcasting Co., Inc., San Francisco, Calif.— Granted construction permit for changes in equipment (B5-P-3256).

KROL—Dorance D. Roderick, El Paso, Tex.—Granted construction permit (B3-P-3275) to install new transmitter.

The following relay broadcast stations were granted renewal of licenses for the period Oct. 1, 1941, to Oct. 1, 1942:

WHKY—United Broadcasting Co., Columbus, Ohio.—Granted license (Bl-L-1478) to cover construction permit (B1-P-2253) for changes in equipment, new antenna and move of transmitter.

KEDT—United States Broadcasting Co., Columbus, Ohio.—Granted special temporary authority (B1-S-269) to remain on the air from regular sign-off time (9 p.m. EST, Sept.) to conclusion of President’s speech on Sept. 11 only.

WHTC—WHTC Broadcasting Co., Columbus, Ohio.—Granted special temporary authority (B2-S-289) to remain on the air from regular sign-off time (Sept., 6:30 p.m., Oct., 4:55 p.m., CST) until approximately 10:30 p.m., CST, in order to broadcast High School Football games on Sept. 19, 26, and Oct. 3, 10 and 17, only, provided such broadcasts are on sustaining basis only.

WHOK—United States Broadcasting Co., Columbus, Ohio.—Granted license (B1-L-1476) to cover construction permit (B1-P-2253) as changes in equipment, new antenna and move of transmitter.

KBBK—KBBK Broadcasting Co., Omaha, Neb.—Granted modification of construction permit (B4-MP-1388), requesting extension of complete date to Oct. 28, 1941, under construction permit (B4-P-2609 as modified) for installation of DA for night use and increase in power.

WFBZ—The Baltimore Radio Show, Inc., Baltimore, Md.—Granted license (B1-L-1478) to cover construction permit (B1-P-3131) which authorized increase in power and changes in directional antenna. Also granted license (B1-L-1479) to use directional antenna as authorized under construction permit, with auxiliary transmitter; and granted authority to determine operating power by direct measurement of antenna power (B1-Z-1197), for auxiliary transmitter.

WFBR—The Baltimore Radio Show, Inc., Baltimore, Md.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1196).

KSNO—Ernest L. Finlay, Santa Rosa, Calif.—Granted license (B1-L-1447) to cover construction permit (B1-P-2253) for change in frequency, increase in power, installation of DA for day and night use, and installation of new transmitter. Also granted authority to determine operating power by direct measurement of antenna input (B5-Z-1191).

KFBM—Worcester Broadcasting Corp., San Diego, Calif.—Granted license (B5-L-1490) to cover construction permit (B5-P-2455) for new station to operate on 1150 kc., 250 watts, unlimited time. Also granted authority to determine operating power by direct measurement (B5-Z-1214).

KFH—Radio Station KFH Co., Wichita, Kans.—Granted license (B1-L-1472) to cover construction permit (B1-P-3001) for new transmitter, changes in antenna and move of transmitter. Also granted authority to determine operating power by direct measurement of antenna input (B2-Z-1288).

WPEN—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Granted license (B2-L-1470) to use old RCA B-B transmitter as auxiliary transmitter with power of 1 KW, for emergency only.

KFFY—Meyer Broadcasting Co., Bienarck, N. Dak.—Granted license (B4-L-1481) to cover construction permit (B4-P-2961) for increase in power to 250 watts, unlimited time, and changes in transmitting equipment.

KRMG—Jamestown Broadcasting Co., Inc., Jamestown, N. Dak.—Granted modification of license (B4-ML-1086) to move station (from U. S. Highway No. 10, 1 mile from center of Jamestown to Midland Blg, Third Ave. SE, and 1st St., E. Jamestown, N. Dak.

KELD—Radio Enterprises, Inc., El Dorado, Ark.—Granted license (B3-L-1487) to cover construction permit (B3-P-3155) which authorized increase in power to 250 watts, unlimited time, and changes in transmitting equipment.

KWLM—Lakeland Broadcasting Co., Willmar, Minn.—Granted license (B4-L-1486) to cover construction permit (B4-P-3155) which authorized increase in power to 250 watts, unlimited time, and changes in transmitting equipment.

KRM—Jamestown Broadcasting Co., Inc., Jamestown, N. Dak.—Granted modification of license (B4-ML-1086) to move station (from U. S. Highway No. 10, 1 mile from center of Jamestown to Midland Blg, Third Ave. SE, and 1st St., E. Jamestown, N. Dak.

KW—KWHK—United Broadcasting Co., Columbus, Ohio.—Granted license (B1-L-1476) to use directional antenna as authorized under construction permit, with auxiliary transmitter; and granted authority to determine operating power by direct measurement of antenna power (B1-Z-1197), for auxiliary transmitter.
APPLICATIONS FILED AT FCC

610 Kilocycles

620 Kilocycles

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Modification of construction permit (B1-P-2868) for increase in power, installation of new equipment and directional antenna for day and night use, requesting extension of completion date from 11-11-41 to 11-11-42.

710 Kilocycles

KIRO—Queen City Broadcasting Co., Inc., Seattle, Wash.—Modification of license to make changes in directional antenna system for night use.

790 Kilocycles

WKPT—Kingsport Broadcasting Co., Inc., Kingsport, Tenn.—Construction permit to change frequency from 1100 kc. to 790 kc., increase power from 250 watts to 1 KW, install new equipment, and directional antenna for night use.

KGHL—Northwestern Auto Supply Co., Inc., Billings, Mont.—License to cover construction permit (B5-P-2701) as modified, for increase in night power and install directional antenna for night use.

KGHL—Northwestern Auto Supply Co., Inc., Billings, Mont.—Authority to determine operating power by direct method.

880 Kilocycles

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Construction permit to make changes in directional antenna system for day and night use, changes in transmitting equipment, change frequency from 1320 kc. to 880 kc., and increase power from 5 to 10 KW.

1030 Kilocycles

KOB—Albouquerque Broadcasting Co., Albuquerque, N. M.—Modification of construction permit (B5-P-2783) as modified, for changes in equipment and increase in power, requesting extension of completion date from 10-3-41 to 12-2-41.

1050 Kilocycles

NEW—Washtenaw Broadcasting Co., Inc., Ann Arbor, Mich.—Construction permit for a new broadcast station to be operated on 1050 kc., 1 KW, and unlimited hours.
1070 Kilocycles

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Construction permit to move old RCA 1 KW transmitter to site of new main transmitter and use for auxiliary purposes.

1090 Kilocycles

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Construction permit to move old WE Type 104-A, 10 KW transmitter and use as auxiliary transmitter, employing directional antenna night with power 10 KW.

1200 Kilocycles

WOAI—Southland Industries, Inc., San Antonio, Texas.—Construction permit to move transmitter, increase power from 50 KW to 500 KW, install new transmitter and antenna changes. Amended: To omit request to move, requesting 750 KW, and changes in transmitting equipment.

1230 Kilocycles

NEW—W. W. McAllister and Howard W. Davis, d/b as The Walmac Co., Alice, Texas.—Construction permit for a new broadcast station to be operated on 1350 kc., 250 watts and unlimited hours.

1240 Kilocycles

WRAL—Capitol Broadcasting Co., Inc., Raleigh, N. C.—Construction permit to install new transmitter, directional antenna for night use, change frequency from 1210 to 620 kc., power from 250 watts to 1 KW night, 5 KW day and move transmitter. Amended: To make changes in directional antenna and to use day and night.

1260 Kilocycles

WFDM, Inc., Indianapolis, Ind.—License to cover construction permit (B4-ML-354) as modified, for increase in power, using directional antenna night.

1310 Kilocycles

KFBB—Buttrey Broadcast, Inc., Great Falls, Mont.—License to cover construction permit (B5-P-2920) as modified for increase in power, installation of directional antenna for night use.

1340 Kilocycles

KRJF—Star Printing Co., Miles City, Mont.—License to cover construction permit (B5-P-2533) as modified for a new station.

1350 Kilocycles

KRJF—Star Printing Co., Miles City, Mont.—Authority to determine operating power by direct method.

NEW—Chambursburg Broadcasting Co., Chambersburg, Pa.—Construction permit for a new broadcast station to be operated on 1350 kc., 250 watts power and unlimited hours.

1360 Kilocycles

KRNT—Iowa Broadcasting Co., Des Moines, Iowa.—Modification of construction permit (B1-P-2726) as modified for move of transmitter, install directional antenna for night use, install new transmitter and increase in power, requesting extension of completion date from 10-3-41 to 12-9-41.

NEW—Rock Hill Broadcasting Corp., Rock Hill, S. C.—Construction permit for a new broadcast station to be operated on 1350 kc., 250 watts and daytime hours. Amended: To specify studio and transmitter sites.

WIBH—Indiana Broadcasting Corp., Indianapolis, Ind.—Construction permit to move old RCA 1 KW transmitter to site of new main transmitter and use for auxiliary purposes.

WSAI—The Crosley Corp., Cincinnati, Ohio.—Modification of construction permit (B2-P-2221) as modified, for increase in power, installation of directional antenna for night use, move of transmitter, requesting 1360 kc. under NARBA, changes in directional antenna for day and night use and extension of completion date from 7-15-41 to 180 days after grant. Amended: To request 250 watt booster station.

1390 Kilocycles

KGER—Consolidated Broadcasting Corp., Long Beach, Calif.—Construction permit to make changes in equipment, increase power from 1 to 5 KW, install directional antenna for night use. Amended: To move transmitter from Long Beach to Compton, Calif., and make changes in proposed directional antenna.

1400 Kilocycles

WRRN—Frank T. Nied and Perry H. Stevens, d/b as Nied and Stevens, Warren, Ohio.—Modification of construction permit (B2-P-3181) for a new station, requesting new transmitter and changes in antenna system, extension of commencement and completion dates from 10-5-41 and 4-5-42 to 30 days after grant and 180 days thereafter, respectively.

KVRS—Wyoming Broadcasting Co., Rock Springs, Wyo.—Authority to transfer control of corporation from R. R. West to Marjorie Lannen McCracken, 9996 shares common stock.

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Authority to determine operating power by direct method for special service authorization on 1090 kc., 250 watts and unlimited hours.

1440 Kilocycles

KMED—Mrs. W. J. Virgin, Medford, Ore.—Modification of license to move studio from Main and Riverside Ave., Medford, to Ross Lane, Medford, Ore.

1450 Kilocycles

KWBB—The Nation's Center Broadcasting Co., Inc., Hutchinson, Kansas.—Construction permit to increase power from 100 to 250 watts and changes in transmitting equipment.

KVAK—Carl Latenser, Atchison, Kansas.—Voluntary assignment of license to KOVO Broadcasting Company. Amended: re corporate structure.

KWBW—The Nation's Center Broadcasting Co., Inc., Hutchinson, Kansas.—Construction permit to make changes in equipment and increase power from 100 to 250 watts. (Subject to grant of B4-AL-320.)

WNAB—Harold Thomas, Bridgeport, Conn.—License to cover construction permit (B1-P-2410) as modified for a new station.

1460 Kilocycles

KEVE—Cascade Broadcasting Co., Inc., Everett, Wash.—License to cover construction permit (B5-P-2008) for a new station.

KEVE—Cascade Broadcasting Co., Inc., Everett, Wash.—Authority to determine operating power by direct method.

WOC—The Tri-City Broadcasting Co., Davenport, Iowa.—Modification of construction permit (B4-P-2288) for increase in power, change in frequency, move transmitter and install new transmitter and directional antenna for night use, requesting increase in power from 1 to 5 KW, changes in directional antenna for day and night use, change type of transmitter and move transmitter.

KEVE—Cascade Broadcasting Co., Inc., Everett, Wash.—License to cover construction permit (B5-P-2008) for a new station.

KEVE—Cascade Broadcasting Co., Inc., Everett, Wash.—Authority to determine operating power by direct method.

NEW—William L. Klein, Oak Park, Ill.—Construction permit for a new broadcast station to be operated on 1600 kc., 1 KW power, unlimited hours at Alexandria, Va., and 250 watt booster amplifier. Amended: To request new equip-
FM APPLICATIONS

W63NY—Marcus Loew Booking Aveny, New York, N. Y.—Modification of construction permit (B1-PH-3) as modified for a new high frequency broadcast station, requesting changes in antenna system and extension of commencement and completion dates from 4-13-41 and 10-13-41 to 3 days after grant and 180 days thereafter respectively.

W6SH—WDRC, Incorporated, Hartford, Conn.—Modification of construction permit (B1-PH-35) for a new high frequency broadcast station, requesting approval of antenna, transmitter system and transmitter site.

NEW—Oak Park Realty and Amusement Co., Chicago, Ill.—Construction permit for a new high frequency broadcast station to be operated on 41500 kc. Coverage: 10,500 square miles; Population: 56,500; Amended: To change type of antenna system.

W4SV—Evansville On The Air, Inc., Evansville, Ind.—License to cover construction permit (B1-PHI-11) as modified for a new high frequency broadcast station.

W41NY—Ralph A. Horton, Dubuque, Iowa.—Modification of construction permit (B1-PH-32) for a new high frequency broadcast station, requesting extension of completion date from 11-4-41 to six months after present completion date.

NEW—Standard Broadcasting Co., Los Angeles, Calif.—Construction permit for a new high frequency broadcast station (to be used with high frequency broadcast station KS3LA) to be operated on 332400 kc., 25 watts and special emission for frequency modulation.

NEW—The Putnem Publishing Co., St. Louis, Mo.—Construction permit for a new high frequency broadcast station to be operated on 45500 kc.; coverage: 11,301 square miles; population: 1,977,700. Amended: To change coverage to 13,391 square miles and population to 1,897,700 and make changes in antenna system.

W45CM—WBNS, Incorporated, Columbus, Ohio.—Modification of construction permit (B2-PH-8) as modified for a new high frequency broadcast station, requesting change in type of transmitter and extension of commencement and completion dates from 4-13-41 and 10-13-41 to 60 days after grant and 180 days thereafter, respectively.

MISCELLANEOUS APPLICATIONS

KTJS—Tri-State Broadcasting, Inc., Portable-Mobile.—License to cover construction permit (B3-PRI-248) for a new relay broadcast station.

NEW—Gordon Gray, Winston-Salem, N. C.—Construction permit for a new special relay broadcast station to be operated on 156750 kc., 50 watts, special emission for frequency modulation. (To be used to transmit programs from studio to transmitter of W41MM in event of failure or malfunction of W41MM.)

WMWA—WOKO, Inc., Portable-Mobile.—License to cover construction permit (B1-PRE-404) for a new relay broadcast station.

WODJ—Adroendack Broadcasting Co., Inc., Portable-Mobile.—License to cover construction permit (B1-PRE-405) for a new relay broadcast station.

WNBK—National Broadcasting Co., Inc., New York, N. Y.—Modification of license to increase power of aural transmitter from 2200 watts to 2500 watts. Amended: To change operating constants of aural transmitter from 2.7 to 5 kw and to omit request for increase in power of aural transmitter.

WAUR—University of Illinois, S. of Champaign, Ill.—License to cover construction permit (B4-PRY-249) for a new relay broadcast station.

WNBI—National Broadcasting Co., Inc., Bound Brook, N. J.—Modification of license requesting frequencies 9570 and 17750 kc. and addition of transmitting equipment now licensed to WRCA.

WRUW—World Wide Broadcasting Corp., Boston, Mass.—Modification of license requesting additional frequency 9570 kc. in addition to licensed frequencies 11730, 11790, 15350, 17350 and 23660 kc.

WRCA—National Broadcasting Co., Inc., Bound Brook, N. J.—Modification of license requesting additional frequencies 6100, 11890, 15150 and 21630 kc. and addition of transmitting equipment now licensed to WNBI.

WSXAL—The Crosley Corp., Cincinnati, Ohio.—Extension of special temporary experimental authorization to operate a 1 kw transmitter on the frequency of 6650 kc, with 1 kw power and A0 and A1 emission for identification purposes only.

NEW—Ralph A. Horton, Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 31620, 35260, 37310, 39260 kc., power 25 watts and A3 emission.

NEW—Gordon Gray, Winston-Salem, N. C.—Construction permit for a new ST broadcast station (to be used with W41MM) on 337000 kc., power 25 watts, special emission for frequency modulation.

NEW—Ralph A. Horton, Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 1646, 2900, 2190 and 2530 kc., power 100 watts and A3 emission.

WHMK—Hagerstown Broadcasting Co., Hagerstown, Md.—License to cover construction permit (B1-PRY-242) for a new relay broadcast station.

WRRG—Rome Broadcasting Corp., Portable-Mobile.—License to cover construction permit (B3-PRE-390) for a new relay broadcast station.

FEDERAL TRADE COMMISSION ACTION

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Cooperative Purchasing Association, Inc., and Melvin Sherman, 419 Fourth Ave., New York City, engaged in the business of purchasing for resale, offering for sale, and selling and distributing merchandise, are charged in a complaint with misrepresentation. (4584)

D. J. Easterlin & Company—D. J. Easterlin, trading as D. J. Easterlin & Company, Charleston, S. C., is charged, in a complaint with violation of the brokerage section of the Robinson-Patman Act. (4587)

Linens Supply Board of Trade of New Jersey, Newark, N. J., its officers, directors, and member companies, all operating in the area embracing Newark, N. J., and New York City and engaged in supplying, leasing and renting linen supplies such as coats, trousers, aprons, frocks, towels, table cloths and other articles in commerce, are charged in a complaint with combinations and conspiracies to fix uniform minimum prices and discounts, and other practices in restraint of trade. (4588)

National School of Electronics—Thomas J. Casey, formerly doing business under the name of National Institute of Technology, and since June, 1939, doing business under the name of National School of Electronics at 529 South Seventh St., Minneapolis, Minn., is charged, in a complaint with misrepresentation. (4586)
Pergande Institute—G. F. Pergande, trading as Pergande Institute, 314 Randolph Place, N. E., Washington, D. C., engaged in the sale and distribution of courses of study and instruction intended for preparing students for examinations for certain Civil Service positions through a correspondence course, is charged, in a complaint with misrepresentation. (4583)

G. B. Shelton Brokerage Company—Gus B. Shelton, trading as G. B. Shelton Brokerage Company, 220 Lynn St., Danville, Va., and The American Agricultural Chemical Company, 50 Church St., New York City, are charged, in a complaint with violation of the brokerage provision of the Robinson-Patman Act. (4585)

STIPULATIONS
No stipulations were made public by the Commission during the past week.

CEASE AND DESIST ORDERS
During the past week the Commission has issued the following cease and desist orders:

Jergens-Woodbury Sales Corporation, Cincinnati, engaged in the sale and distribution of cosmetics and a facial soap manufactured by John H. Woodbury, Inc., and the Andrew Jergens Co., has been ordered to cease and desist from misrepresentations in the sale of its products. (3438)

Pond's Extract Company, 60 Hudson St., New York, cosmetics manufacturer, has been ordered to cease and desist from misrepresentations in the sale of creams and lotions. (3427)
DISTRICT MEETINGS PLANNED

Industry Problems to be Aired

Arrangements for the series of district meetings, to be held in all seventeen NAB districts commencing early in October, are shaping up rapidly as we go to press. President Miller has sent to all District Directors, for their final comment and recommendations, a detailed outline of suggested plans for the meetings and the subjects to be covered.

“The purpose of the meetings should be two-fold,” President Miller states:

1) To discuss with the stations the many problems facing the industry, to hold meetings of groups, such as Sales Managers, to discuss their particular problems, and for informal discussions of various subjects;
2) To do a more thorough public relations job by contacting the various groups in the community, such as, the women’s clubs, the educators, the newspaper editors, the local legislators, etc., explaining to them the great public service which radio is rendering and securing a better understanding of some of our problems.

Among the industry problems slated for discussion are national defense, ASCAP, labor, the Code, the monopoly report, and legislative matters affecting radio.

Committees on the Code, national defense, labor, engineering, and membership, as well as the Sales Managers Committee, will meet and take an active part in each convention program.

Plans are being perfected to ensure the fullest publicity for speeches and convention news generally, and to develop public relations contacts with editors, radio editors, advertisers and important community groups.

Talks and discussion panels on such subjects as Radio's Place in National Defense, Radio and Education and like topics will be broadcast over local broadcasting stations.

Charts will be prepared in advance for use at the meetings, covering such subjects as:

1) Radio’s growth as an industry, its significant milestones and achievements;
2) Value of radio as an advertising medium, its growth, application to various types of business, success for sponsors, etc.;
3) Functions and services of the various NAB Departments, samples of the products of the various departments, such as, Broadcast Advertising Record, Accounting Manual, Trade Studies, etc.;
4) Summary of our legislative problems.

In a letter to District Directors, C. E. Arney, Jr., Assistant to the President, has expressed the wish of the Sales Managers Executive Committee that as many sales managers in each District as possible be present in order that the plans and programs of the Department of Broadcast Advertising may be furthered and made of even greater use and value to the entire membership. Every member of the district sales managers committees should be present at his district meeting, in order to get the greatest benefit to himself and his station.

Addressing the District Directors, President Miller expressed the view that this year’s meetings would be especially important in the light of radio’s many current problems, to *(Continued on page 758)*
The solution of which much assistance will undoubtedly be gained by an exchange of views among broadcasters themselves as well as by contact with influential leaders in local communities throughout the country.

The time and place of each district meeting has been worked out in a tentative schedule now before the district directors, and the dates and location of the first meetings to be scheduled will be announced in forthcoming REPL furnups.

NIB CONVENTION

At its two-day convention in Chicago this week, NIB adopted a number of resolutions aimed at reorganization of that body under a plan of State representation. Present officers will serve until State delegates are selected, it was announced, when such delegates will in turn select new officers and directors.

A large part of the session was devoted to the music situation, representatives of ASCAP, BMI, SESAC and AMP presenting the views of their respective organizations. Chairman Fly of the FCC, General Cummins of the U. S. Army, Sixth Corps Area, Chicago, and Mr. Victor O. Waters, special assistant attorney-general, were among the speakers who addressed the delegates from some hundred twenty-five odd stations.

Referring to the current Senatorial hearings on alleged charges of pro-war propaganda activity on the part of motion picture and radio interests, Chairman Fly echoed the views expressed by President Harold A. Lafount called for hundreds of everyday Americans.

The real justification of private ownership of radio is that control can thereby be left, as Mr. Miller says, in the hands of hundreds of men and women of all creeds and political beliefs—Republicans and Democrats, farmers, lawyers, newspaper people—all business people of all kinds," the FCC Chairman said.

"The real justification of private ownership of radio is that control can thereby be left, as Mr. Miller says, in the hands of hundreds of men and women of all creeds and political beliefs—Republicans and Democrats, farmers, lawyers, newspaper people—all business people of all kinds," the FCC Chairman said.

In his opening address, President Harold A. Lafount called for hundreds of everyday Americans.

In his opening address, President Harold A. Lafount called for hundreds of everyday Americans.
Navy Wants Licensed Operators

Listeners to the Woodbury program on NBC-Blue, Sunday night, September 21, heard Walter Winchell give a Navy plug which sought licensed commercial radio operators. The Army and the Navy have already taken operators from stations and doubtless many more will go to the armed services. This is one reason NAB is promoting intensive radio courses in colleges and universities.

Industry to Help Marines

Beginning early in October the United States Marine Corps will distribute recruiting announcements through NAB. The cooperation of the broadcasting industry was sought by Brigadier General Robert L. Denig and Major George T. Van der Hoef.

Return Forms Early

Forms for reporting September national defense data will be mailed all stations this week. The information, by virtue of being assembled in one spot for ready reference, is being of such substantial help that it is hoped additional stations will return the form promptly. The count of reporting stations to end of this month is approximately 371. Doubling this number will be appreciated.

Broadcast Search for Instructors

When Gene Tunney came to Cincinnati in search of physical education instructors for the U. S. Navy, last week, he appeared on a half hour broadcast over WCKY, from the Florentine room of Hotel Gibson. It was attended by a crowd of approximately one thousand.

TO ADDRESS AFA

Neville Miller will speak on "Freedom of the Press and Radio" and Frank E. Pellegrin will discuss "Retailing by Radio" October 21, at a district convention of the Advertising Federation of America to be held in Tulsa, Okla.

Wholesale Grocers' Atlas

To increase revenue by selling more time to food manufacturers, KMA, Shenandoah, Ia., has prepared an "Atlas of Wholesale Grocers" to give advertisers a definite index of the distribution centers whose business is stimulated by KMA advertising. The 8-page brochure also contains a station coverage map, testimonials, market data, etc. Copies may be obtained by writing J. C. Rapp, station manager.

For "Sold Out" Prospects

The problem of selling advertising to a manufacturer who says "Why should I advertise when I'm sold out?" is occurring more frequently in radio circles. Good answers are contained in a reprint of "Blood, Tears and Advertising," a talk delivered by Ellen Hess, editor of Tide, before the Advertising Club of Boston. Copies are available by writing Tide magazine.

Retail Advertising Budgets

A table showing advertising expense ratios in 50 retail trades is given in Dun's Review for January, 1941, and has proved helpful to radio sales managers by providing a groundwork for the planning of better advertising help to retailers. The ratios given are advertising expenses as percentages of net sales, and show the upper and lower limits and median averages for all trades.

The study shows that the large retailer commonly spends a bigger portion of the sales dollar on advertising than the small retailer, and that the store in a medium size town is likely to be a more liberal spender percentage-wise than a similar store in a large city or small town.

The study is titled "How Retail Advertising Expenditures Vary with Sales Volume and Size of City," and was edited by Walter L. Mitchell, Jr., Director of Surveys, Dun & Bradstreet, Inc. Radio stations that do not subscribe to Dun's Review might be able to obtain a copy from a public library, chamber of commerce, bank, etc.

Regarding Hal Ayers

Because of inquiries from NAB members, the following information is given on Hal Ayers, who is reported to be selling transcribed programs to United States Tire dealers in various localities. The programs, "Transcontinental Tours," are supposed to terminate with a number of all-expense tours of the U. S., Latin and South America, awarded to winners of essay contests.

The United States Rubber Co. reports that Hal Ayers is not an authorized representative nor was he ever connected with the company, that the company does not know his whereabouts, and that on July 1st it instructed all its Branches to warn their dealers against any solicitation made by Mr. Ayers.

Sales Managers Meet

Harvey Wixson, manager of KHQ-KGA, Spokane, was elected president of the NAB Sales Manager's Division of the 17th District at its bi-annual meeting in Portland, September 12.

Highlighting the meeting was a luncheon attended by 63 guests representing in addition to radio stations, all Portland advertising agencies and several in Seattle.

Afternoon sessions were split, with smaller station representatives meeting under the chairmanship of Lee Bishop, KMED.

Executives of all advertising agencies in the district were invited to the luncheon at which Ralph Calkins, Pacific Northwest manager of the McCann-Erickson agency, spoke on "An Agency's View of Radio as a Medium."

On the social side, a cocktail party at which radio members entertained agency representatives, and golf at Oswego Country Club, completed the calendar. It was decided to hold the spring meeting in Spokane.

Radio representatives attending included the following: KXL, Miss Wallace; KFPY, R. C. Ostrander; KGA, Harvey Wixson; KOIN, Harry Buckendahl; KALE, Charlie Couche; KOMO, H. M. Felts; KIRO, Archie Morton; KOIN, Al Vaughann; KOPN, Bruce Ficht; KODL, Glenn Howell; KODL, Bob Maille; KWRC, Henry House; KWRC, Del Fitzpatrick; KODL, Barney Kenworthy; KRNR, Marshall Penzra; KUIN, Don Telford; KOIN, Arthur Briggs; KOIN, Newton G. Hedin; KOIN, Del Chance; KOOS, Ben Stone; KOOS, Mark DeCarrauny; KMED, Lee Bishop; KWIL, Hal Byer; KORE, Glenn McCormick; KWLK, Frank Colfin; KWLK, Loren Nicholson; KGY, Tom Olen; KXXO, Fred Goddard; KXRO, Rod McCord; KBLD, Frank Logan; KELA, Elroy McCaw; KJR, Chuck Balle; KGW, Arden Pangborn; KEX, Paul Connet; KEX, Jack Eichenberger; KGW, Jim Mount; KOIN, Clark Mears; KFPY, Dick Green; KFPY, Cliff Nelson; KXL, H. G. Jacobsen; KOIN, Tom Case; KOIN, N. A. Davis; KVAN, Bill McCready; KALE, Ted Kooreman; KSLM, Earl Headrick.
NAB Sales Helps

Last week copies were sent all member stations of "They Don't Seem to Believe Us" and "New Check List of FTC Taboos", to assist copy departments in maintaining high standards in radio advertising.

Now in preparation and planned for distribution this week are new summary tables on radio advertising for grocery stores and insurance companies. These, prepared jointly by the NAB Department of Research and the NAB Department of Broadcast Advertising, are being issued because of the success reported by many members in selling more radio time through the summary table on department store advertising, recently issued. Requests have been filed for hundreds of extra copies, and a limited quantity is still available at no charge.

These two tables are being prepared because the food products field is the largest single source of radio advertising revenue, and the insurance field is considered a profitable one to develop in the light of present conditions.

Also distributed was a "Results from Radio" trade study on Mortuaries, already a good source of revenue for some stations. Extra copies may be had at cost in any quantity, and may be imprinted locally if desired.

A survey is being conducted on dealer-cooperative advertising, with all NAB member stations asked to supply the names of those manufacturers which permit the use of dealer funds for field is the largest single source of radio advertising revenue, and many members in selling more radio time through the summary table on department store advertising, recently issued. Requests have been filed for hundreds of extra copies, and a limited quantity is still available at no charge.

These two tables are being prepared because the food products field is the largest single source of radio advertising revenue, and the insurance field is considered a profitable one to develop in the light of present conditions.

Also distributed was a "Results from Radio" trade study on Mortuaries, already a good source of revenue for some stations. Extra copies may be had at cost in any quantity, and may be imprinted locally if desired.

Per-Inquiry and Free Time

An NAB member station reports that it has been unable to collect for radio advertising rendered the United Advertising Companies, Inc., Chicago agency, and their client, The Pen Man.

Although the order originally placed was a firm order, the agency has replied that it was issued "with the reservation in mind" that the station would "make it pay out" on a per-inquiry basis.

The National Needlecraft Bureau, Inc., New York, is seeking free time on women's programs to promote needlework. Lesson give-aways are offered, which definitely recommend commercial brands of materials required.

Constance Hoppe Associates, Inc., New York, is seeking free time for radio interviews to feature Martha Alden, who is engaged in conducting bedmaking demonstrations and talking about sleep exercises at department stores.

Batten, Barton, Durstine & Osborn, New York agency, is seeking free radio time on behalf of The Saturday Evening Post-KKO Pictures promotion stunt to elect an "all-American dance band." Member stations have pointed out that they are trying to sell radio time to publications and motion picture producers, and would be discriminating against paid advertisers if they donated free time to this promotion.

Labor

SUPREME COURT REVIEW

General Philip B. Fleming, Administrator of the Wage and Hour Division, United States Department of Labor, announced that the Solicitor General had filed in the United States Supreme Court for a writ of certiorari to review a decision on June 27, 1941, of the Circuit Court of Appeals for the Fifth Circuit in the case of Fleming v. A. H. Belo Corporation, publisher of the Dallas (Texas) News. In its decision the Circuit Court held that an employer who guaranteed his employees a certain weekly salary might fix by agreement with them the rate to be used in computing overtime compensation. This affirmed a decision of the United States District Court at Dallas, Texas. The Wage and Hour Division contended that the Fair Labor Standards Act required that overtime compensation be computed on the basis of a rate obtained for each week by dividing the amount of the guaranteed weekly salary by the number of hours worked that week.

Cost of Living

The cost of living advanced 0.8 per cent from mid-July to mid-August, the Labor Department reports. On August 15, the cost of living was 106 per cent of its 1935-39 average.

WGRC Musicians

Remote bands returned to MBS Friday, September 19, after a week's absence, with the settlement of a dispute between Station WGRC, Louisville, and the A. F. of M. The settlement was worked out in the New York offices of the union at a conference attended by S. A. Cisler, WGRC manager; Fred Weber, MBS; Joseph L. Miller, NAB; James C. Petrillo, A. F. of M; president, and other union officials.

Safety Drive

Zero hour for the greatest mass attack against accidents in the history of the country will be October 6.

The attack was ordered by President Roosevelt, who asked the National Safety Council to lead an intensified emergency campaign against accidents that are crippling national defense.

The Council announced today that mobilization of a vast safety army is complete, and that the official opening gun for the campaign will be timed with the start of the National Safety Congress and Exposition on October 6.

An impressive ceremony at the opening session of the Congress will be the signal that will start the campaign rolling throughout the nation, with every state and thousands of communities swinging into the drive against accidents.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, September 29. They are subject to change.

Wednesday, October 1

Consolidated Hearing

NEW—Ralph L. Lewis, Greensboro, N. C.—C. P., 1370 kc., 100 watts, unlimited time.

Thursday, October 2

KFNF—KFNF, Incorporated, Shenandoah, Iowa.—Renewal of license, 920 kc., 500 watts night, 1 KW day, S-KUSD.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

Everett L. Dillard, tr/as Commercial Radio Equipment Co., Kansas City, Mo.—Granted construction permit (B4-PH-14) for
new high frequency (FM) broadcast station to operate on 14900 kc., with a service area of 4,400 square miles.

KKRO—Everett Broadcasting Co., Inc., Everett, Wash.—Granted special service authorization (B5-SSA-8) to operate unlimited time, to use hours vacated by Station KEVR, for the balance of the regular license period, December 1, 1941. Station now operates day until LS sharing with KEVR.

WAZ—Pillar of Fire, Zarephath, N. J.—Granted construction permit (B1-P-3200) subject to proof of performance and taking care of complaints in blanket area, to install new transmitter, increase power to 5 KW day, using directional antenna day and night. Station now has 1 KW day and night, S-WBNX on 1380 kc.

KRNR—News-Review Co., Roseburg, Ore.—Granted construction permit (B3-P-3154) to make changes in antenna and increase night power to 250 watts. Station now has 100 watts night, 250 watts day, 1390 kc., unlimited time.

WNAD—University of Oklahoma, Norman, Okla.—Granted renewal of license for the period ending February 1, 1942.

APPLICATION DENIED

WGEA—General Electric Co., Schenectady, N. Y.—Denied request to transmit commercial programs on 9530 kc. (Pan American frequency), over International b/c Station WGEA on September 29, 1941.

DESIGNATED FOR HEARING

Yankee Broadcasting Co., Inc., New York, N. Y.—Application for construction permit for new standard broadcast station to operate on 1240 kc., 1 KW, using directional antenna day and night, unlimited time (B1-P-3094).

Newark Broadcasting Corp., Newark, N. J.—Application for construction permit for new standard broadcast station to operate on 620 kc., 5 KW, unlimited time, employing directional antenna day and night (B1-P-3249) (Consolidated hearing with above application).

WSOY—Commerce Broadcasting, Inc., Decatur, Ill.—Application for construction permit amended so as to request change in frequency to 1560 kc., increase power to 10 KW, make changes in equipment, install directional antenna for night use and move transmitter to approximately 7 miles southwest of Decatur, Ill. (B4-P-3028, Docket No. 6004).

Consolidated hearing on following applications for new broadcast stations:

R. O. Hardin, tr/as Nashville Broadcasting Co., Nashville, Tenn.—Application for construction permit (B3-P-3190) for new standard broadcast station to operate on 1210 kc., 250 watts, unlimited time (requests facilities of WSIX when vacated); exact location in Nashville, Tenn., and antenna system to be determined subject to Commission's approval.

John R. Crowder, tr/as Dimple Broadcasting Co., Columbia, Tenn.—Application (B3-P-3241) for 1210 kc., 250 watts, unlimited time.

Tennessee Radio Corp., Nashville, Tenn.—Application (B3-P-3219) for 1210 kc., 250 watts, unlimited time. (Requests facilities of WSIX when vacated.)

Binney Imes & Robin Weaver, d/b/a Imes-Weaver Broadcasting Co., Murphysboro, Ill.—Application (B3-P-3215) for 1210 kc., 250 watts, unlimited time. Exact location and antenna system to be determined subject to Commission's approval. (Requests facilities of WSIX when vacated.)

Binney Imes and Robin Weaver, a co-partnership, d/b/a Imes-Weaver Broadcasting Co., Columbia, Tenn.—Application (B3-P-3203) for 1310 kc., 250 watts, unlimited time. Exact site and antenna system to be determined subject to Commission's approval.

RENEWAL OF LICENSES

Granted extension of licenses upon a temporary basis only, pending receipt of and determination upon applications for renewal of licenses, in no event later than November 1, 1941, of following:

KBIC, Cheyenne, Wyo.; KGEK, Sterling, Colo.; KGEZ, Kalispell, Mont.; KGY, Olympia, Wash.; KMAC, San Antonio, Tex.; KRLH, Midland, Tex.; KROC, Rochester, Minn.; KSB, Cedar City, Utah; KTVU, North of Logan, Utah; KVOX, Moorhead, Minn.; KWFC, Hot Springs, Ark.; KXON, Keokuk, Iowa; WABJ, Bangor, Me.; WAQH, Warwick, N. Y.; WBIR, Knoxville, Tenn.; WWOX, Toledo, Ohio; WBQ, Outside City Limits, Salisbury, Md.; WCAT, Rapid City, S. D.; WDAK, West Point, Ga.; WJBY, Gadsden, Ala.; WJMC, Rice Lake, Wis.; WLBJ, near Bowling Green, Ky.; WLOF, Orlando, Fla.

 Granted extension of licenses upon a temporary basis only, pending receipt of and determination upon applications for renewal of licenses, in no event later than December 1, 1941, of following:

WJMA, Covington, Va.; WRBL, Columbus, Ga.

Granted renewal of following broadcast station licenses for the period October 1, 1941, and ending not later than October 1, 1942:

The following stations were granted renewals for the period ending August 1, 1942:

WCNW, Brooklyn, N. Y., and WHK, Cleveland, Ohio.

Licenses for the following stations were extended on a temporary basis only, for the period ending November 1, 1941, pending determination upon applications for renewal:

WELL, Battle Creek, Mich.; WZNP, New York City; WZLX, Denver, Colo., and WSXU, Oklahoma City, Okla.

PLACED IN PENDING FILE

WOKO, Inc., Albany, N. Y.—Application for construction permit (B1-PST-3) for new ST broadcast station placed in pending file pursuant to Order No. 76.

The Concord Tribune, Inc., Concord, N. C.—Application for construction permit (B3-P-3168) for new standard broadcast station placed in pending file pursuant to Order No. 79.

Binney Imes, Tupelo, Miss.—Application for construction permit (B3-P-3148) for new standard broadcast station placed in pending file pursuant to Order No. 79.

MISCELLANEOUS

KICA—Western Broadcasters, Inc., Clevis, N. M.—Granted special temporary authority to operate on the frequency of 1230 kc., with power of 100 watts, using equipment authorized by existing license, for a period not to exceed 30 days, beginning September 22, 1941, and ending not later than October 21, 1941. Pending filing of application for approval of new equipment.

September 26, 1941 — 761
WEAU—Central Broadcasting Co., Eau Claire, Wis.—Denied request for special temporary authority to operate on the frequency of 790 kc., with power of 5 KW, daytime, using the transmitter and one of the antenna towers at the transmitter site authorized in construction permit (File No. B-4-P-3047), for a period not to exceed 30 days, pending completion of the second antenna tower and proof of performance measurements, provided there is no objectionable interference results to any other station.

KSAM—Sam Houston Broadcasting Assn., Huntsville, Texas.—Granted special temporary authority to operate additional time from 7:35 p.m. to 9:30 p.m., CST, to the conclusion of the Huntsville High School football games on September 20 and 26, and October 3, 17, and 18, 1941, in order to broadcast said games only.

KSWO—Willard Carver & Byrne Ross, Pawton, Okla.—Granted special temporary authority to operate additional time from 9:30 p.m. to 11 p.m., CST, on September 18, 19, and 20; and October 9 and 10, 1941, in order to broadcast the Lawton High School and Cameron Junior College football games only.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted special temporary authority to operate additional time from 7 p.m. to 9:30 p.m., CST, on September 19 and 26, 1941, in order to broadcast the High School football games on September 19 and 26 and October 9 and 10, 1941, in order to broadcast said games, only.

WNBT—National Broadcasting Co., Inc., New York City, N. Y.—Granted extension of special temporary authority to operate simultaneously with station KOA from regular sign-off time (September, 9 p.m., EST) to the conclusion of the University of Florida football games on September 28 to not later than November 27, 1941.

KRCA—National Broadcasting Co., Inc., New York City, N. Y.—Granted extension of special temporary authority to operate a frequency modulation station commercially on Channel 1 in order to make comparison of FM and AM emissions and to obtain engineering data for the period September 17 to not later than October 17, 1941.

WQBC—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Granted authority to determine operating power by direct measurement of antenna input (B-3-Z-1204).

WGII—Talesburg Broadcasting Co., Talesburg, Ill.—Granted authority to determine operating power by direct measurement of antenna input (B-4-Z-961).

KMAC—Walmac Co., San Antonio, Texas.—Granted authority to determine operating power by direct measurement of antenna input (B-4-Z-961).
Greater Houston Broadcasting Co., Inc., Houston, Texas.—Granted petition for modification of order of request to take depositions in re applications of Scripps-Howard Radio, Inc., Texas Star Broadcasting Co., and Greater Houston Broadcasting Co., Inc., for a new station in Houston.

K MPC—The Station of the Stars, Inc., Beverly Hills, Cal.—Granted petition to intervene and to enlarge issues in re application of Park Cities Broadcasting Corp., for a new station in Dallas, Texas.

Barclay Craighead, Butte, Mont.—Granted motion to take depositions and continue hearing date in re application for new station; also consolidated hearing with that of Hennessy Broadcasting Co., Butte, Docket No. 6131, and continued consolidated hearing to November 4, 1941.

W EEE—Works Broadcasting Co., Reading, Penna.—Granted motion insofar as it requested continuation of hearing on application to operate on 850 kc., 1 kw, unlimited time; DA-night, and continued hearing to December 3, 1941.

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Granted motion for leave to amend application so as to specify proposed power of 5 kw during evening hours using directional antenna, and retention of hearing date now scheduled for October 28.

Radiomarine Corp., of America, New York City.—Dismissed petition for authority to intervene in the hearing on application of Waterways Radio Co., St. Louis, Mo., for a new coastal harbor station.

W CAM—City of Camden, Camden, N. J., and WCAP, Radio Industries Broadcasting Co., Asbury Park, N. J.—Granted petition to continue hearing now scheduled for September 29 to October 20, in re applications of WCAM, WCAP, WTNJ, for renewal of licenses; WCAM, WCAP and WTNJ for modification of licenses, and WDAS for construction permit.

APPLICATIONS FILED AT FCC

550 Kilocycles

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Modification of construction permit (B5-P-2422) as modified, to install new transmitter and directional antenna for day and night use, increase in power and move of transmitter, requesting extension of completion date from 10-14-41 to 1-1-42.

610 Kilocycles

WIOD—Oregon State Agricultural College, Corvallis, Ore.—Authority to determine operating power by direct method. (Auxiliary transmitter.)

WIOD—Isle of Dreams Broadcasting Corp., Miami, Fla.—License to cover construction permit (B5-P-3184), for move of formerly licensed main transmitter to new location to use as auxiliary transmitter.

660 Kilocycles

KOWH—World Publishing Co., Omaha, Nebr.—Construction permit to install new transmitter, install directional antenna for day and night use, increase power from 500 watts to 10 kw, change hours from daytime to unlimited time and move transmitter.

710 Kilocycles

NEW—Park Cities Broadcasting Corp., Dallas, Texas.—Construction permit for a new broadcast station to be operated on 710 kc., 5 kw, unlimited hours, directional antenna for night use. Amended: re stockholders.

790 Kilocycles

KGLH—Northwestern Auto Supply Co., Inc., Billings, Mont.—License to cover construction permit (B5-P-2701), as modified, for increase in night power and directional antenna for night use.

KGLH—Northwestern Auto Supply Co., Inc., Billings, Mont.—Authority to determine operating power by direct method.

WMC—Memphis Publishing Co., Memphis, Tenn.—Modification of construction permit (B5-P-2743), for increase in power and changes in directional antenna for night use, requesting changes in directional antenna.
800 Kilocycles

NEW—Albert S. and Robert A. Drohlich, d.b as Drohlich Bros., Jefferson City, Mo.—Construction permit for a new broadcast station to be operated on 800 kc., 1 KW, and daytime hours.

850 Kilocycles

KFUO—Evangelical Lutheran Synod of Missouri, Ohio and Other States, Clayton, Mo.—License to cover construction permit (B4-P-2882), as modified, for increase in power, new transmitter and antenna.

3000 Kilocycles

NEW—Susquehanna Broadcasting Co., York, Pa.—Construction permit for a new broadcast station to be operated on 3000 kc., 1 KW and daytime hours.

920 Kilocycles

WBBB—Alamance Broadcasting Co., Inc., Burlington, N. C.—License to cover construction permit (B3-P-3093), as modified, for a new broadcast station.

WBBB—Alamance Broadcasting Co., Inc., Burlington, N. C.—Authority to determine operating power by direct method.

930 Kilocycles

WBEN—WBEN, Inc., Buffalo, N. Y.—License to cover construction permit (B1-P-3076), for move of auxiliary transmitter.

WBEN—WBEN, Inc., Buffalo, N. Y.—Authority to determine operating power by direct method. (Auxiliary transmitter.)

NEW—Tar Heel Broadcasting System, Inc., Washington, N. C.—Construction permit for a new broadcast station to be operated on 930 kc., 1 KW and daytime hours.

950 Kilocycles

KPRC—Houston Printing Corp., Houston, Texas.—License to cover construction permit (B3-P-2791), as modified, for installation of directional antenna for night use and increase in power.

KPRC—Houston Printing Corp., Houston, Texas.—Authority to determine operating power by direct method.

1000 Kilocycles

WCFL—Chicago Federation of Labor, Chicago, Ill.—Modification of construction permit (B4-P-2961), for increase in power, change in hours, new transmitter, directional antenna for day and night use, requesting extension of completion date from 10-25-41 to 12-24-41.

1080 Kilocycles

NEW—WKAL, Incorporated, Kalamazo, Mich.—Construction permit for a new broadcast station to be operated on 1080 kc., 1 KW and daytime hours. Amended: to change frequency to 1230 kc., power to 250 watts, hours to unlimited, change type of transmitter and request facilities of Station WGRB.

1130 Kilocycles

WOF—Greater New York Broadcasting Corp., New York, N. Y.—Modification of license to use old 5 KW transmitter as auxiliary transmitter for emergency use.

1230 Kilocycles

WACY—Burlington Daily News, Inc., Burlington, Vt.—Modification of construction permit (B1-P-3082), to install new transmitter, change frequency from 1230 to 620 kc., increase power from 250 watts to 1 KW and move transmitter, requesting installation of new transmitter.

1320 Kilocycles

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Modification of construction permit (B2-P-2947), as modified, for installation of directional antenna for night use and increase in power, requesting extension of completion date from 11-27-41 to 5-27-42.

1330 Kilocycles

WF1N—Findlay Radio Co., Findlay, Ohio.—Modification of construction permit (B2-P-2846), for a new station, requesting approval of antenna and transmitter site.

1340 Kilocycles

WGTM—WGTM, Inc., Wilson, N. C.—License to cover construction permit (B3-P-3166), for move of studio and transmitter.

WGTM—WGTM, Inc., Wilson, N. C.—Authority to determine operating power by direct method.

1360 Kilocycles

KMO—Carl E. Haymond, Tacoma, Wash.—License to use old WE transmitter as auxiliary transmitter, emergency use only.

KMO—Carl E. Haymond, Tacoma, Wash.—Authority to determine operating power by direct method.

1400 Kilocycles

WDAY—Vee Bee Corp., Portsmouth, Ohio.—Modification of construction permit (B2-P-2685), as modified, for equipment changes, increase in power, antenna changes and move of transmitter, requesting extension of completion date from 10-15-41 to 4-15-42.

1480 Kilocycles

WHOM—New Jersey Broadcasting Corp., Jersey City, N. J.—Construction permit to install directional antenna for day and night use, new transmitter, increase power from 500 watts night, 1 KW day to 5 KW day and night and move studio from N. J. to N. Y., N. Y.

FM APPLICATIONS

NEW—Wm. Penn Broadcasting Co., Philadelphia, Pa.—Construction permit for a new high frequency broadcast station to be operated on 47300 kc.; coverage, 9,352 square miles; population, 3,906,453.

W47NY—Muzak Corp., New York, N. Y.—Modification of construction permit (B1-PH-48) for a new high frequency broadcast station, requesting approval of antenna system and transmitter site.

W4TP—Walker and Downing Radio Corp., Pittsburgh, Pa.—License to cover construction permit (B2-PH-24) as modified, for a new high frequency broadcast station.

W41MM—Gordon Gray, Winston-Salem, N. C.—Modification of construction permit (B3-PH-76) for a new high frequency broadcast station, requesting change in transmitter, change studio location and extension of completion date from 11-12-41 to 180 days after date of grant.

W63NY—Marcus Loew Booking Agency, New York, N. Y.—Modification of construction permit (B1-PH-3) as modified, for a new high frequency broadcast station, requesting extension of commencement and completion dates from 4-13-41 and 10-13-41 to 9-1-41 and 3-1-42, respectively.

TELEVISION APPLICATIONS

WRGB—General Electric Co., Schenectady, N. Y.—Reinstatement of construction permit (B1-PECT-5) for a new commercial television station on Channel No. 3, 66000-72000 kc., ESR 3100, emission A5 and special for frequency modulation, unlimited hours.

W3XP—Philco Radio and Television Corp., Portable.—Modification of construction permit (B2-PVB-80) for increase in power and equipment changes, requesting extension of commencement and completion dates from 4-4-41 and 10-4-41 to 10-4-41 and 4-4-42, respectively.

MISCELLANEOUS APPLICATIONS

KFUN—Southwest Broadcasters, Inc., Las Vegas, N. M.—Modification of construction permit (B5-P-3147) for a new station, requesting authority to install new transmitter and extend commencement and completion dates from 9-16-41 and 3-16-41 to 60 days after grant and 180 days thereafter, respectively.
NEW—Commercial Radio-Sound Corp., Portable-Mobile.—Construction permit for a new Class II Experimental Public Address Relay station to be operated on 16280 kc., 1/10 watt, special emission for frequency modulation. Amended: to request 310000 kc.

WGEO—General Electric Co., S. Schenectady, N. Y.—License to cover construction permit (B1-P1B-32) for installation of new equipment.

NEW—Birney Imes, Portable-Mobile.—Construction permit for a new relay broadcast station to be operated on 1622, 2038, 2150 and 2790 kc., power 50 watts, emission A3.

FEDERAL TRADE COMMISSION

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Eversharp, Inc., Chicago, engaged in the manufacture and sale of fountain pens and pencils, is charged in a complaint with misrepresentation. (4590)

National Wholesale Hardware Association, Philadelphia, its officers, executive committee, advisory board, member companies, and several cooperating companies are charged with violation of the Federal Trade Commission Act in the sale of hardware and kindred merchandise. The complaint alleges that the respondents engaged in an understanding, combination and conspiracy to hinder and suppress competition among dealers and manufacturers and to create a monopoly in the interstate sale of their products. (4592)

C. H. Robinson Company and Nash-Finch Company, Minneapolis, Minn., are charged in a complaint with violation of the brokerage section of the Robinson-Patman Act. (4589)

Utah Beverage & Distributing Company—Ben Arnovitz and Wilford Arnovitz, trading as Utah Beverage and Distributing Co., Salt Lake City, Utah, engaged in the sale and distribution of candies, clocks, cigarettes and other novelty merchandise, is charged in a complaint with the use of lottery methods in the sale of their products. (4591)

CEASE AND DESIST ORDERS

Commission has issued the following cease and desist orders during the past week:

Bard-Parker Co., Inc., and its subsidiary and selling agent, Parker, White and Heyl, Inc., both of Danbury, Conn., have been ordered to cease and desist from misleading representations in the sale of "Bard-Parker Formaldehyde Germicide." (4478)

Brahant Needle Co., Inc., 47 Great Jones St., New York, engaged in the importing and distribution of needles and needle threaders, has been ordered to cease and desist from misrepresentations as to the country of origin of its products. (4212)

Copinol Company—Robert E. Overell, trading as Copinol Company, 7th and Main Sts., Los Angeles, has been ordered to cease and desist from false advertising and misrepresentations made in the distribution of a preparation designated "Copinol" and sometimes as "Copinol Nasal Medicine." (4431)

Oxol Laboratories—W. S. McClymonds and G. L. McClymonds, formerly doing business as Oxol Laboratories, Denver, Colo., have been ordered to cease and desist from the dissemination of misleading representations in the sale of a drug preparation designated "Trox Tablets." (4108)

Positive Products Company—Earl Aronberg, trading as Positive Products Co., and as Rex Products Co., 6603 Cottage Grove Ave., Chicago, has been ordered to cease and desist from false advertising and misrepresentations in the sale of certain medicinal preparations designated "Triple X Relief Compound" and "Perio Pills," the latter being known also as "Reliable Perio Compound" and as "Perio Relief Compound." (3856)

Renaud Sales Company, Inc., Murray W. Morin, Irving Unterman and Irving Lipschitz, individually and as officers of Renaud Sales Company, Inc., 245 Fifth Ave., New York City, distributors of perfumes, have been ordered to cease and desist from misrepresentation in the sale of their products. (3500)

Spencer System, a Massachusetts trust, and John L. Shea, William J. Hazerty, individually and as trustees of the trust, and Jean G. Mitchell and Glenda S. Hills, individually, 55 Belvidere St., Boston, Mass., engaged in selling courses of instruction and instructing students in the design and fabrication of arch supports and "foot exercisers," have been ordered to cease and desist from certain misrepresentation. (4530)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Consolidated Royal Chemical Corporation, trading as Consolidated Drug Trade Products, 544 South Wells St., Chicago, engaged in selling a medicinal preparation designated "Hexin," has stipulated that it will cease and desist from representing that Hexin will relieve a cold or that it is of any benefit in the treatment of a cold in excess of temporary relief from the physical discomfort symptoms incident to or associated with a cold. The respondent further agrees to desist from disseminating any advertisement for Hexin which fails to reveal that frequent or continued use may be dangerous, causing serious blood disturbances and that the product should not be taken in excess of the dosage recommended; provided, however, that such advertisement need contain only a statement that the preparation should be used only as directed on the label thereof if and when such label either contains a proper caution or warning or specifically directs attention to such a caution or warning statement in the accompanying labeling. (02876)

Crosman Arms Co., Inc., Rochester, N. Y., distributor of the "Crosman Silent Pneumatic" air rifle, has stipulated to cease and desist from representing that no air rifle, other than that sold by the respondent, is noiseless, requires no cleaning, uses low cost ammunition, has adjustable power, has no recoil or produces no bullet splatter. (02134)

Electric Heat Control Co., 9123 Inman Ave., Cleveland, O., engaged in selling electric fence controllers designated "King Cattle Guard," has stipulated to discontinue representing that the use of its electric fence controllers will effect any stated
amount or percentage of saving in farm fencing costs as compared with the costs of other types of fences, without stating the type or types of fence used as a basis for such comparison, and with¬
out taking into consideration in such comparison all costs, includ¬
ing both initial cost and cost of maintenance. (02881)

T. Hopkins & Son, 430 Lafayette St., New York City, engaged in
selling a cosmetic designated “Gouraud’s Oriental Cream,” has
entered into a stipulation in which he agrees to discontinue repre¬
senting that the product is used by famous stage and screen
stars; that it prevents sun or wind burn and restores the skin
of youth, or that it will retain the original attractiveness of
the skin during swimming, sun bathing, or other outdoor sports.
(02875)

Luvos Clay Company of America—Paul R. Kemper, trading as
Luvos Clay Company of America, and as Luvos Minerals Co.,
Los Angeles, has stipulated to discontinue representing that “Luvos
Pack” is a remedy or cure for nose, mouth or throat ailments,
and rheumatic, neuralgic and various other ailments or has value
in excess of that afforded by its poultice-like action in temporarily
relieving pain; that “Luvos Minerals” will prevent or is a remedy
for colitis, gastritis, hyperacidity and numerous other ailments;
and in this connection will do more than aid in reducing hyperacidity;
and that it has any therapeutic value in the treatment of throat
irritations or infections. The respondent further agrees to dis¬
continue representing that either of the products is free from
drugs or medication, that either is prescribed by physicians, or that
Luvos Minerals has an influence on the metabolism; that it will
bind poisonous material, or that it reacts upon the whole body
organism. (02879)

Mills Novelty Co., 4100 W. Fullerton Ave., Chicago, a cor¬
poration engaged in the business of manufacturing, among other
things, refrigeration compressors and beverage coolers, has stipu¬
lated that it will cease and desist representing that its 1/3 horse¬
power compressor unit will equal the performance of the 1/2
horse-power compressor units of other manufacturers. (3212)

Ozone Air Company—Clyde Scherpness, trading as Ozone Air
Co., 928 Cherry St., S. E., Grand Rapids, Mich., has stipulated
with the Commission to desist from dissemination of advertising
to the effect that his machines or devices designated “Ozone-Air,”
or any similar devices, have any therapeutic value; that such
devices or ozone developed by their use will eliminate foul air,
purify or reanimate the air, eliminate offensive odors, oxidize all
foreign matter in the air, destroy everything which is not naturally
a component part of the air or render carbon monoxide innocuous
or harmless; that the device or ozone generated by it is a com¬
petent sterilizing agent or germicide, will destroy germs or bac¬
teria or is conducive to health; that use of the device will effec¬
tively or result in a saving of 50% or other appreciable percentage
in the cost of heating; or that its use by poultry raisers will
eliminate or prevent poultry disease or infection, increase egg
production, improve health of stock, constitute a competent dis¬
fident or eliminate or destroy offensive odors in poultry
houses. (3211)

Sears, Roebuck & Company, Chicago, in connection with the
sale and distribution of garden hose in commerce, has stipulated
that it will discontinue the use of the term “3-ply” as descriptive
of garden hose which is not constructed of three layers of cotton
duck; and from use of the word “ply” either alone or in connection
with a designated number or numeral so as to import or imply
that the garden hose contains the indicated number of plies, each
ply consisting of a separate layer of cotton duck. (2839)

Spalding Plaster Co., Inc., 179 Broad St., Providence, R. I.,
engaged in selling a device designated “Spalding’s Wonder Plasters,”
has stipulated to discontinue representing that the product will
remedy or cure rheumatism, arthritis, neuritis or other ailments,
or that it is of any benefit in the treatment of such conditions
beyond the temporary relief of painful symptoms associated therewith;
that the product will restore normal circulation throughout the
body, or will have any effect upon the circulation beyond tend¬
ing to stimulate circulation at the site of application, and that
the product is entirely different from competing products, or that
the principle involved in the “Spalding Method” is unique or new.
(02877)

Taylor-Rea Corporation, trading as House of Taylor-Rea,
1011 W. 2nd St., Los Angeles, engaged in selling a shampoo desig¬
nated “Studio Girl Shampoo,” has stipulated to discontinue repre¬
senting that it will cease and desist representing that Thelorysus has
any therapeutic value in the treatment of eczema, pimples, itch or
any other skin ailments, or that it is an elixir which will stimulate
general systemic resistance to psoriasis and resolve and abate
persistent lesions. (02880)

Thieleman Drug Company—Fred E. Thieleman, trading as
Thieleman Drug Co., Dearborn, Mich., engaged in selling a medi¬
cined preparation designated “Thelorysus,” has entered into a stipu¬
ation in which he agrees to cease representing that Thelorysus has
any therapeutic value in the treatment of eczema, pimples, itch or
any skin ailments, or that it is an elixir which will stimulate
general systemic resistance to psoriasis and resolve and abate
persistent lesions. (02880)

Vita-Life, Incorporated, 344 N. E. 28th Ave., Portland, Ore.,
has stipulated that its devices or machines designated “Vita-Life,”
or any other ozone generating device of substantially the same
character, have any therapeutic value; that they destroy or are
capable of destroying bacteria or germs, are of benefit or value in
the alleviation or curing of disease or that their use is indicated as a
remedy or effective treatment for any ailment, disease or malady
of the human body; and from publishing or otherwise disseminat¬
ing any testimonials containing statements or assertions contrary
to the terms of the stipulation. (3210)

FTC COMPLAINT DISMISSED

Federal Trade Commission dismissed a complaint charging L. S.
Hoffman Machinery Corporation, 105 Fourth Ave., New York,
manufacturer and distributor of clothes pressing machines, with
violation of the Robinson-Patman Act in the sale of its products.
District Meetings Start Next Week in Louisville

Arrangements have now been completed for the first series of regional conventions to be held in all seventeen NAB districts this fall. The first convention will be held in District 7, at the Brown Hotel, Louisville, Kentucky, Thursday and Friday of next week, October 9 and 10. J. H. Ryan, WSPD, is district director.

The next three in the first series will be held as follows:

- District 8, at the Pantland Hotel, Grand Rapids, Michigan, on Monday and Tuesday, October 13 and 14, John E. Fetzer, WKZO, director.
- District 10, at the Fontenelle Hotel, Omaha, Nebraska, on Wednesday and Thursday, October 15 and 16, John J. Gillin, Jr., WOW, director.
- District 12, at Tulsa, Oklahoma, from Wednesday through Friday, November 5 to 7, Herb Hollister, KANS, director. The Southwestern District of the American Federation of Advertisers will hold a convention in Tulsa at the same time as the District 12 conference.

The next series of NAB conventions, covering Districts 1, 2, 3, 4 and 5, will be held from October 27 to November 8, and a final series, covering Districts 6, 13, 15, 16, 17, 14, 11 and 9, in that tentative order, are scheduled during the period from November 17 to December 16.

Reports from broadcasters in all parts of the country indicate that there is keen interest in the forthcoming regional conventions, at which industry problems, the developments of the past year, and the industry outlook will be discussed thoroughly. Record attendance is anticipated at all of these gatherings.

ASCAP CONTRACT ANALYSIS

Enclosed with this issue is NAB analysis of the ASCAP contracts, along with copies of the contracts and other relevant material. The NAB will be glad to furnish any additional information desired upon request.

ASCAP FREES FOOTBALL TUNES FOR ANOTHER WEEK-END

The NAB has been advised by John G. Paine, of the American Society of Composers, Authors and Publishers, that the Society has granted to all broadcasting stations the right to broadcast its music from football games, both college and professional, played on Friday, Saturday and Sunday, October 3rd, 4th and 5th. ASCAP granted the same rights last week, but no announcement has been forthcoming that this privilege will be extended to the future.

National Defense

More Radio Courses

More colleges and universities are booking radio training courses in accordance with suggestions made by liaison members of the NAB National Defense Committee.

In Montana the matter is being handled by Arthur Moebly, manager, KGVO, Missoula; while in Utah, Ivor Sharp, KSL director of station operations, Chief Engineer Groves, and the station's director of educational broadcasts are negotiating with the University of Utah.

Ed Yocum, manager, KGHL, Billings, is contact man for Montana and Utah.

George M. Burbach, general manager, KSD, St. Louis, has forwarded the Engineering, Science and Management Defense Training Courses listed in a special catalogue of Washington University, St. Louis. It provides for a suitable instruction course in radio training. Mr. Burbach is contacting other educational institutions in his District. He also reports that the Rankin Trade School, St. Louis, has shown a fine spirit of cooperation and cheerfully offers its facilities for radio training.

E. E. Hill, director, WTAG, Worcester, is working in close cooperation with Professor Edward L. Moreland, Massachusetts Institute of Technology, Regional Advisor, Region 1, Engineering, Science, and Management Defense Training. Mr. Hill said that Professor Moreland recently held a meeting of all engineering schools in the metropolitan area and that all of the engineering schools in Massachusetts, Maine, New Hampshire and Vermont have been written to. Professor Moreland urged the desirability of putting on additional courses in radio training.

U. S. Office of Education

The first paragraph of report, week of September 20, for Engineering, Science and Management Defense Training, U. S. Office of Education says:

"More Radio Training Provided--The need for training large numbers of persons in the fields of radio communications and electronics, pointed out early in the summer by Adjutant General E. S. Adams in a letter to Federal Security Administrator Paul V. McNutt, is confirmed by a recent study of the National Association of Broadcasters. As the result of conversations with responsible officials, not only of the Army and Navy, but also of the Federal Communications Commission and the National Research Council, the NAB has reported in a recent memorandum that it believes it is not possible at this time to train more persons in this field than can be used in the defense program, and that courses should be provided for everyone willing to take instruction. It is therefore urging, through the local members of its National Defense Committee, that many more radio courses be set up. Three suggested course outlines of college grade, prepared by Dean B. R. Van Leer of North Carolina State College, have been sent by the NAB to all members of its National Defense Committee for distribution to nearby schools."

October 3, 1941 — 767
OWN POWER SUPPLY NEEDED

During the war maneuvers just completed, Program Director Carl George, WGAR, Cleveland, reports that his crew made a total of 15 transcribed programs. The station operated two transcription machines and a short-wave mobile unit.

One of the difficulties encountered was a power supply while on the move. "As we see it," he said, "the stations covering the actual operations of an Army will have to be able to provide its own power supply. The Army moves very fast when it moves. A station must have all of its equipment just as mobile as possible. You never know where you are going to stop, and, therefore, you cannot plan to insert lines at a given location at a given time. You may be 50 miles away when your program is scheduled to go on the air. Moreover, line facilities are extremely limited and it is unlikely that a station can rely on line communication and get any actual broadcast from the front lines. For this reason we believe the station would have to provide short-wave communication facilities for itself which would permit both receiving and sending while on the move.

"In our case we made transcriptions which we believe proved to be the most satisfactory way of getting real action on the program. We were able to set up our equipment, in one case, while a dive-bombing attack was taking place and our recording is one of the most realistic things I have ever heard."

**BMI**

New BMI Subscribers

There has been a rush of new BMI subscribers since the total number passed 700, and the past week saw the addition of ten new stations. They were:

- KTNM, Tucumcari, N. Mex.
- KIUN, Pecos, Texas
- WRXN, Warren, Ohio
- KWOS, Jefferson City, Mo.
- WNOH, Henderson, Ky.
- WSON, WMOG, Brunswick, Ga.
- WNNV, Watertown, N. Y.
- WXAB, Bridgeport, Conn.
- WJIM, Lansing, Mich.
- KENO, Las Vegas, Nev.
- WSON, Henderson, Ky.
- WWOY, Watertown, N. Y.
- WNNV, Watertown, N. Y.

Campbell Arnoux, WTAR, Norfolk, Virginia, writes:

"May I extend our sincerest congratulations on the work of the past year which we consider one of the most brilliantly executed achievements during the entire course of the broadcasting industry."

New Song Sought for the Americas

BMI will cooperate with the Pan-American Coffee Bureau, now sponsoring Mrs. Roosevelt in a series of broadcasts, in a contest designed to select a song emphasizing the part played by coffee in hemispheric friendship. The contest, which will begin about November 1st and end about January 1st, 1942, will seek a tune in the popular idiom from a songwriter in one of the Americas. The prizes will be as follows: $100 for first prize; a large silver coffee cup for second prize; a smaller silver coffee cup, third prize; and twelve runner-up prizes of jumbo china cups each inscribed with the name of the winner. The judges will be chosen from among the best known band leaders and vocalists on the air. The contest will be initiated with an announcement on the Coffee Bureau program and the song winning first prize will be broadcast on this program.

**Pleased**

General enthusiasm from both composer and publisher accompanied the receipt of checks from BMI in payment for performances during the three months ended June 30, 1941. We quote the following in a letter from Radiotone Recording Studio, west coast publisher:

"I just received a royalty check for $613 for the second quarter and believe me I was pleasantly surprised. Your company paid off at 4¢ when they could have paid at 2¢. I like the way you do business."

**Sales**

**Midnight Commercials**

To reach defense workers on the night shift, alert Frederick & Nelson Department Store of Seattle, Wash., sponsors "We Are Americans," half-hour programs of recorded music, 12:30-1:00 a.m., six nights a week on KRSC.

Writes J. P. Heverly, the store's radio director:

"Fifty thousand defense workers in the Seattle area, divided into three shifts, are a tempting audience for any retailer. Seventeen thousand men get off at midnight and 12:30, and a survey showed that the majority of these men have radios in their cars, and that their wives were waiting up for them with radios on. Our specially designed patriotic program was built to appeal to these men and their families. It is used to sell men's furnishings, publicize major store promotions and obtain new account customers. Favorable results after a month's trial have merited a renewal at least through the first of the year."

**District Sales Meetings Planned**

Sales executives of the NAB are advised to stand by for notice of district sales meetings, to be held in all NAB districts during the next three months, and starting the middle of October. A tentative schedule has been drawn up and is awaiting confirmation by district directors. According to the plan, ample time will be allowed during two-day meetings for special sessions of sales managers, as well as for meetings with local advertising clubs and other civic groups. District Sales Managers Chairman will be consulted by their district directors regarding the sales meeting as soon as final dates for each district are approved.

**LANG PROTESTS LEGION STAND ON FOREIGN BROADCASTS**

The American Legion's resolution condemning foreign language broadcasts was strongly protested this week by Joseph Lang, WHOM, chairman of the NAB's foreign language committee.

In a letter to Legion officials, Mr. Lang called the organization's attitude "un-American, utterly ridiculous and detrimental to the cause of national unity."

He called on the American Legion to drop or rescind the resolution in the best interests of the country and to take steps to disavow further action along such lines.

Lang acted in behalf of 93 U. S. radio stations which feature foreign language broadcasts and cited statements by James Lawrence Fly, chairman of the FCC, on the value of such programs in Americanization work.
Mothers’ Magazine Commends
Children’s Program Progress

Says the October Ladies Home Journal:

When, early in 1939, the Journal’s What the Women of America Think survey revealed that a large majority of American mothers felt that children’s radio programs were dangerous to their children, we expressed the hope—and the confidence—that women would take the initiative in doing something constructive about it. It is always pleasant to report progress. And that is what we think is very definitely reflected in the activities since then of the Radio Council on Children’s Programs and the National Association of Broadcasters, as described in a recent report by Mrs. Dorothy Lewis, vice-chairman of the council.

In the course of 23,500 miles of travel Mrs. Lewis visited 169 cities, contacted 3000 club and civic leaders, met 1200 broadcasters; she was studying things as they are, evolving practical procedures for bringing about much better things, revivifying established groups and club committees who have been concerned with the problem in the past, and stimulating the creation of new ones.

The industry as represented by the National Association of Broadcasters was keenly interested in making effective that provision of its code (adopted in July, 1939) which seeks “to establish acceptable and improving standards for children’s programs.” Sponsors were generally co-operative too. In fact, one of them, General Mills, of Minneapolis, learning through Mrs. Lewis of the work being done by Iowa University’s Radio Division, contributed $4000 for a special study of children’s programs.

Mrs. Lewis’ report indicates a good beginning in coping with a vital problem. For it is vital, as Mrs. Harold V. Milligan, chairman of the council, emphasizes in her foreword to the report, when she quotes, “The nation marches forward on the feet of little children.”

He pointed out that departments of the Federal Government regularly utilize foreign language broadcasting facilities, including especially the Treasury in the Defense Savings campaign. The Federal Housing Administration, Department of Agriculture, Army, Navy, and Marine recruiting, Red Cross and other worthwhile patriotic projects are supported by foreign language broadcasting, Lang said.

DOROTHY LEWIS STARTS ANOTHER SWING AROUND COUNTRY

With the longest railroad ticket ever sold in her purse, Mrs. Dorothy Lewis has hit the trail again in the interest of better understanding between the country’s mothers and broadcasters. Heading west from New York, Mrs. Lewis already has held conferences in Syracuse, Rochester, Erie, Cleveland, Toledo and Indianapolis. She reports enthusiastic response from women’s groups and the unqualified support of radio stations.

The NAB wishes to thank those stations who have already helped Mrs. Lewis with her important job, and to urge stations in cities she has yet to visit, to give her their wholehearted cooperation.

NEWSPAPER HEARING

Morris L. Ernst of New York, prominently associated with the American Civil Liberties Union, testified Thursday at the Newspaper-Radio hearings before the FCC, that in his opinion newspapers should not own radio stations, even assuming they can do a better job. Of the opinion that the “pipe-lines to the marketplace of thought” must remain free from domination if the Bill of Rights and our democracy is to survive in competition with the Communists and Nazis, Mr. Ernst stated that he was fearful of any interlocking of controls of the “pipe-lines.” Unless we are successful in maintaining our philosophy of a “marketplace of thought,” he said, popular demand may force government to take over radio which would be worst of all and result in breakdown of the “pipe-lines.”

NEW EDUCATION ASSOCIATION

Broadcasting station educational directors and educators interested in radio may be interested in the organization of the Association for Education by Radio and its Journal, the first issue of which appeared in September. Applications for membership should be sent to Robert B. Hudson, 21 E. 18th St., Denver. Dues of $2 a year include a subscription to the Journal.

FEDERAL COMMUNICATIONS COMMISSION

Fly Discusses Hearings

FCC Chairman James Lawrence Fly at press conference early this week admitted that the Commission had not made any speed in so far as the newspaper-radio hearing is concerned but he called attention to the fact that it is impossible to run a hearing of that kind continuously and “it is pretty essential that we use only a couple of days a week on these kind of hearings where it takes time of the full Commission.” He said that he doubted if it would be possible for the Commission to make more progress on this hearing than it is at the present time.

Mr. Fly told the newsmen that he felt that the multiple ownership hearing, to be held on October 6, will only take a day or two. He said that the appearances are not yet complete for this hearing and the FCC has extended the time for the filing of briefs in connection with this case. The Chairman was informed by an official of the Commission who was present that at least fifteen briefs have been filed in connection with the multiple ownership hearing. Mr. Fly said that he understood that a dozen or fifteen people are getting together and will have one representative at this hearing and he assumed, he said, that there would be separate appearances but only one brief and one argument for this group.

Order No. 84 (Public Notice)

All interested parties who desire to appear and participate in the oral argument scheduled for October 6, 1941, in connection with Commission Order No. 84, re multiple ownership of standard broadcast stations, may do so by filing with the Secretary, not later than 10 a.m., October 4, 1941, written notice of intention to appear and amount of time required for argument.
FCC RULE AMENDED

FCC has taken the following action in connection with an amendment to its rules and regulations:

Amended Sections 14.14, 14.32, and 14.53, of Rules Governing Radio Stations in Alaska other than Amateur and Broadcast, to provide for the withdrawal of the frequency 2912 kilocycles from availability for assignment to stations in the Fixed Public, Public Coastal, and Ship Services in Alaska. This frequency will remain available for use by stations currently licensed therefor until the expiration date of the existing license (January 1, 1942).

FEDERAL COMMUNICATIONS
COMMISSION DOCKET

Following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, October 6. They are subject to change.

Monday, October 6

Oral Argument Before the Commission

To Be Held in Hearing Room 6121—New Post Office Building
Order No. 84

Section 3.35—Multiple ownership of standard broadcast stations.

Briefs and appearances filed by the following:

Buffalo Broadcasting Corp. Represented by: Frank D. Scott.

West Virginia Broadcasting Corp. (WWVA) and Monongahela Valley Broadcasting Co. (WMMN). Represented by: H. L. Lohnes & F. W. Albertson.

Massachusetts Broadcast Corp. (WCOPE and Broadcasting Service Organization, Inc. (WORL). Represented by: Ben S. Fisher.

Monday, October 6

Consolidated Hearing

NEW—Utica Observer-Dispatch, Inc., Utica, N. Y.—C. P., 1150 kc., 250 watts, unlimited.
NEW—Midland Radio Corporation, Utica, N. Y.—C. P., 1150 kc., 250 watts, unlimited.

Wednesday, October 8

KIDW—The Lamar Broadcasting Company, Lamar, Colo.—Renewal of license, 1150 kc., 100 watts, specified hours.

Friday, October 10

WSAM—Saginaw Broadcasting Company, Saginaw, Mich.—Modification of license, 1100 kc., 250 watts, unlimited.

FEDERAL COMMUNICATIONS
COMMISSION ACTION

APPLICATIONS GRANTED

KTFQ—KTFQ, Inc., St. Joseph, Mo.—Granted construction permit (B4-P-2177), to increase power to 2 KW, increase hours to unlimited, move transmitter to approximately 5/2 miles north-northeast of St. Joseph, Mo., install new transmitter and install directional antenna for day and night use.

Now operates on 680 kc., 500 watts night, 1/2 KW-LS, D to LS at San Francisco.

KDON—Monterey Peninsula Broadcasting Co., Monterey, Calif.—Granted construction permit (B5-P-32435), to increase power to 250 watts day and night and install new transmitter. Now operates on 1240 kc., 100 watts, unlimited time.

WMVA—William C. Barnes & Jonas Weiland, d/b as Martinsville Broadcasting Co. (Assignors), Martinsville Broadcasting Co., Inc. (Assignee), Martinsville, Va.—Granted consent to voluntary assignment of license (B2-AL-311), of Martinsville Broadcasting Co., Station WMVA, from William C. Barnes & Jonas Weiland, d/b as Martinsville Broadcasting Co., to Martinsville Broadcasting Co., Inc., for a total consideration of $13,100.

DESIGNED FOR HEARING

WLOL—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Application for construction permit (B4-P-3540), to install a new transmitter, change frequency to 630 kc., increase day power to 5 KW, move transmitter locally, and make changes in directional antenna system for day and night use.

WMIN—WMIN Broadcasting Co., St. Paul, Minn.—Application for construction permit (B4-P-3044), to change frequency to 630 kc., change power to 1 KW night, 5 KW day, directional antenna day and night, and install new transmitter and directional antenna. (To be heard jointly with above application of WLOL.)

KFDA—Amarillo Broadcasting Corp., Amarillo, Tex.—Application for renewal of license (B3-R-1005), for the period ending October 1, 1942. Granted temporary license, subject to whatever action may be taken by the Commission upon the pending application for renewal of license.

WELA—Federated Publications, Inc., Battle Creek, Mich.—Application for renewal of license (B2-R-311), granted temporary license, subject to whatever action may be taken by the Commission upon the pending application for renewal of license.

KSAN—Golden Gate Broadcasting Corp., San Francisco, Calif.—Application for construction permit (B5-P-3113), to change frequency to 1160 kc., increase power to 1 KW day and night, install a new transmitter and make changes in equipment and antenna.

John R. Scripps, Ventura, Calif.—Removed from pending files application for construction permit (B5-P-25863), for new station to operate on 1160 kc., 1 KW, unlimited time; this application to be heard jointly with KSAN above.

RENEWAL OF LICENSES

The following stations were granted renewal of licenses for the period ending October 1, 1942:

In the following cases licenses were extended upon a temporary basis only, pending receipt of and determination upon applications for renewal, for the period ending November 1, 1941:

In the following cases licenses were extended upon a temporary basis only, for the period ending November 1, 1941, pending receipt of and determination upon applications for renewal:

KAND, Corsicana, Texas; KWLM, Willmar, Minn.; WHBY, Appleton, Wis.; WISE, Ashe ville, N. C.

In the following cases licenses were extended upon a temporary basis only, for the period ending November 1, 1941, pending determination upon applications for renewal:

KID, Idaho Falls, Idaho; KITE, Kansas City, Mo.; WIRE and auxiliary, Indianapolis, Ind.; WORK, York, Pa.; WSBAR, Fall River, Mass.; WTAQ, Green Bay, Wis.; WWR, Woodside, (L. 1.), New York.

PLACED IN PENDING FILES

MISCELLANEOUS

W2X0Y—General Electric Co., New Scotland, N. Y.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 34320 kc. 2500 watts power, special emission for FM, with transmitter located at New Scotland, N. Y., for the period September 27 to October 27, 1941.

W2XQR—John V. L. Hogan, Long Island City, N. Y.—Granted extension of special temporary authority to operate a high frequency experimental broadcast station on 18720 kc. with 1000 watts power, special emission for FM, with transmitter located at 3104 Northern Blvd., Long Island City. Facsimile modulation may be employed in connection with the program of research and experimentation (no authority is contained herein to conduct a facsimile broadcast service). This authorization is granted for the period September 29 to November 26, 1941.

WABA—Agricultural Broadcasting Co., Chicago, Ill.—Granted special temporary authority to operate a special laboratory transmitter as a relay broadcast station on 39820 kc., with power of 1½ watt in order to record on the ground and to rebroadcast over WLS the human voice and the rate of the heart beat, and other scientific data during a free fall in the air prior to the opening of a parachute, for the period September 29 to October 25, 1941.

W4TA—The Capital Broadcasting Co., Inc., Schenectady, N. Y.—Granted extension of special temporary authority to operate with main studio at the transmitter of FM broadcast station W4TA for period September 29 to October 28, pending completion of ST transmitter at main studio specified in construction permit.

WCAT—South Dakota State School of Mines, Rapid City, S. Dak.—Granted special temporary authority to operate additional time from 6:30 to 10:30 p.m., CST, on October 3, 10, and 17, and from 9:30 to 10:30 p.m., on October 24, 31, and November 7, in order to broadcast football games only (B4-S-649).

WGTM—WGTM, Inc., Wilson, N. C.—Granted special temporary authority to operate with studio at 115 West Nash St., Wilson, N. C., in lieu of site specified in construction permit (B3-P-3166), for a period not to exceed 30 days (B4-S-955).

WCKY—L. B. Wilson, Inc., Cincinnati, Ohio.—Granted extension of special temporary authority to operate daytime with a non-directional antenna until sunset at Sacramento, Calif., for a period not to exceed 30 days beginning September 24, 1941, and ending in no event later than October 23, 1941.

WGNY—WGNY Broadcasting Co., Inc., Chicago, Ill.—Granted license (B1-L-1484) to cover construction permit (B1-P-2948) for change in frequency, increase in power, and installation of new transmitter. Also granted authority to determine operating power by direct measurement of antenna input (B2-L-1505) authorizing new station to operate on 1490 kc., 250 watts, unlimited time. Also granted authority to determine operating power by direct measurement of antenna power (B2-Z-1229).

WCNW—Arthur Fiske, Brooklyn, N. Y.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-1219).

WAFF—Pfeifer Publishing Co., Portable-Mobile—Present license for relay broadcast station extended upon a temporary basis only, for the period ending November 1, 1941, pending determination upon application for renewal.

The following applications for renewal of relay broadcast station licenses were granted for the period October 1, 1941, to October 1, 1942:

KCO, KFBA, WASJ, WSNJ, WOEC, WOE, WIOF, WIOG, WAFK, KEIR, WIEH, WCBJ, WLOY, WFM, KNBC, WBAC, KQCB, WAIM, KIEF, WATS, WEG, WEJ, WJEP, WAVB, WEMC, WHER, WAII, WGN, WGC, KBQ, WAAK, WENM, KAOY, WATD, KABH, WAWT, KBT and KBT.

The following relay broadcast stations' licenses were extended upon a temporary basis only, for the period ending November 1, 1941, pending determination upon applications for renewal:

WBG, KALO, WSMA and WSMM.

KADB—Nichols &Warinner, Inc., Portable-Mobile —Present relay broadcast station extended upon a temporary basis only, for the period ending November 1, 1941, pending receipt of and determination upon application for renewal.

WAUB—WSIX, Inc., Portable-Mobile—Present relay broadcast station extended upon a temporary basis only, for the period ending November 1, 1941, pending receipt of and determination upon application for renewal.

KEFZ—reporter printing Co., Fond du Lac, Wis.—Granted license to cover construction permit for new transmitter, changes in antenna and increase in power (B4-L-1496). Also granted authority to determine operating power by direct measurement of antenna input (B5-Z-1221).

KTB—Tacoama Broadcasters, Inc., Tacoma, Wash.—Granted license to cover construction permit for new station, and for authority to determine operating power by direct measurement of antenna input (B5-Z-1124).

WBR—American-Republic, Inc., Waterbury, Conn.—Granted authority to determine operating power by direct measurement of antenna input (B1-Z-918).

WCRS—Greco, Inc., Greenwood, S. C.—Granted license to cover construction permit as modified for new station, and author-
ity to determine operating power by direct measurement of antenna input (B3-Z-1218 and B3-L-1504).

KGBS—Harbenzi Broadcasting Co., Harlingen, Tex.—Granted license to cover construction permit for new station (B3-L-1498). Also granted authority to determine operating power by direct measurement of antenna input (B3-L-1213).

WISN—Hearst Radio, Inc., Milwaukee, Wis.—Granted construction permit to move old RCA 1-D-A transmitter to site of new transmitter and use as auxiliary transmitter for emergency use only (B4-P-3299). Granted license to cover construction permit B4-P-2608, as modified, for new transmitter, install directional antenna for night and day use, increase power and move of transmitter (B4-L-1483). Also granted authority to determine operating power by direct measurement of antenna input (B4-Z-1208).

WEBC—Head of the Lakes Broadcasting Co., Duluth, Minn.—Granted modification of construction permit (for increase in power and install directional antenna for night use) for extension of completion date from September 21 to November 21, 1941 (B4-MP-1391).

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Granted modification of construction permit (for increase in power, install directional antenna for night use, move transmitter and change frequency) for extension of completion date from September 21, 1941, to January 23, 1942 (B3-MP-1393).

WHDH—Mathes Radio Co., Inc., Boston, Mass.—Granted modification of construction permit (for installation of new transmitter and directional antenna for night use, and increase in power and hours of operation) for change in transmitting equipment (B1-MP-1384).

KOIL—Central States Broadcasting Co., Omaha, Nebr.—Granted license to cover construction permit for increase in power and installation of directional antenna for night use, and increase in power and hours of operation (B2-L-1495). Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1218).

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio.—Granted license to cover construction permit B2-P-3257, for reinstatement of construction permit B2-P-2628 as modified, with authorized changes in equipment, to cover construction permit (B2-L-1495). Granted authority to determine operating power by direct measurement of antenna input (B2-Z-1220).

WNAI—Harold Thomas, Bridgeport, Conn.—Granted license to cover construction permit as modified, for new station, and authority to determine operating power by direct measurement of antenna input (B1-L-1508 and B1-Z-1233).

WGCV—E. E. Krellbach, Wolf Point, Mont.—Granted modification of license to move studio from Main & Fourth Streets, Wolf Point, Mont., to adjacent railroad (rural) Wolf Point, Mont. (B5-MP-1080).

KMED—Mrs. W. J. Virgin, Medford, Ore.—Granted modification of license to move studio from Sparta Building, Main & Riverside Ave., Medford, to Rose Lane, Medford, Ore. (B5-ML-1801).

KTUG—Tucson Broadcasting Co., Tucson, Ariz.—Granted construction permit (B5-P-3284) to install new transmitter, antenna system and move studio and transmitter to Broadway and Tindle Ave., Tucson.

WHKL—United Broadcasting Co., Columbus, Ohio.—Granted construction permit (B2-P-3255) to install new vertical antenna system, and move transmitter to Obetz Road, between Parsons Ave. and Lockbourne Road, Columbus.

FEDERAL TRADE COMMISSION ACTION

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Codrin Corporation, 333 Sixth Ave., New York, engaged in the sale and distribution of a medicinal preparation designated "Magnesia S. Pellegrino," is charged in a complaint with misrepresentation and false advertising. (4598)

Theophillus J. Craig, 14 Federal Ave, Quincy, Mass., engaged in the sale and distribution of tombstones and monuments in commerce, is charged in a complaint with misrepresentation. (4600)

Fisher Nut and Chocolate Co., 2327 Wycliff St., St. Paul, Minn., engaged in the manufacture and sale of candy and nut products, is charged in a complaint with the use of lottery methods in the distribution of its products. (4591)

St., Philadelphia, are charged in a complaint with the use of unfair and deceptive acts and practices in the sale and distribution of neckwear. (4593)

Millinery Stabilization Commission, Inc., an organization of some four hundred manufacturers of women's headwear, and its officers and members; United Hatters, Cap and Millinery Workers International Union, an unincorporated labor union of millinery workers, and its officers and members; two Locals of the Union, and their officers and members; and nine associations whose membership includes hundreds of importers, manufacturers and suppliers of raw materials, supplies and equipment used in the manufacture of millinery, are charged in a complaint with entering into and effectuating agreements, conspiracies, policies and practices restraining and monopolizing the business of manufacturing, selling and distributing millinery in the New York trade area, and from that area to the country at large. (4597-D)

National Coat & Suit Industry Recovery Board—Charges of entering into agreements and conspiracies to monopolize the business of selling and distributing women's and children's clothing are made in a complaint in which fourteen of the largest associations of coat and suit manufacturers in the country, the National Coat and Suit Industry Recovery Board, the membership of which includes representatives of such associations, and their members, and International Ladies' Garment Workers' Union, an unincorporated union of workers in the garment industry, its officers, executive board members and members, are named as respondents. Scores of officers and members of the associations of manufacturers and officers and board members of the Recovery Board and of the Union also are named individually as respondents. (4596)

Nature's Herb Co., 1260 Market St., San Francisco, Calif., engaged in the sale and distribution of a medicinal preparation advertised as “Sterling Capsules,” is charged in a complaint with misrepresentation and false advertising. (4601)

Pratt Food Co., 124-130 Walnut St., Philadelphia, engaged in the sale and distribution of medicinal preparations for chickens designated “Pratt's Inhalant” and “Pratt's Poultry Regulator,” is engaged in the sale and distribution of a medicinal preparation and of the Union also are named individually as respondents.

Scores of officers and members of the associations of manufacturers of millinery, are charged in a complaint with entering into and effectuating agreements, conspiracies, policies and practices restraining and monopolizing the business of manufacturing, selling and distributing millinery in the New York trade area, and from that area to the country at large. (4597-D)

Radio Distributors—Leona Johnson, trading as Radio Distributors, 36 North Dearborn St., Chicago, has been ordered to cease and desist from the use of lottery methods in the sale and distribution of radios and other articles of merchandise. (4157)

Sterling Appliance Company—Nolan B. Stalkey, trading as Sterling Appliance Co., 4703 S. Hoover St., Los Angeles, has been ordered to cease and desist from false advertising and misrepresentation in the sale of a short wave diathermy device for treating diseases. (4542)

Joseph Warner Furniture Corporation, 42 East 33rd St., New York, operating so-called dealers or trade showrooms under the name “Salem House” and engaged in the distribution of household furniture, has been ordered to cease and desist from misrepresentation in the sale of such preparations. (4485)

STIPULATIONS

During the past week the Commission made public the following stipulations:

Huc Barth, trading as “Dark Eyes,” 2110 W. Madison St., Chicago, engaged in the sale of a dye for eyelashes and eyebrows, called “Dark Eyes,” has stipulated that he will cease and desist forthwith from disseminating any advertisement of the preparation which fails conspicuously to include therein a statement to the following effect:

“Caution: Prolonged or frequent use of this preparation may result in permanent discoloration of the skin and mucous membranes.”

Provided, however, that such advertisement need contain only the statement:

“Caution: Use only as directed on the label.”

if and when the lable bears the first described caution conspicuously displayed thereon and the accompanying labeling bears adequate directions for its use. (3214)

Burrell-Dugger Co., Indianapolis, Ind., engaged in selling two drug preparations for poultry designated “Don Sung” and “Avicol,” has stipulated to discontinue representing that “Don Sung” is a new product, or is concentrated, or that it is of Chinese origin; that it will increase egg production in cases other than those of poultry whose ration is deficient in the particular elements supplied by this product; or that use of the respondent's
products will keep poultry strong or healthy. The respondent further agrees to discontinue any representation regarding diarrhea or bowel disorders in poultry which represent that “Avicoil” is of any benefit in the prevention or treatment of all such cases, or of cases due to a parasitic infection, or is effective beyond its effects as an intestinal astringent. (02884)

Charles F. Dowd, Inc., Toledo, an advertising agency which disseminated advertisements on behalf of Michigan Magnetic Mineral Water Co. and Natural Ray Mineral Water Co., both of St. Louis, Mich., has stipulated that in disseminating advertising for the product designated “Mineral Water,” it will discontinue representing that the product is a remedy or cure for stomach, bladder or kidney troubles and other ailments; that it is a safeguard, a way to gain, retain or maintain health, a preventive of infantile paralysis or other ailments, or an aid to muscle or bone development; or that it builds up resistance to colds or headaches. The respondent further agrees to cease and desist from representing that his product is as natural alone or in combination, will grow hair or are remedies or cures for dandruff or for diseased scalps. The respondent further agrees to cease and desist from representing, through the use of the terms “Hair Grower” and “Hair Food,” or any other terms of similar import, that such preparations will grow hair or feed the hair and scalp. (02887)

Fulto School of Beauty Culture—Emma G. Fulton, doing business as Fulto School of Beauty Culture, 4508 Prairie Ave., Chicago, engaged in selling a number of hair preparations, has stipulated to discontinue representing that “Fulto Hair Grower, Plain,” also designated “Fulto Plain Hair Food,” will feed the scalp and hair, and that this preparation and “Fulto Hair Grower (Double Strength)” and “Fulto Liquid Hair Grower,” either alone or in combination, will grow hair or are remedies or cures for dandruff or for diseased scalps. The respondent further agrees to cease and desist from representing, through the use of the terms “Hair Grower” and “Hair Food,” or any other terms of similar import, that such preparations will grow hair or feed the hair and scalp. (02886)

Los Angeles Pharmacal Company—Robert Salazar, trading as Los Angeles Pharmacal Co. and as Hidalgo Pharmacy (Hidalgo Farmacia), 204 North Main St., Los Angeles, engaged in the sale and distribution of medicinal preparations, has stipulated to discontinue representing that the product designated “Stoma-vita,” is a remedy or effective treatment for stomach, acidity, dyspepsia, or gastric trouble generally, or that it will afford the user the satisfaction of eating everything desired without distress or ill effects. (3126)

Marvelous Vegetable Yeast Company—Harold Hilty, trading as Marvelous Vegetable Yeast Co., Milwaukee, Wisc., engaged in the sale and distribution of a poultry and animal food supplement, has stipulated to discontinue representing that the product designated “Marvelous Vegetable Yeast” constitutes a remedy or effective treatment for diseases of poultry or animals generally or is efficacious in correcting or preventing worms and codicillos in chickens, pigeons or other poultry and worms in dogs, cats, foxes, minks or other animals. (5213)

Newell Pharmacal Company—J. E. Eggers, trading as Newell Pharmacal Co., Clayton Station, St. Louis, engaged in selling an alleged treatment for the tobacco habit designated “Tobacco Redemer,” consisting of a combination of drug preparations together with dietary information, has stipulated in a supplemental stipulation to discontinue representing that his product is certain to cure one of the tobacco habit, and, by use of the word “Pharmaceutical” in his trade name or otherwise, that he prepares the preparations or maintains a pharmacy or pharmaceutical facilities or that he maintains a laboratory wherein tests have been made indicating their efficacy. (040)

John G. Poorman, Tinley Park, Ill., engaged in selling “Poorman’s Poultry Brooder and Battery Equipment,” has stipulated to cease and desist from representing that the product is as natural as a hen; that artificial temperatures of 90° to 100° cause stench and disease or that his equipment eliminates such conditions; that his equipment is more sanitary or broods stronger or healthier chicks or poults, or that growth would be more rapid than the products of all direct heated brooders; or that the mortality is likely to be any lower with this brooder than with other types of brooding equipment. (02888)

Right-O-Products Company—Robert M. Froehlich, trading as Right-O-Products Co., 635 W. 170th St., New York, engaged in selling health foods and medicinal preparations, has stipulated to cease certain representations in the sale of his products. (02882)

Rev. H. E. Studier—H. E. Studier, trading as Rev. H. E. Studier, 2059 Euclid Ave., Lincoln, N. B., engaged in selling a medicinal preparation designated “Miracle Salve,” has stipulated to cease and desist from representing that Miracle Salve is a remedy or cure for, or has any therapeutic effect in the treatment of pains, gout, arthritis, neuritis and other ailments. (02885)

FTC CLOSES CASES

The Federal Trade Commission ordered closed without prejudice a case resulting from a complaint issued against Harry Berman, Inc., 1337 G St., N. W., Washington, D. C., operator of a luggage shop, and Morris Goldring, itinerant peddler, who had been charged with violation of the Federal Trade Commission Act in the sale of fountain pens.

The Commission order notes that the respondent Harry Berman, Inc., did not engage in the advertising and sales practices as alleged in the complaint and the whereabouts of the respondent Morris Goldring cannot be ascertained.

The case was ordered closed without prejudice to the Commission’s right to resume proceedings, should future facts so warrant.

The Commission has also dismissed a complaint issued against Globe-Union, Inc., Milwaukee, manufacturer of storage batteries and radio accessories, alleging violation of the Robinson-Patman Act.

Also the Commission has ordered that a complaint issued against D. J. Easterlin, trading as D. J. Easterlin & Co., Charleston, S. C., charged with violation of the brokerage section of the Robinson-Patman Act, be dismissed.

Commission has ordered that the complaint issued against A. J. Goforth, West Asheville, N. C., charged with misrepresentation in the sale and distribution of medicinal preparations concocted from herbs, be closed without prejudice to the right of the Commission, should the facts so warrant, to reopen the case and resume trial thereof in accordance with its regular procedure.
